Plan & Report Expert

Your responsibilities, complete workflow, exact clicks and return paths.

Read first: the Start Here guide explains how the whole system works. Then use this manual to do your part, check the outcome and hand work to the right person.

Understand your job before the buttons

Keep this page in mind whenever you receive a new record. It explains your responsibility and where your part stops.

Your job

Prepare a clear, measurable organization plan; check departmental results; and prepare period weights, reports, feedback, comparisons and plan narration.

What you receive

The approved planning source, department assignments and plan files, Department Chief-approved results, and comments from the Plan and Report Directorate or Chief.

Who receives your work

Planning drafts, proposed weights and written documents go to your Directorate. Weekly/monthly performance review or correction requests also go through your Directorate, not directly back to the Department Chief.

Your limits and important distinctions

You prepare and review; you do not give final organization approval. Numeric performance, plan objectives, period weights, narration, reports and feedback are separate records with their own statuses.

Your workflow, from first action to finish

Read down the page. Each step has an outcome; do not jump ahead simply because a button is visible.

1

Prepare the plan

Create or upload main and sub objectives with correct units, targets, periods, weights, performers and frequency.

2

Submit and resolve review comments

Submit in Objectives. Read reviewer edits and returns. Request recall when a submitted draft needs to be reopened.

3

Receive departmental results

Check the source department and period after its Chief has approved the consolidated results.

4

Complete the performance review

Use Reviewed - No Correction Required or Request Correction Through Directorate with a precise comment.

5

Prepare supporting documents

Draft weights, narration, written reports and departmental feedback; save and send each through its own workflow.

6

Read approved results and comparisons

Use compatible periods, units and approved KPI mappings. Describe gaps honestly and do not treat missing values as zero.

Find the task you need

Use the page number or click a task name in the PDF. Section introductions explain the purpose before the screen-by-screen actions.

First access and everyday account safety 5

Build the annual plan: main and sub objectives 11

Optional: prepare objectives from an action-plan workbook 20

Submit the plan and keep changes traceable 24

Review the department's performance submission 33

Prepare period weights without changing annual weights 36

Prepare the written performance report 39

Prepare formal feedback for a department 45

Write and download the organization plan narration 49

Read comparisons without comparing unlike results 55

Prepare a historical KPI match for review 65

Read the department's submitted plan files 67

Completion checklist and help 71

First access and everyday account safety

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

Use your own account. Your department and role decide what you can see and which decisions you can make. Never use somebody else's account to reach a missing button.

Before you click

Have your official account details ready. Open the address supplied by IT, enter your email and Access Key, then click Authenticate. A first-password screen appears only when your account requires it.

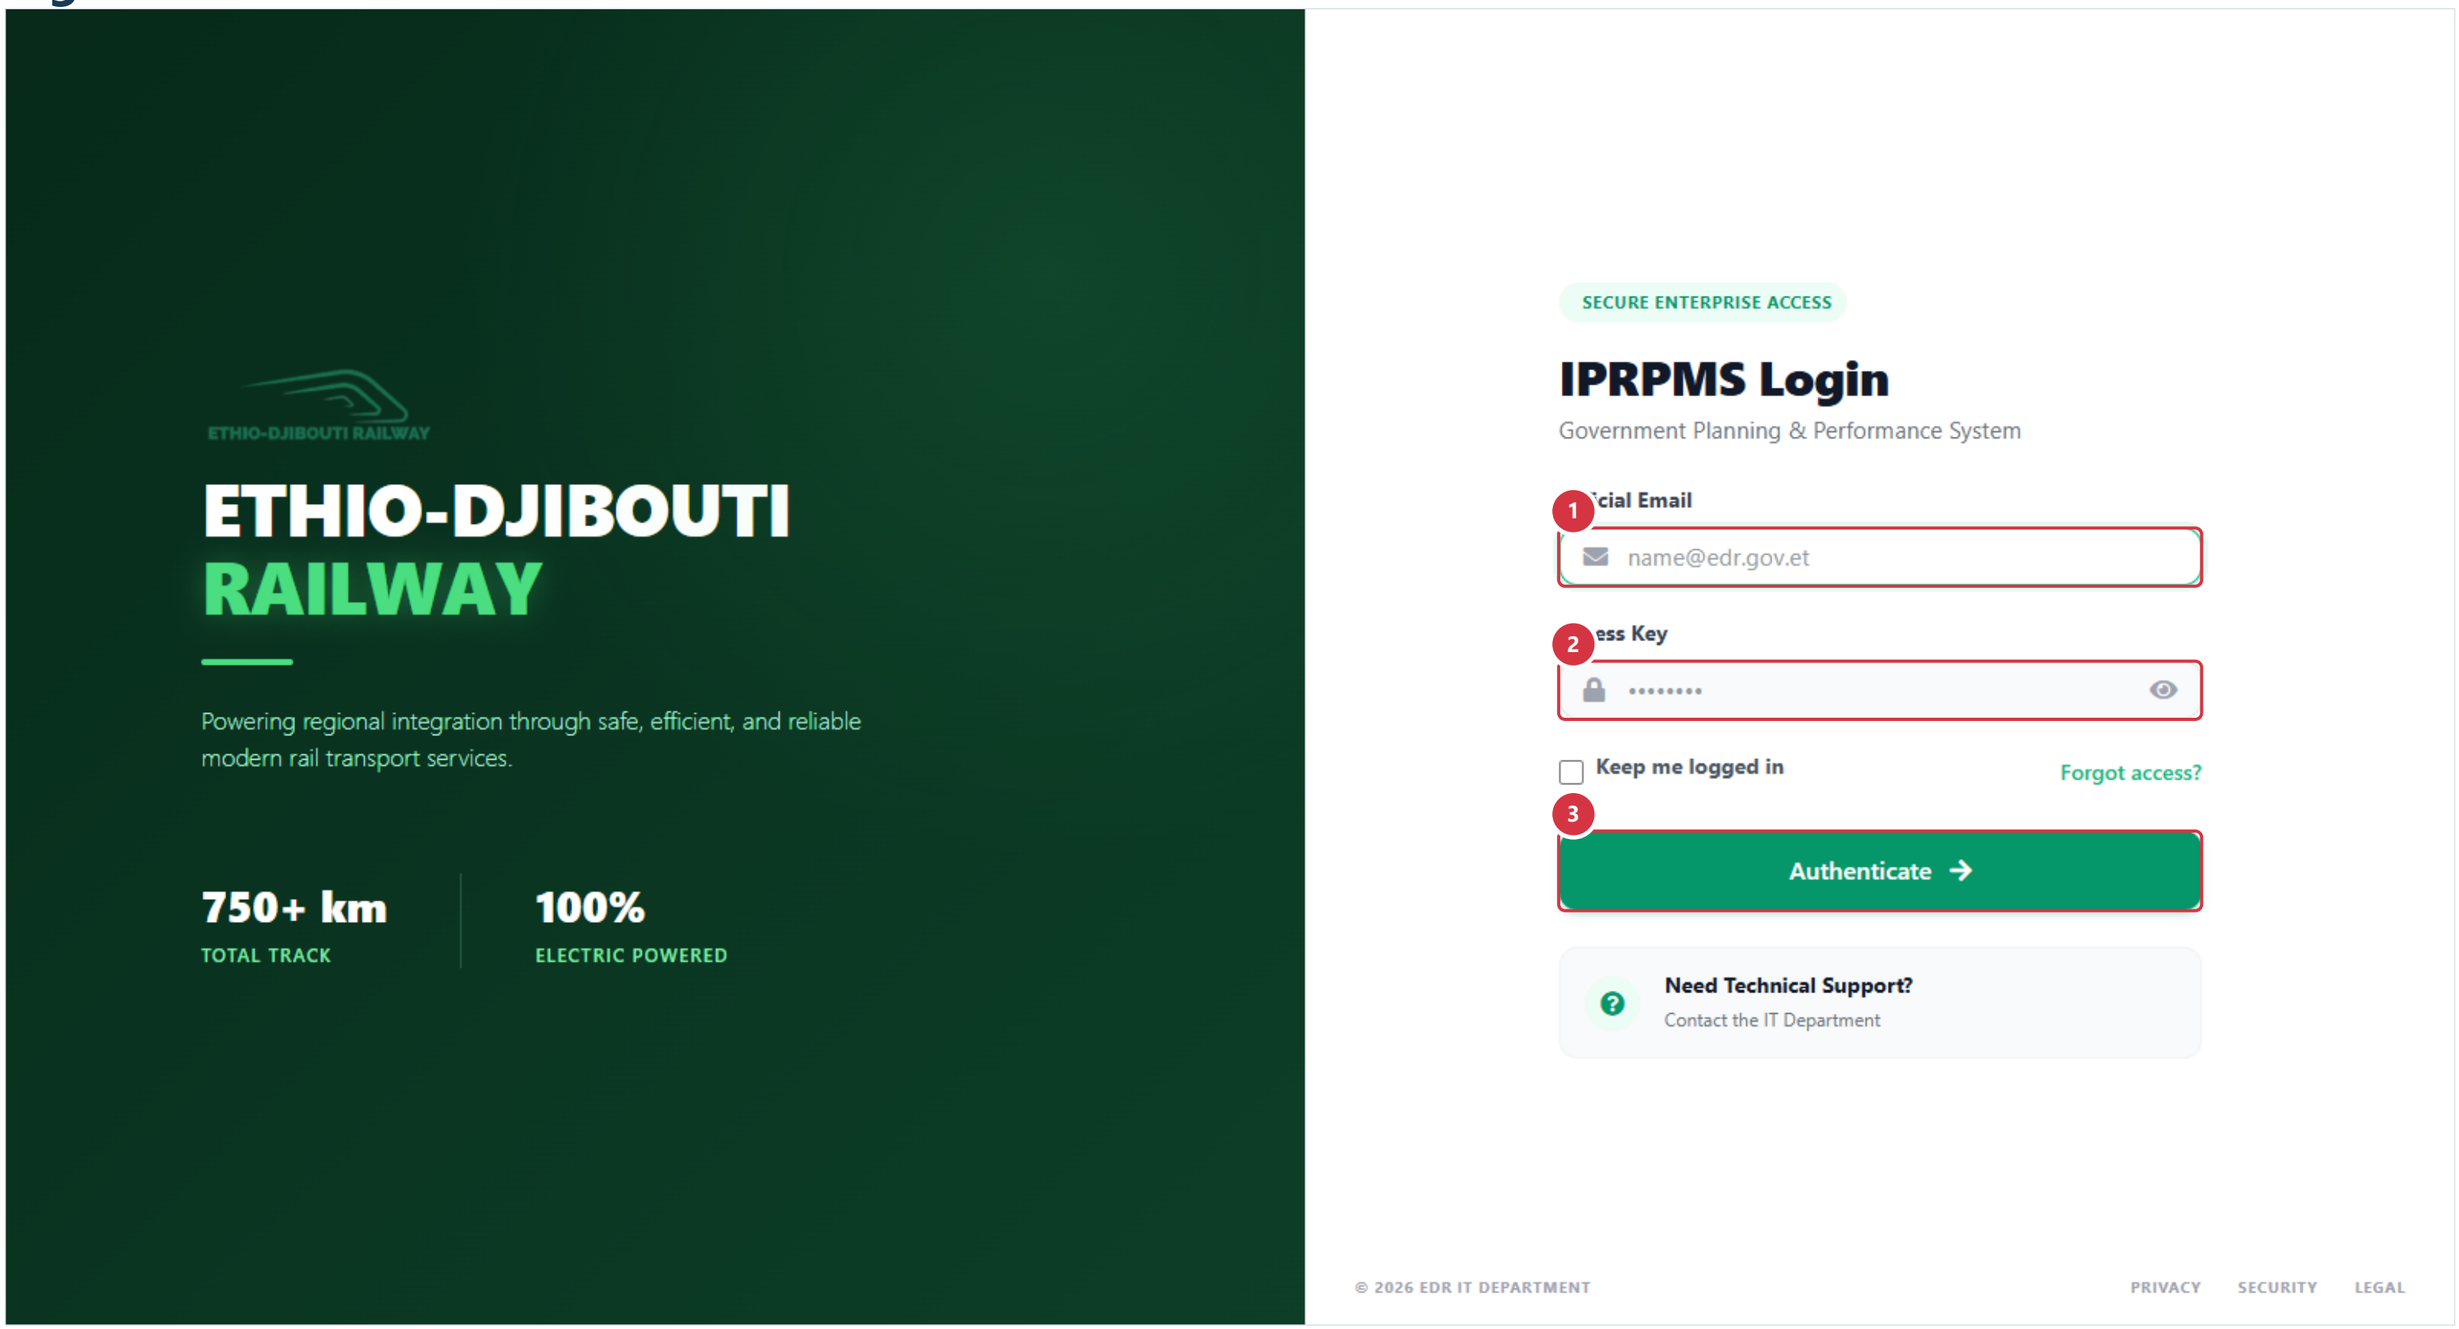

What to check

Check the name and role at the top right. Change your temporary password when prompted. Your profile is for your own name, email and password; department and role changes belong to the administrator.

How you know it worked

You can open the dashboard with the correct account. The notification bell shows work sent to you. On a shared computer, sign out when finished and do not choose Keep me logged in.

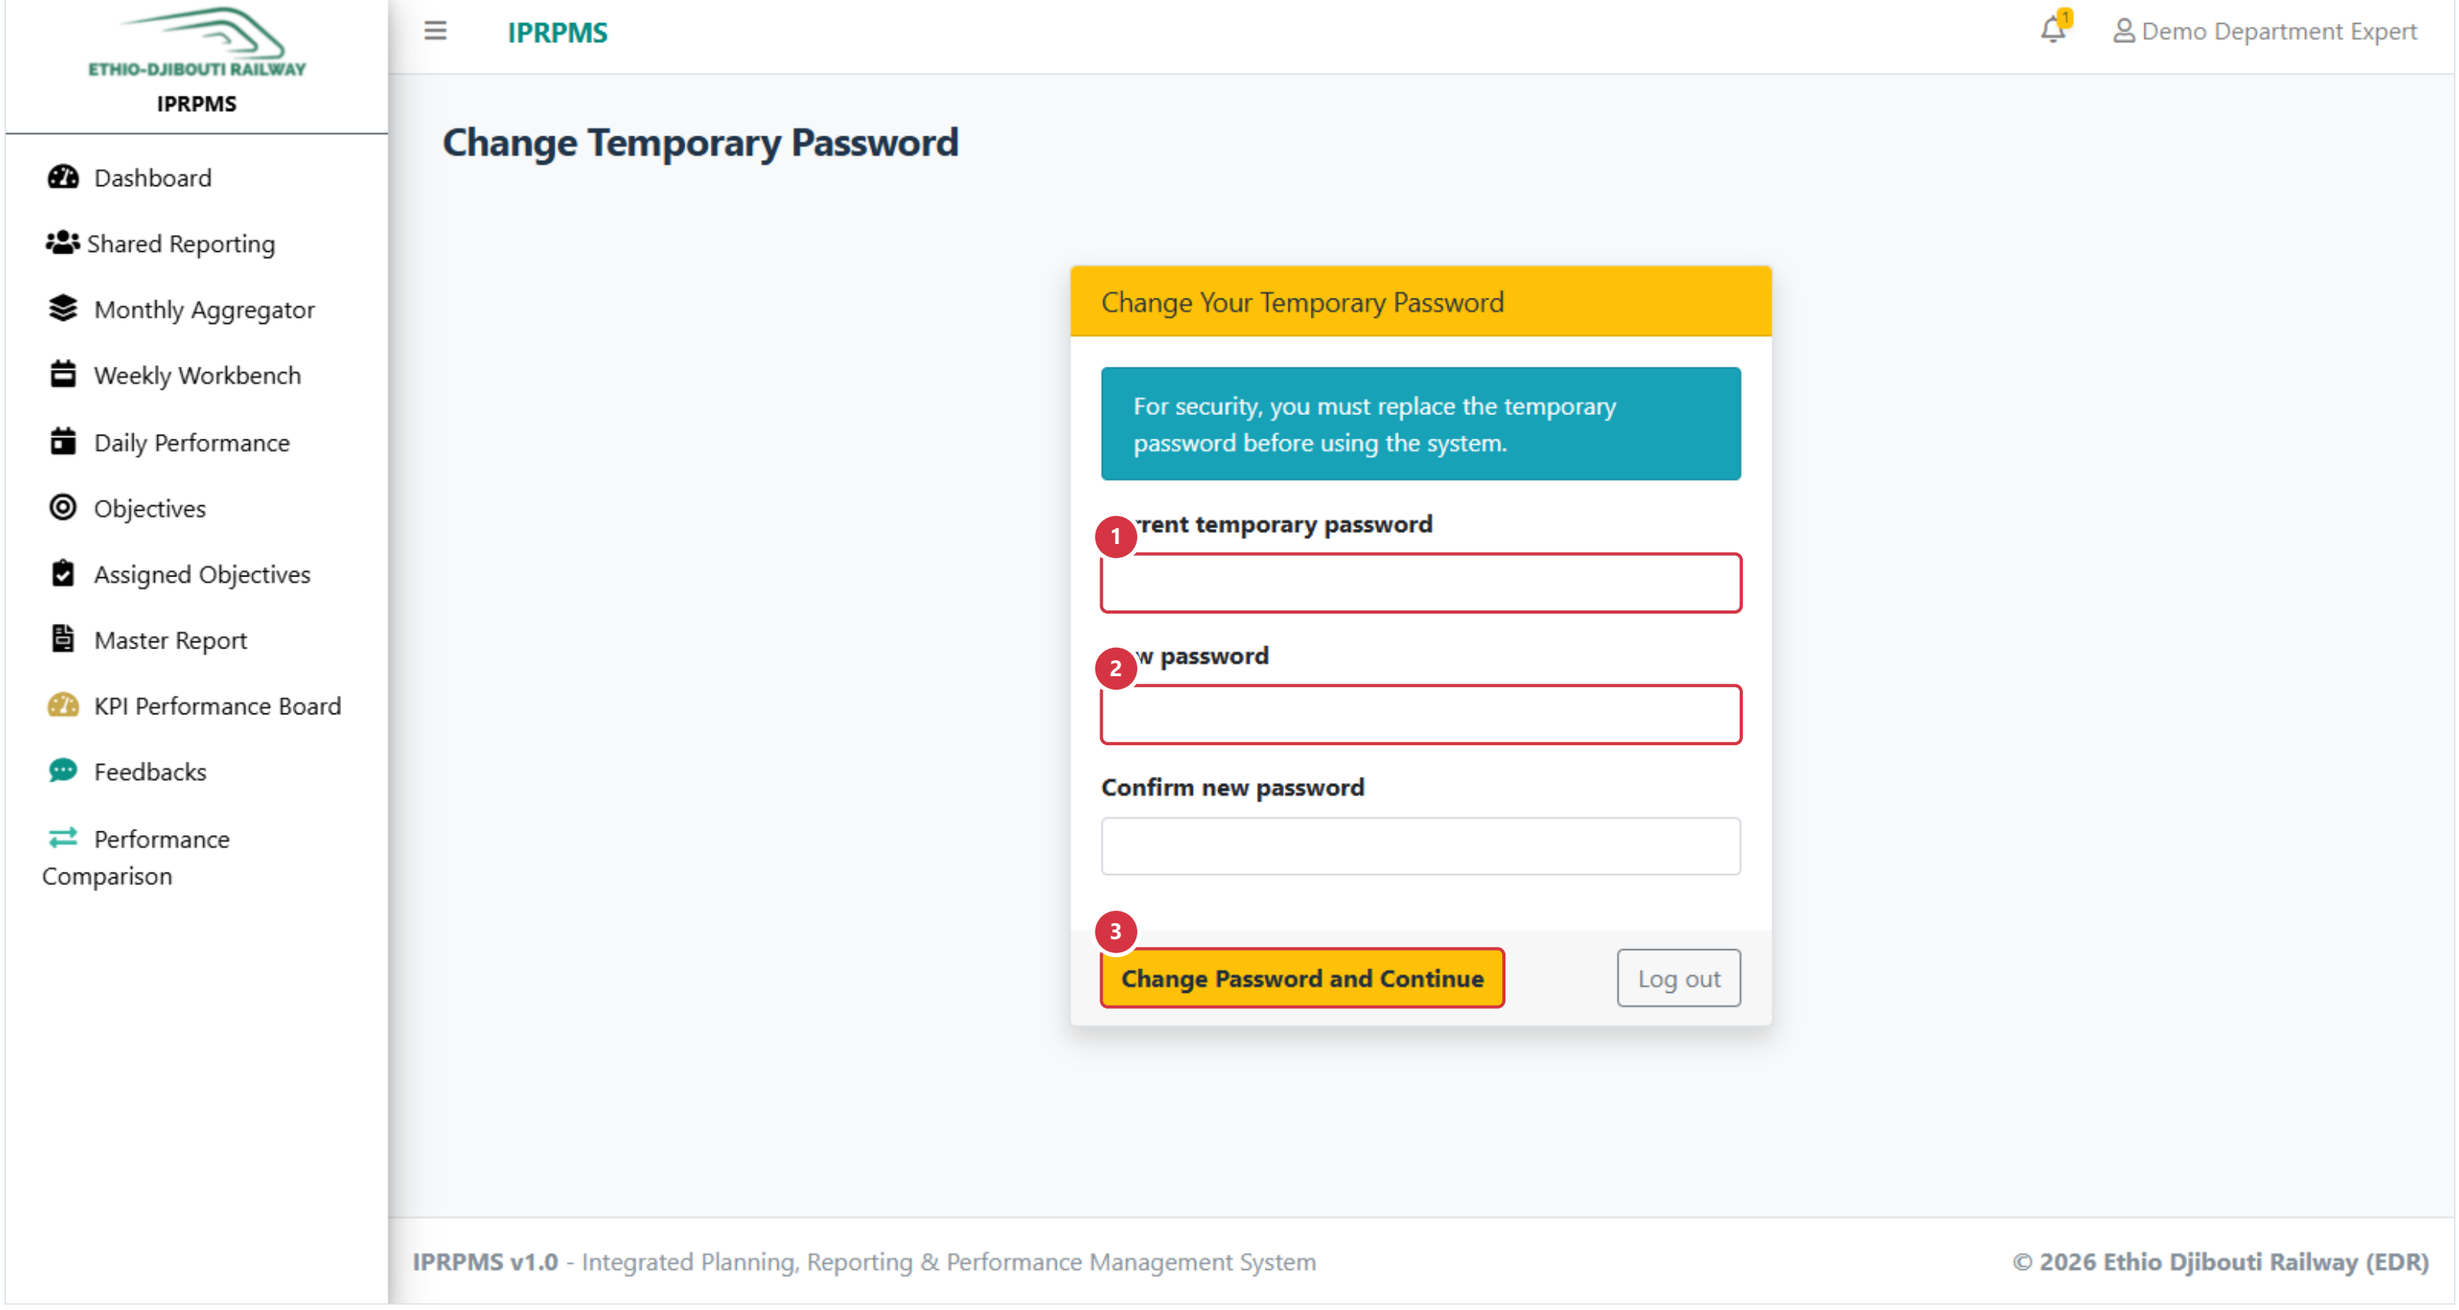

Sign in to IPRPMS

1. Enter your official email in Official Email.
2. Enter your own access key in Access Key.
3. Select Keep me logged in only on your own device, then click Authenticate.

After this step: The dashboard opens after authentication. Password fields in this handbook remain blank.

