Department Expert & Reporting Coordinators

Your responsibilities, complete workflow, exact clicks and return paths.

Read first: the Start Here guide explains how the whole system works. Then use this manual to do your part, check the outcome and hand work to the right person.

Understand your job before the buttons

Keep this page in mind whenever you receive a new record. It explains your responsibility and where your part stops.

Your job

Record the department's real results against its approved activities. Keep evidence and comments clear, save the work, and correct returned entries.

What you receive

Approved assignments from the department's Directorate, source registers for the period, and reviewer comments when a section is returned.

Who receives your work

The assigned coordinator or backup sends completed sections to the responsible Department Directorate. Other Experts prepare entries but do not submit on the team's behalf.

Your limits and important distinctions

Coordinator and backup are two responsibilities assigned to active Department Experts. They are not a separate permission role. You do not approve the plan or grant final performance approval.

Your workflow, from first action to finish

Read down the page. Each step has an outcome; do not jump ahead simply because a button is visible.

1

Find your approved work

Open Assigned Objectives. If an activity is absent, ask the Chief or Directorate to check its assignment approval.

2

Choose the correct period

Open the weekly, monthly or daily workspace that matches the activity frequency. An activity override can differ from the department default.

3

Enter the actual result

Use the approved unit and the measured value. Add notes and evidence; choose a valid completion state.

4

Save and check readiness

Click Save all activities. Resolve missing values, missing evidence and Not applicable reasons.

5

Coordinator or backup submits

Click Submit completed draft / returned sections. Read the new status; the Directorate is the next reviewer.

6

Correct only what was returned

Read the comment, amend the existing section, save and resubmit it. Follow the history until the report reaches final approval.

Find the task you need

Use the page number or click a task name in the PDF. Section introductions explain the purpose before the screen-by-screen actions.

Completion checklist and help 31

First access and everyday account safety

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

Use your own account. Your department and role decide what you can see and which decisions you can make. Never use somebody else's account to reach a missing button.

Before you click

Have your official account details ready. Open the address supplied by IT, enter your email and Access Key, then click Authenticate. A first-password screen appears only when your account requires it.

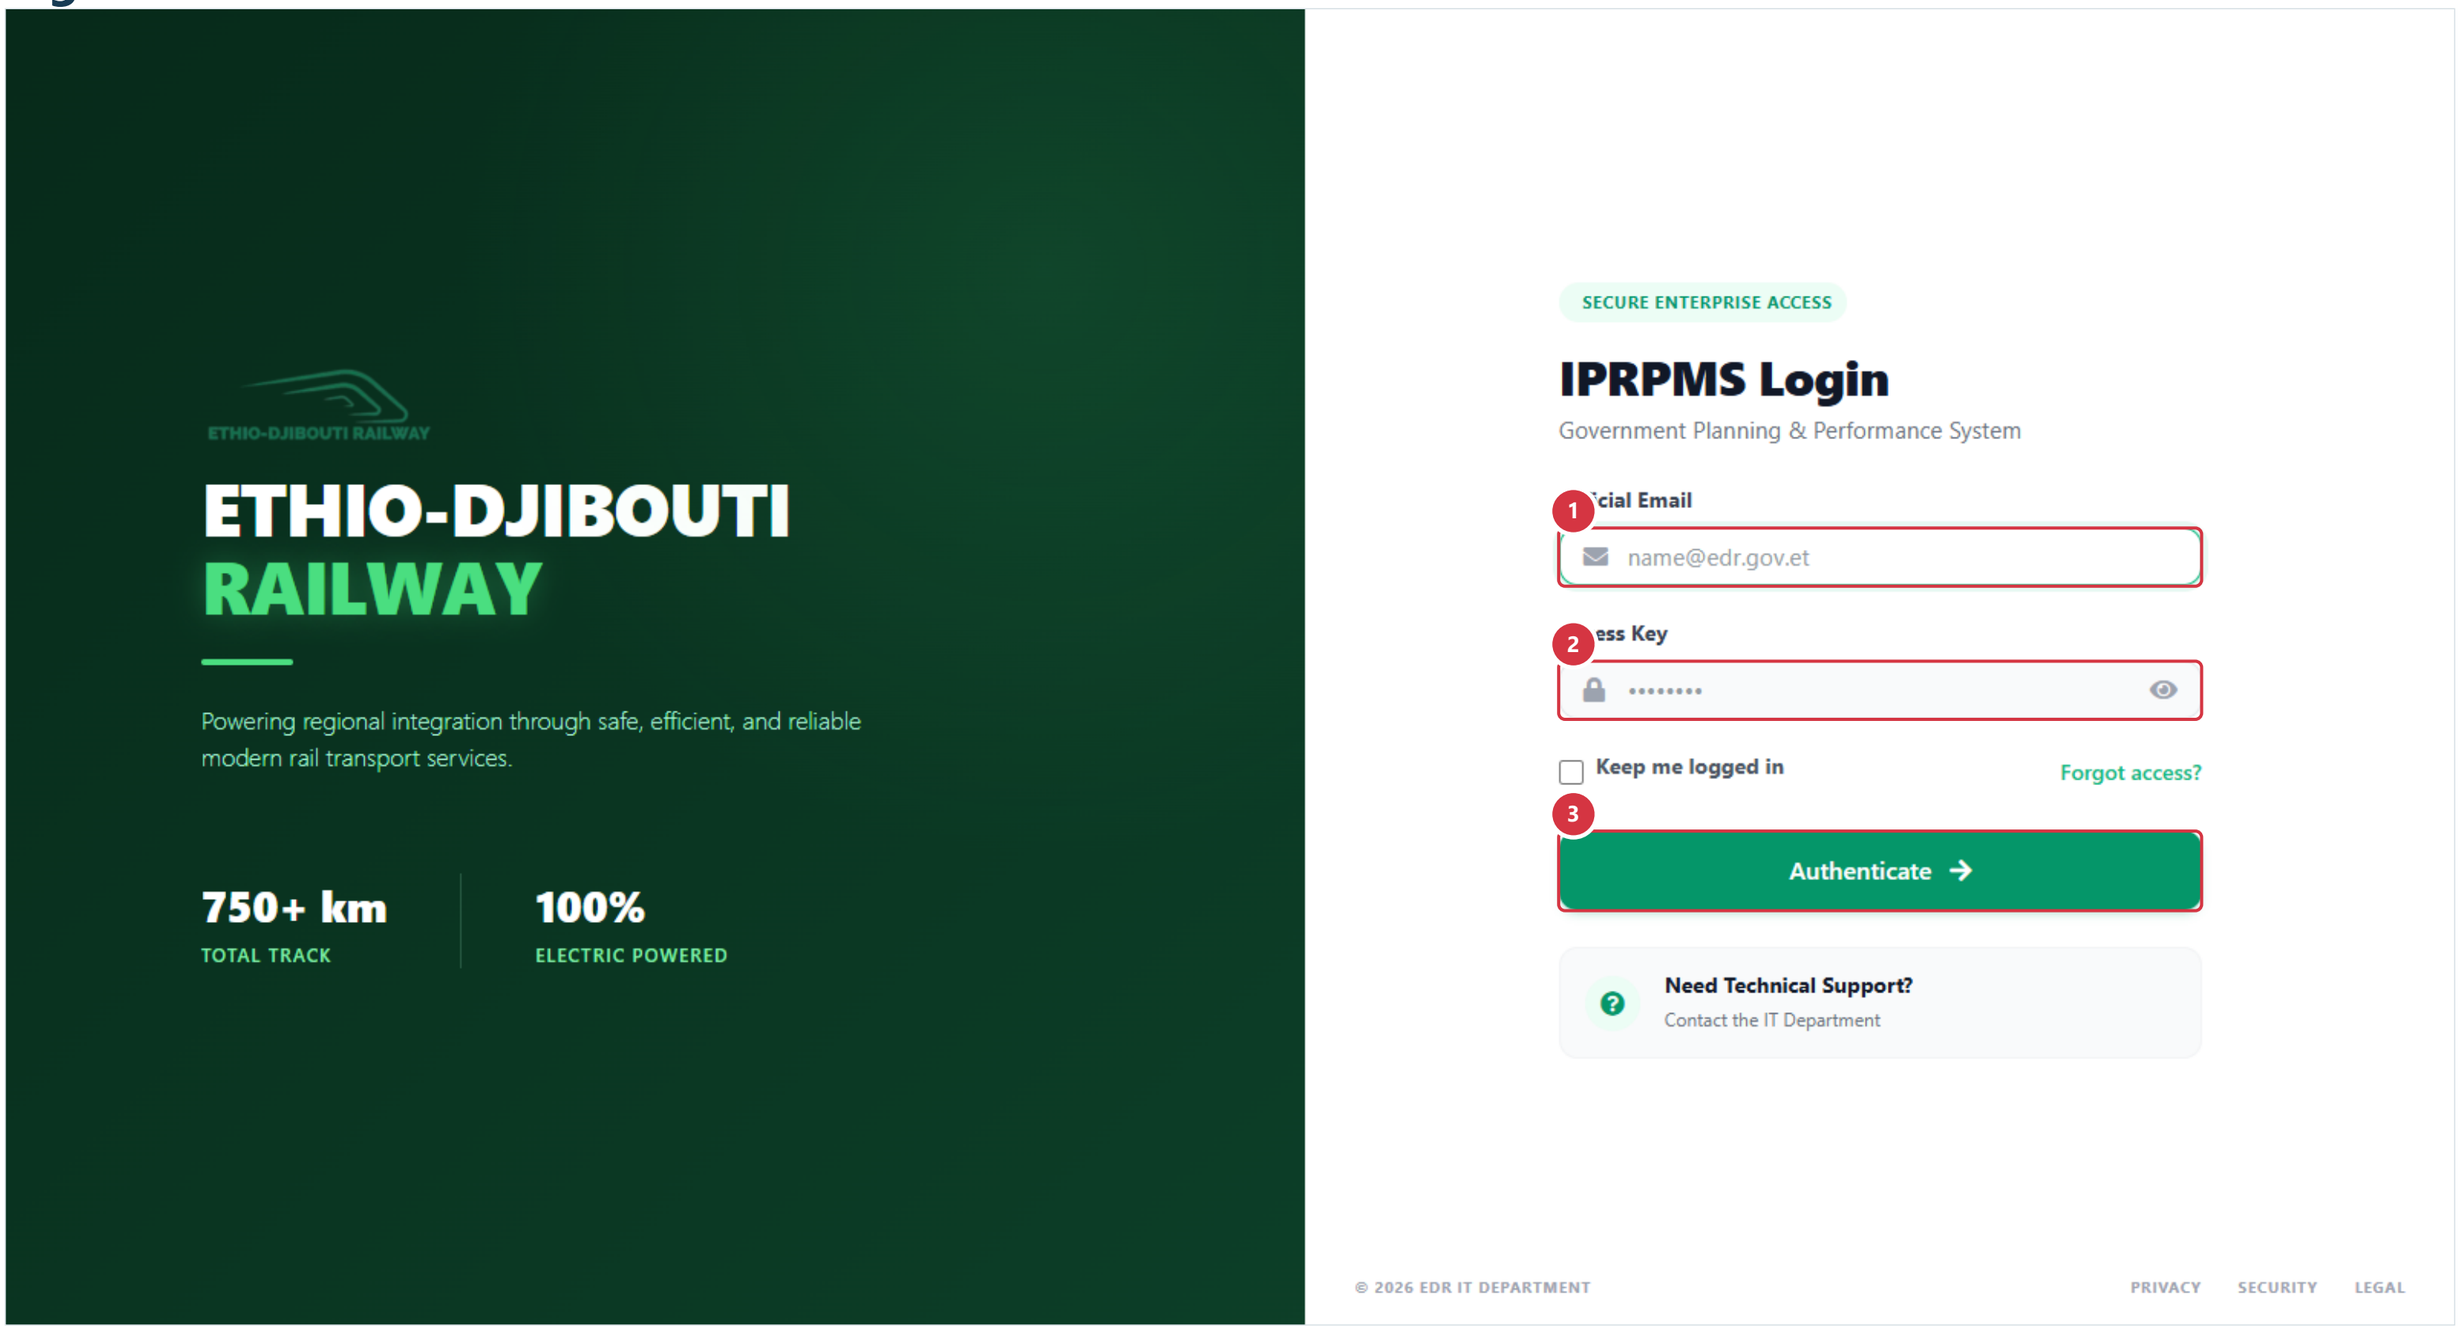

What to check

Check the name and role at the top right. Change your temporary password when prompted. Your profile is for your own name, email and password; department and role changes belong to the administrator.

How you know it worked

You can open the dashboard with the correct account. The notification bell shows work sent to you. On a shared computer, sign out when finished and do not choose Keep me logged in.

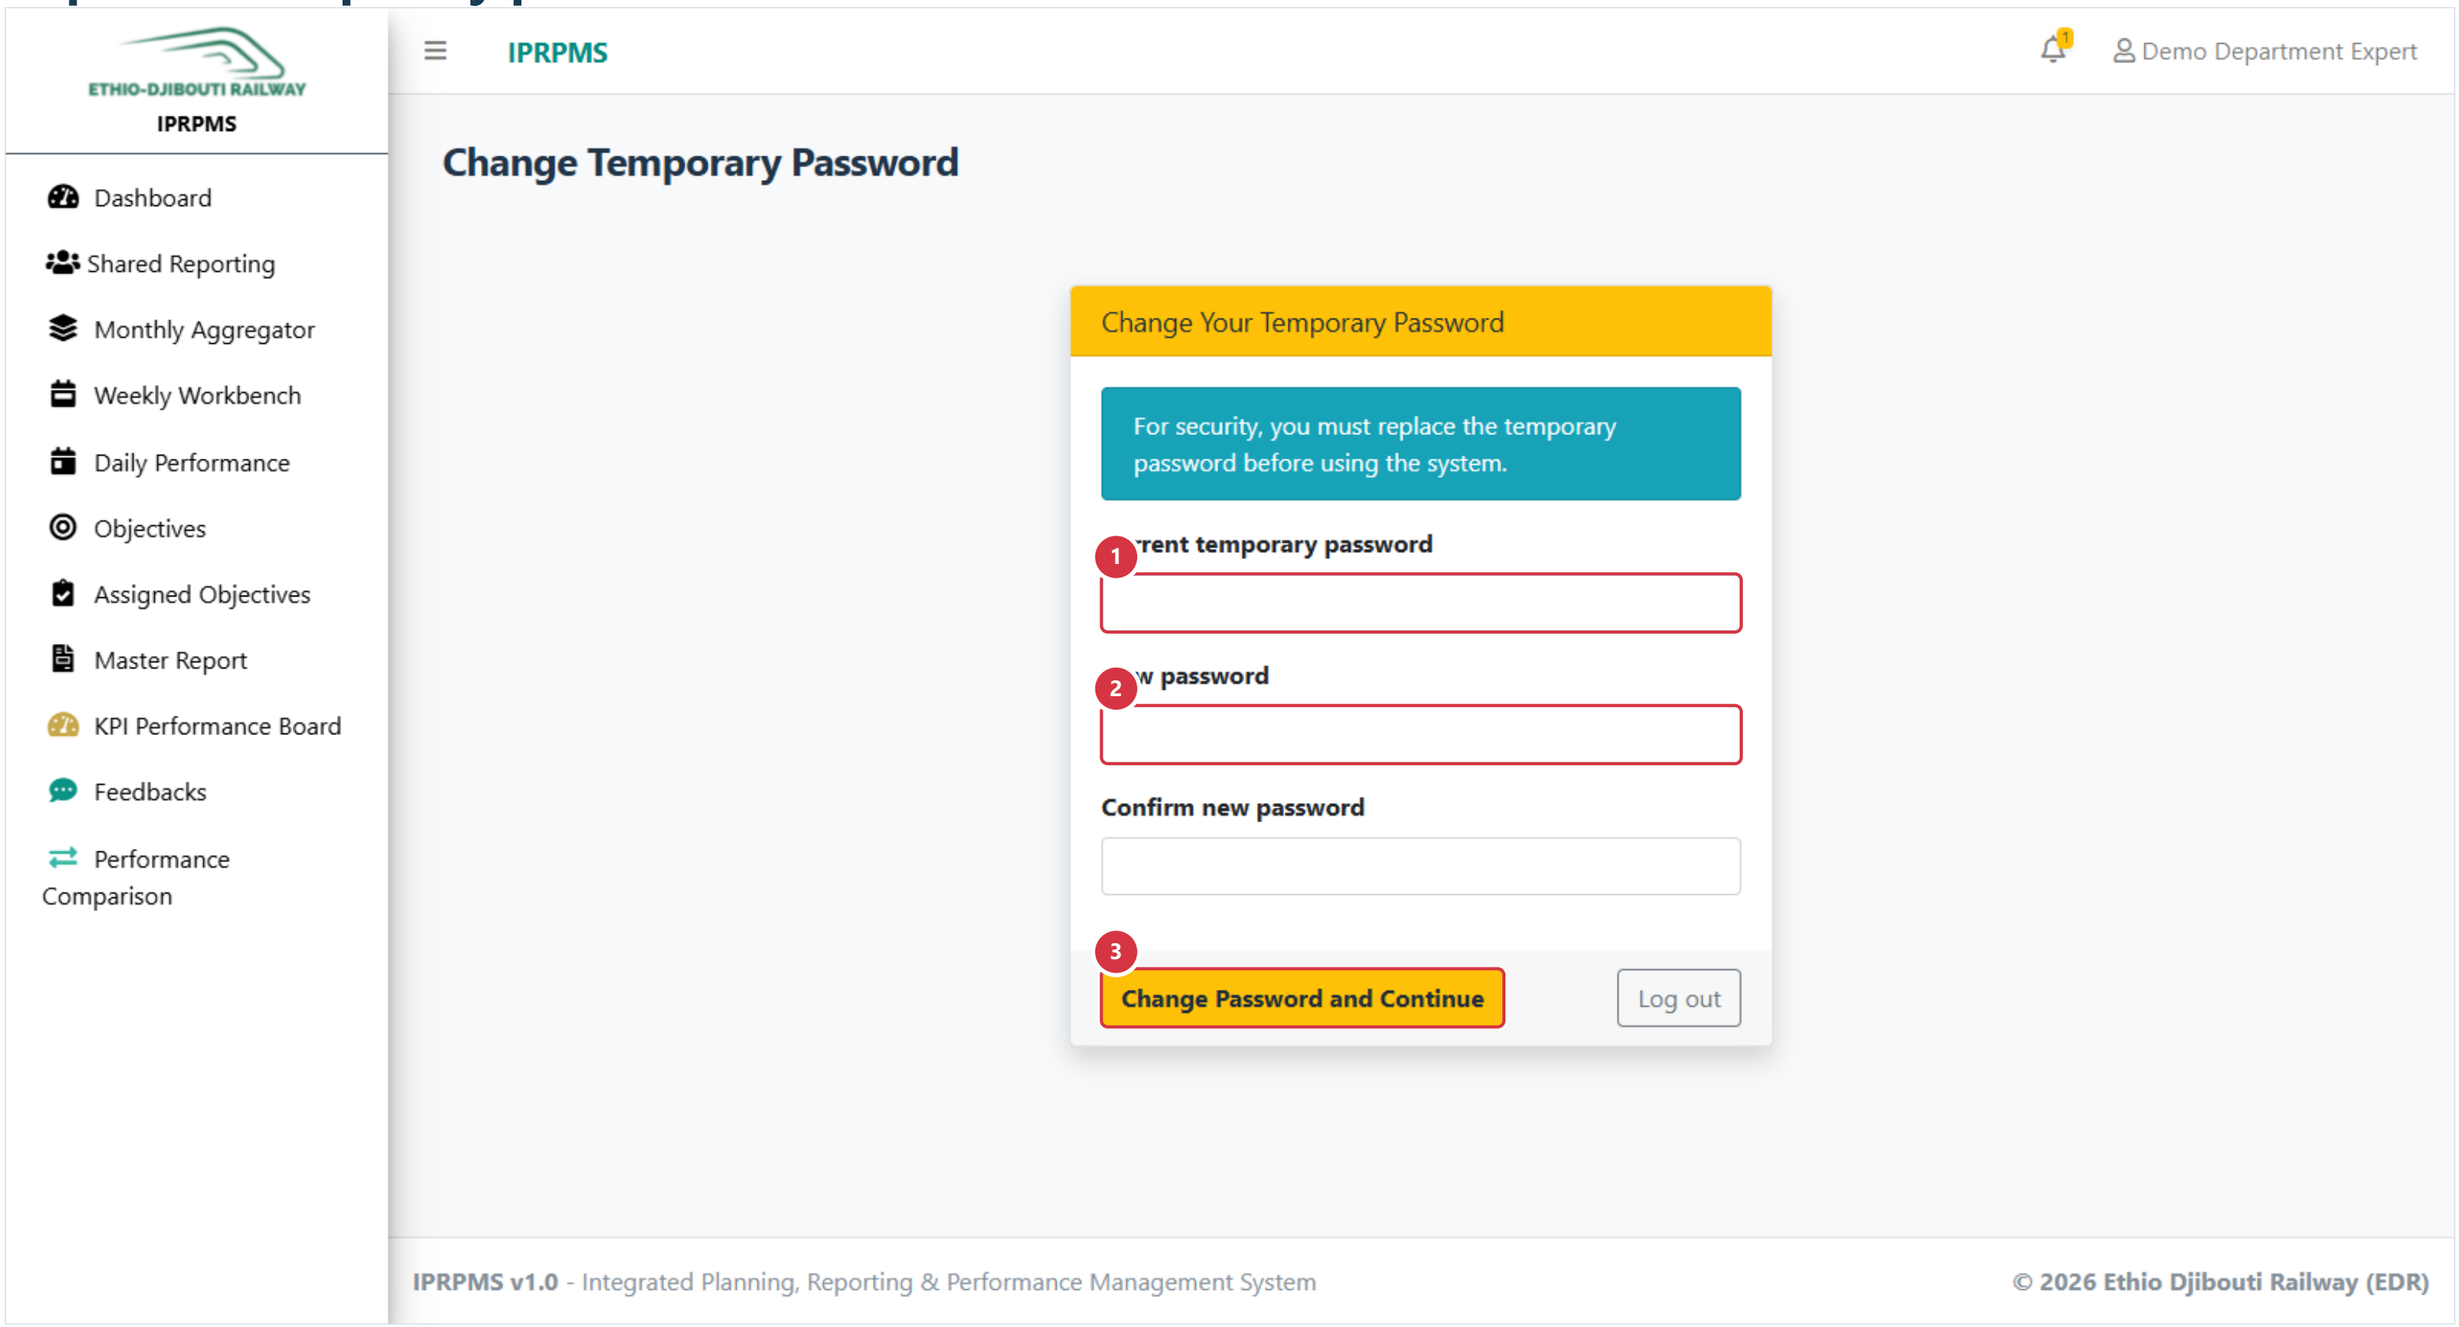

Sign in to IPRPMS

1. Enter your official email in Official Email.
2. Enter your own access key in Access Key.
3. Select Keep me logged in only on your own device, then click Authenticate.

After this step: The dashboard opens after authentication. Password fields in this handbook remain blank.

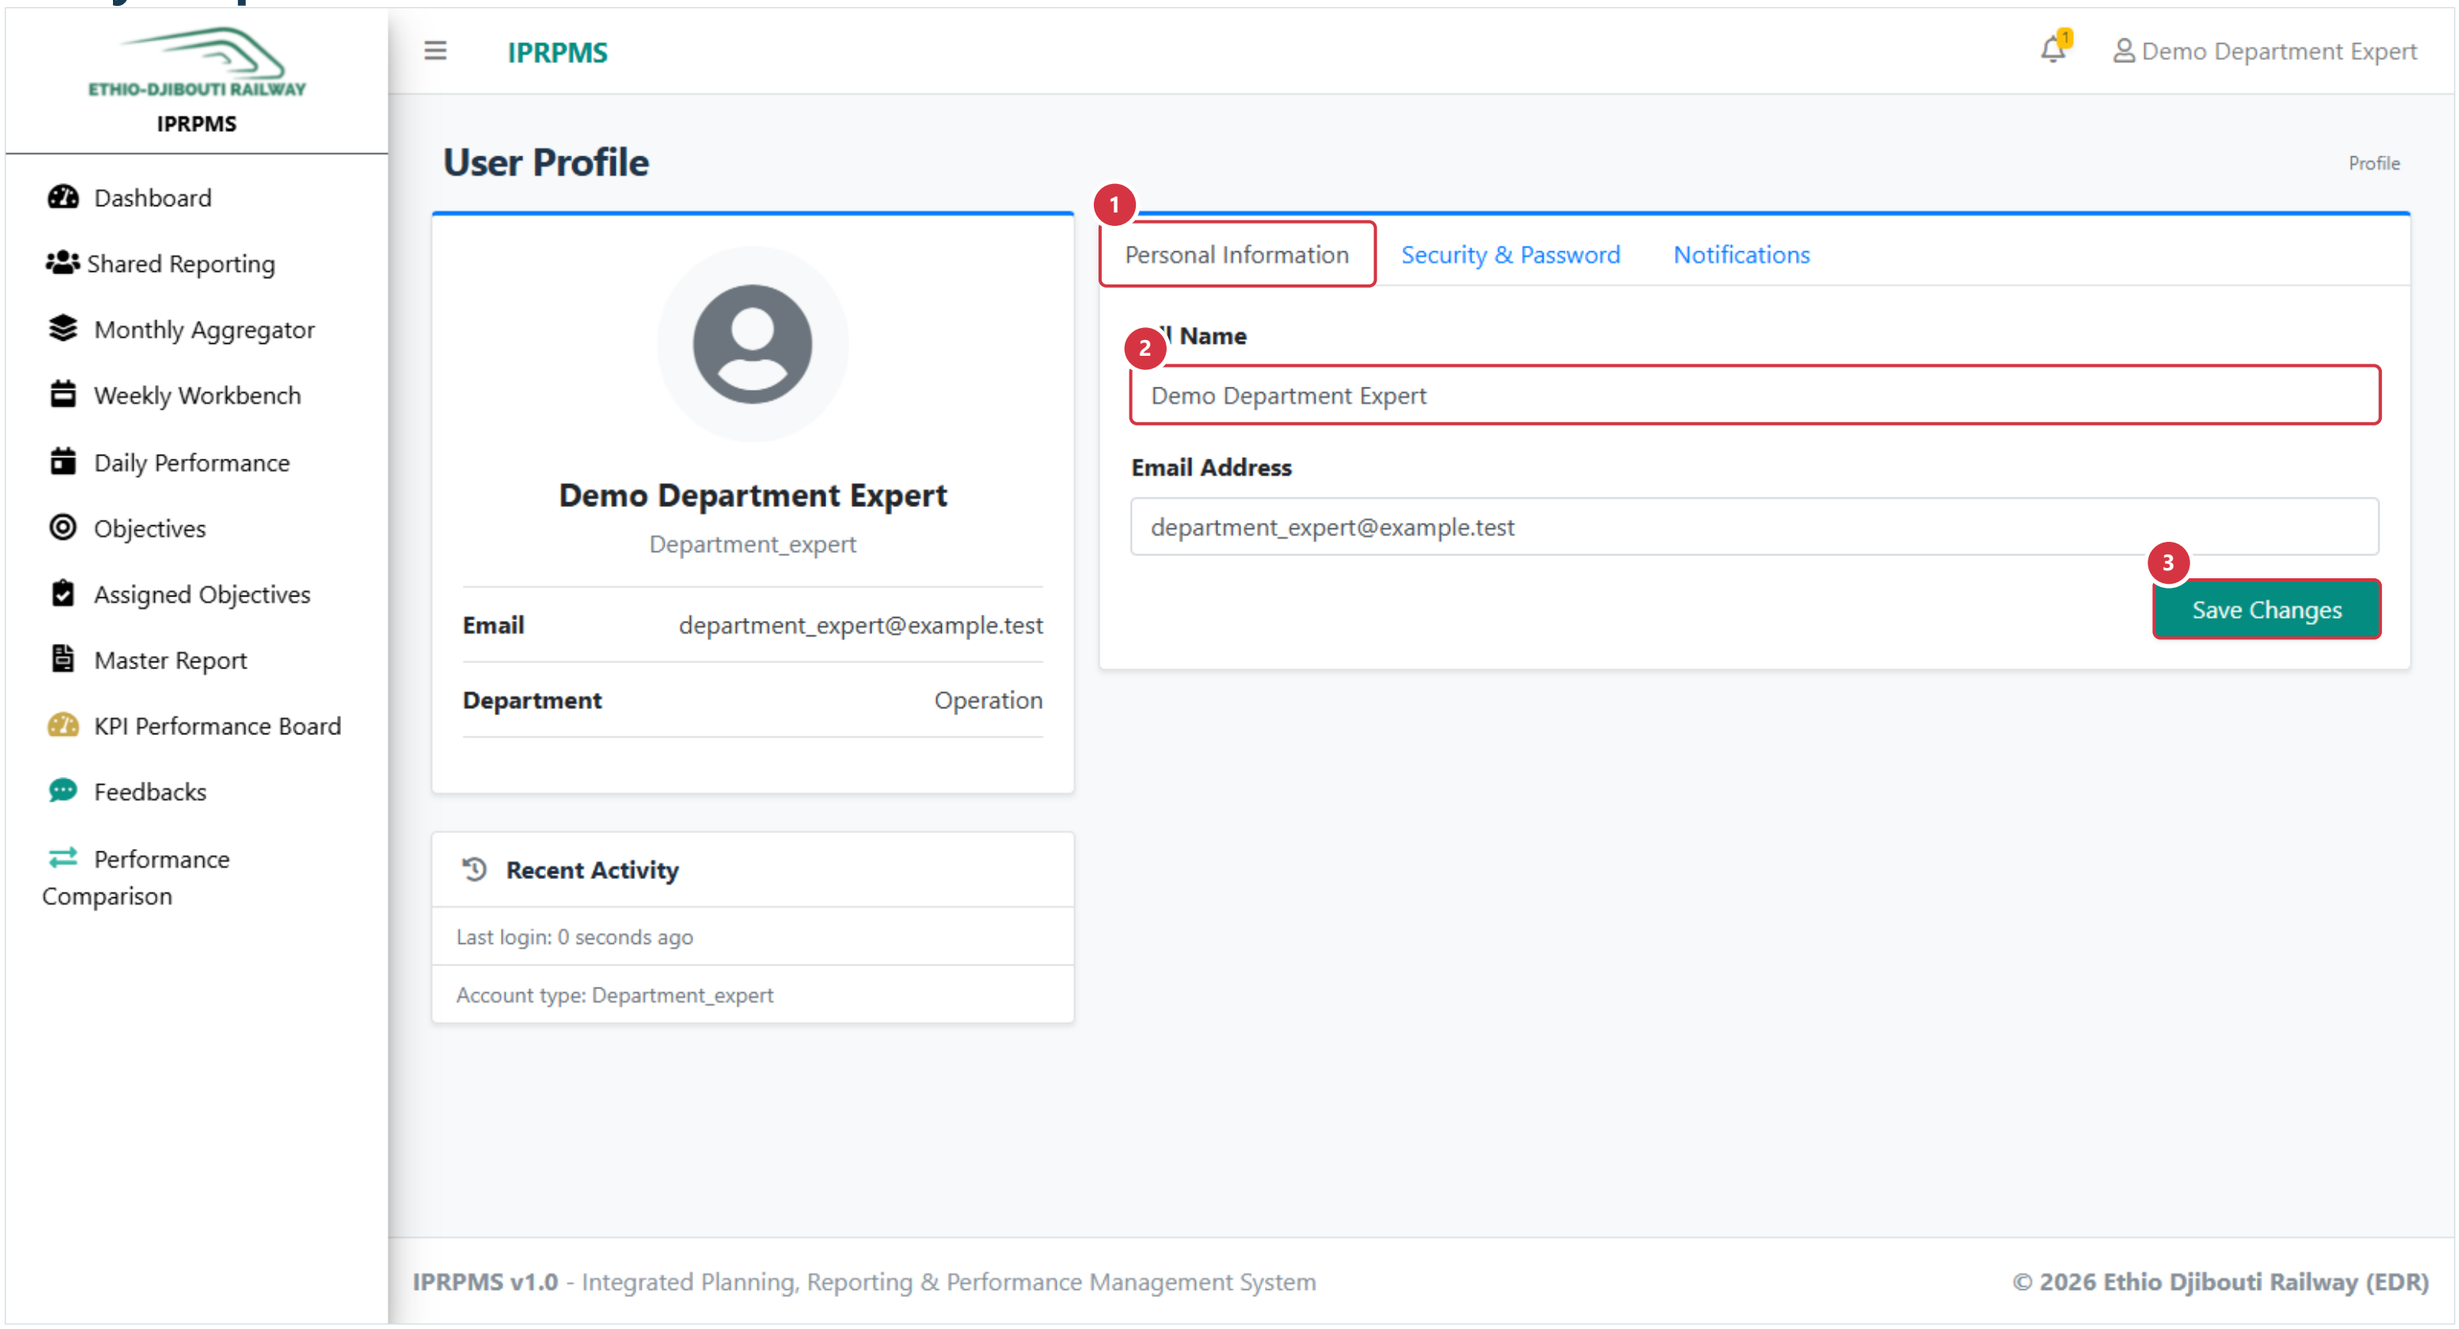

Replace a temporary password

1. Enter the current temporary password.
2. Enter a new private password and repeat it in Confirm new password.
3. Click Change Password and Continue.

