Department Chief (Head)

Your responsibilities, complete workflow, exact clicks and return paths.

Read first: the Start Here guide explains how the whole system works. Then use this manual to do your part, check the outcome and hand work to the right person.

Understand your job before the buttons

Keep this page in mind whenever you receive a new record. It explains your responsibility and where your part stops.

Your job

Make the department's responsibilities clear, assign Directorates and reporting coordinators, and take responsibility for the consolidated department results.

What you receive

Approved organization objectives, completed Directorate-reviewed performance sections, and official feedback released by Plan and Report.

Who receives your work

Approved assignments go to your Directorates. Approved department results go to the Plan and Report Expert. Selected returned sections go back to the responsible Directorates.

Your limits and important distinctions

Department approval is not final organization approval. Plan and Report still reviews the submission. Use the same department, period and record when handling corrections.

Your workflow, from first action to finish

Read down the page. Each step has an outcome; do not jump ahead simply because a button is visible.

1

Inspect approved objectives

Open Assigned Objectives and review each activity published to your department.

2

Approve and assign responsibility

Choose the responsible Directorate user and click Approve & Assign to Directorate.

3

Choose the reporting team

Assign an active Department Expert as coordinator and a different active Expert as backup.

4

Review consolidated performance

Wait for the required Directorate sections, then check totals, evidence, comments and the reporting period.

5

Approve or return selected sections

Send correct department results to Plan & Report, or return selected sections to the Directorates with a clear reason.

6

Follow the final outcome

Read subsequent comments, correct through the proper department reviewers and review released feedback for next-period improvement.

Find the task you need

Use the page number or click a task name in the PDF. Section introductions explain the purpose before the screen-by-screen actions.

Completion checklist and help 28

First access and everyday account safety

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

Use your own account. Your department and role decide what you can see and which decisions you can make. Never use somebody else's account to reach a missing button.

Before you click

Have your official account details ready. Open the address supplied by IT, enter your email and Access Key, then click Authenticate. A first-password screen appears only when your account requires it.

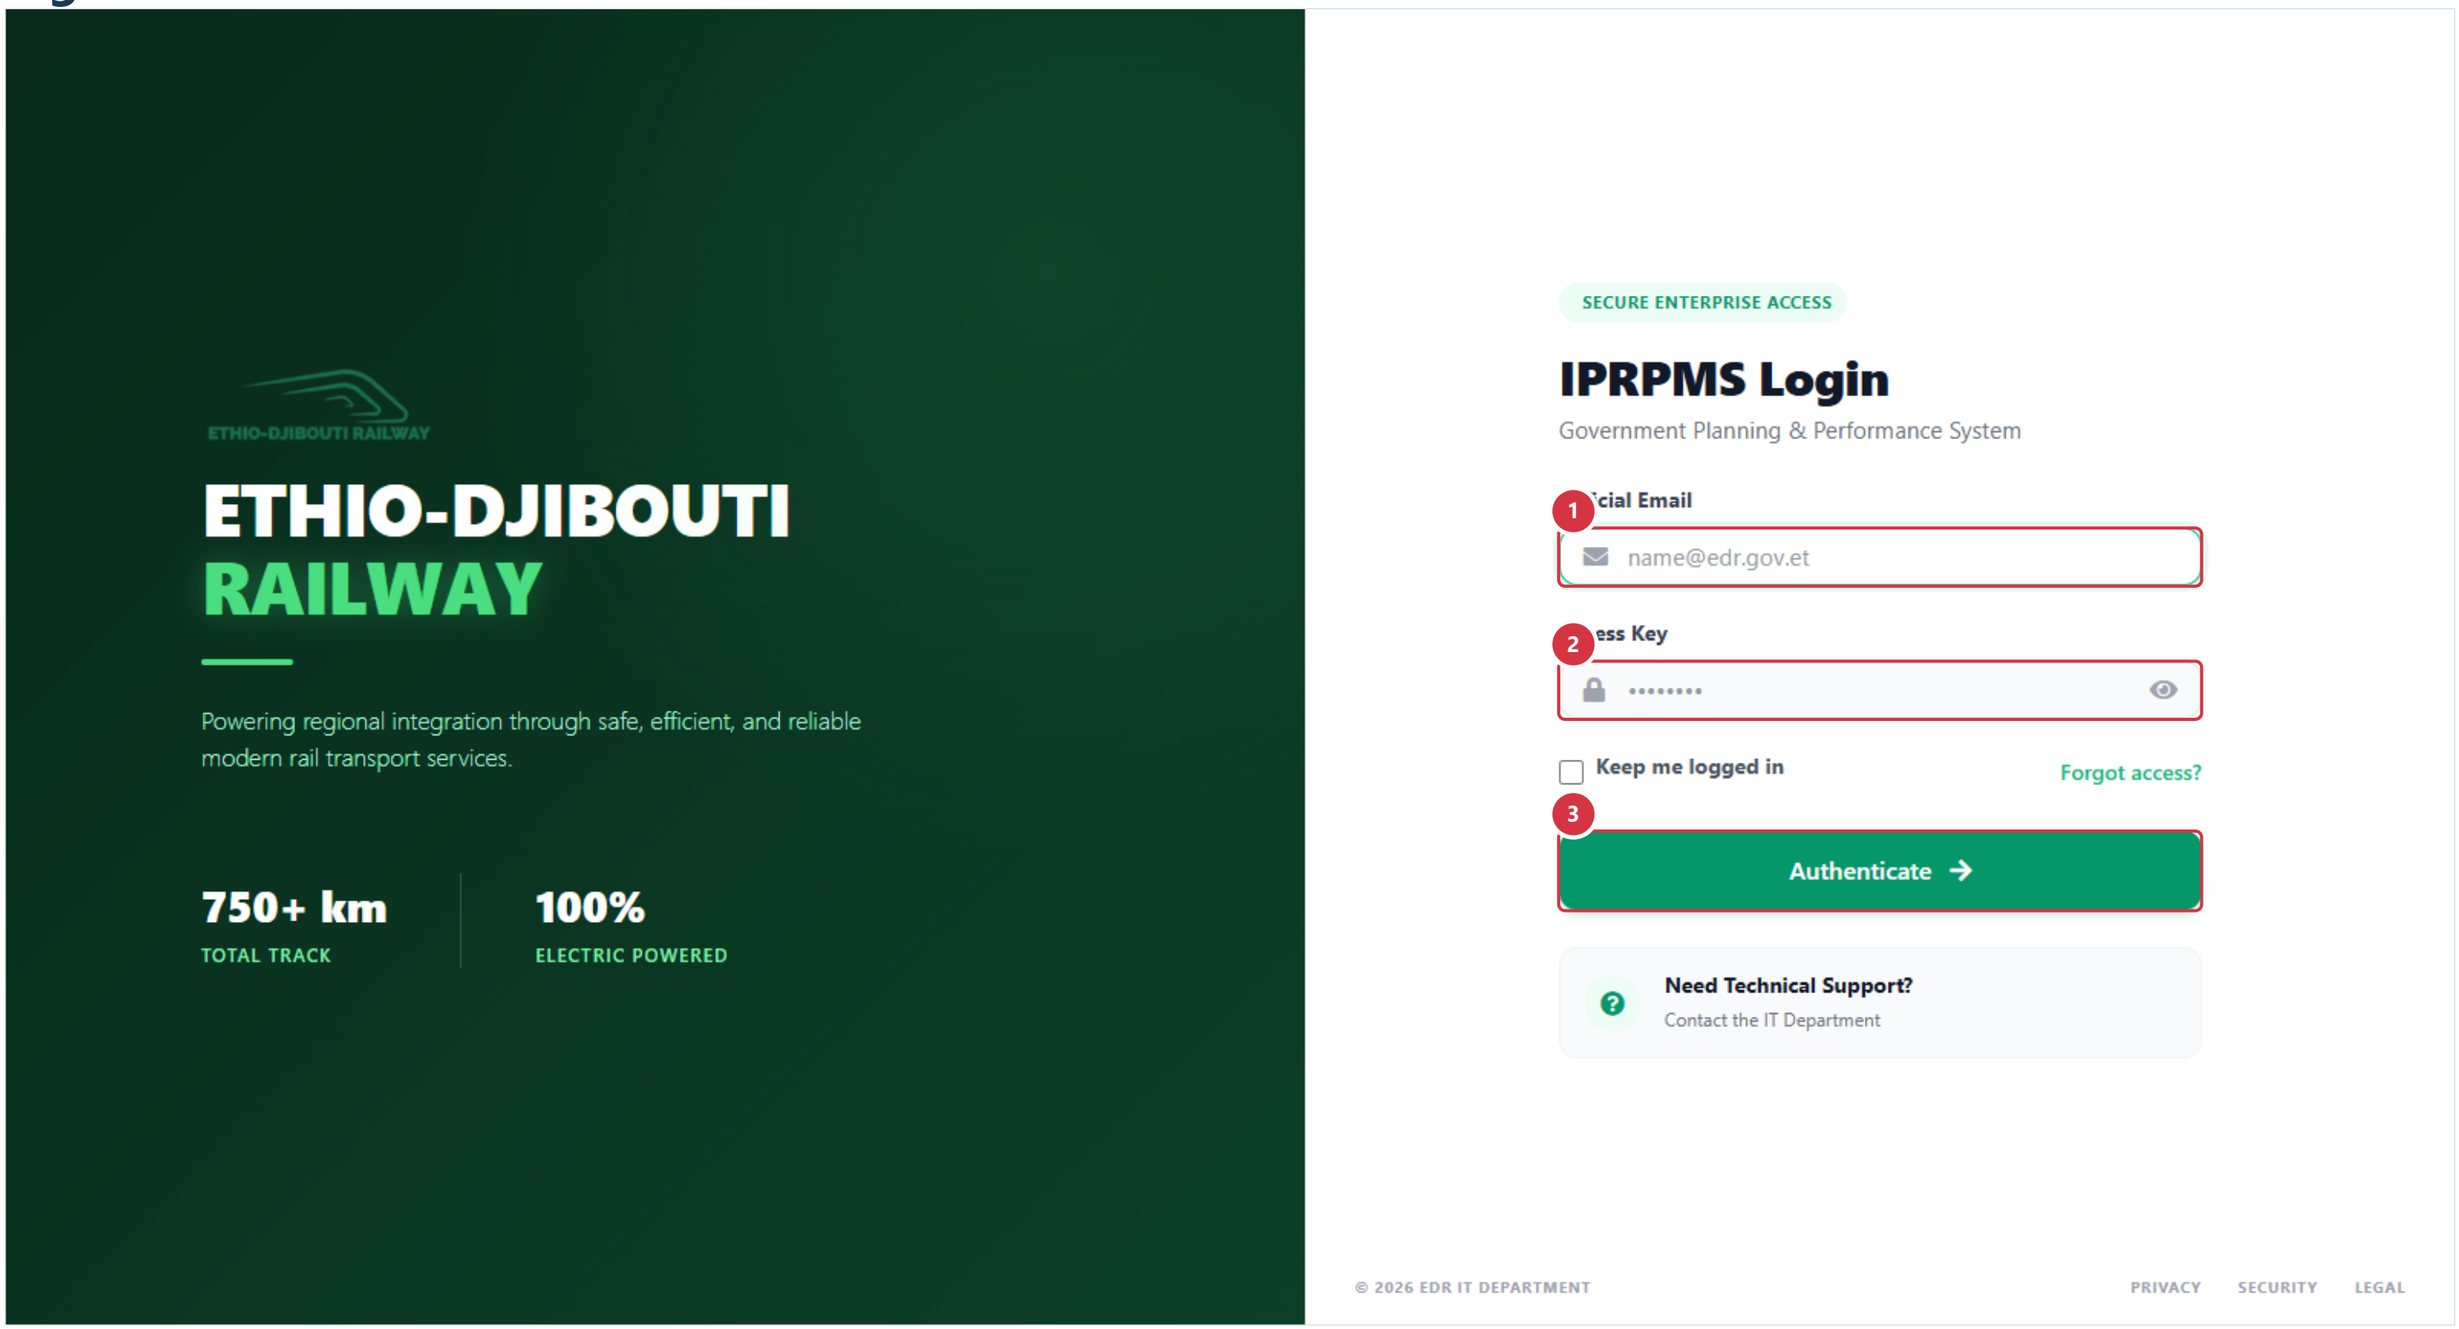

What to check

Check the name and role at the top right. Change your temporary password when prompted. Your profile is for your own name, email and password; department and role changes belong to the administrator.

How you know it worked

You can open the dashboard with the correct account. The notification bell shows work sent to you. On a shared computer, sign out when finished and do not choose Keep me logged in.

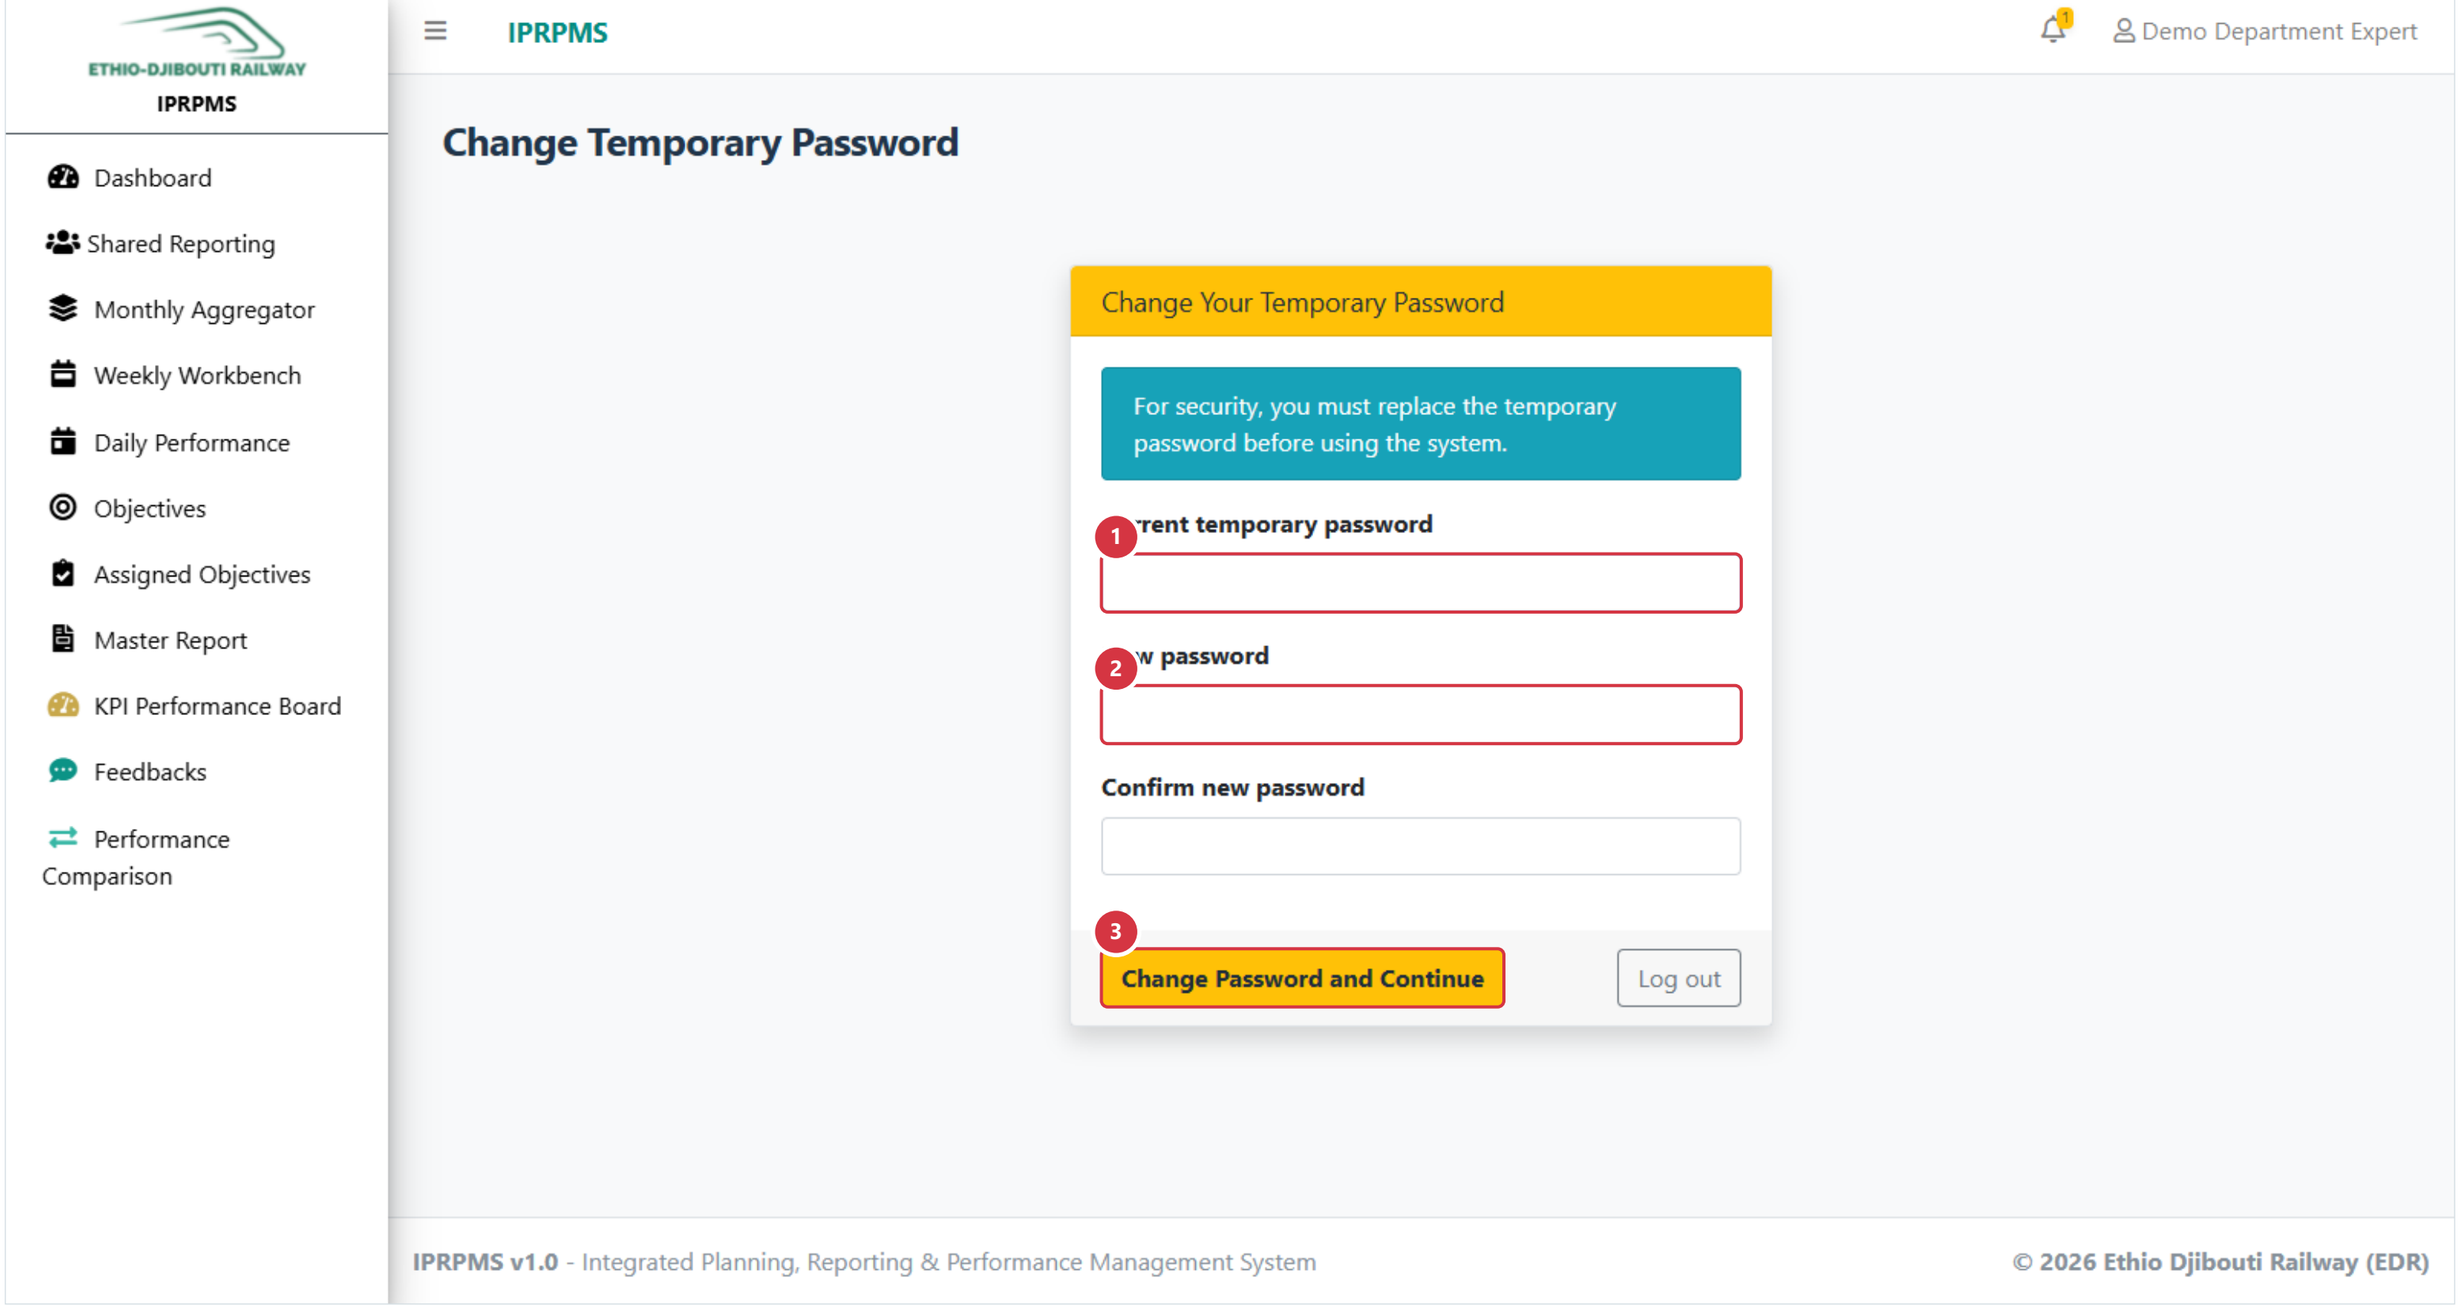

Sign in to IPRPMS

1. Enter your official email in Official Email.
2. Enter your own access key in Access Key.
3. Select Keep me logged in only on your own device, then click Authenticate.

After this step: The dashboard opens after authentication. Password fields in this handbook remain blank.