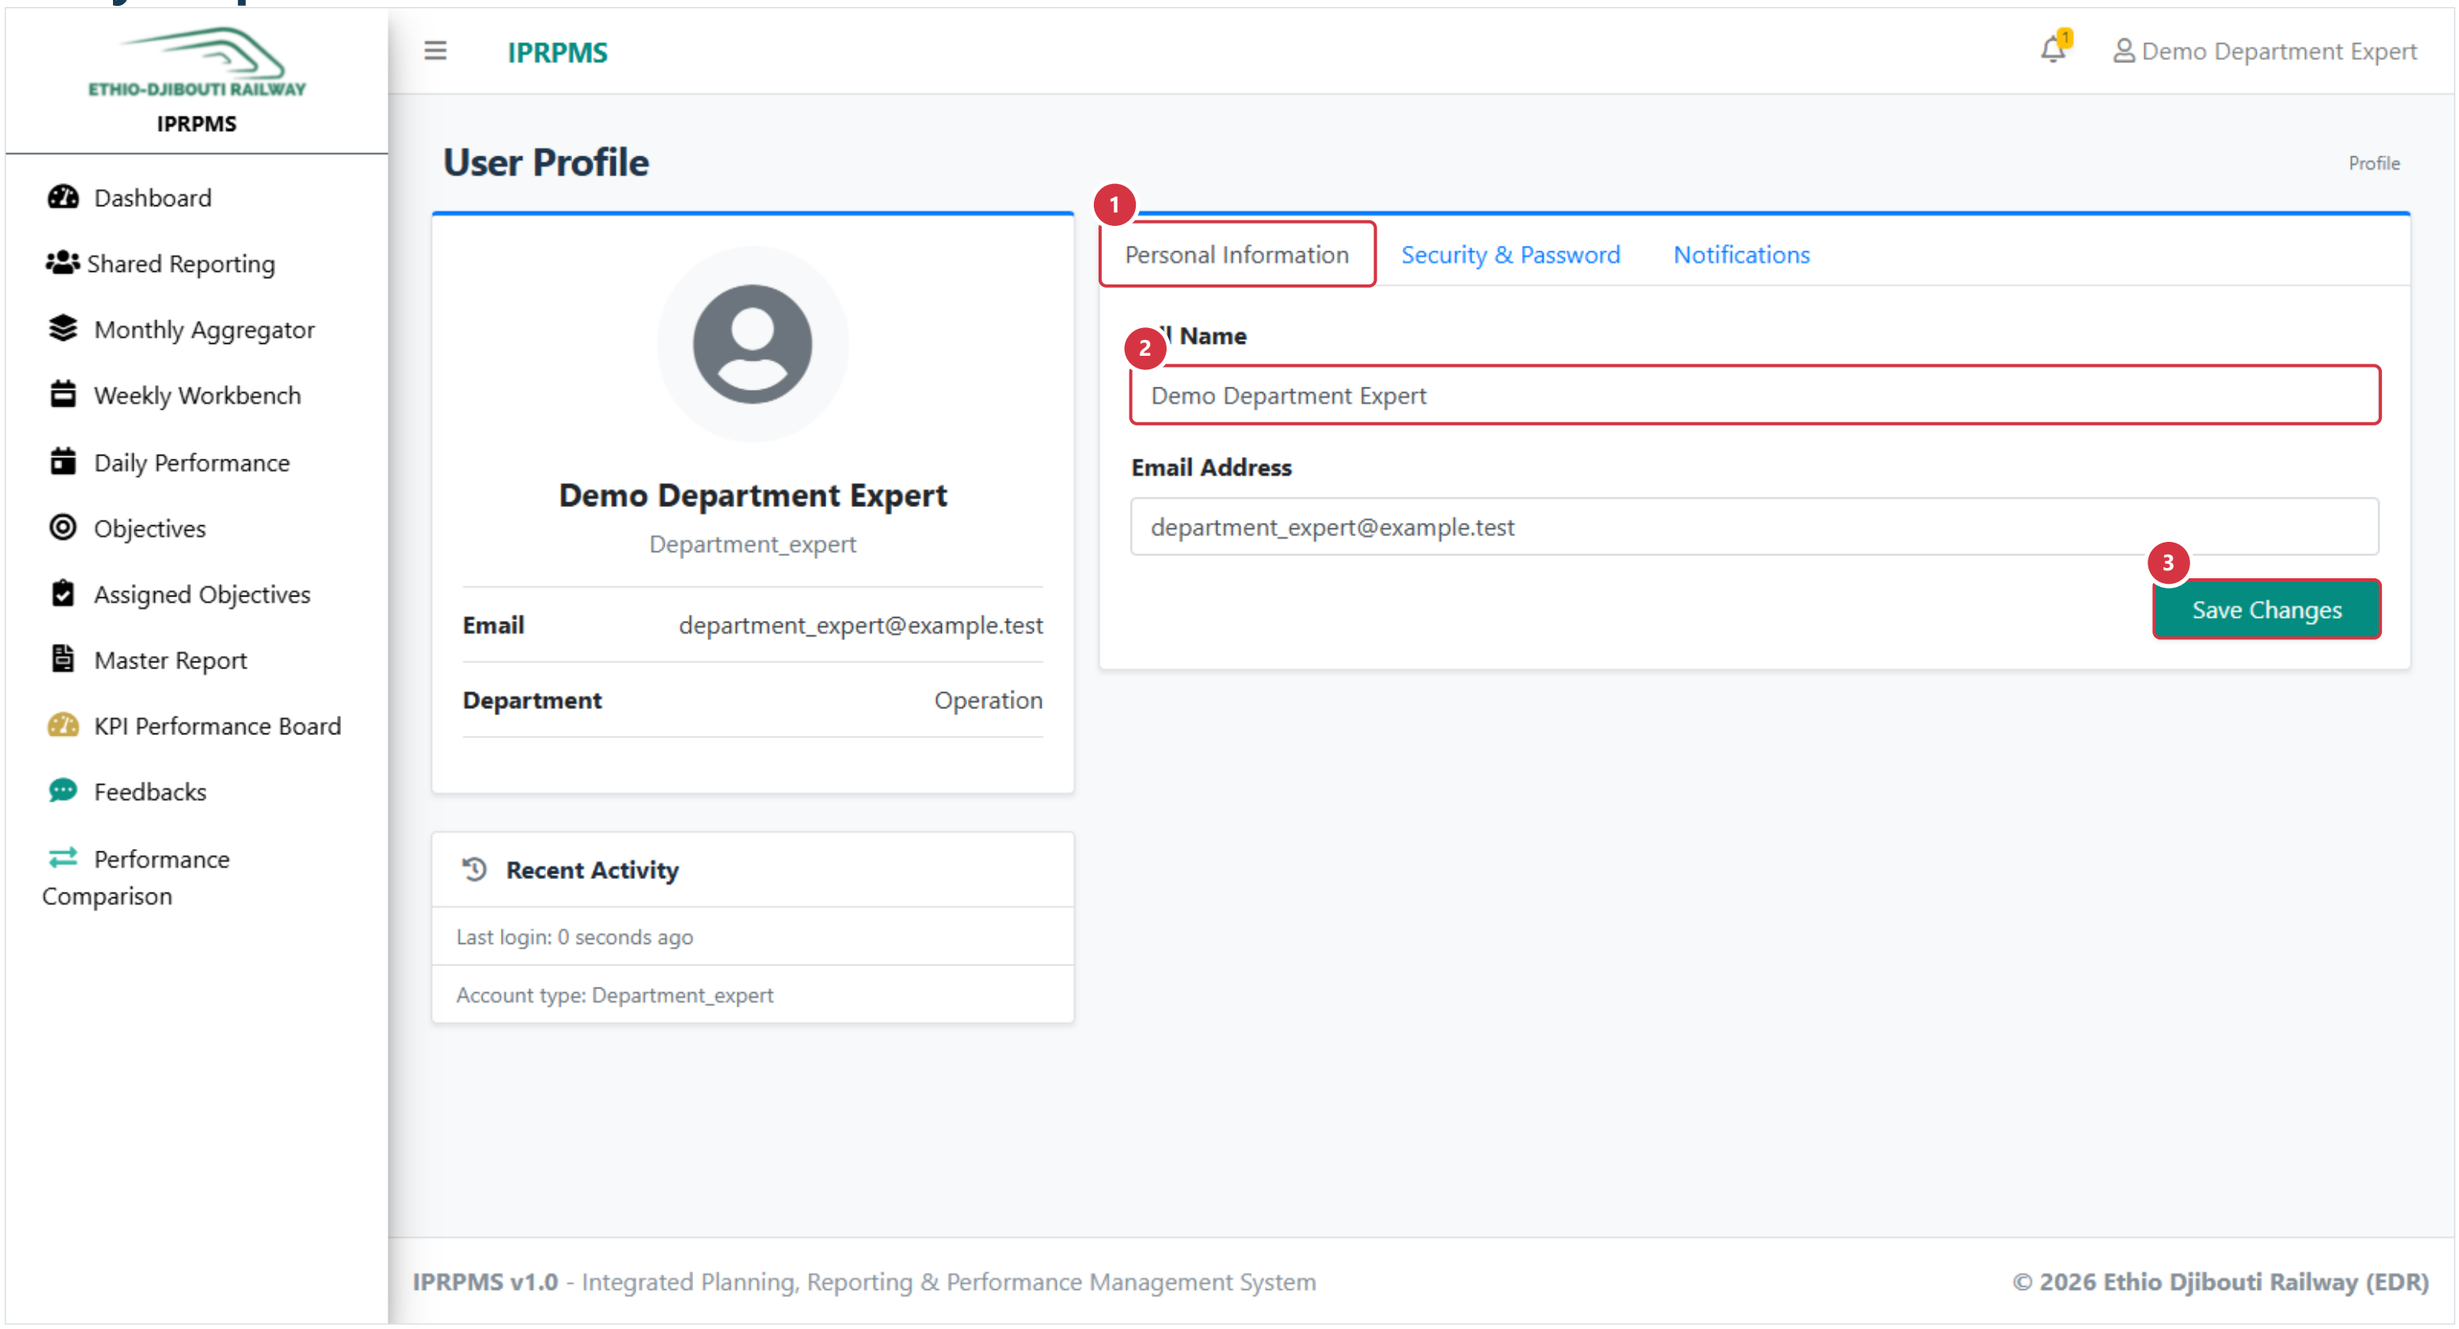

Replace a temporary password

1. Enter the current temporary password.
2. Enter a new private password and repeat it in Confirm new password.
3. Click Change Password and Continue.

After this step: This screen appears when the administrator requires a first password change.

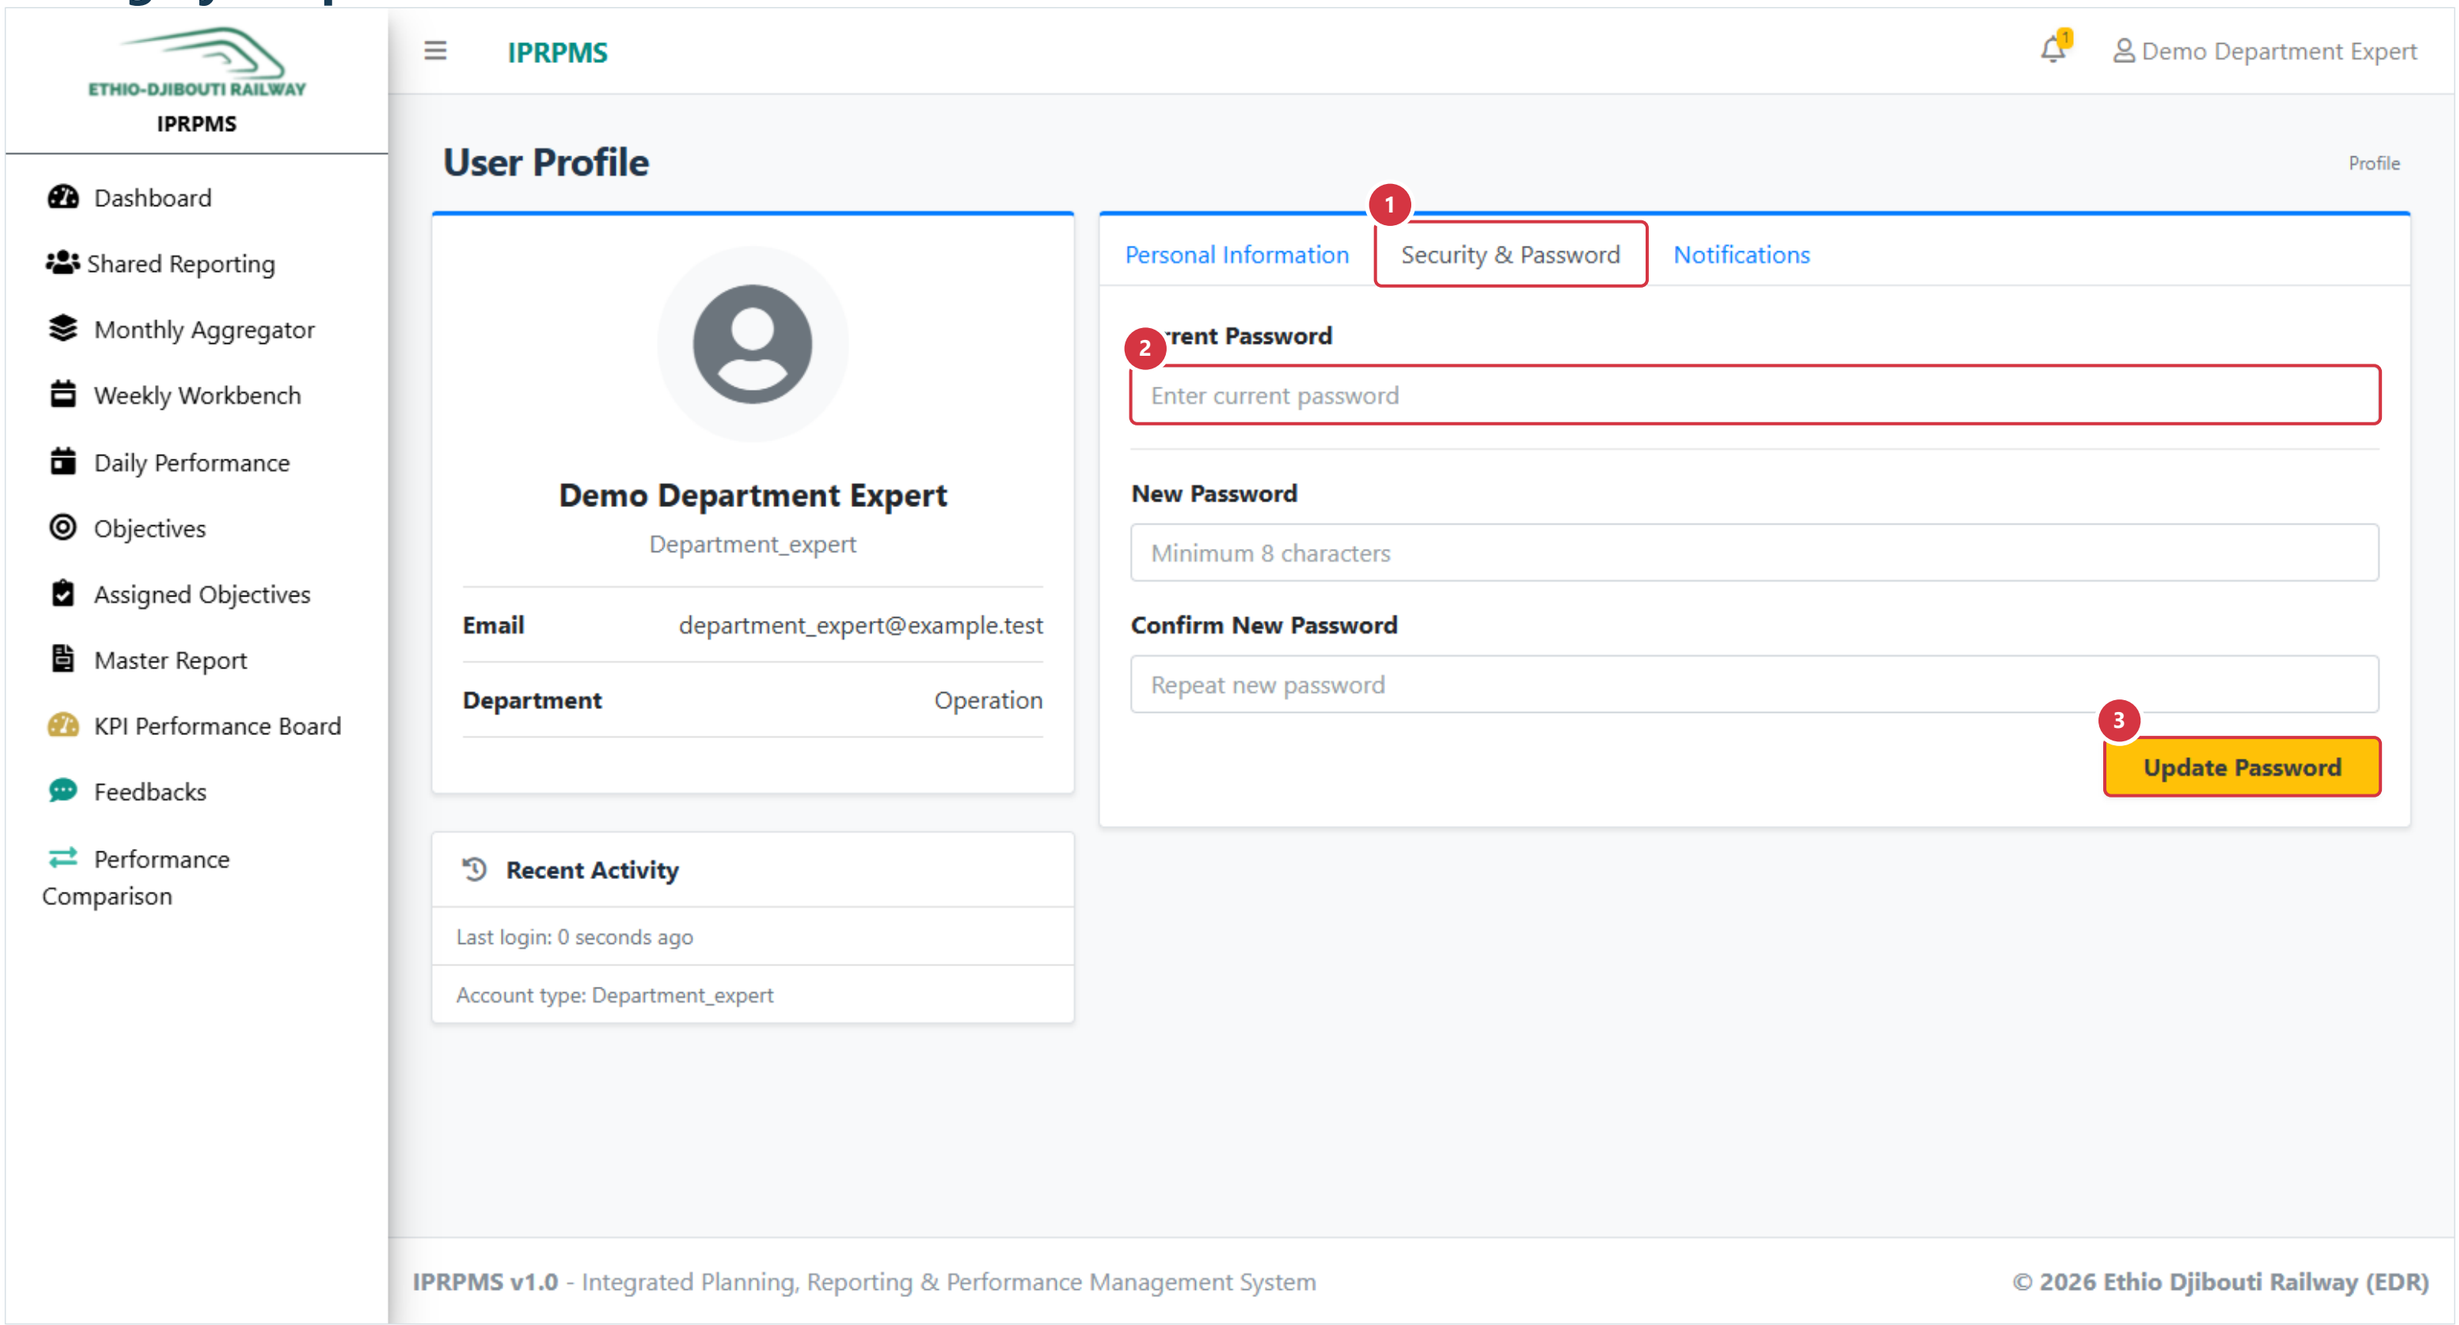

Edit your personal information

1. Click Personal Information in Profile.
2. Update Full Name or Email Address.
3. Click Save Changes and confirm the success message.

After this step: Department and role assignments are managed by the administrator, not through this form.