After this step: This screen appears when the administrator requires a first password change.

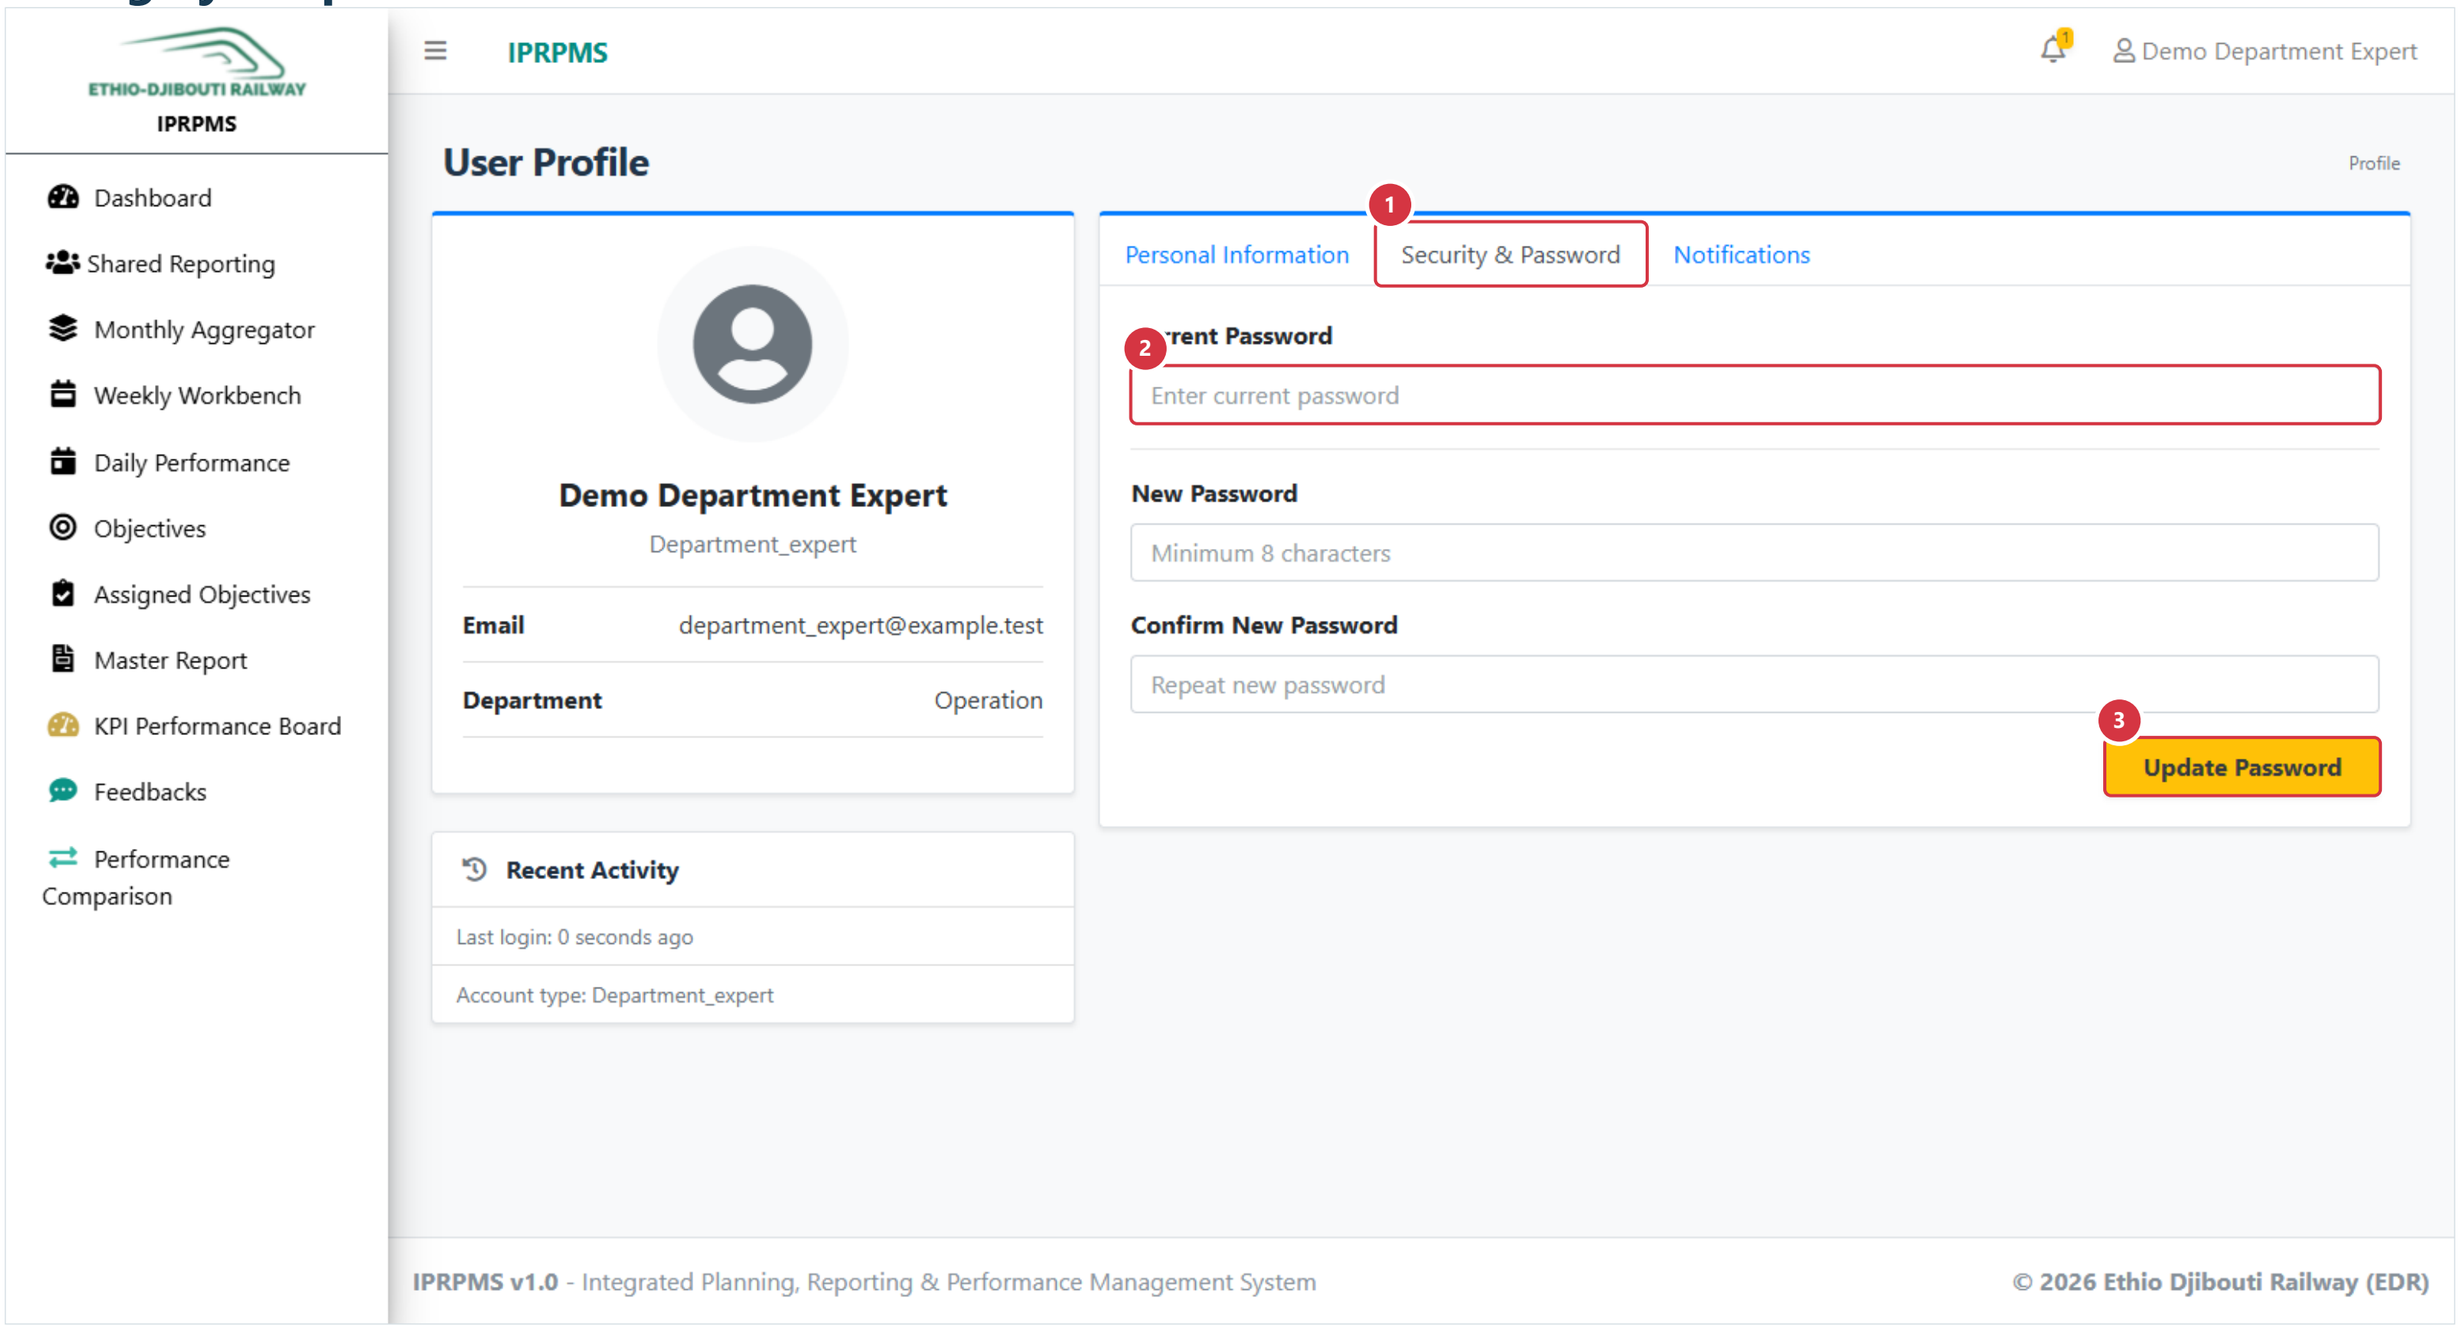

Edit your personal information

1. Click Personal Information in Profile.
2. Update Full Name or Email Address.
3. Click Save Changes and confirm the success message.

After this step: Department and role assignments are managed by the administrator, not through this form.

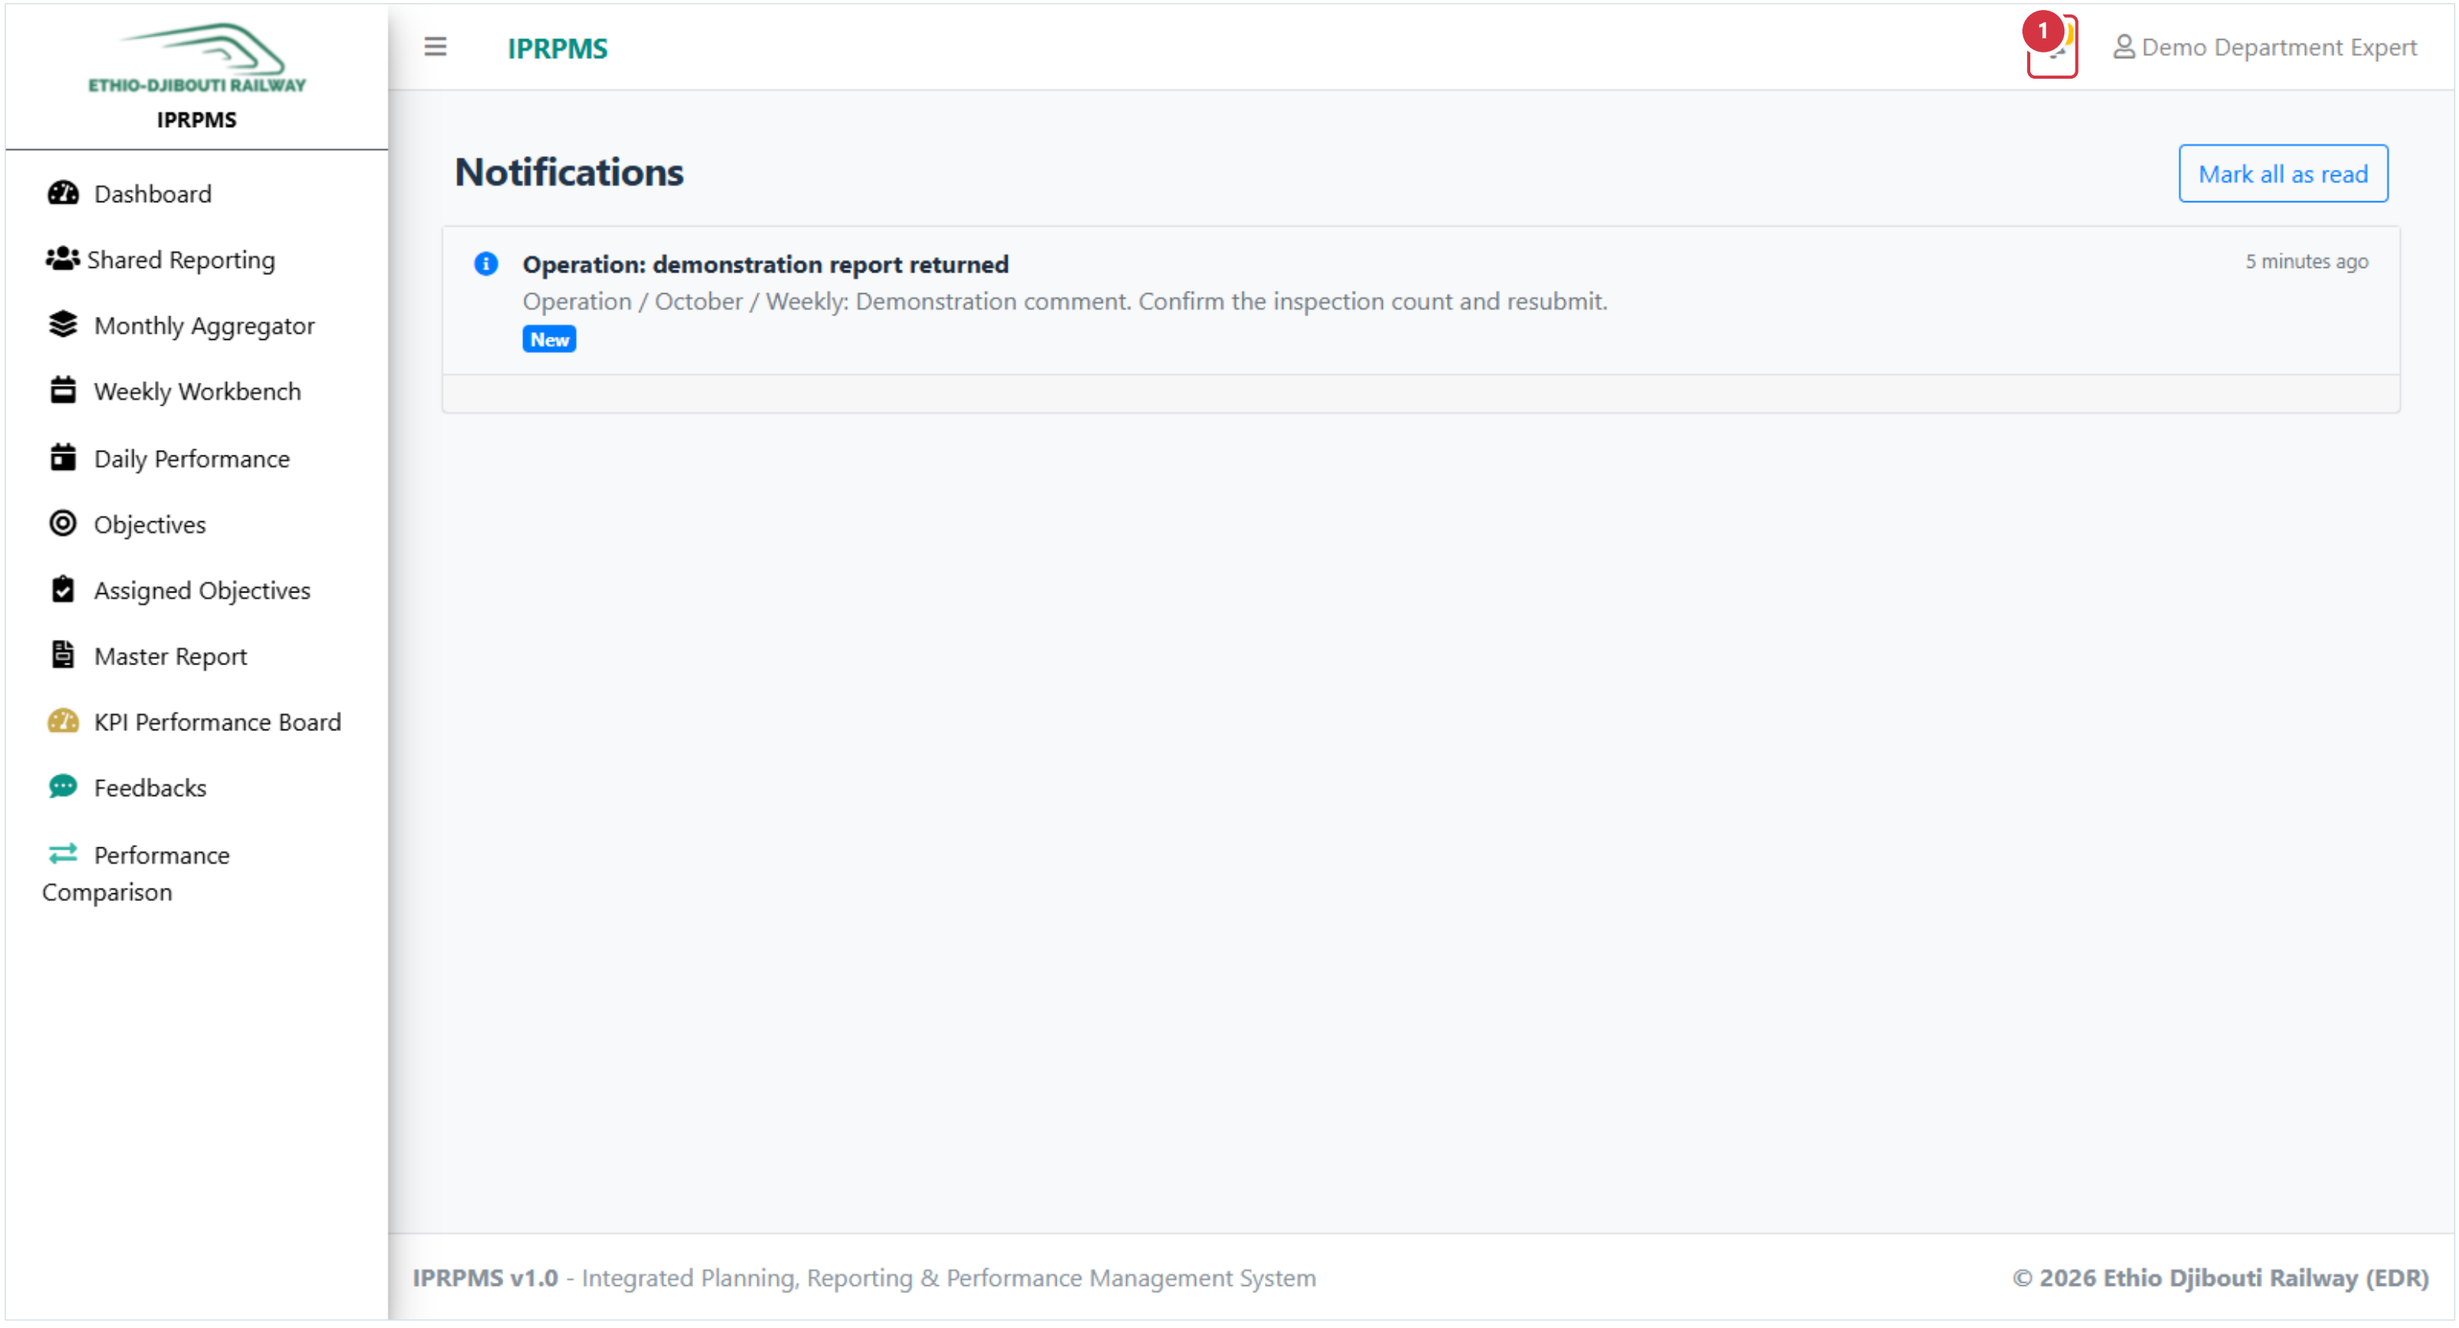

Change your password

1. Click Security & Password.
2. Enter your current password, a new password and its confirmation.
3. Click Update Password.

After this step: Use a private password. The fields are deliberately empty in this training capture.

Read workflow notifications

1. Open the notification bell or Notifications page.
2. Read the department, period, action and review comment.
3. Open the linked record or mark the notice read after acting on it.

After this step: Marking a notification read does not approve, correct or submit the underlying record.

Understand your approved assignments

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

These are the activities your department is allowed to report. Plan creation and assignment approval happen before performance entry.

Before you click

Open Assigned Objectives for your department and year. Ask the Chief which activities and source registers you are responsible for.