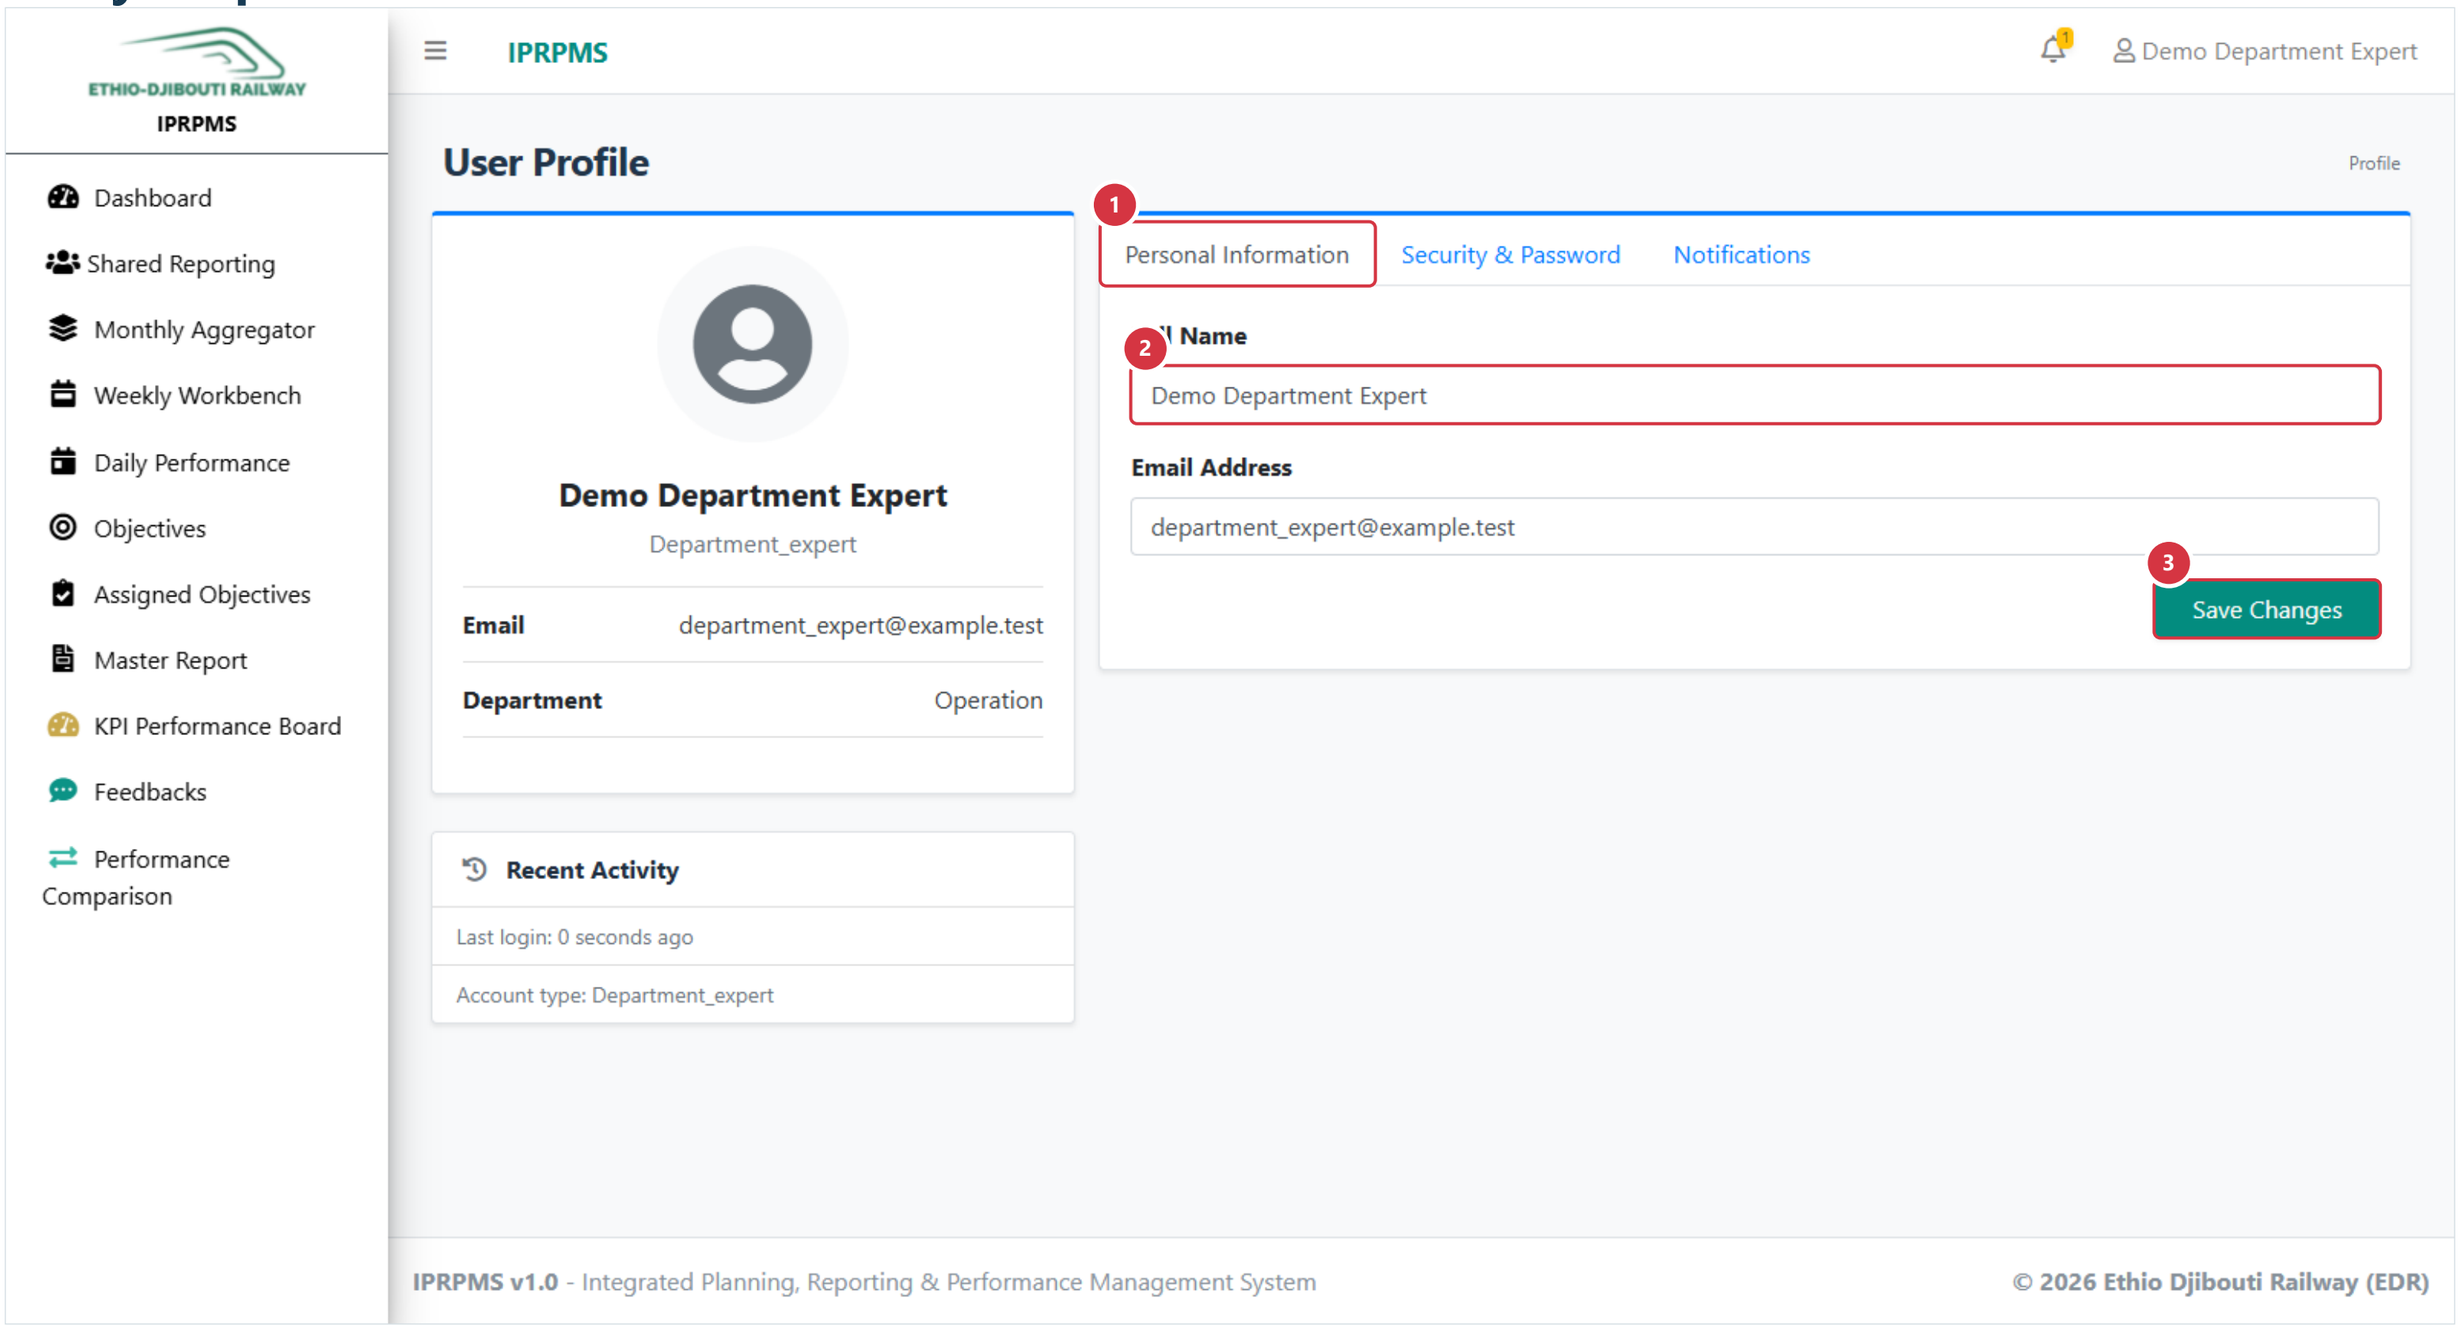

Replace a temporary password

1. Enter the current temporary password.
2. Enter a new private password and repeat it in Confirm new password.
3. Click Change Password and Continue.

After this step: This screen appears when the administrator requires a first password change.

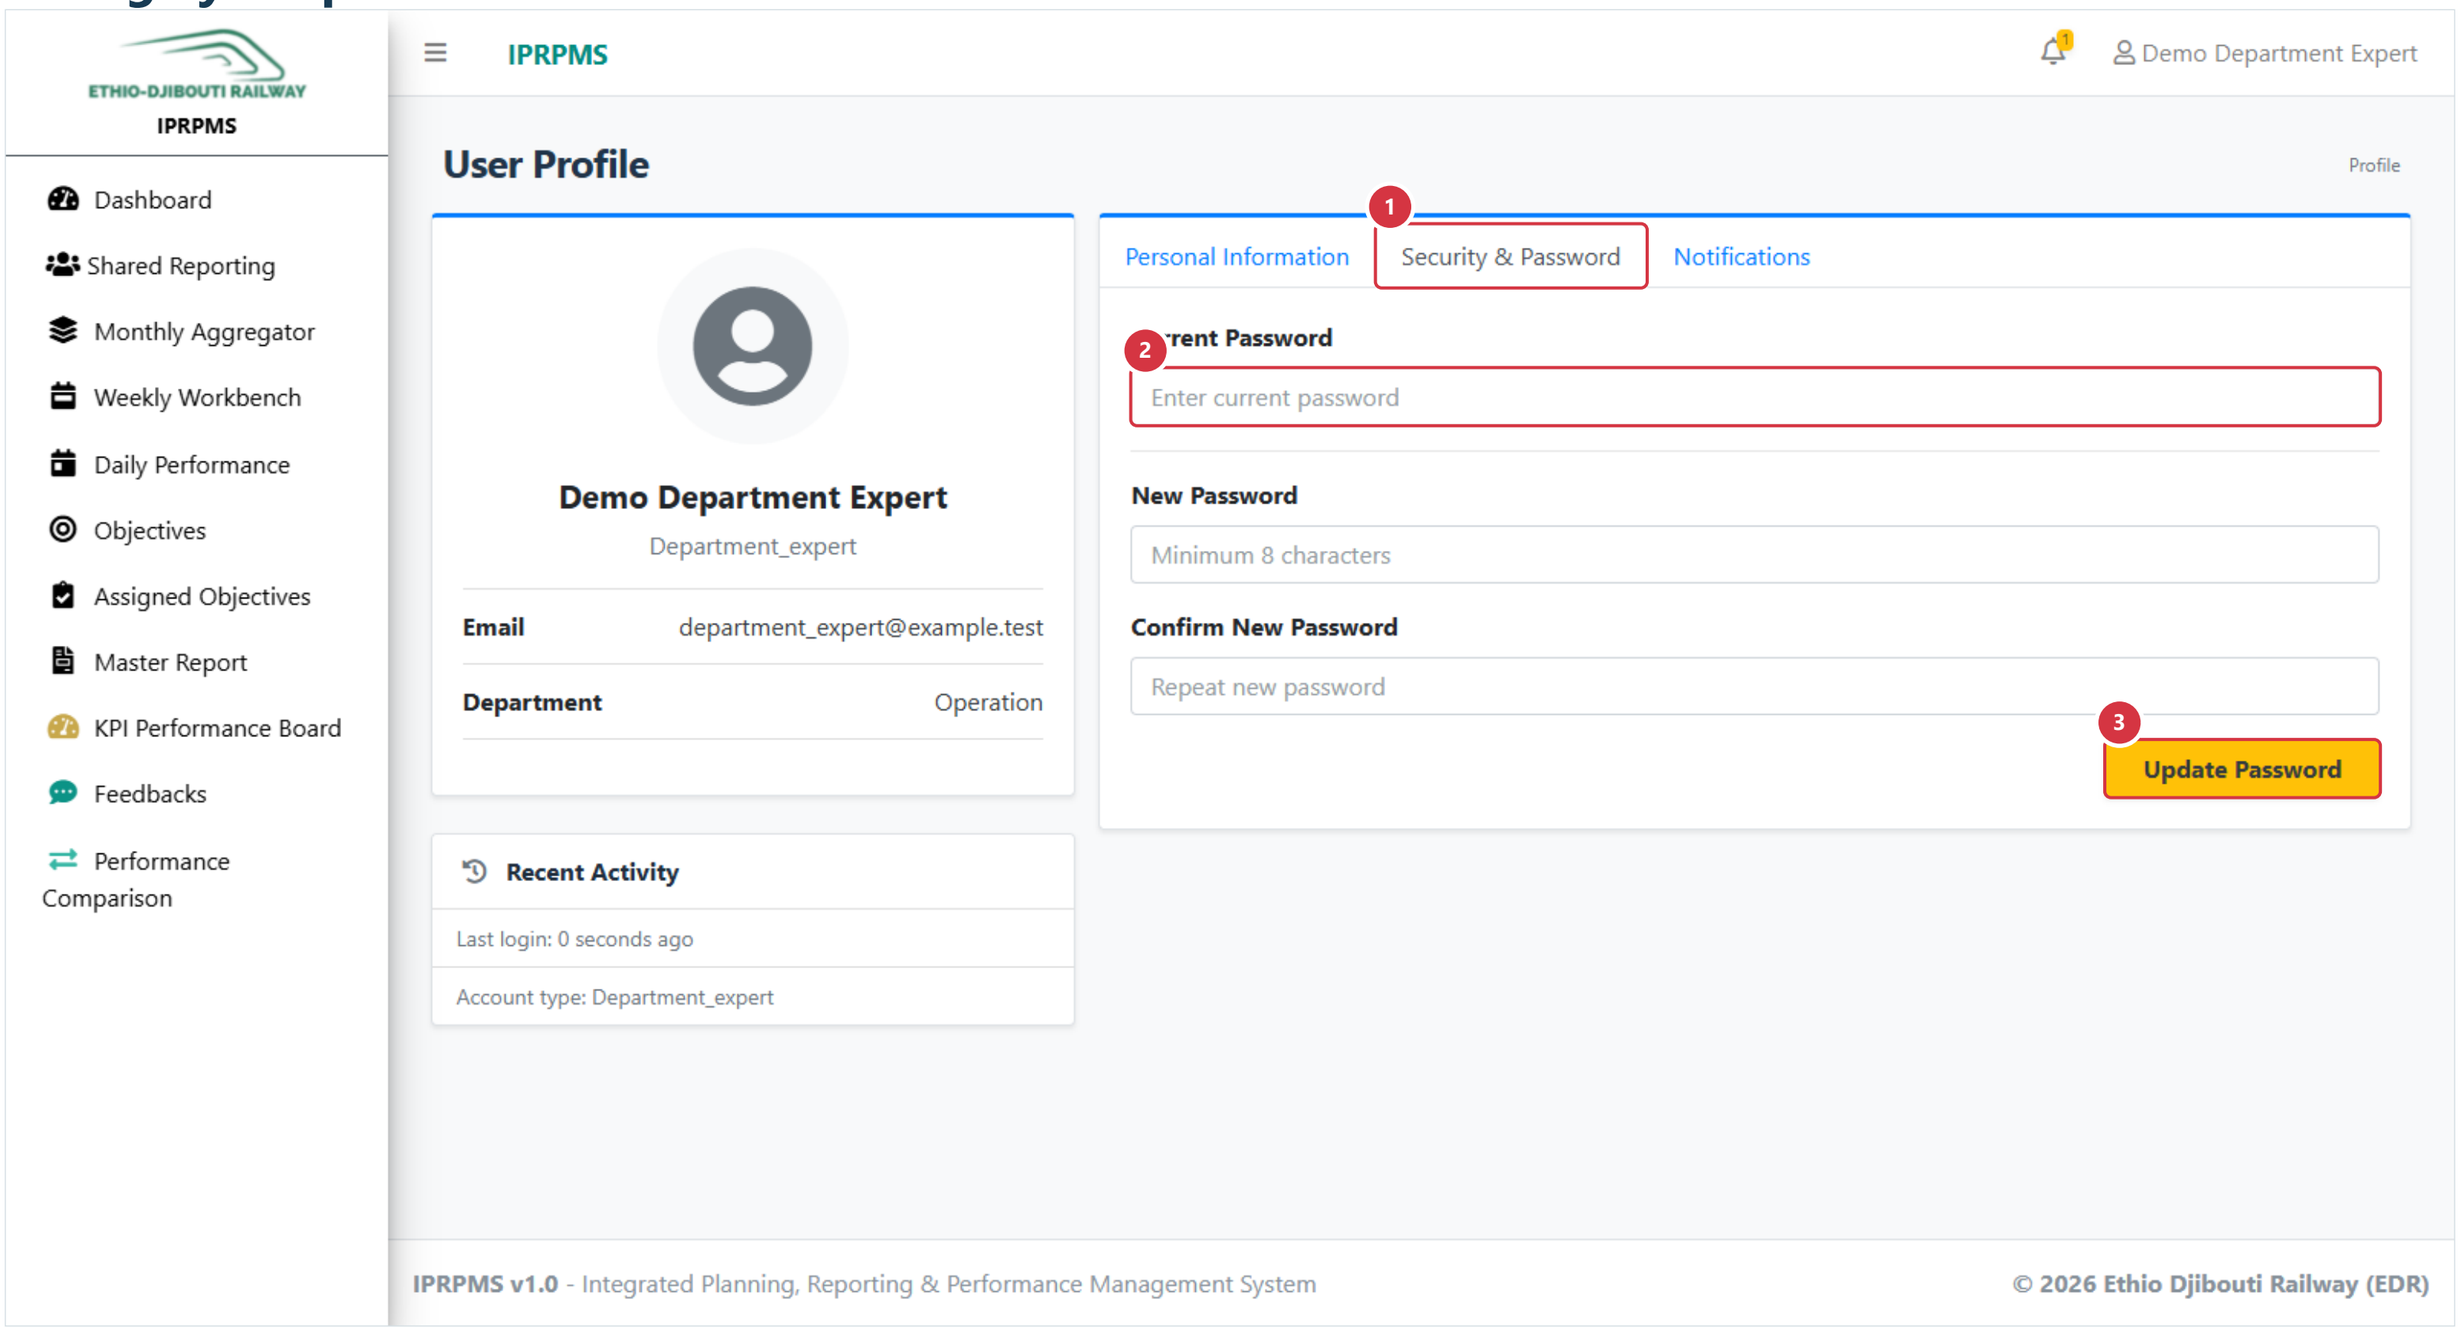

Edit your personal information

1. Click Personal Information in Profile.
2. Update Full Name or Email Address.
3. Click Save Changes and confirm the success message.

After this step: Department and role assignments are managed by the administrator, not through this form.