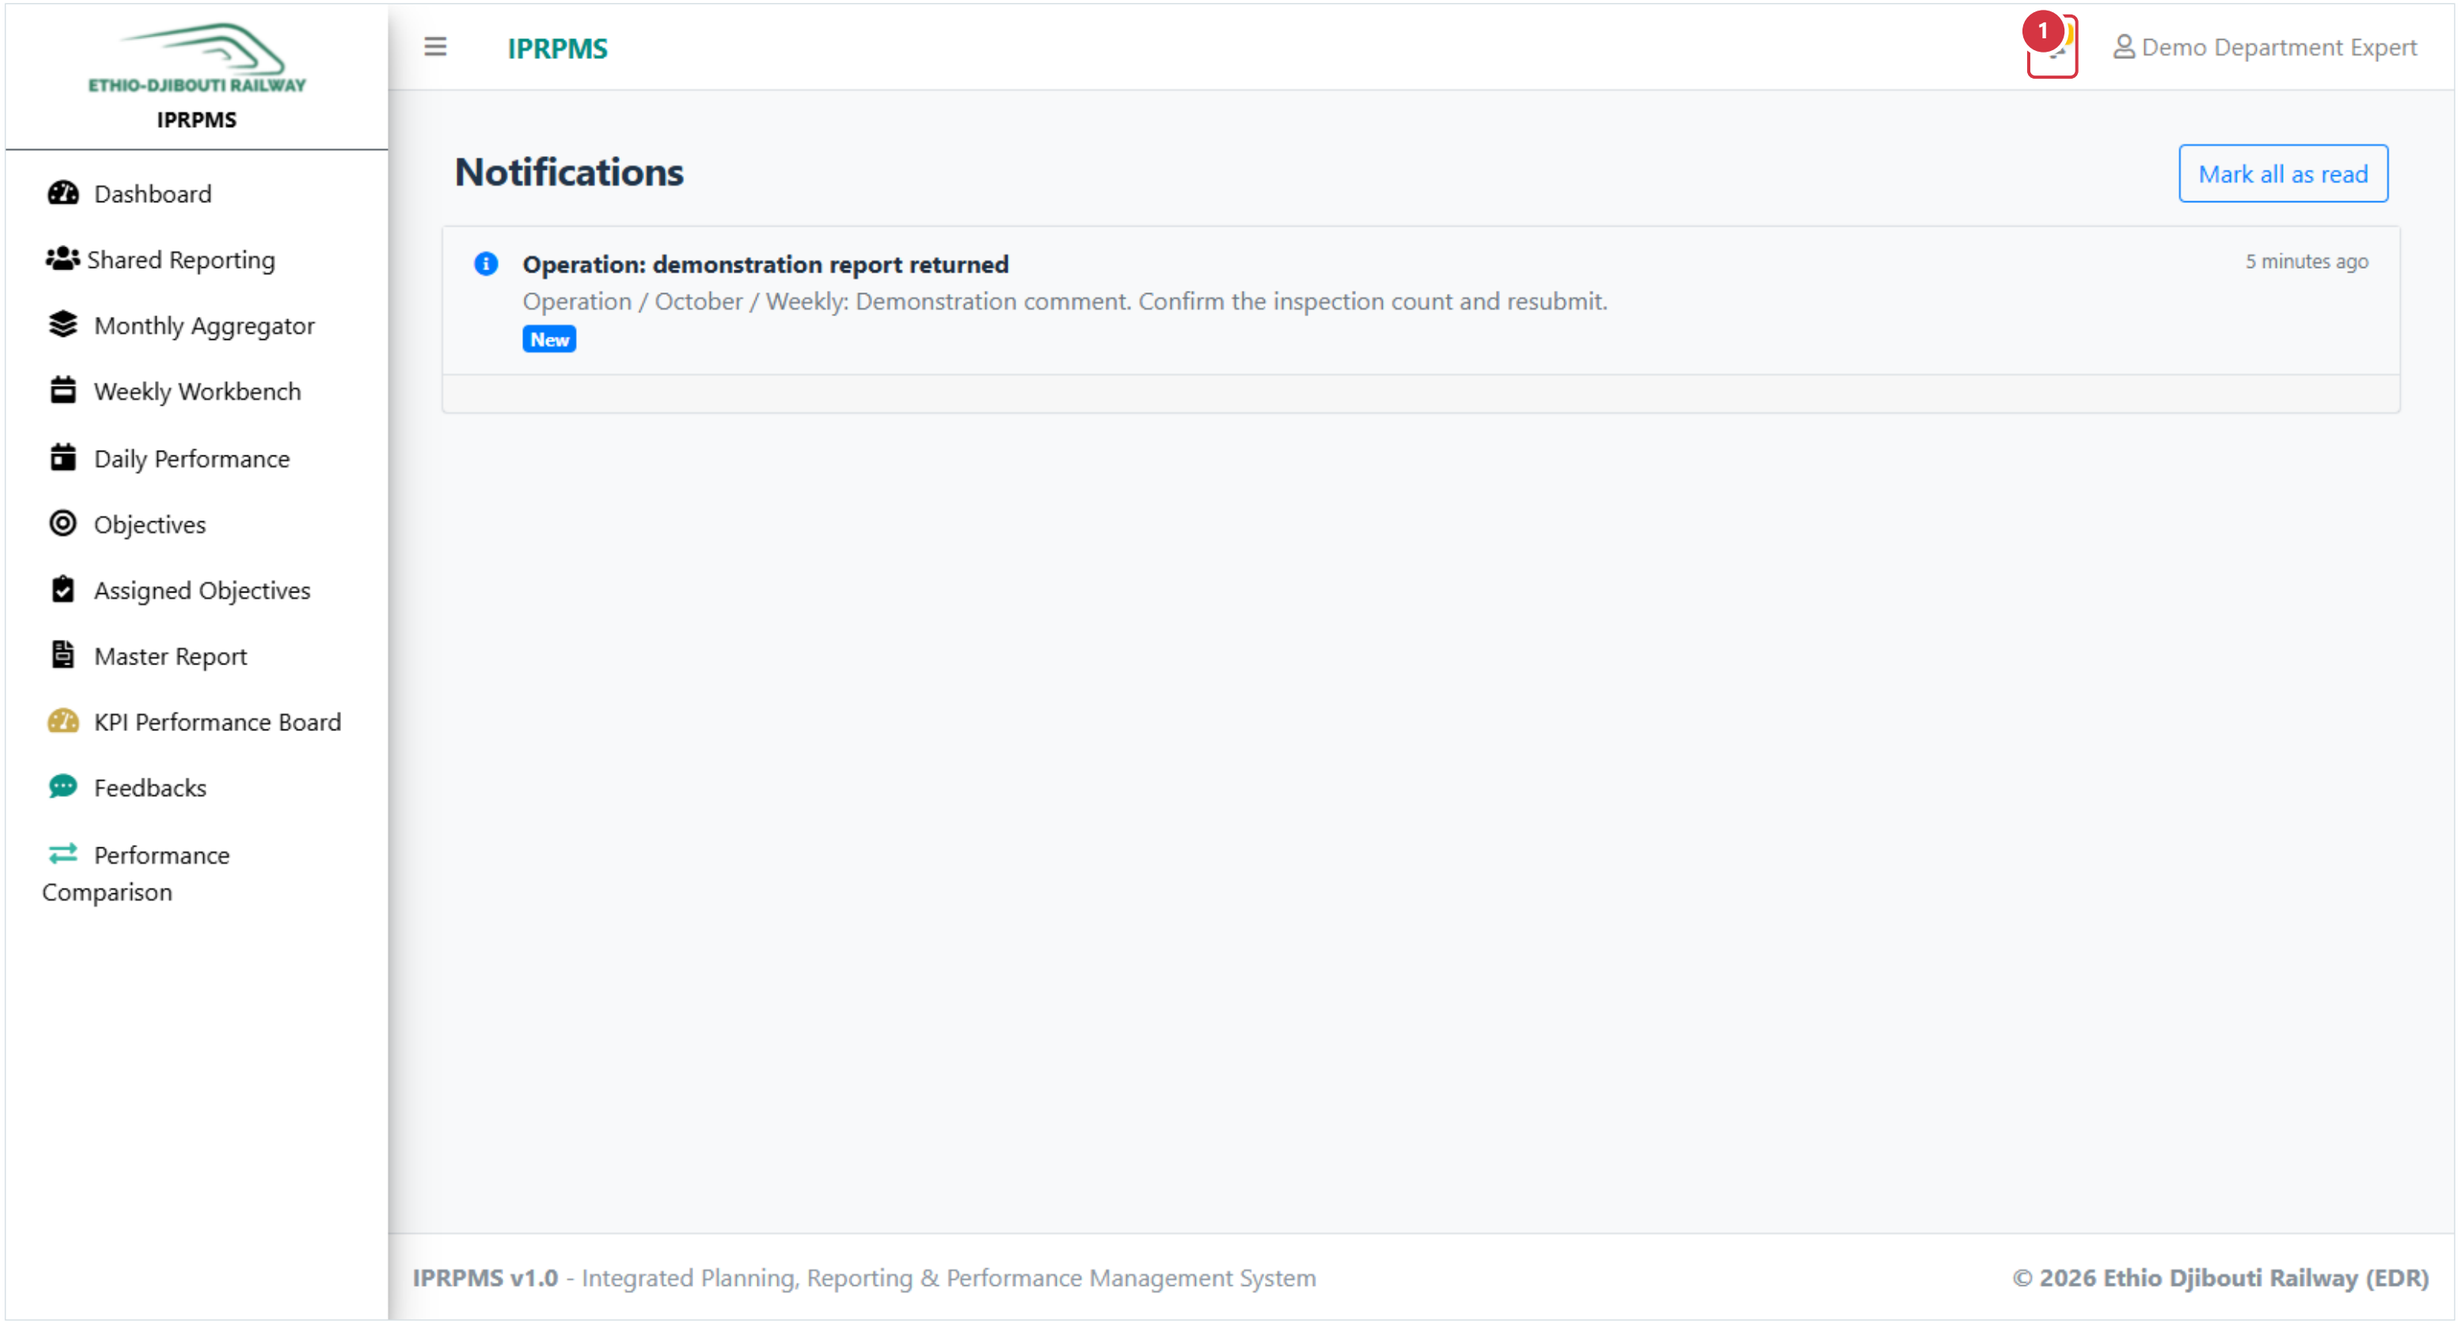

Change your password

1. Click Security & Password.
2. Enter your current password, a new password and its confirmation.
3. Click Update Password.

After this step: Use a private password. The fields are deliberately empty in this training capture.

Read workflow notifications

1. Open the notification bell or Notifications page.
2. Read the department, period, action and review comment.
3. Open the linked record or mark the notice read after acting on it.

After this step: Marking a notification read does not approve, correct or submit the underlying record.

Build the annual plan: main and sub objectives

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

A main objective is the larger result the organization wants. Sub objectives are the measurable activities underneath it. The accountable department owns the result; contributing performers help deliver it.

Before you click

Have the approved planning document, year, codes, descriptions, units, baselines, targets and performer departments ready. Use K1-K27 only for the permanent KPI to which the activity genuinely belongs.

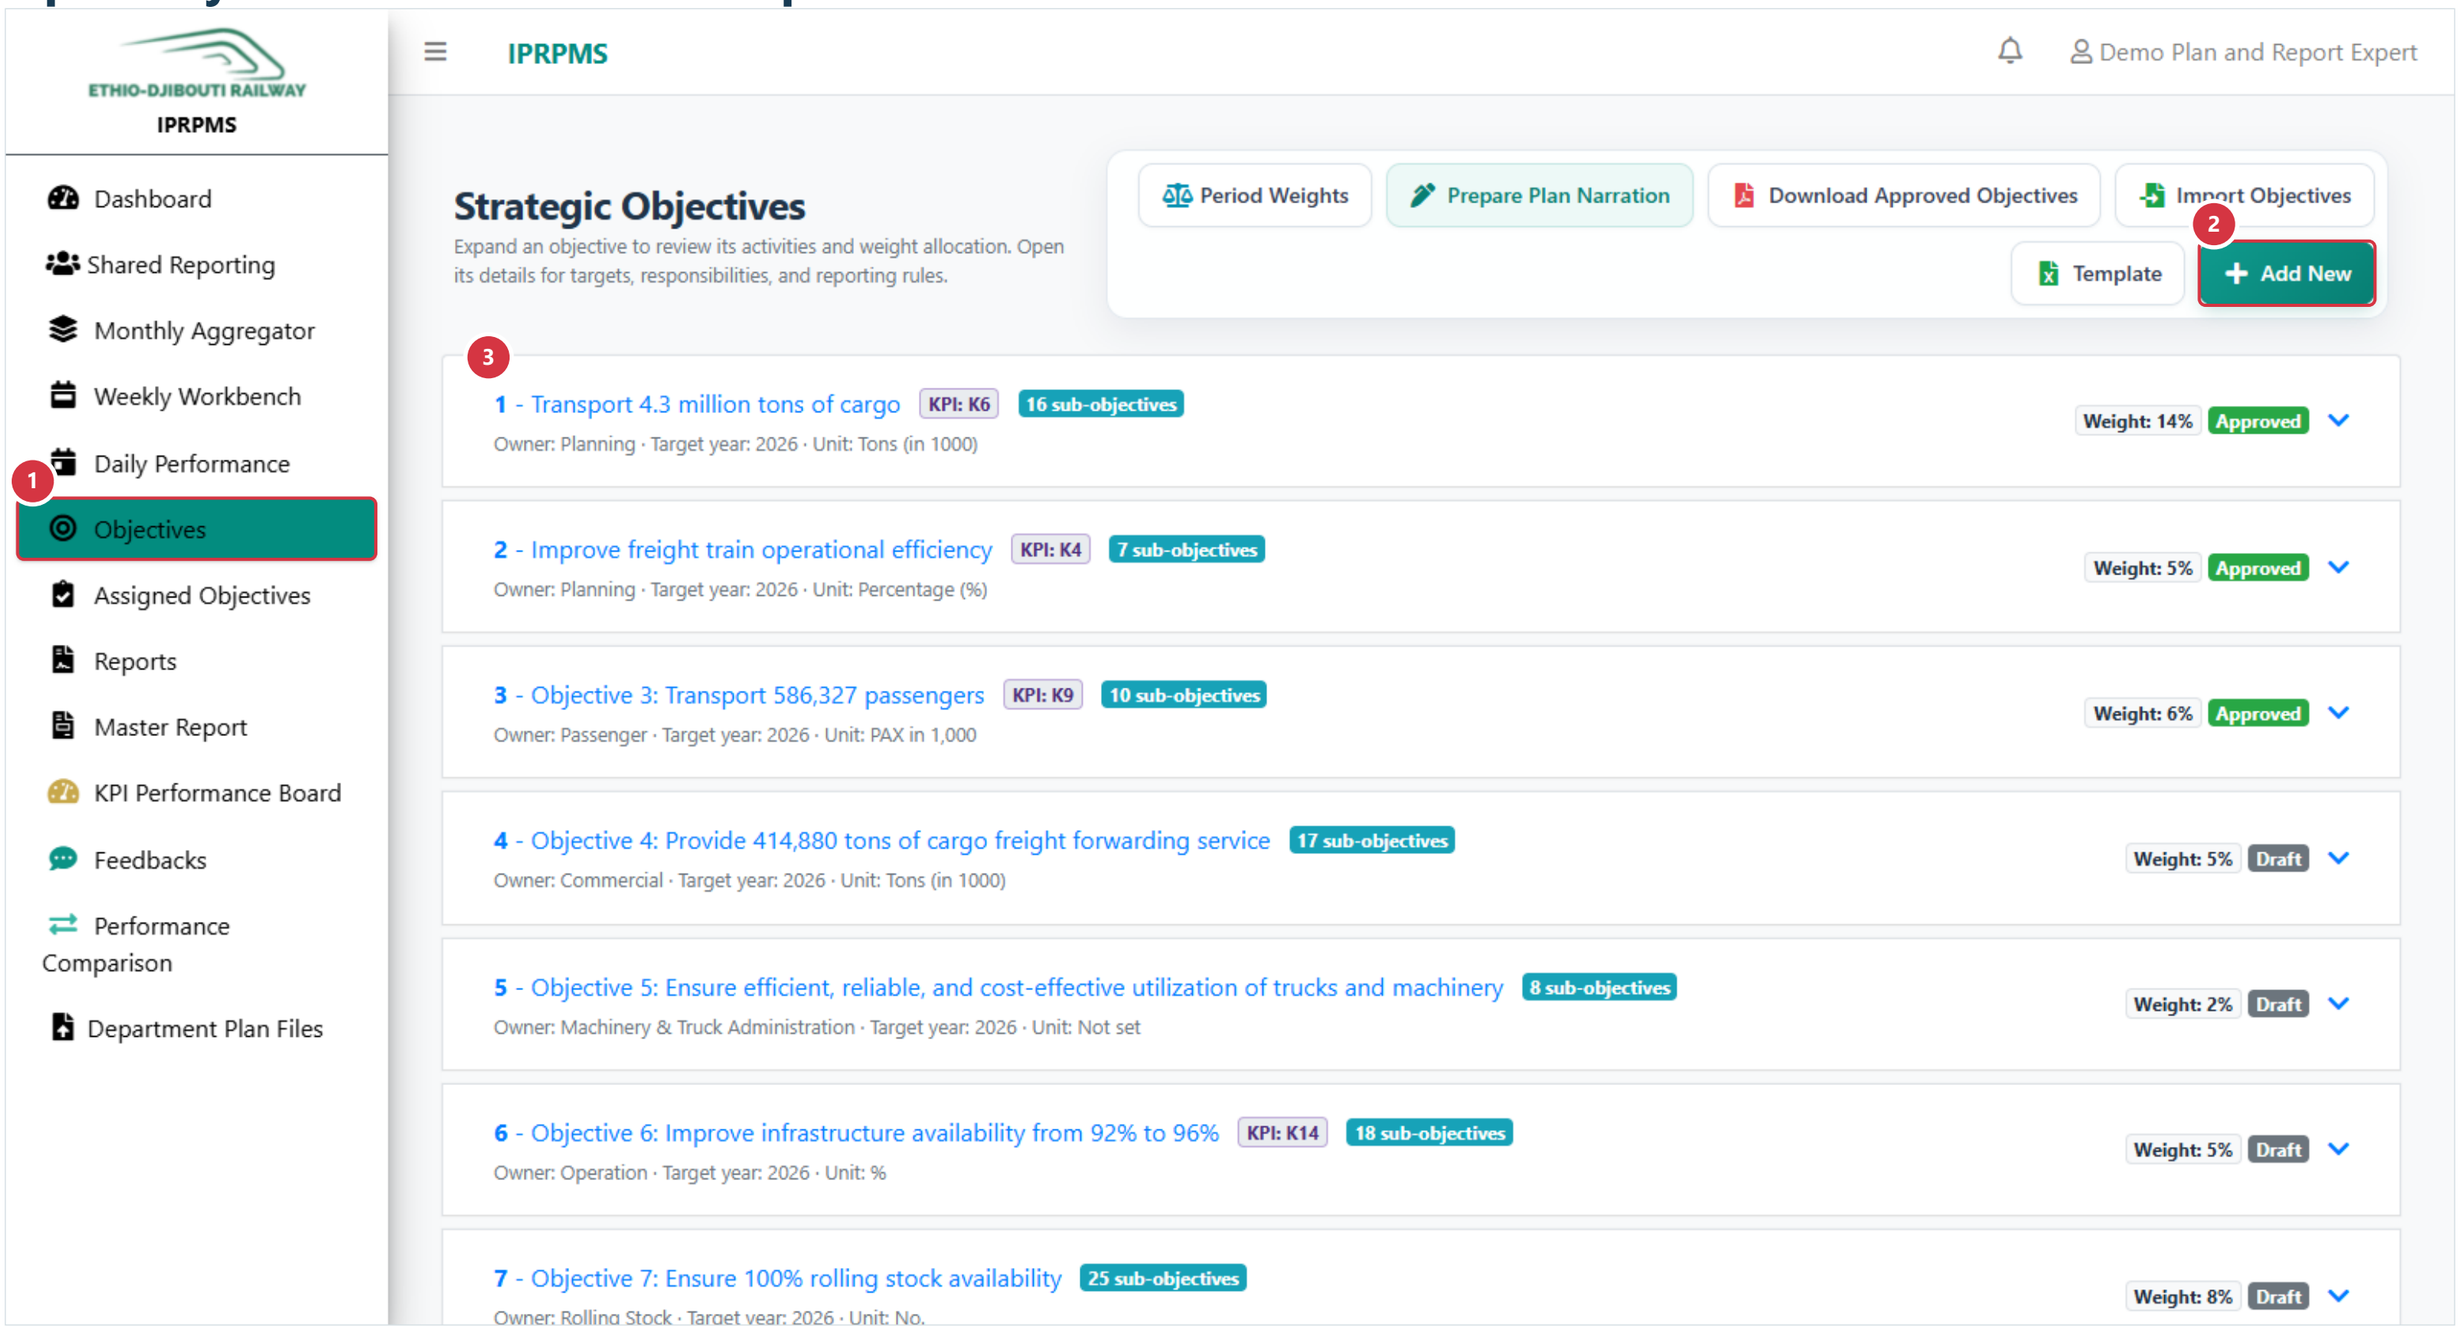

What to check

Check higher-is-better or lower-is-better direction, the annual target, period calculation and rollup. Set an activity-level reporting frequency when it differs from the department default. Do not assume every group of sub objective weights must total 100.

How you know it worked

The draft is saved with its correct main objective and performers. Expand the hierarchy and inspect the full set of sub objectives before submission. Saving a draft does not approve it or make it available for departmental reporting.

