Department Directorate

Your responsibilities, complete workflow, exact clicks and return paths.

Read first: the Start Here guide explains how the whole system works. Then use this manual to do your part, check the outcome and hand work to the right person.

Understand your job before the buttons

Keep this page in mind whenever you receive a new record. It explains your responsibility and where your part stops.

Your job

Accept the Chief's assigned activities for your Experts, then check the sections of departmental performance assigned to you.

What you receive

Objective assignments from your Department Chief and completed reporting sections from the coordinator or backup.

Who receives your work

Approve clean performance sections for consolidation at Department Chief level. Return only the sections requiring correction to the Experts, with a specific comment.

Your limits and important distinctions

Your responsibility is your assigned departmental scope. You do not create the organization plan or give the final Plan and Report approval.

Your workflow, from first action to finish

Read down the page. Each step has an outcome; do not jump ahead simply because a button is visible.

1

Check the Chief's assignment

Open Assigned Objectives and read the activity, target and assigned responsibility.

2

Release correct work to Experts

Click Approve for Experts. Return to Chief with a reason if the assignment is wrong.

3

Open a submitted reporting section

Confirm department, year, period and the section assigned to your account.

4

Check figures and evidence

Compare actual values with the source and unit. If a permitted reviewer edit is needed, record its correction reason.

5

Approve or return the section

Use Approve section for correct work, or Return this section to experts with the precise change needed.

6

Confirm the next stage

When all required sections are approved, the report advances to the Department Chief. Re-review corrected sections rather than duplicating the report.

Find the task you need

Use the page number or click a task name in the PDF. Section introductions explain the purpose before the screen-by-screen actions.

First access and everyday account safety 5

Accept or return an objective assignment 11

Review, correct or return a reporting section 13

Read a return, correct it and send it again 16

Completion checklist and help 22

First access and everyday account safety

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

Use your own account. Your department and role decide what you can see and which decisions you can make. Never use somebody else's account to reach a missing button.

Before you click

Have your official account details ready. Open the address supplied by IT, enter your email and Access Key, then click Authenticate. A first-password screen appears only when your account requires it.

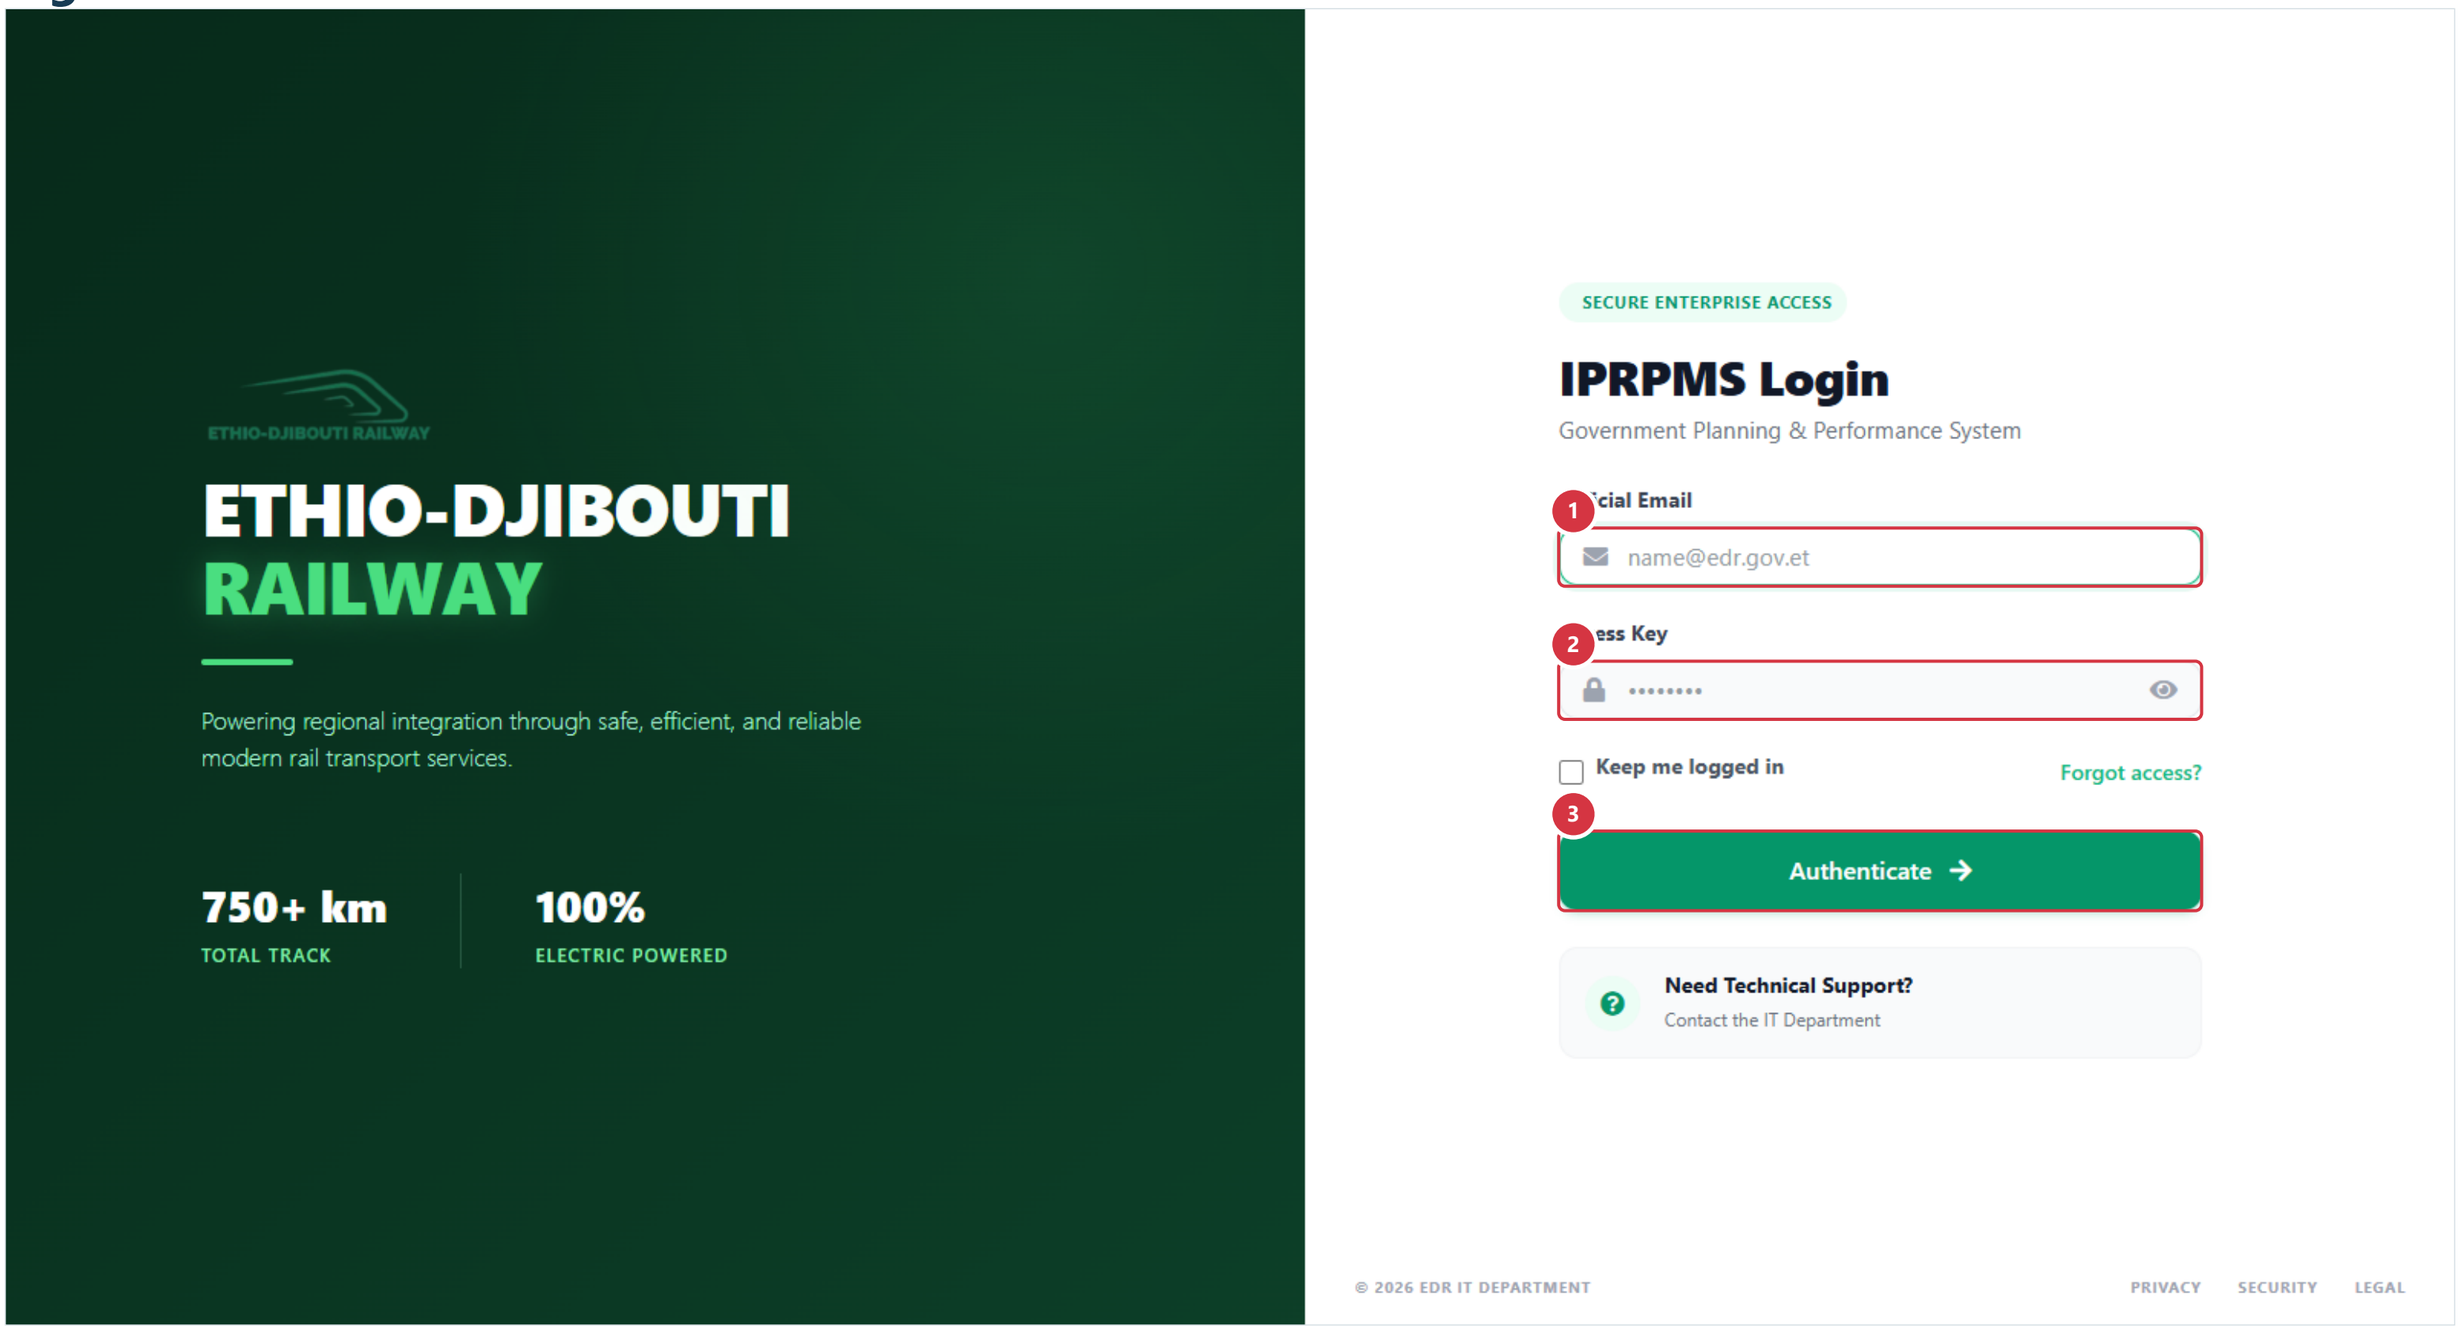

What to check

Check the name and role at the top right. Change your temporary password when prompted. Your profile is for your own name, email and password; department and role changes belong to the administrator.

How you know it worked

You can open the dashboard with the correct account. The notification bell shows work sent to you. On a shared computer, sign out when finished and do not choose Keep me logged in.