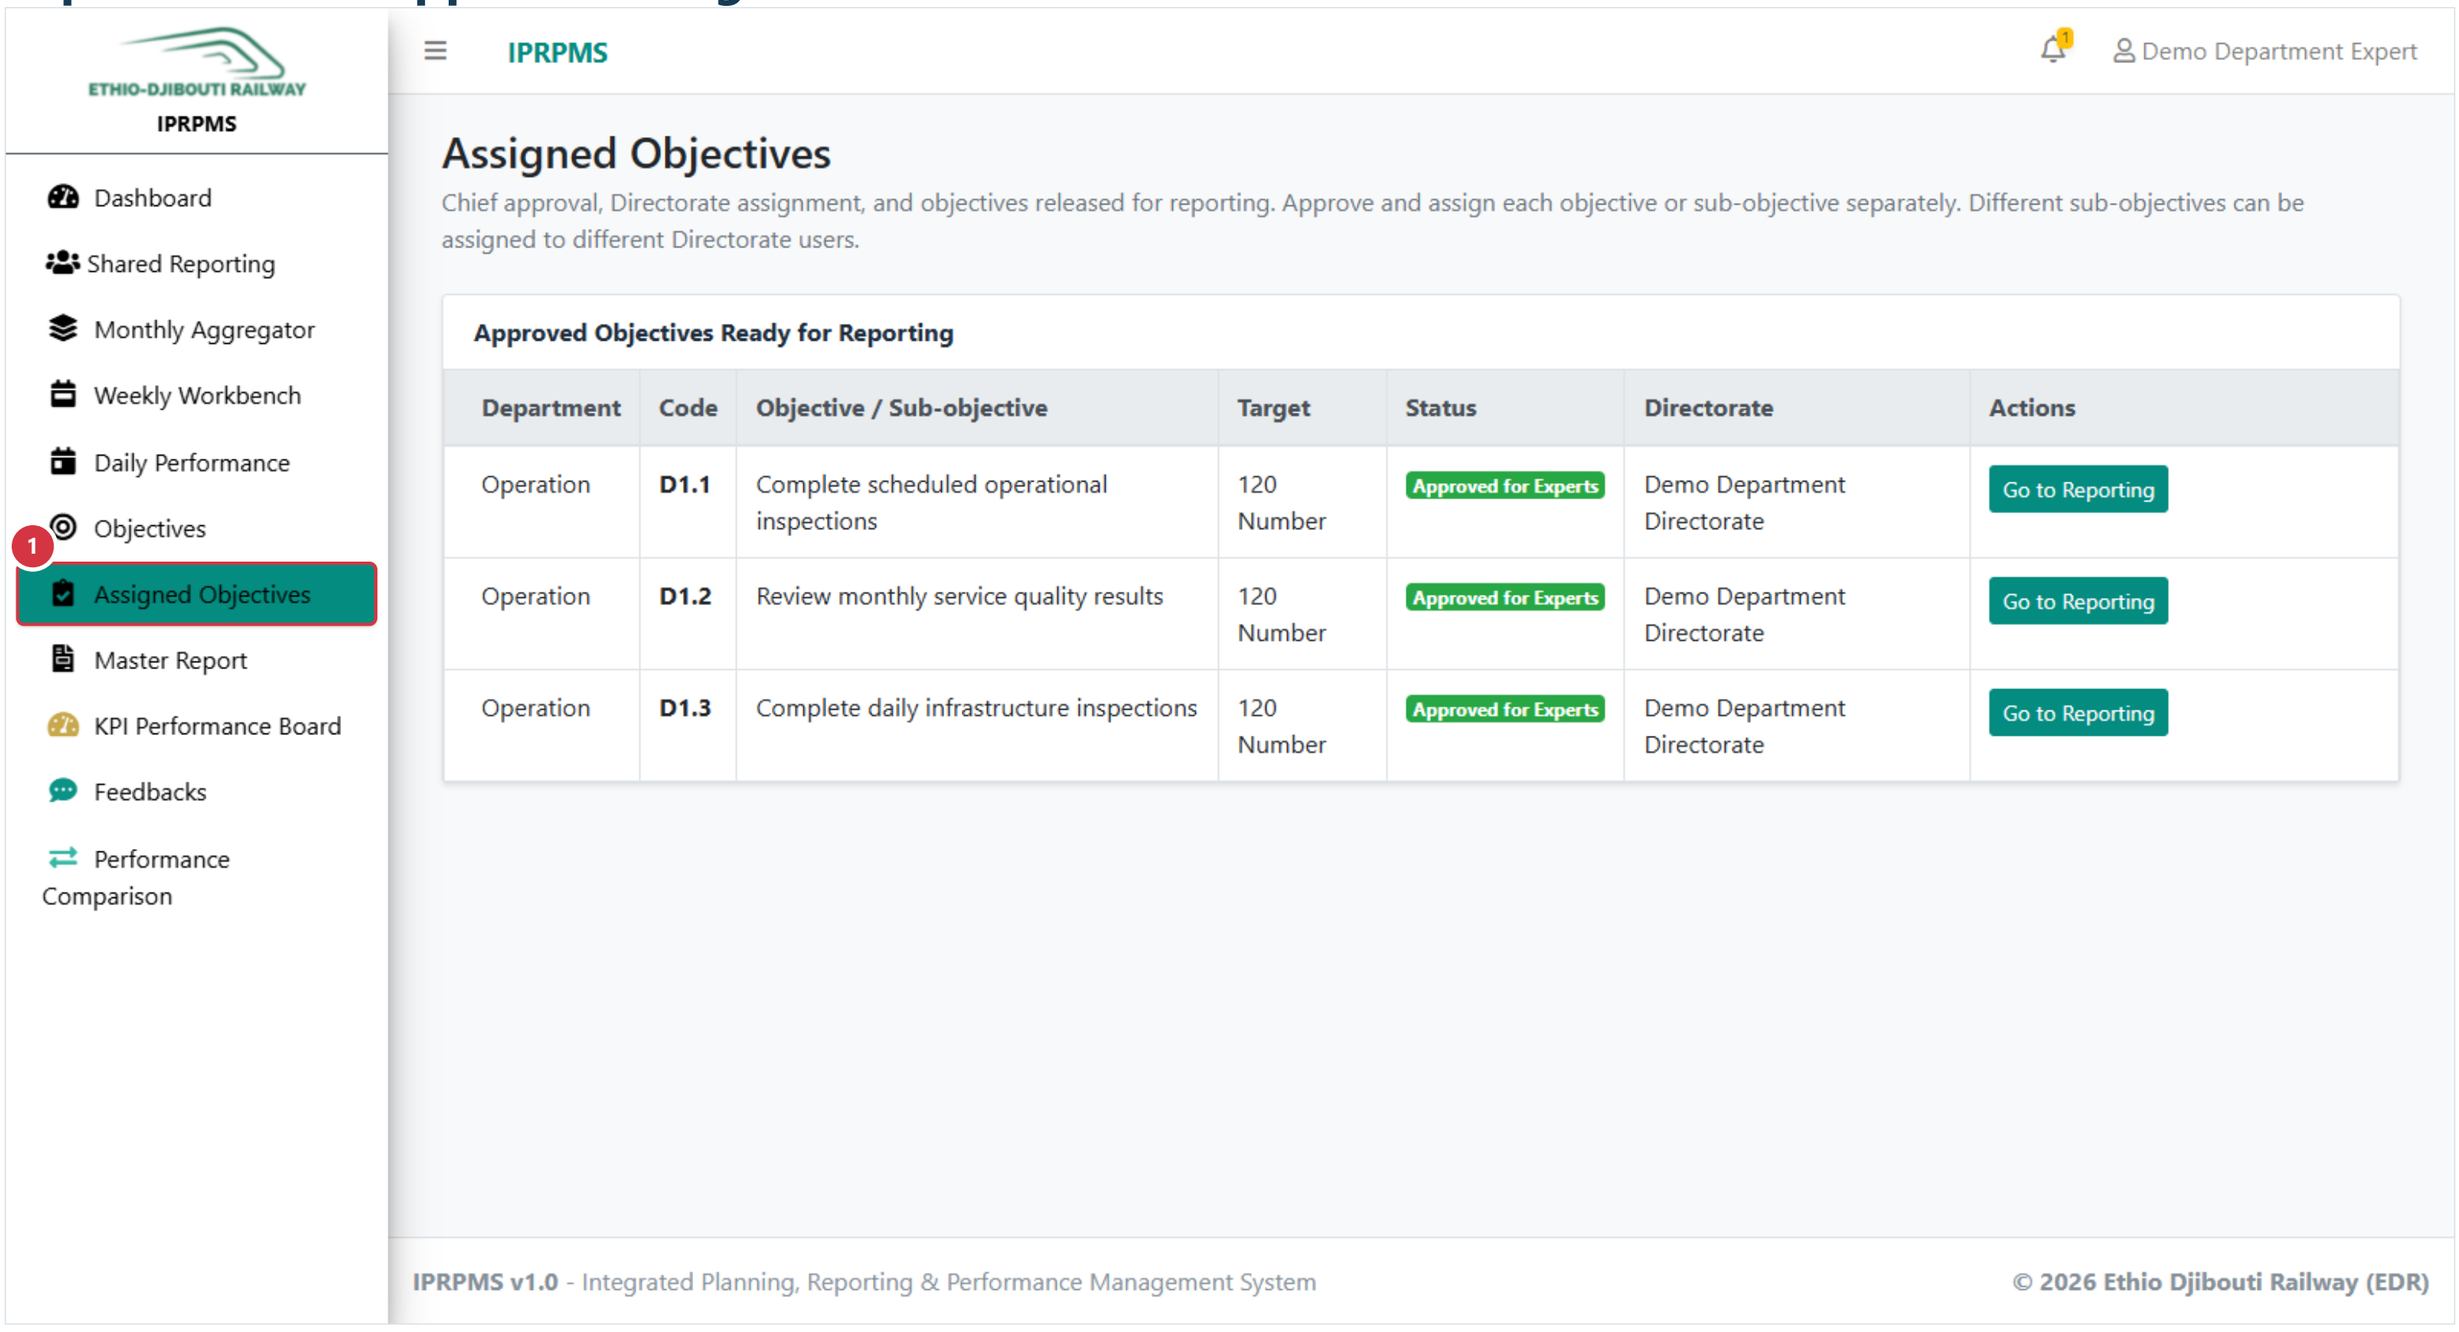

What to check

Read the code, description, unit, target and frequency. If a monthly-only activity appears incorrectly in weekly work, request a frequency correction rather than reporting it twice.

How you know it worked

The Directorate has approved the assignment for Experts and the correct activity appears in your reporting workspace.

Expert: confirm approved assignments

1. Open Assigned Objectives.
2. Confirm the activity is approved for Experts.
3. Read its target and unit, then open the reporting module for its frequency.

After this step: The assignment screen confirms what your department is responsible for reporting.

Enter results and submit the department report

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

A plan says what should happen. A performance entry says what actually happened. Enter actual results against the approved activities; do not rewrite the target to make the result look better.

Before you click

Confirm the department, plan year, reporting month and frequency. Choose the week where required. Use approved assignments and the supporting registers or evidence for that exact period.

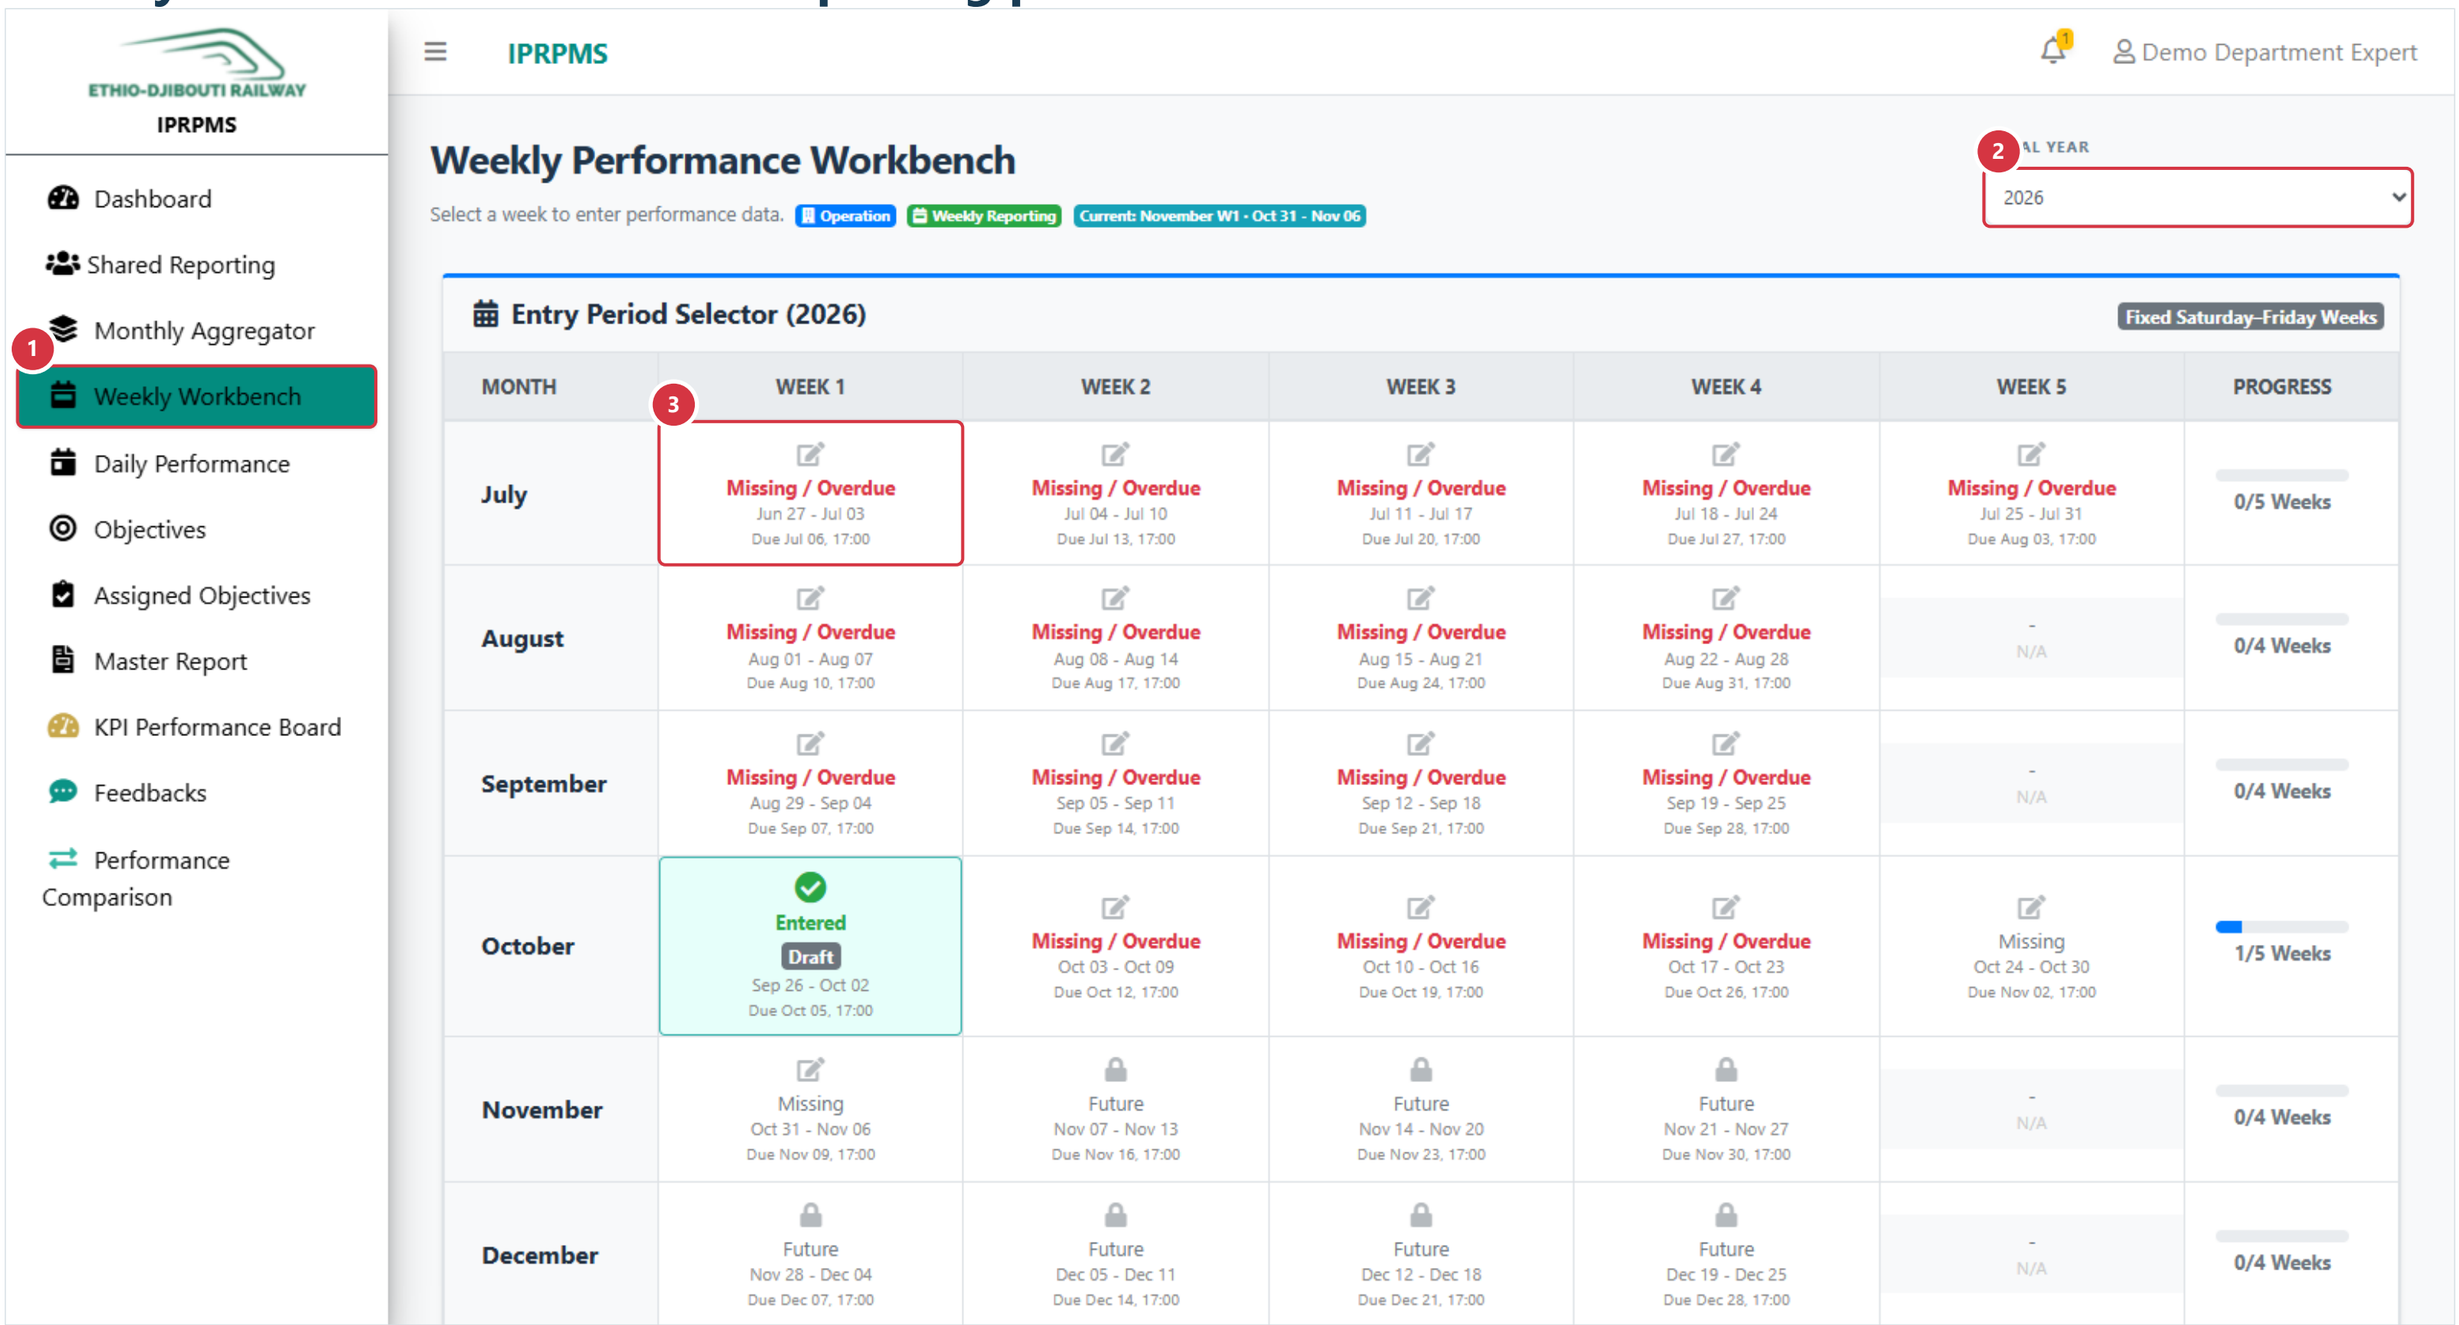

What to check

Use the activity's unit. A blank value means not entered, not zero. Use zero only when the measured result really is zero. Choose Not applicable only with a valid reason. Save all activities before submitting.

How you know it worked

All required rows are ready or validly marked Not applicable. The coordinator or backup clicks Submit completed draft / returned sections. The report moves to Directorate review; saving alone does not send it.

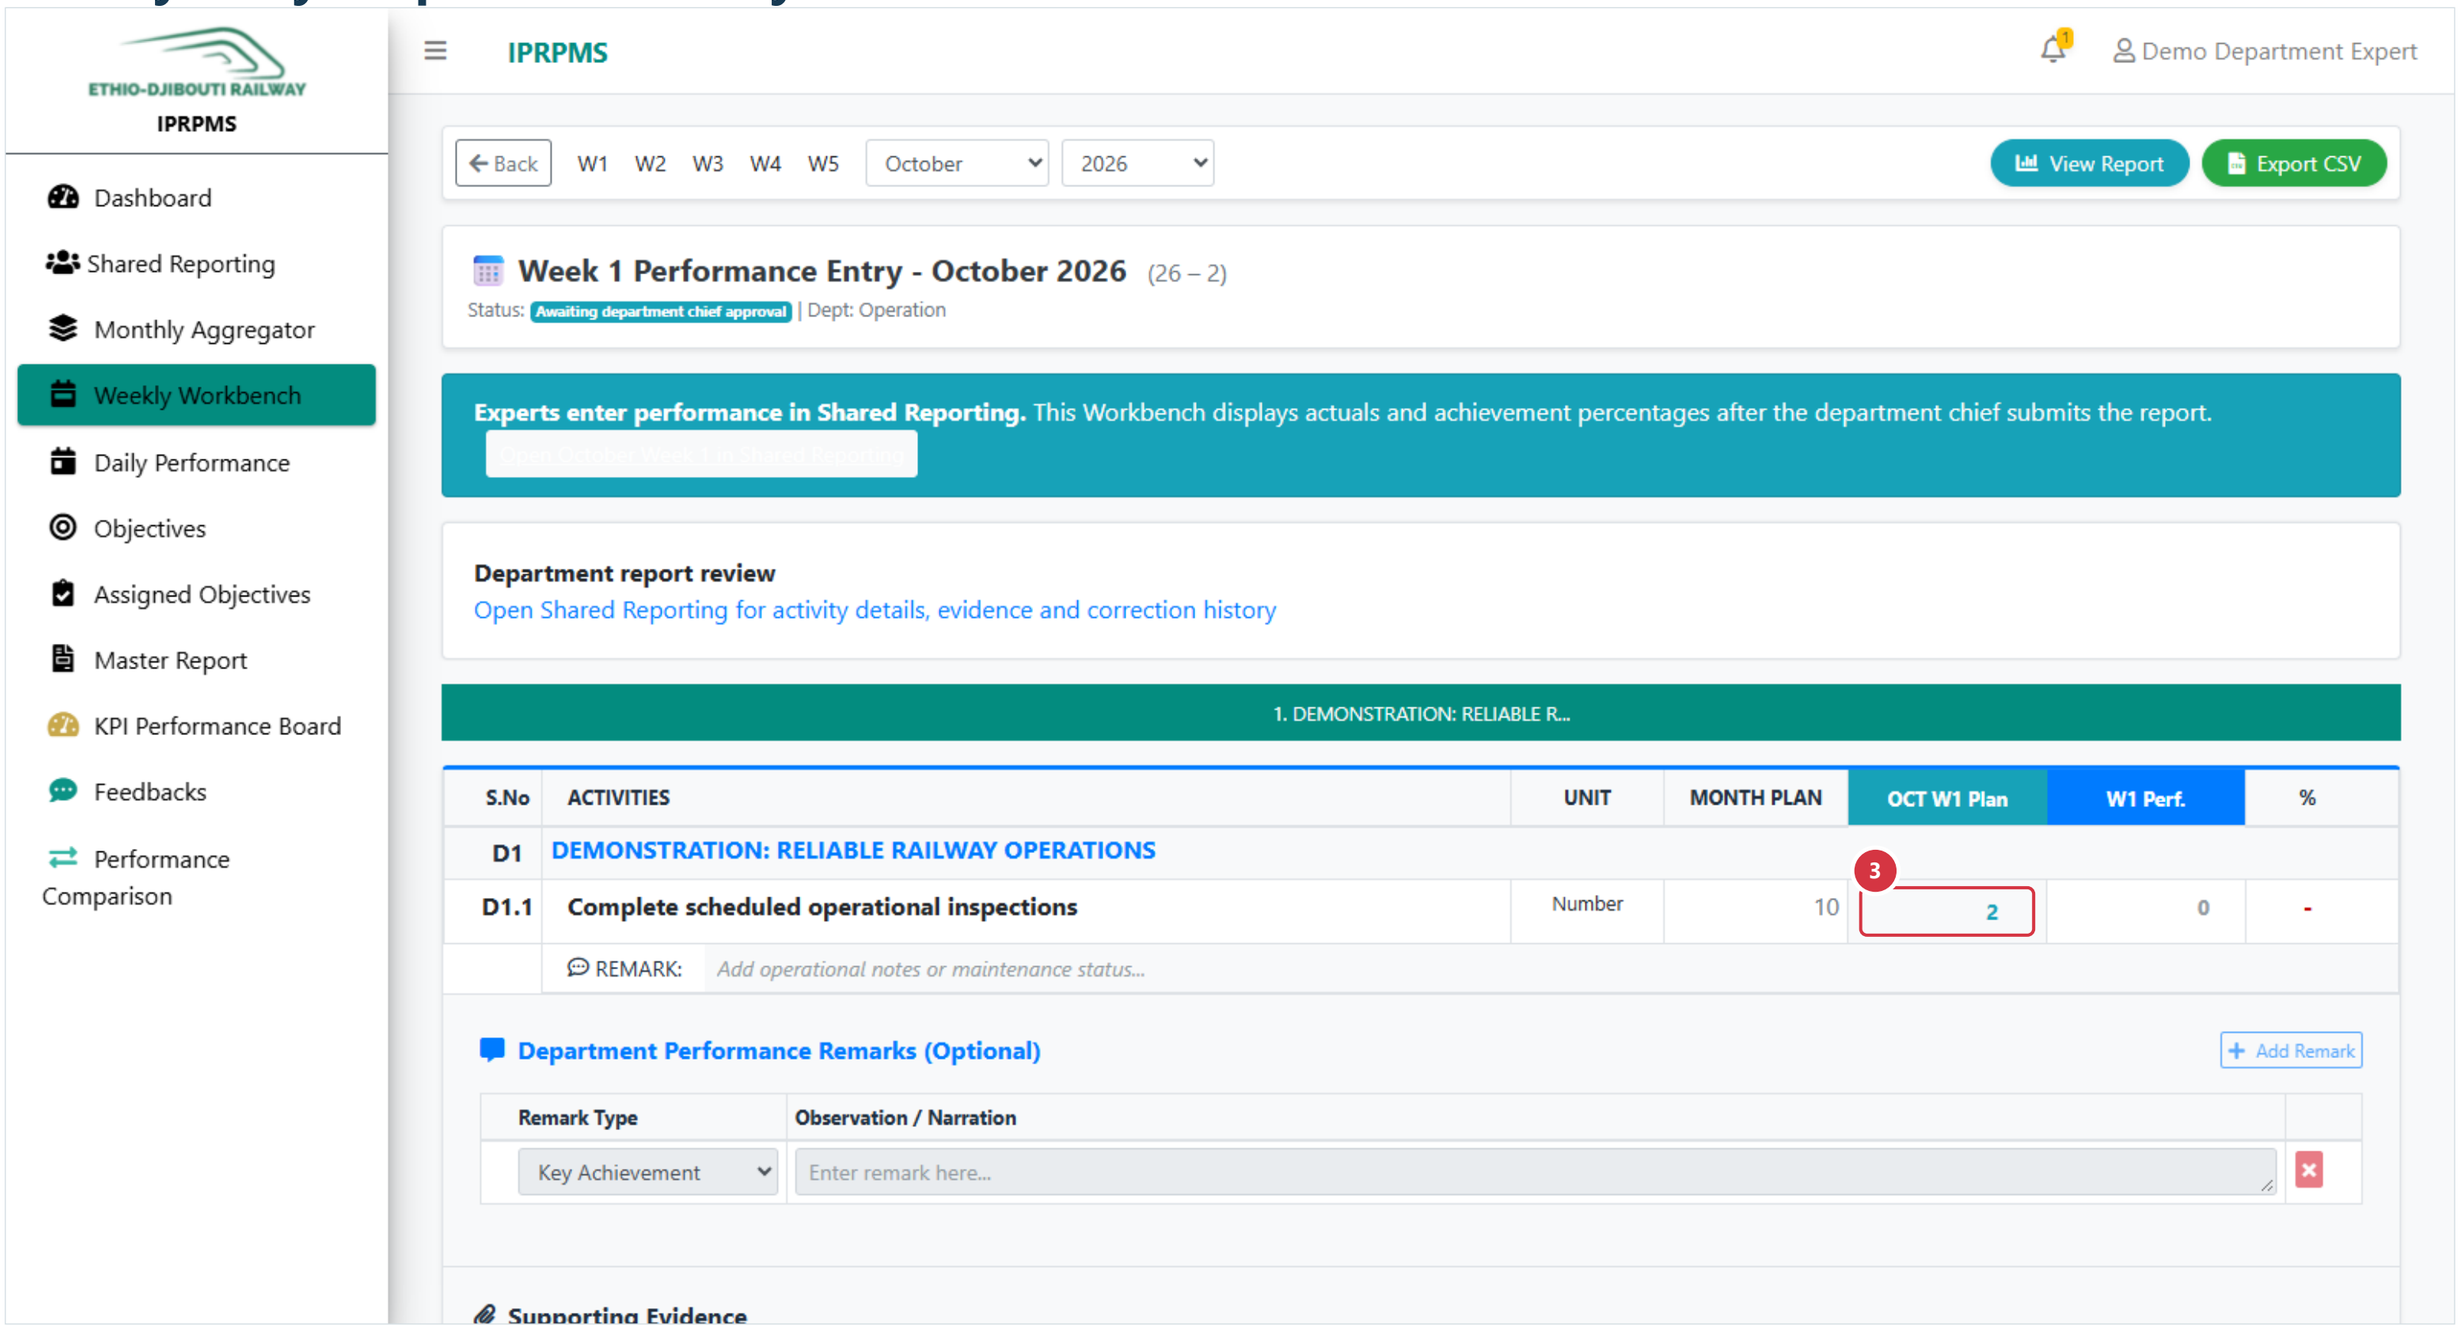

Weekly Workbench: choose the reporting period

1. Open Weekly Workbench.
2. Select the plan year and inspect the month/week cards.
3. Open the appropriate week for entry or review.

After this step: Use the period shown on the screen. Reporting frequency is determined by each objective and the department default.