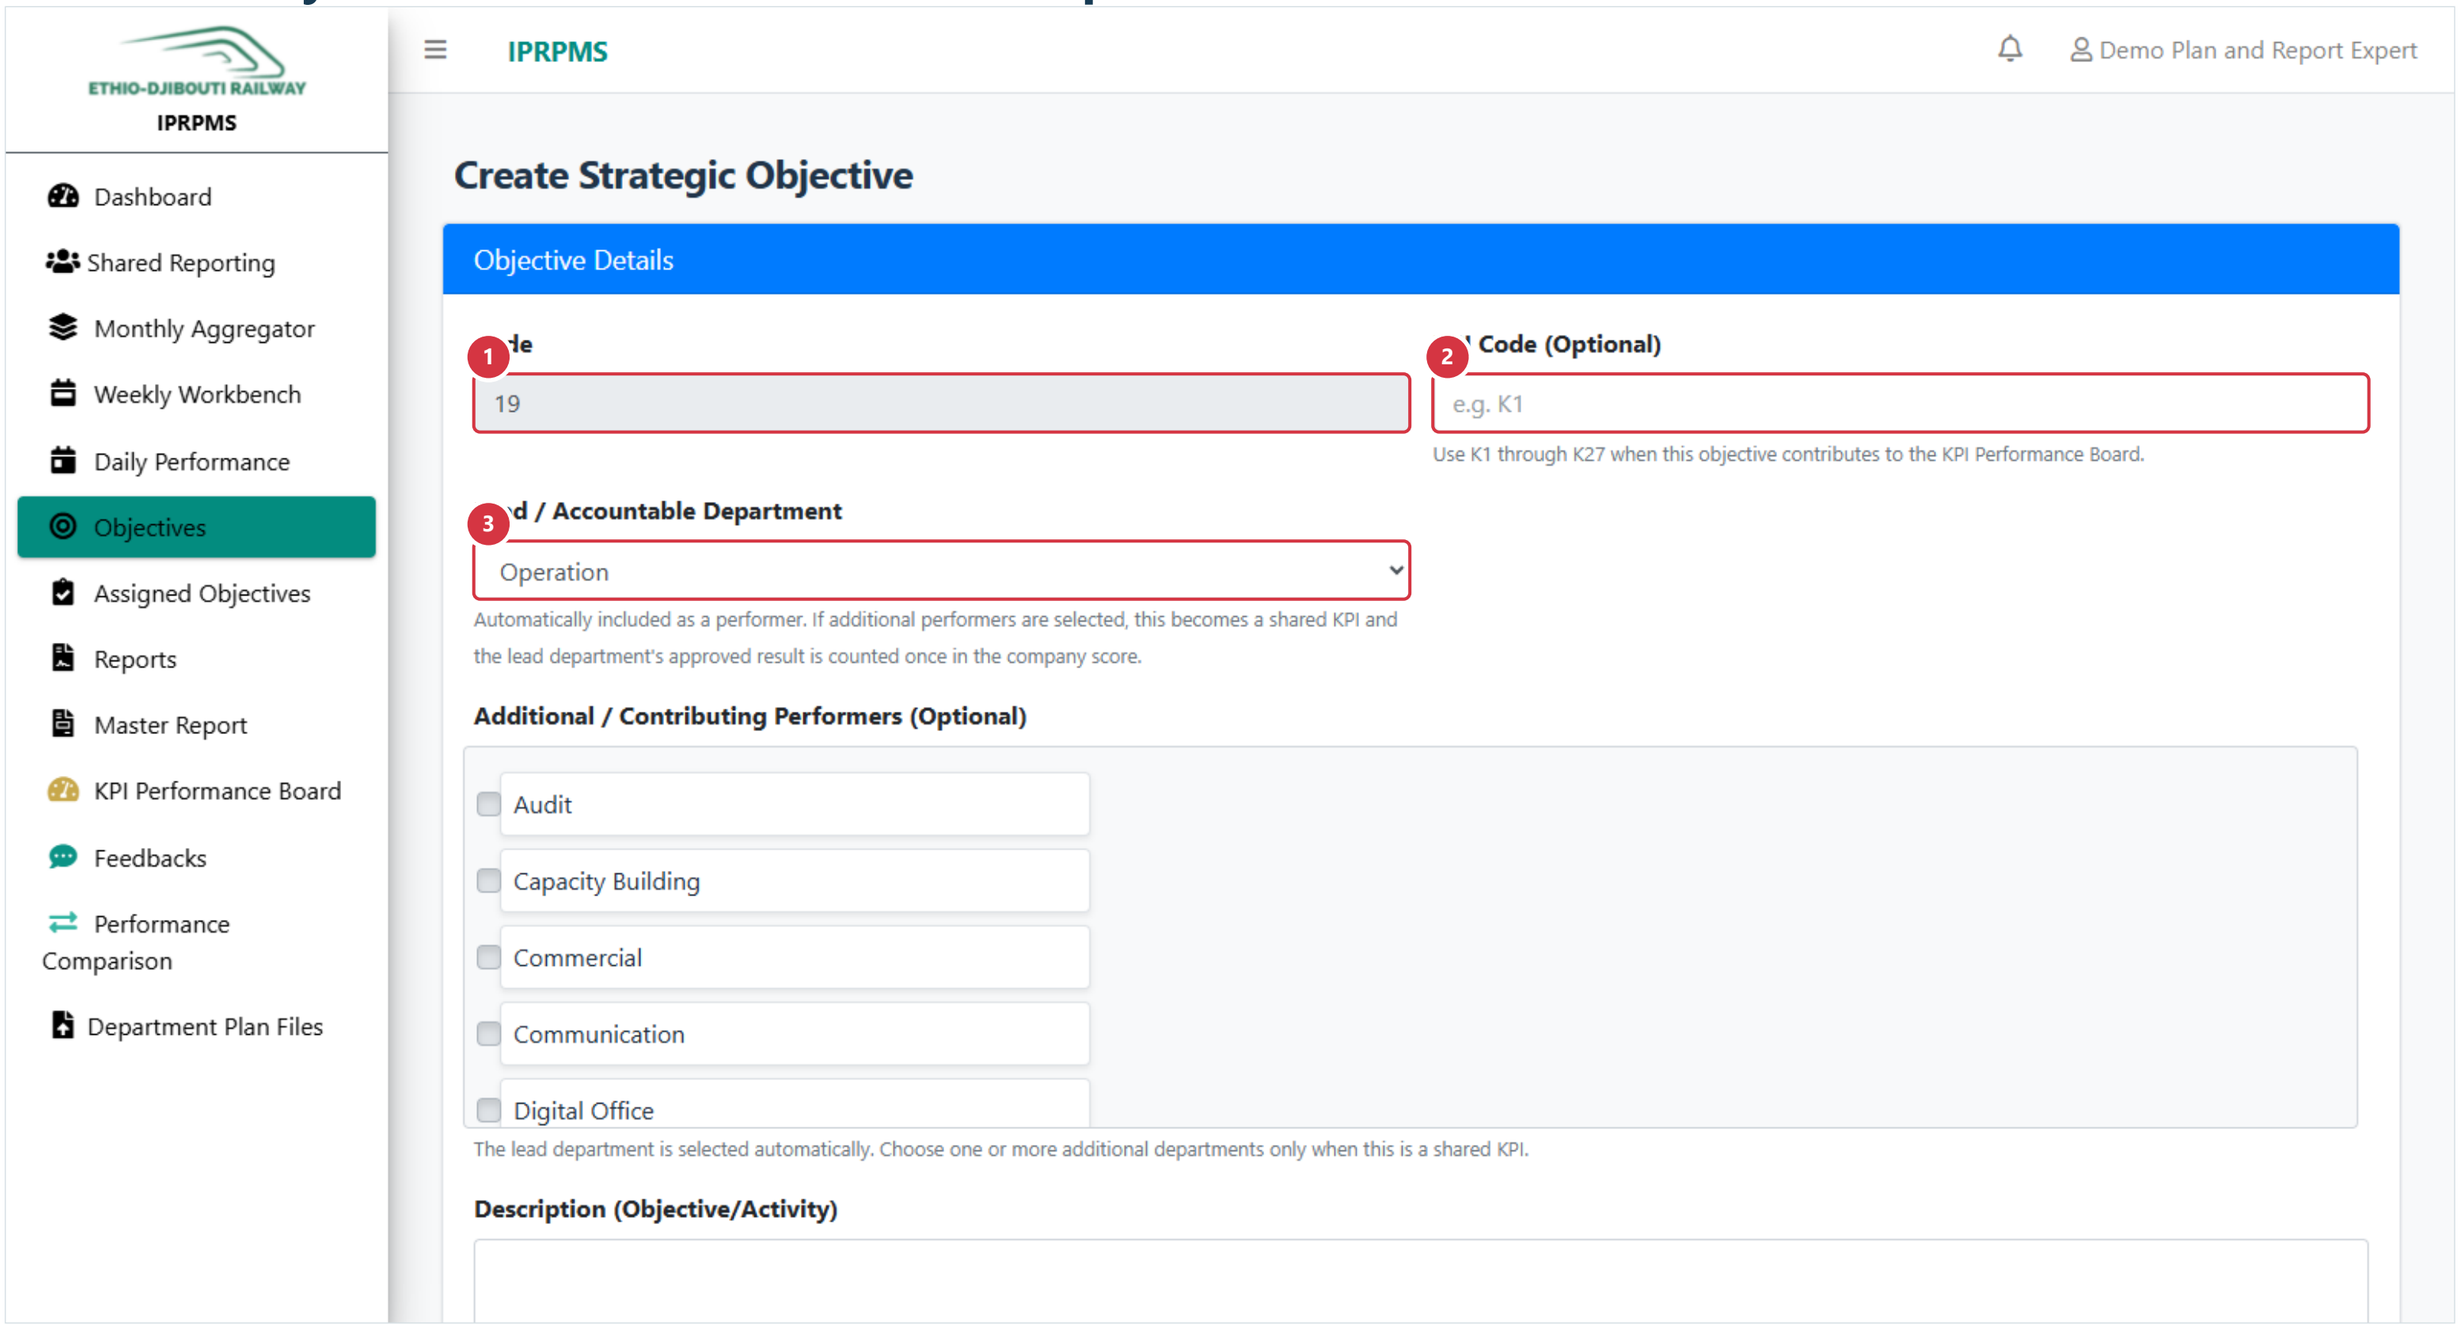

Open objectives and start a new plan item

1. Click Objectives in the sidebar.
2. Click Add New to open the objective form.
3. Use the expand control on an existing objective to see its sub objectives.

After this step: Draft items remain editable before submission.

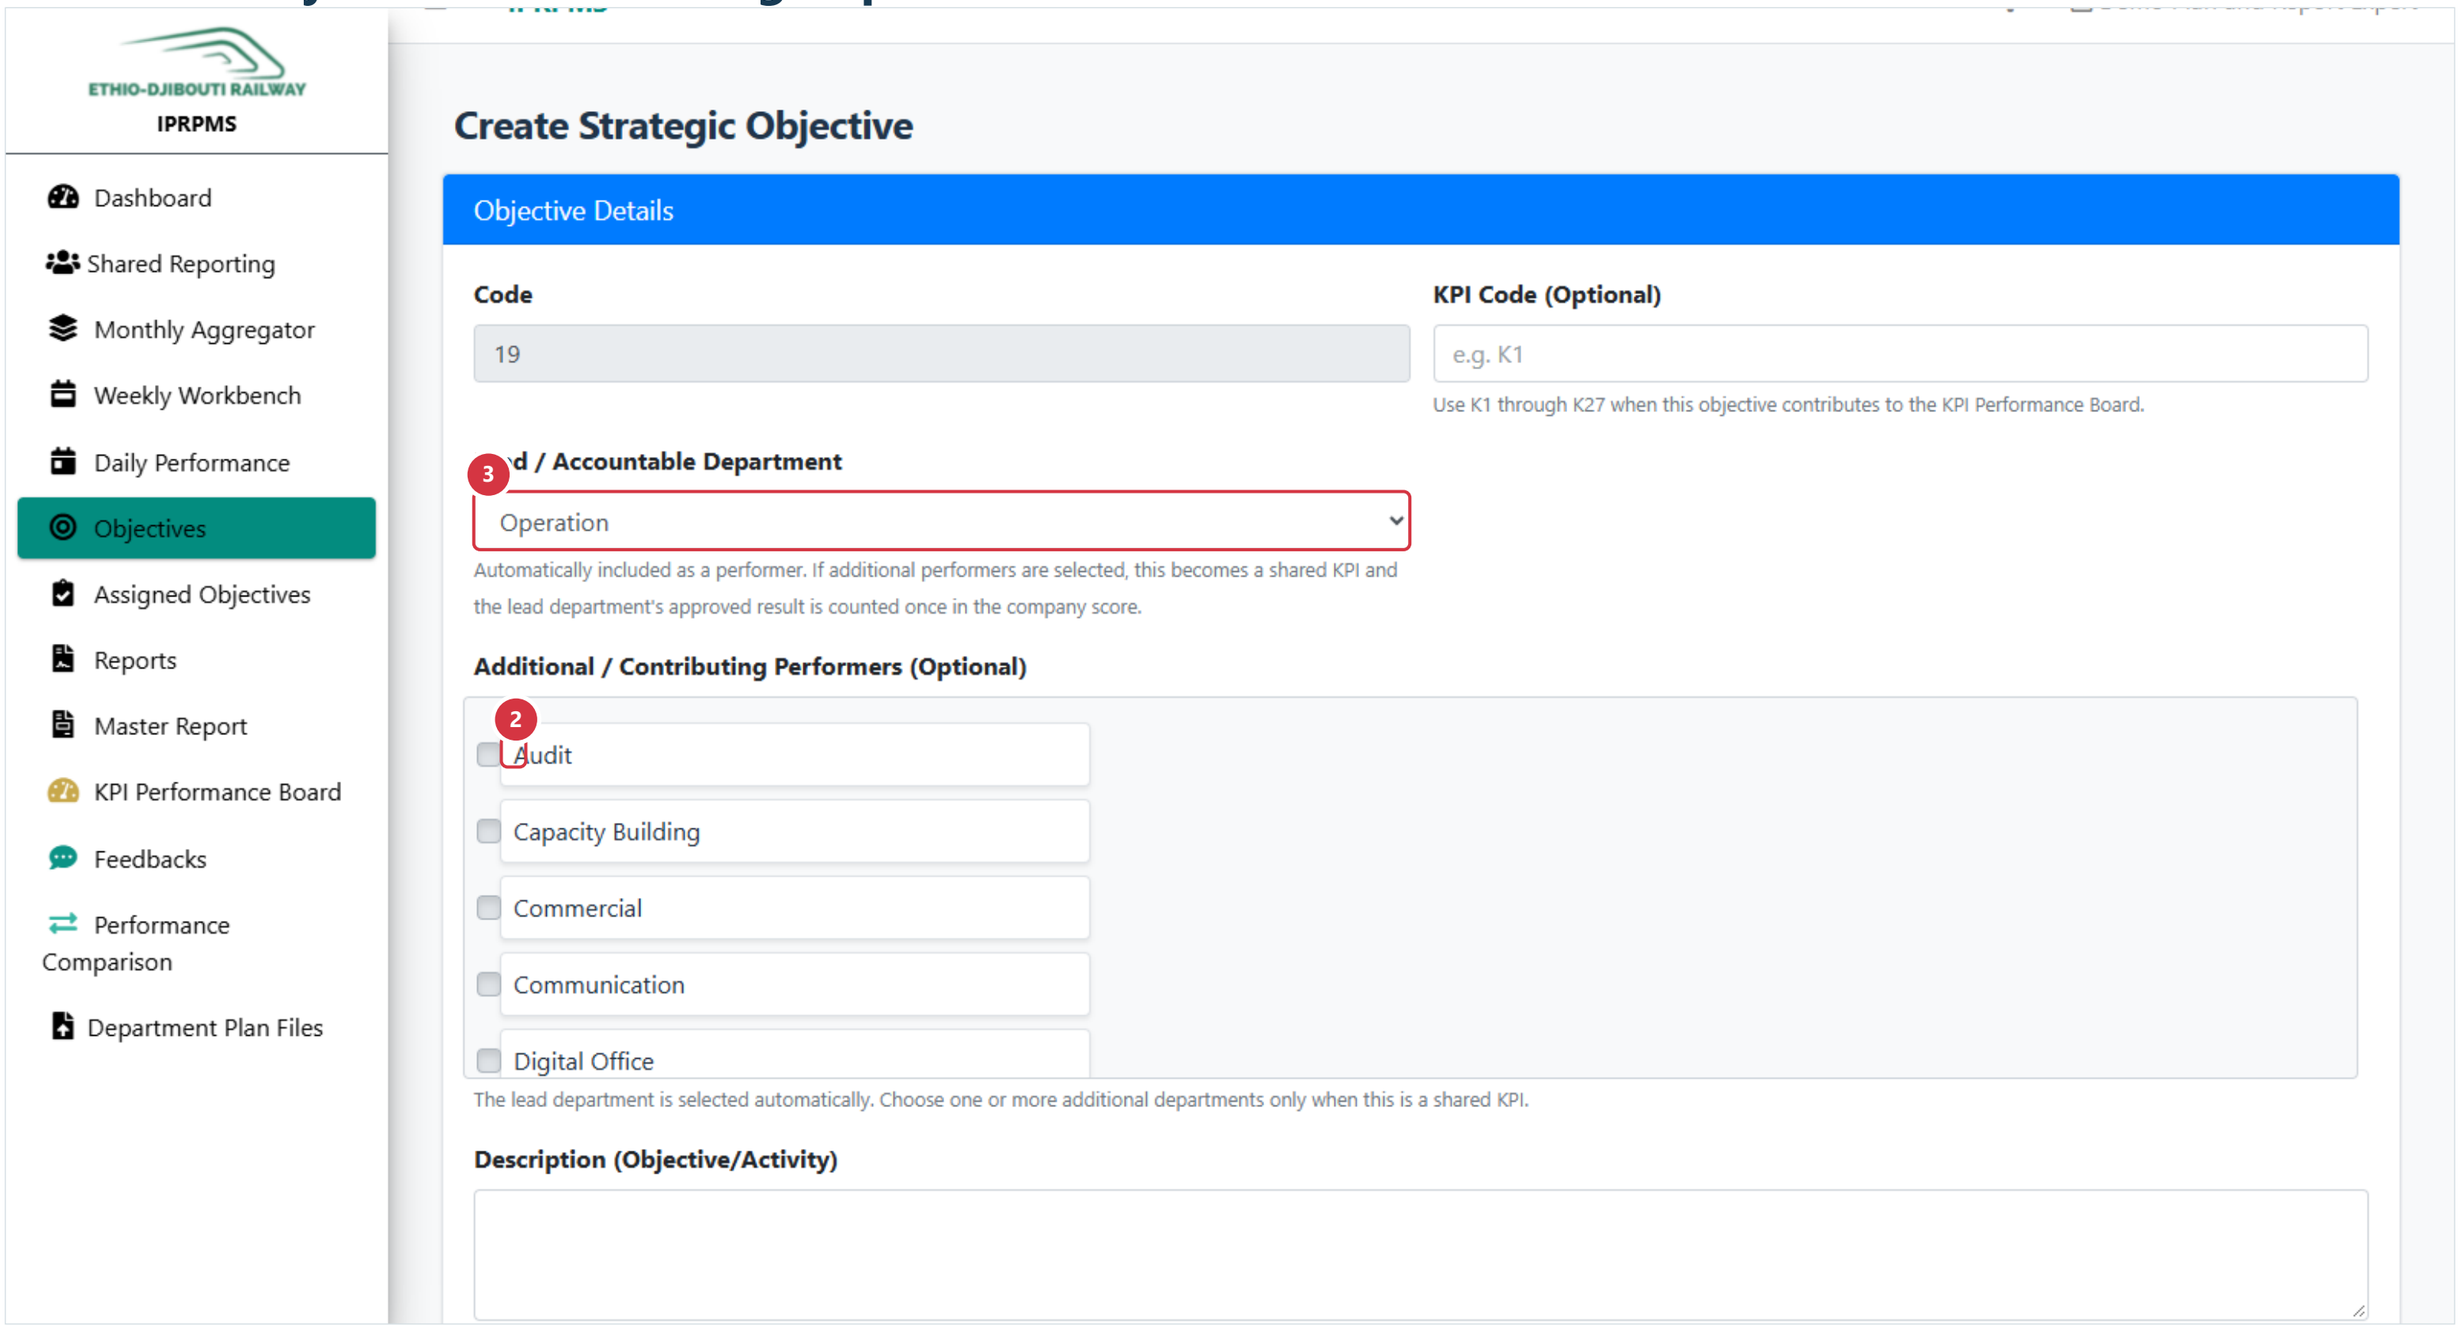

Create an objective: code and accountable department

1. Confirm the suggested Code.
2. Enter a permanent KPI Code only when the activity corresponds to that KPI.
3. Select the Lead / Accountable Department.

After this step: The selected lead is automatically included as a performer.

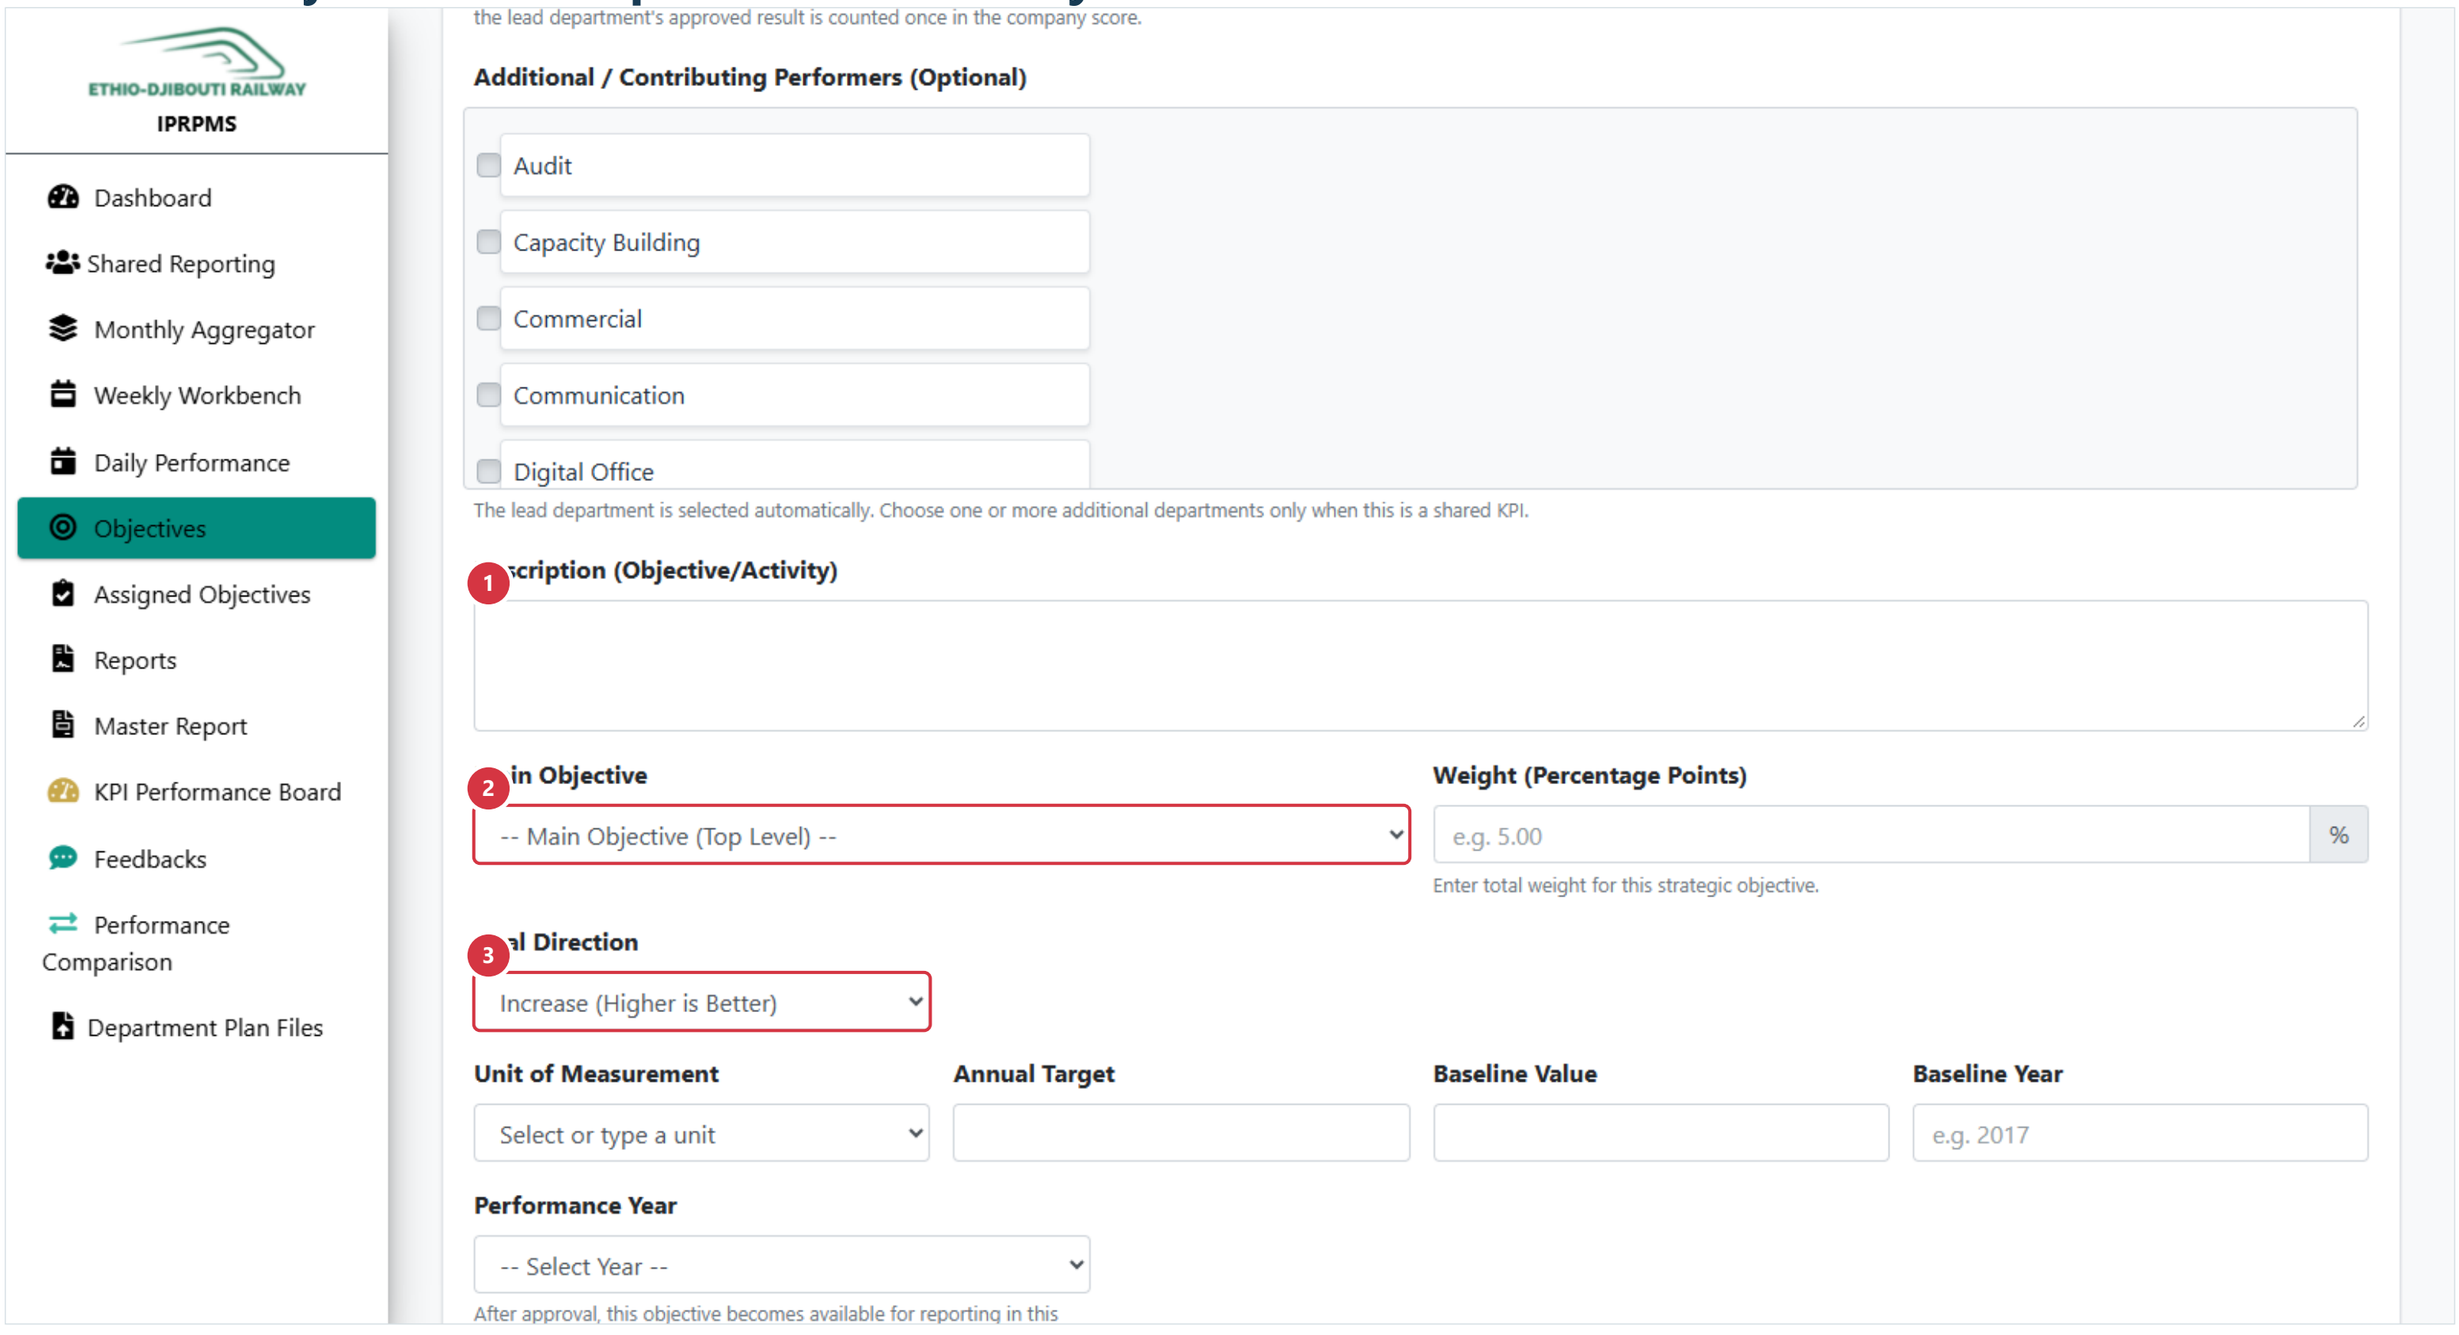

Create an objective: contributing departments

1. Review the Additional / Contributing Performers list.
2. Tick additional departments only when they contribute to this activity.
3. Keep the lead department selected.