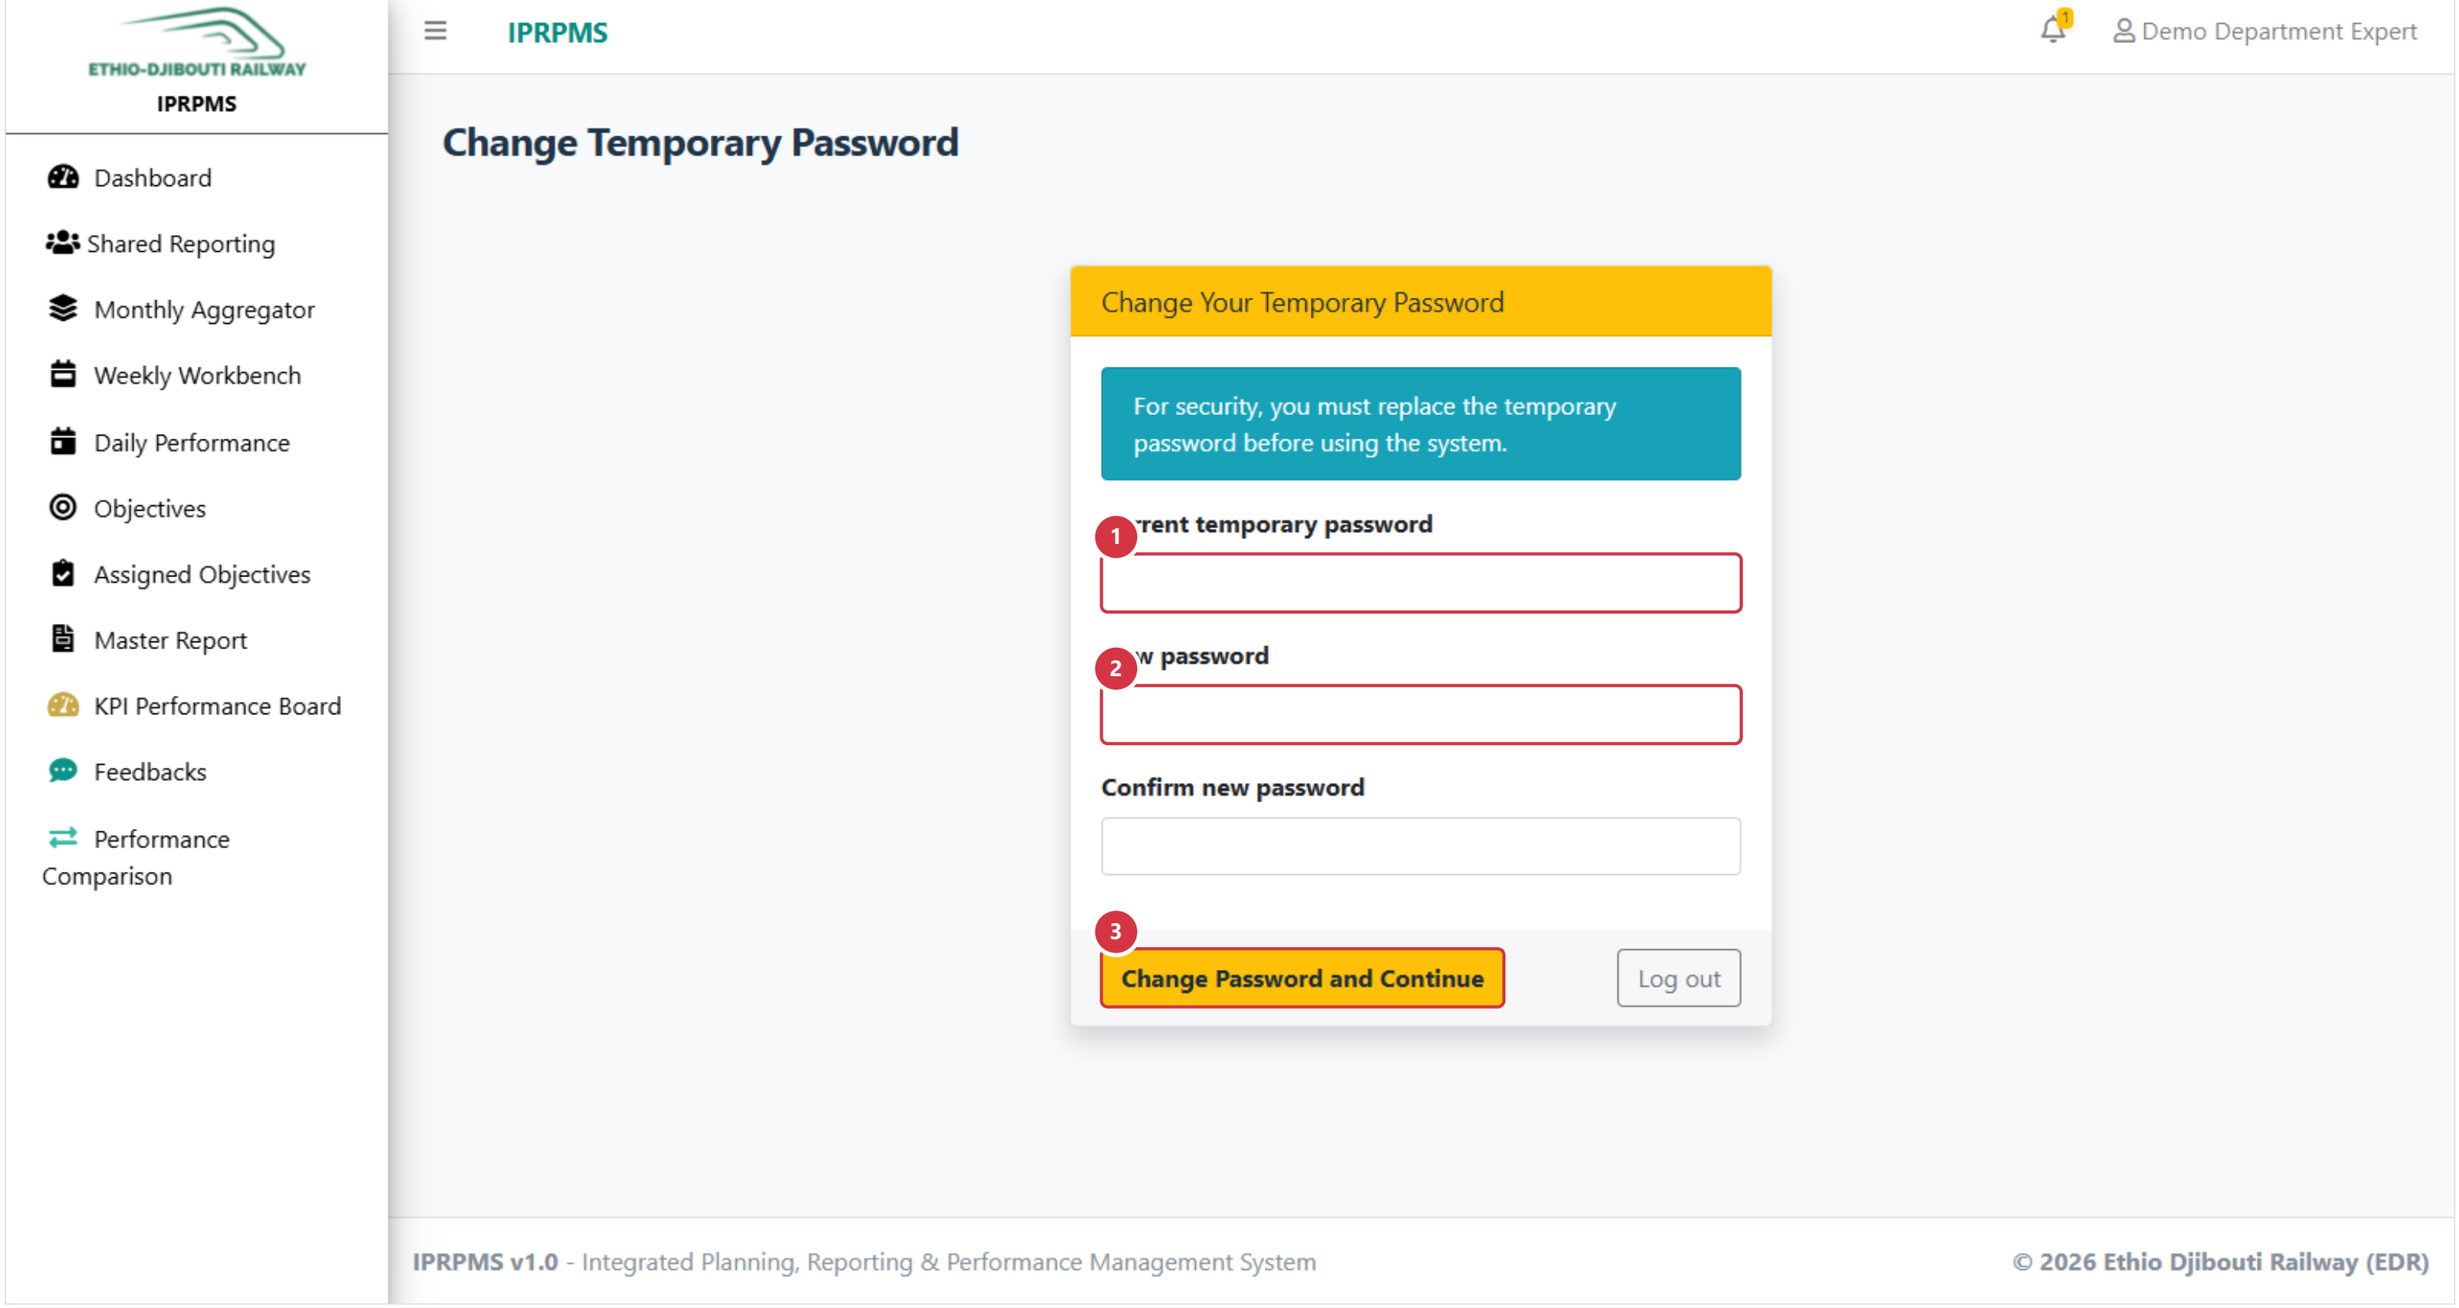

Sign in to IPRPMS

1. Enter your official email in Official Email.
2. Enter your own access key in Access Key.
3. Select Keep me logged in only on your own device, then click Authenticate.

After this step: The dashboard opens after authentication. Password fields in this handbook remain blank.

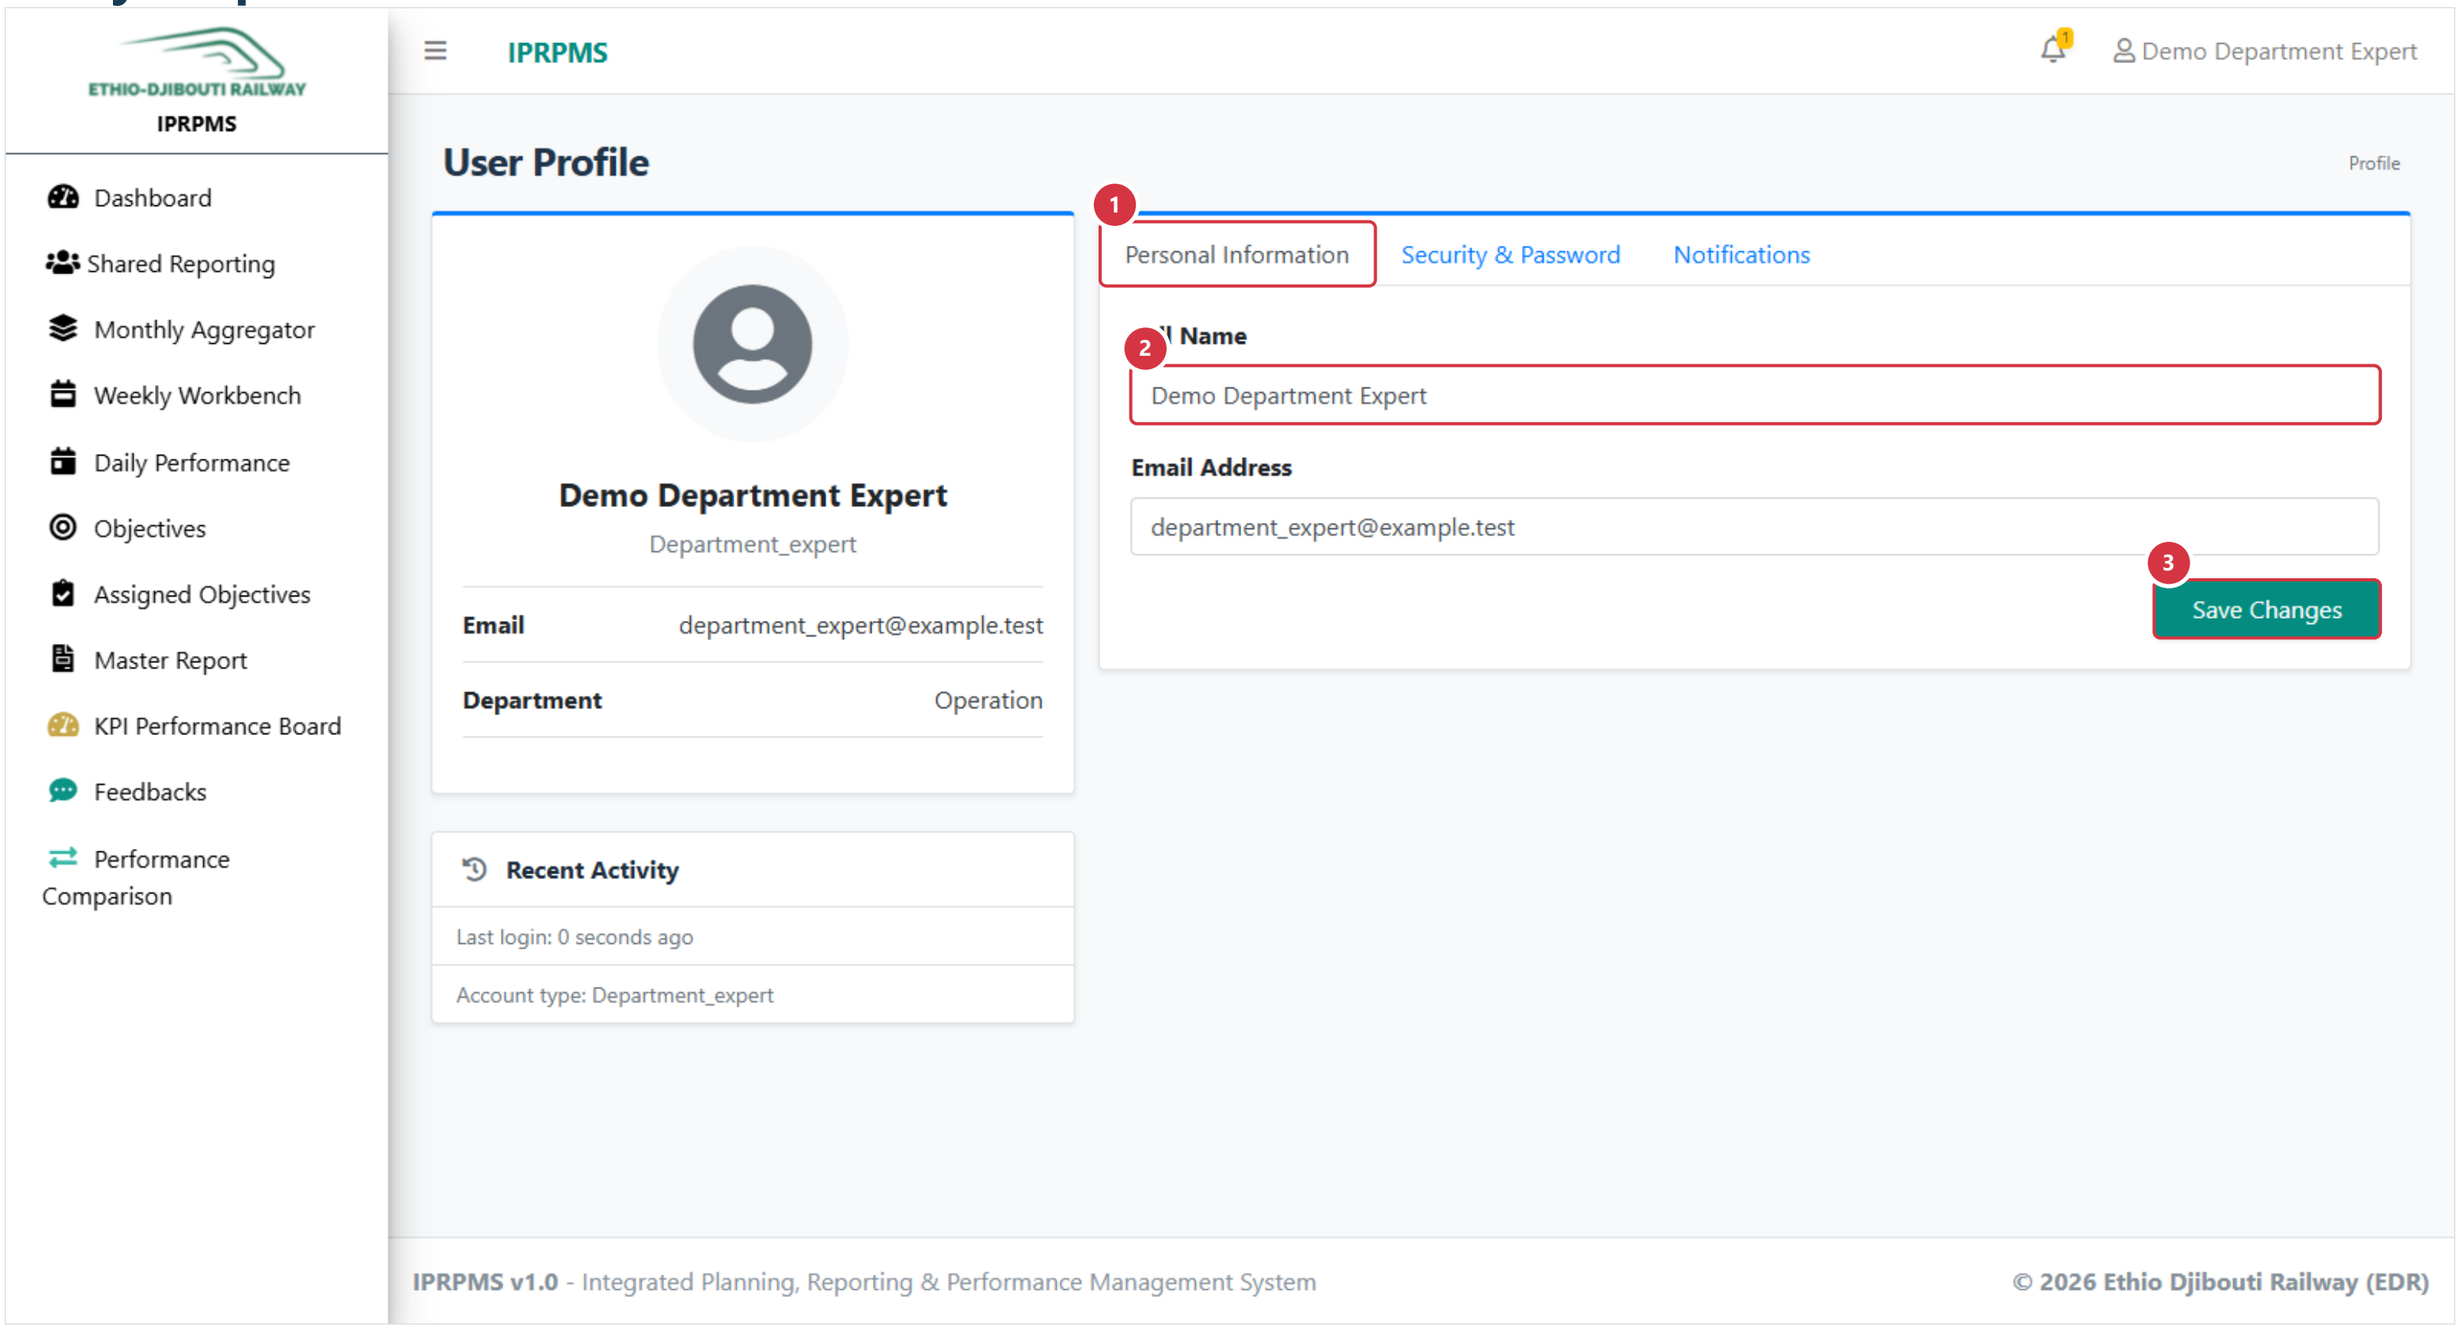

Replace a temporary password

1. Enter the current temporary password.
2. Enter a new private password and repeat it in Confirm new password.
3. Click Change Password and Continue.

After this step: This screen appears when the administrator requires a first password change.