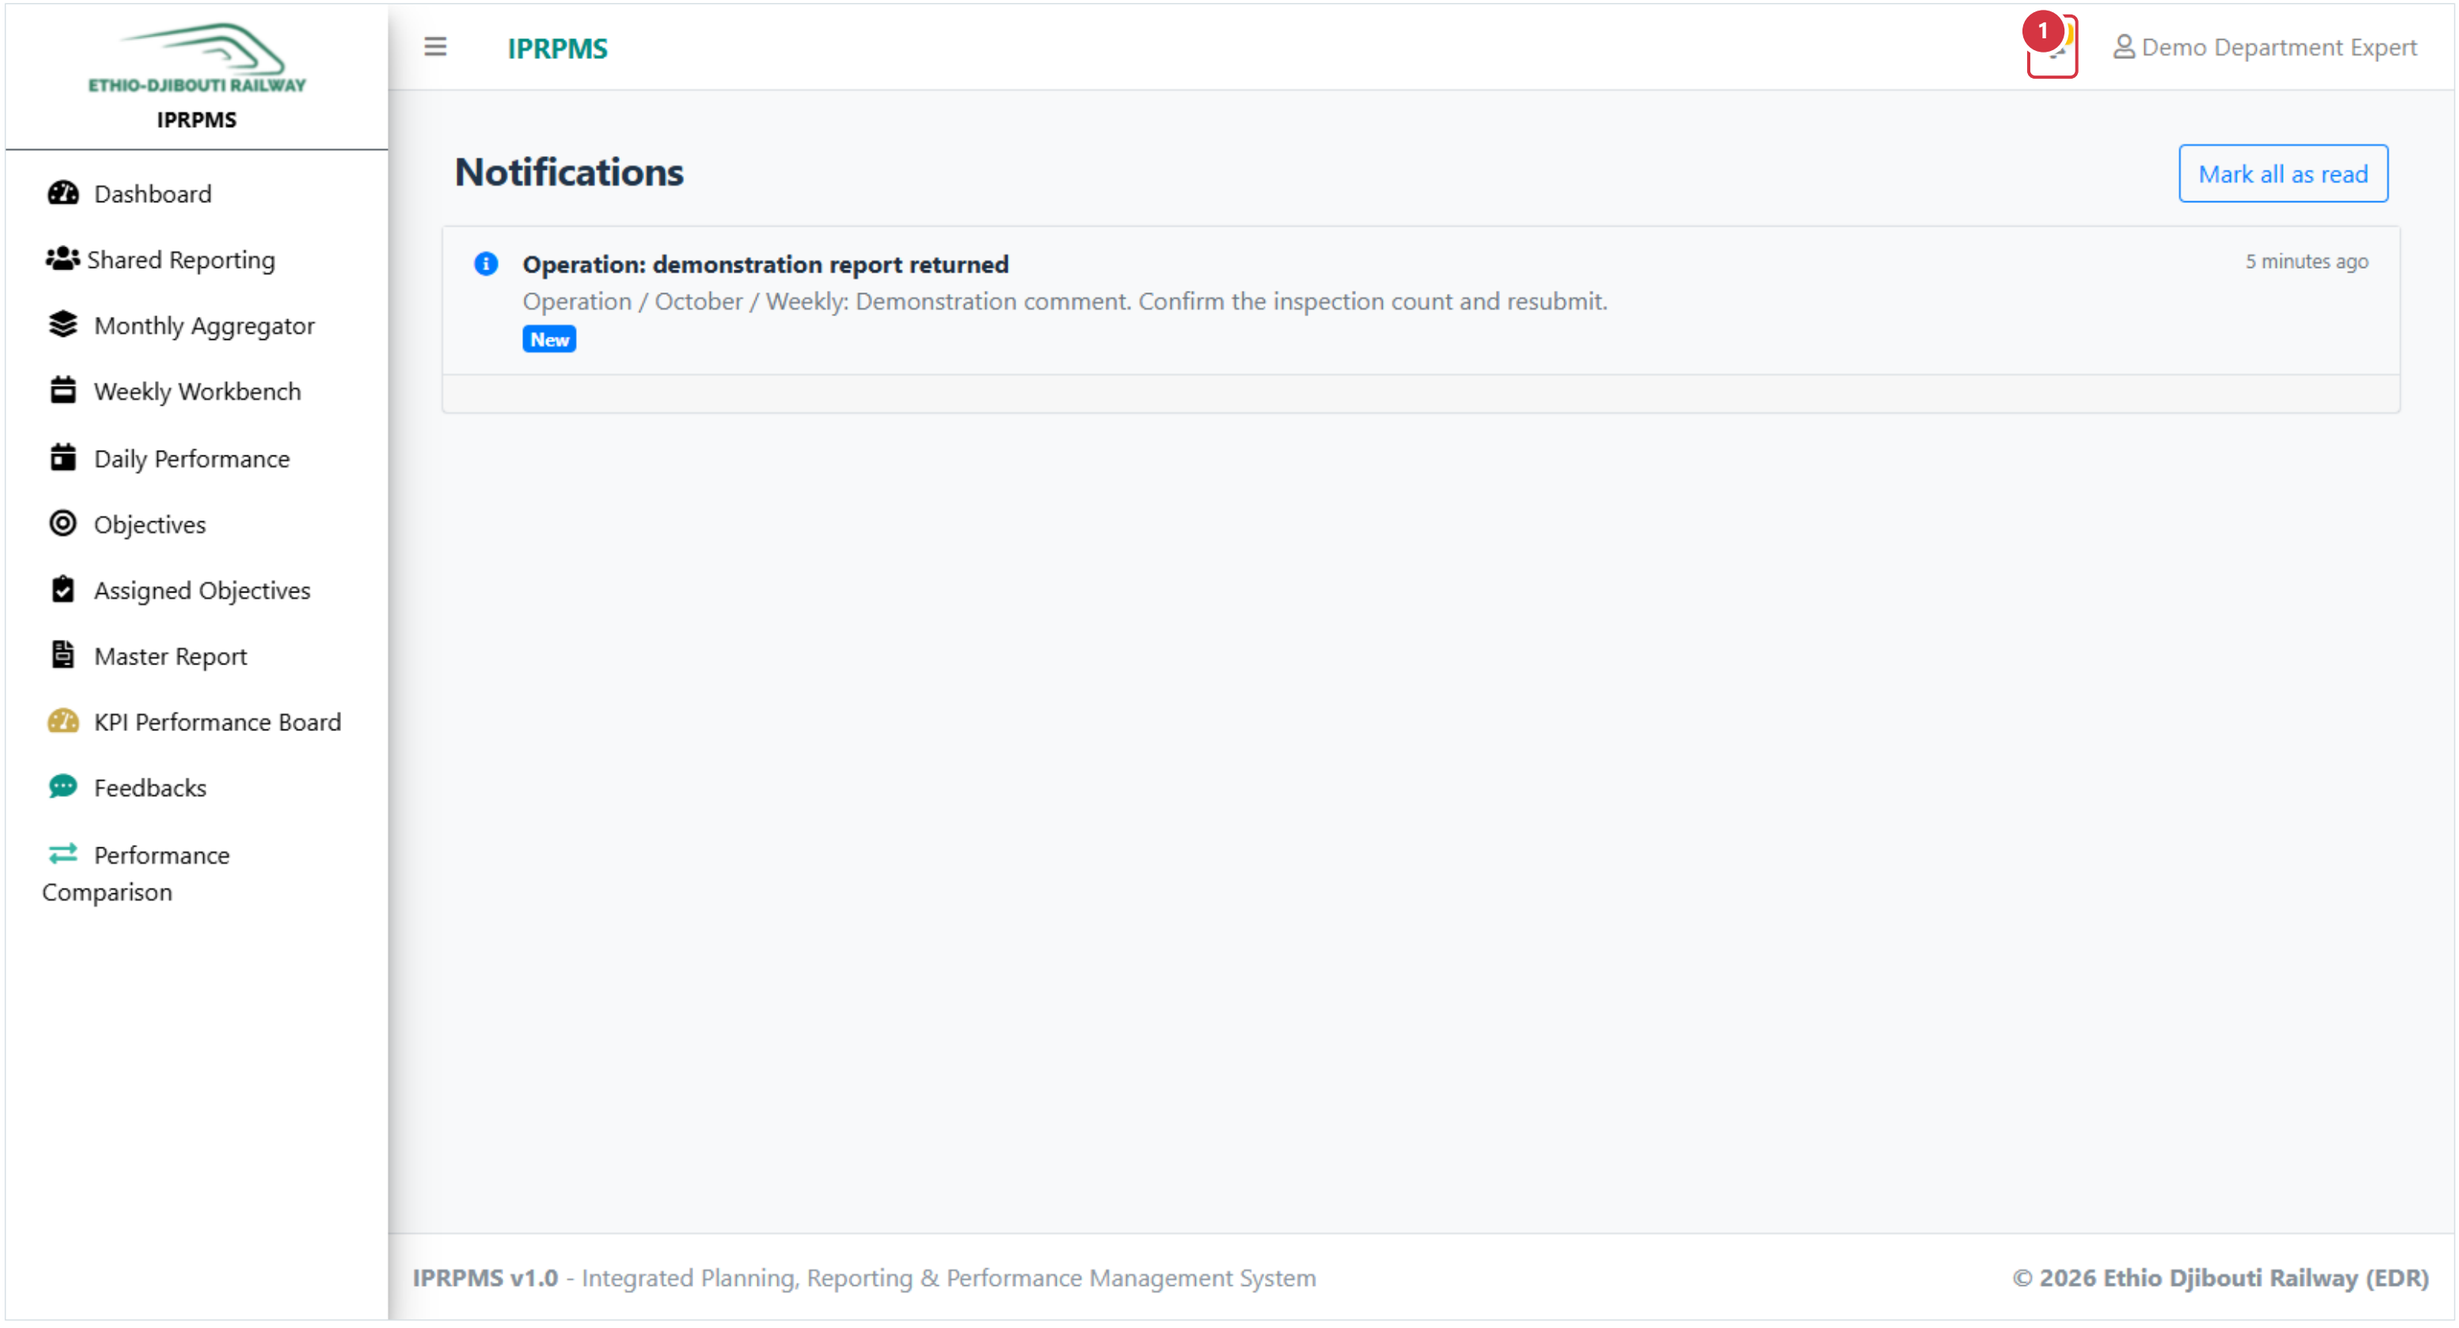

Change your password

1. Click Security & Password.
2. Enter your current password, a new password and its confirmation.
3. Click Update Password.

After this step: Use a private password. The fields are deliberately empty in this training capture.

Read workflow notifications

1. Open the notification bell or Notifications page.
2. Read the department, period, action and review comment.
3. Open the linked record or mark the notice read after acting on it.

After this step: Marking a notification read does not approve, correct or submit the underlying record.

Approve and assign departmental activities

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

Final objective approval publishes activities to performer departments. You decide which Directorate takes responsibility in your department.

Before you click

Open Assigned Objectives. Check the year, activity and intended Directorate before acting.

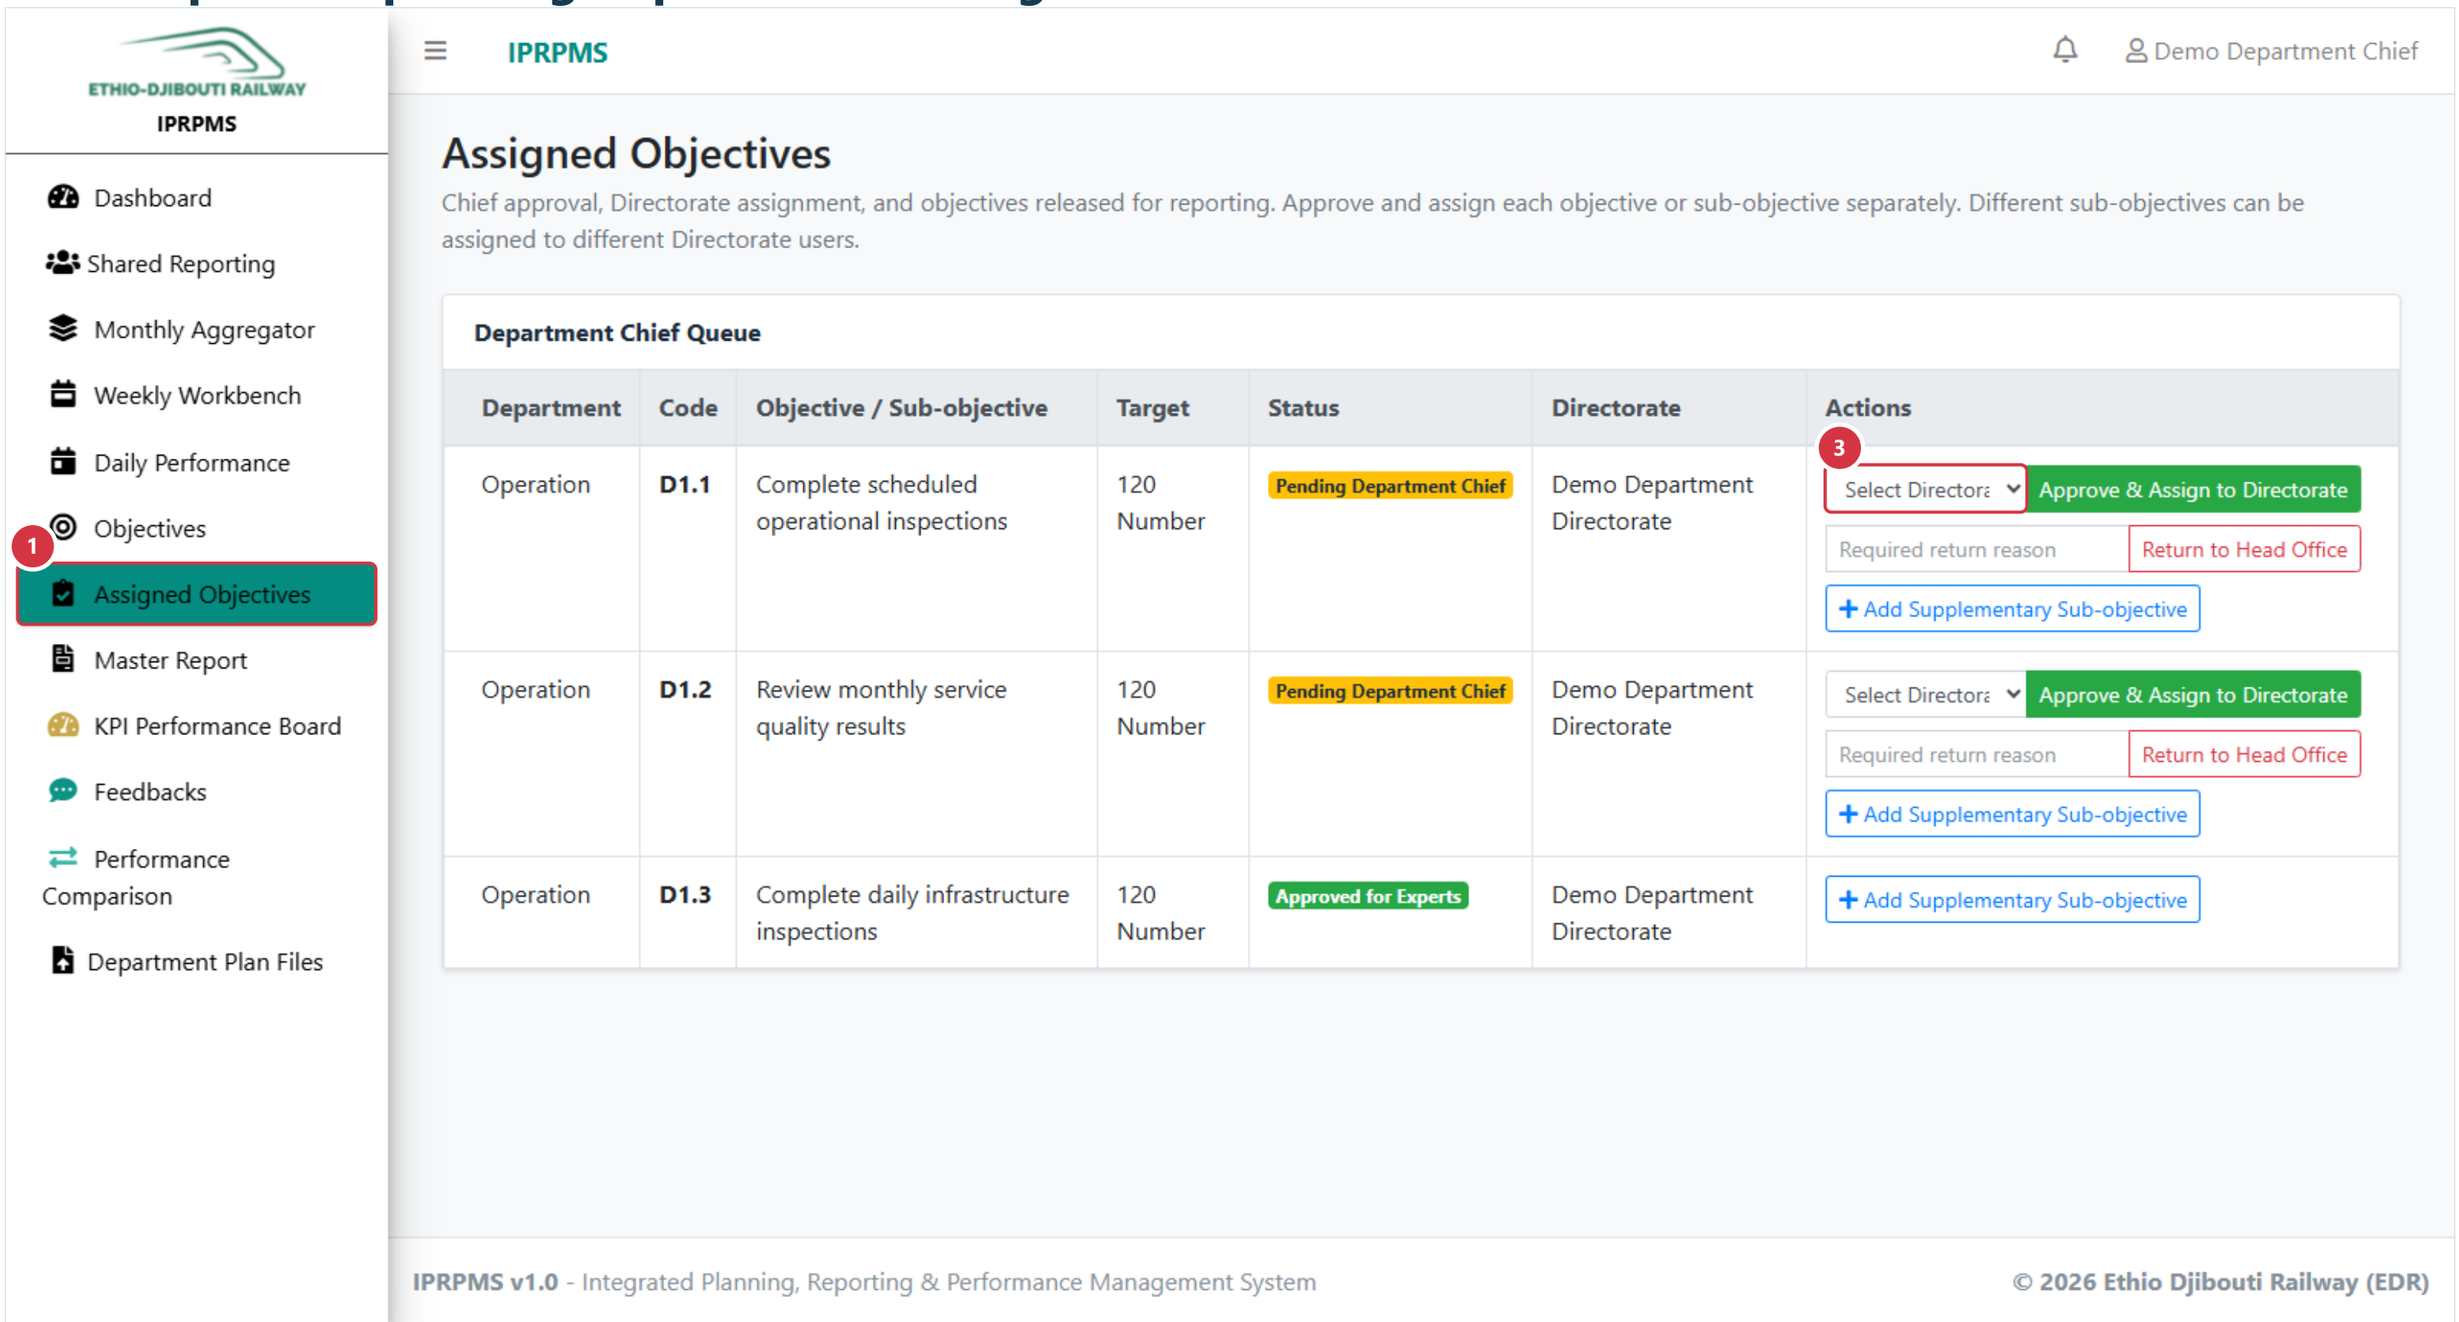

What to check

Use Approve & Assign to Directorate. Return an unsuitable assignment to Head Office with a reason. A supplementary department activity is zero-weight and does not increase the organization's score.

How you know it worked

The selected Directorate receives the assignment and must approve it for Experts before reporting begins.

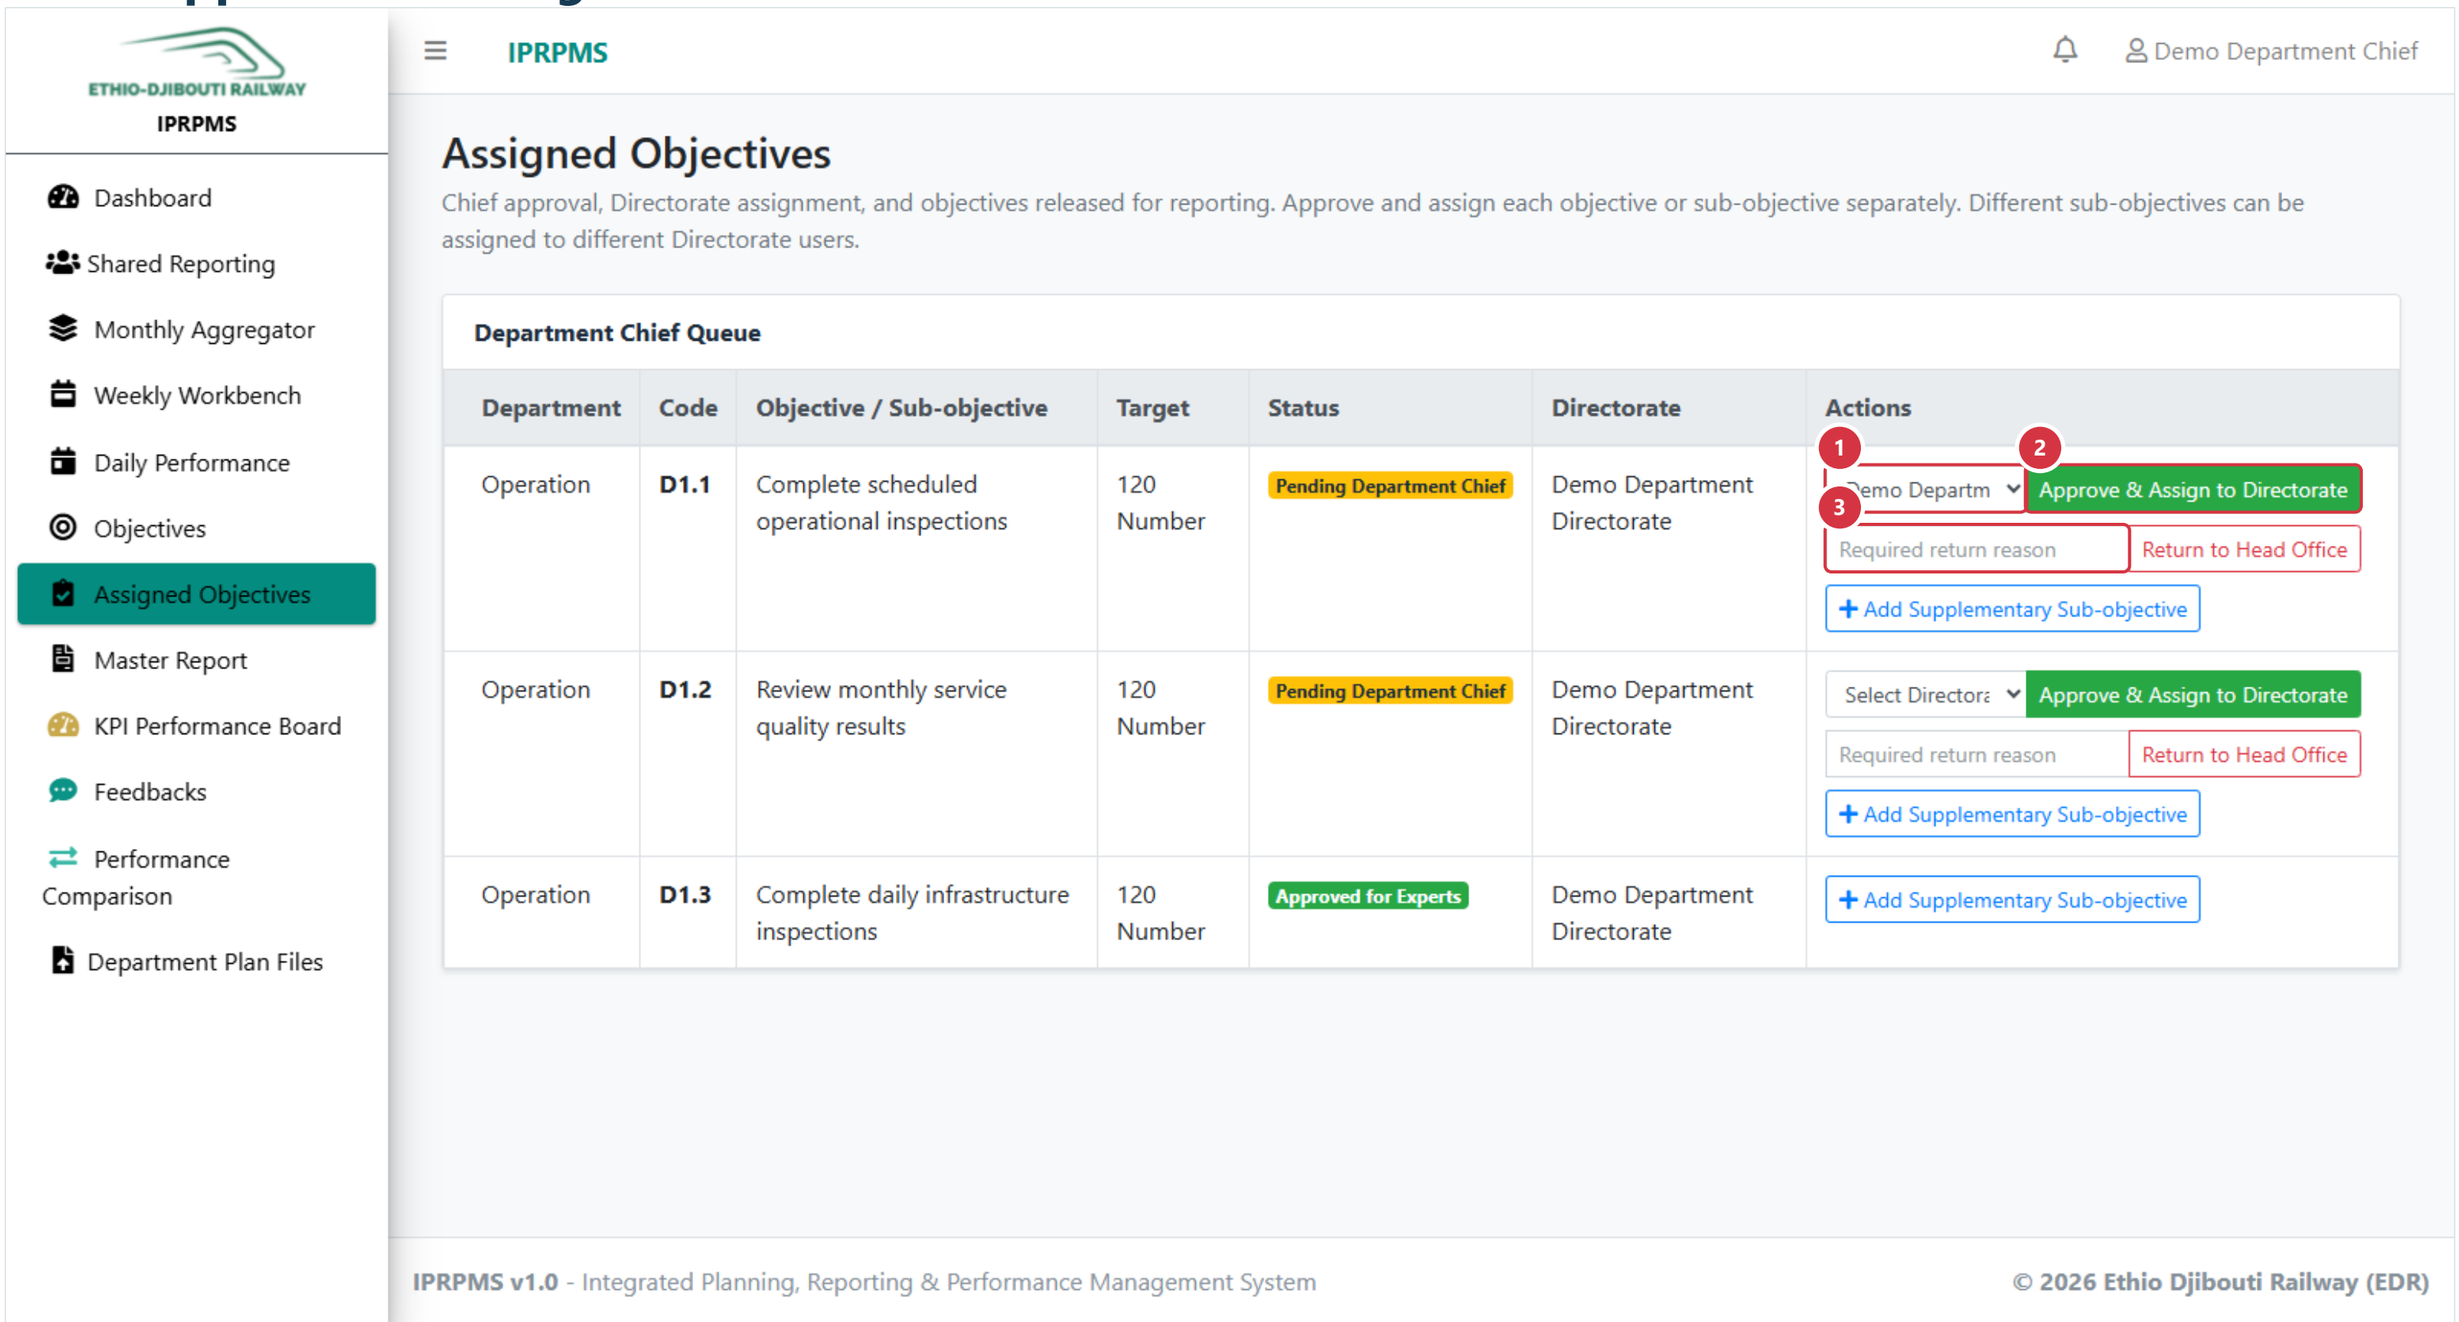

Chief: open the pending departmental assignments

1. Click Assigned Objectives.
2. Read the objective, target, unit and current assignment status.
3. Find the Directorate assignment control for each objective or sub objective.