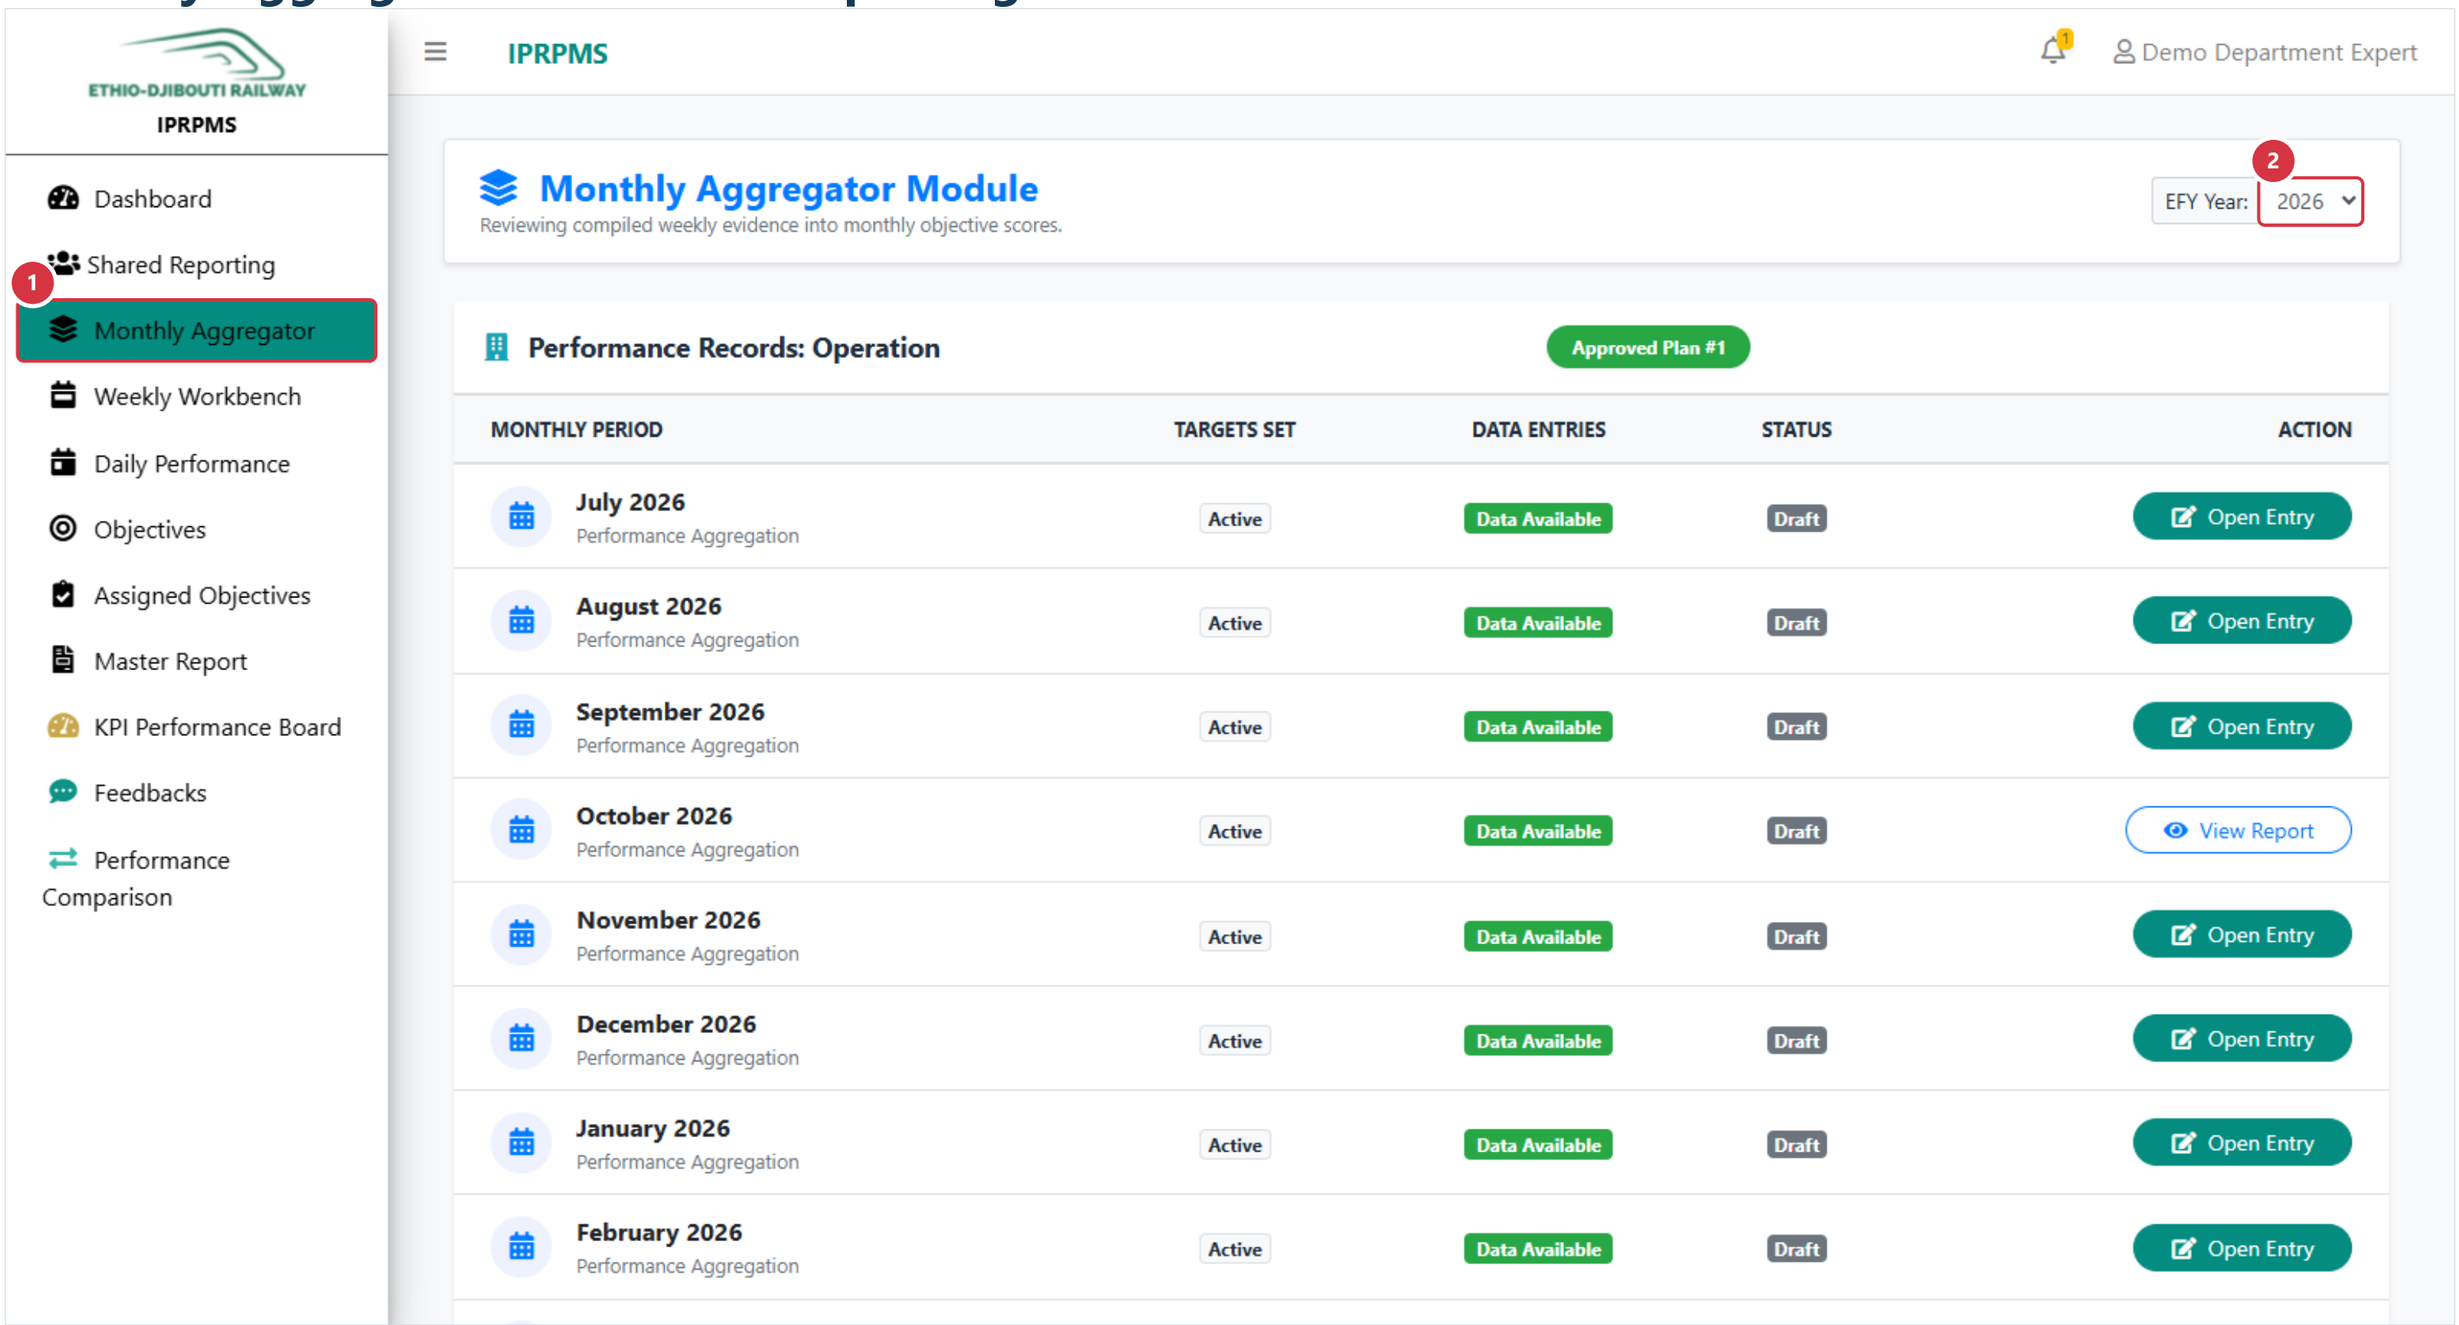

Weekly entry: inspect the activity and actual

1. Confirm the department, month and week.
2. Locate the assigned activity and read the plan and unit.
3. Enter the actual and operational remark where editable, then save.

After this step: The Weekly Workbench can direct you into shared reporting when a reporting team is configured.

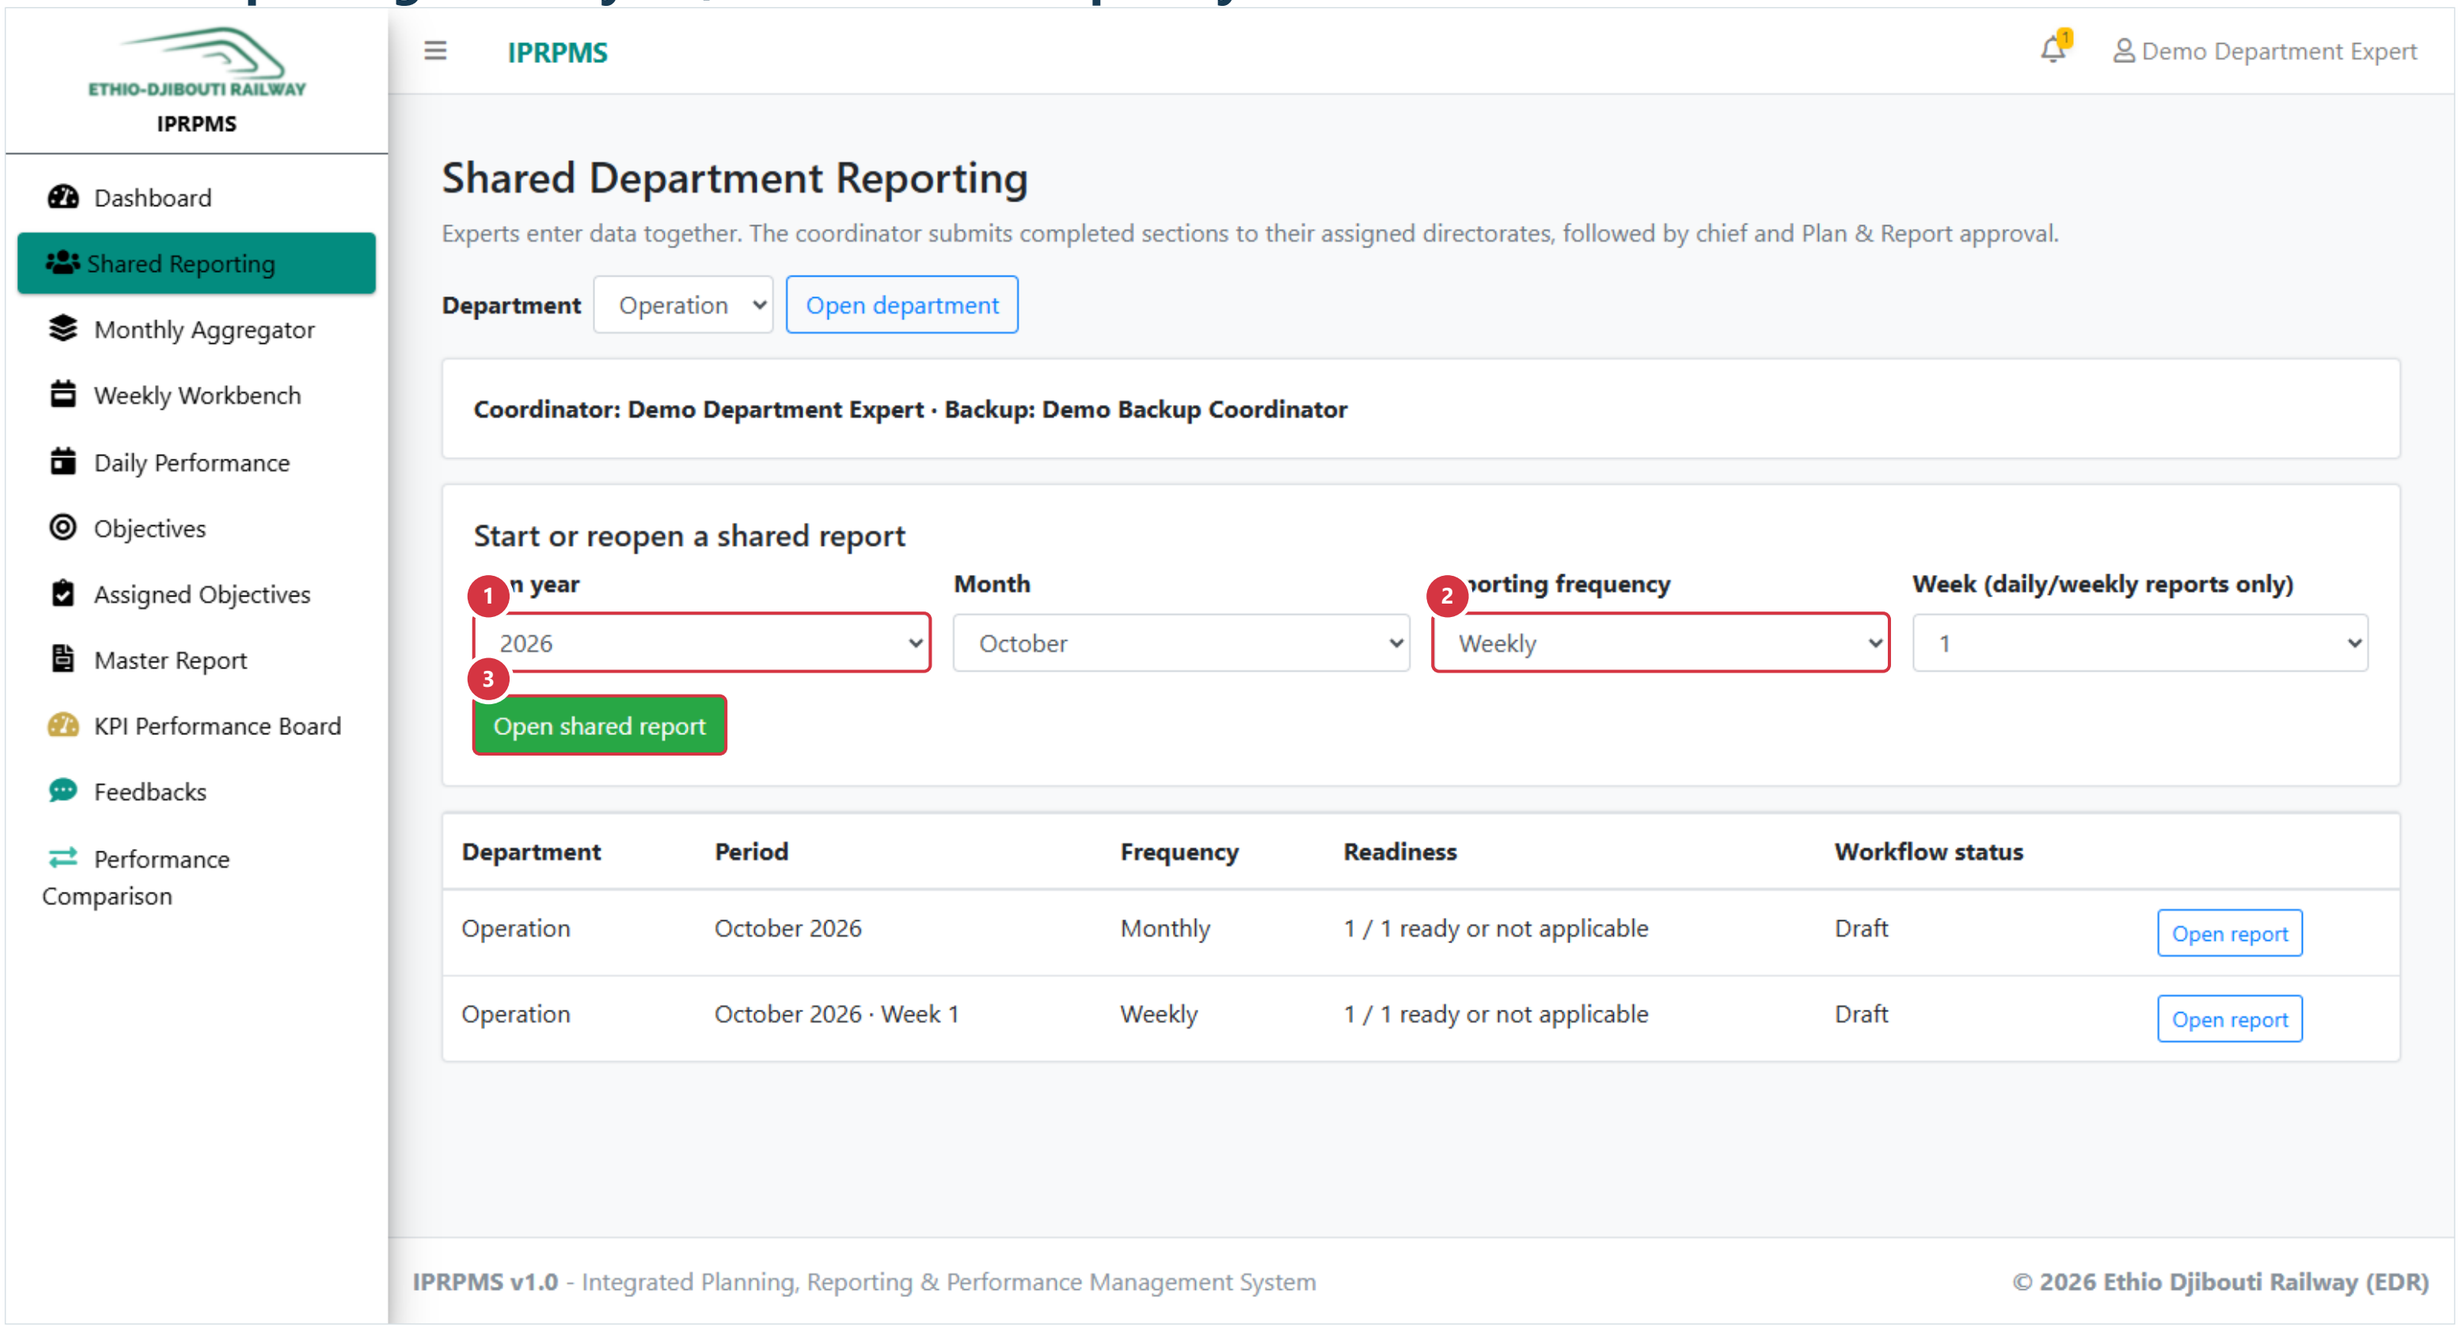

Monthly Aggregator: choose the reporting month

1. Open Monthly Aggregator.
2. Select the plan year and the intended month.
3. Use the month entry/report controls for the selected department.

After this step: Monthly-only sub objectives belong in monthly entry even when the department default is weekly.

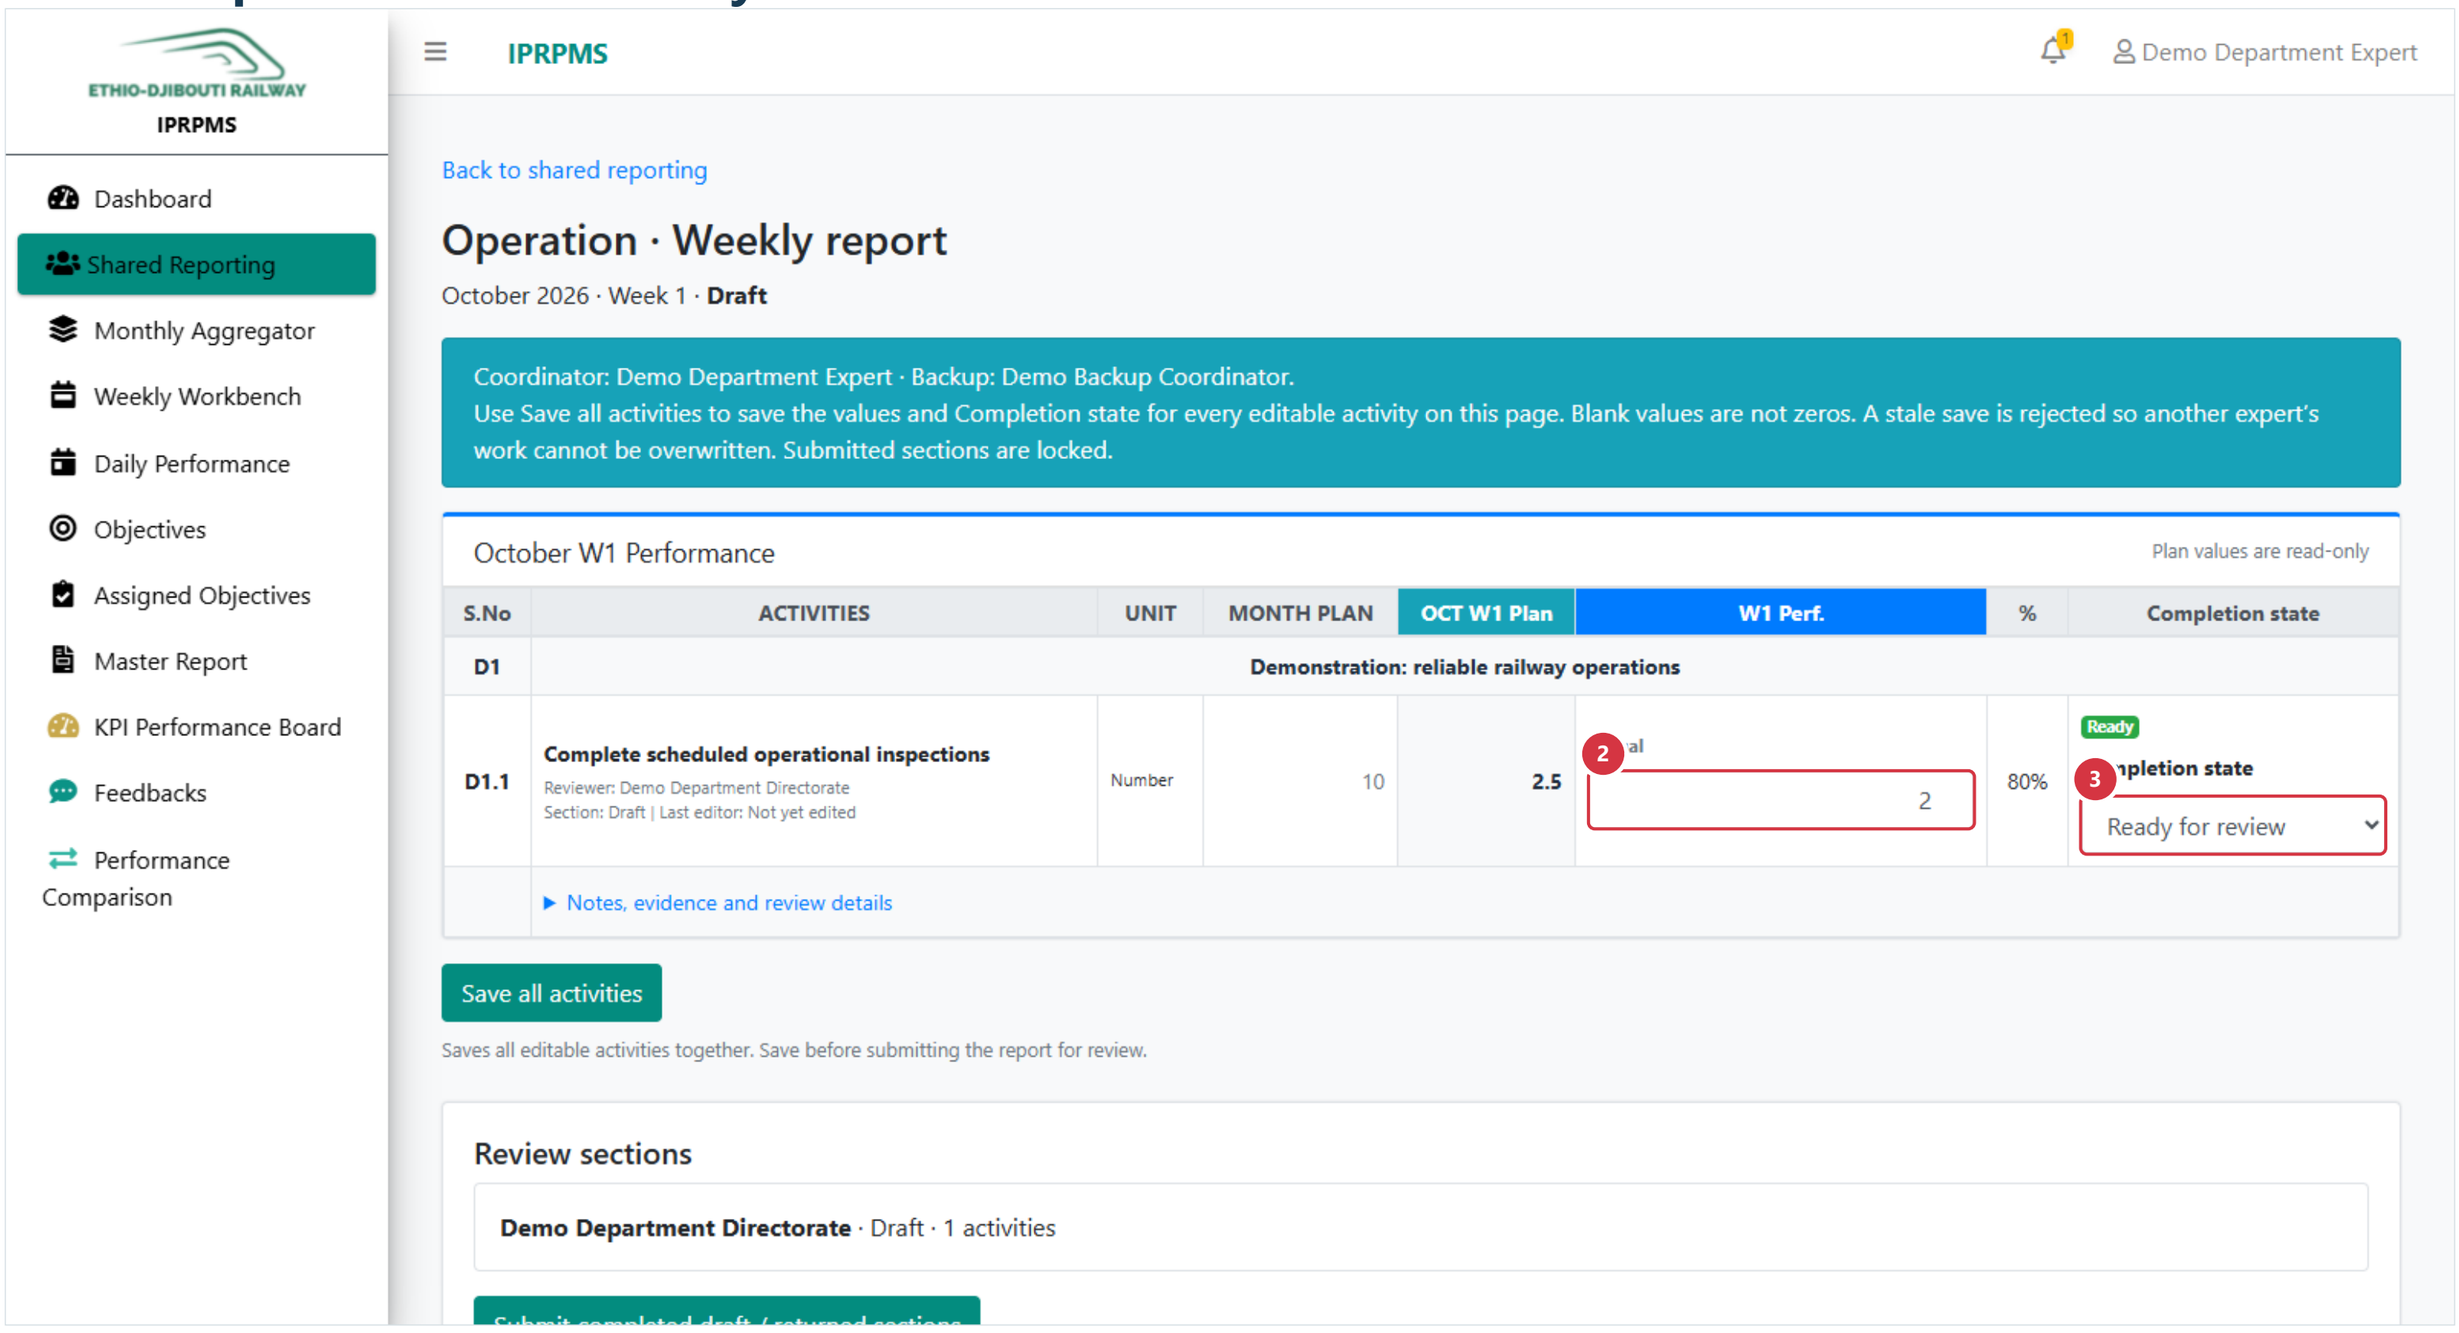

Shared Reporting: select year, month and frequency

1. Select Plan year and Month.
2. Choose Daily, Weekly or Monthly in Reporting frequency.
3. Choose a Week for daily/weekly reporting, then click Open shared report.