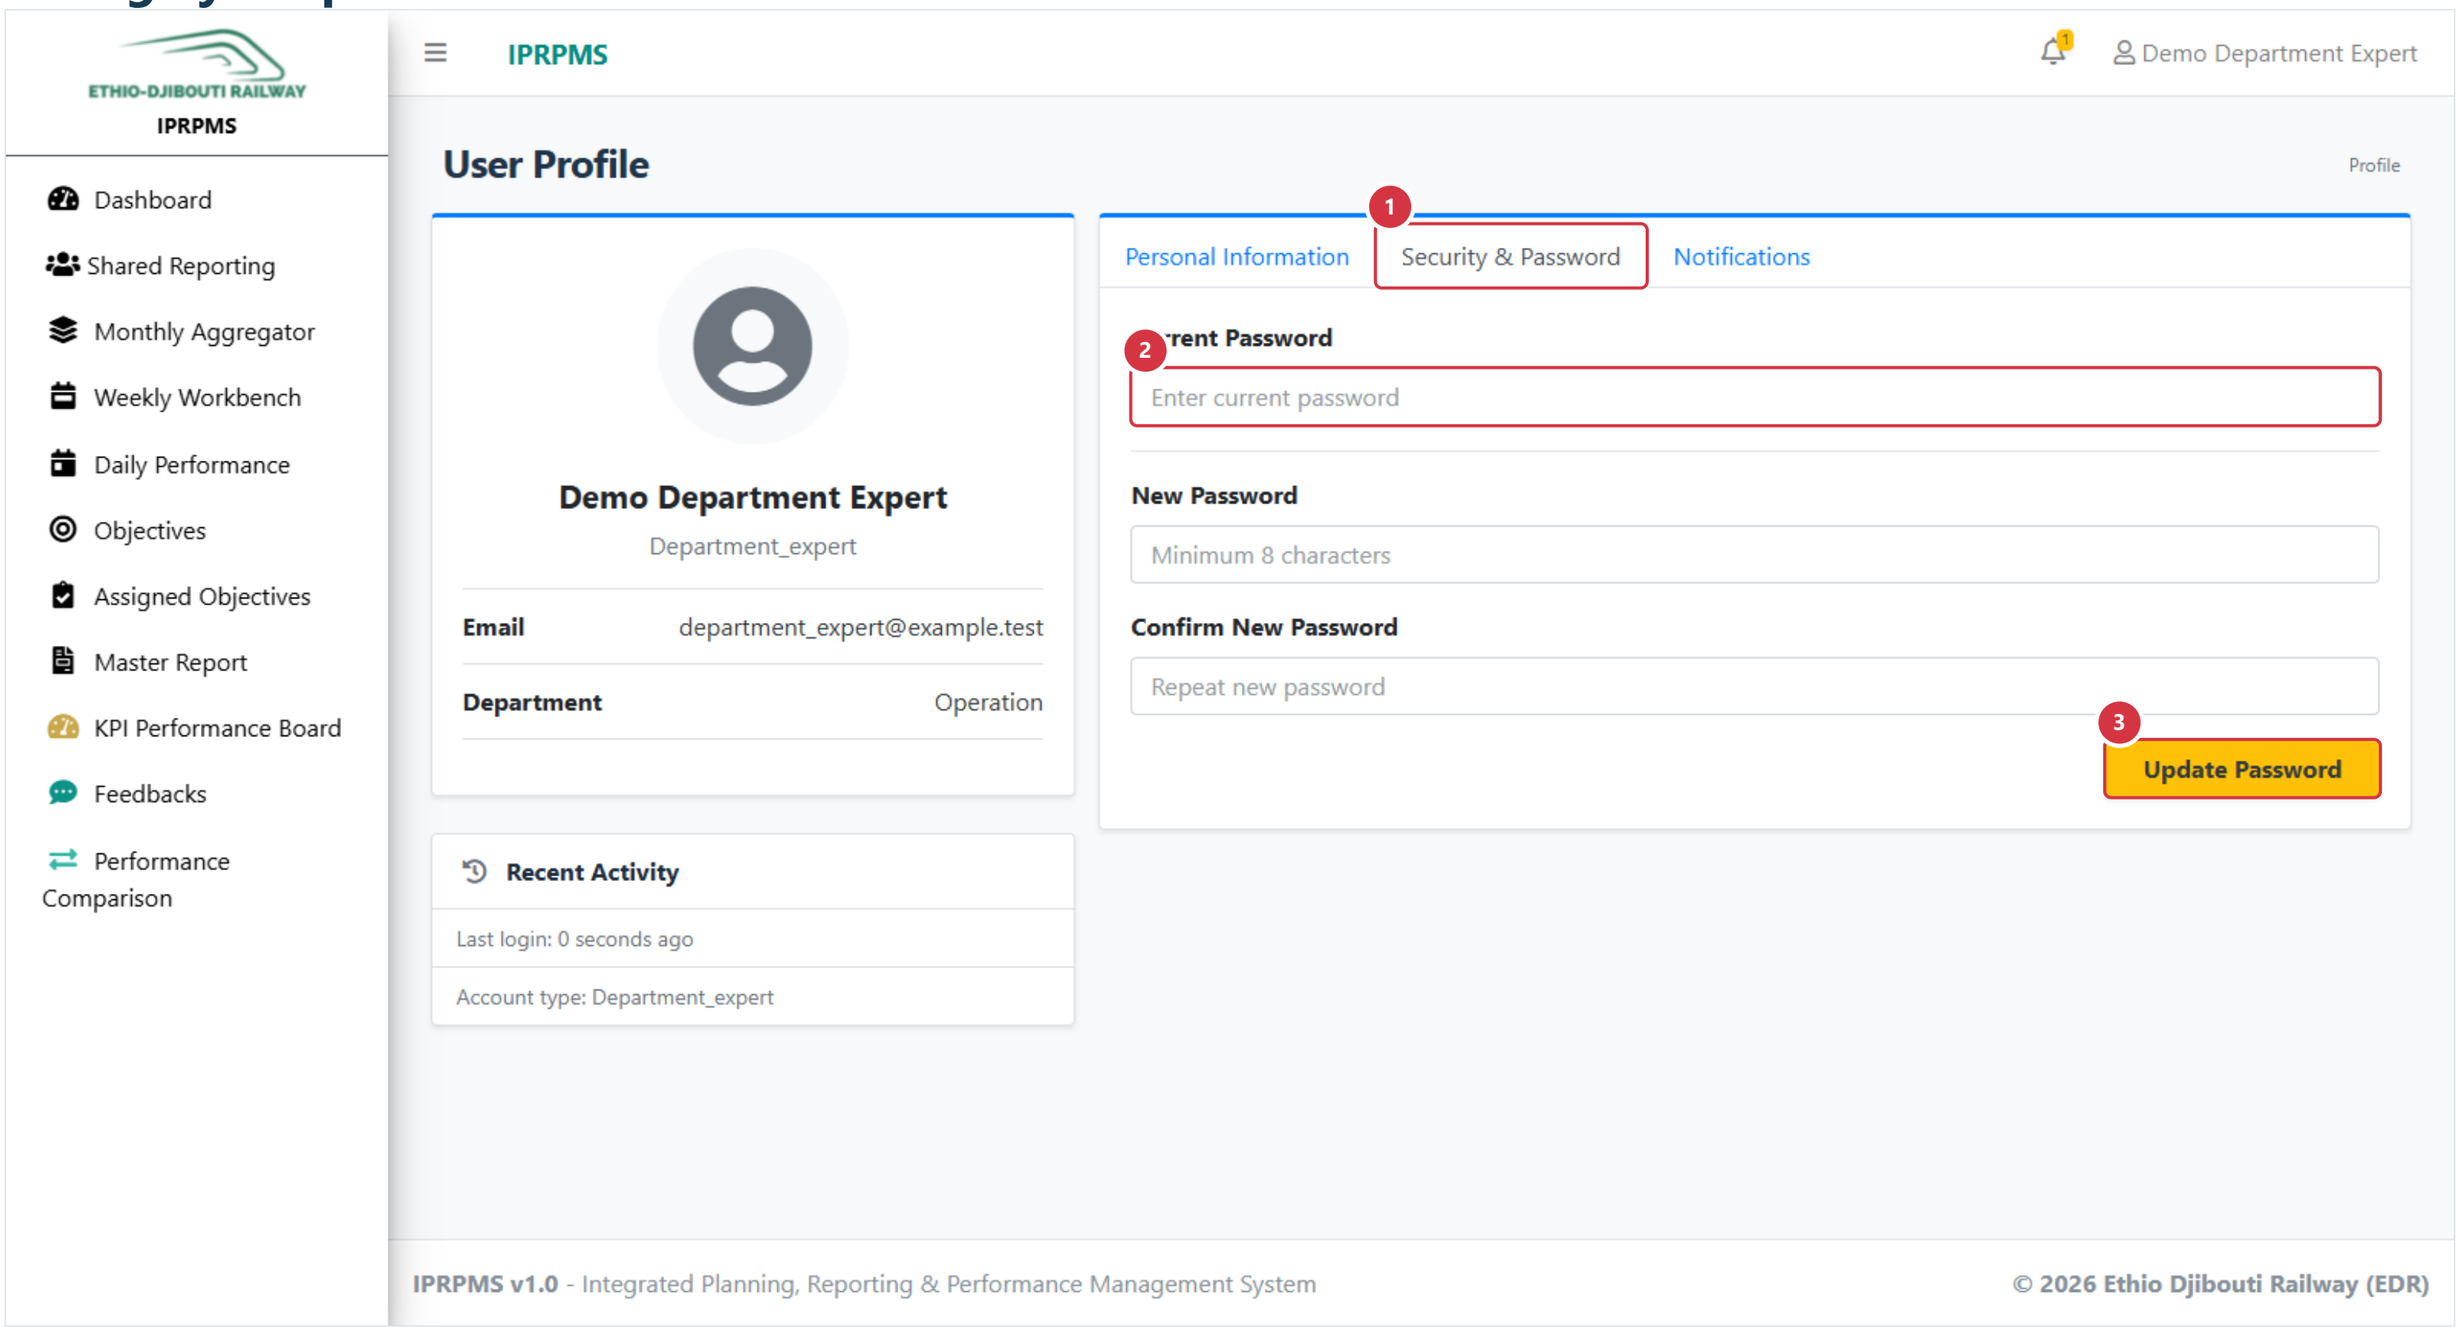

Edit your personal information

1. Click Personal Information in Profile.
2. Update Full Name or Email Address.
3. Click Save Changes and confirm the success message.

After this step: Department and role assignments are managed by the administrator, not through this form.

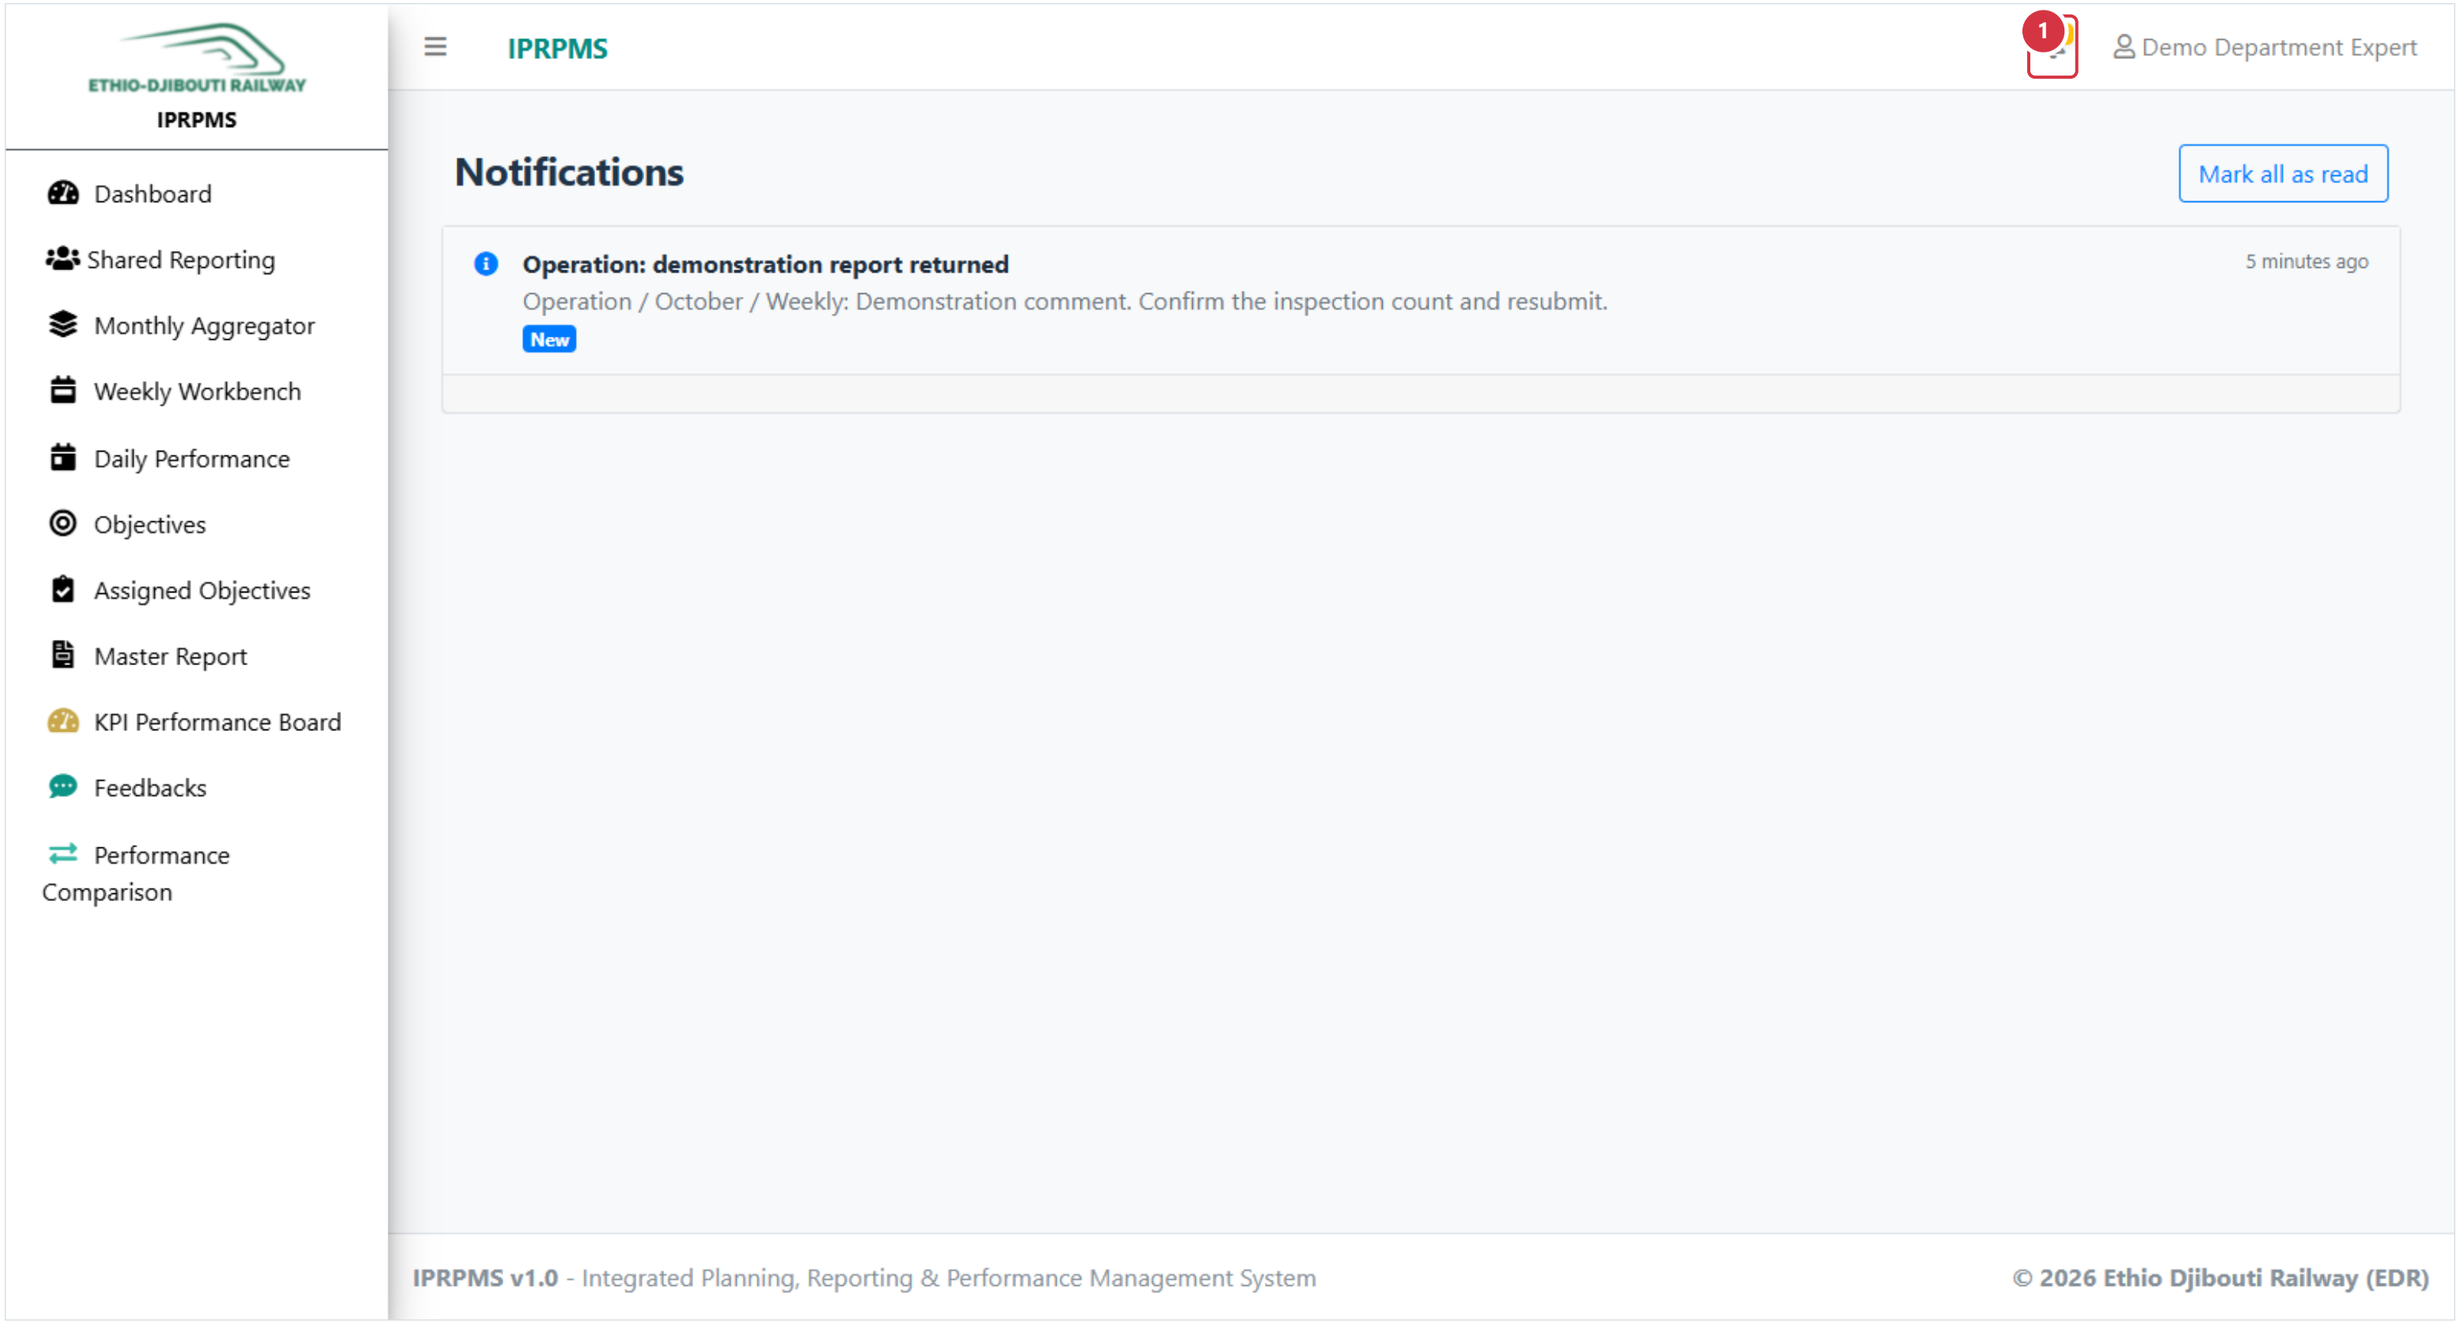

Change your password

1. Click Security & Password.
2. Enter your current password, a new password and its confirmation.
3. Click Update Password.