After this step: Each sub objective can be assigned to its responsible Directorate independently.

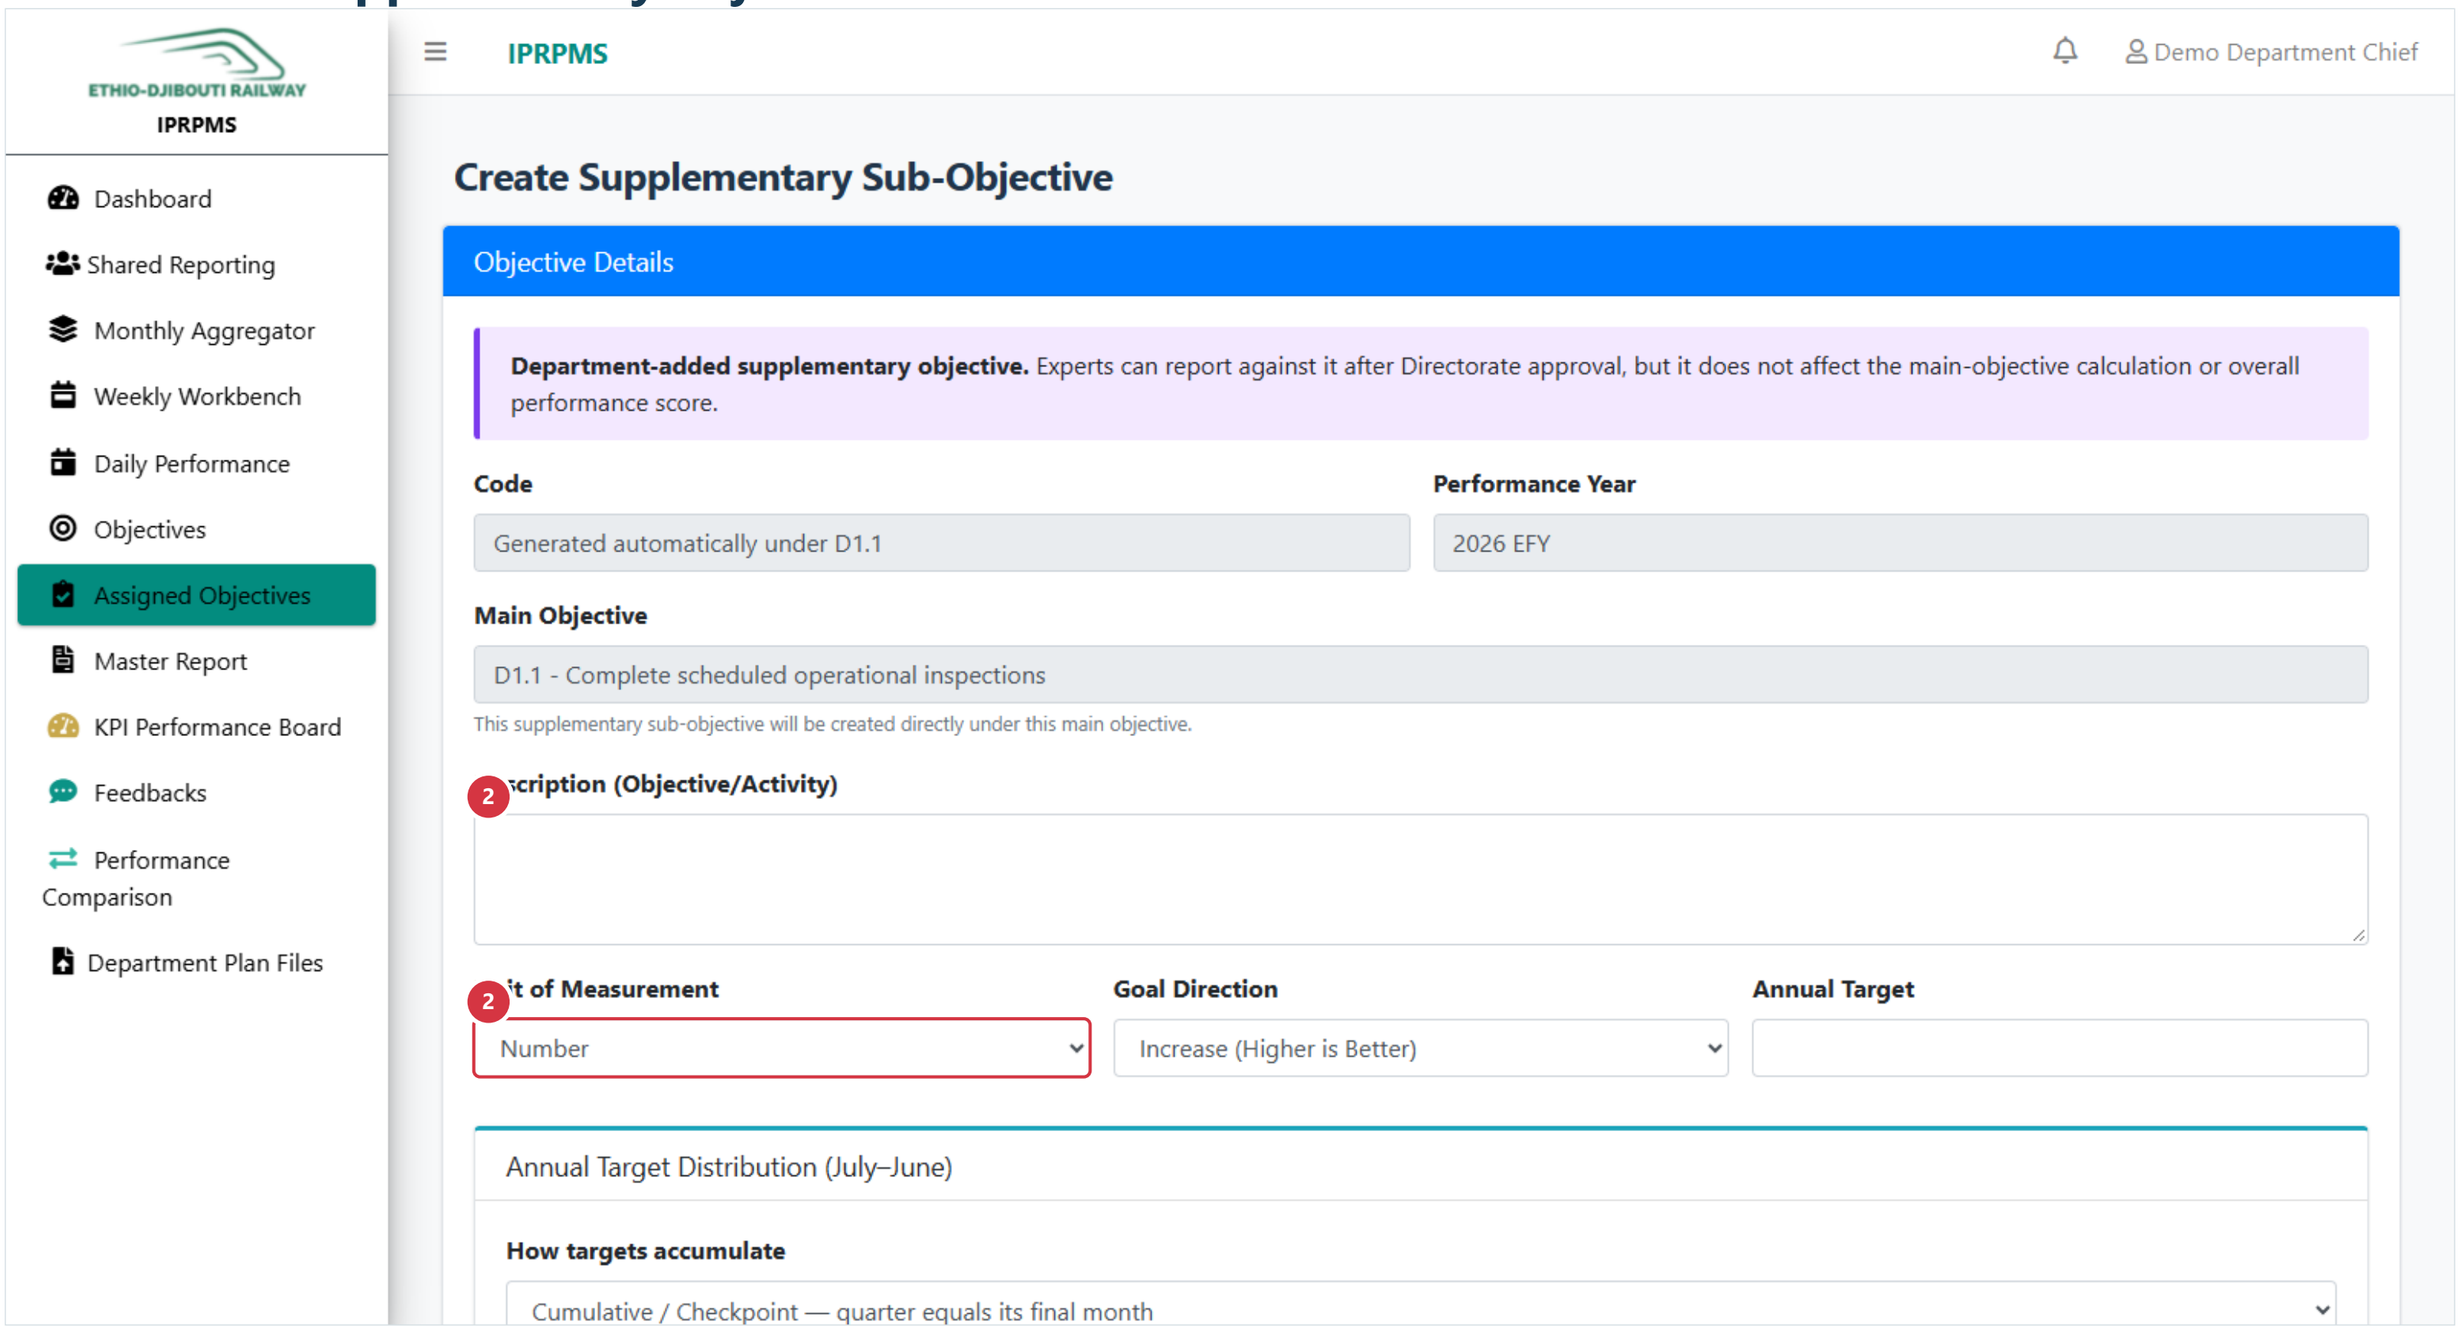

Chief: approve and assign to a Directorate

1. Select the responsible Directorate user.
2. Click Approve & Assign to Directorate on that row.
3. To return an unsuitable assignment, enter a Required return reason and click Return to Head Office.

After this step: The selected Directorate receives the assignment for its own approval.

Chief: add a supplementary objective

1. Open Add Supplementary Objective from the relevant assignment.
2. Complete the description, unit, goal direction and targets.
3. Save it, then complete the Chief and Directorate assignment approvals.

After this step: Department-added supplementary activities are recorded separately and do not add to the official organization score.

Set the primary and backup reporting coordinators

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

One coordinator organizes the department's submission and one backup can cover absence. Both can prepare entries as Department Experts.

Before you click

Ensure both people have active accounts in your department with the Department Expert role.

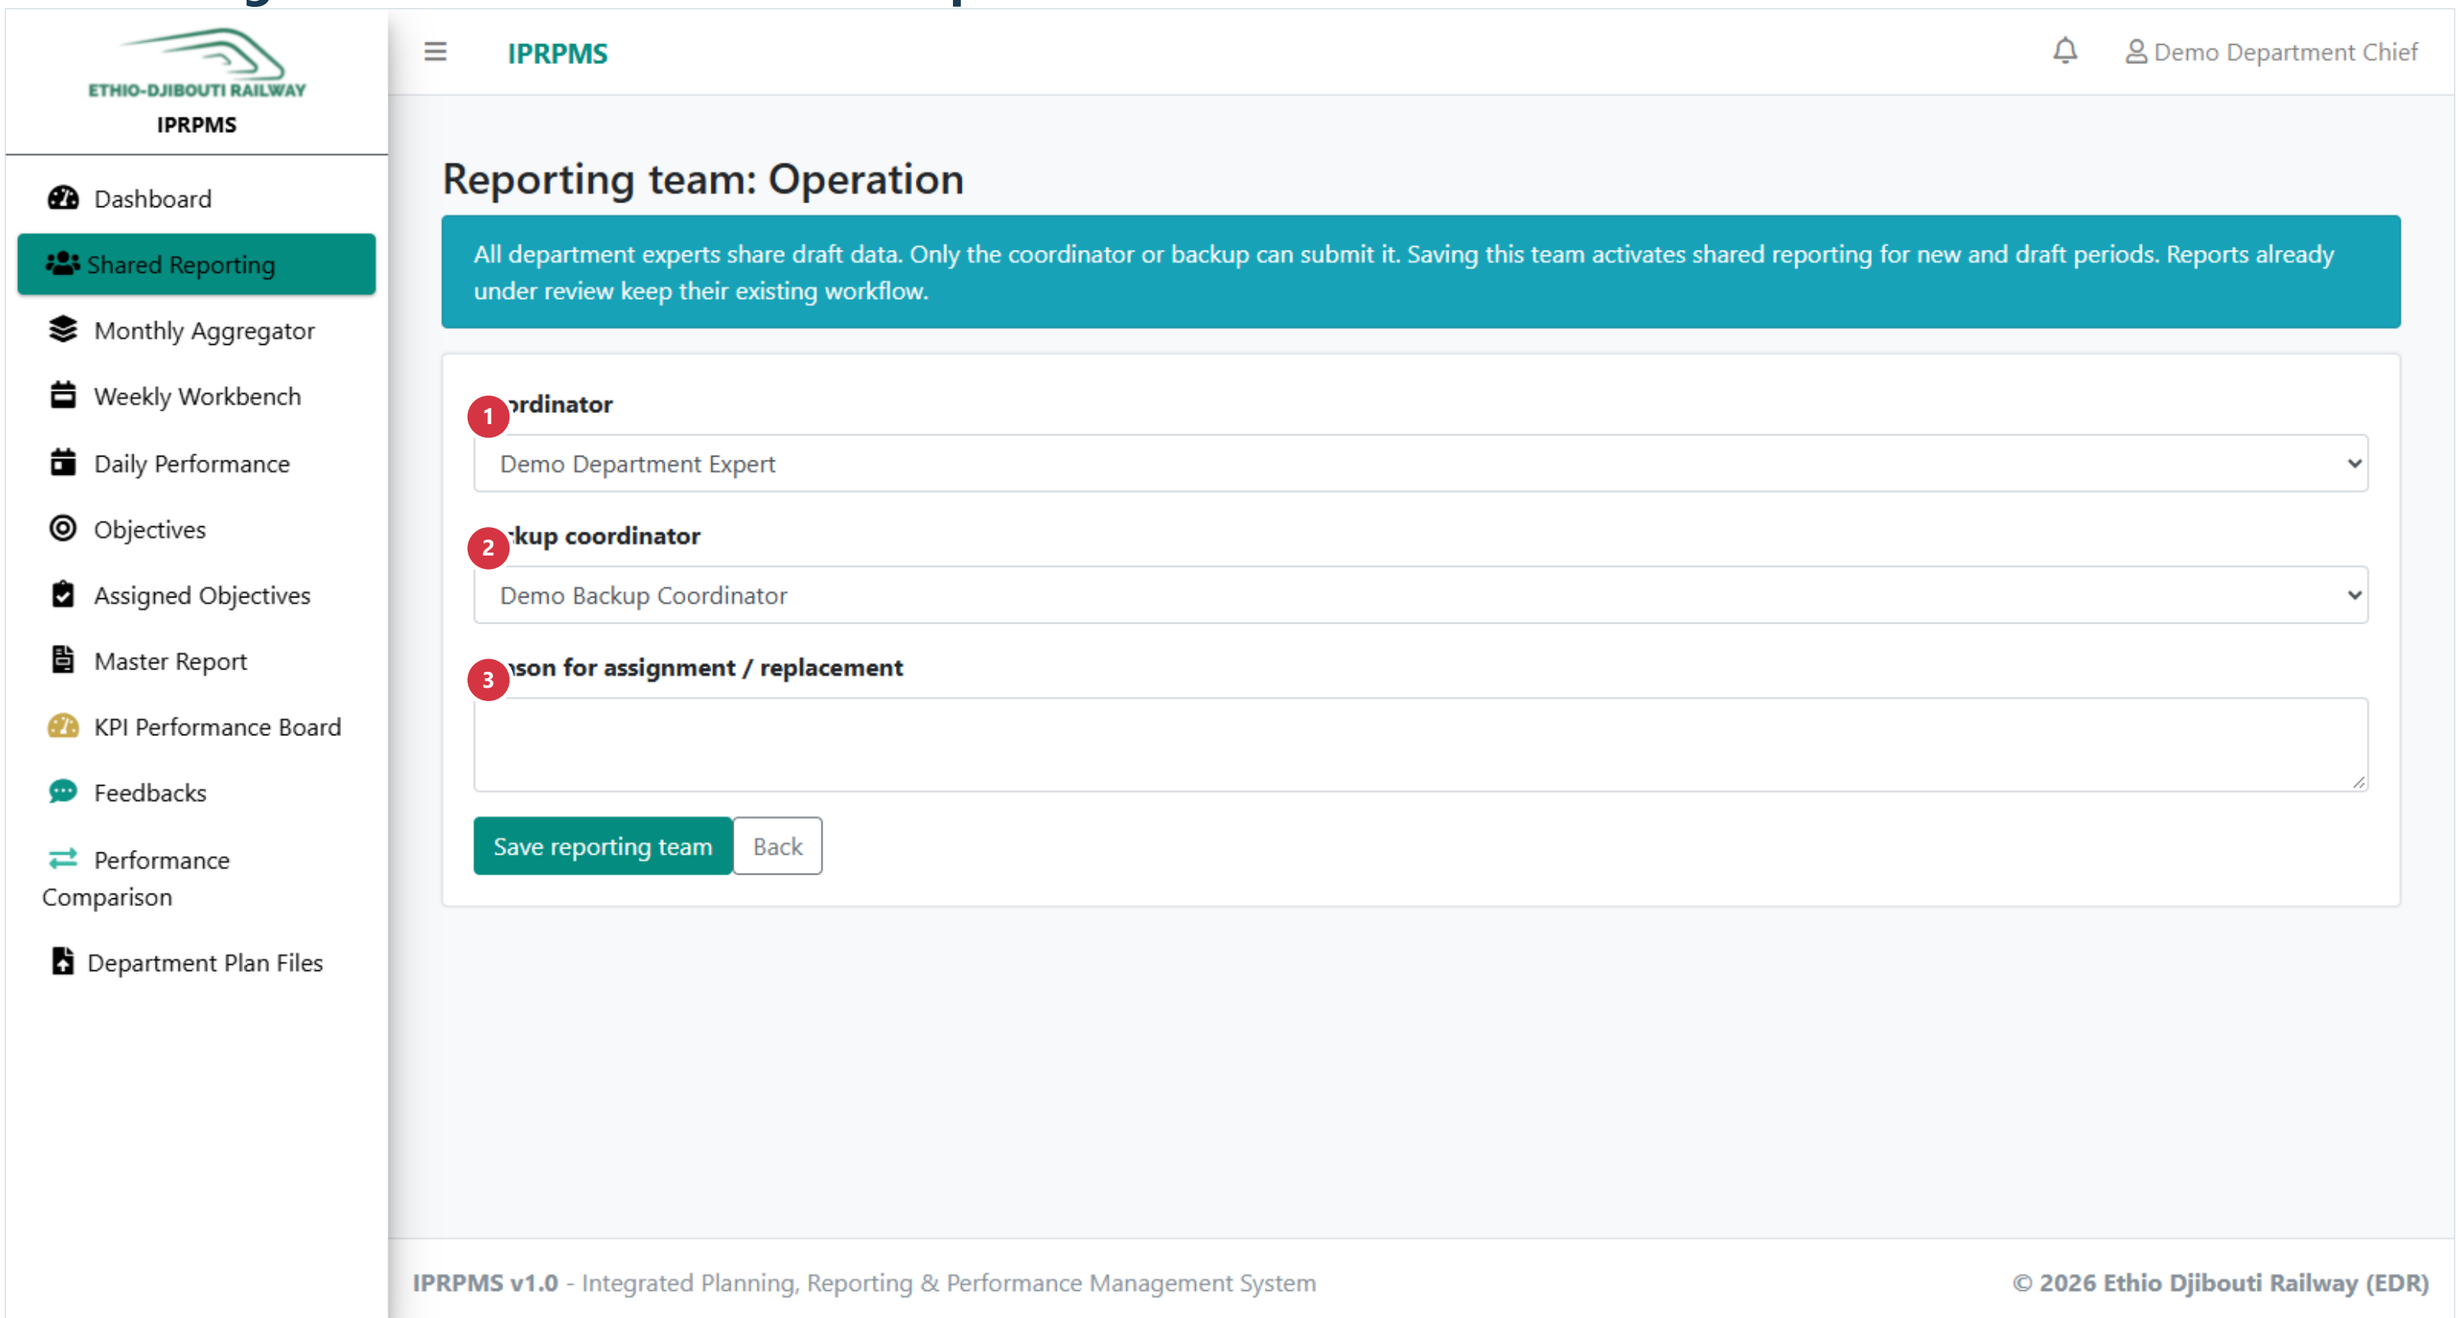

What to check

Choose two different people. Do not grant Directorate or Chief access simply to make a Submit button appear. Update the reporting team when responsibility changes.