After this step: The report opens only for approved assigned activities planned for that period and frequency.

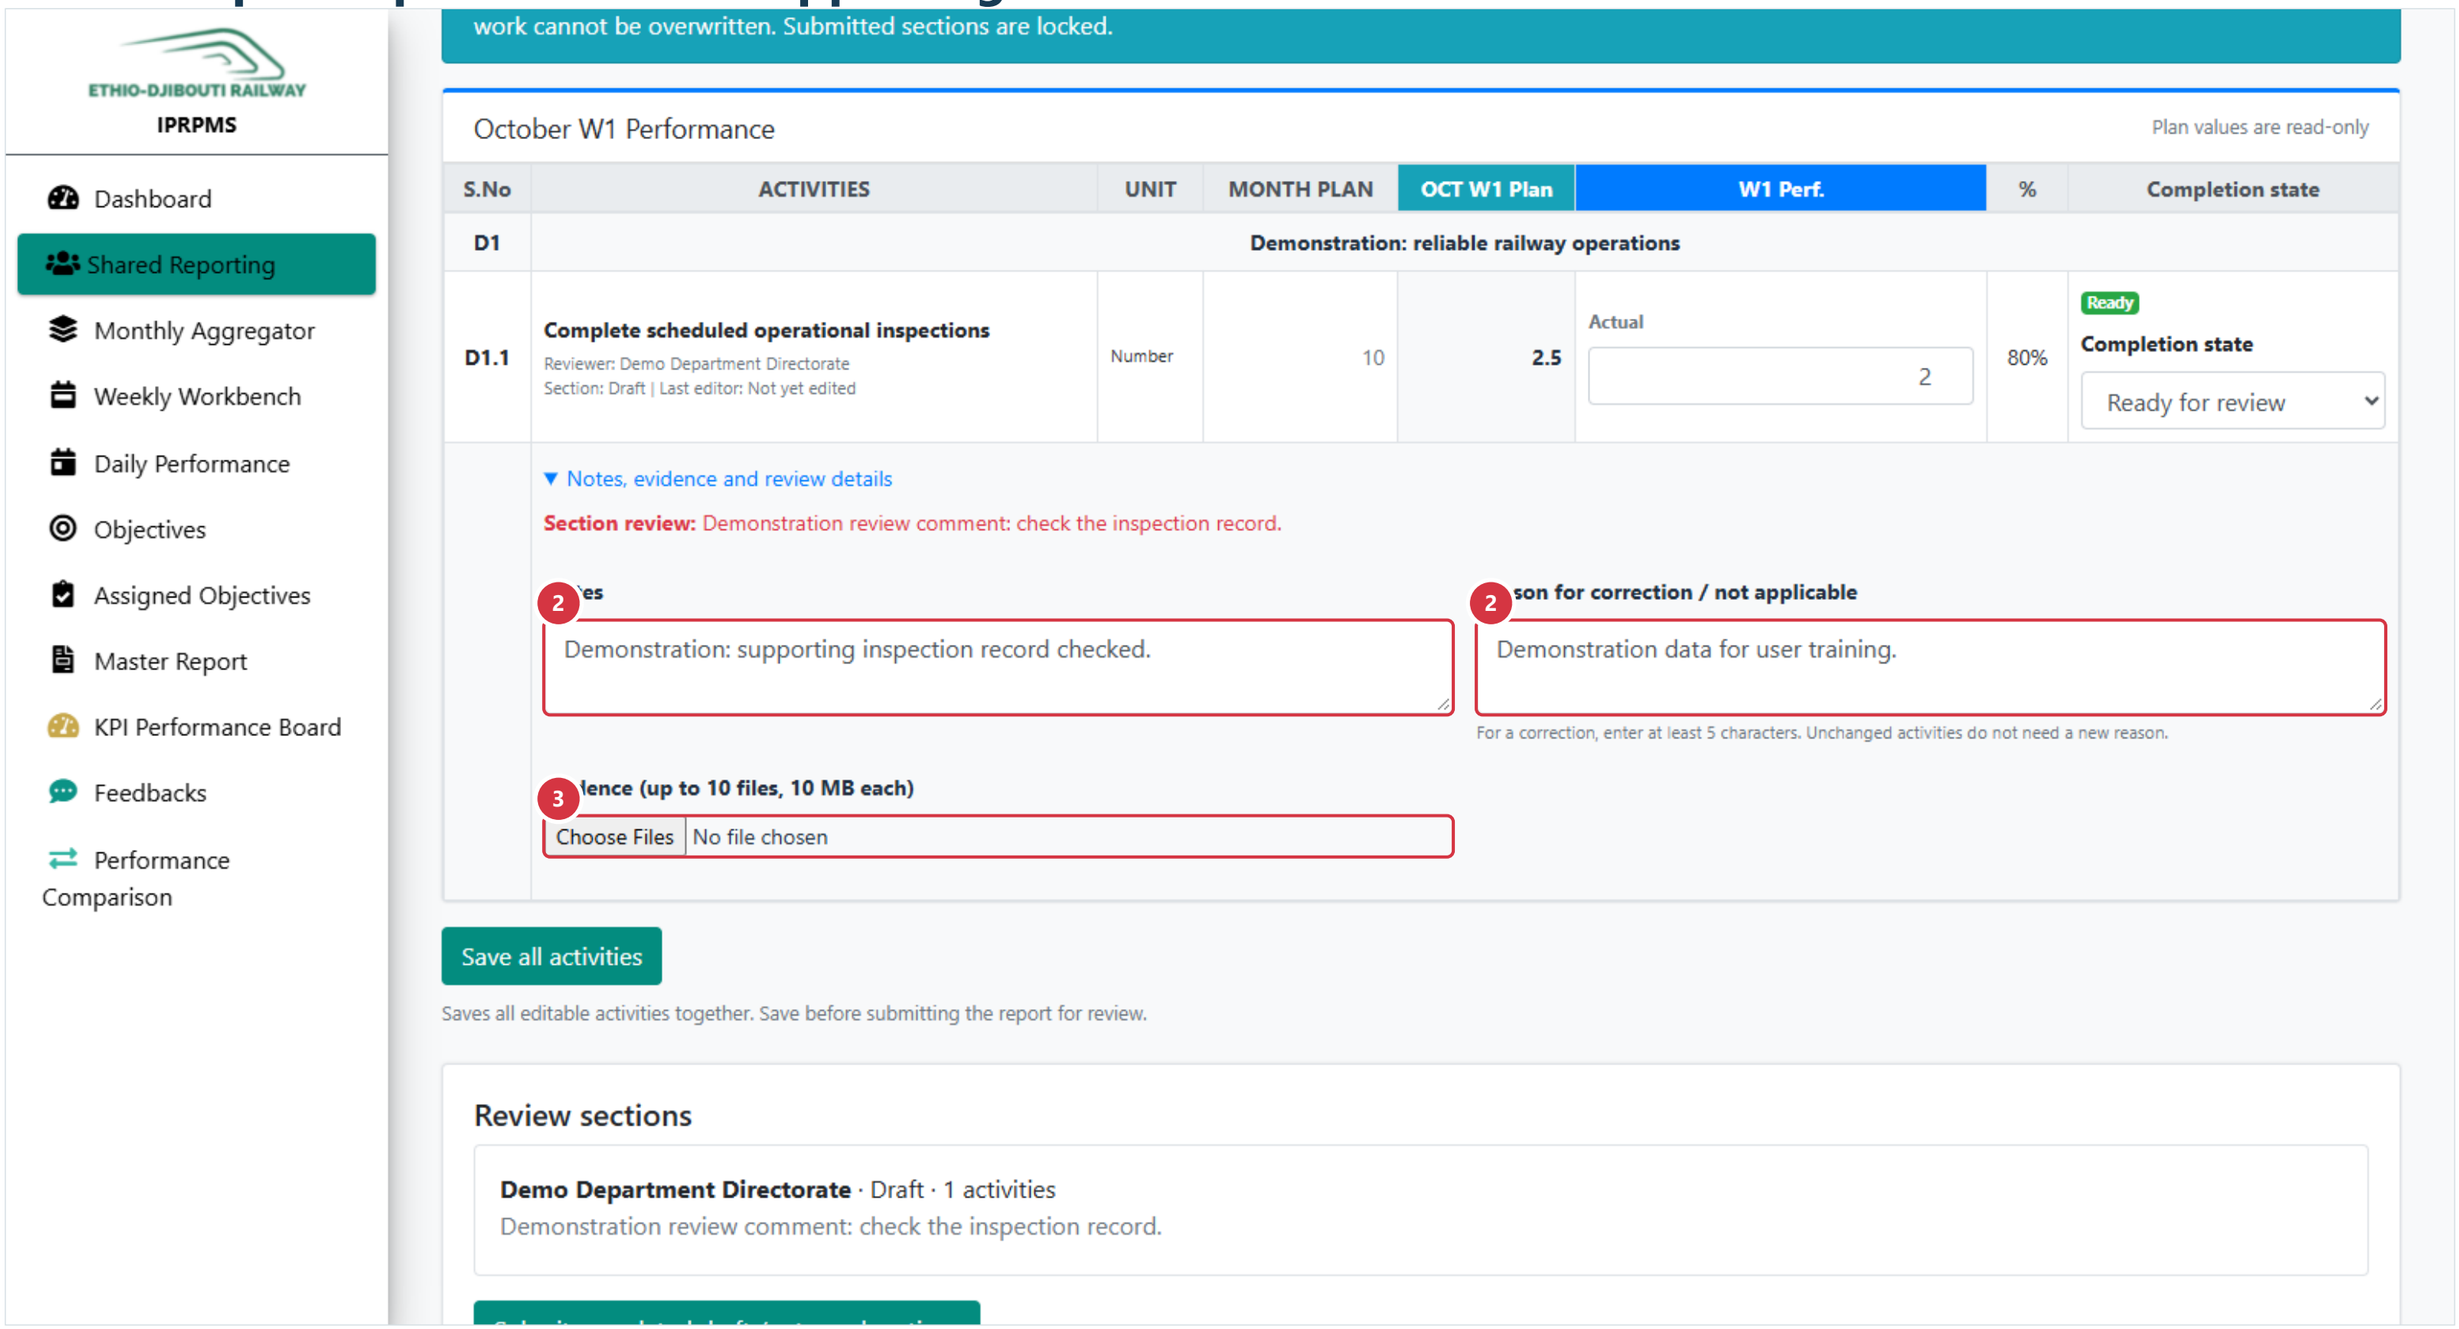

Shared report: enter the weekly actual

1. Check the report heading and activity code.
2. Enter Actual using the unit shown.
3. Choose Ready for review when the row is complete.

After this step: A blank actual is missing information. Enter zero only when the measured result is actually zero.

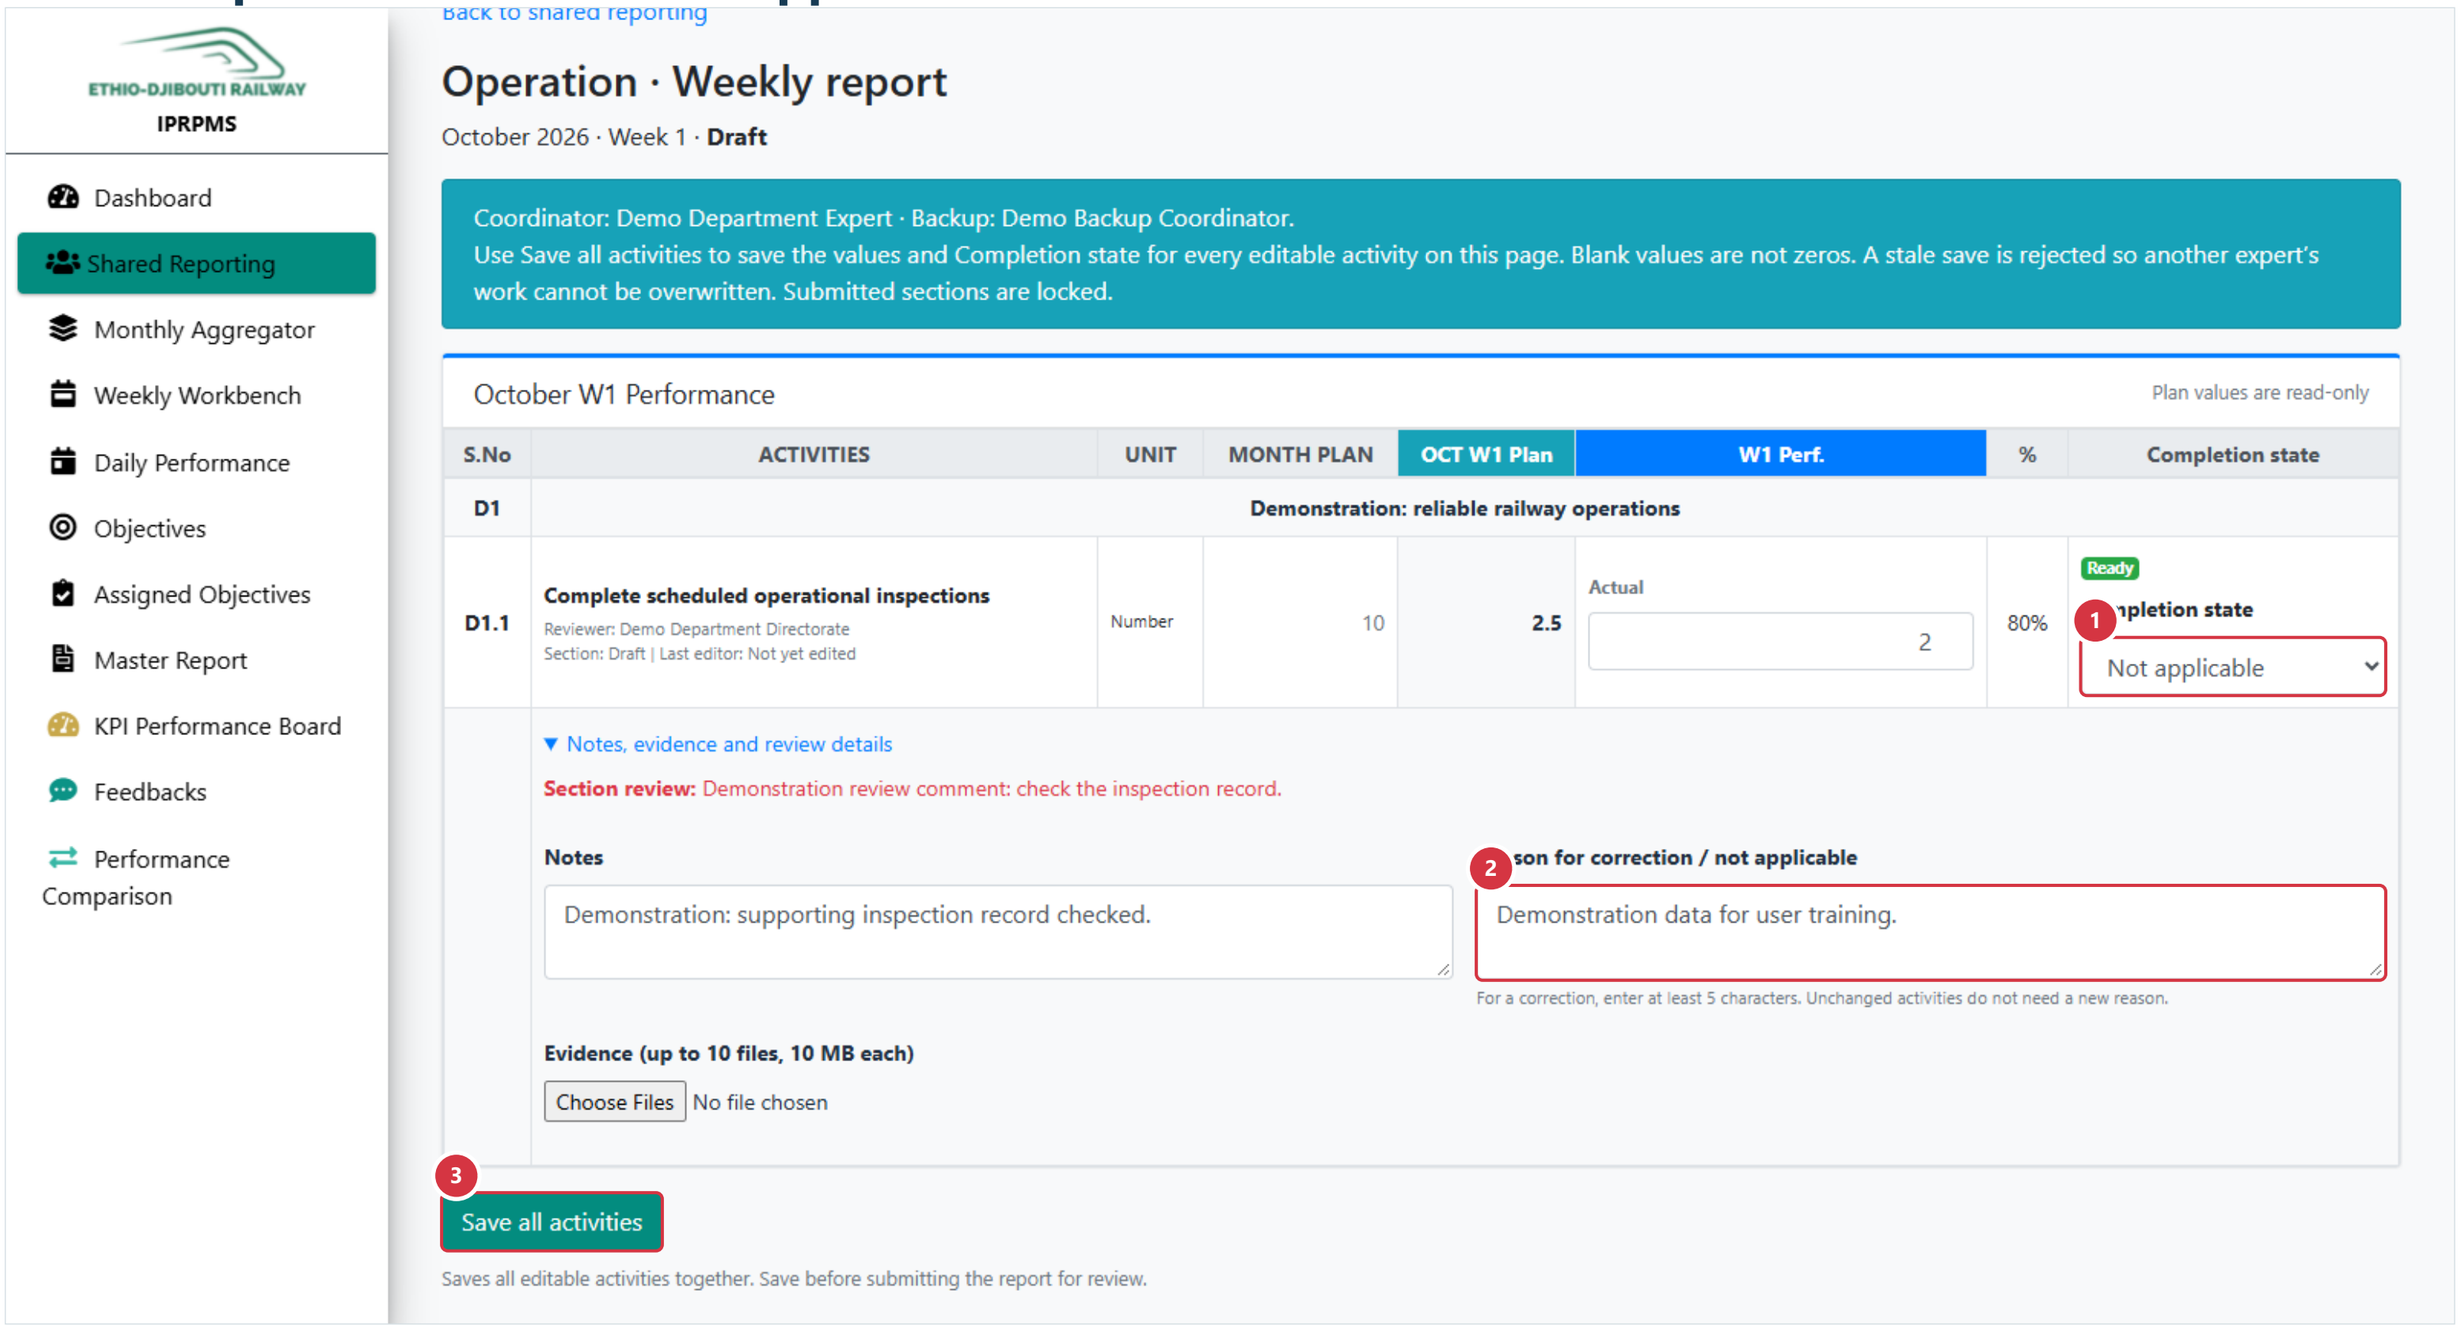

Shared report: open notes and supporting evidence

1. Click Notes, evidence and review details under the activity.
2. Enter Notes and a correction/Not applicable reason when required.
3. Choose Evidence files and save the activity changes.

After this step: Each evidence file may be at most 10 MB. The screen lists the supported formats and ten-file limit.

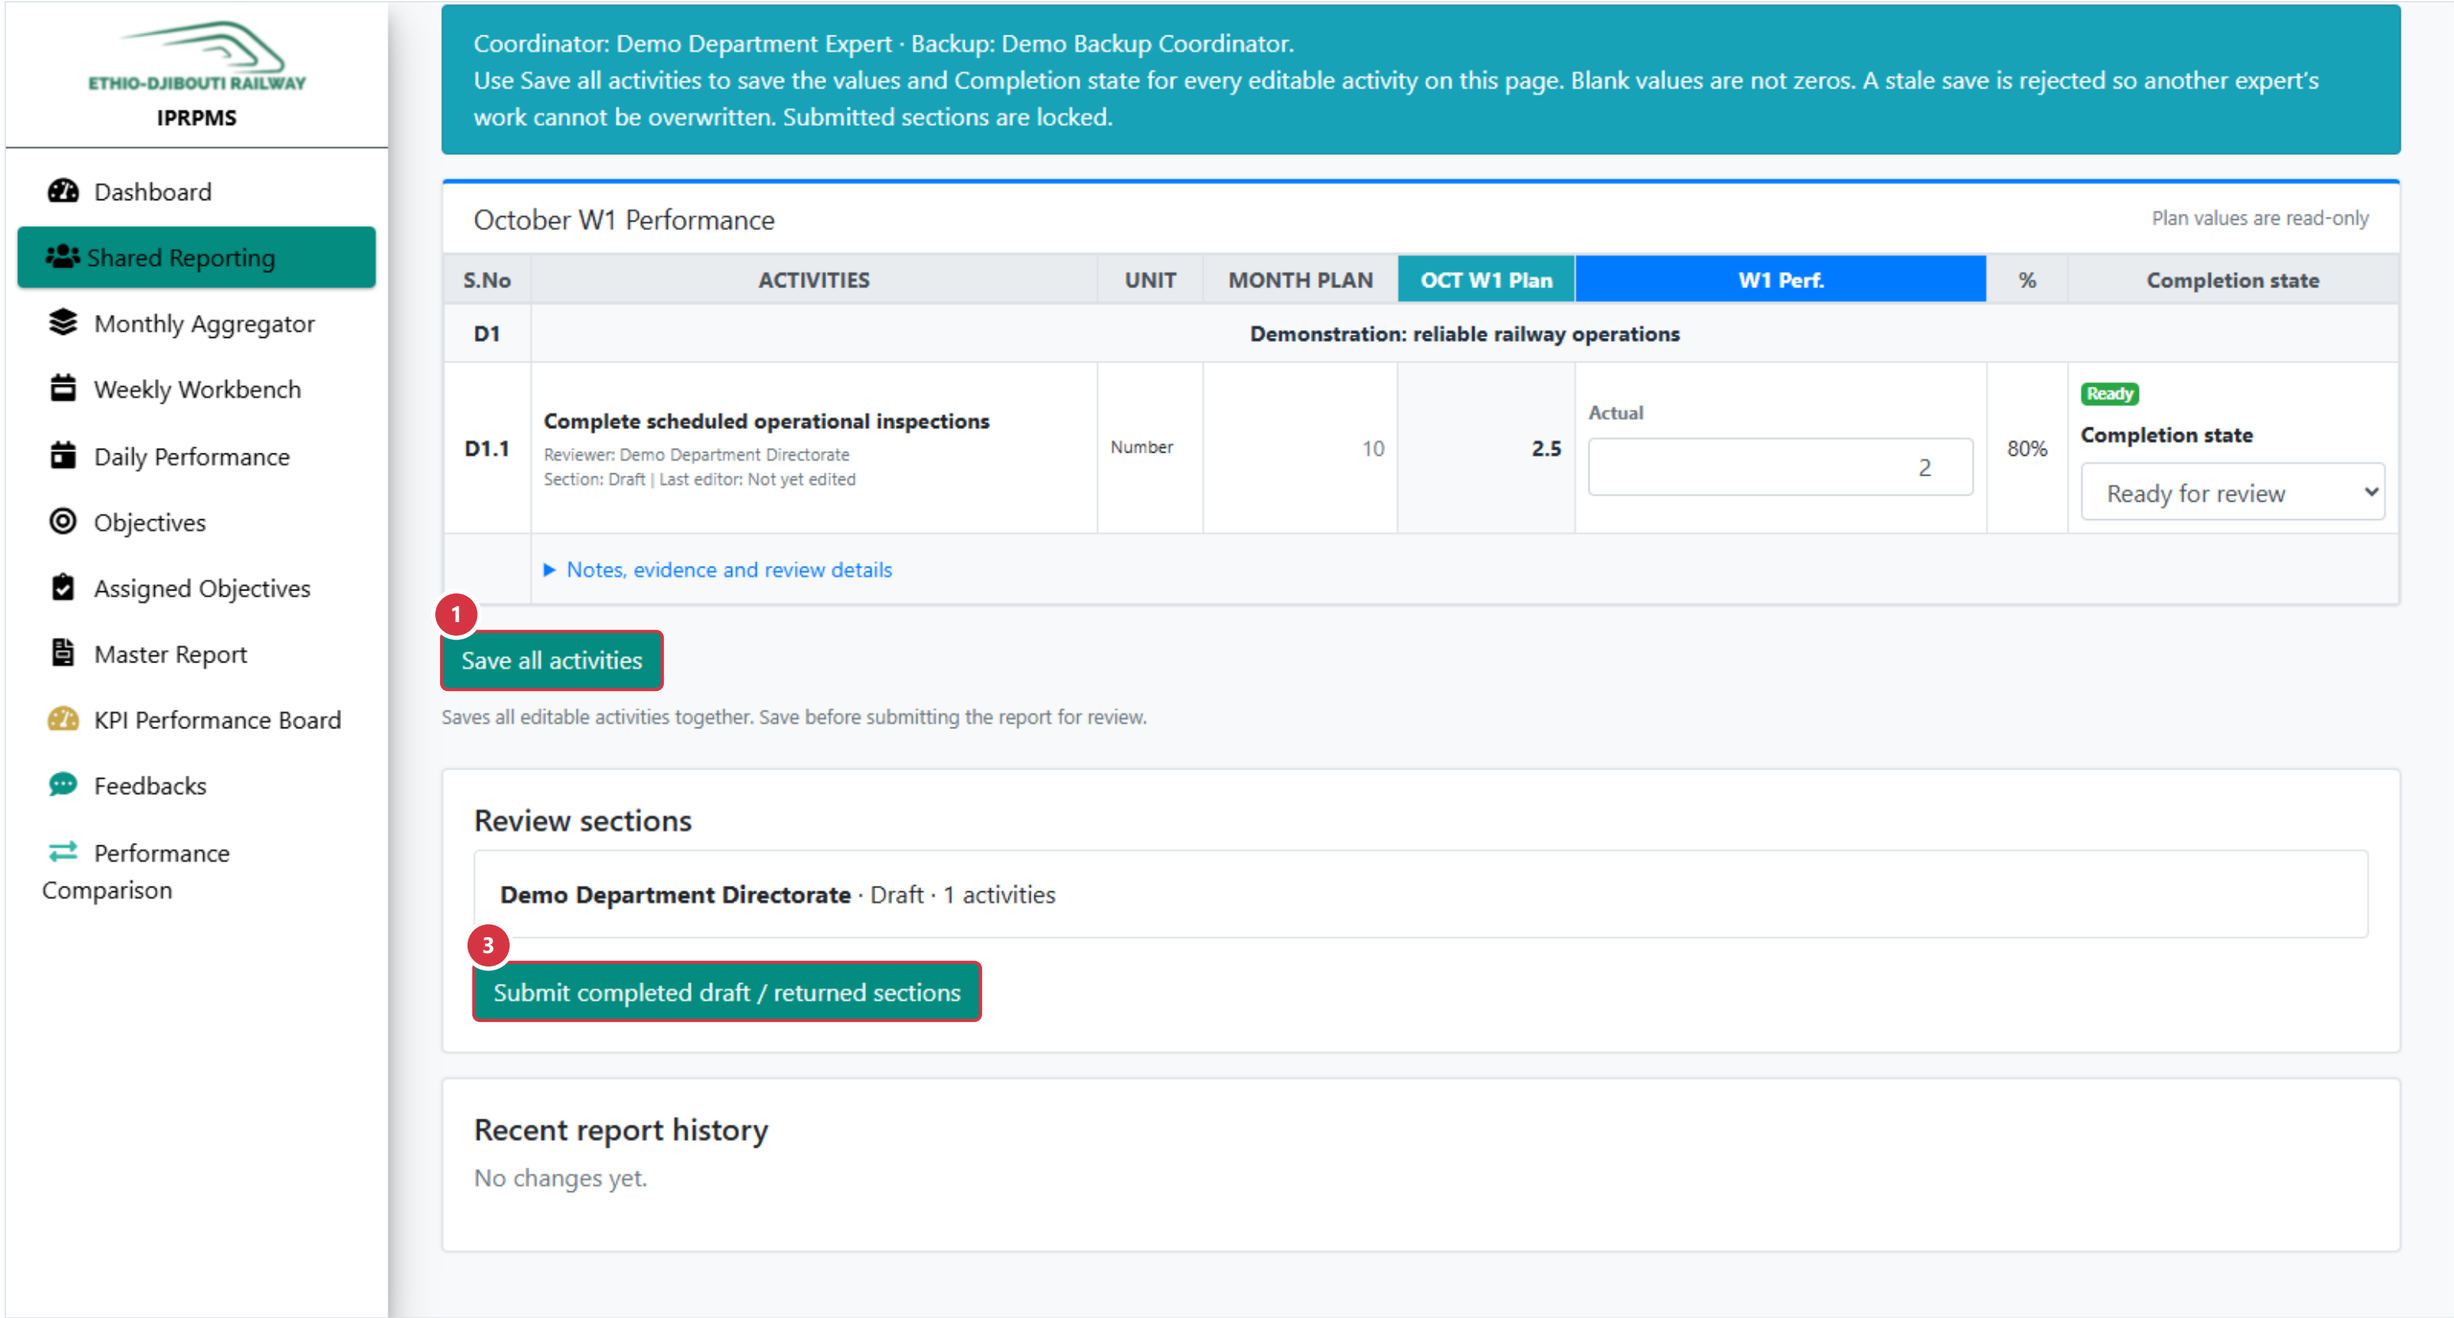

Shared report: mark a row Not applicable

1. Choose Not applicable in Completion state only when the activity does not apply.
2. Explain the reason under Notes, evidence and review details.
3. Click Save all activities before submitting.