After this step: Use a private password. The fields are deliberately empty in this training capture.

Read workflow notifications

1. Open the notification bell or Notifications page.
2. Read the department, period, action and review comment.
3. Open the linked record or mark the notice read after acting on it.

After this step: Marking a notification read does not approve, correct or submit the underlying record.

Accept or return an objective assignment

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

The Chief chooses you as the responsible Directorate. Your approval makes the activity available to Department Experts.

Before you click

Open Assigned Objectives and inspect the Chief's assigned rows.

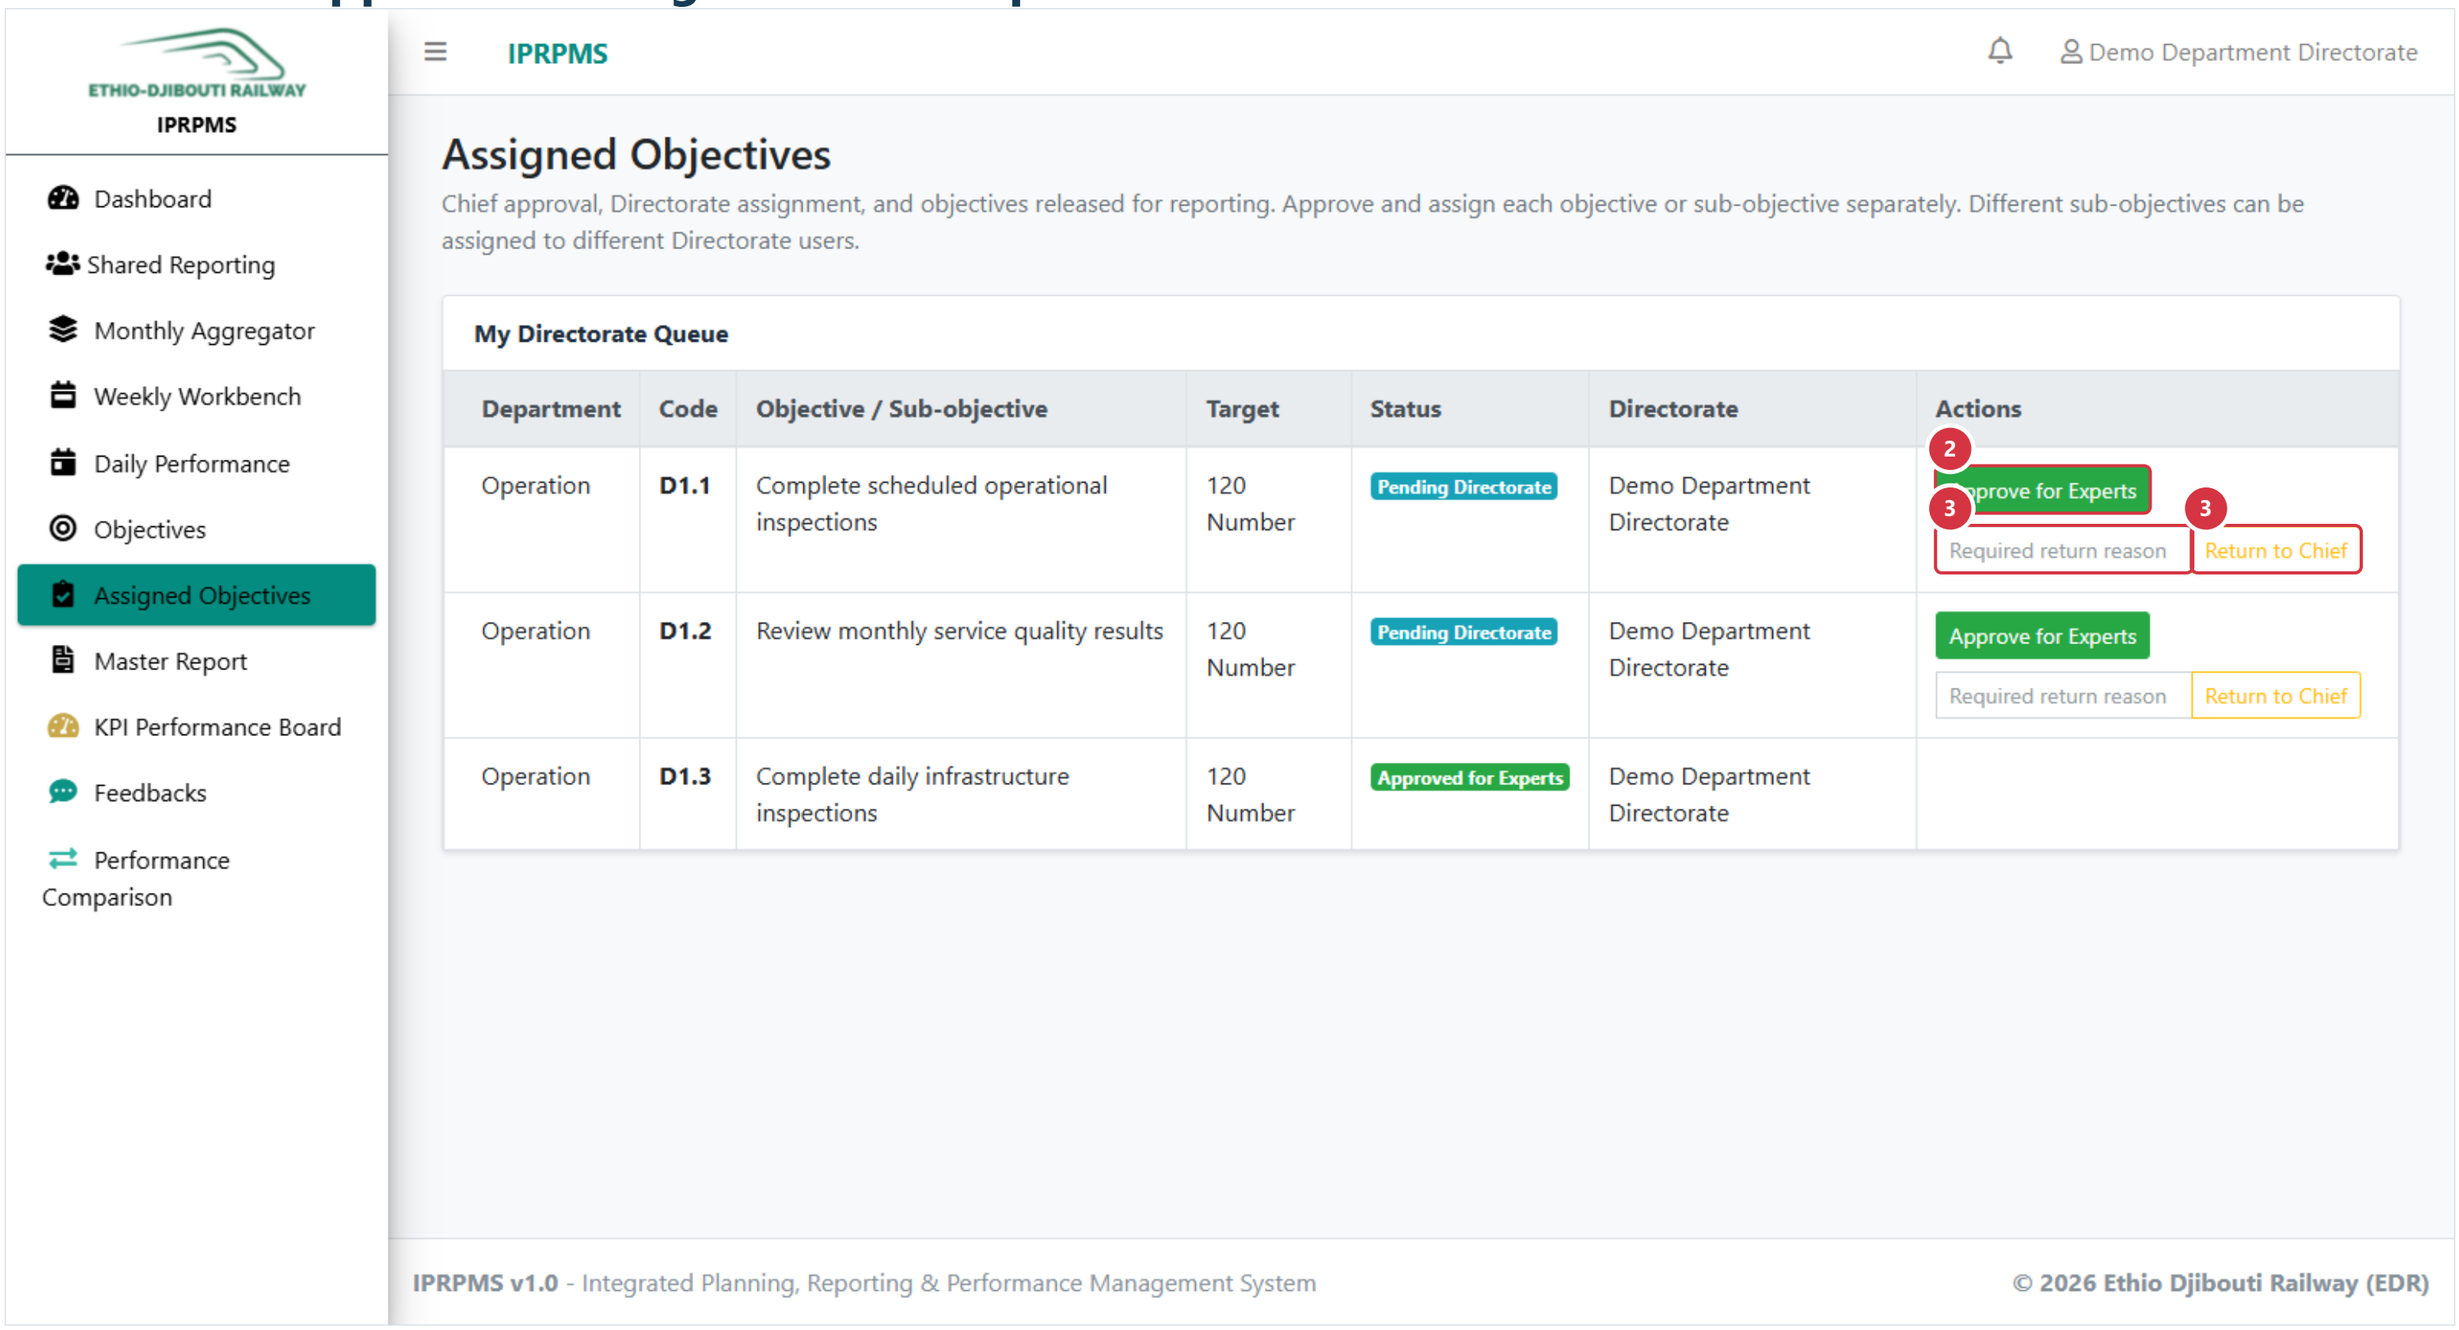

What to check

Verify responsibility, target, unit and reporting frequency. If wrong, write a reason and use Return to Chief.

How you know it worked

Click Approve for Experts. The department's Experts can then work on the approved activity.

Directorate: approve an assignment for Experts

1. Open Assigned Objectives and review the assigned activity.
2. Click Approve for Experts when responsibility and targets are correct.
3. Otherwise enter a reason and click Return to Chief.

After this step: Only assignments approved for Experts appear in their departmental reporting scope.

Review, correct or return a reporting section

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

Review the actual results in your assigned section, not an unrelated department's entries.

Before you click

Wait for the coordinator or backup to submit the completed section. Check the period and source evidence.