How you know it worked

The saved team appears correctly. Either assigned person can submit completed draft or returned sections; ordinary Experts do not gain this team-level submission right.

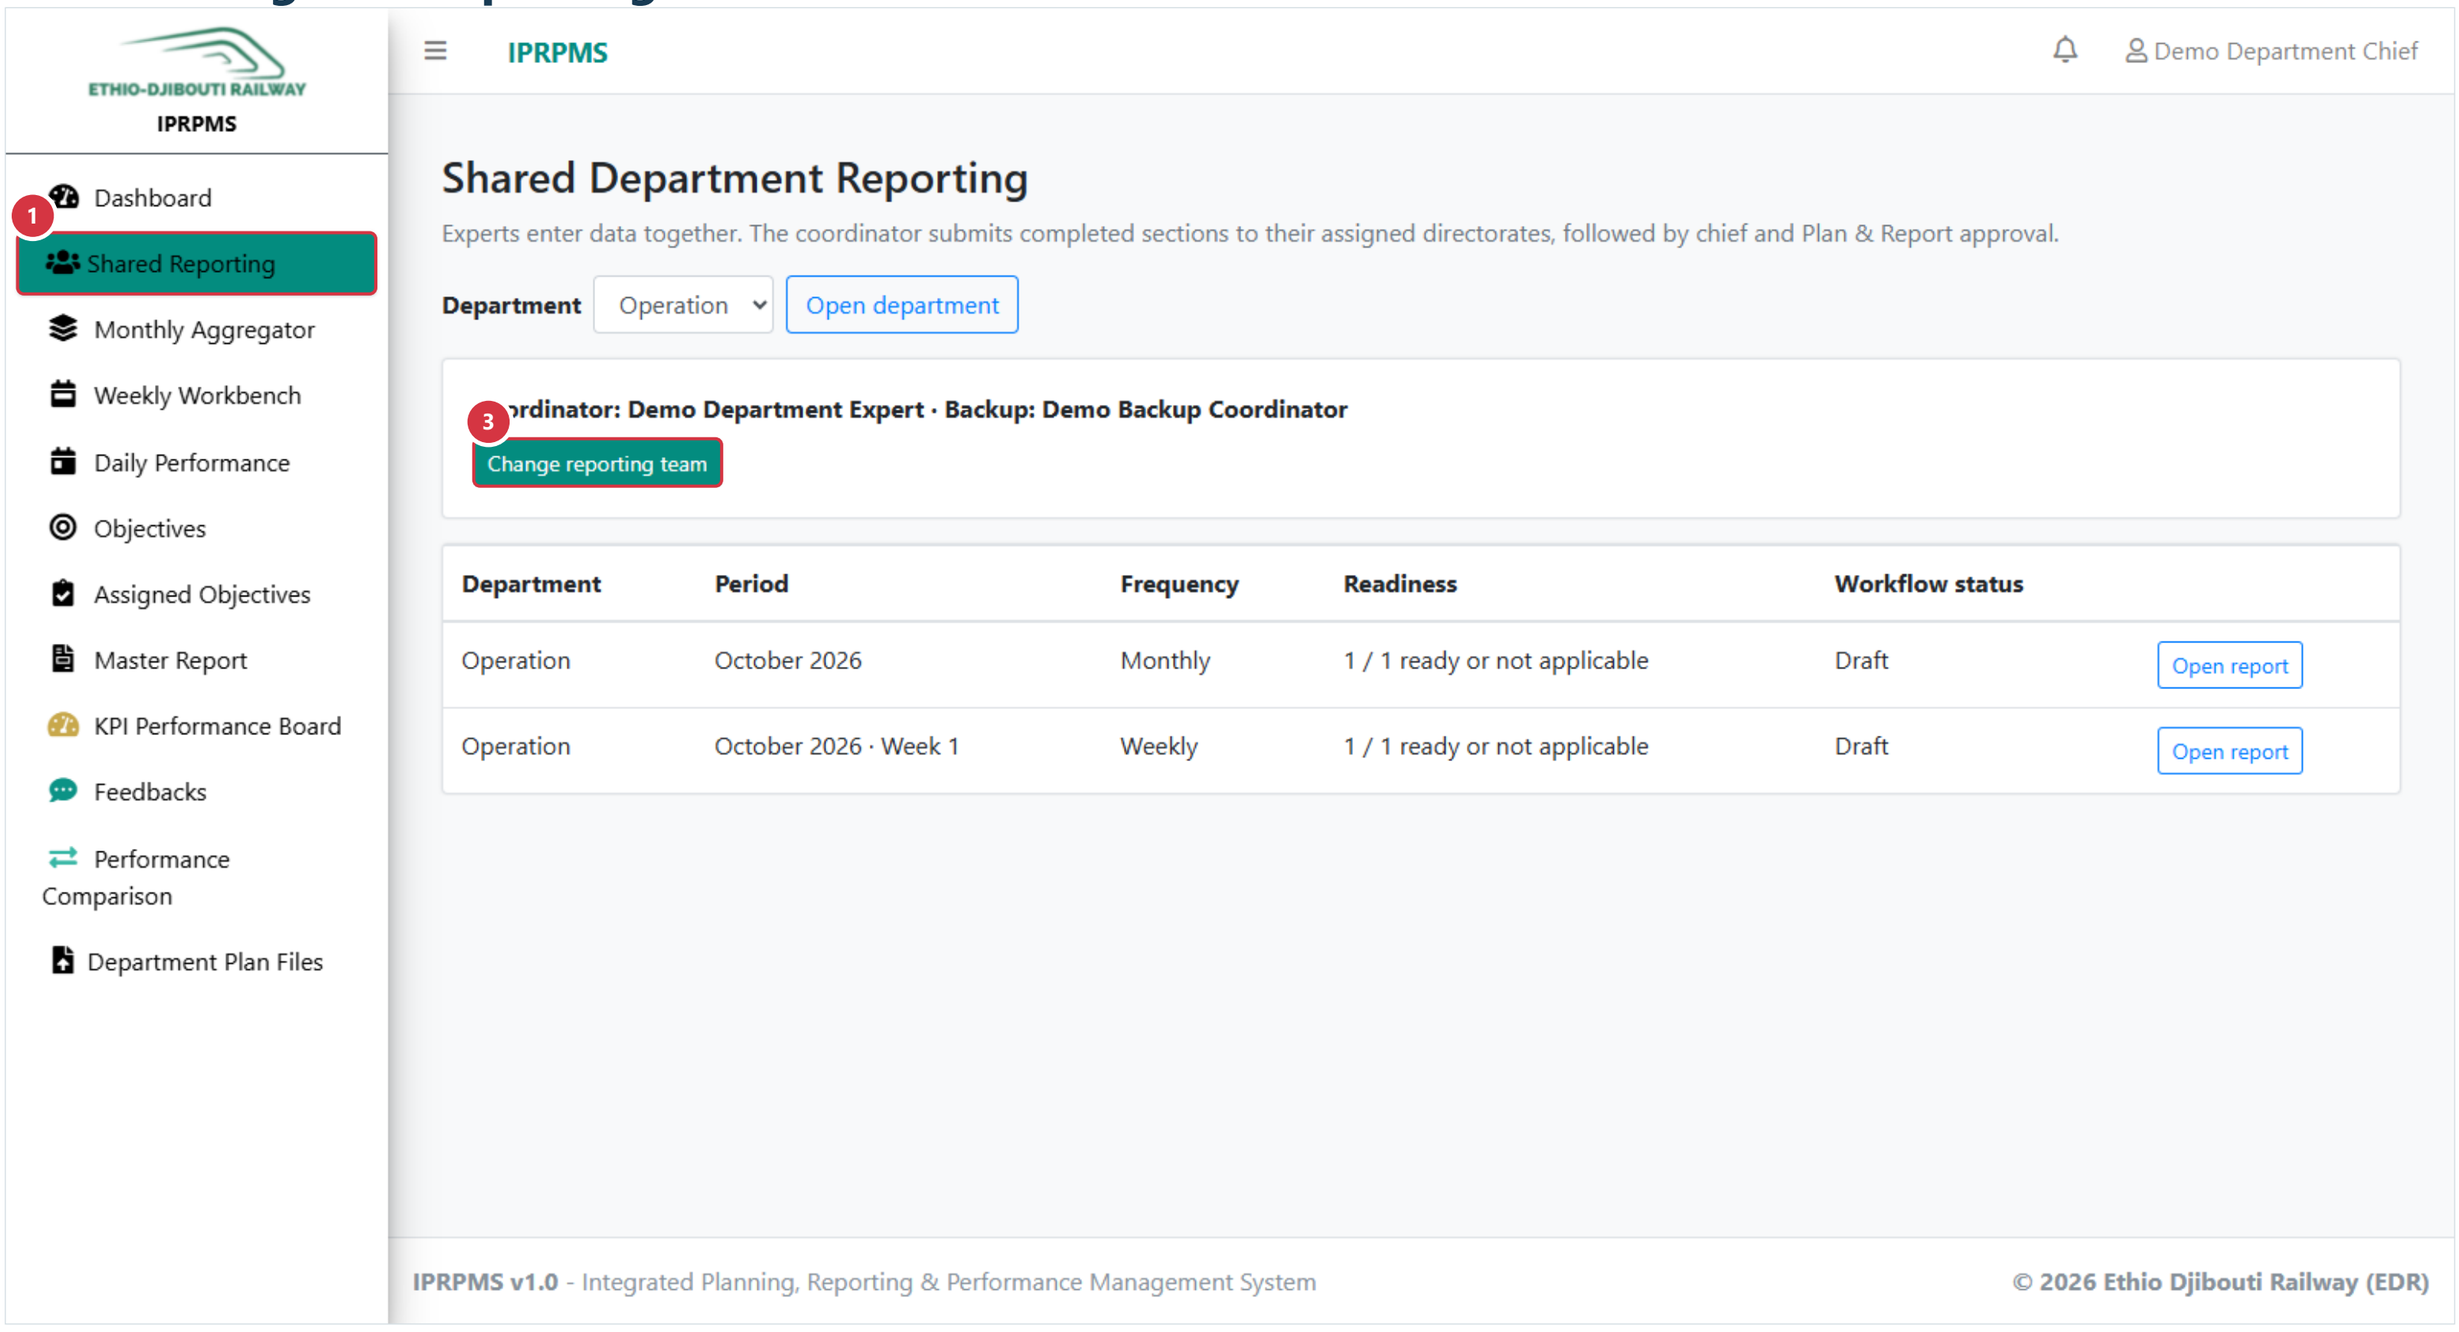

Chief: assign the coordinator and backup

1. Select the primary coordinator.
2. Select a different active Expert as backup.
3. Enter the assignment/change reason and save the reporting team.

After this step: Coordinator and backup are responsibilities assigned to Department Experts. They can submit the shared report.

Chief: change the reporting team

1. Open Shared Reporting.
2. Read the current coordinator and backup.
3. Click Change reporting team when an assignment needs updating.

After this step: New draft periods use the shared reporting workspace. Older reports already in review keep their existing workflow.

Make the department performance decision

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

Your approval confirms the department stands behind the consolidated figures before they reach Plan and Report.

Before you click

Confirm every required Directorate section is ready, then read the department, period, figures, evidence and review history.

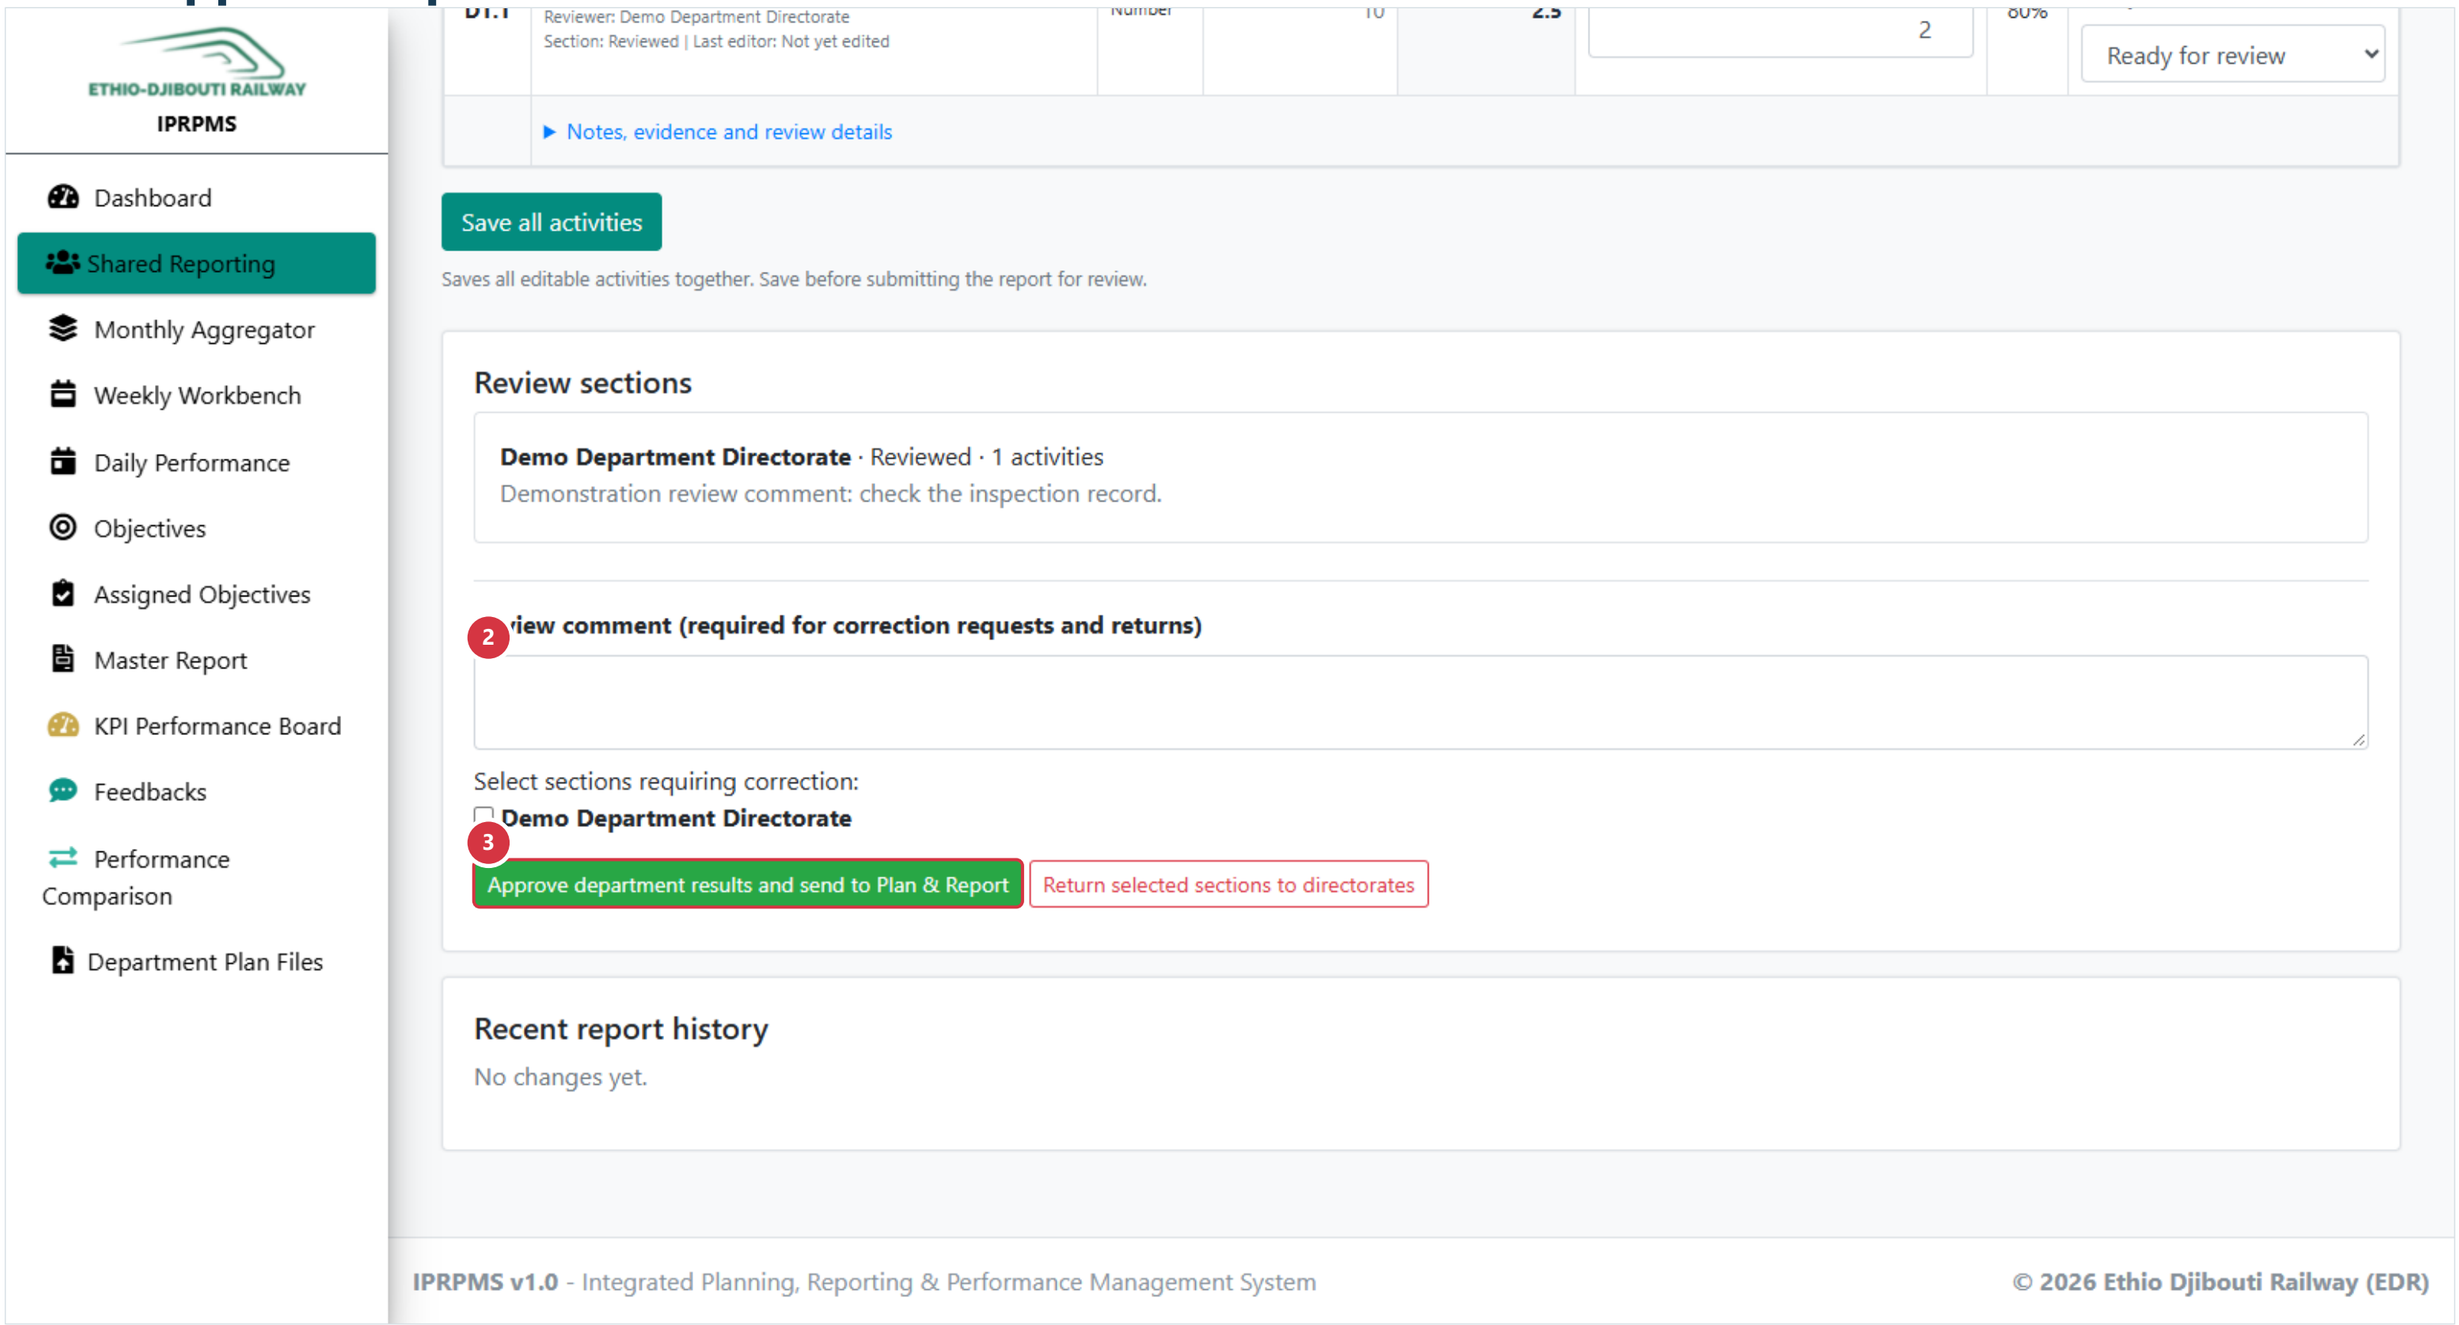

What to check

If you make a permitted correction, explain it. Return selected sections to their responsible Directorates with comments. Replace a reviewer only when responsibility has genuinely changed.

How you know it worked

Click Approve department results and send to Plan & Report. Read the status and origin department in history. The Plan and Report Expert is the next reviewer.