After this step: A shared KPI uses the lead department result once in the company score.

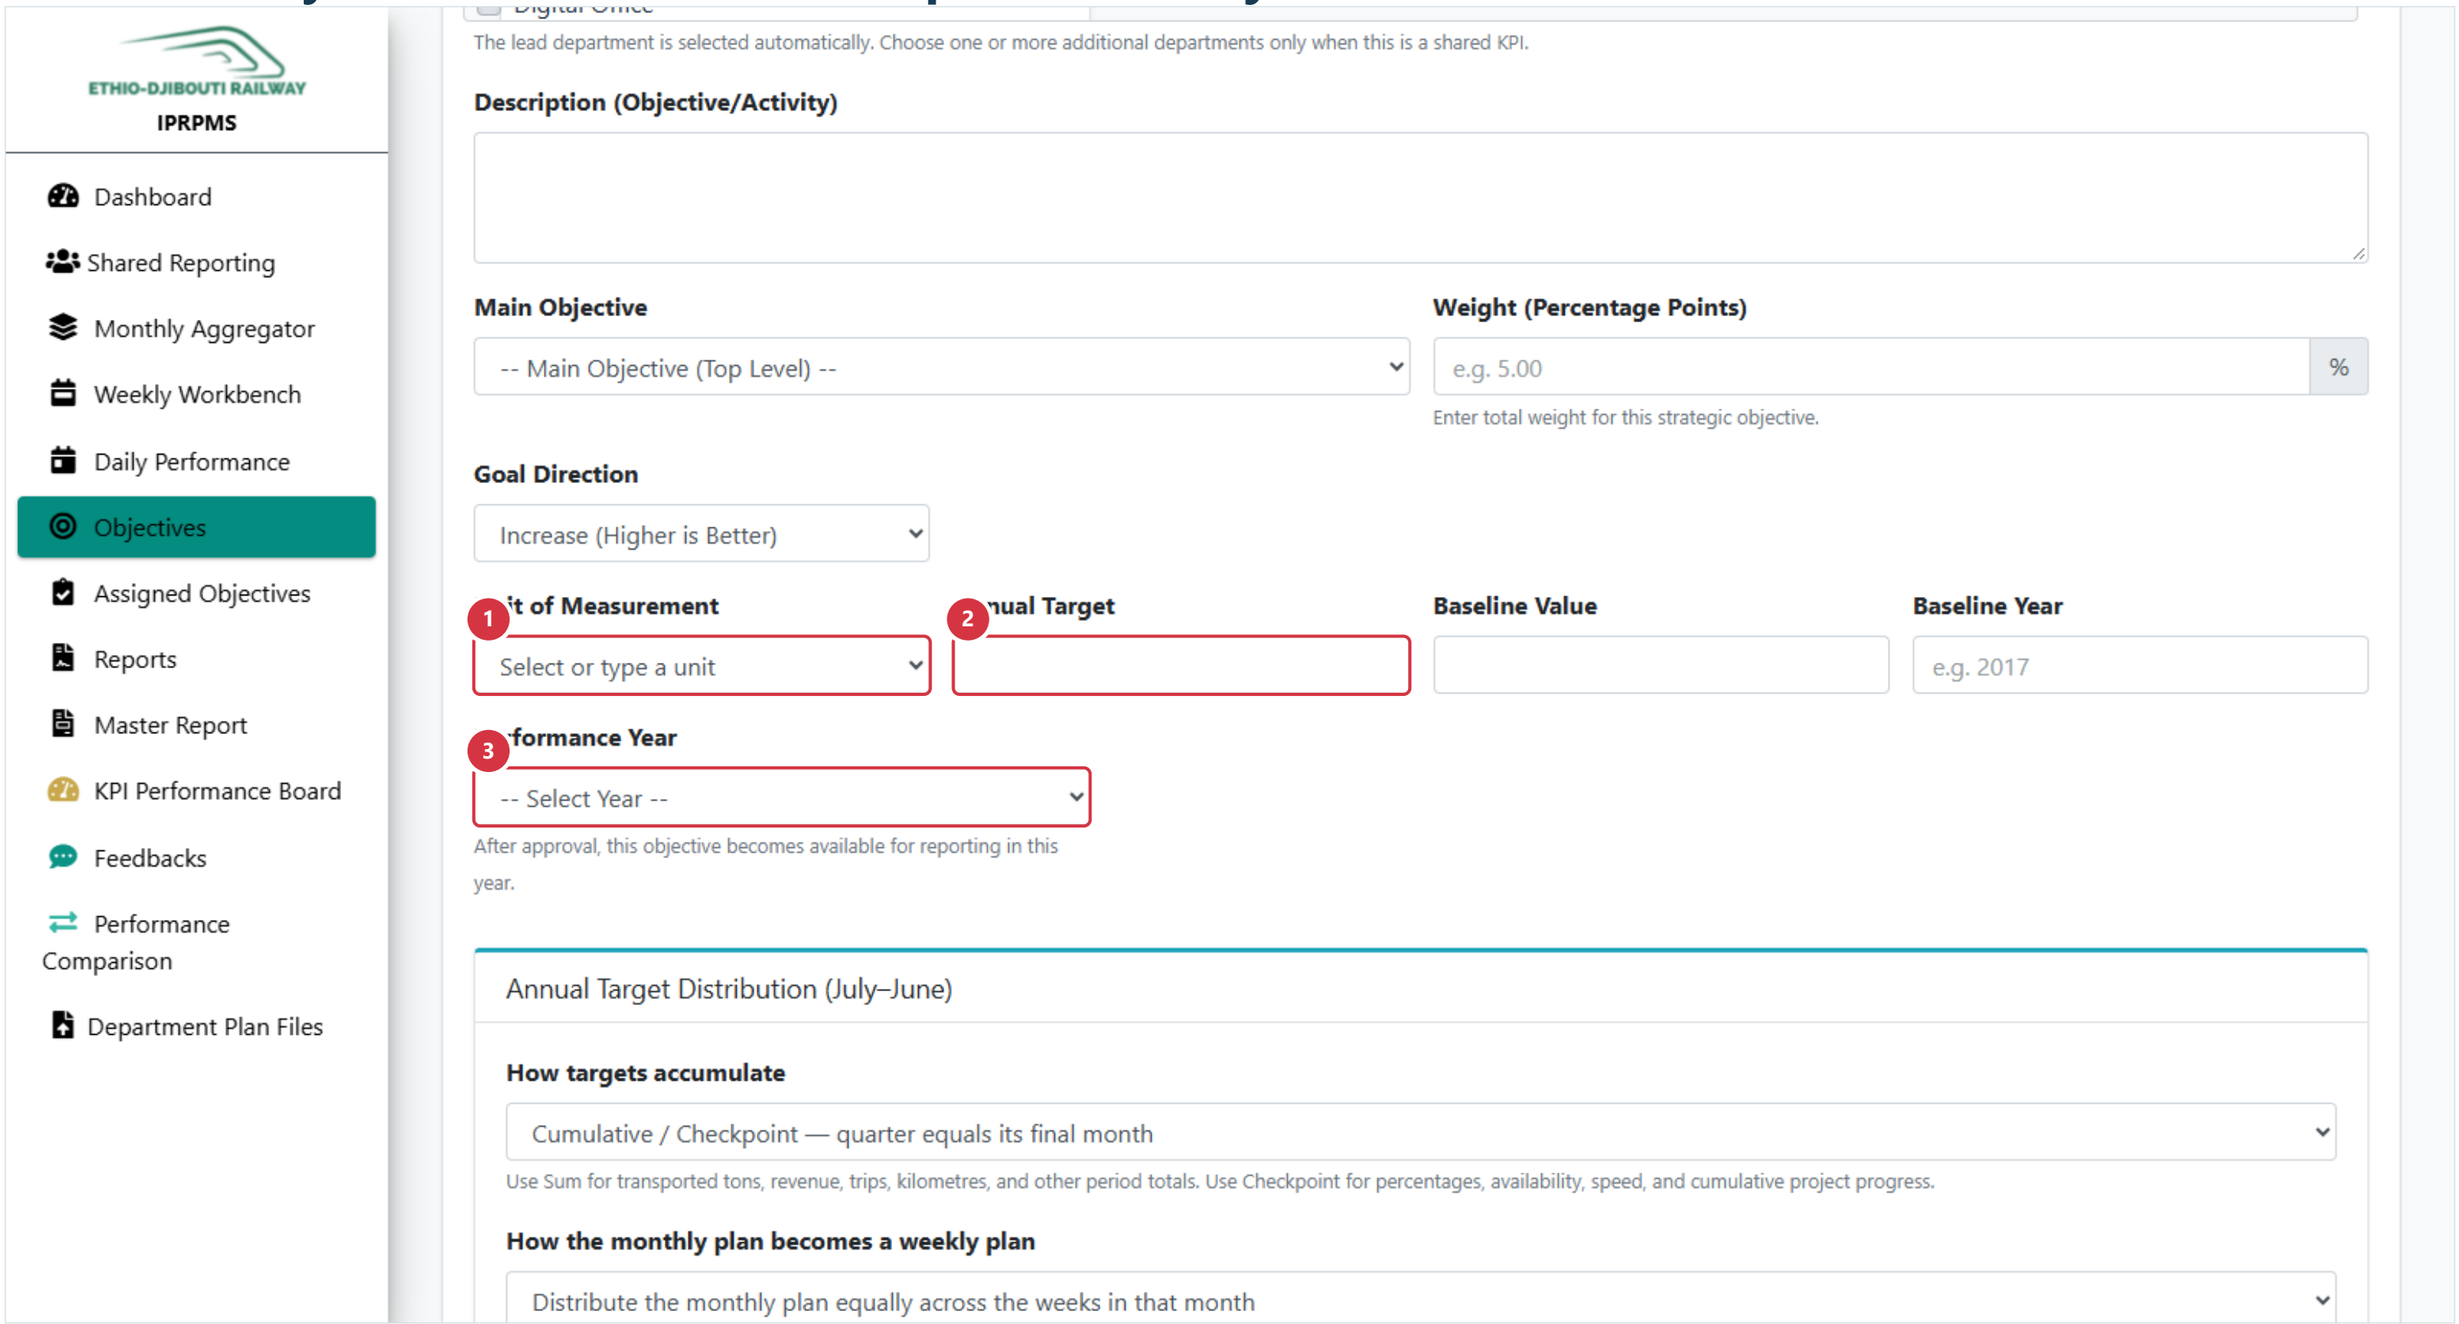

Create an objective: description and hierarchy

1. Enter a clear Description (Objective/Activity).
2. Leave Main Objective at Top Level for a main objective, or select the correct existing main objective.
3. Set the weight and Goal Direction according to the approved definition.

After this step: Increase means higher is better. Decrease means lower is better. Sub objective weight uses its main objective allocation.

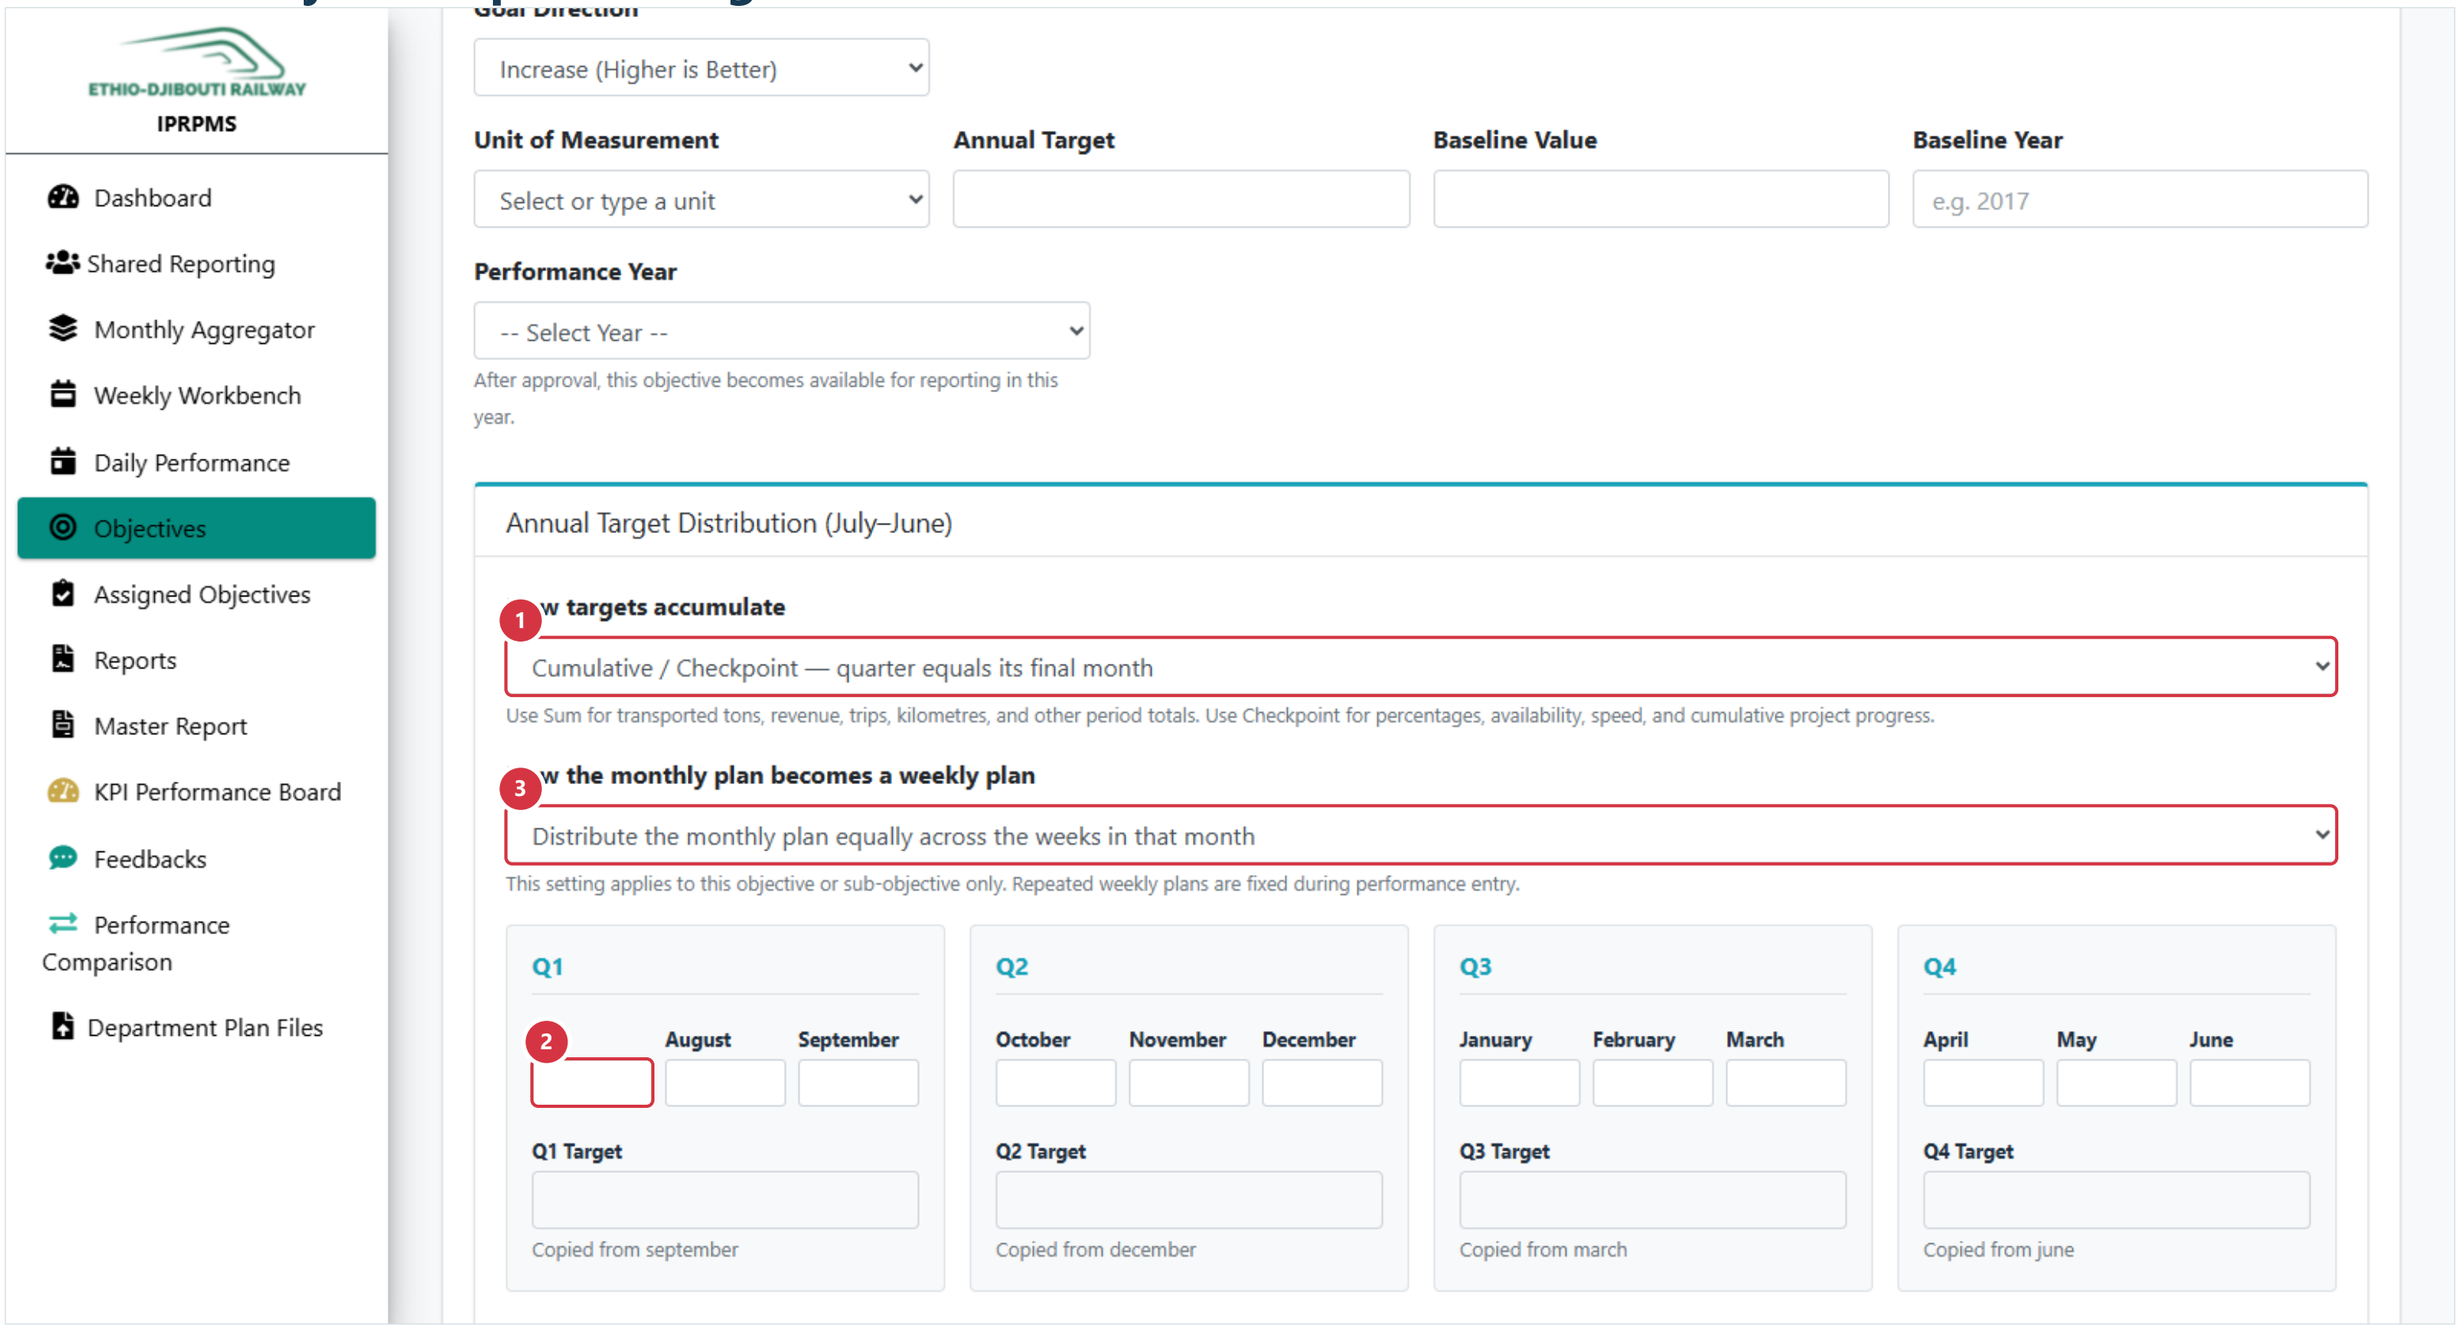

Create an objective: unit, baseline and performance year

1. Choose or type the Unit of Measurement.
2. Enter Annual Target and any approved Baseline Value / Baseline Year.
3. Select the Performance Year.

After this step: Use the same measurement definition for planning, entry and comparison.