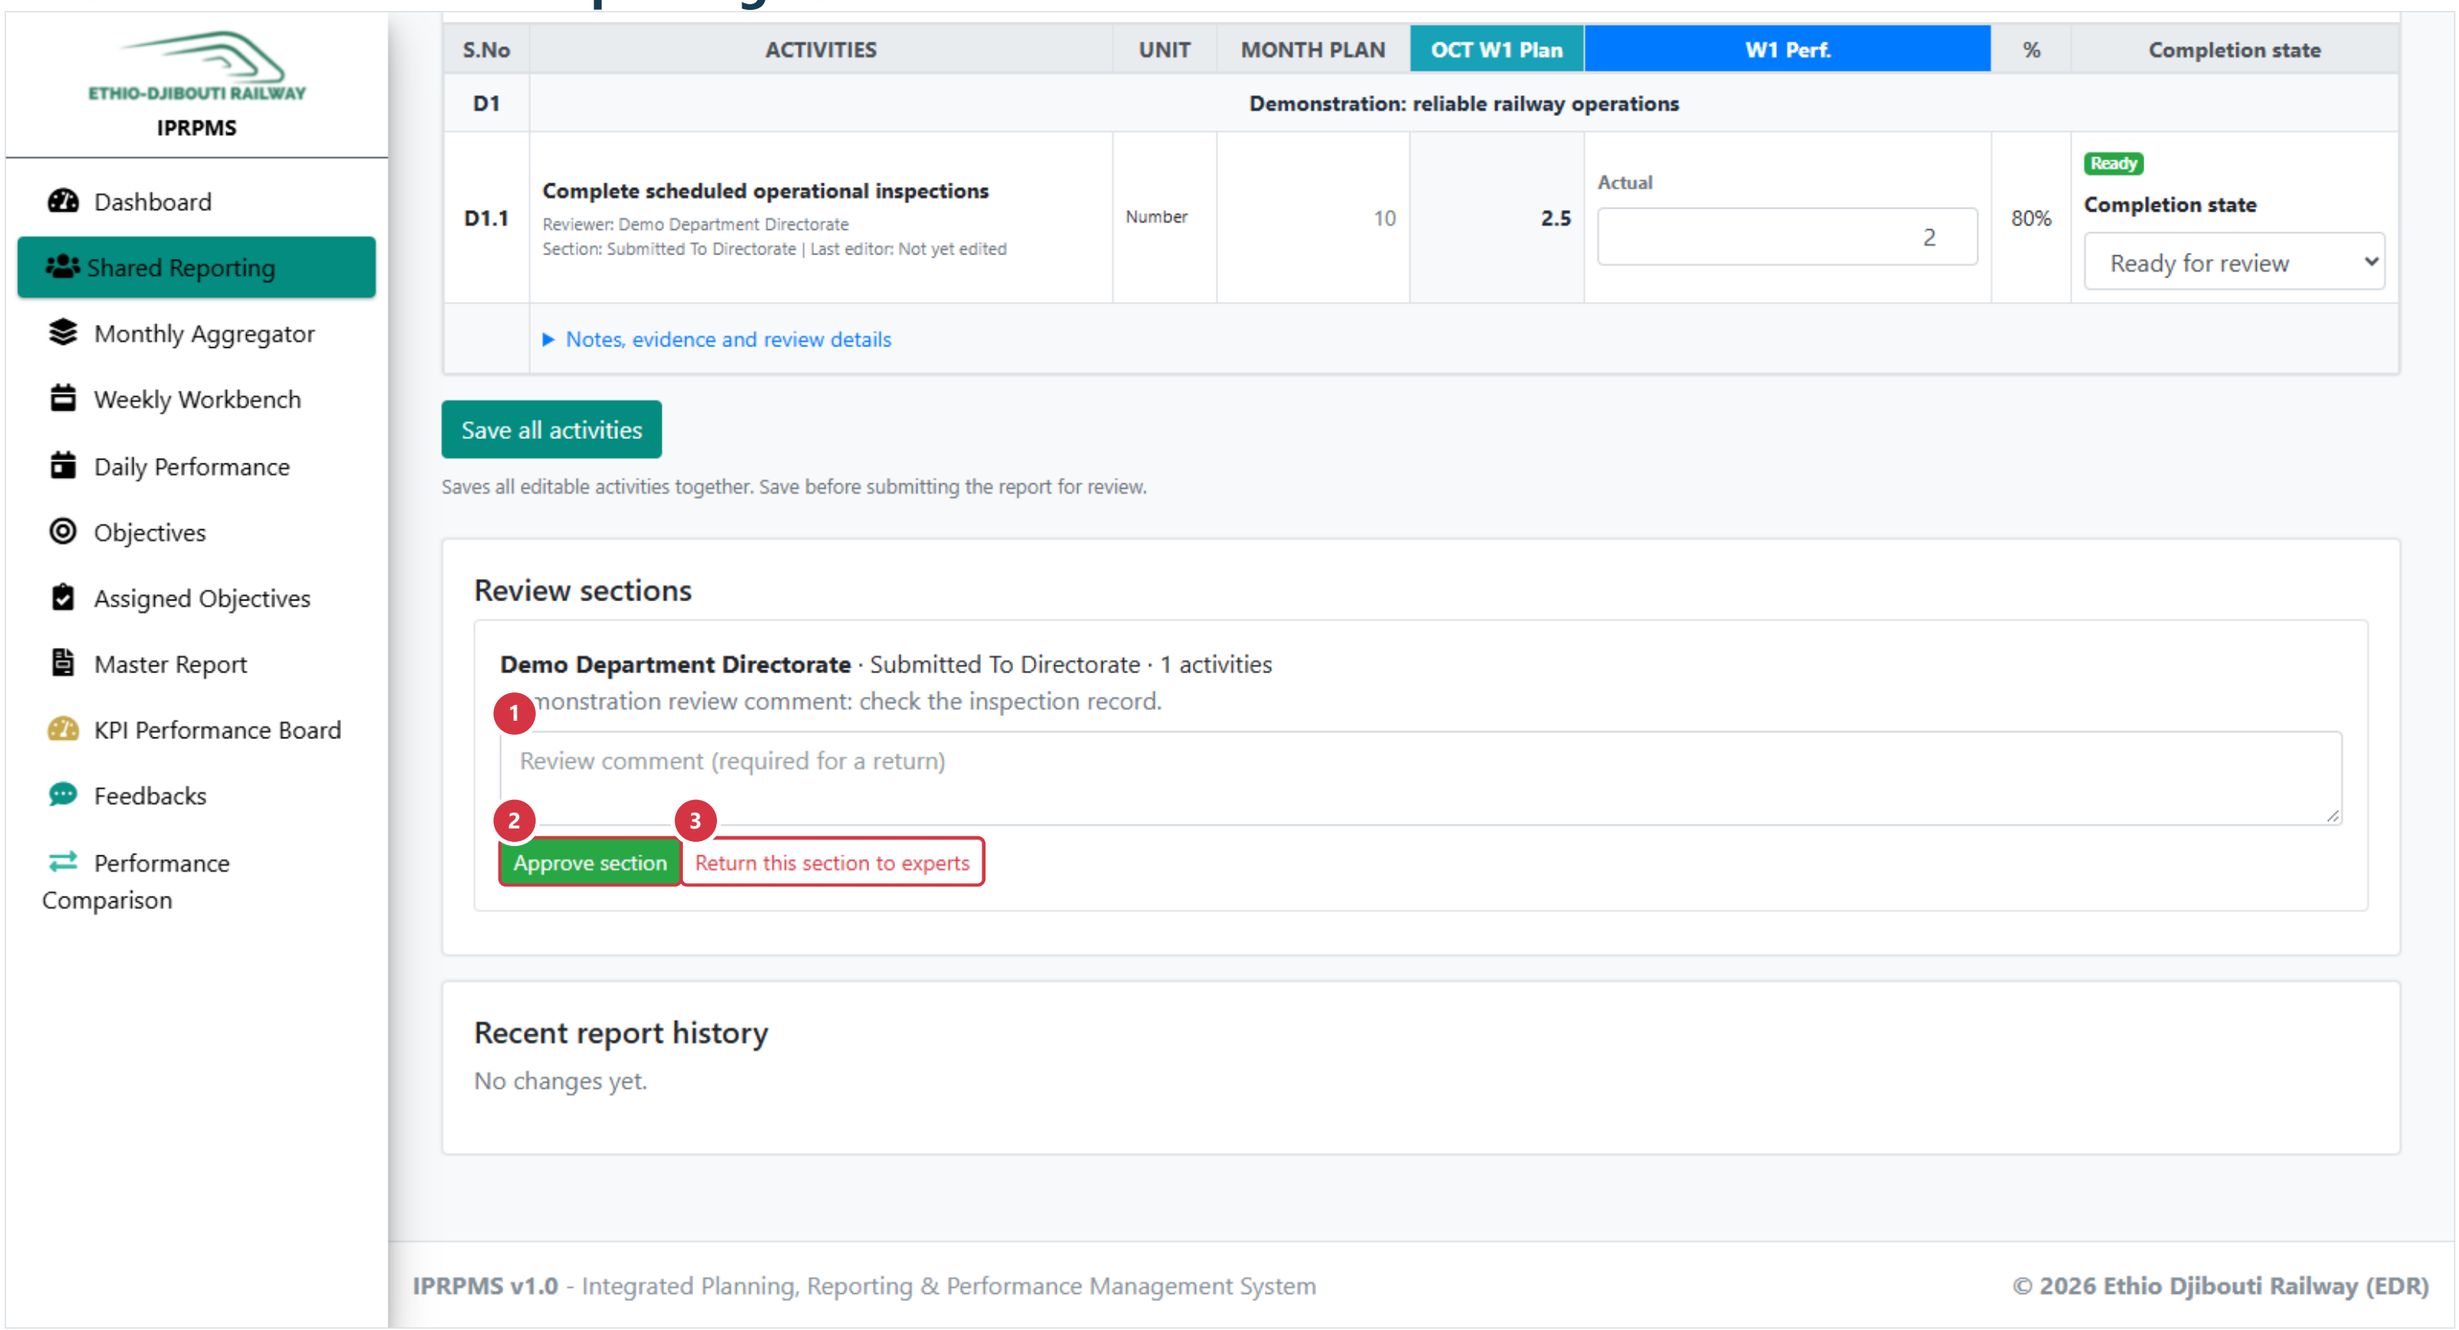

What to check

Use a clear section review note. Record a correction reason for any permitted value change. Return the affected section only; clean sections can retain their approval.

How you know it worked

Approve section advances the section. Once all required Directorate sections are approved, the Department Chief receives the consolidated results.

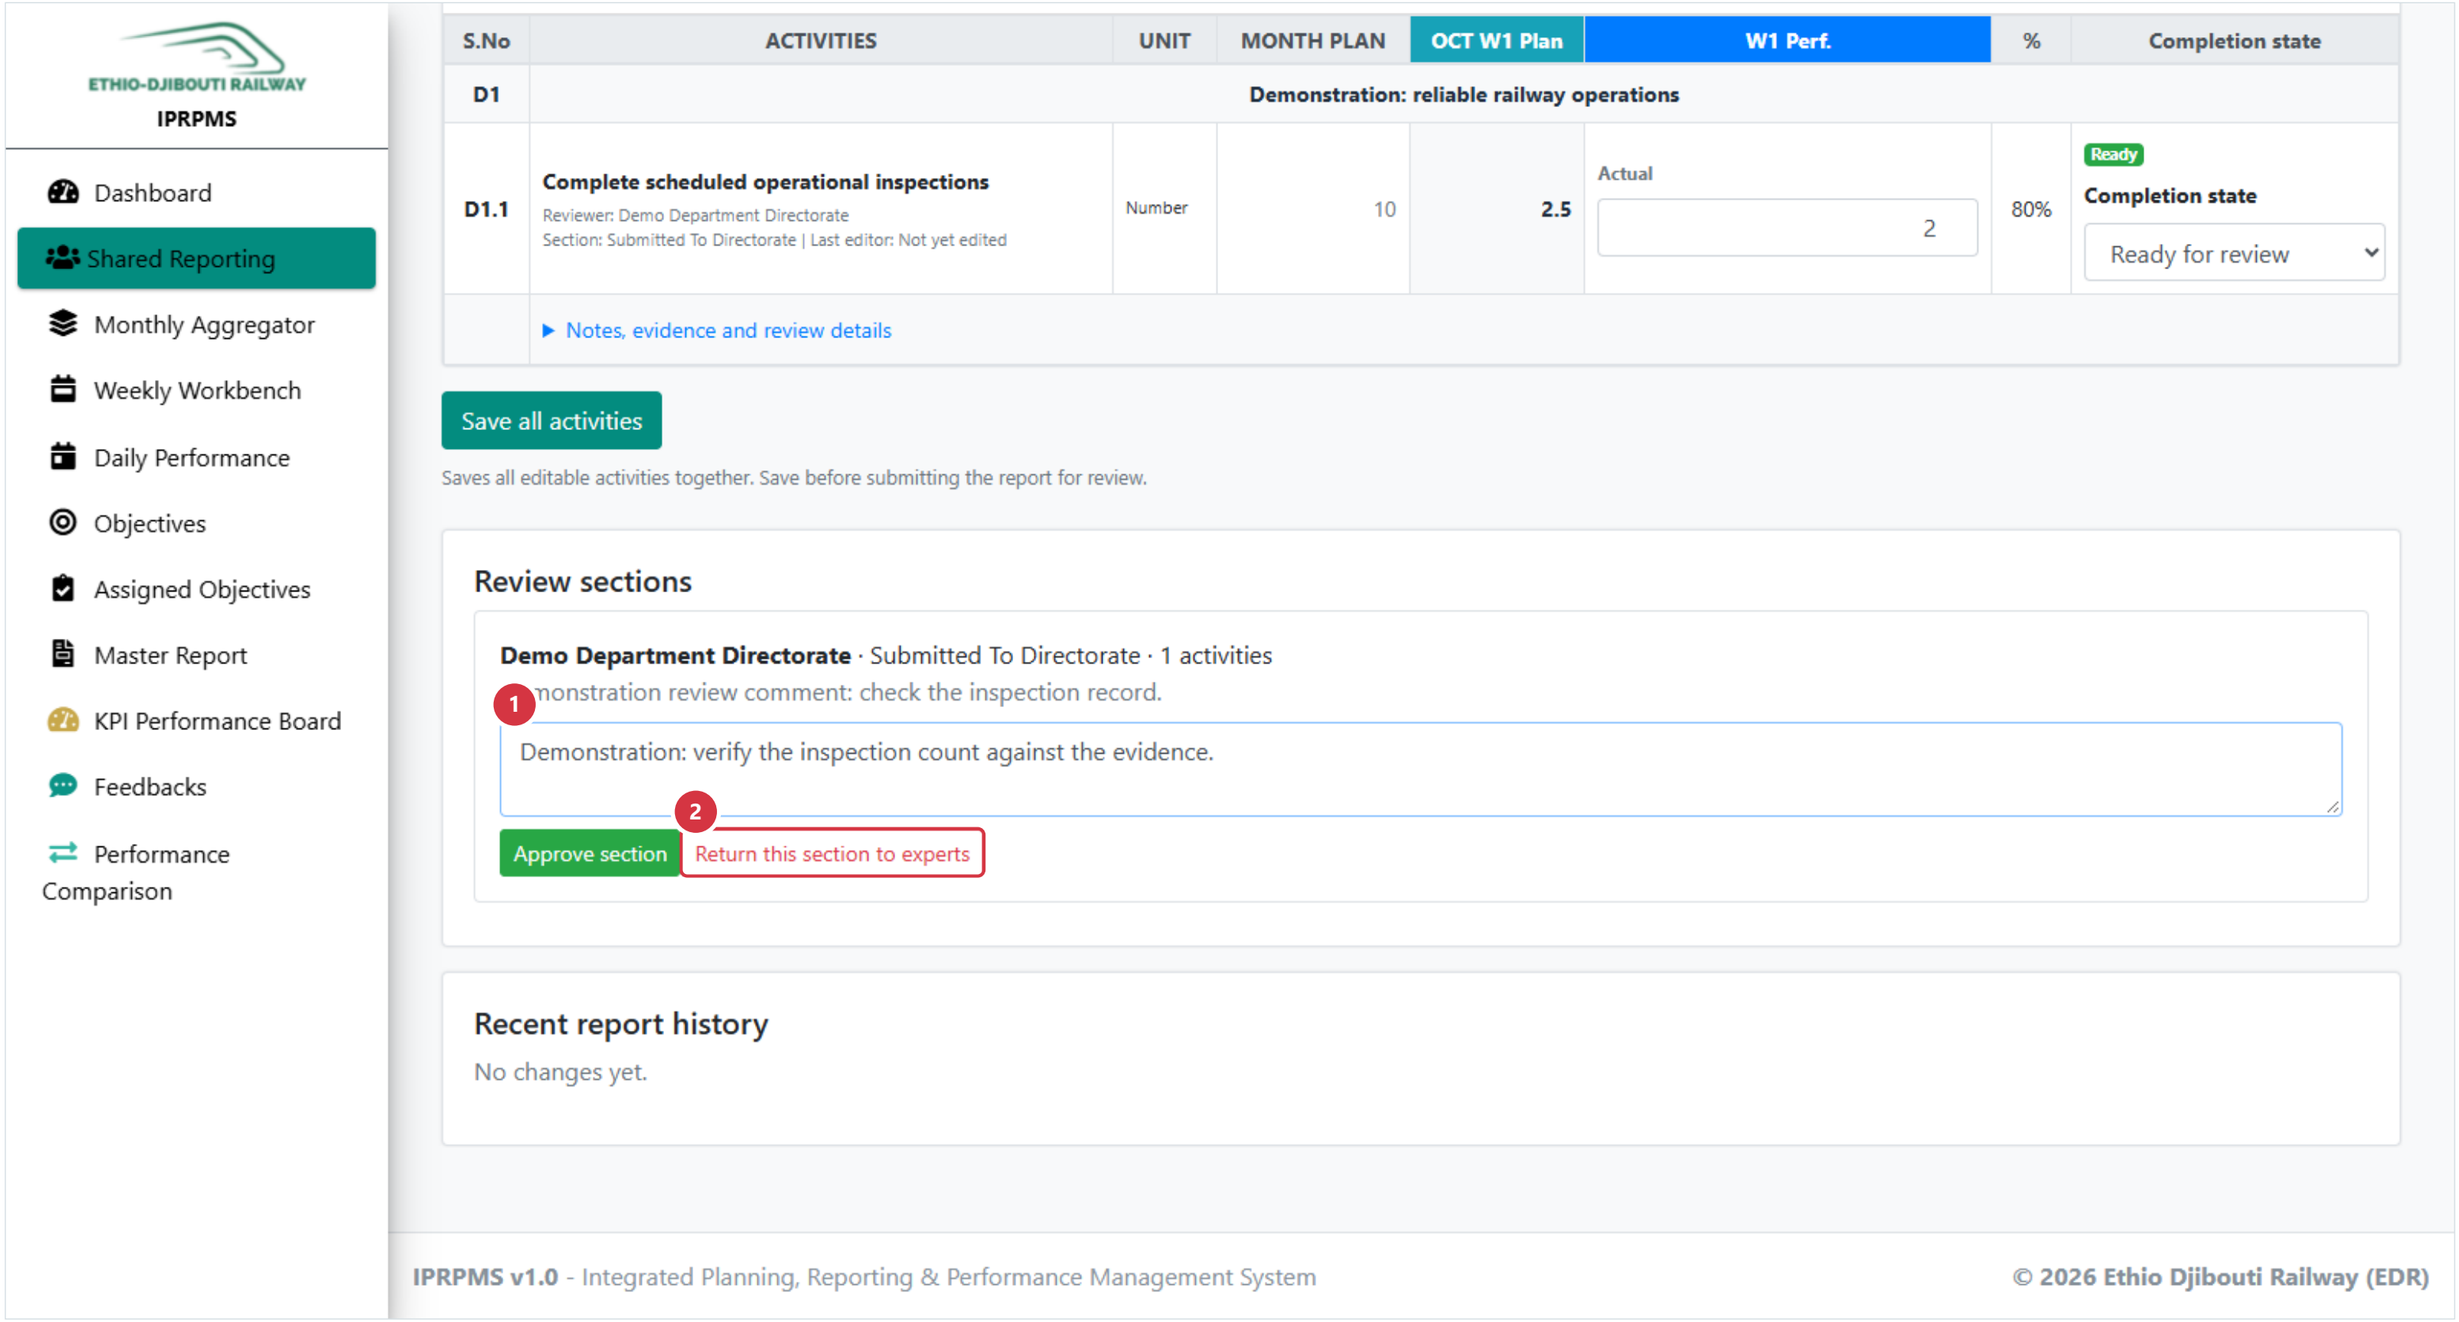

Directorate: review its reporting section

1. After checking values and evidence, enter the Section review note.
2. Click Approve section for a correct section.
3. To request a correction, enter a clear note and click Return this section to experts.

After this step: Approve section advances a clean section. Return this section to experts reopens that section for correction.

Directorate: return a section for correction

1. Enter the required correction in Section review note.
2. Click Return this section to experts.
3. The Experts correct the returned section and the coordinator resubmits it.

After this step: Other clean sections retain their review progress. The return comment is visible in the reporting history.

Read a return, correct it and send it again

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

Returned does not mean start a second report. It means the responsible reviewer needs a correction in the existing report or section. Keeping the same record preserves the history.

Before you click

Open the notification or the existing report. Read the originating department, reporting period, current status and latest comment. Identify the activity and the particular section that was returned.