After this step: Not applicable needs a clear reason. Blank, zero and Not applicable have different meanings.

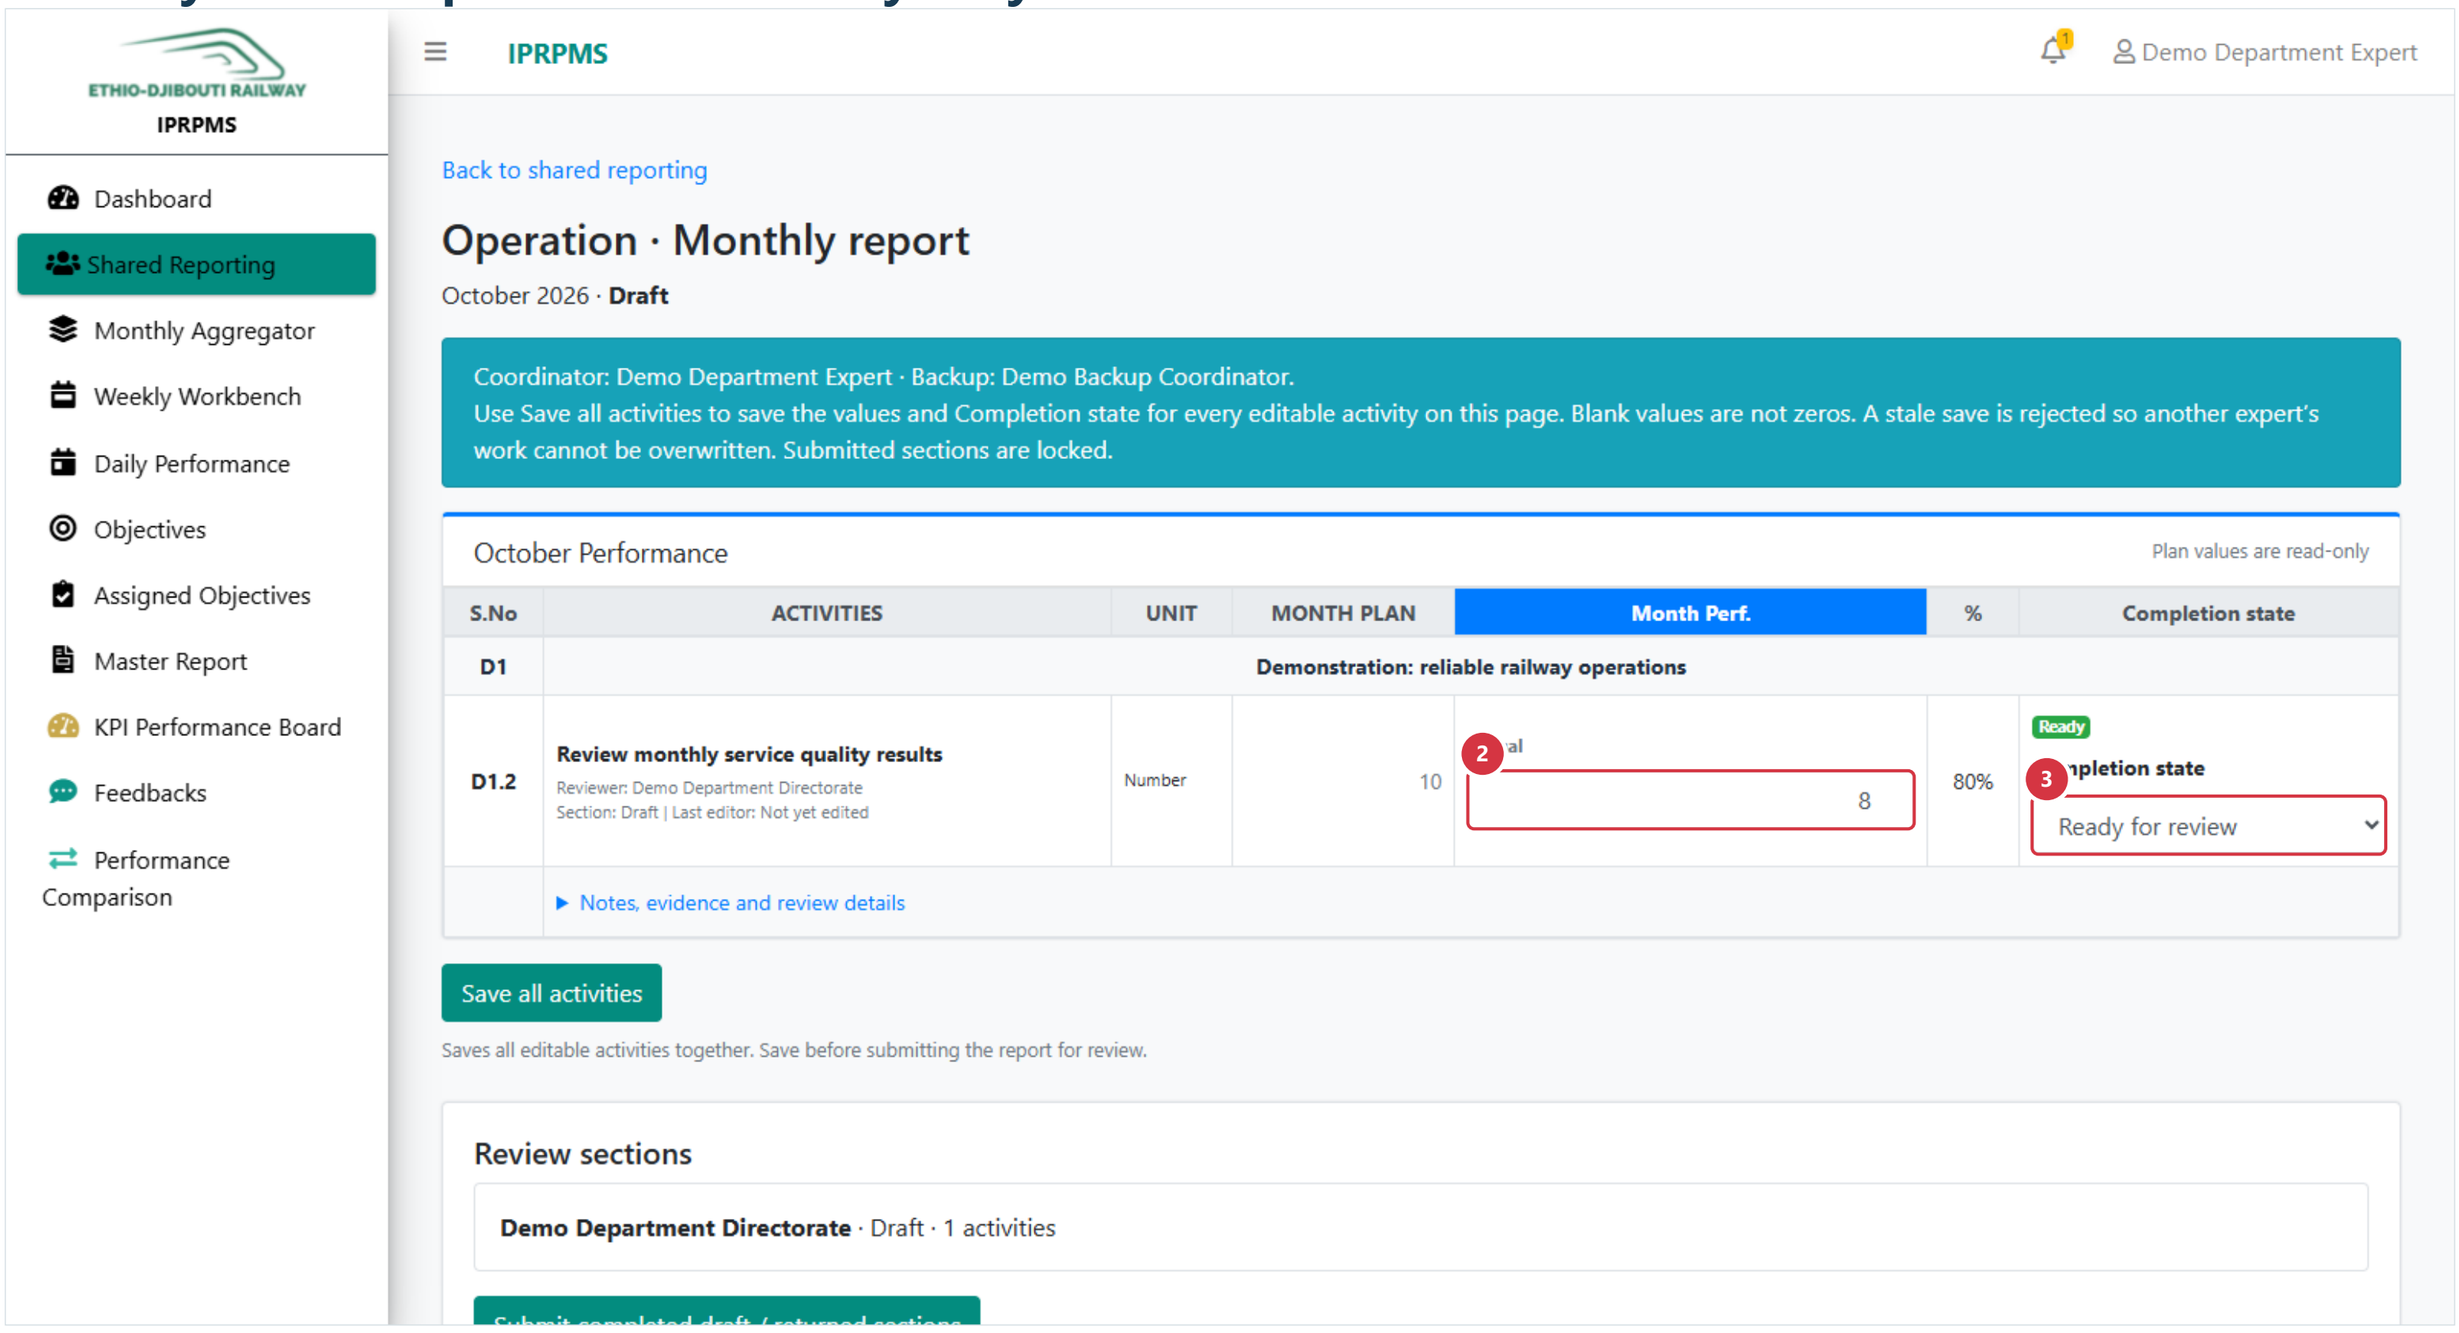

Shared report: save before submitting

1. Click Save all activities to persist the editable entries.
2. Check readiness and resolve any validation messages.
3. Click Submit completed draft / returned sections.

After this step: Only the coordinator or backup can submit. Every required row must be ready or have a valid Not applicable reason.

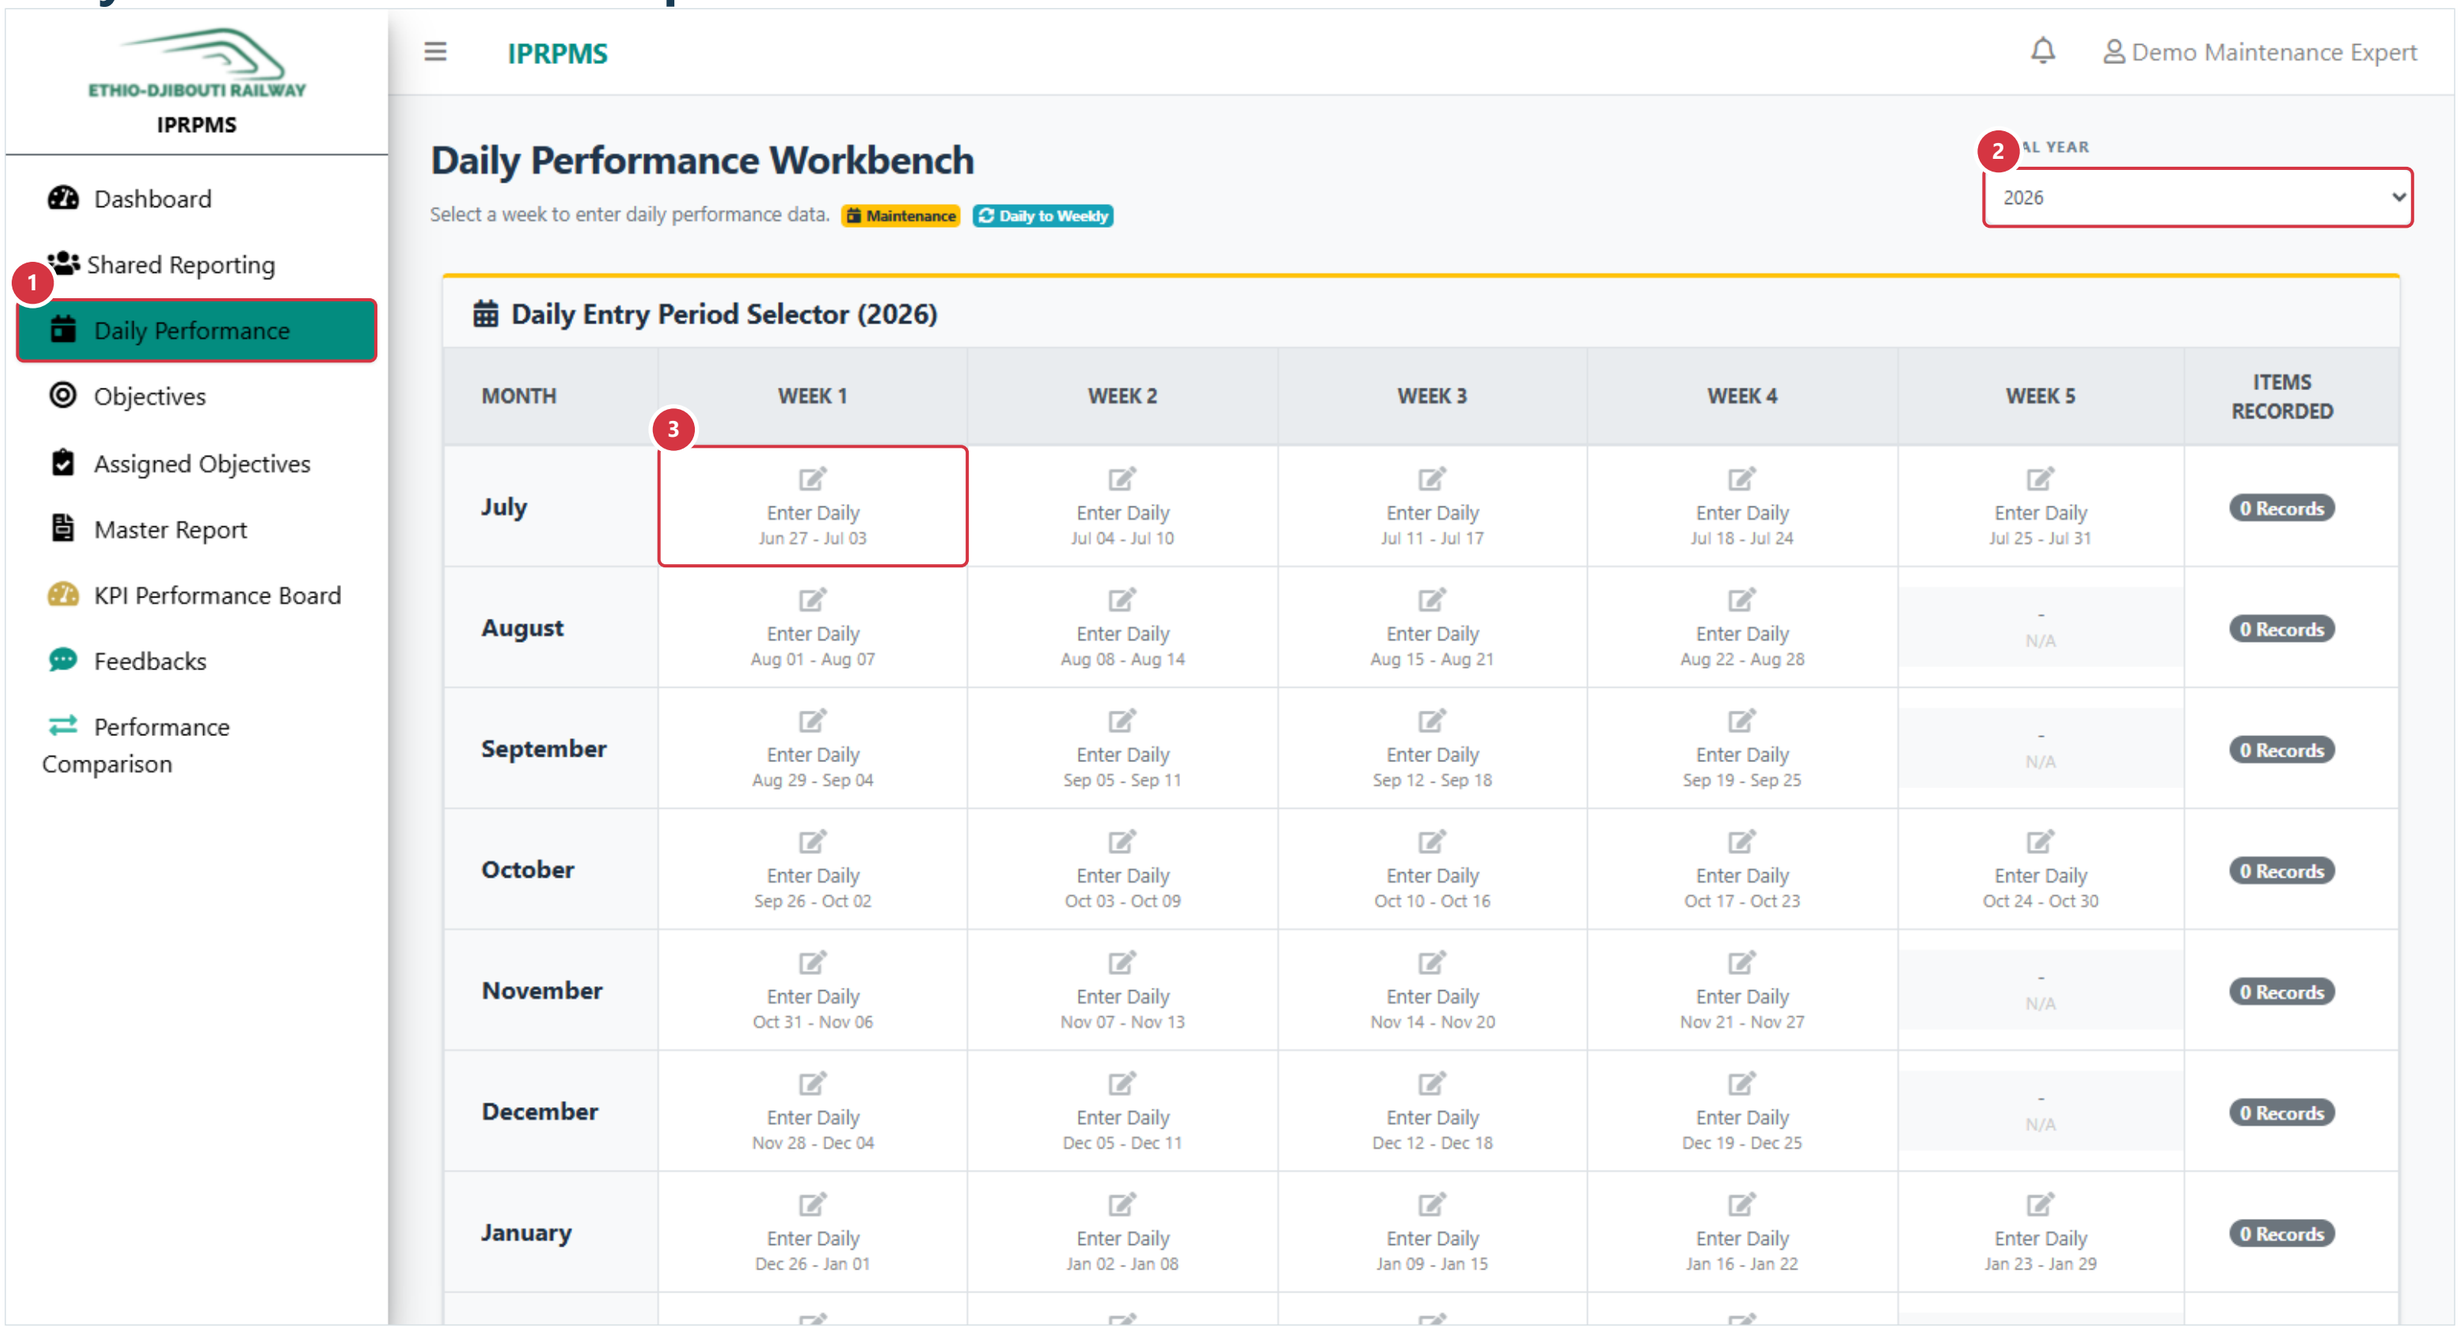

Monthly shared report: enter monthly-only KPIs

1. Confirm the frequency reads Monthly and the correct month is shown.
2. Enter the actual for the monthly activity.
3. Complete notes/evidence, choose the completion state, save and submit.

After this step: This page is separate from weekly activity entry. It uses the same hierarchy of reviews.