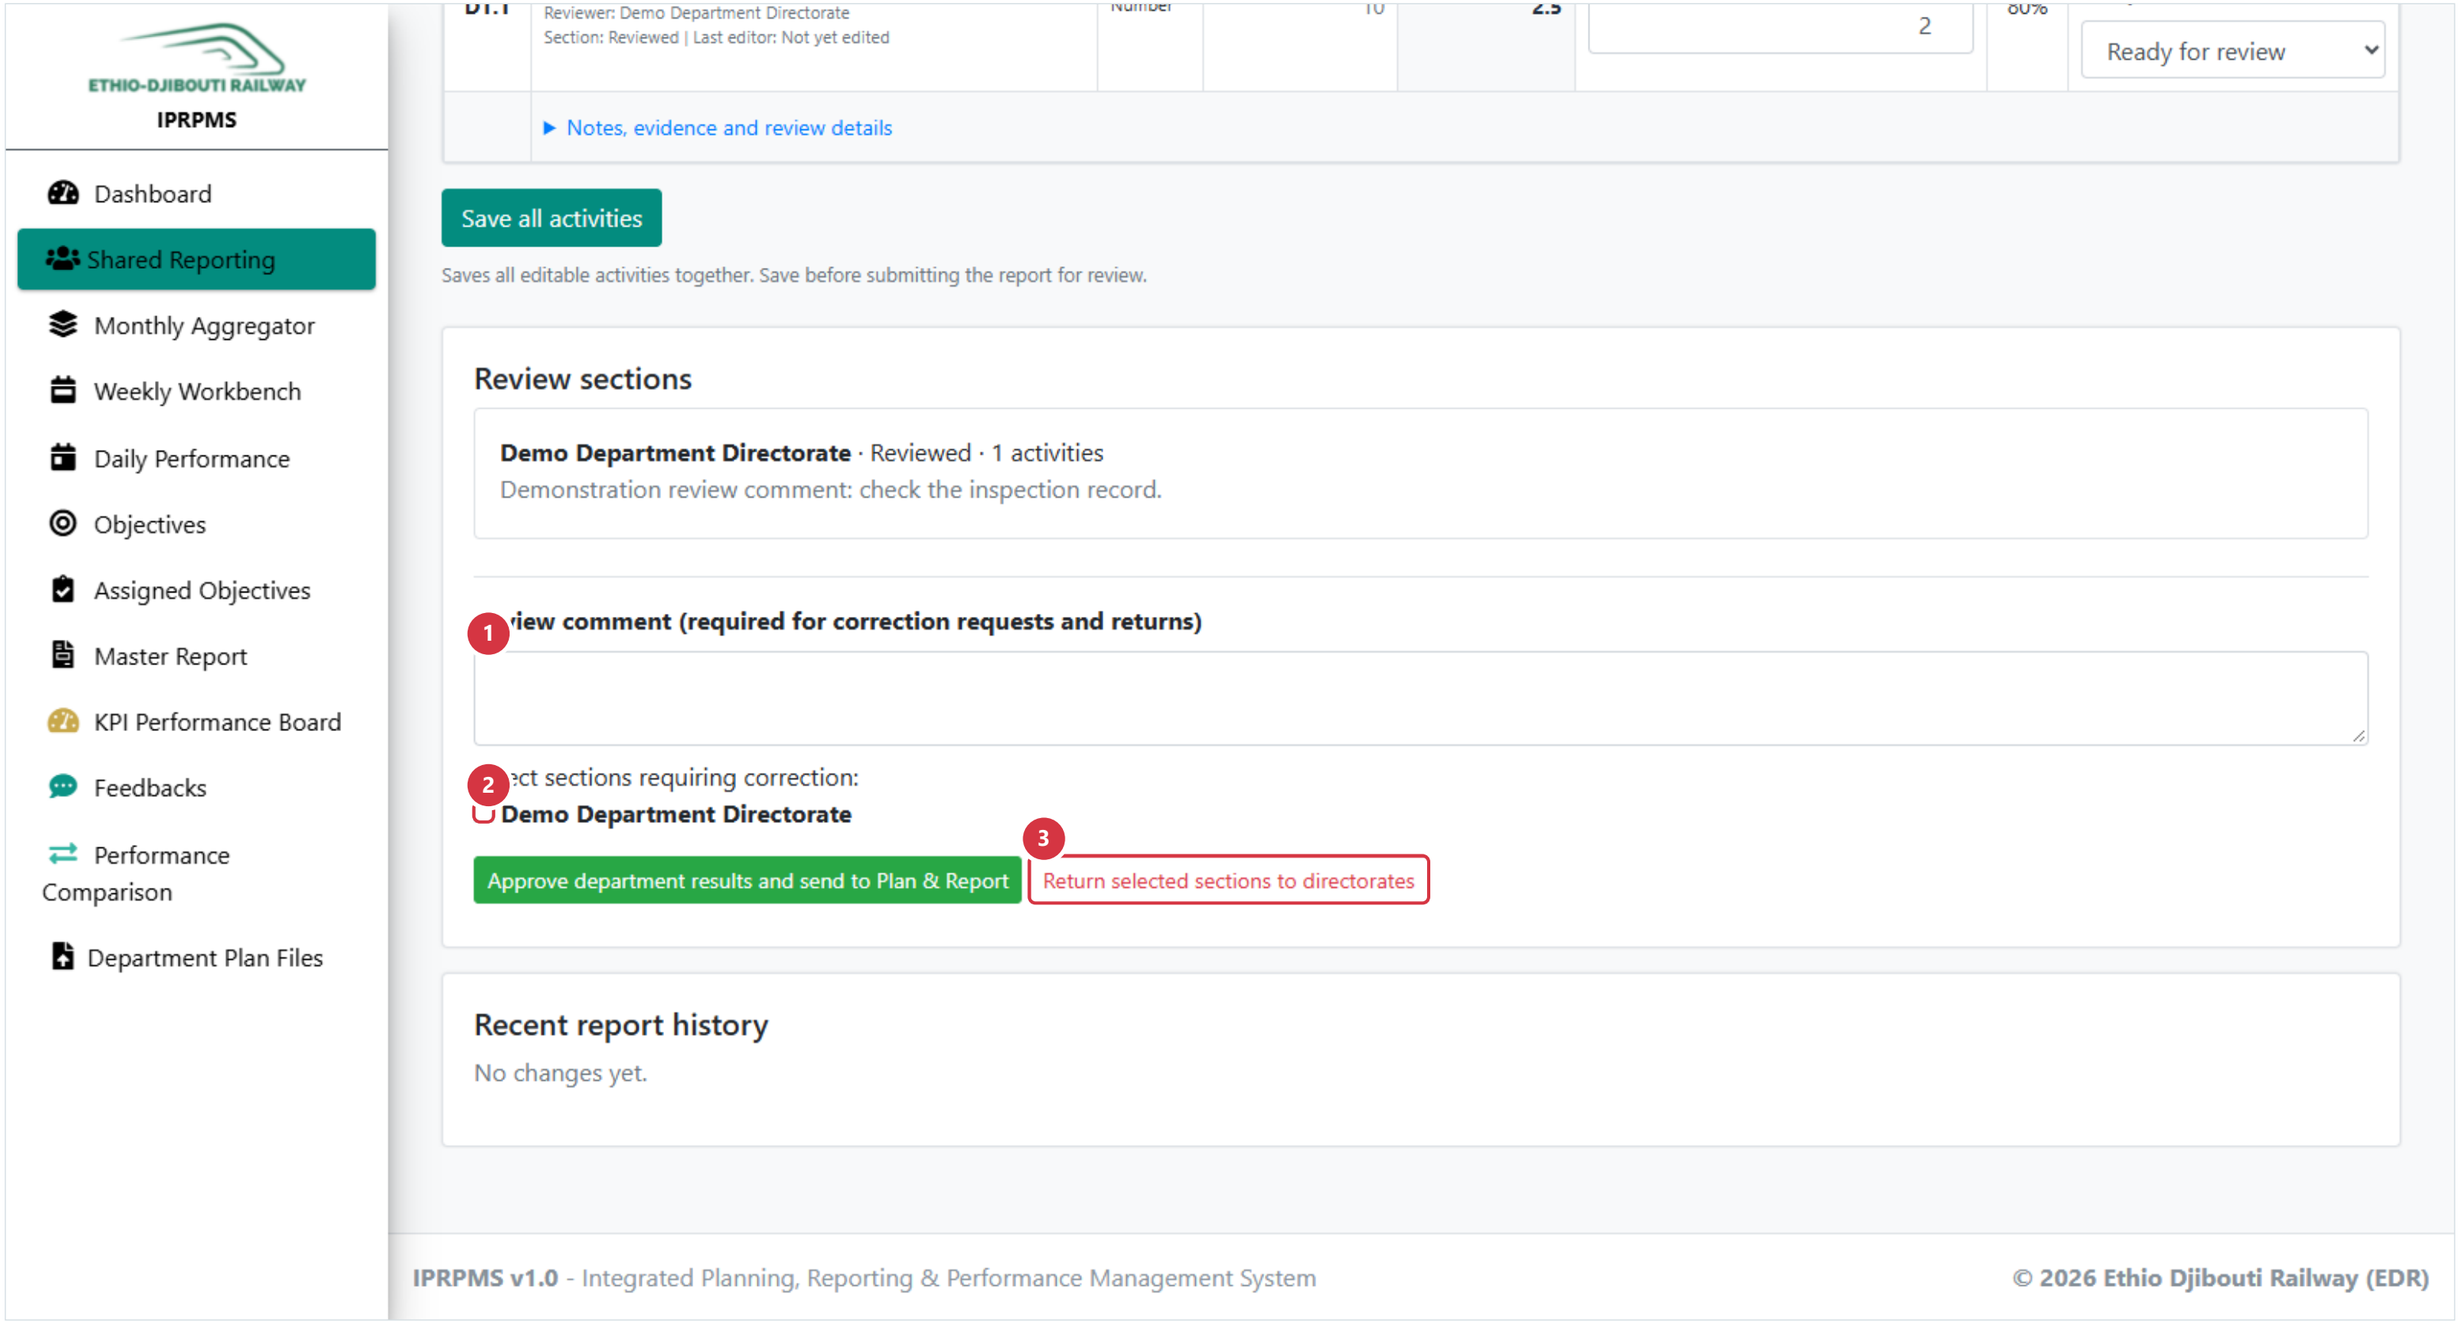

Chief: approve department results

1. Read the consolidated report and section decisions.
2. Enter a Review comment if needed.
3. Click Approve department results and send to Plan & Report.

After this step: The originating department stays visible in the report heading and subsequent notification.

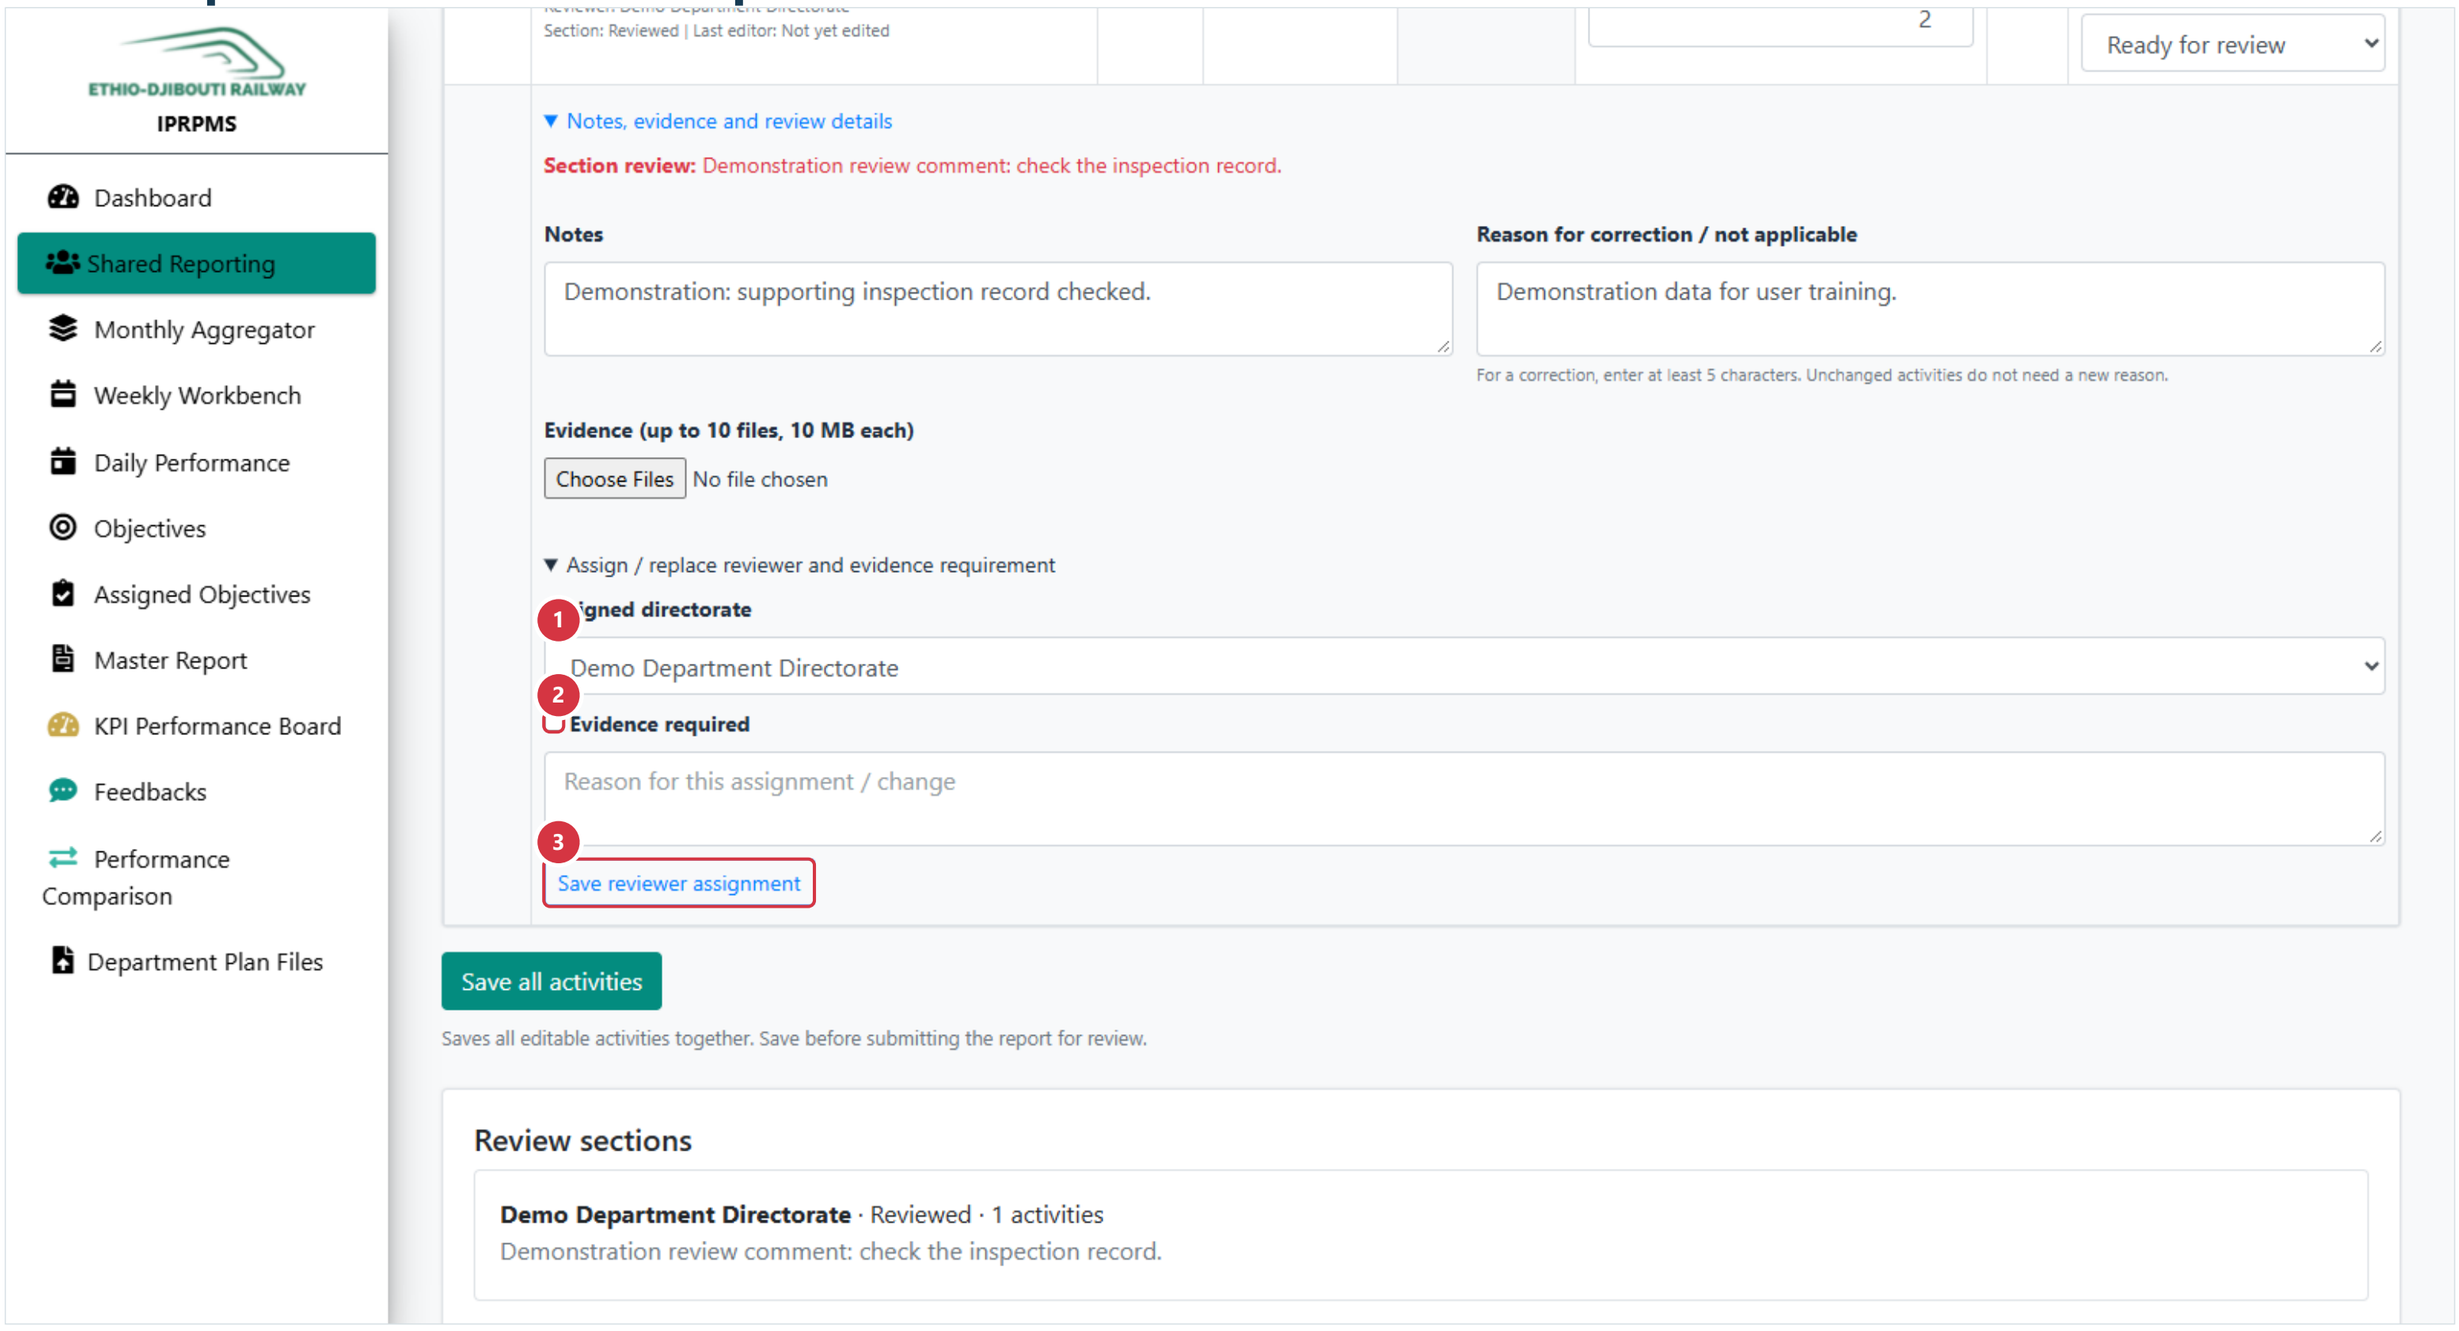

Chief: return selected sections to Directorates

1. Enter the correction in Review comment.
2. Tick the sections requiring correction.
3. Click Return selected sections to directorates.

After this step: Select the relevant sections so unaffected sections keep their approval.