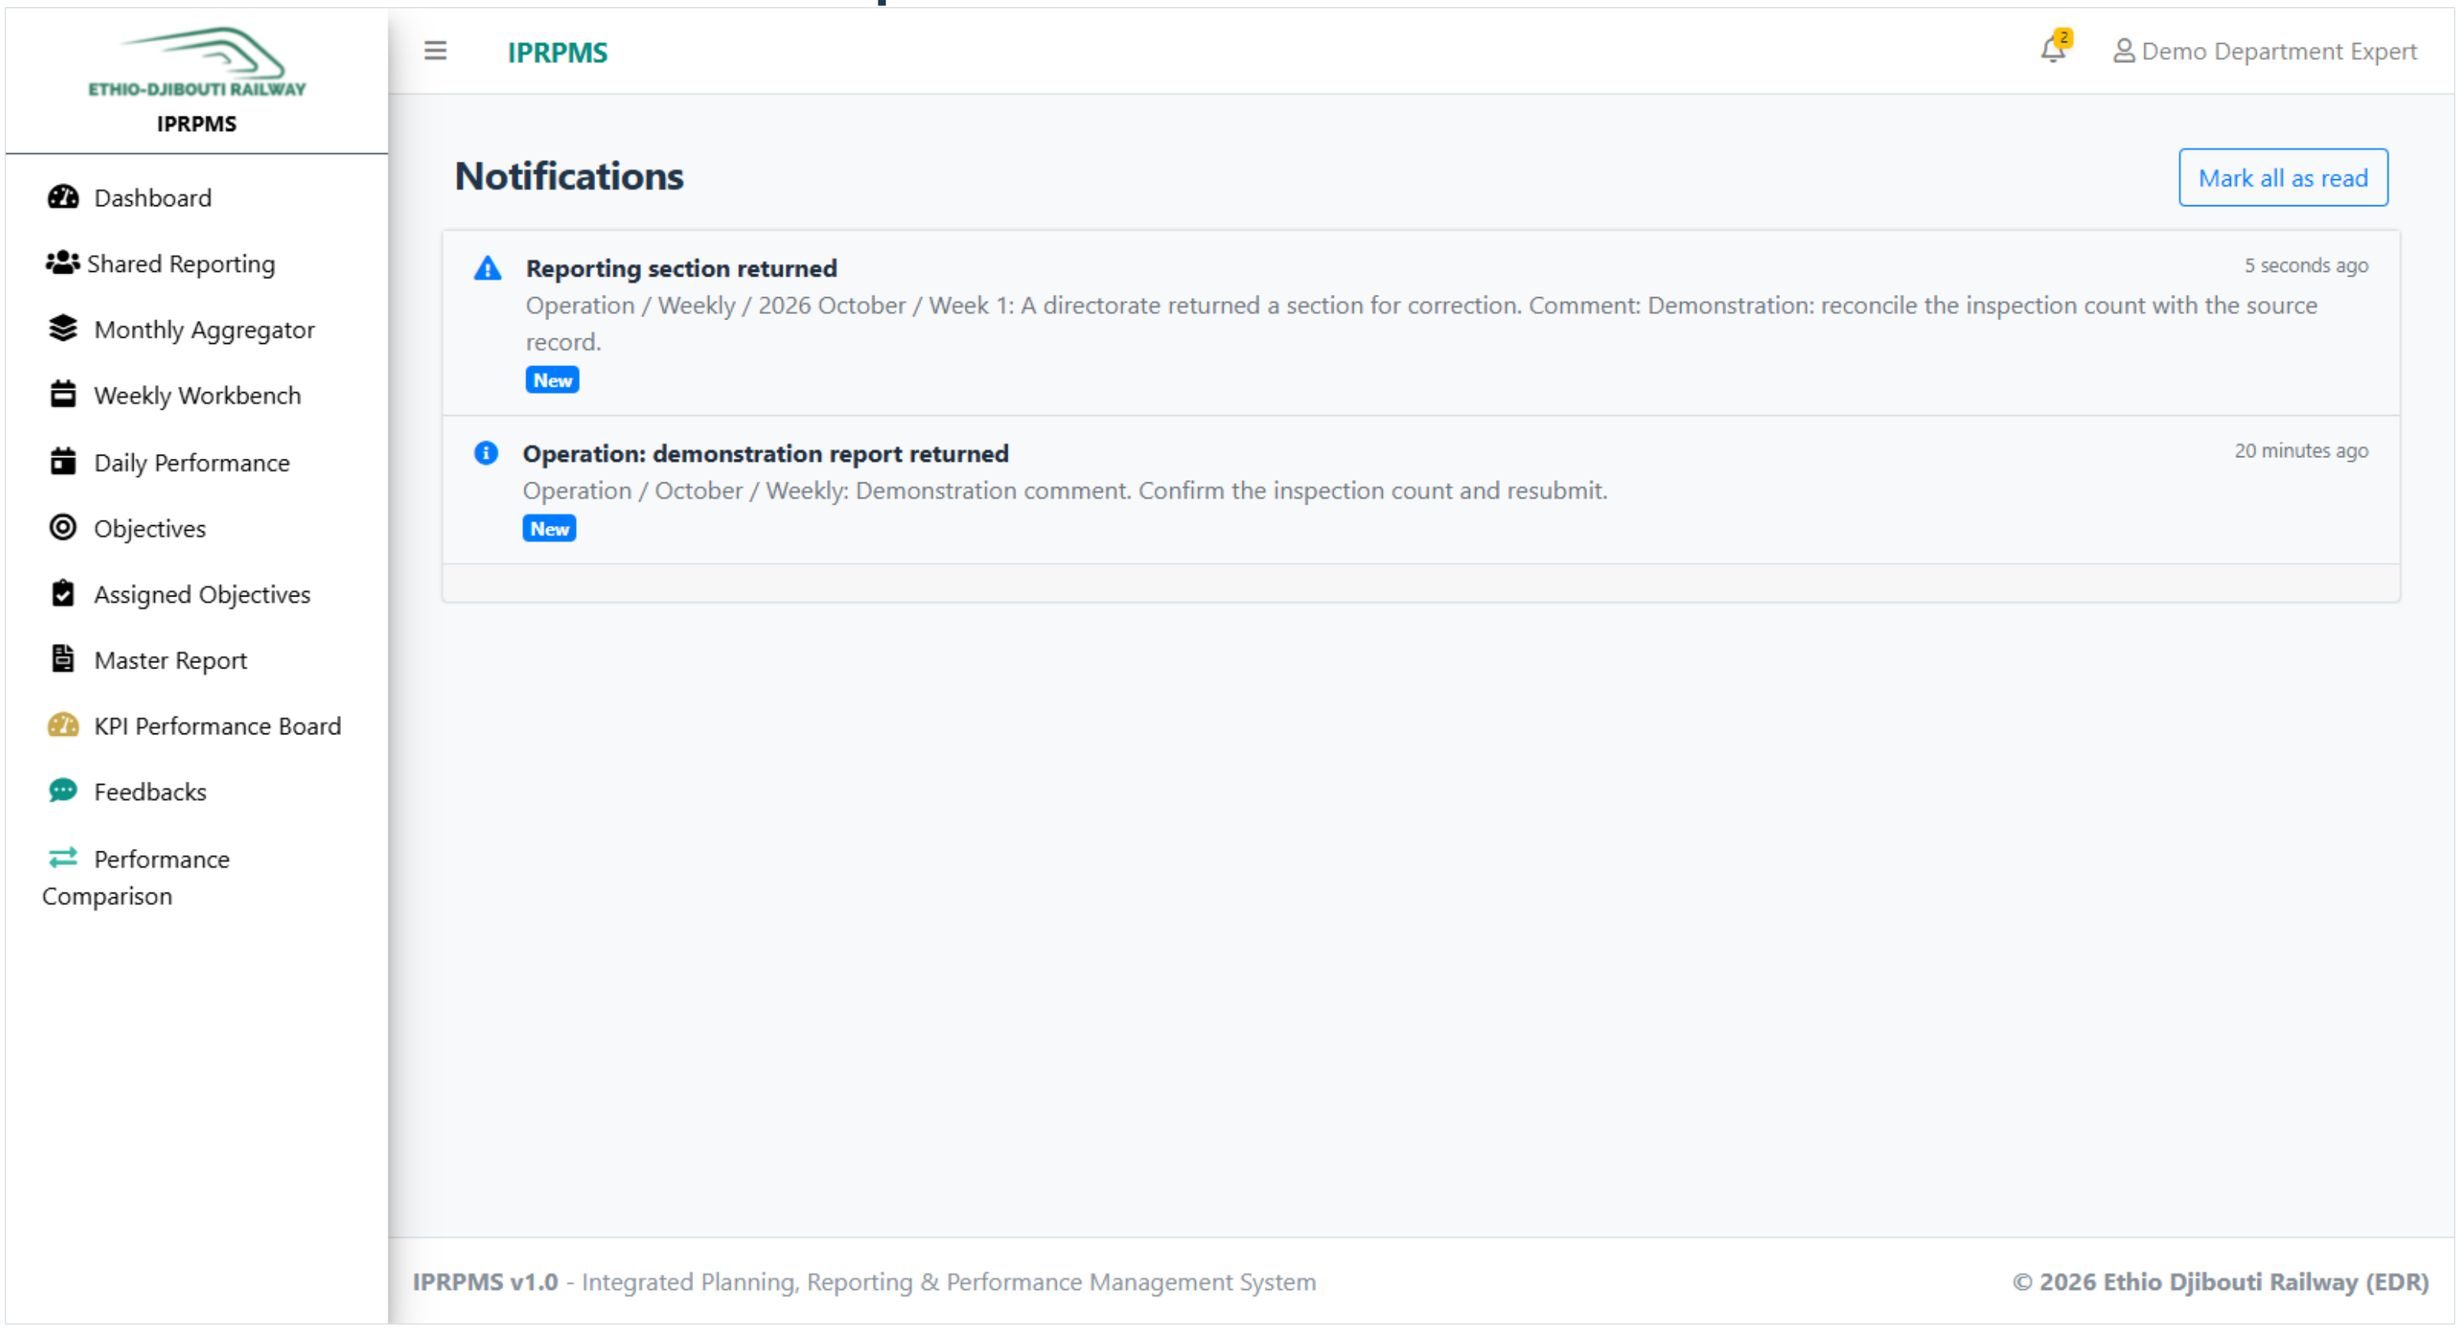

What to check

Correct only the entries that need changes. Add the missing explanation or evidence. Do not alter an already approved, unaffected section just to make every section editable.

How you know it worked

Save the corrected entries, mark them ready and ask the coordinator or backup to resubmit the returned sections. Read the new status and history so you know who must act next.

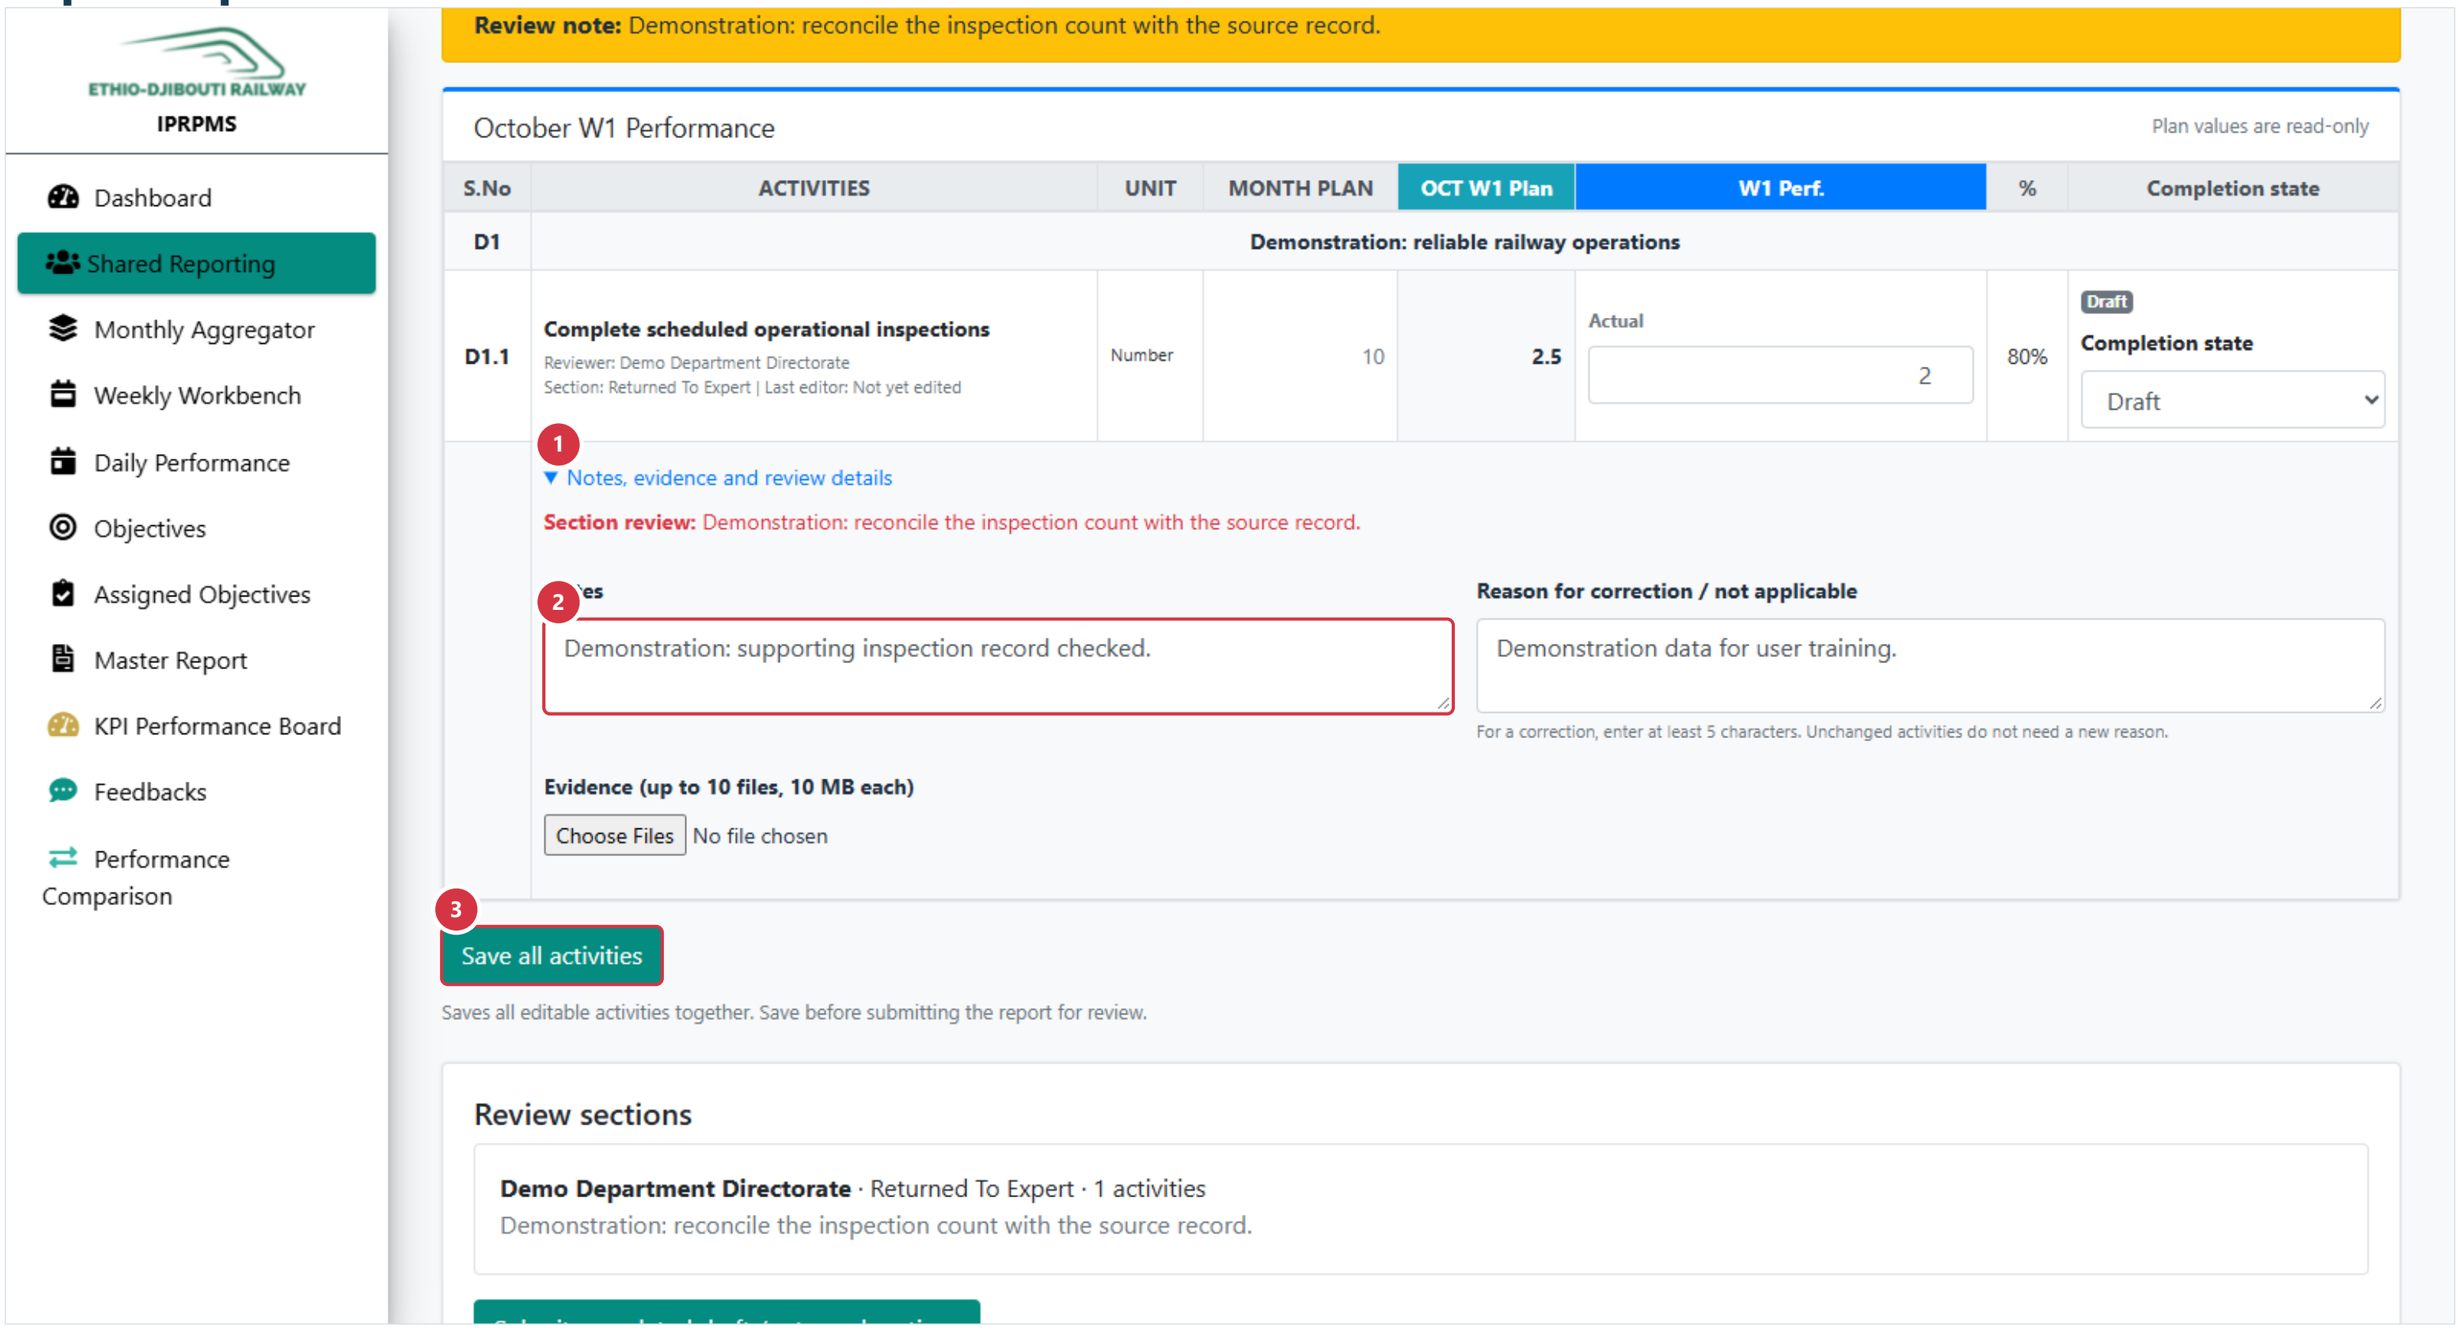

Follow a return notification to the report

1. Open Notifications.
2. Read the department, period and reviewer message in the returned-section notice.
3. Open the report link or mark the notice read after acting.