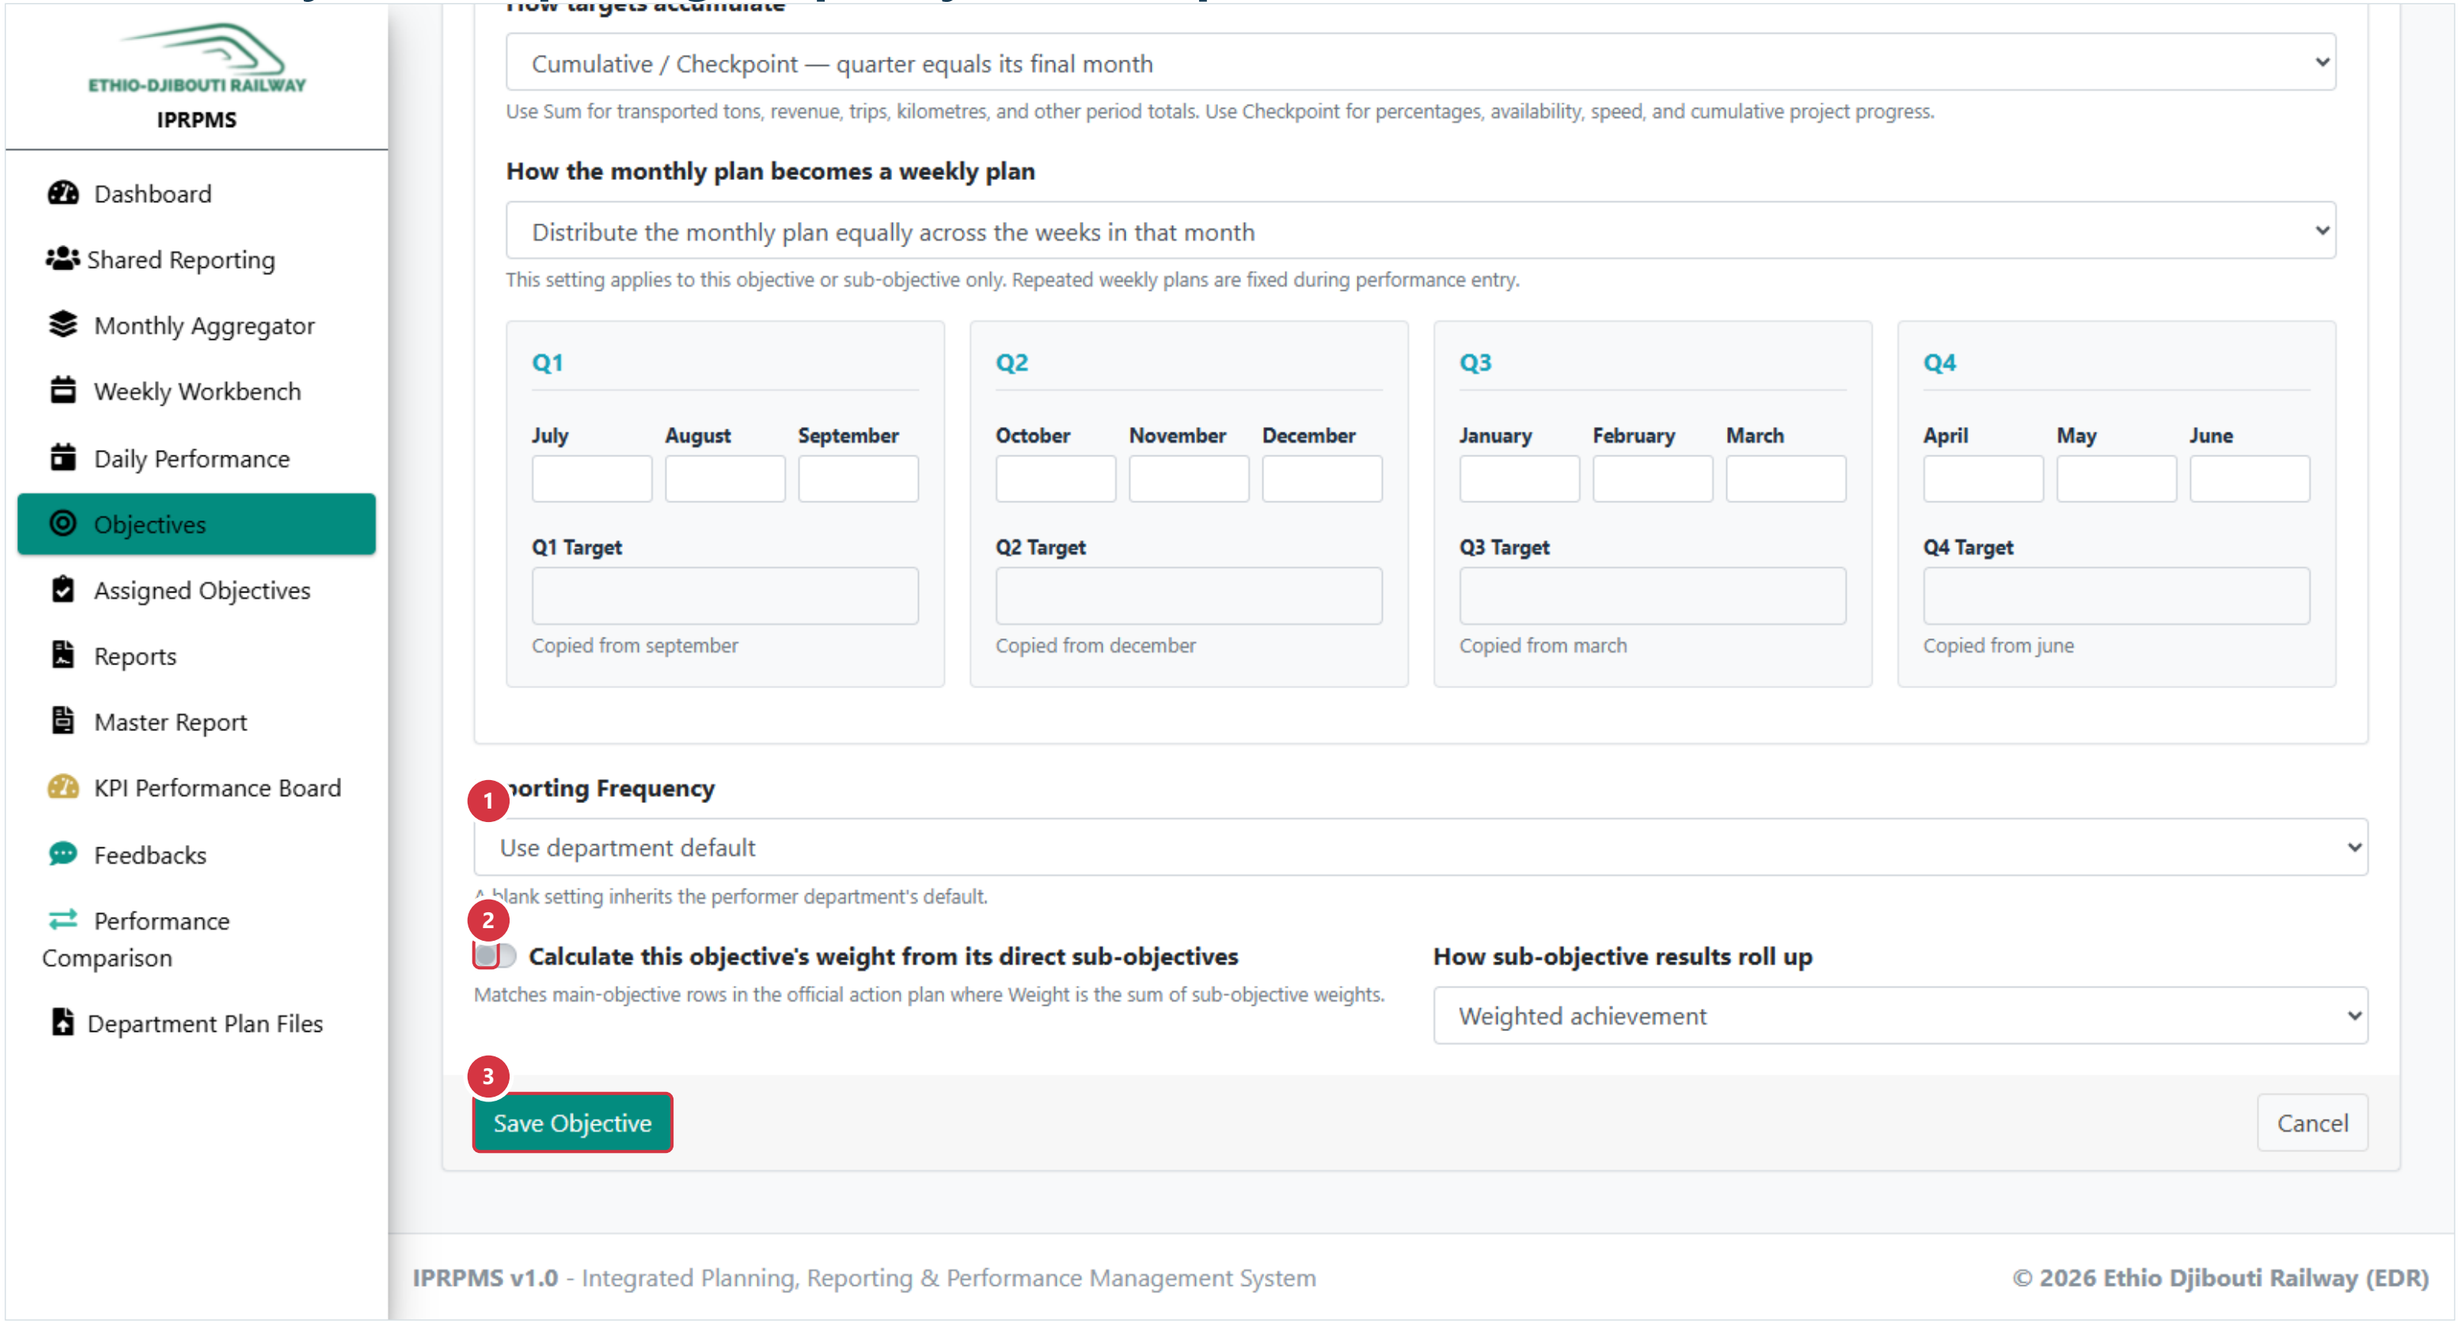

Create an objective: period target calculation

1. Choose the target calculation method shown in the schedule.
2. Enter the applicable monthly targets and check quarter / annual totals.
3. Use the weekly mode appropriate to the KPI: Distribute or Repeat.

After this step: Sum accumulates period values. Checkpoint uses the relevant end-period level. Manual allows separately entered targets.

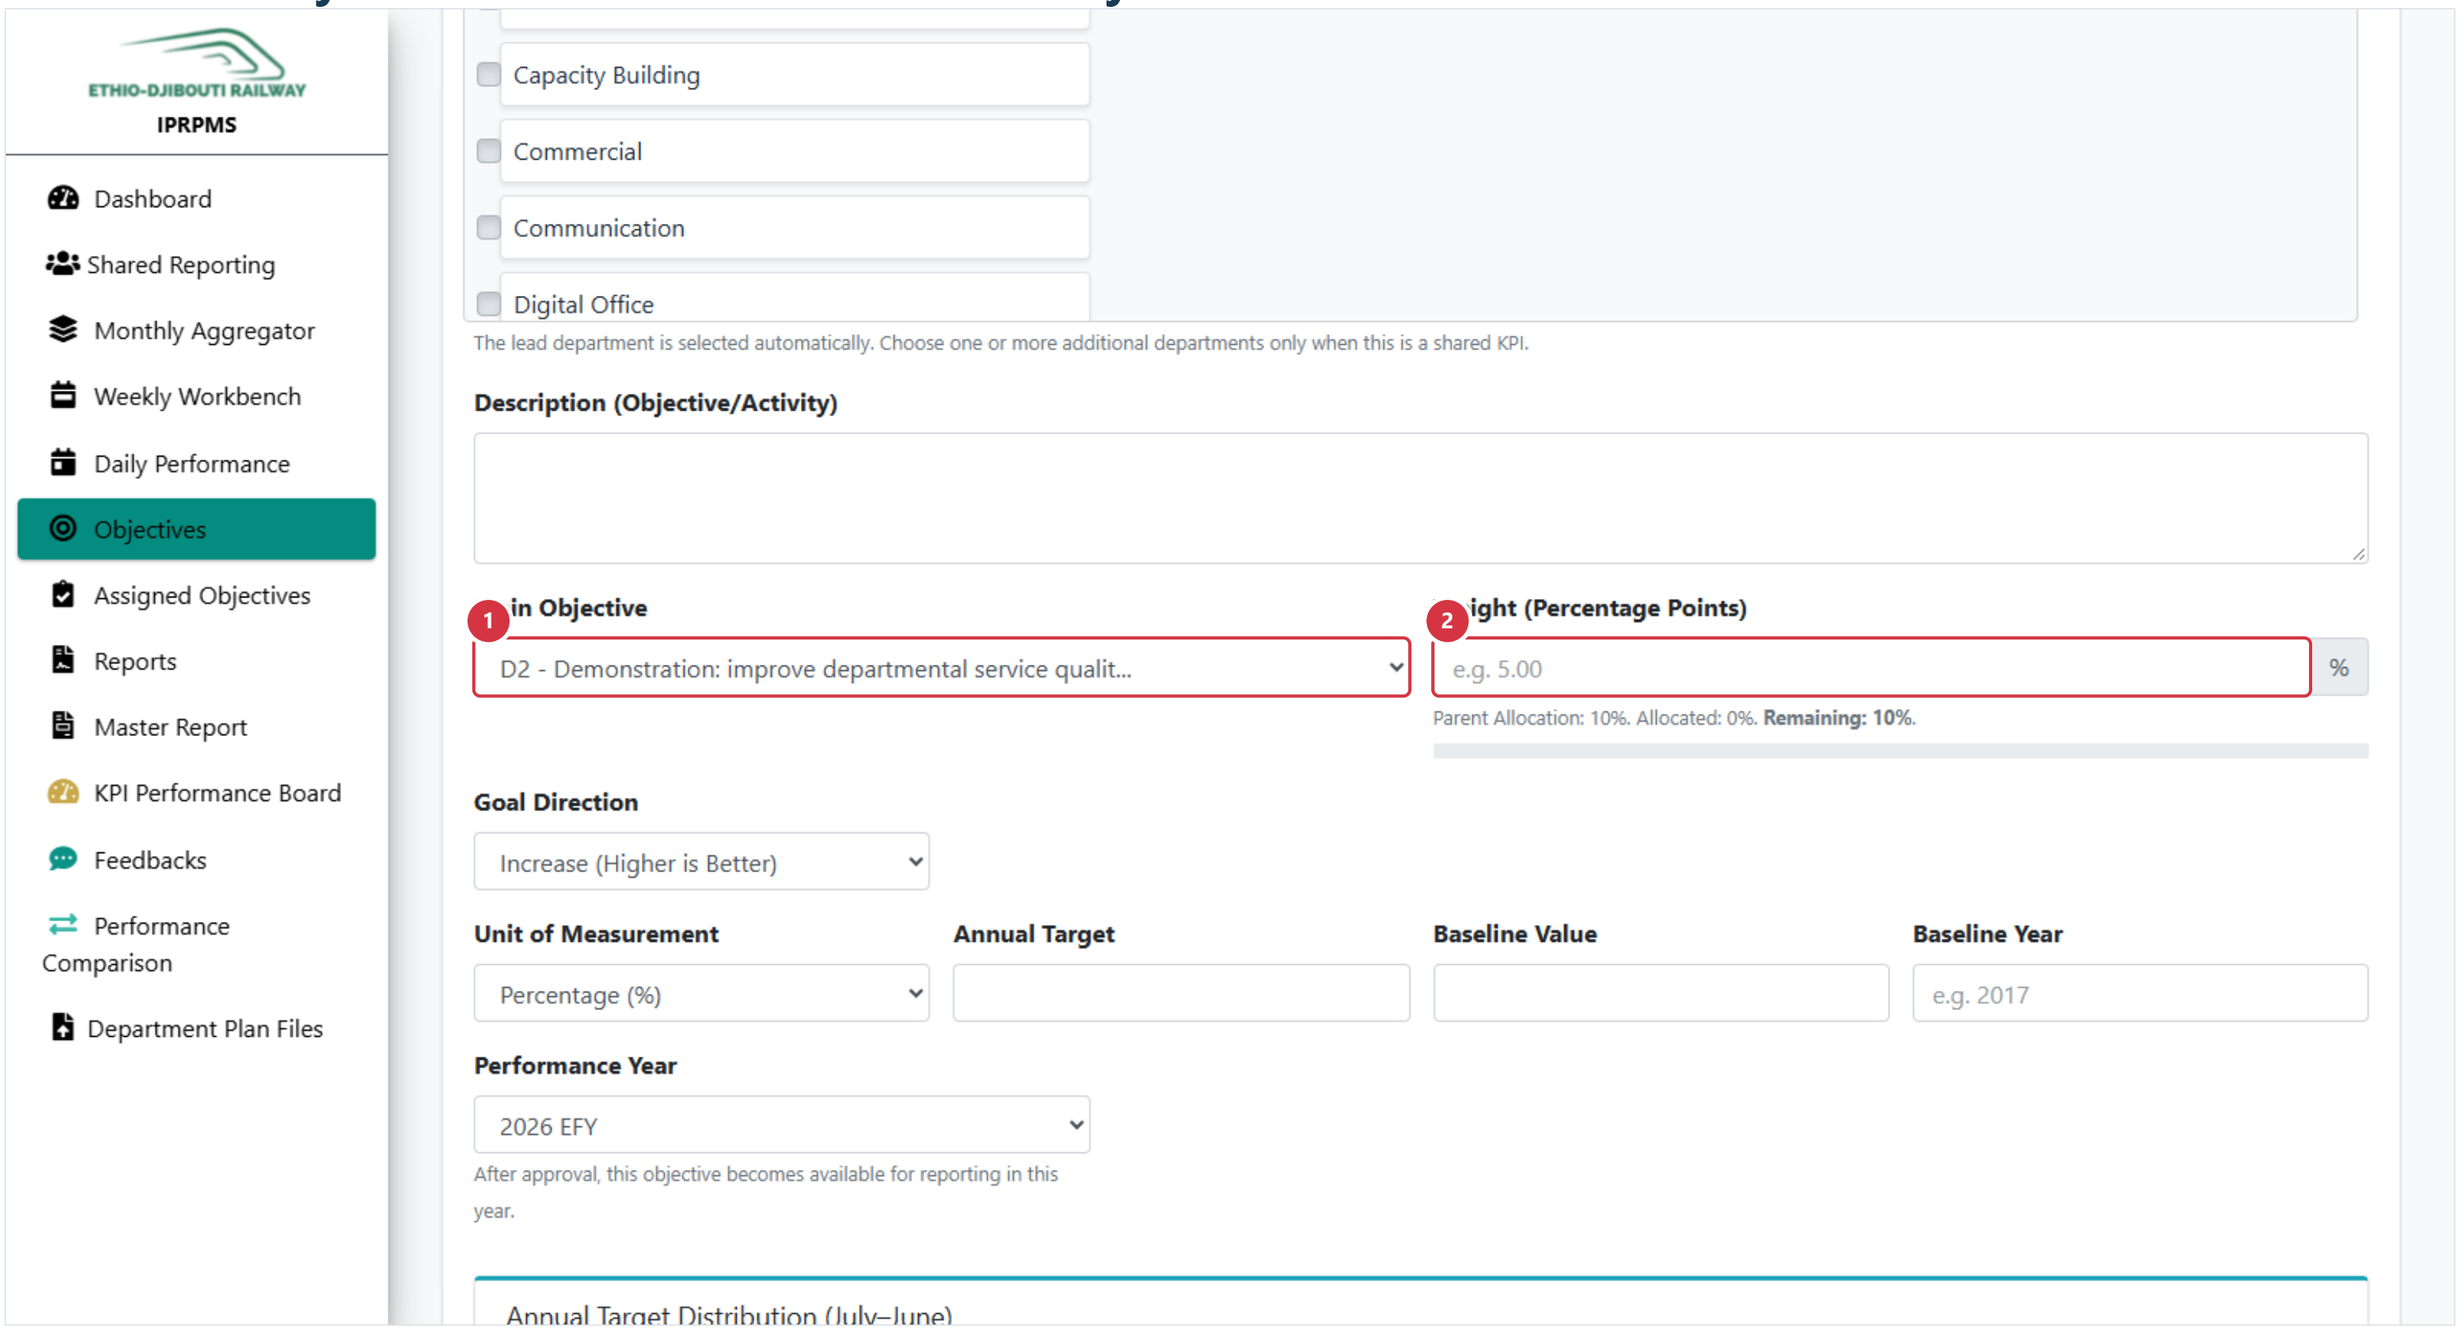

Create an objective: reporting frequency and rollup

1. Select Daily, Weekly or Monthly, or inherit the department default.
2. Choose whether the main objective weight comes from its direct sub objectives.
3. Choose how sub objective results roll up, then click Save Objective.

After this step: The frequency controls the performance entry screen. Save creates an editable draft.

Add a sub objective under the correct main objective

1. Confirm that Main Objective points to the intended main objective.
2. Enter the sub objective weight and complete its description, unit and targets.
3. Review performers and reporting frequency, then click Save Objective.

After this step: The form inherits performer defaults from the selected main objective. Review them before saving.

Optional: prepare objectives from an action-plan workbook

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

Workbook upload is another way to prepare the objective hierarchy. It belongs to objective planning, not to the separate logistics Import/Export module excluded from these manuals.

Before you click

Use the application template and the correct approved year. Keep codes as text so 11.20 is not converted to 11.2. Preserve the original file and work with a reviewed copy.