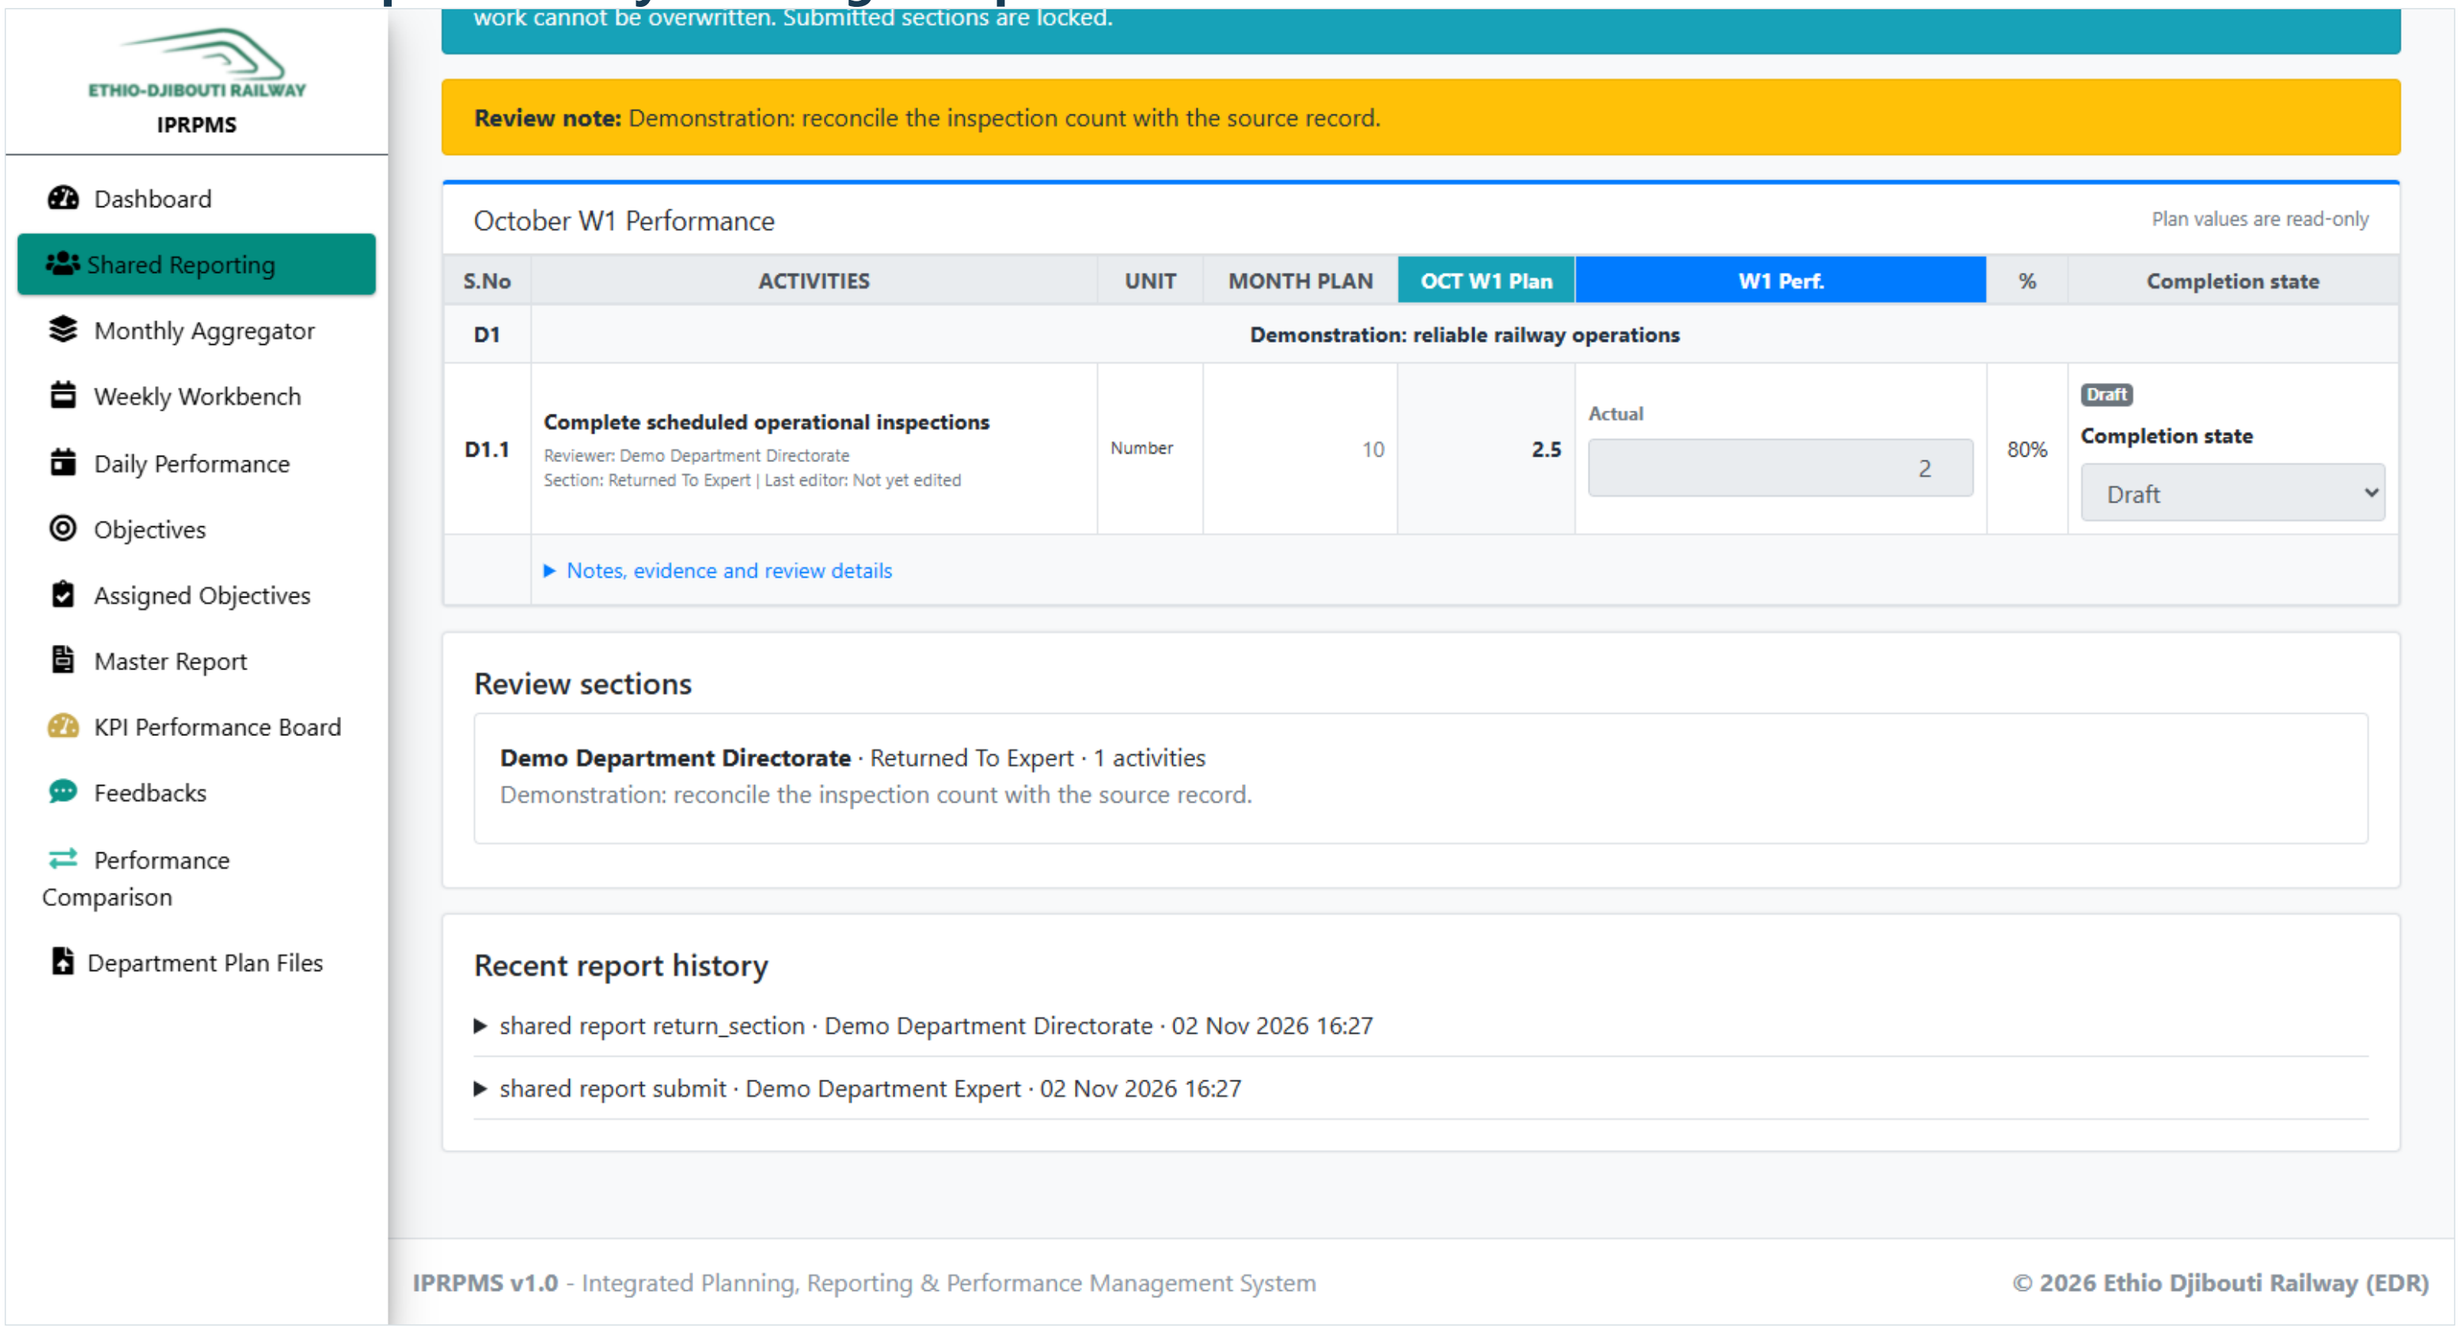

Chief: replace a reviewer or require evidence

1. Expand Notes, evidence and review details, then Assign / replace reviewer and evidence requirement.
2. Choose the Assigned directorate and set Evidence required as needed.
3. Enter the assignment/change reason and click Save reviewer assignment.

After this step: The replacement reviewer must review the section. Reload the report if a concurrent change makes your version stale.

Read the real report history and origin department

1. Confirm the originating department in the report heading.
2. Scroll to Recent report history.
3. Read the action, actor, time and recorded reason before following up.

After this step: The demonstration history records the actual form submissions used to produce this capture.

Share plan documents and read released feedback

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

File submission shares the department's plan document. Released feedback explains what Plan and Report wants improved.

Before you click

Choose the correct plan year and a clear document title. Upload only relevant files, without passwords or confidential personal details.

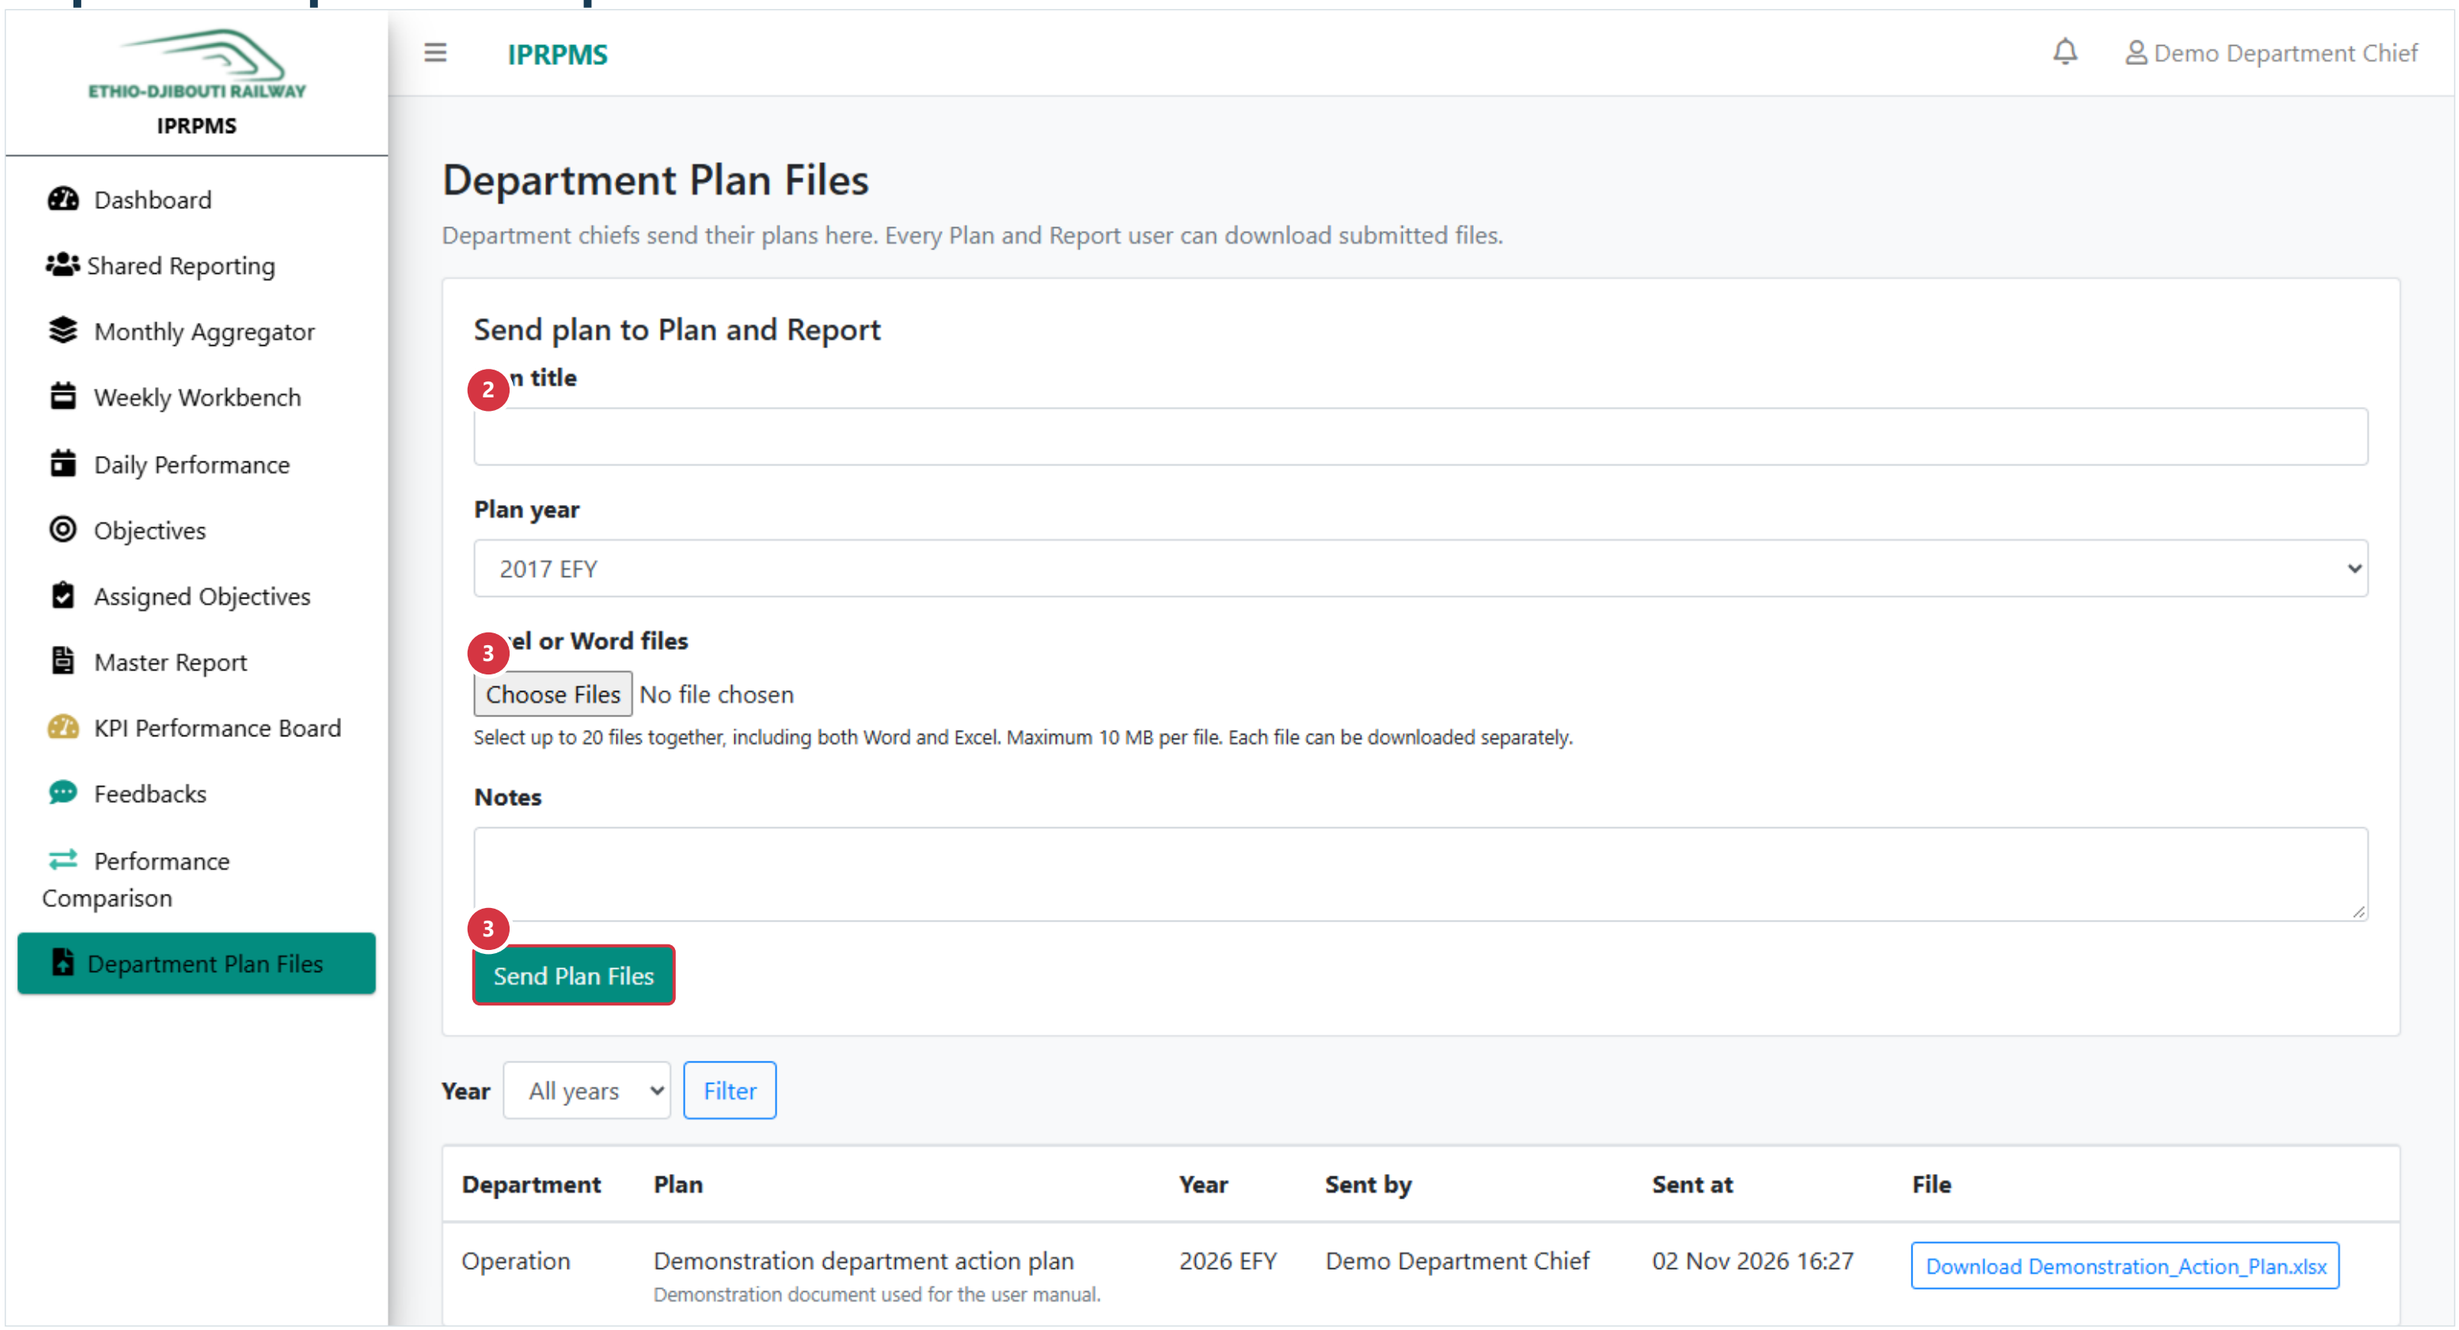

What to check

Check the department on the submission. For feedback, select the correct year and period and distinguish released feedback from internal drafts.

How you know it worked

Plan and Report can identify the sending department and download the file. Use the released feedback to agree improvements with Directorates and Experts.

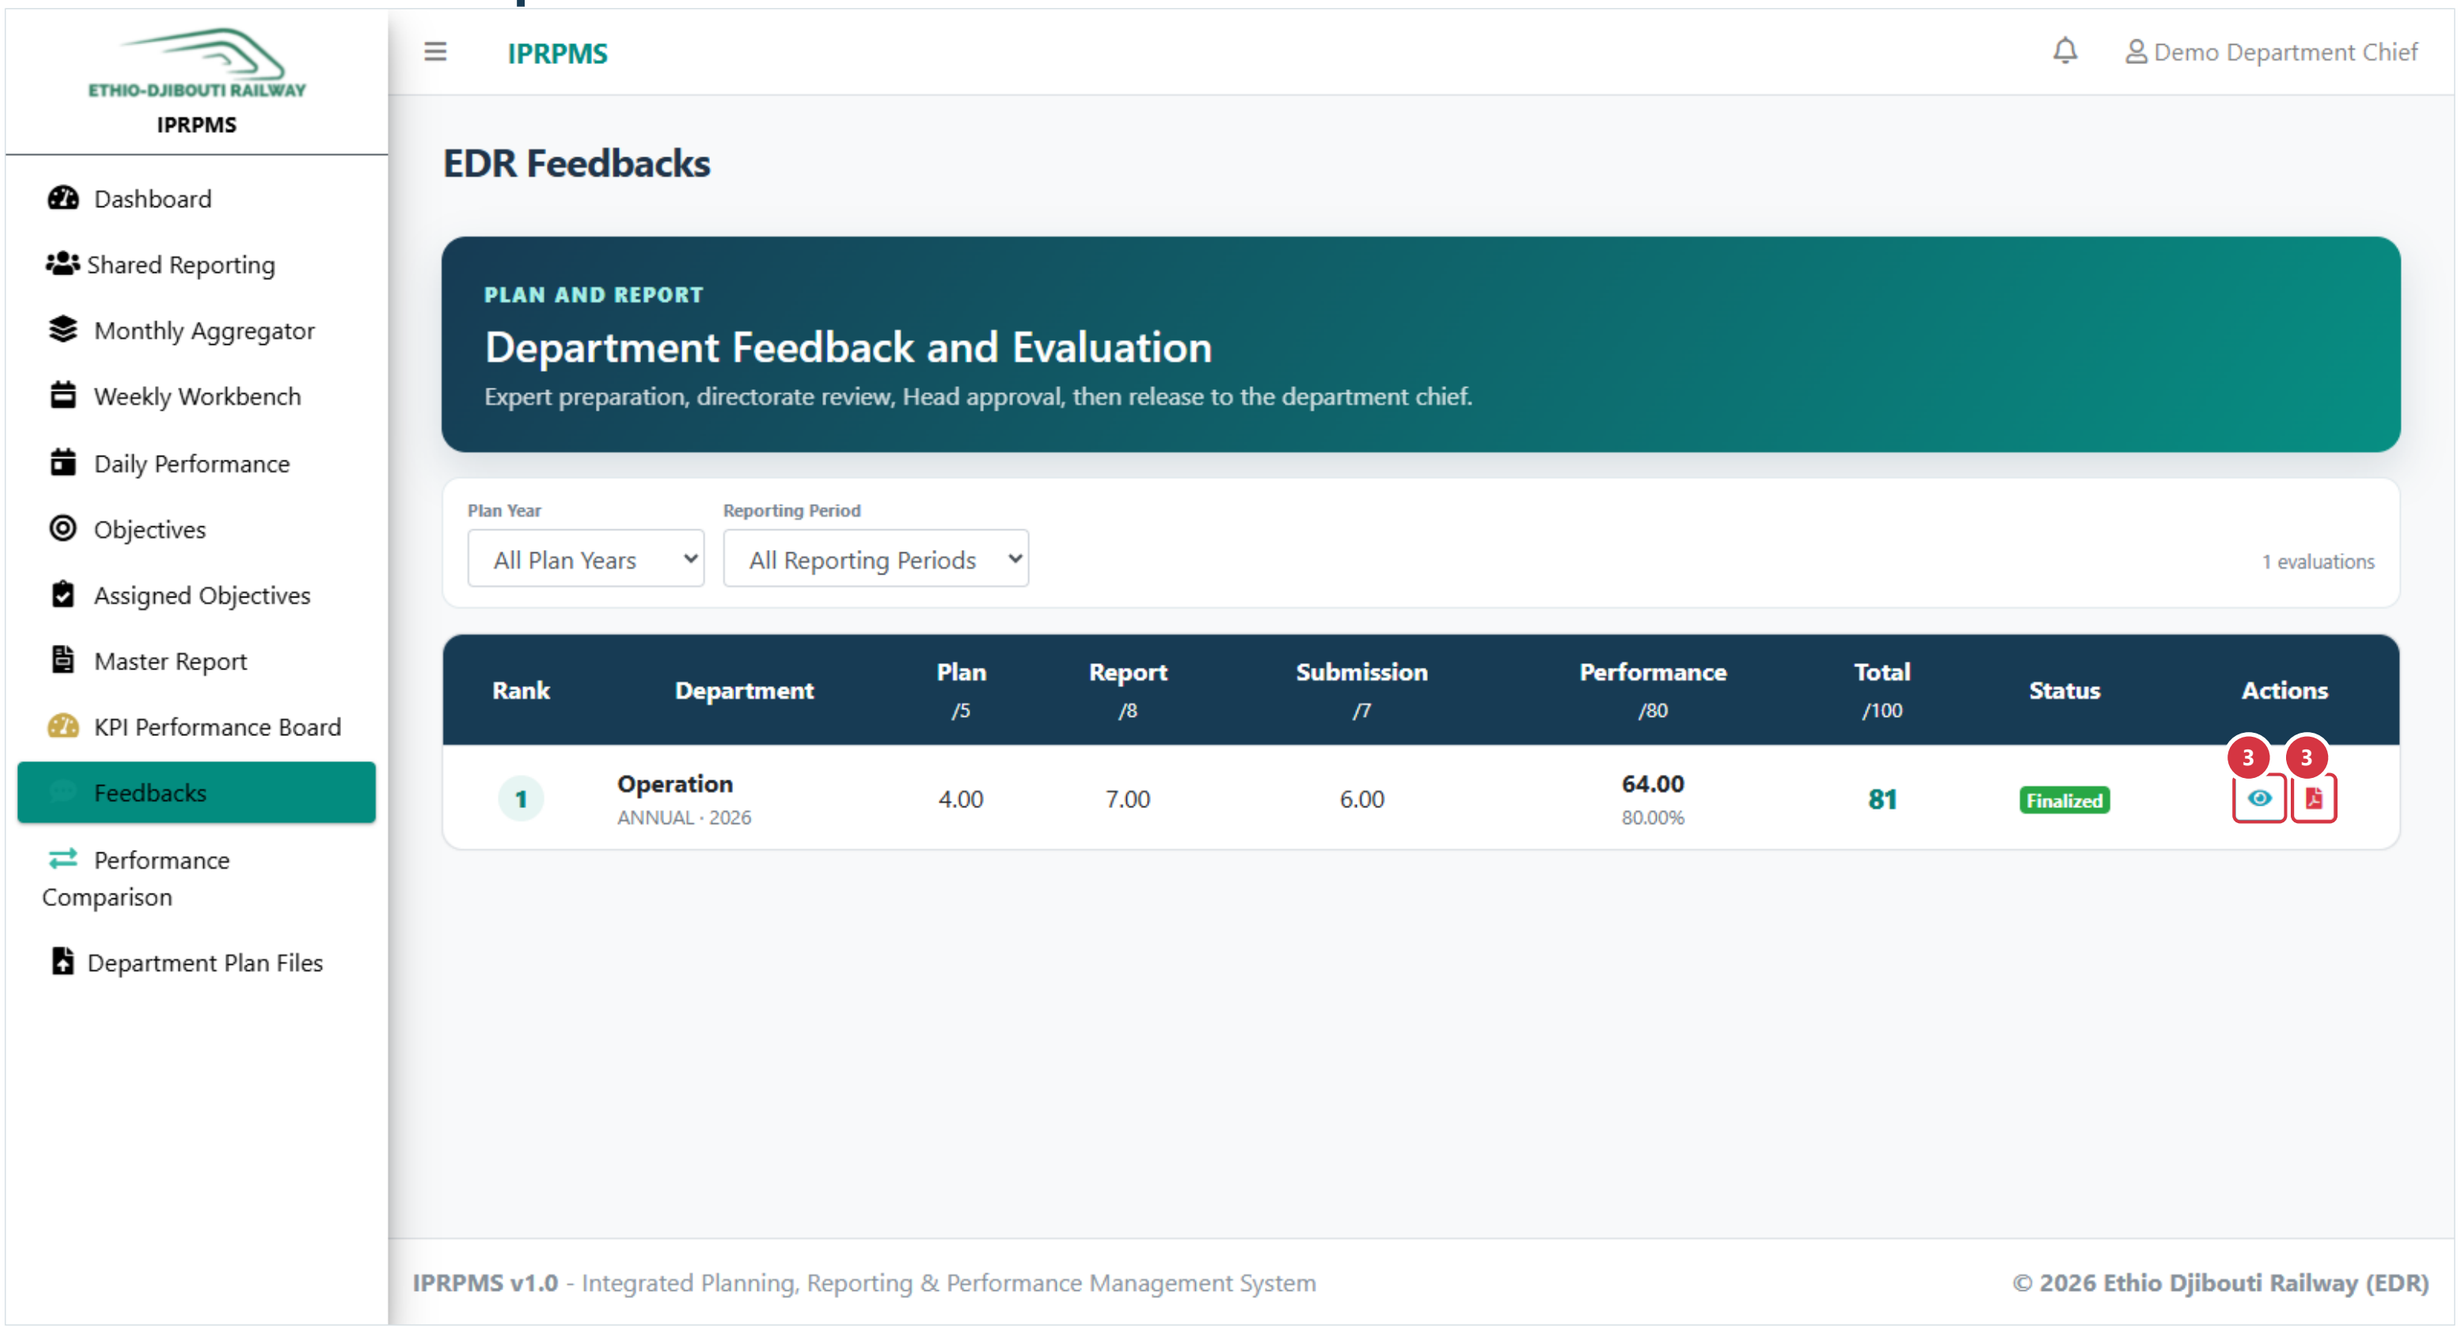

Department plan files: upload and send

1. Enter Plan title and choose Plan year.
2. Choose the Excel or Word files and enter Notes where needed.
3. Click Send Plan Files.