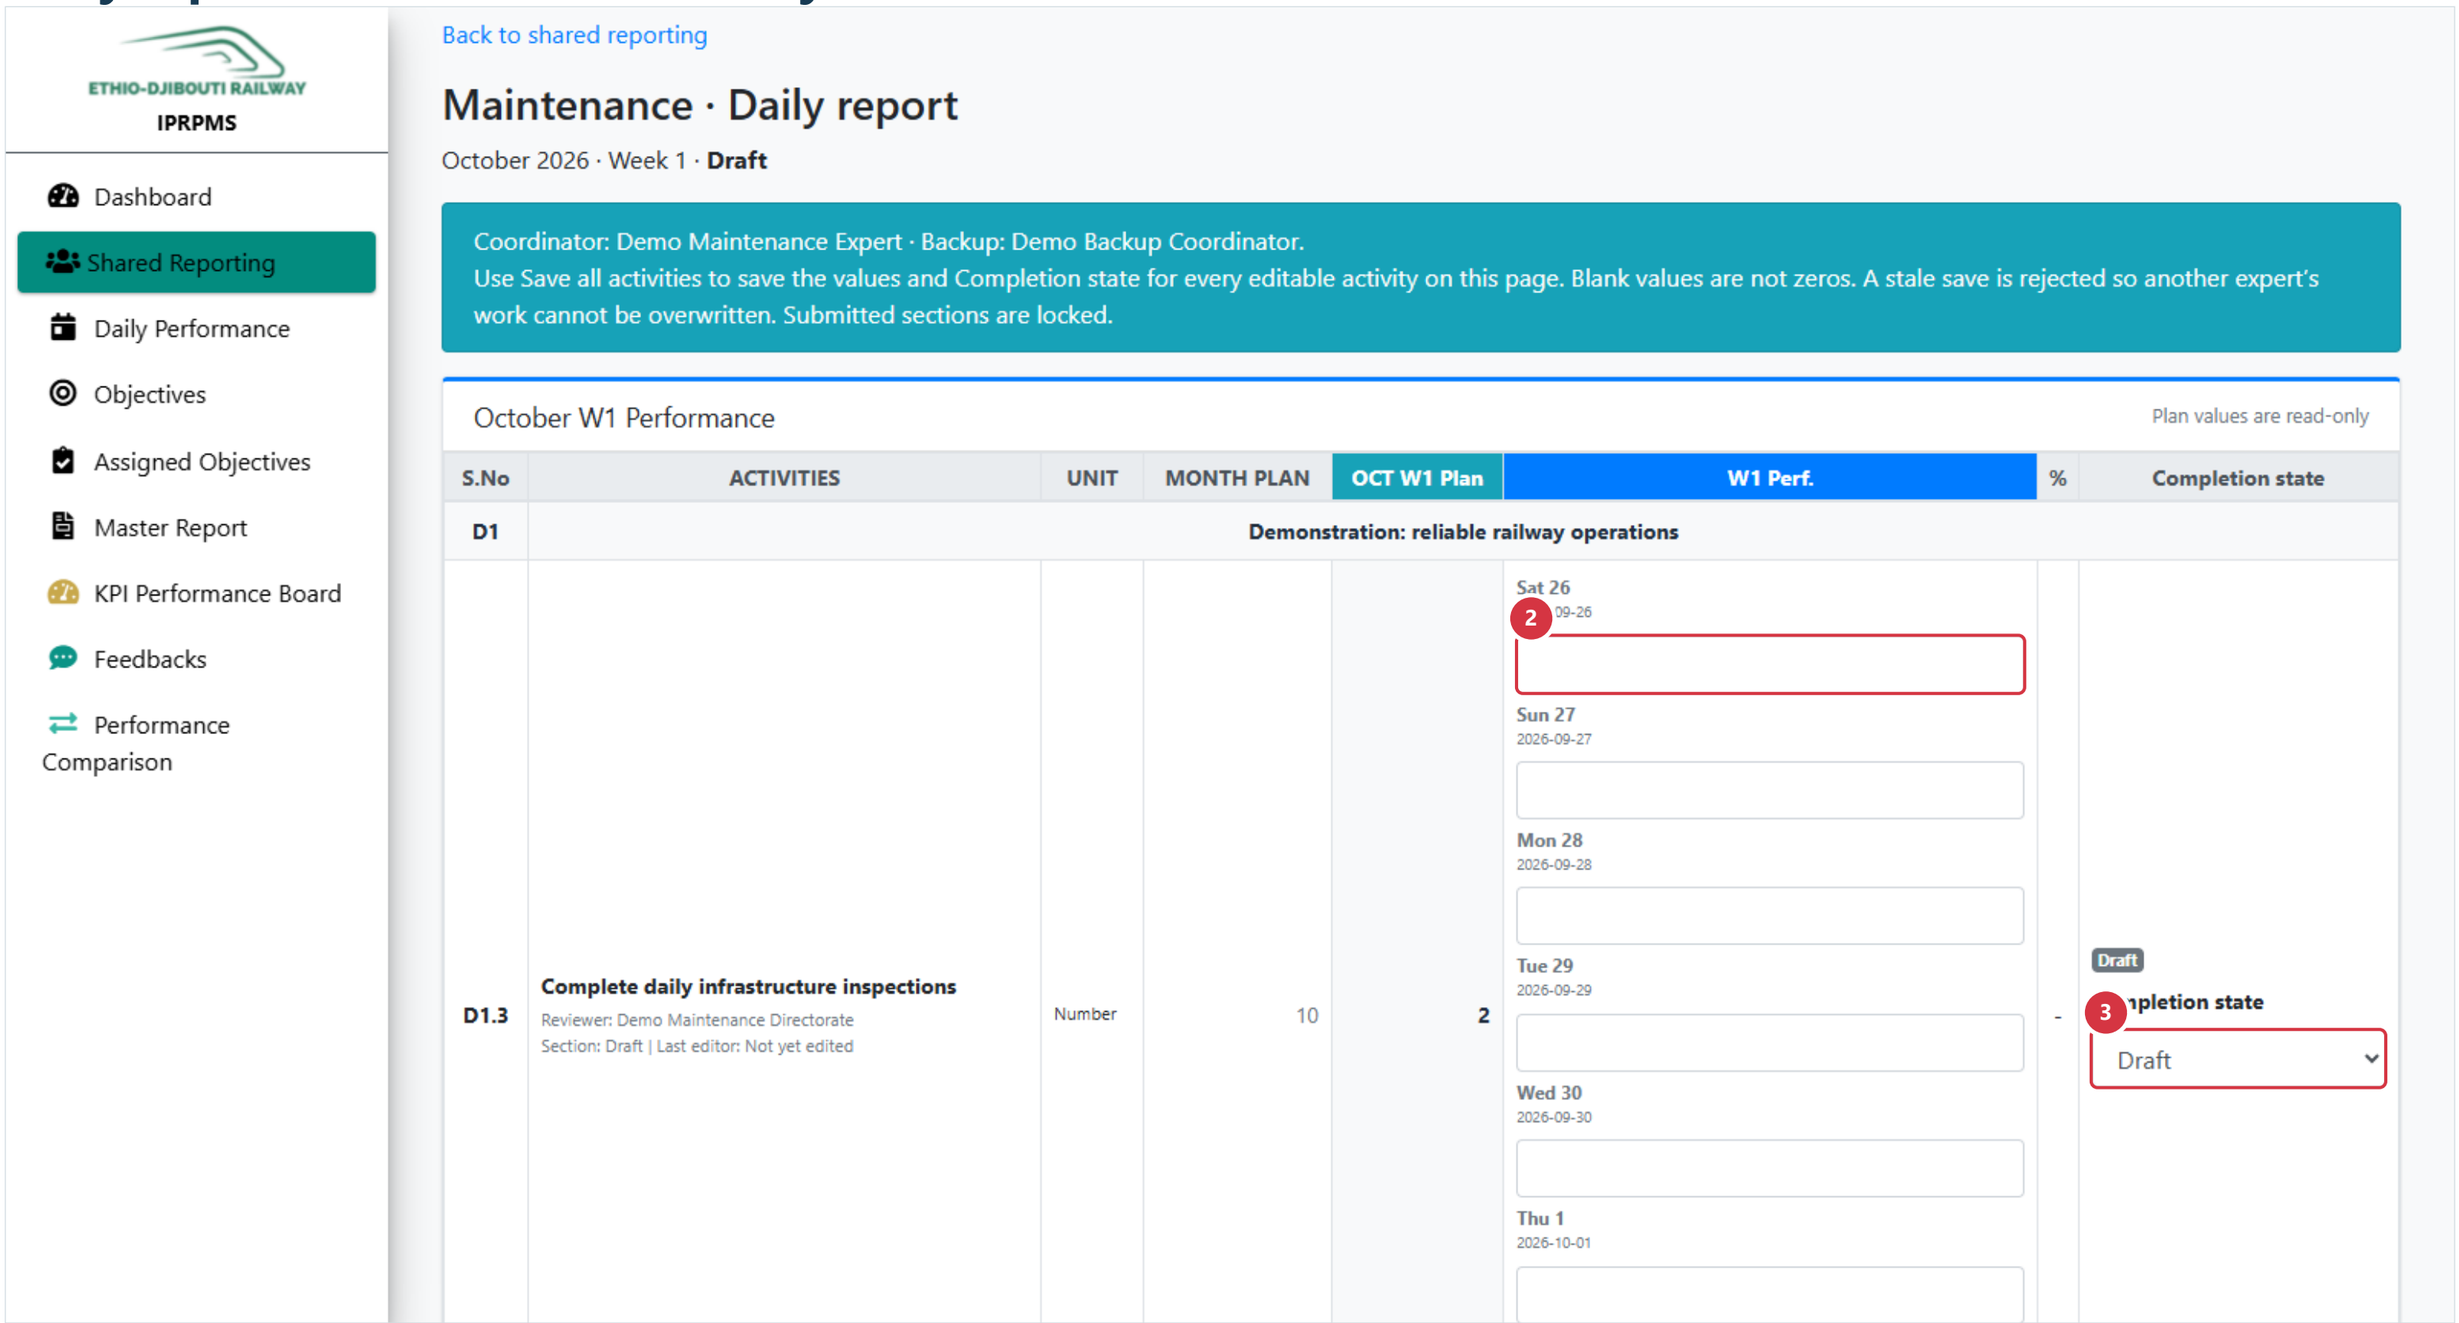

Daily Performance: select a period

1. Open Daily Performance.
2. Choose the year and the reporting month/week.
3. Open the daily entry screen for the department.

After this step: The daily reporting period follows the calendar dates shown in the application.

Daily report: fill each calendar-day actual

1. Read each displayed day and date.
2. Enter each actual, including an explicit zero when appropriate.
3. Complete notes, evidence and state, then save before submitting.

After this step: Ready daily entries require values for every day in the selected reporting week.

Read a return, correct it and send it again

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

Returned does not mean start a second report. It means the responsible reviewer needs a correction in the existing report or section. Keeping the same record preserves the history.

Before you click

Open the notification or the existing report. Read the originating department, reporting period, current status and latest comment. Identify the activity and the particular section that was returned.

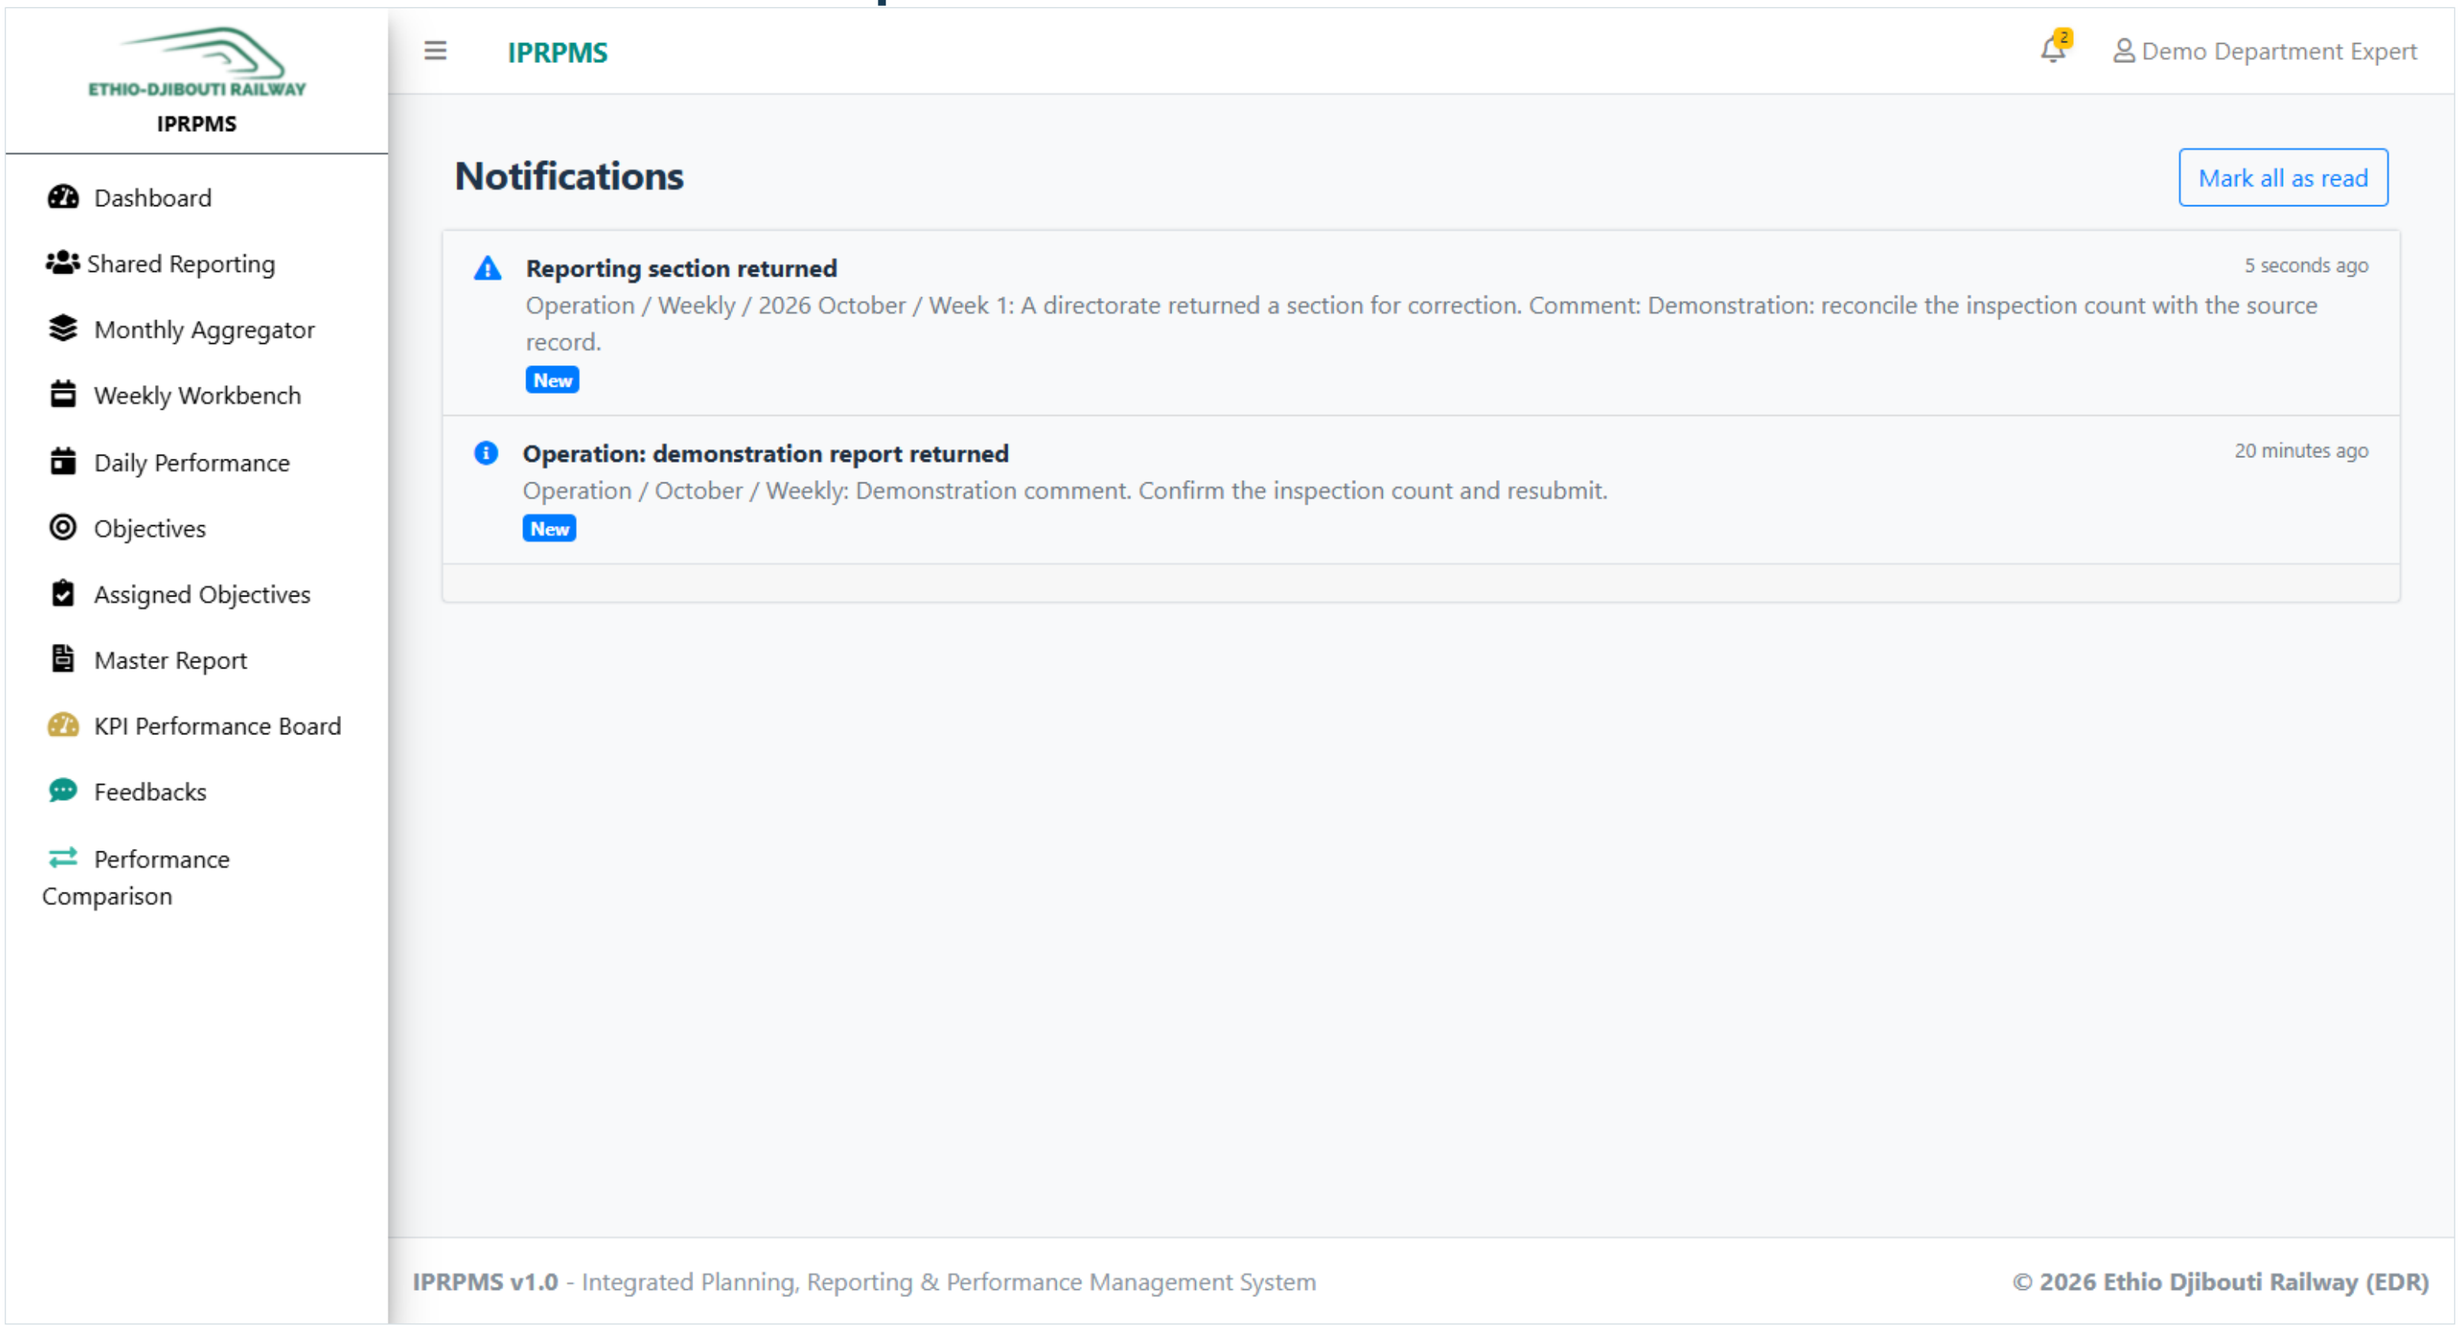

What to check

Correct only the entries that need changes. Add the missing explanation or evidence. Do not alter an already approved, unaffected section just to make every section editable.

How you know it worked

Save the corrected entries, mark them ready and ask the coordinator or backup to resubmit the returned sections. Read the new status and history so you know who must act next.

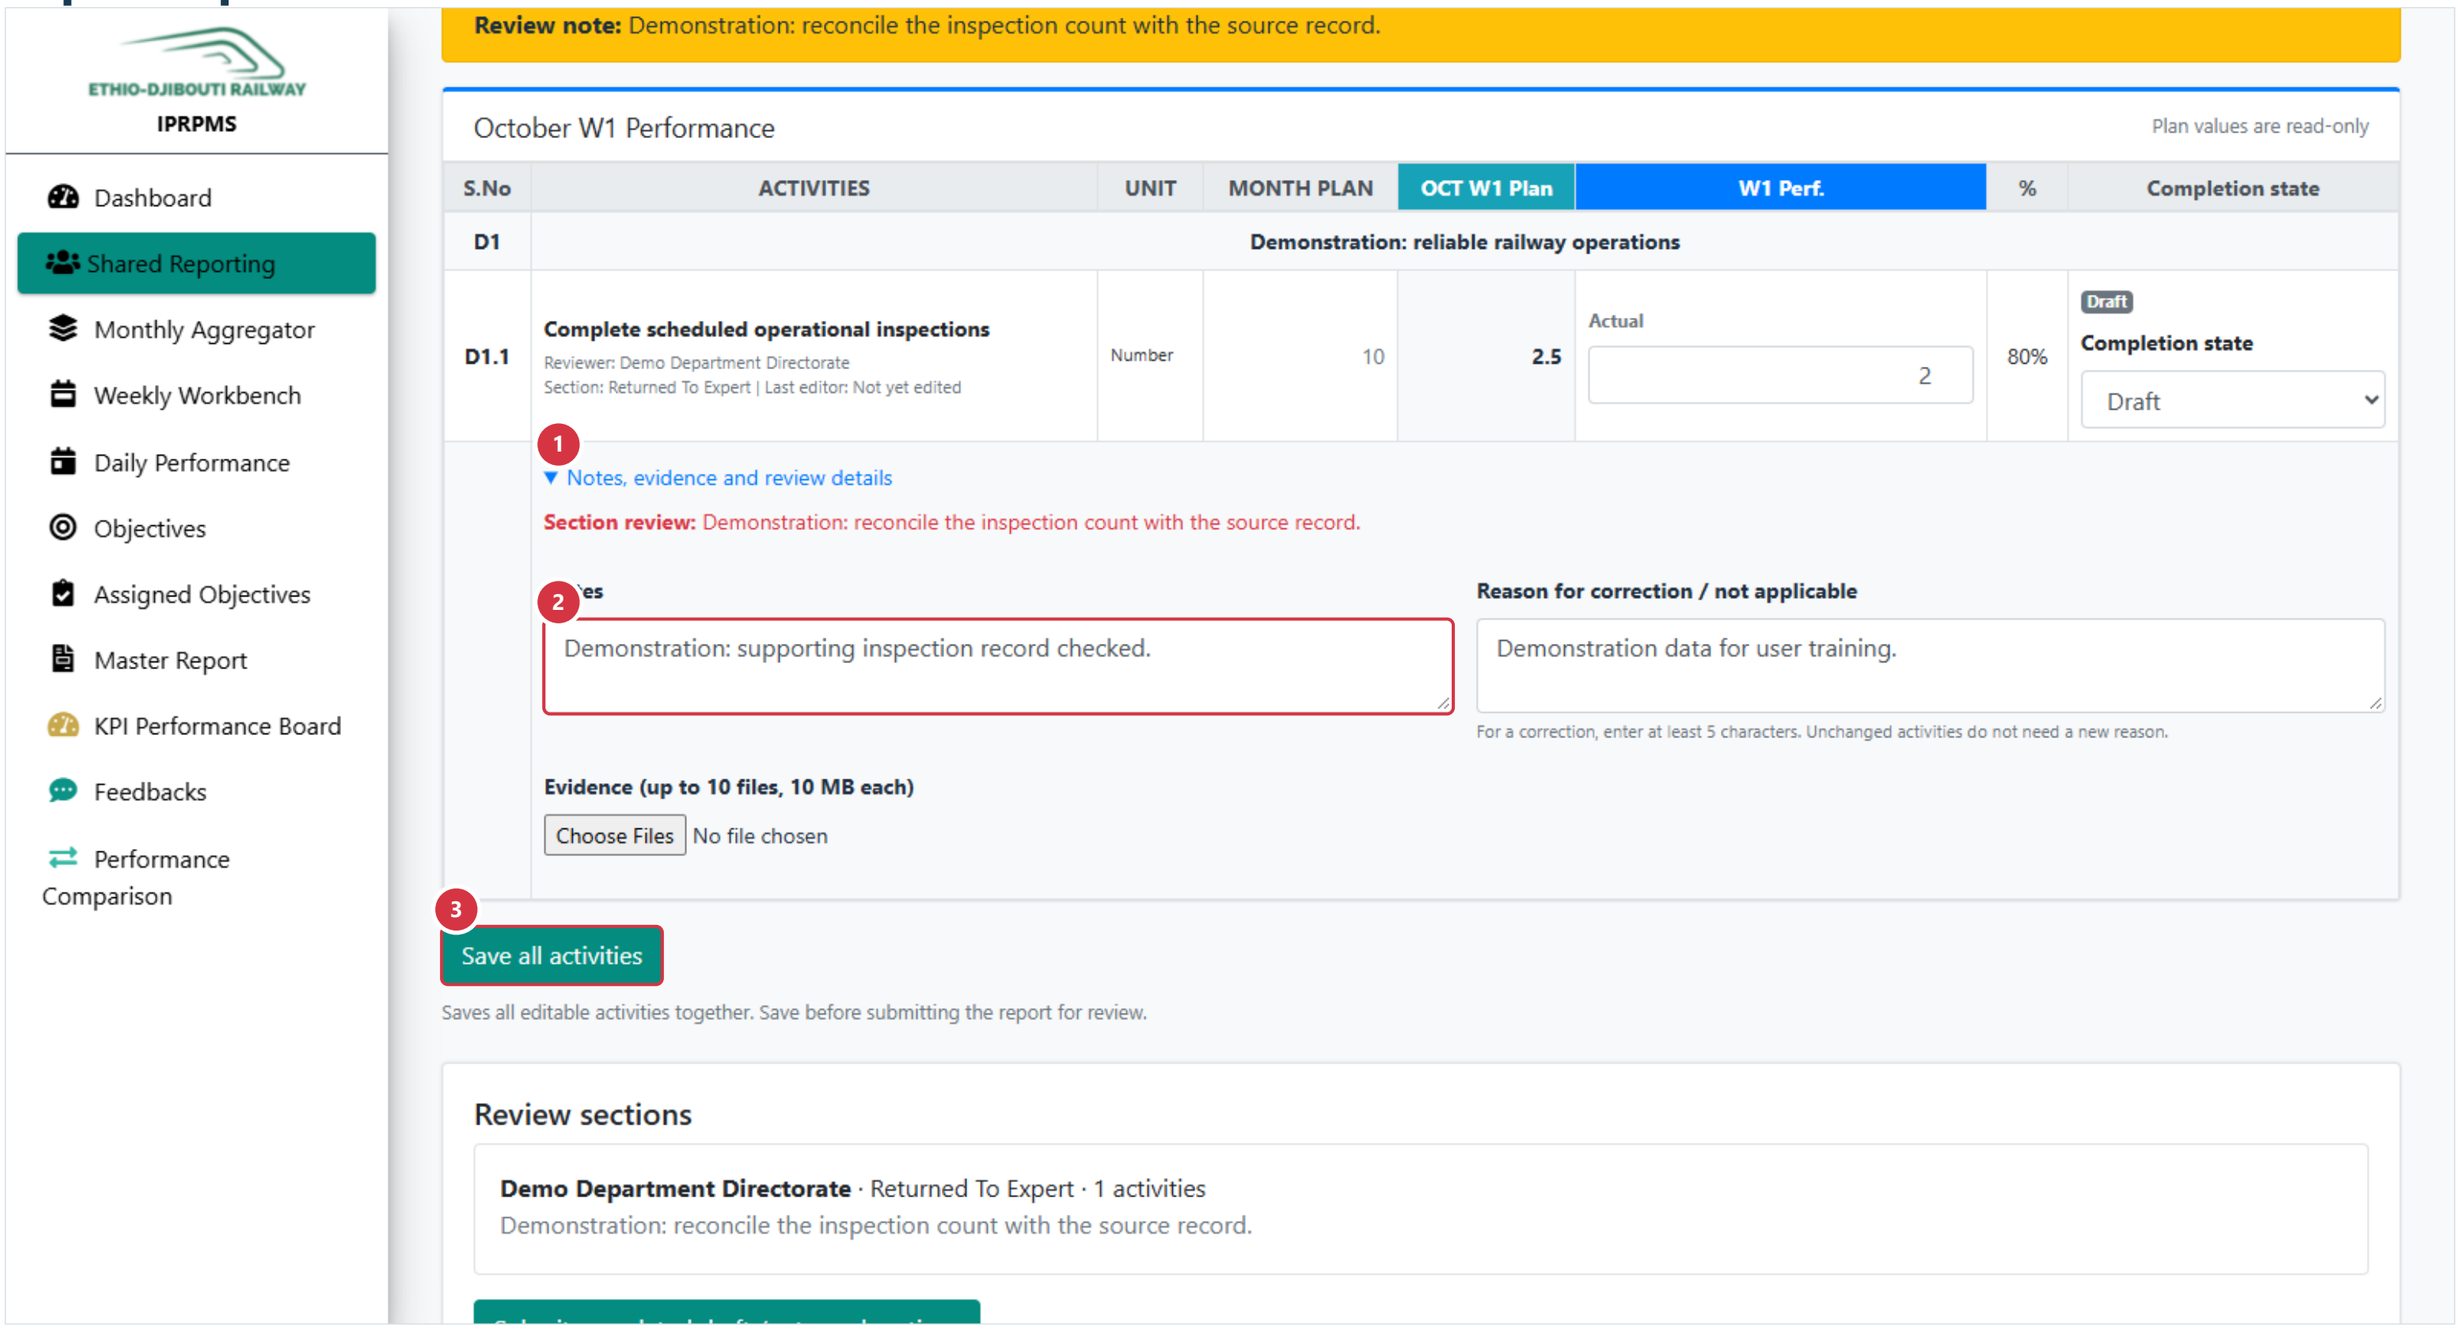

Follow a return notification to the report

1. Open Notifications.
2. Read the department, period and reviewer message in the returned-section notice.
3. Open the report link or mark the notice read after acting.

After this step: The demonstration notification was generated by a real return-section action in the temporary copy.