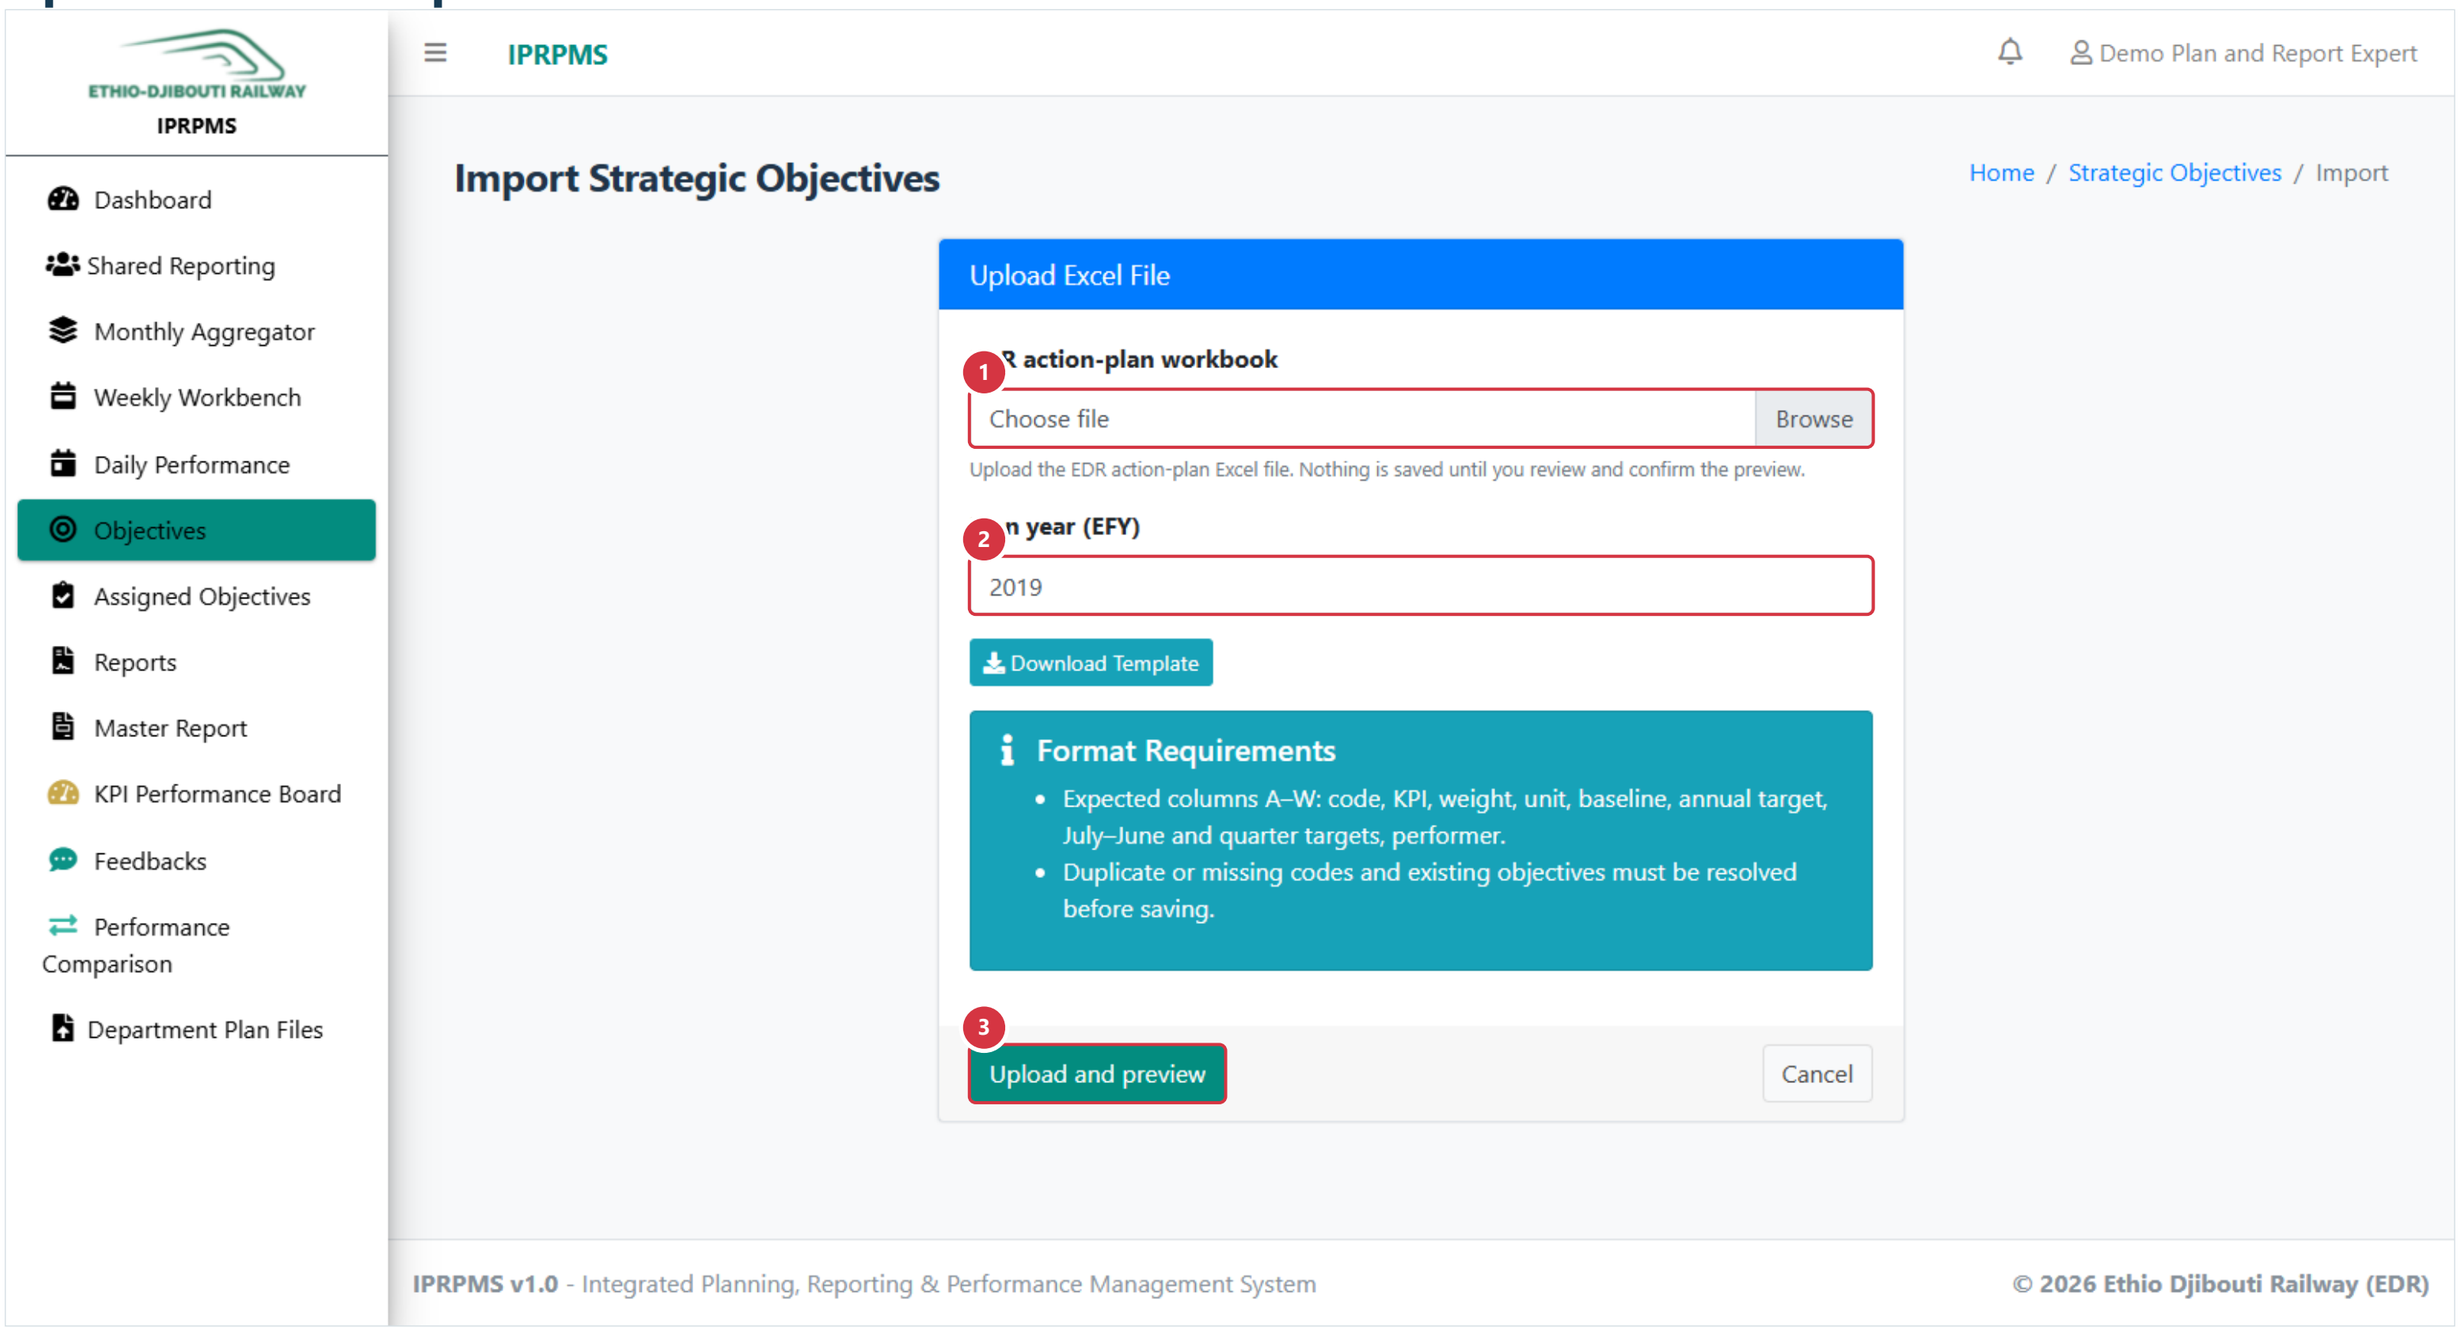

What to check

Review the preview before confirming. Check performer department matches, duplicates, units, target periods and calculation rules. Similar wording does not prove two activities are the same KPI.

How you know it worked

The imported items are available for review in Objectives. Inspect them and follow the same Expert, Directorate and Chief planning workflow; an uploaded file is not a substitute for approval.

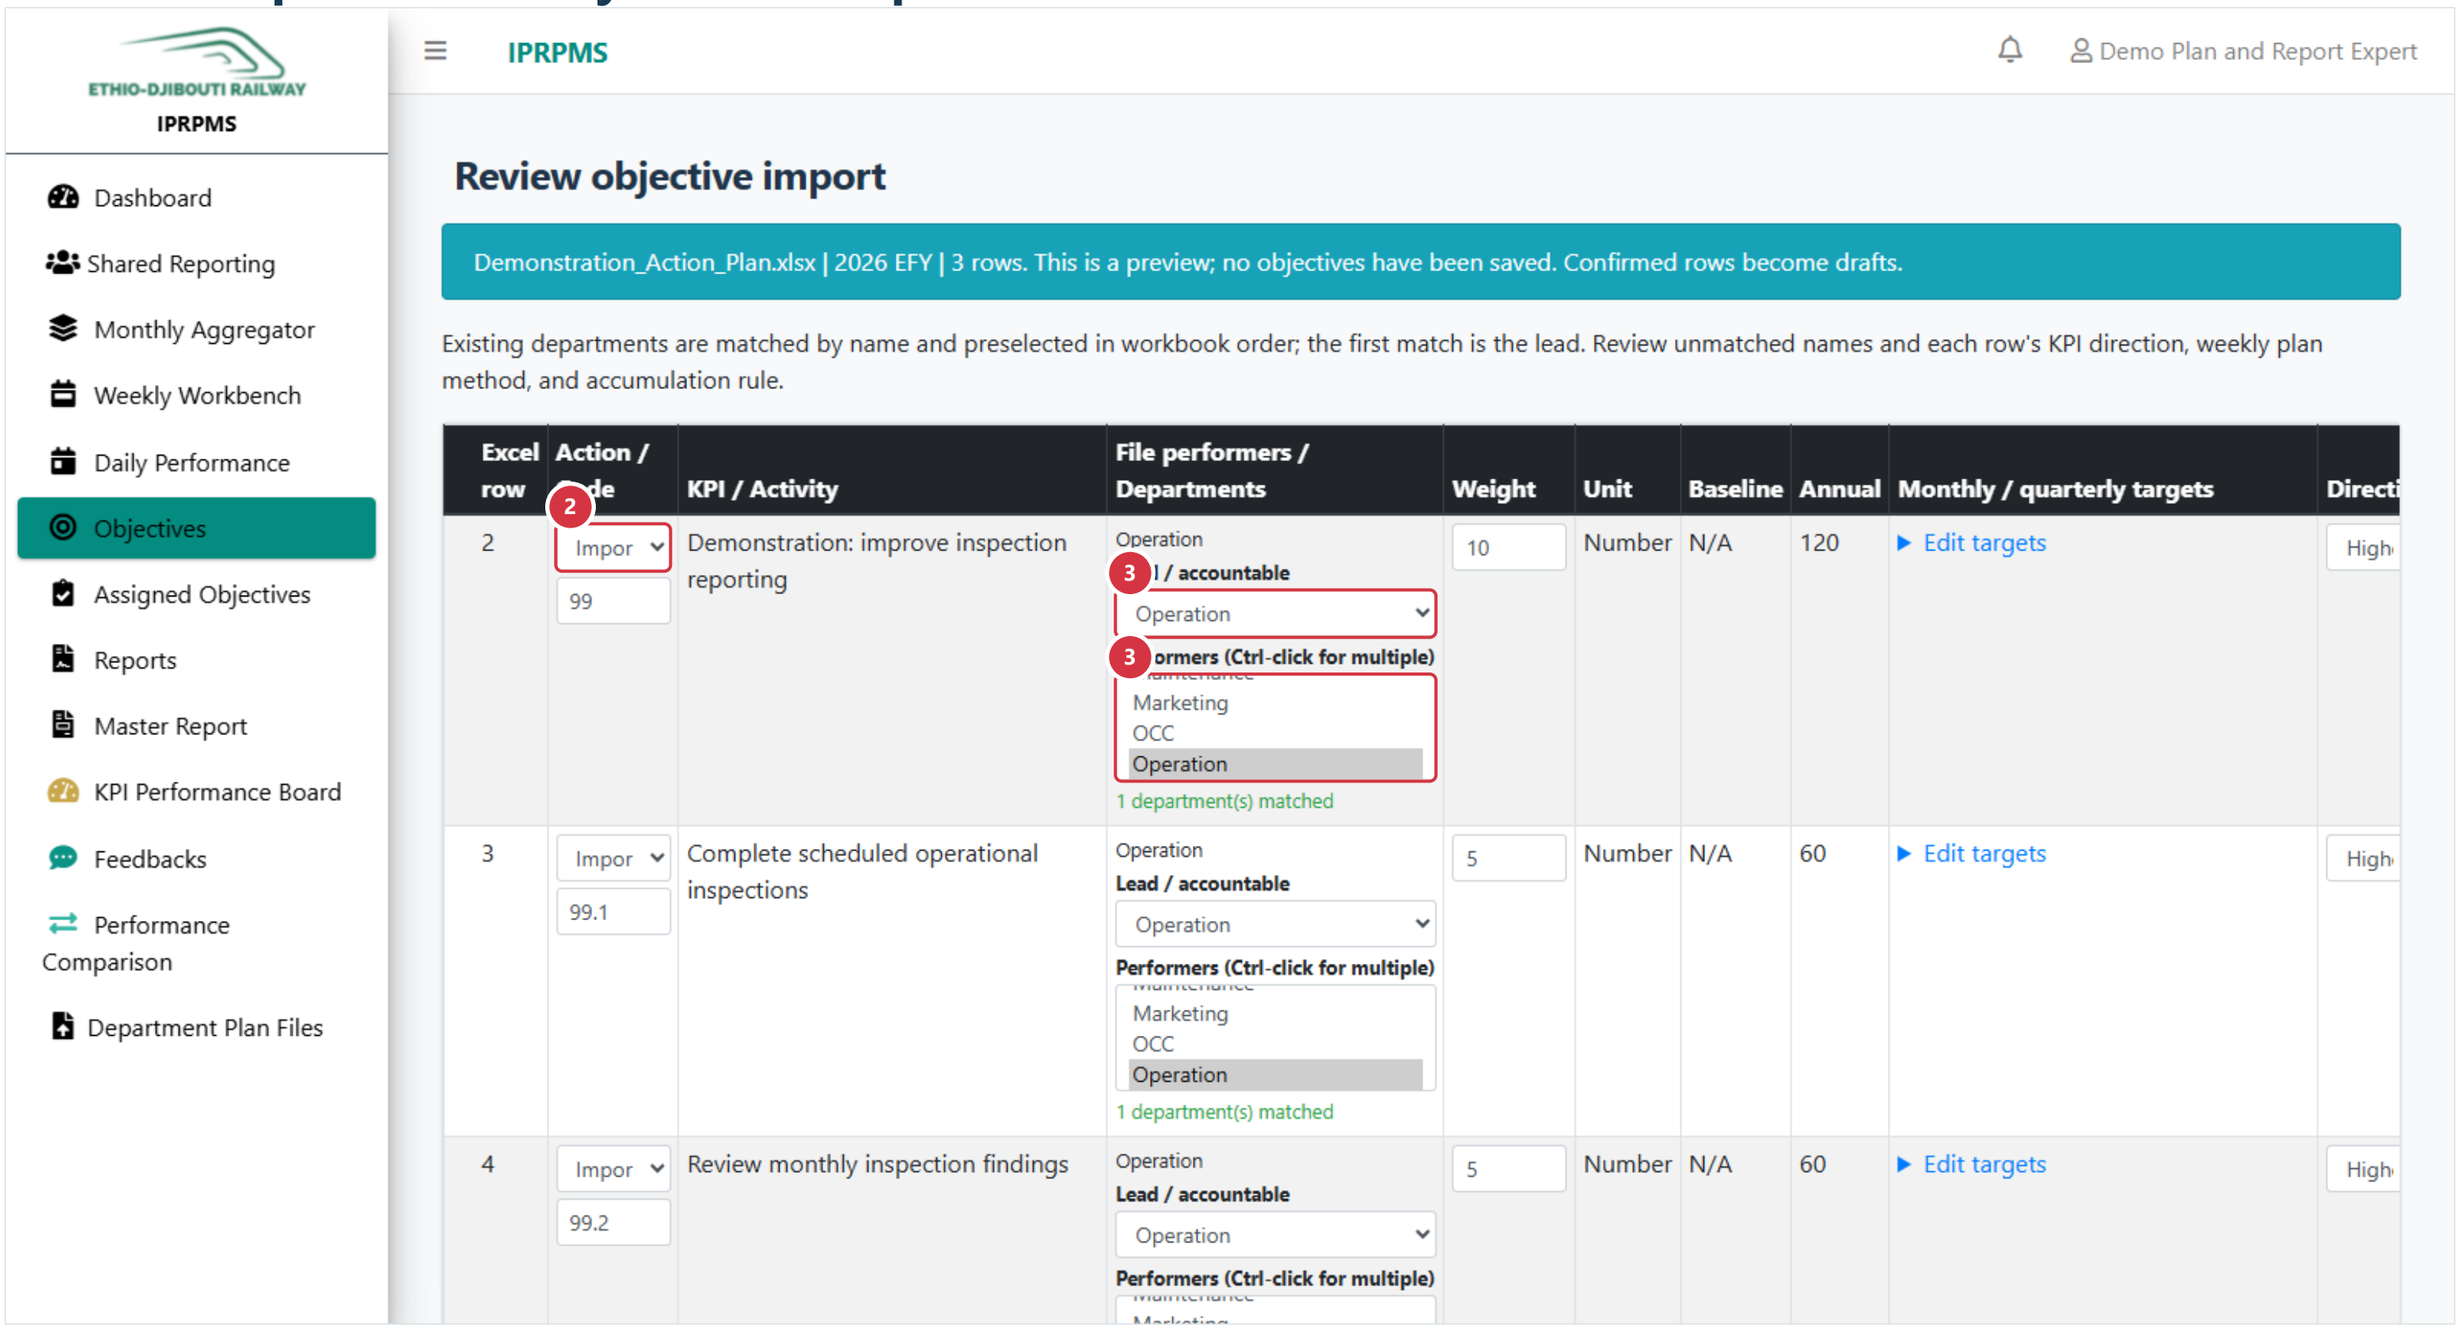

Upload an action-plan workbook

1. Choose the EDR action-plan workbook.
2. Confirm Plan year (EFY).
3. Click Upload and preview.

After this step: The preview lets you check codes, department matches, weights and period targets before saving drafts.

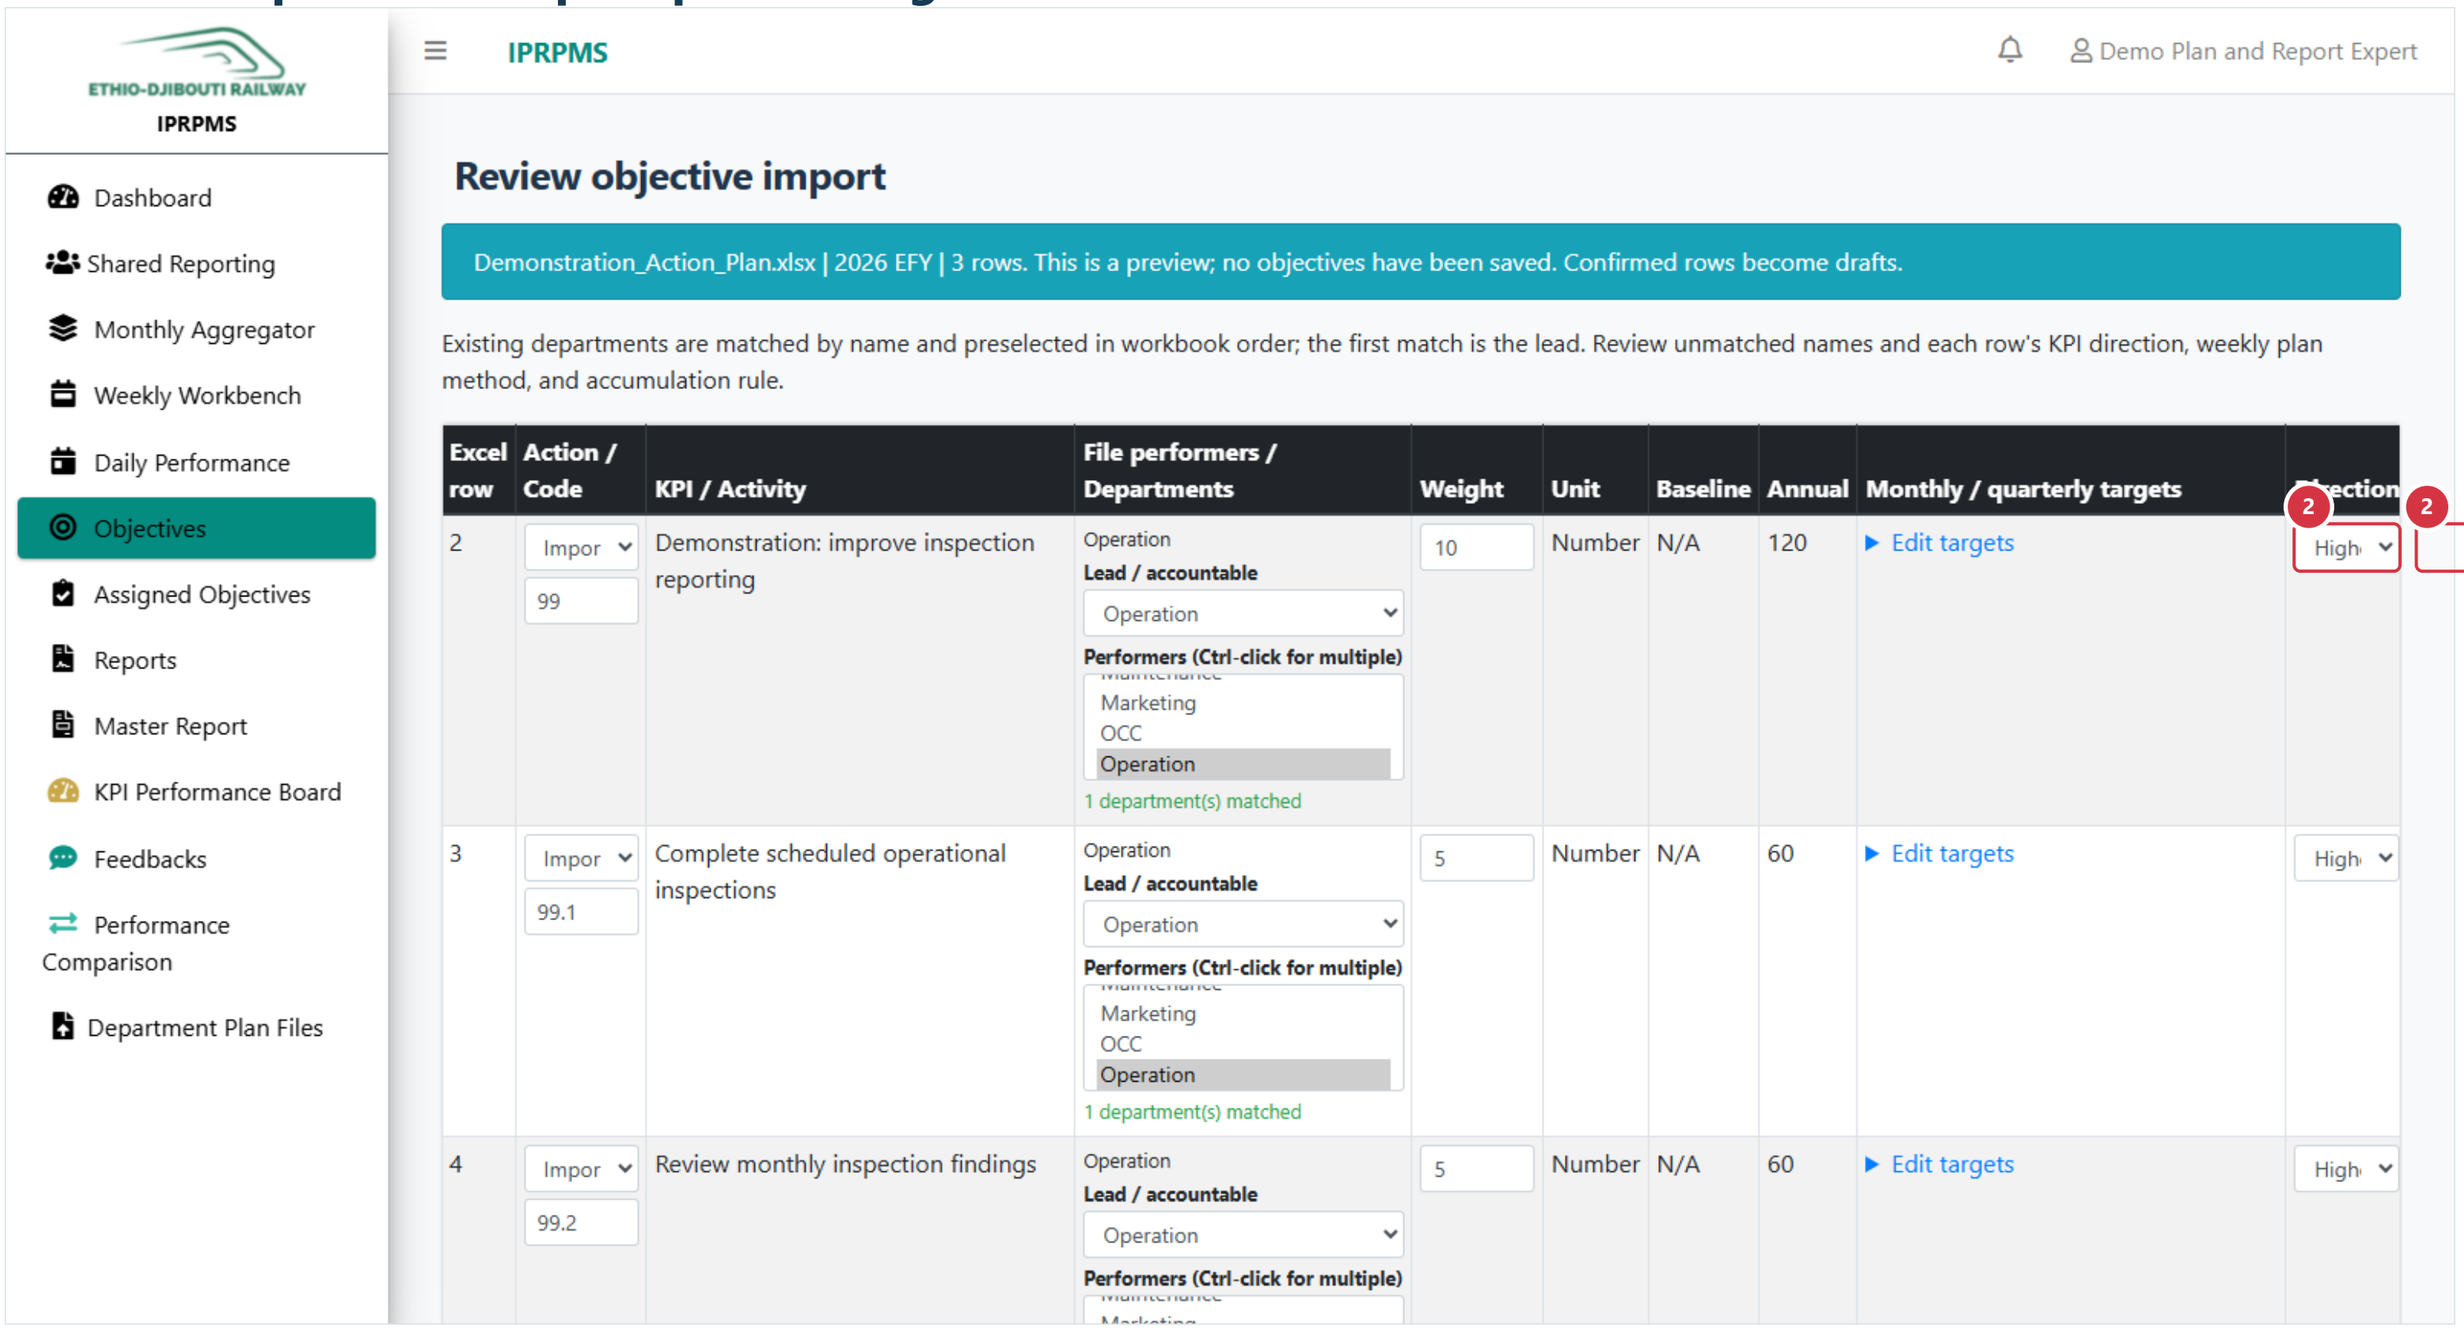

Workbook preview: verify codes and performer matches

1. Review each parsed code, description and department match.
2. Choose Import draft or Skip per row.
3. Confirm the lead department and contributing performers before saving.