After this step: Select up to 20 files together, each at most 10 MB. The submitted files appear individually in the list.

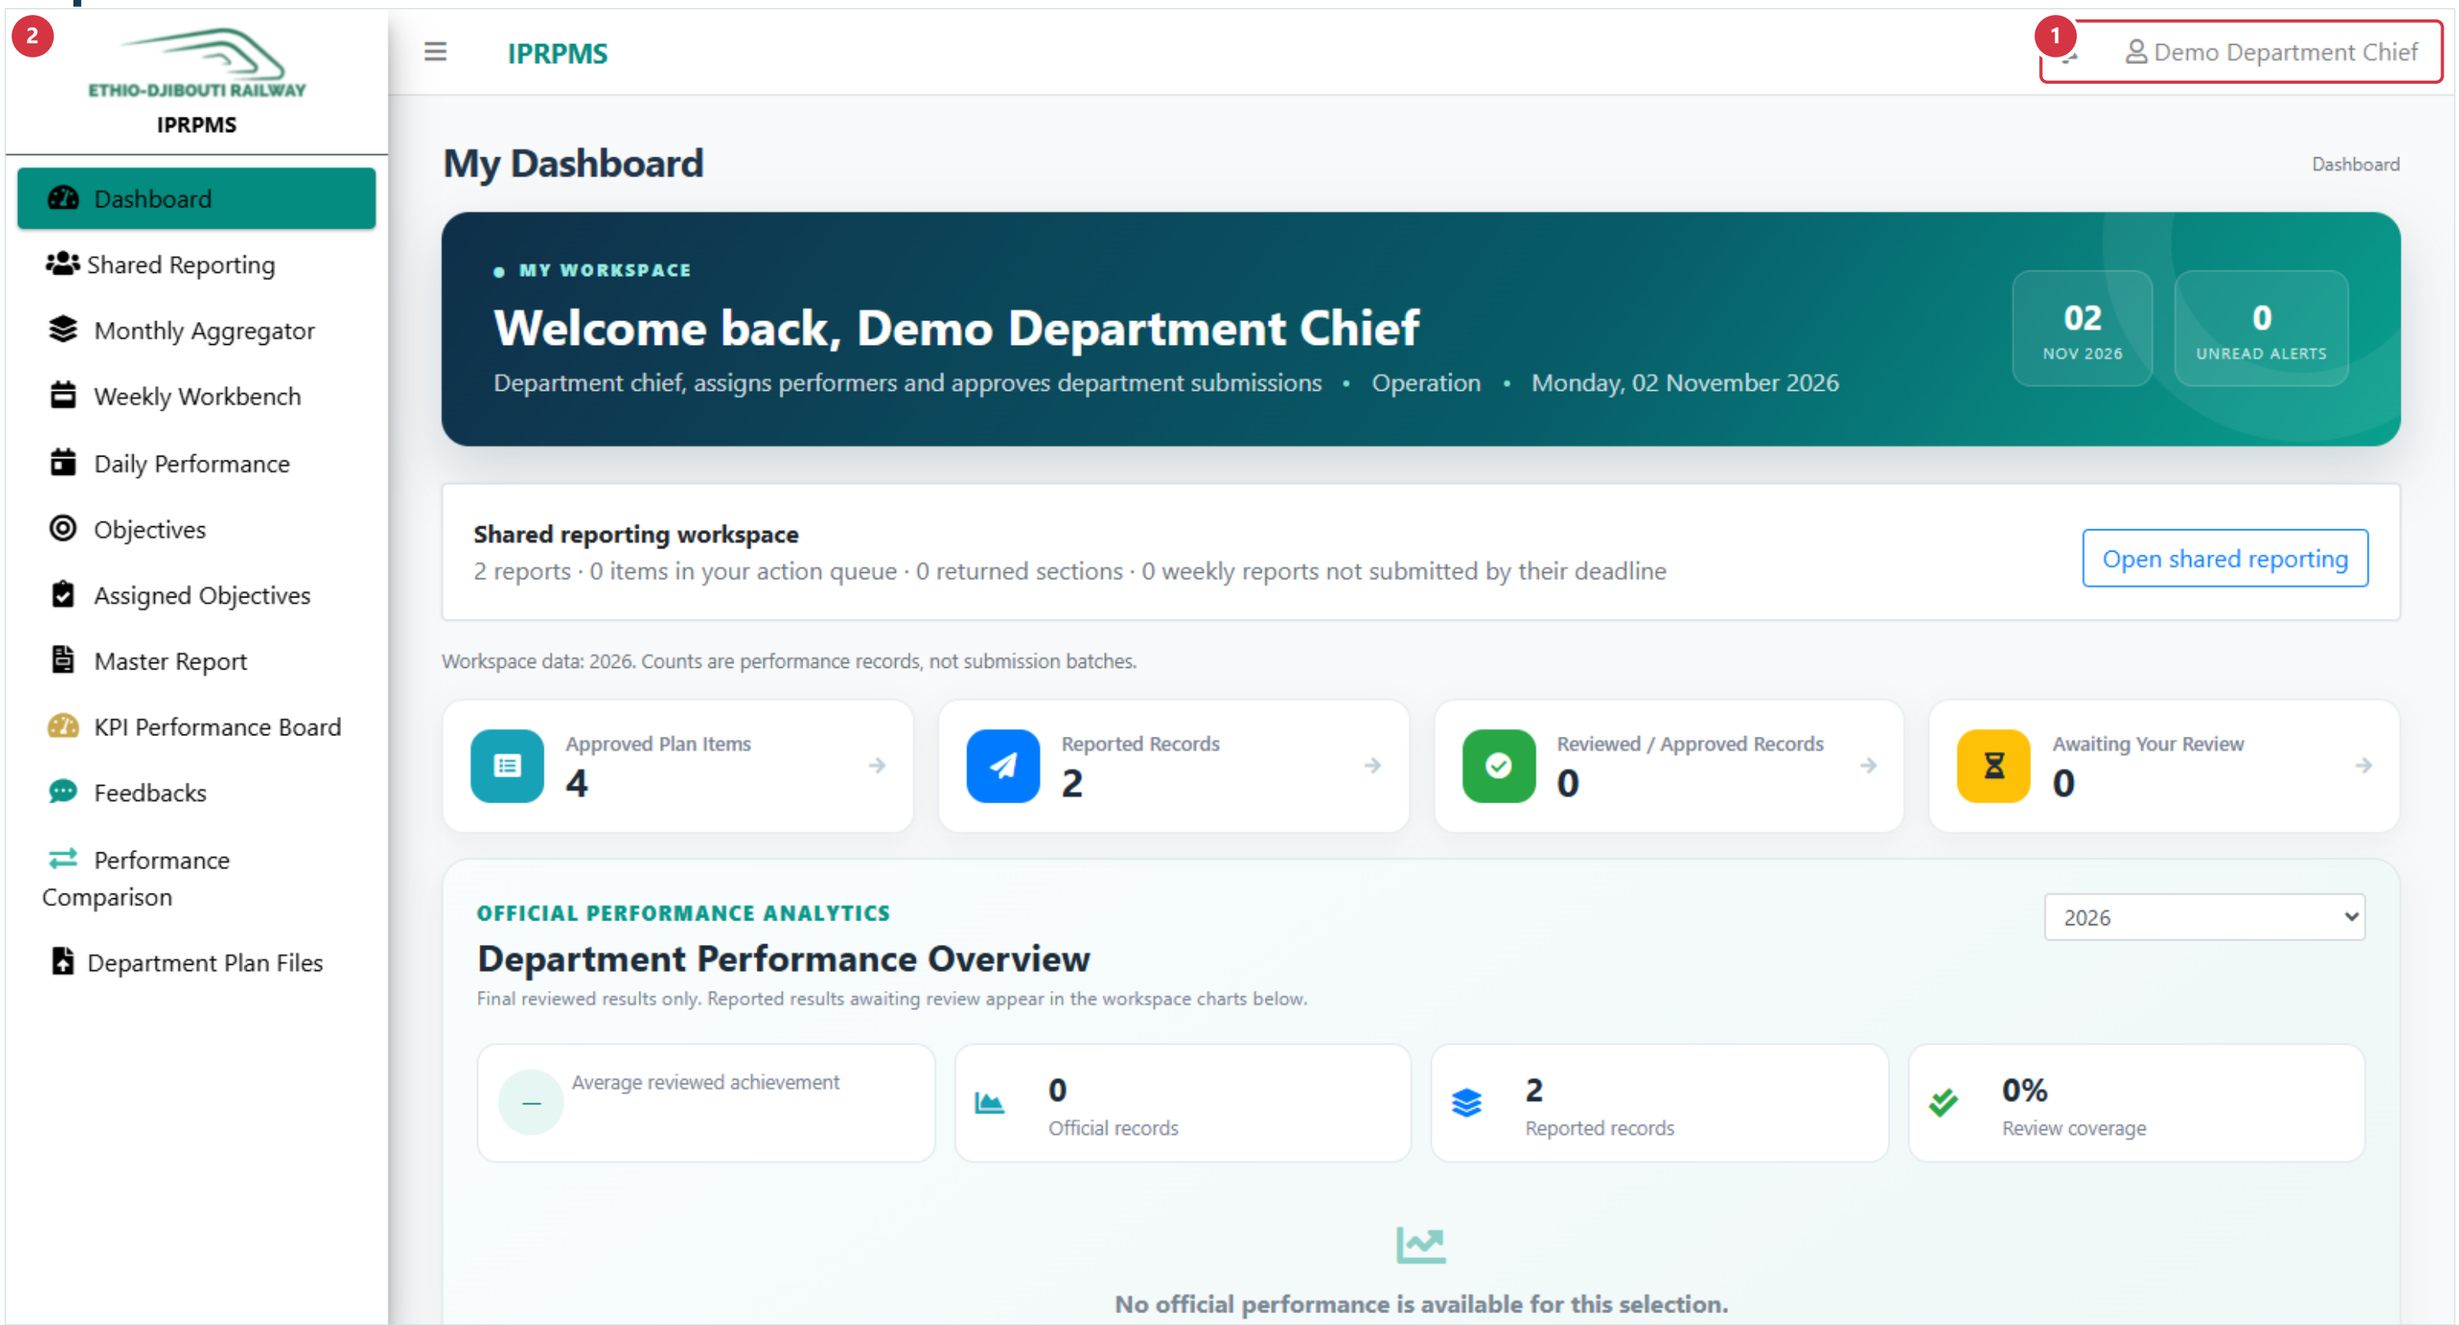

Chief: read official departmental feedback

1. Open Feedbacks.
2. Locate the finalized evaluation for your department.
3. Use View or PDF to read its findings and scores.

After this step: Department Experts do not receive the same draft evaluation access as the Plan and Report preparation roles.

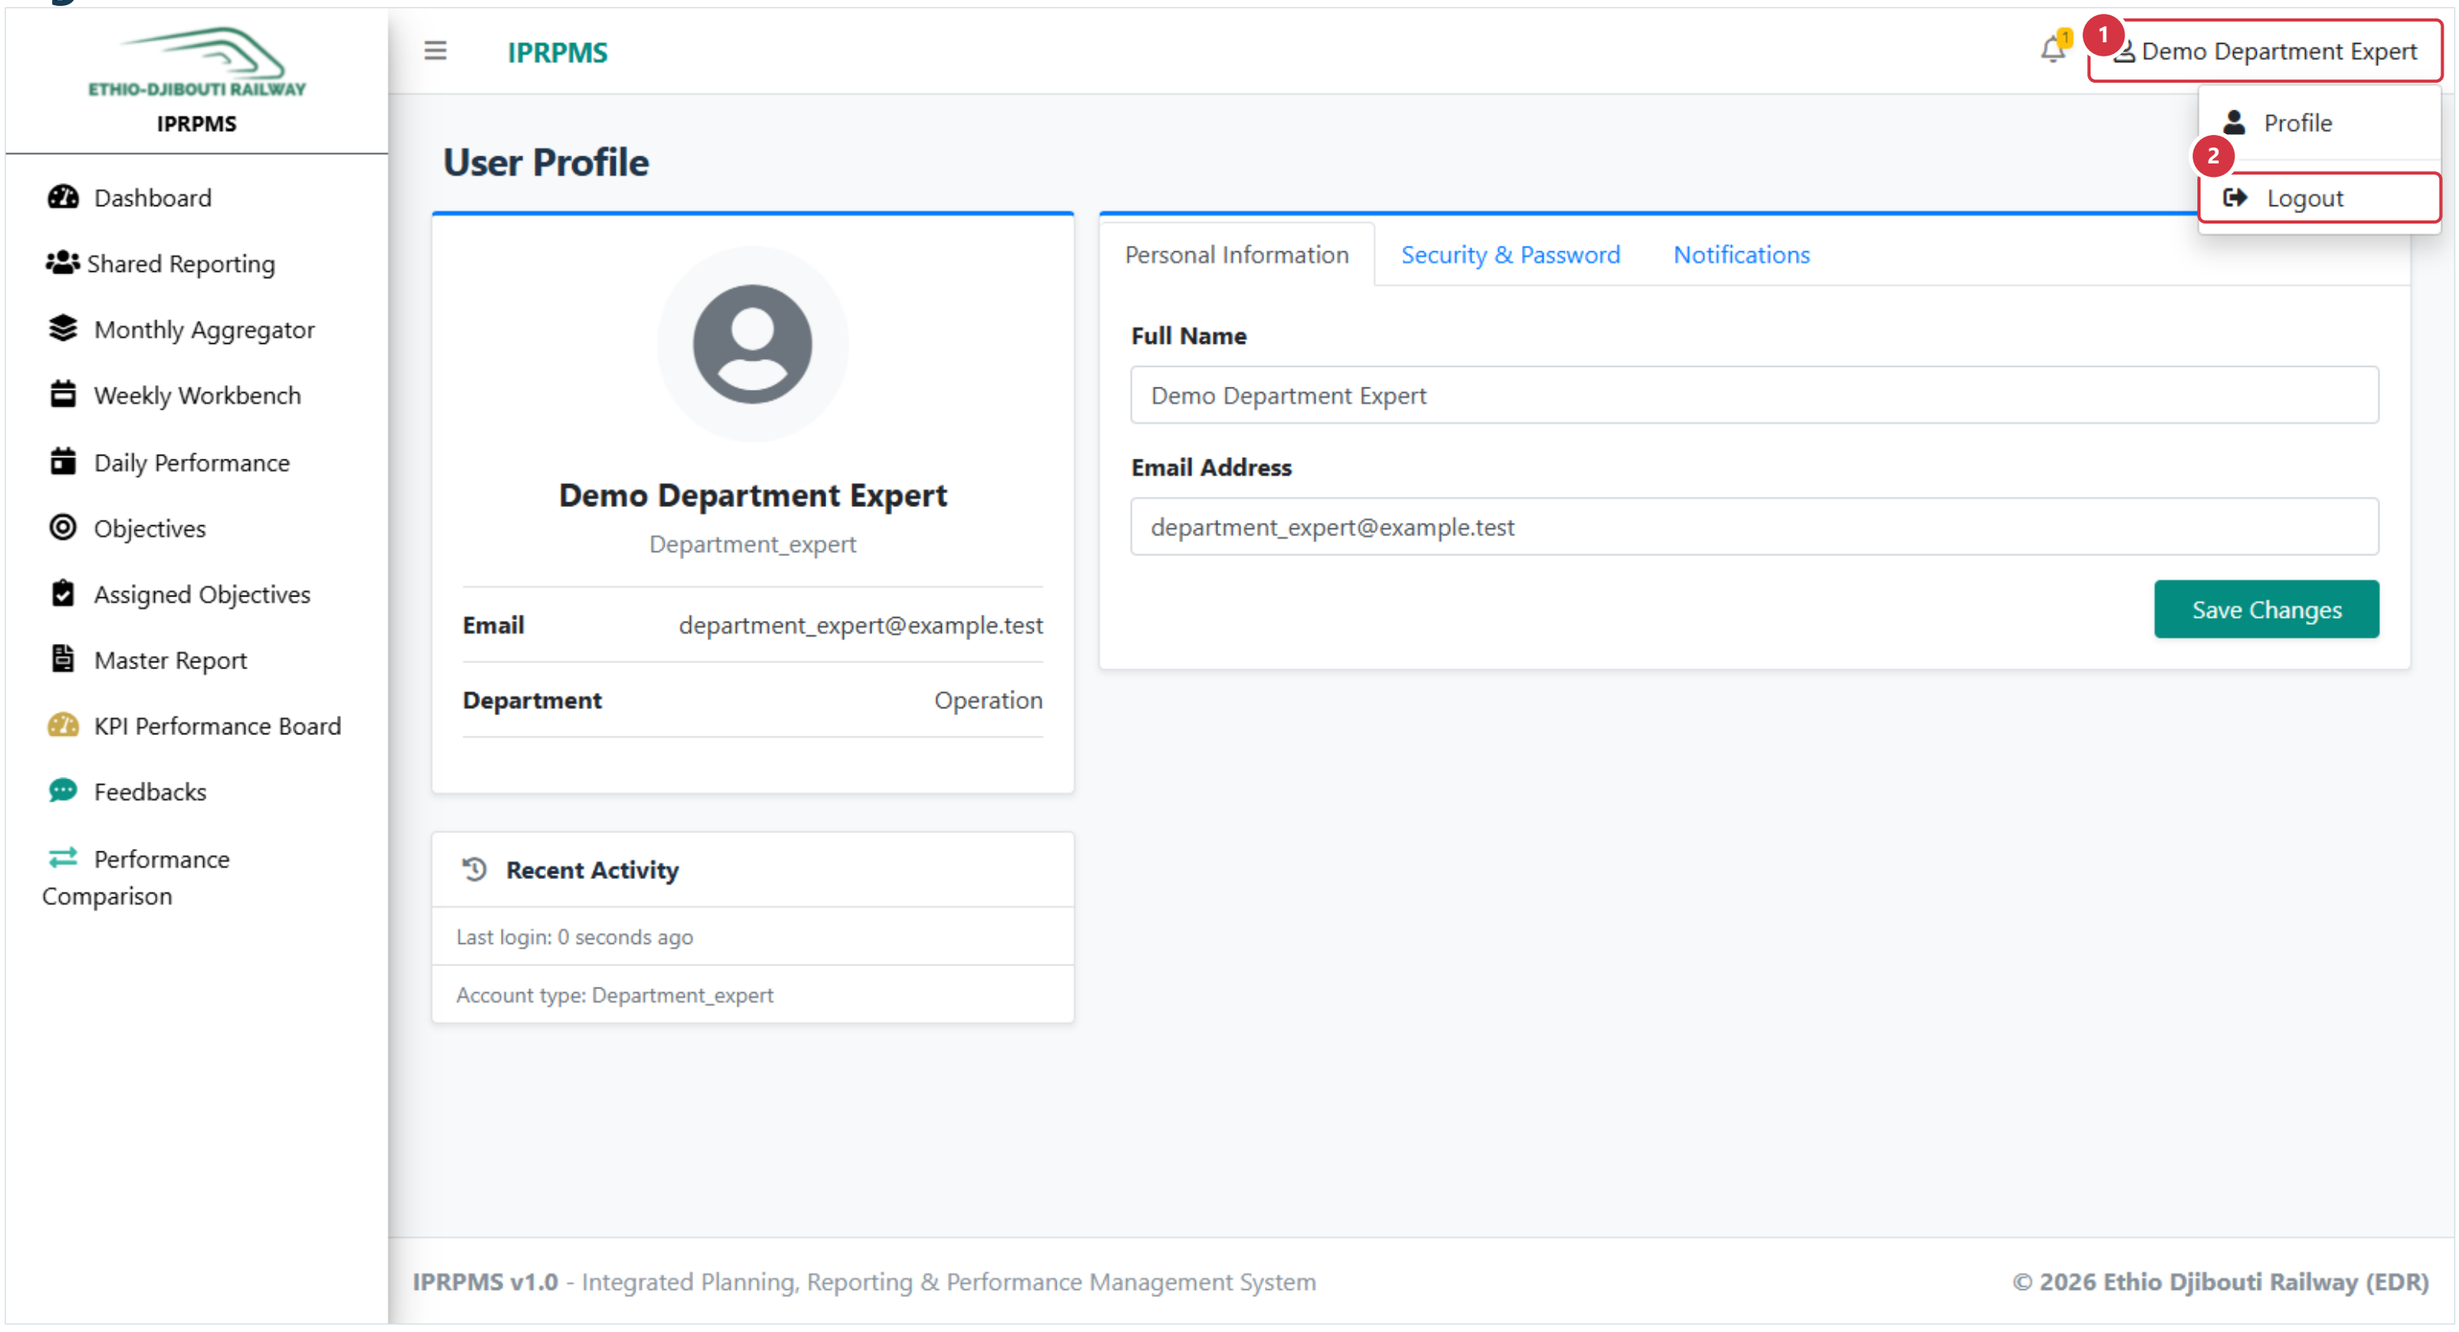

Department Chief: home screen

1. Confirm your signed-in role at the top right.
2. Approve and assign departmental objectives to Directorates. Select the reporting coordinator and backup.
3. Review department results, return selected sections or send the approved report to Plan and Report.

After this step: Menus vary by permission, department and reporting frequency.

Sign out on a shared device

1. Click your name at the top right to open the user menu.
2. Click Logout after you finish your work.

After this step: The application returns to the sign-in screen after logout.

Before you finish, check these four things

Finish means your part is complete and you know who has the next action. It does not always mean the whole record is finally approved.

Your completion checklist

1. All activities have the intended Directorate. 2. Coordinator and backup are active, distinct Experts in my department. 3. All required performance sections have been checked. 4. My decision and any return reason identify the correct period and department.

If a menu or button is missing

A correction from Plan and Report must remain on the same report. Route the affected work through the responsible Directorate and Experts; do not replace the submission with a duplicate.

Ask for help with useful details

Give IT or the responsible reviewer the module, department, year, reporting period, objective or record reference and exact message. Include a safe screenshot. Never send your password.

Keep the process and data safe

Use your own account, save before sending, read return comments and keep the same record for corrections. Demonstration screenshots are teaching examples, not official performance figures. The separate logistics Import/Export module is excluded.