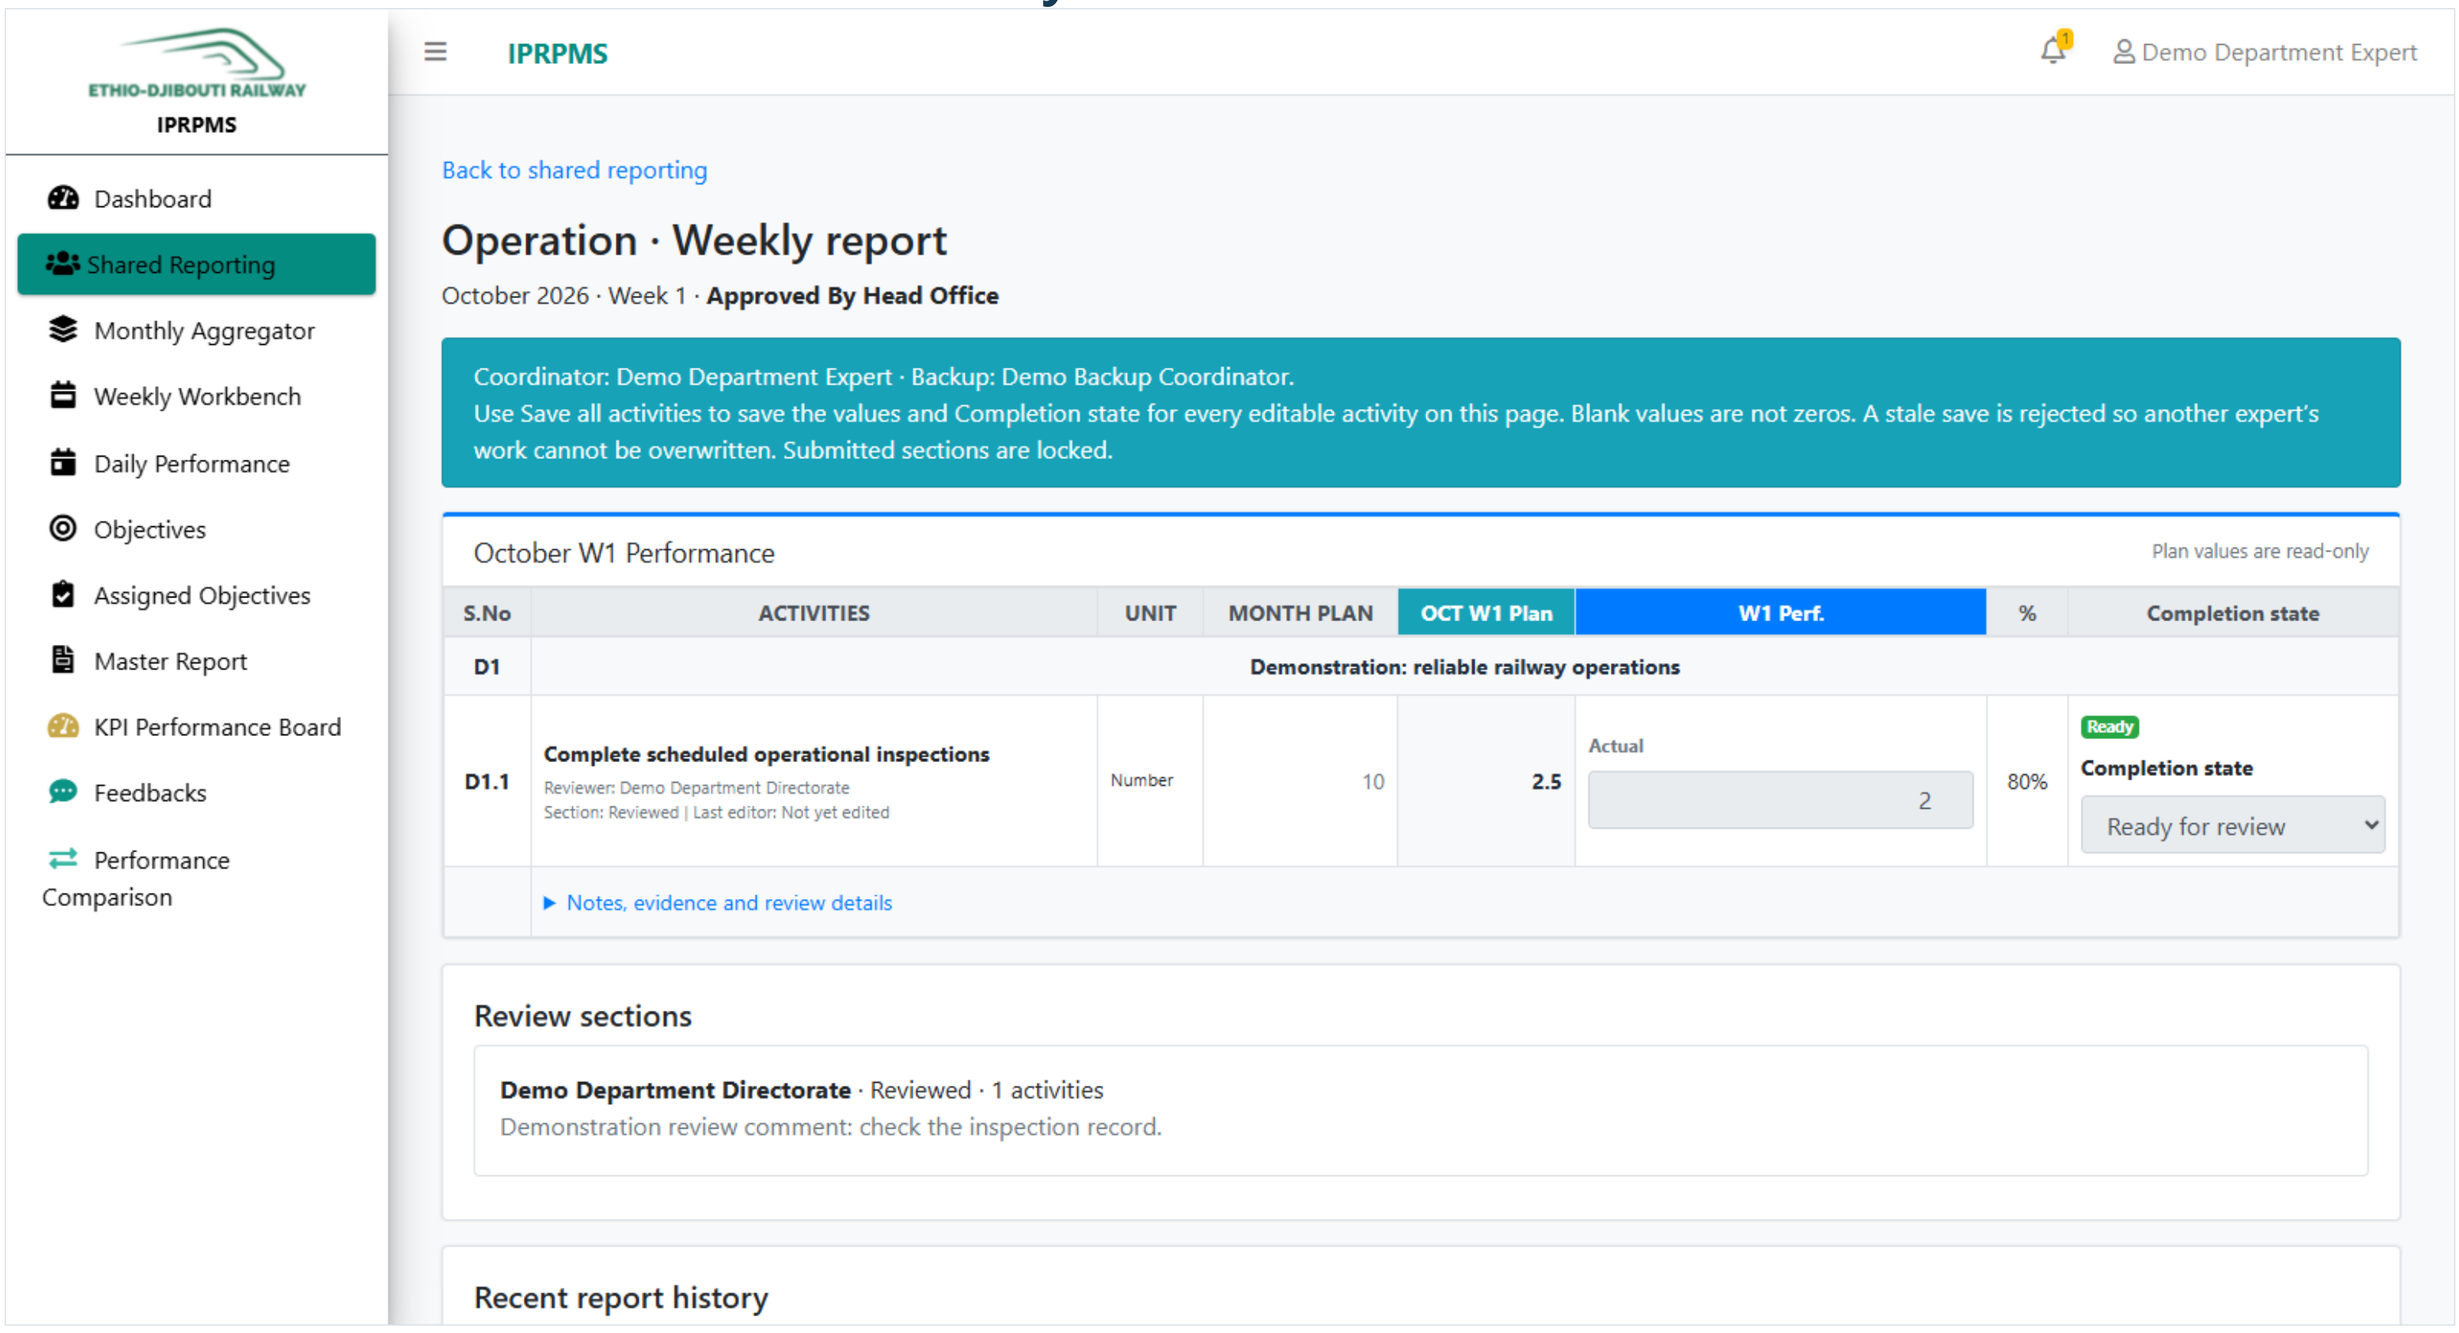

Expert: open a returned section and correction comment

1. Read the returned section and its correction comment.
2. Open the activity notes/evidence details to inspect the relevant data.
3. Correct the editable row, save and ask the coordinator to resubmit the completed section.

After this step: This capture follows an actual demonstration Submit and Return action performed through the application forms.

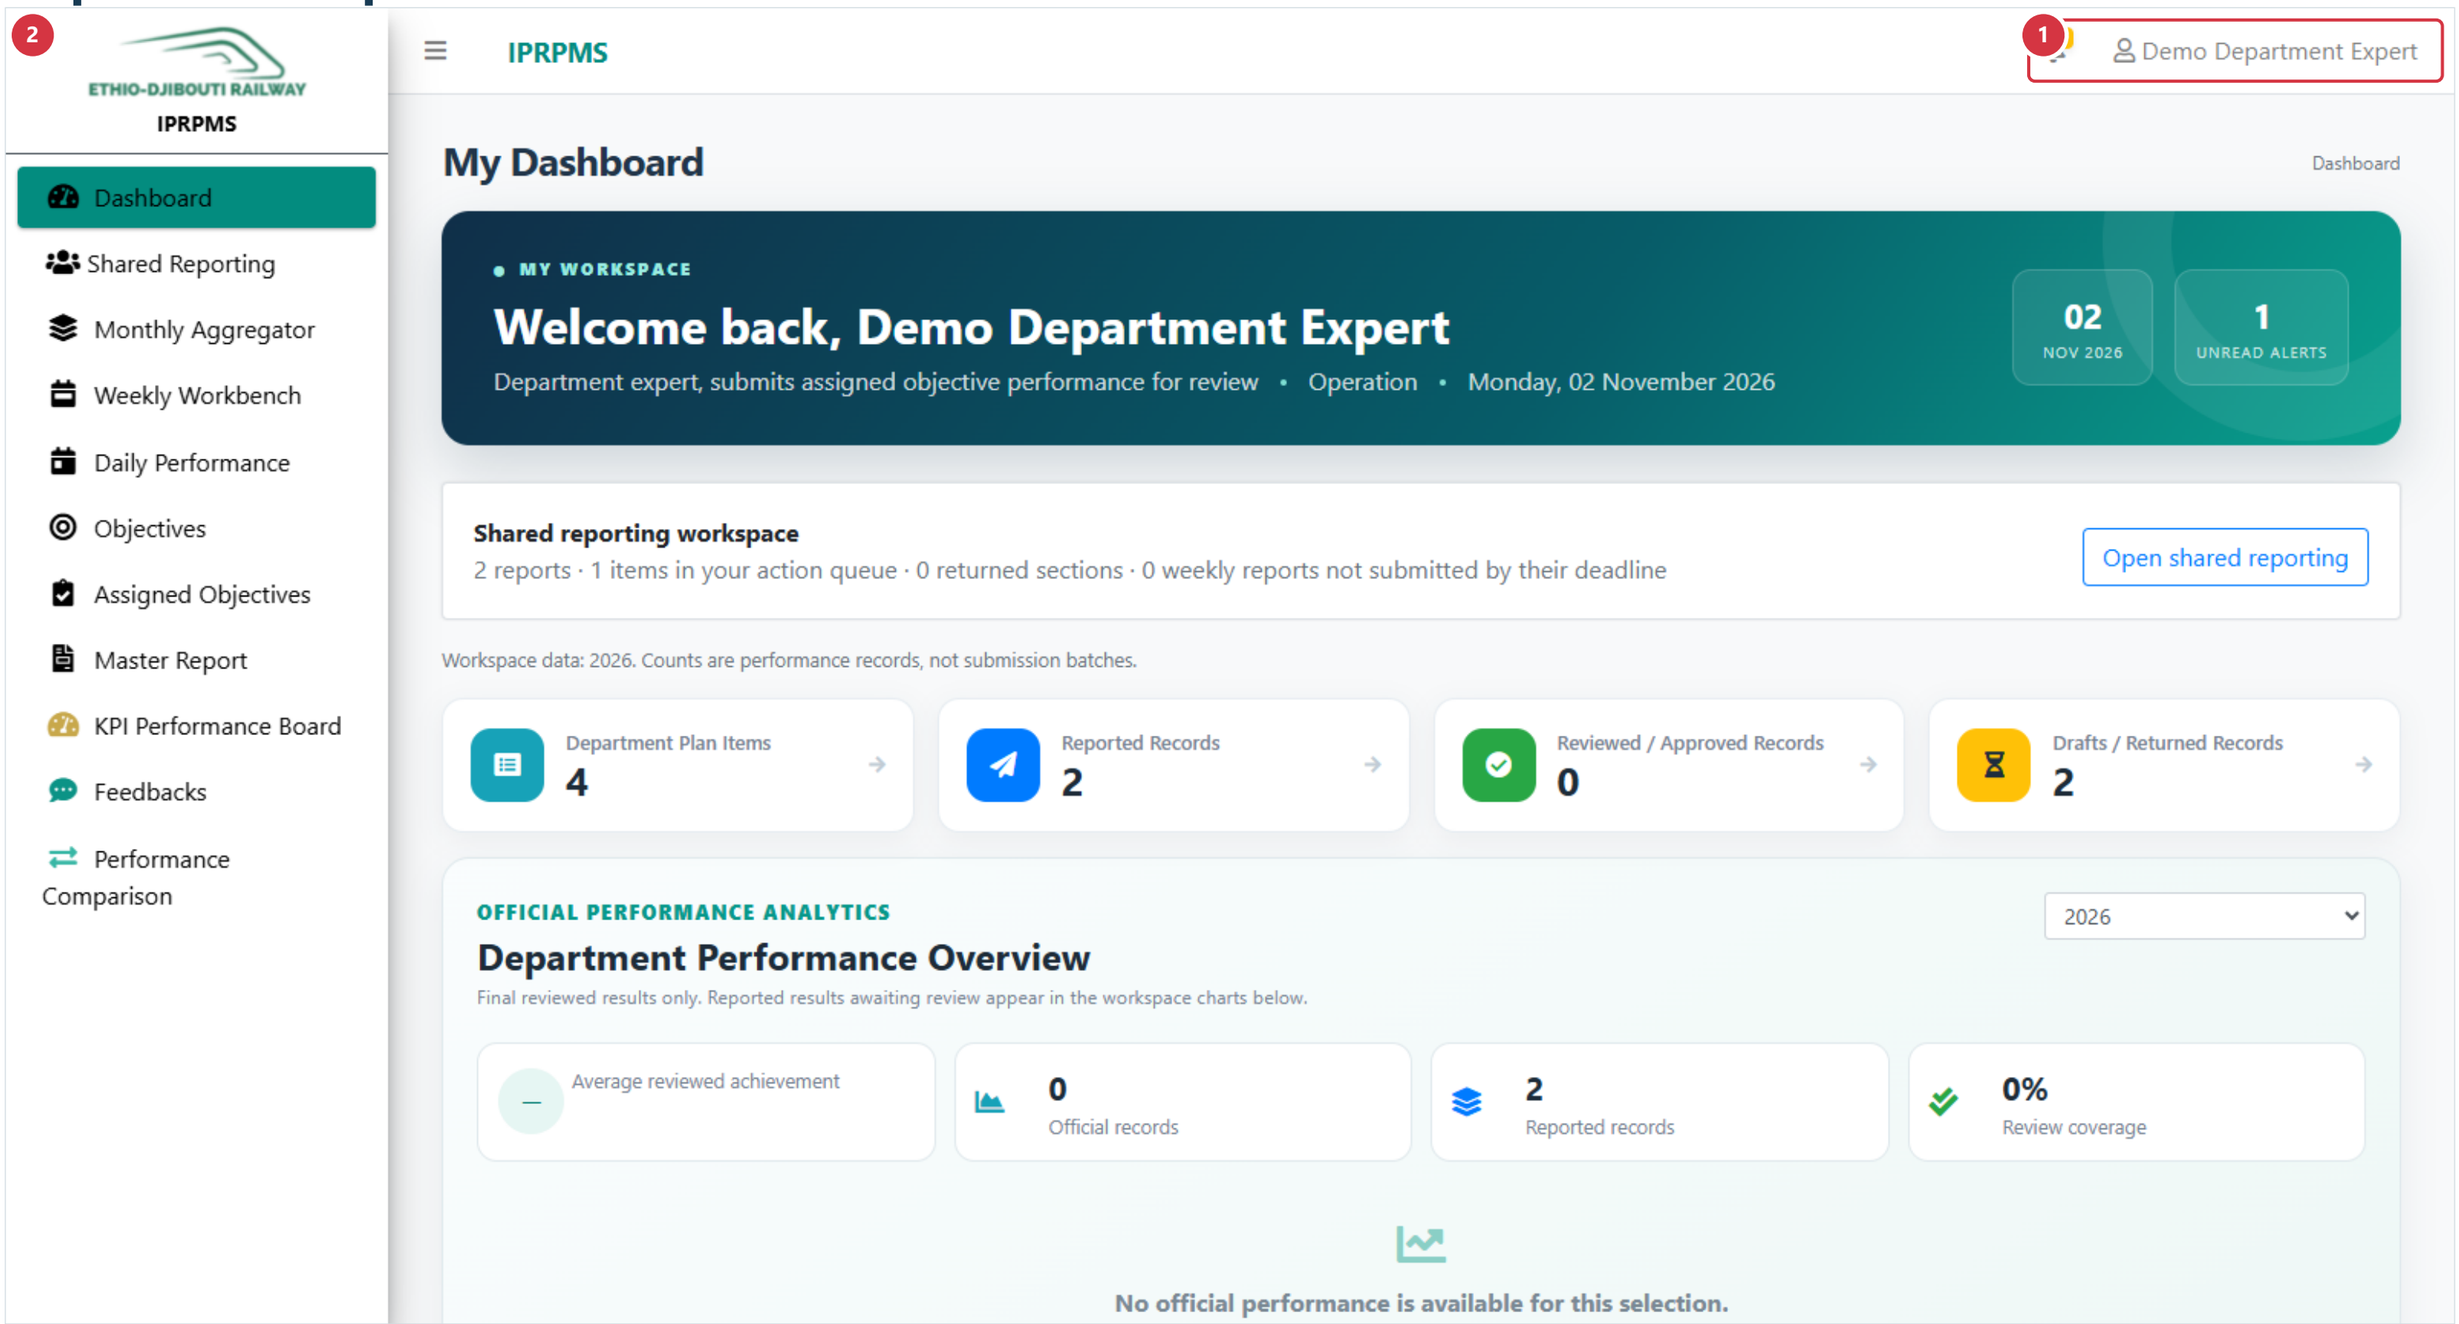

All users: read final status and review history

1. Open the approved report.
2. Confirm the final workflow status.
3. Read the recorded section decisions and available history.

After this step: Submitted and finally approved rows are locked according to the workflow. Use the authorized return/reopen process for corrections.

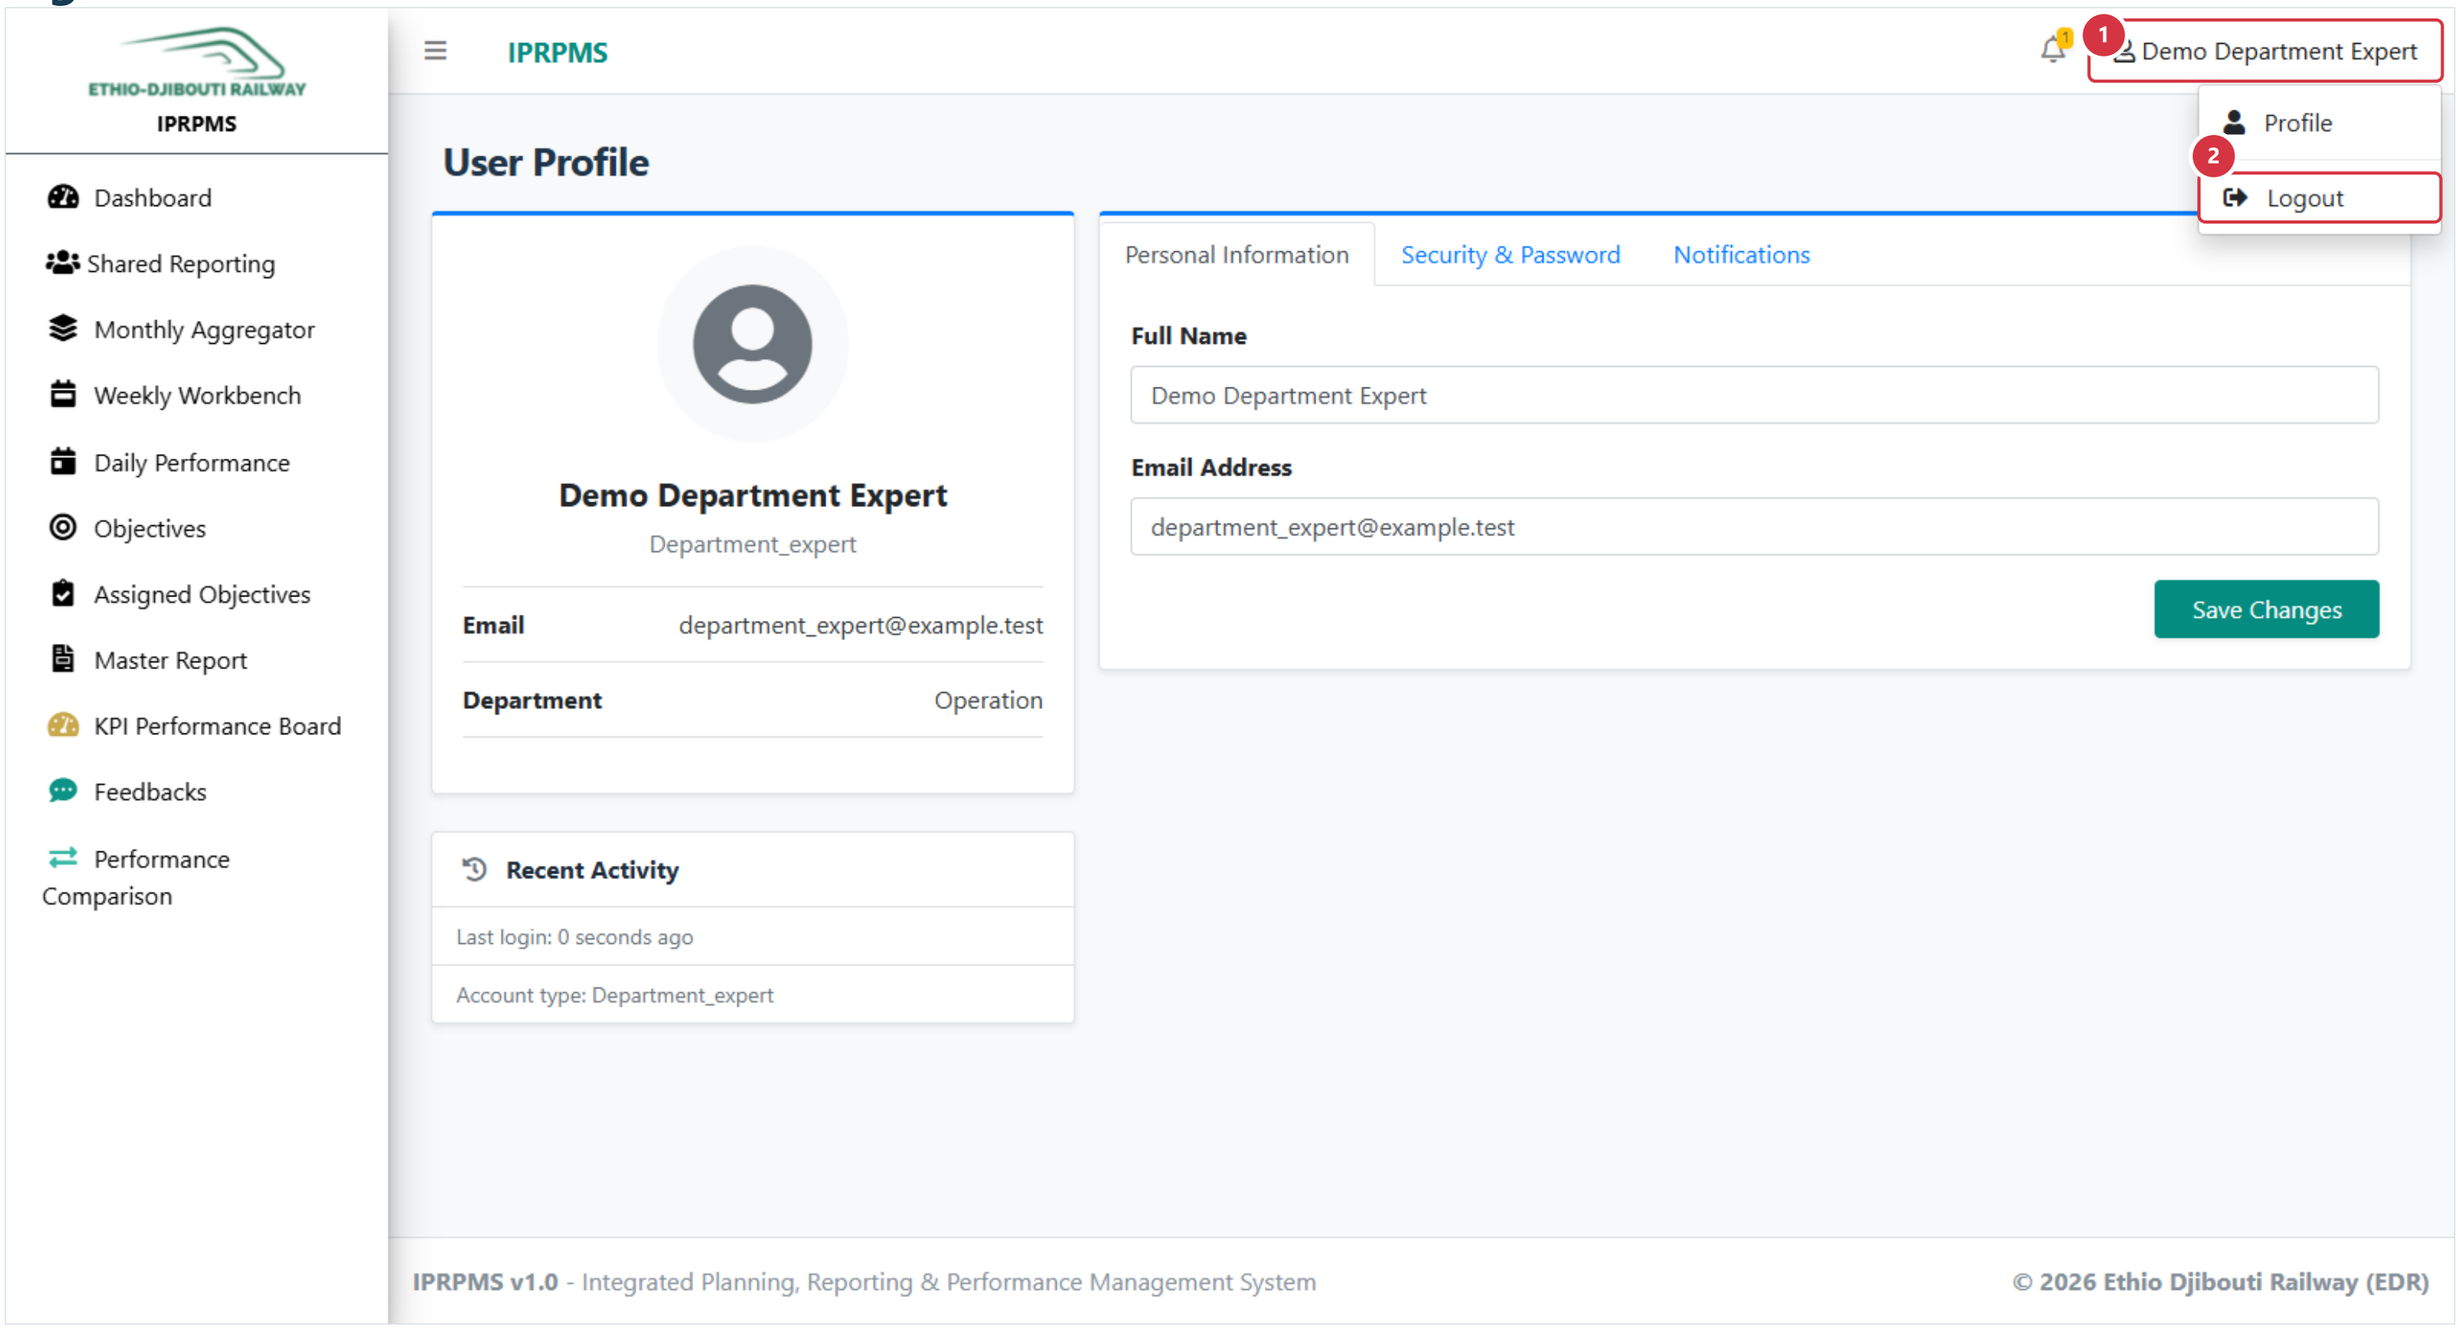

Department Expert and Coordinator: home screen

1. Confirm your signed-in role at the top right.
2. Confirm approved assignments, use the correct reporting frequency, enter supported actuals and save the rows.
3. The coordinator or backup submits completed sections. Correct returned sections and resubmit after saving.

After this step: Menus vary by permission, department and reporting frequency.

Sign out on a shared device

1. Click your name at the top right to open the user menu.
2. Click Logout after you finish your work.

After this step: The application returns to the sign-in screen after logout.

Before you finish, check these four things

Finish means your part is complete and you know who has the next action. It does not always mean the whole record is finally approved.

Your completion checklist

1. I used the correct department, year, period and unit. 2. I saved values and attached required evidence. 3. I submitted only if I am the assigned coordinator or backup. 4. I checked the status and know which Directorate reviews next.

If a menu or button is missing

Missing Submit? Ask the Chief to confirm the coordinator/backup team assignment. Missing activities? Check assignment approval and activity frequency before creating anything new.

Ask for help with useful details

Give IT or the responsible reviewer the module, department, year, reporting period, objective or record reference and exact message. Include a safe screenshot. Never send your password.

Keep the process and data safe

Use your own account, save before sending, read return comments and keep the same record for corrections. Demonstration screenshots are teaching examples, not official performance figures. The separate logistics Import/Export module is excluded.