After this step: The demonstration notification was generated by a real return-section action in the temporary copy.

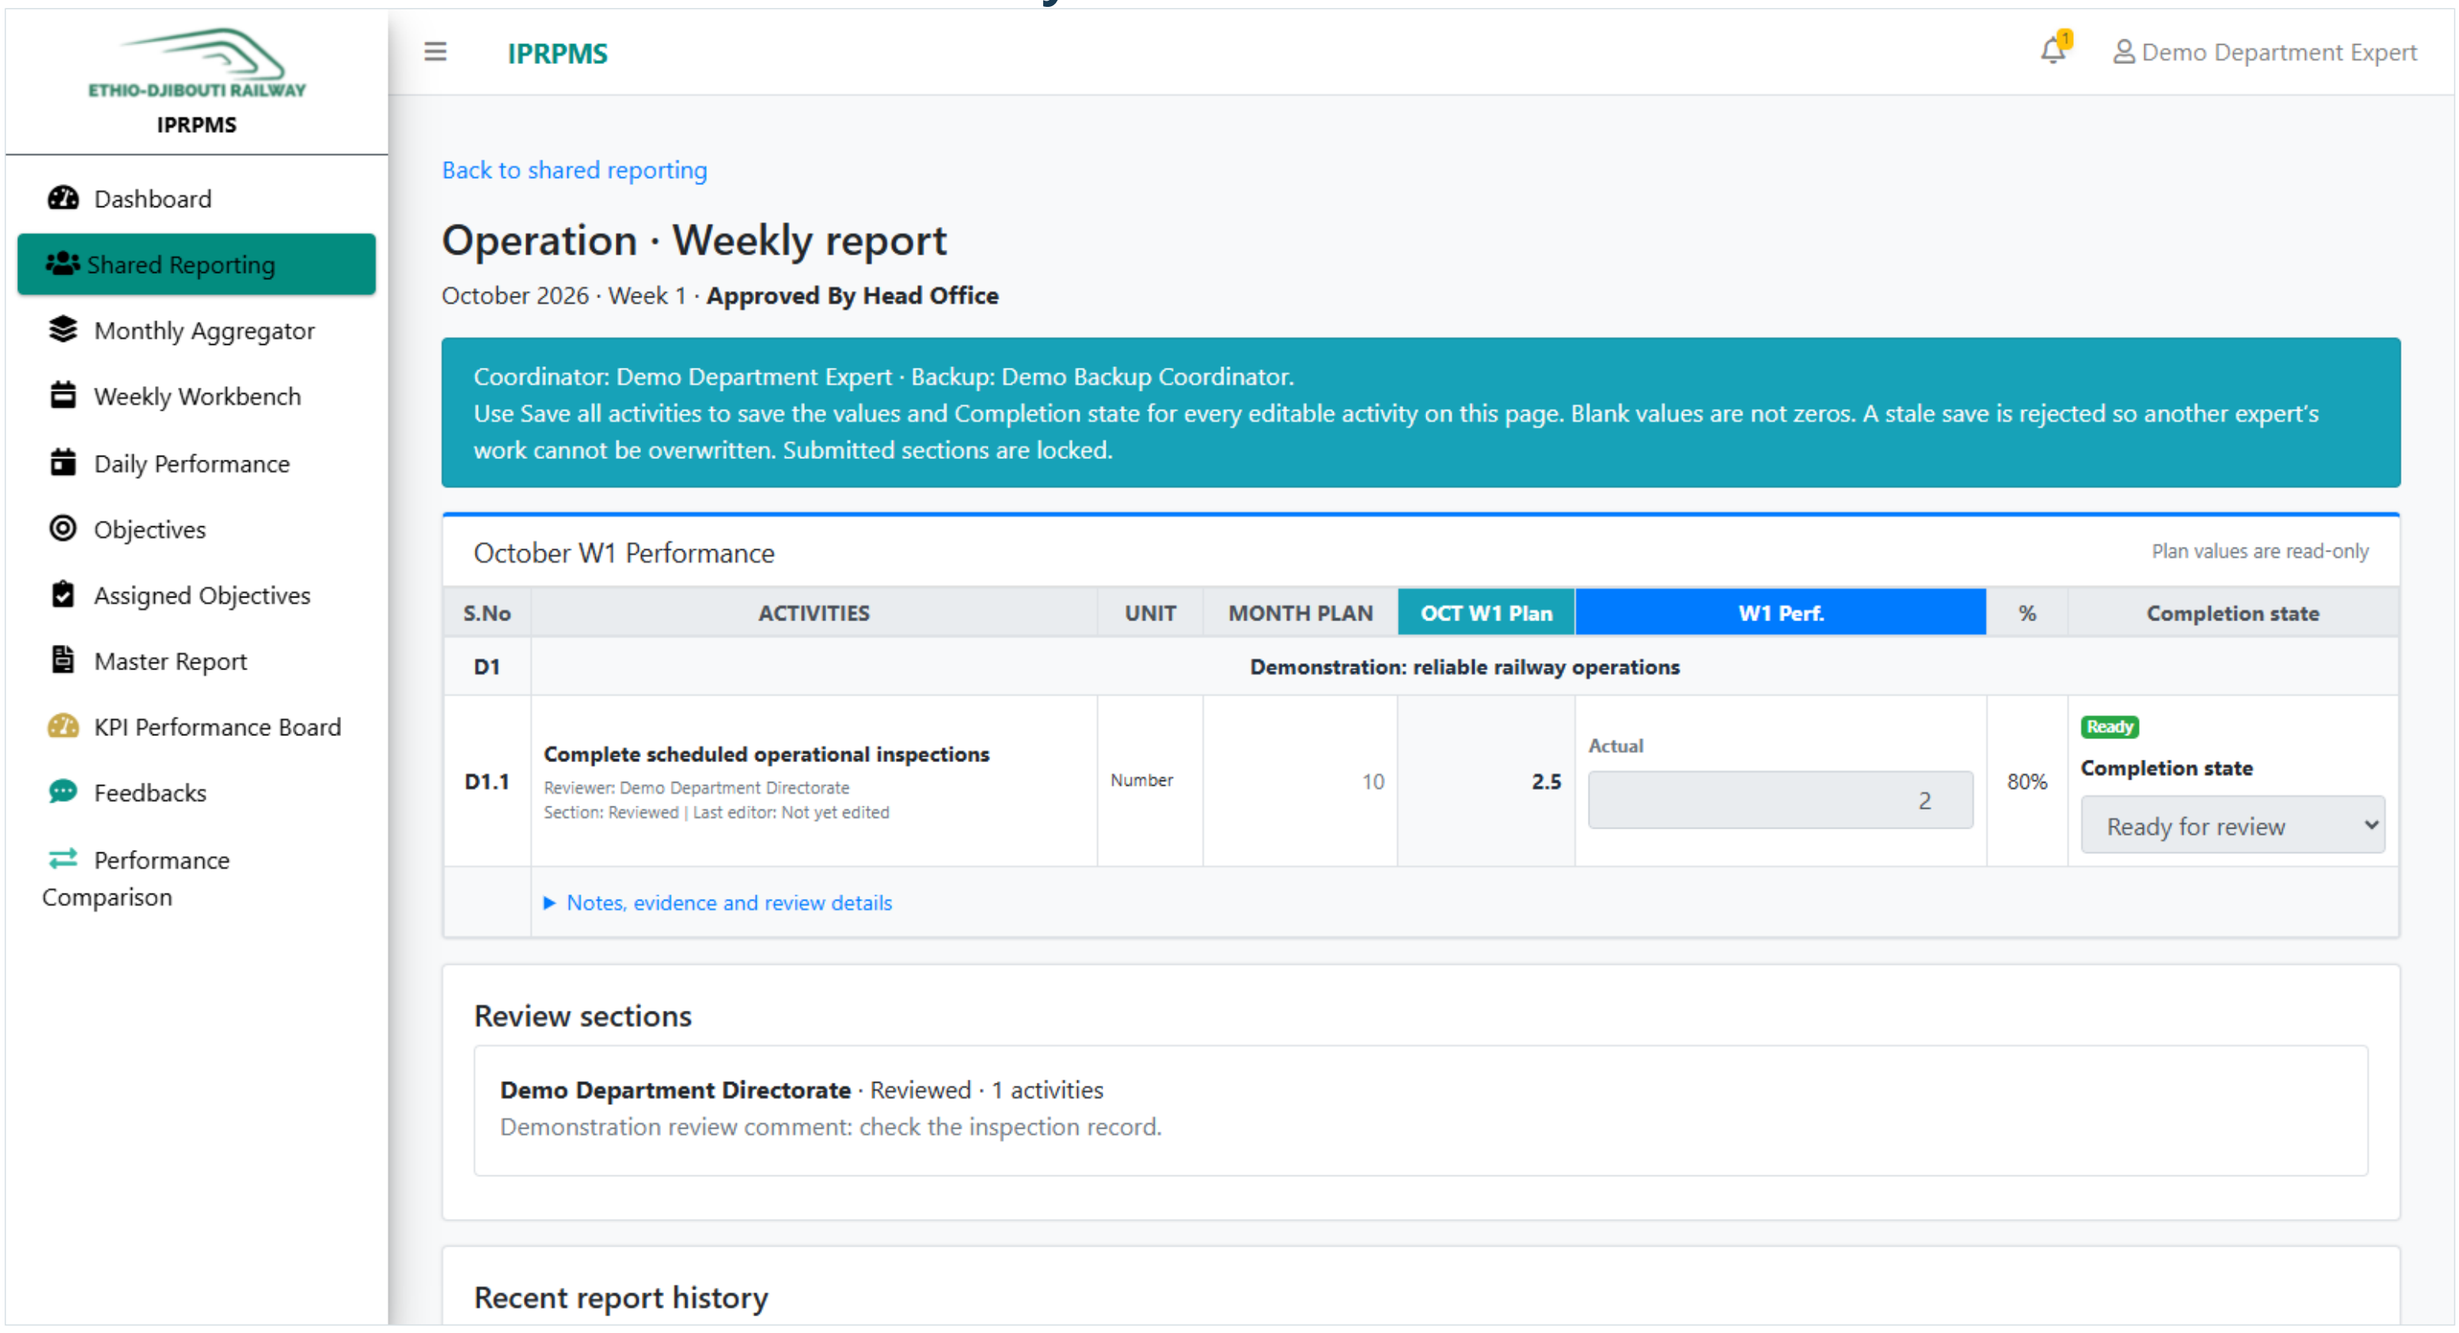

Expert: open a returned section and correction comment

1. Read the returned section and its correction comment.
2. Open the activity notes/evidence details to inspect the relevant data.
3. Correct the editable row, save and ask the coordinator to resubmit the completed section.

After this step: This capture follows an actual demonstration Submit and Return action performed through the application forms.

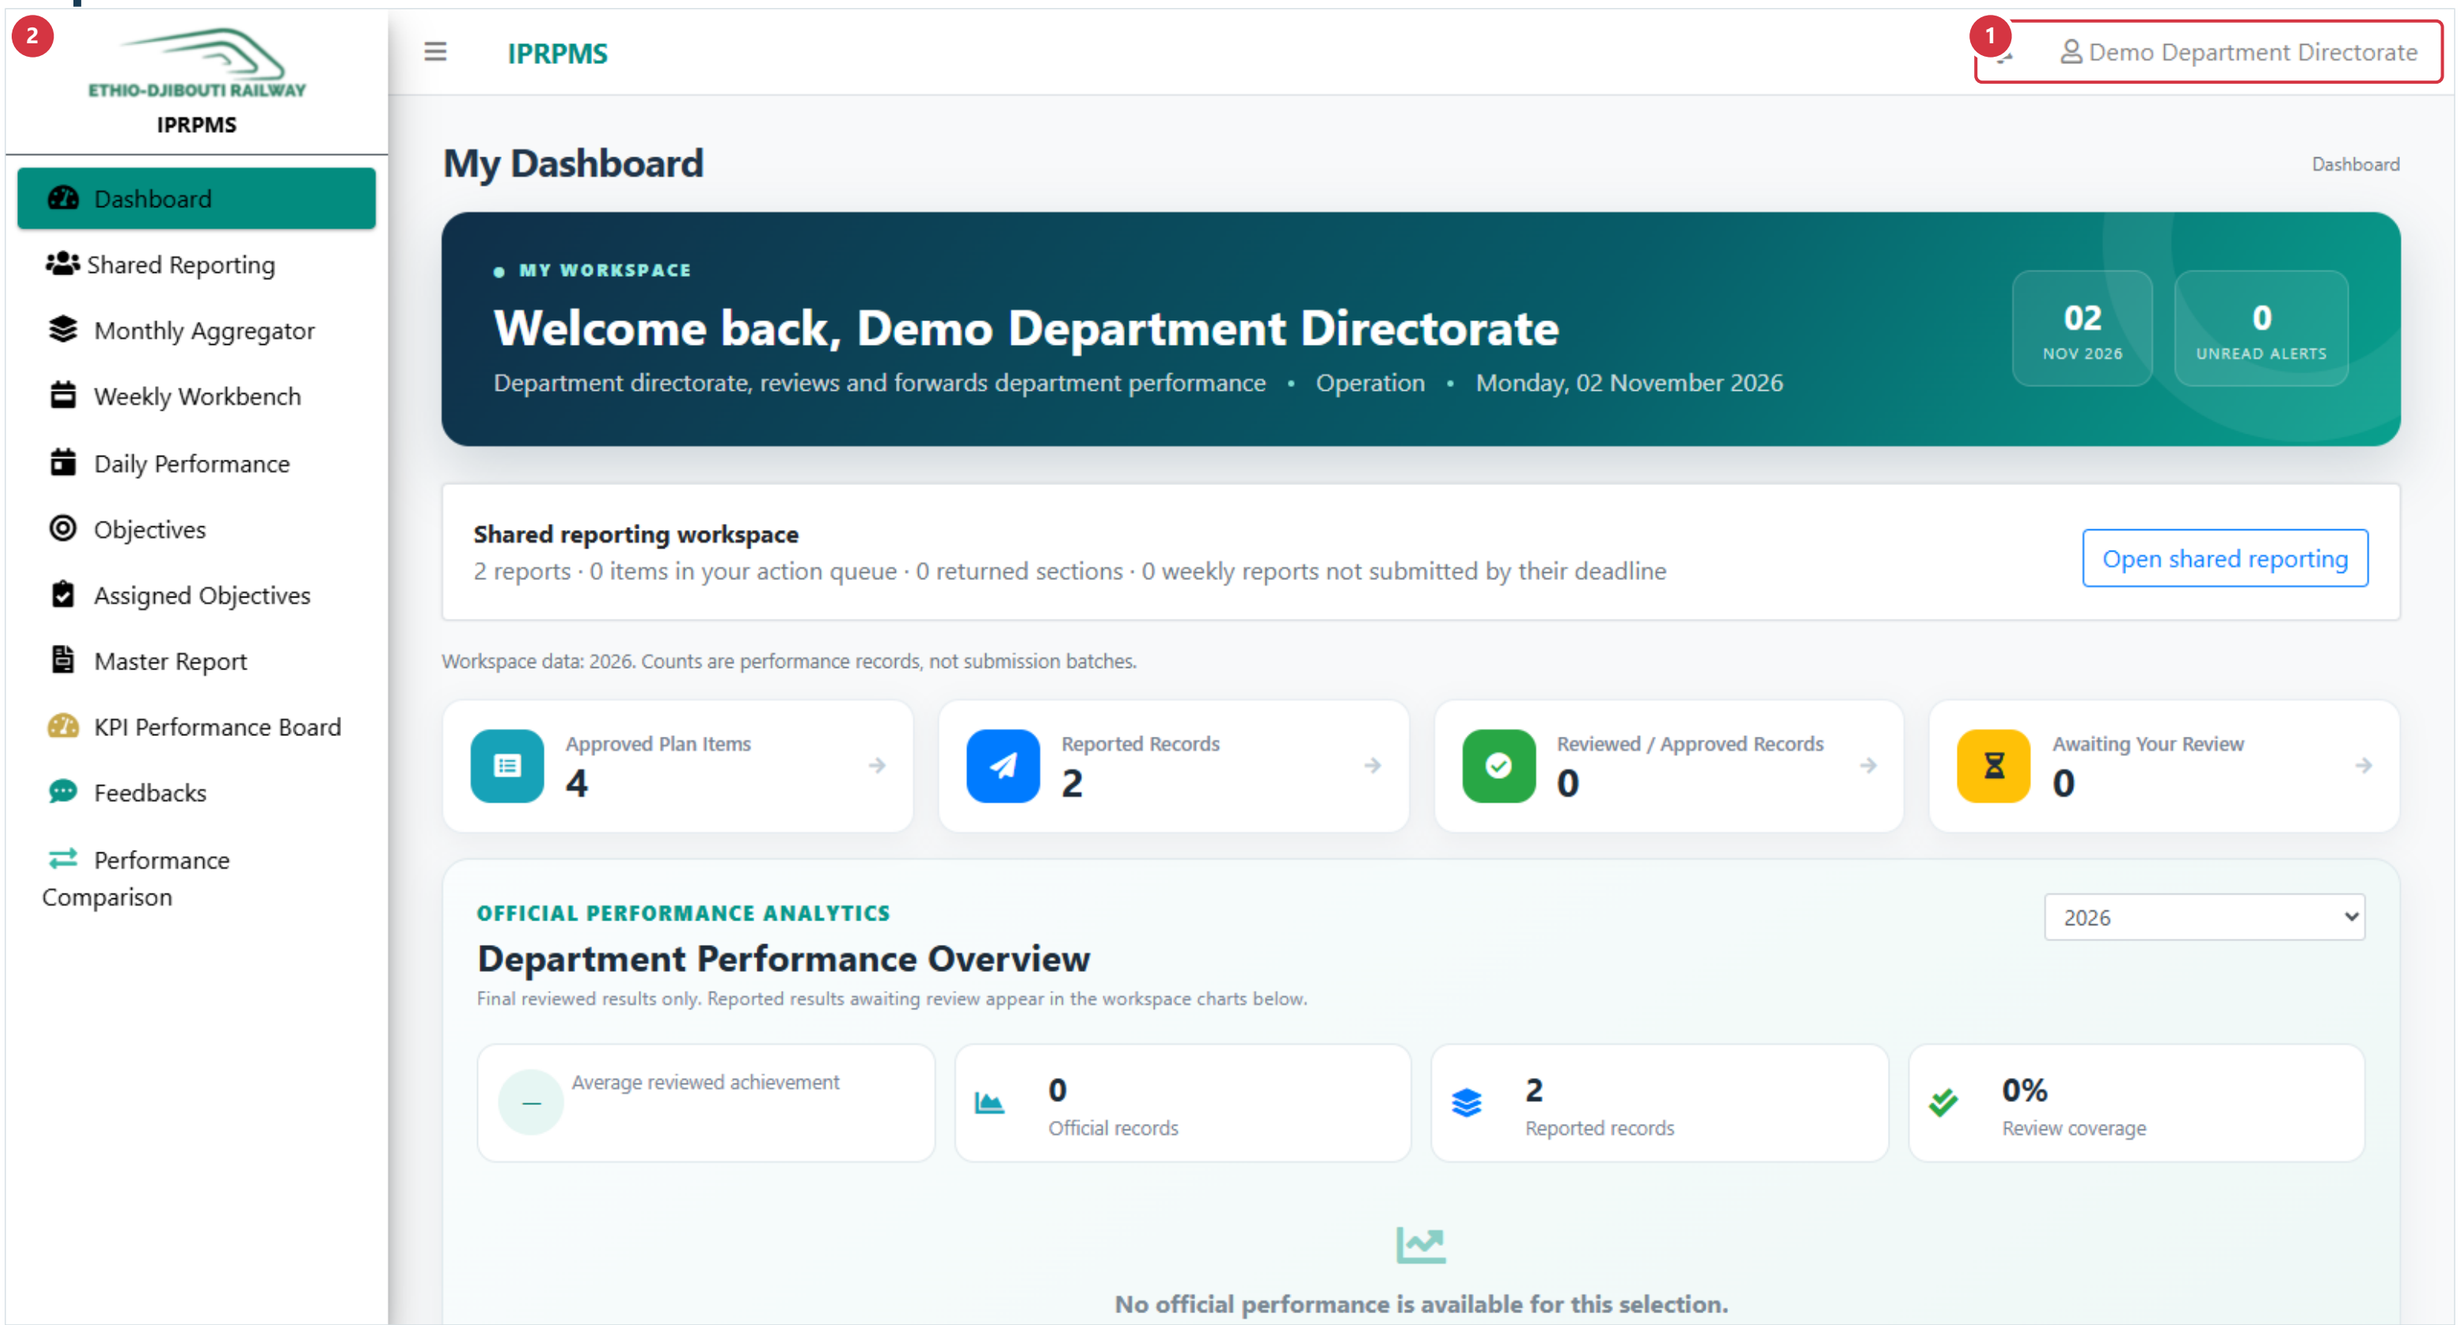

All users: read final status and review history

1. Open the approved report.
2. Confirm the final workflow status.
3. Read the recorded section decisions and available history.

After this step: Submitted and finally approved rows are locked according to the workflow. Use the authorized return/reopen process for corrections.

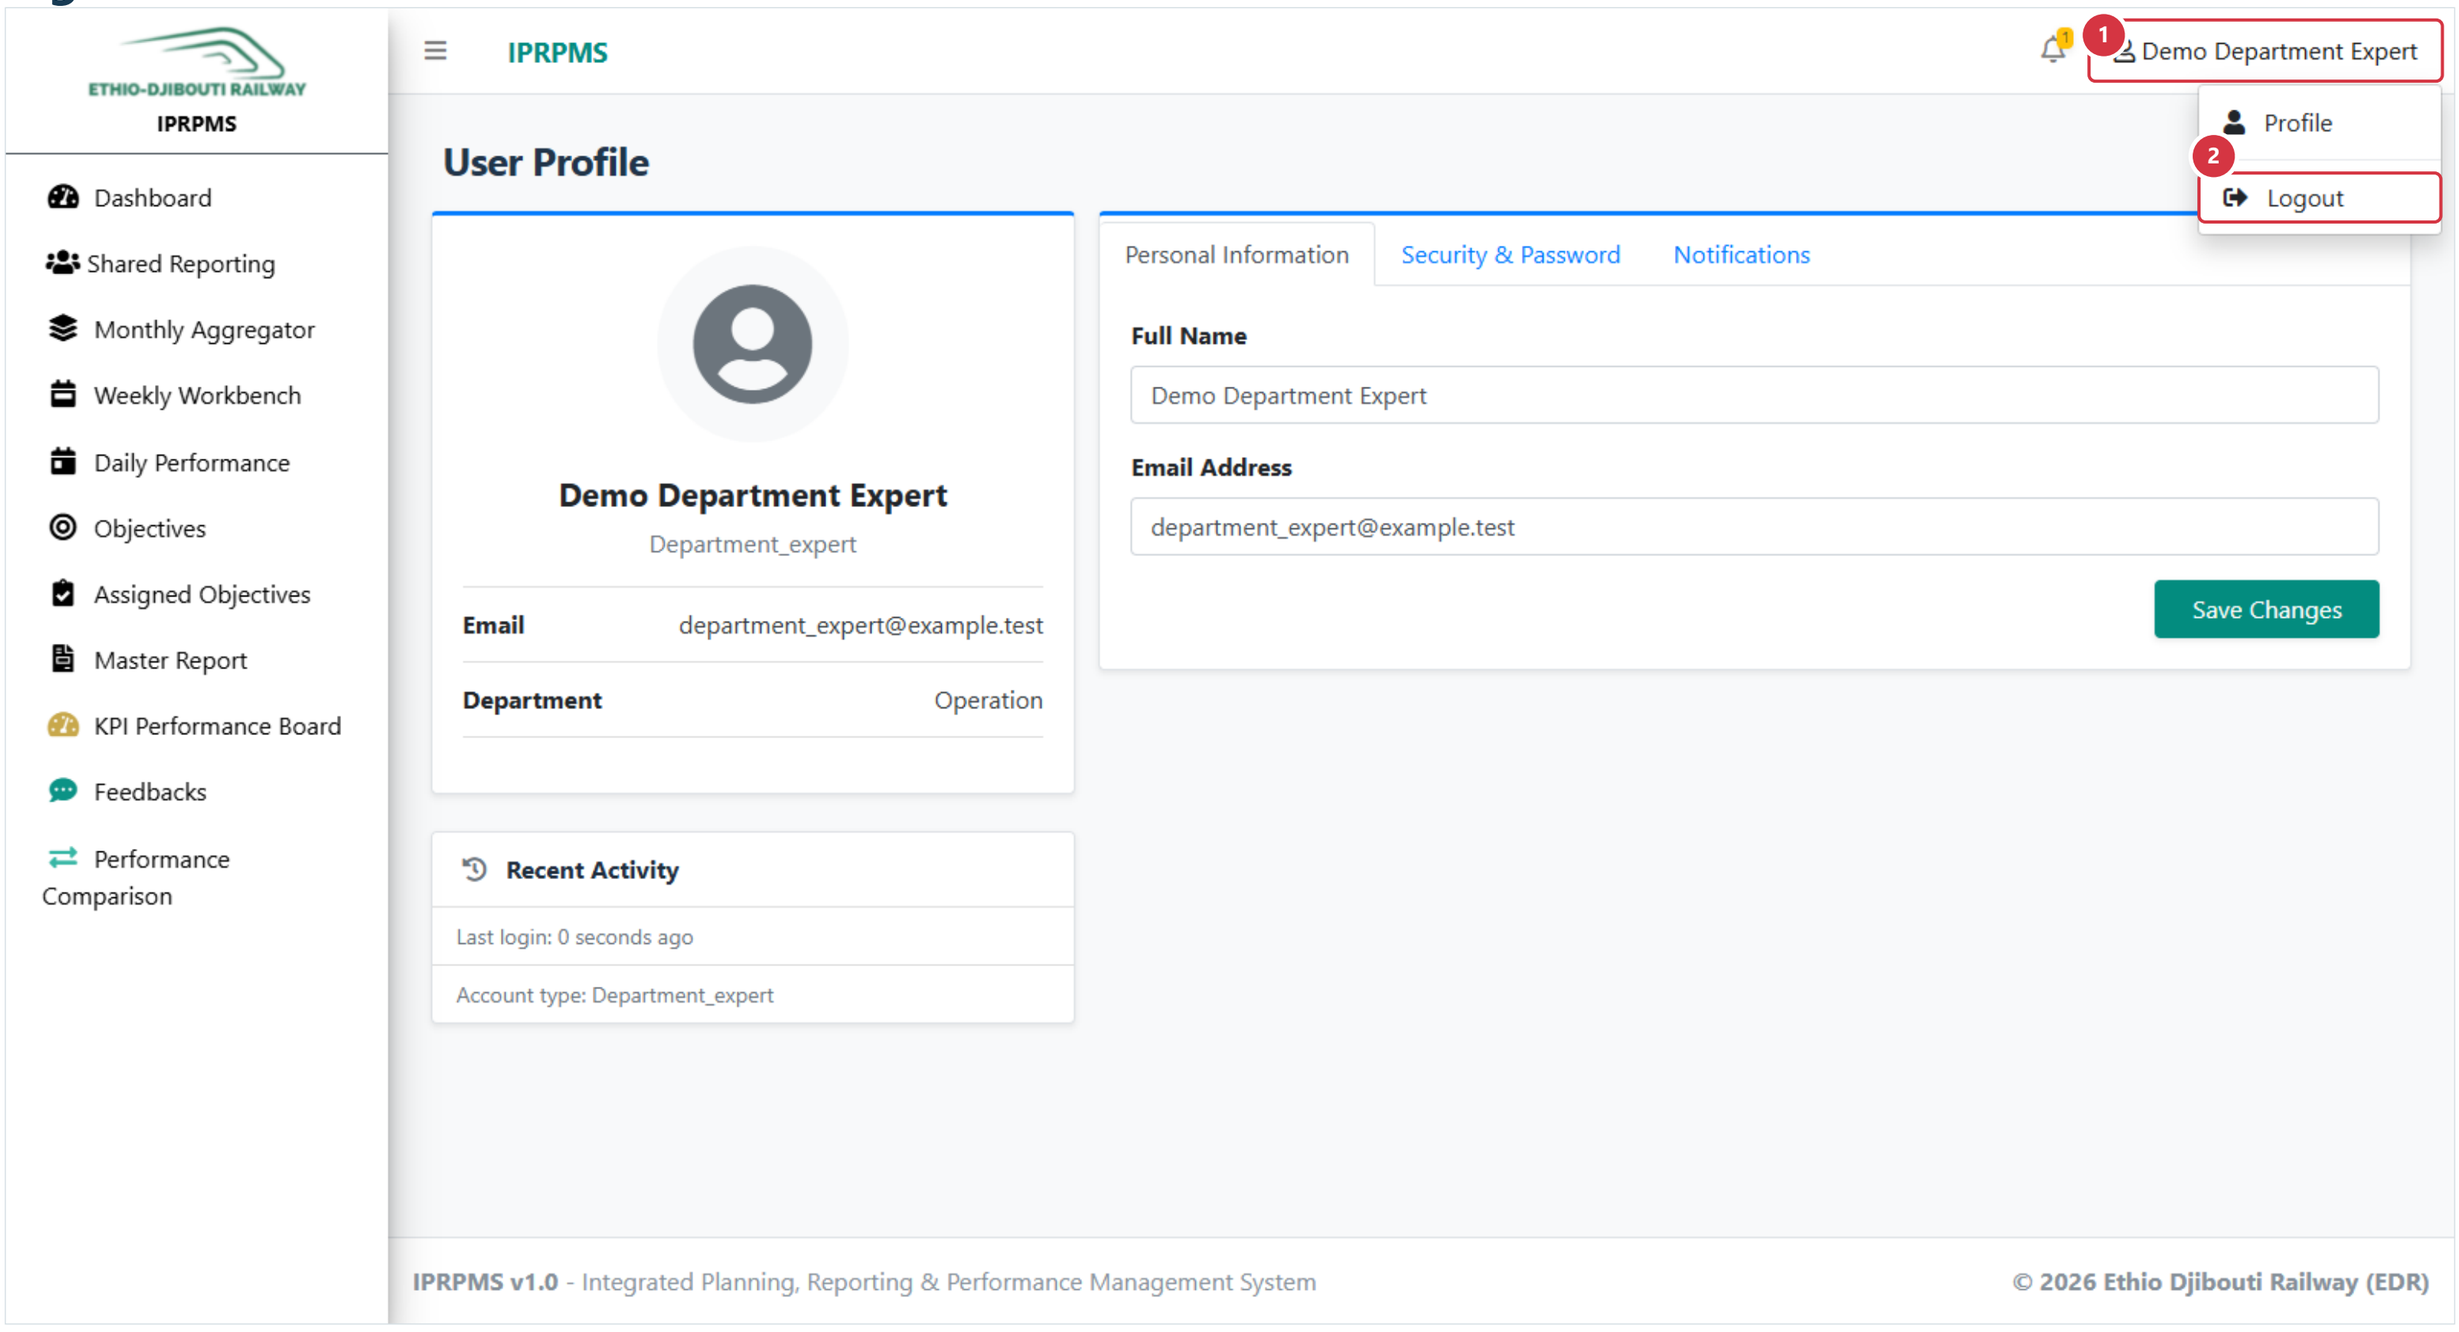

Department Directorate: home screen

1. Confirm your signed-in role at the top right.
2. Approve departmental assignments for Experts, then review only the reporting sections assigned to you.
3. Approve clean sections or return the affected section with a precise comment.

After this step: Menus vary by permission, department and reporting frequency.

Sign out on a shared device

1. Click your name at the top right to open the user menu.
2. Click Logout after you finish your work.

After this step: The application returns to the sign-in screen after logout.

Before you finish, check these four things

Finish means your part is complete and you know who has the next action. It does not always mean the whole record is finally approved.

Your completion checklist

1. I reviewed the correct assigned section and evidence. 2. Any correction or return has an understandable reason. 3. I approved or returned the intended section, not the whole report by accident. 4. I know whether Experts or the Chief must act next.

If a menu or button is missing

If a report is visible but not editable, check whether your section is assigned to you and whether it is at Directorate review. Ask the Chief to correct reviewer assignment if necessary.

Ask for help with useful details

Give IT or the responsible reviewer the module, department, year, reporting period, objective or record reference and exact message. Include a safe screenshot. Never send your password.

Keep the process and data safe

Use your own account, save before sending, read return comments and keep the same record for corrections. Demonstration screenshots are teaching examples, not official performance figures. The separate logistics Import/Export module is excluded.