After this step: This is the actual preview produced by uploading and parsing the demonstration workbook.

Workbook preview: inspect period targets and calculation rules

1. Scroll across the preview table to inspect targets and calculation settings.
2. Choose the correct Goal Direction and Reporting Frequency.
3. Check weekly mode and target distribution, then Validate and save drafts.

After this step: Duplicate codes, unconfirmed department matches or invalid settings must be resolved before the import can save.

Submit the plan and keep changes traceable

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

The Plan and Report Expert prepares the draft. Its Directorate checks it. The Plan and Report Chief makes the final planning decision. Reviewers may make permitted corrections before approval, but must explain their changes.

Before you click

Open Objectives, expand the main objective and check the whole hierarchy. Assigned Objectives is the later departmental assignment screen, not the place to submit the organization's draft plan.

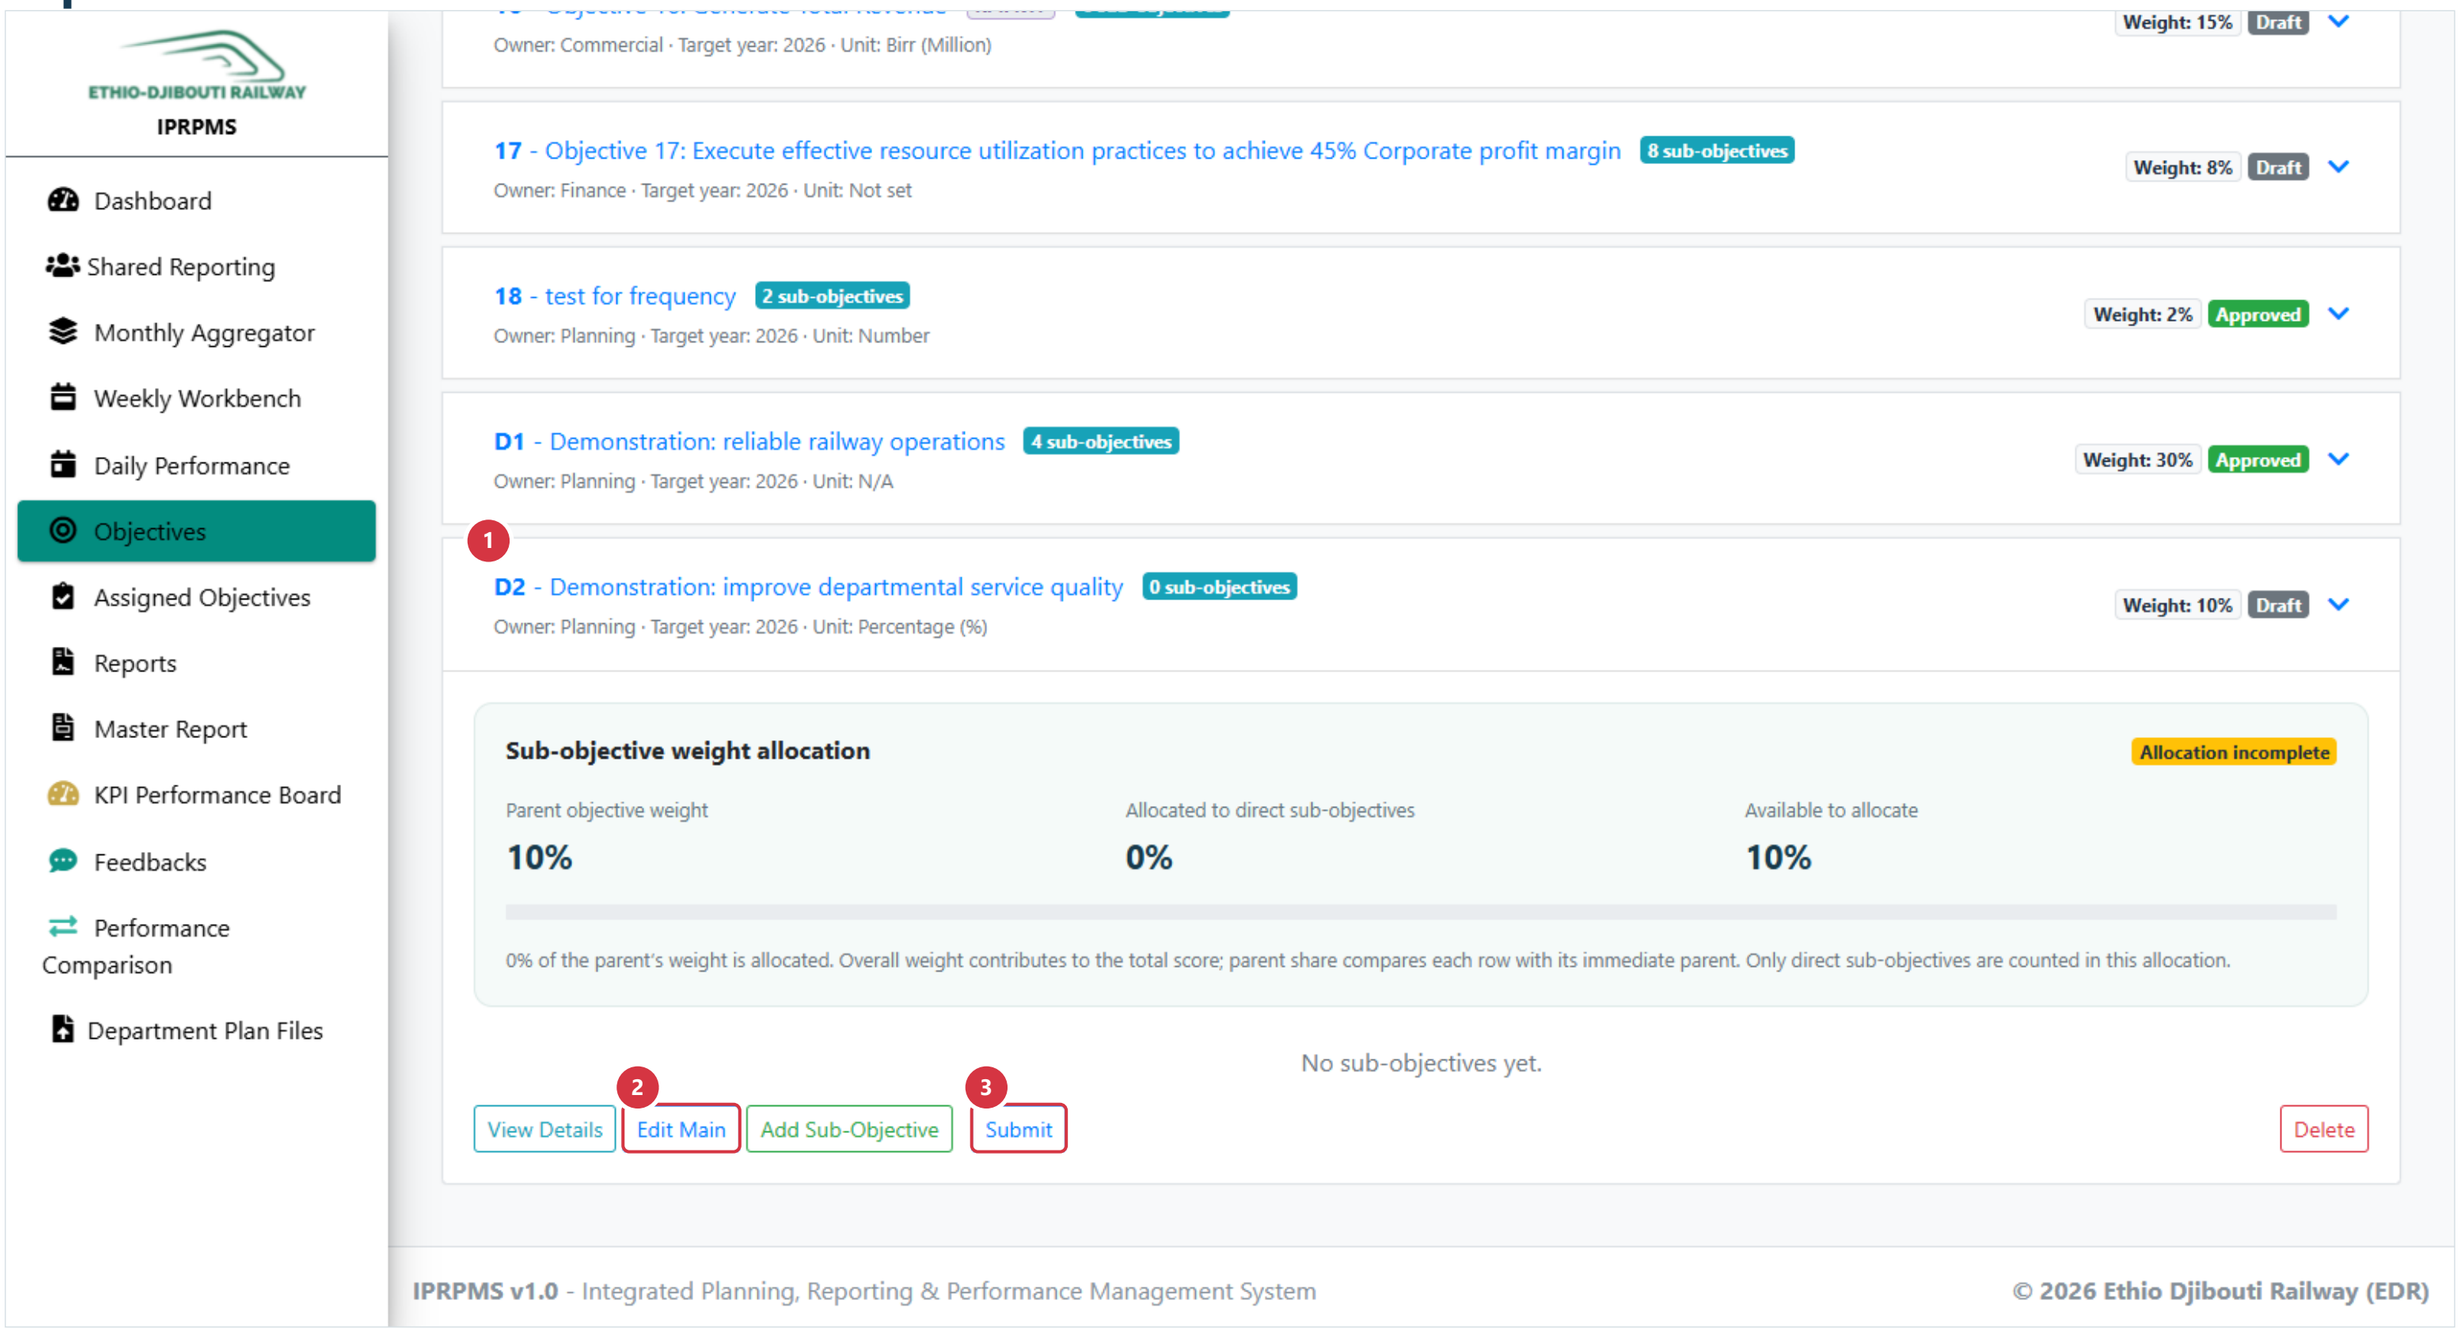

What to check

Check descriptions, units, targets, period schedules, annual weights, performers, frequency and KPI identity. If already submitted, request recall with a reason instead of silently editing a locked record.

How you know it worked

Click Submit and confirm. Read the status badge to see the next reviewer. A returned or recalled record becomes editable under its workflow rules; read the reason, correct it and submit the same record again.

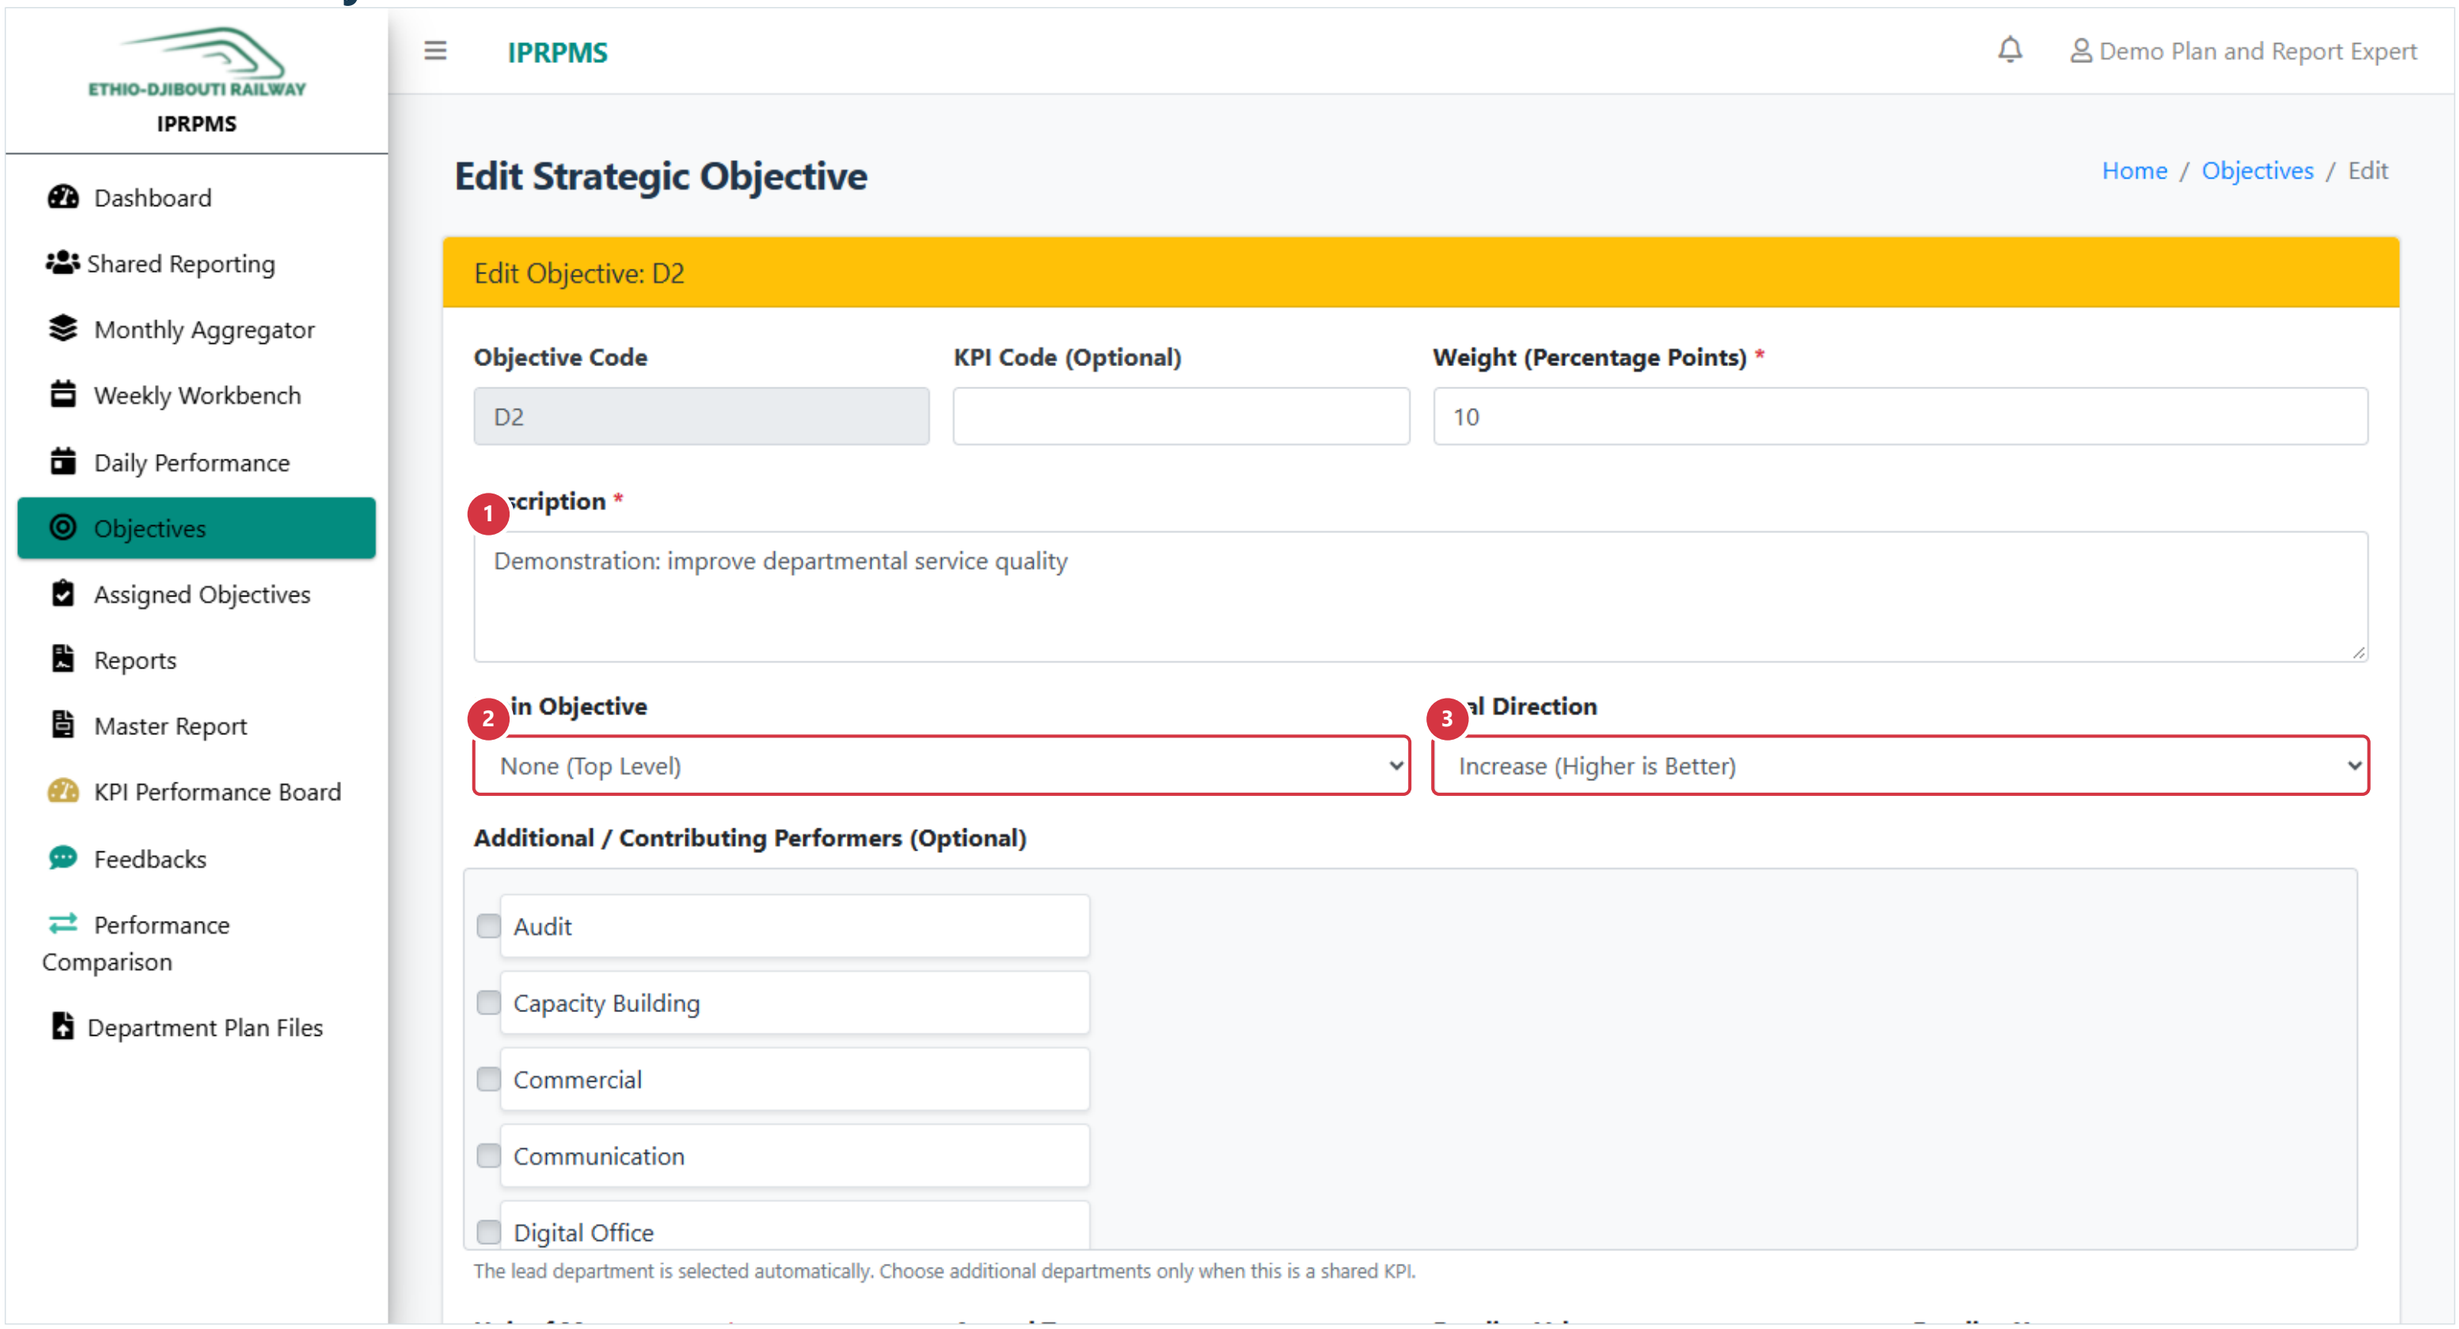

Expand a draft and find the action controls

1. Click the main objective heading to expand it.
2. Use Edit Main to review or correct its fields.
3. Use Submit when the main/sub objective hierarchy is ready for review.

After this step: The expanded controls belong to the selected main objective and its hierarchy.

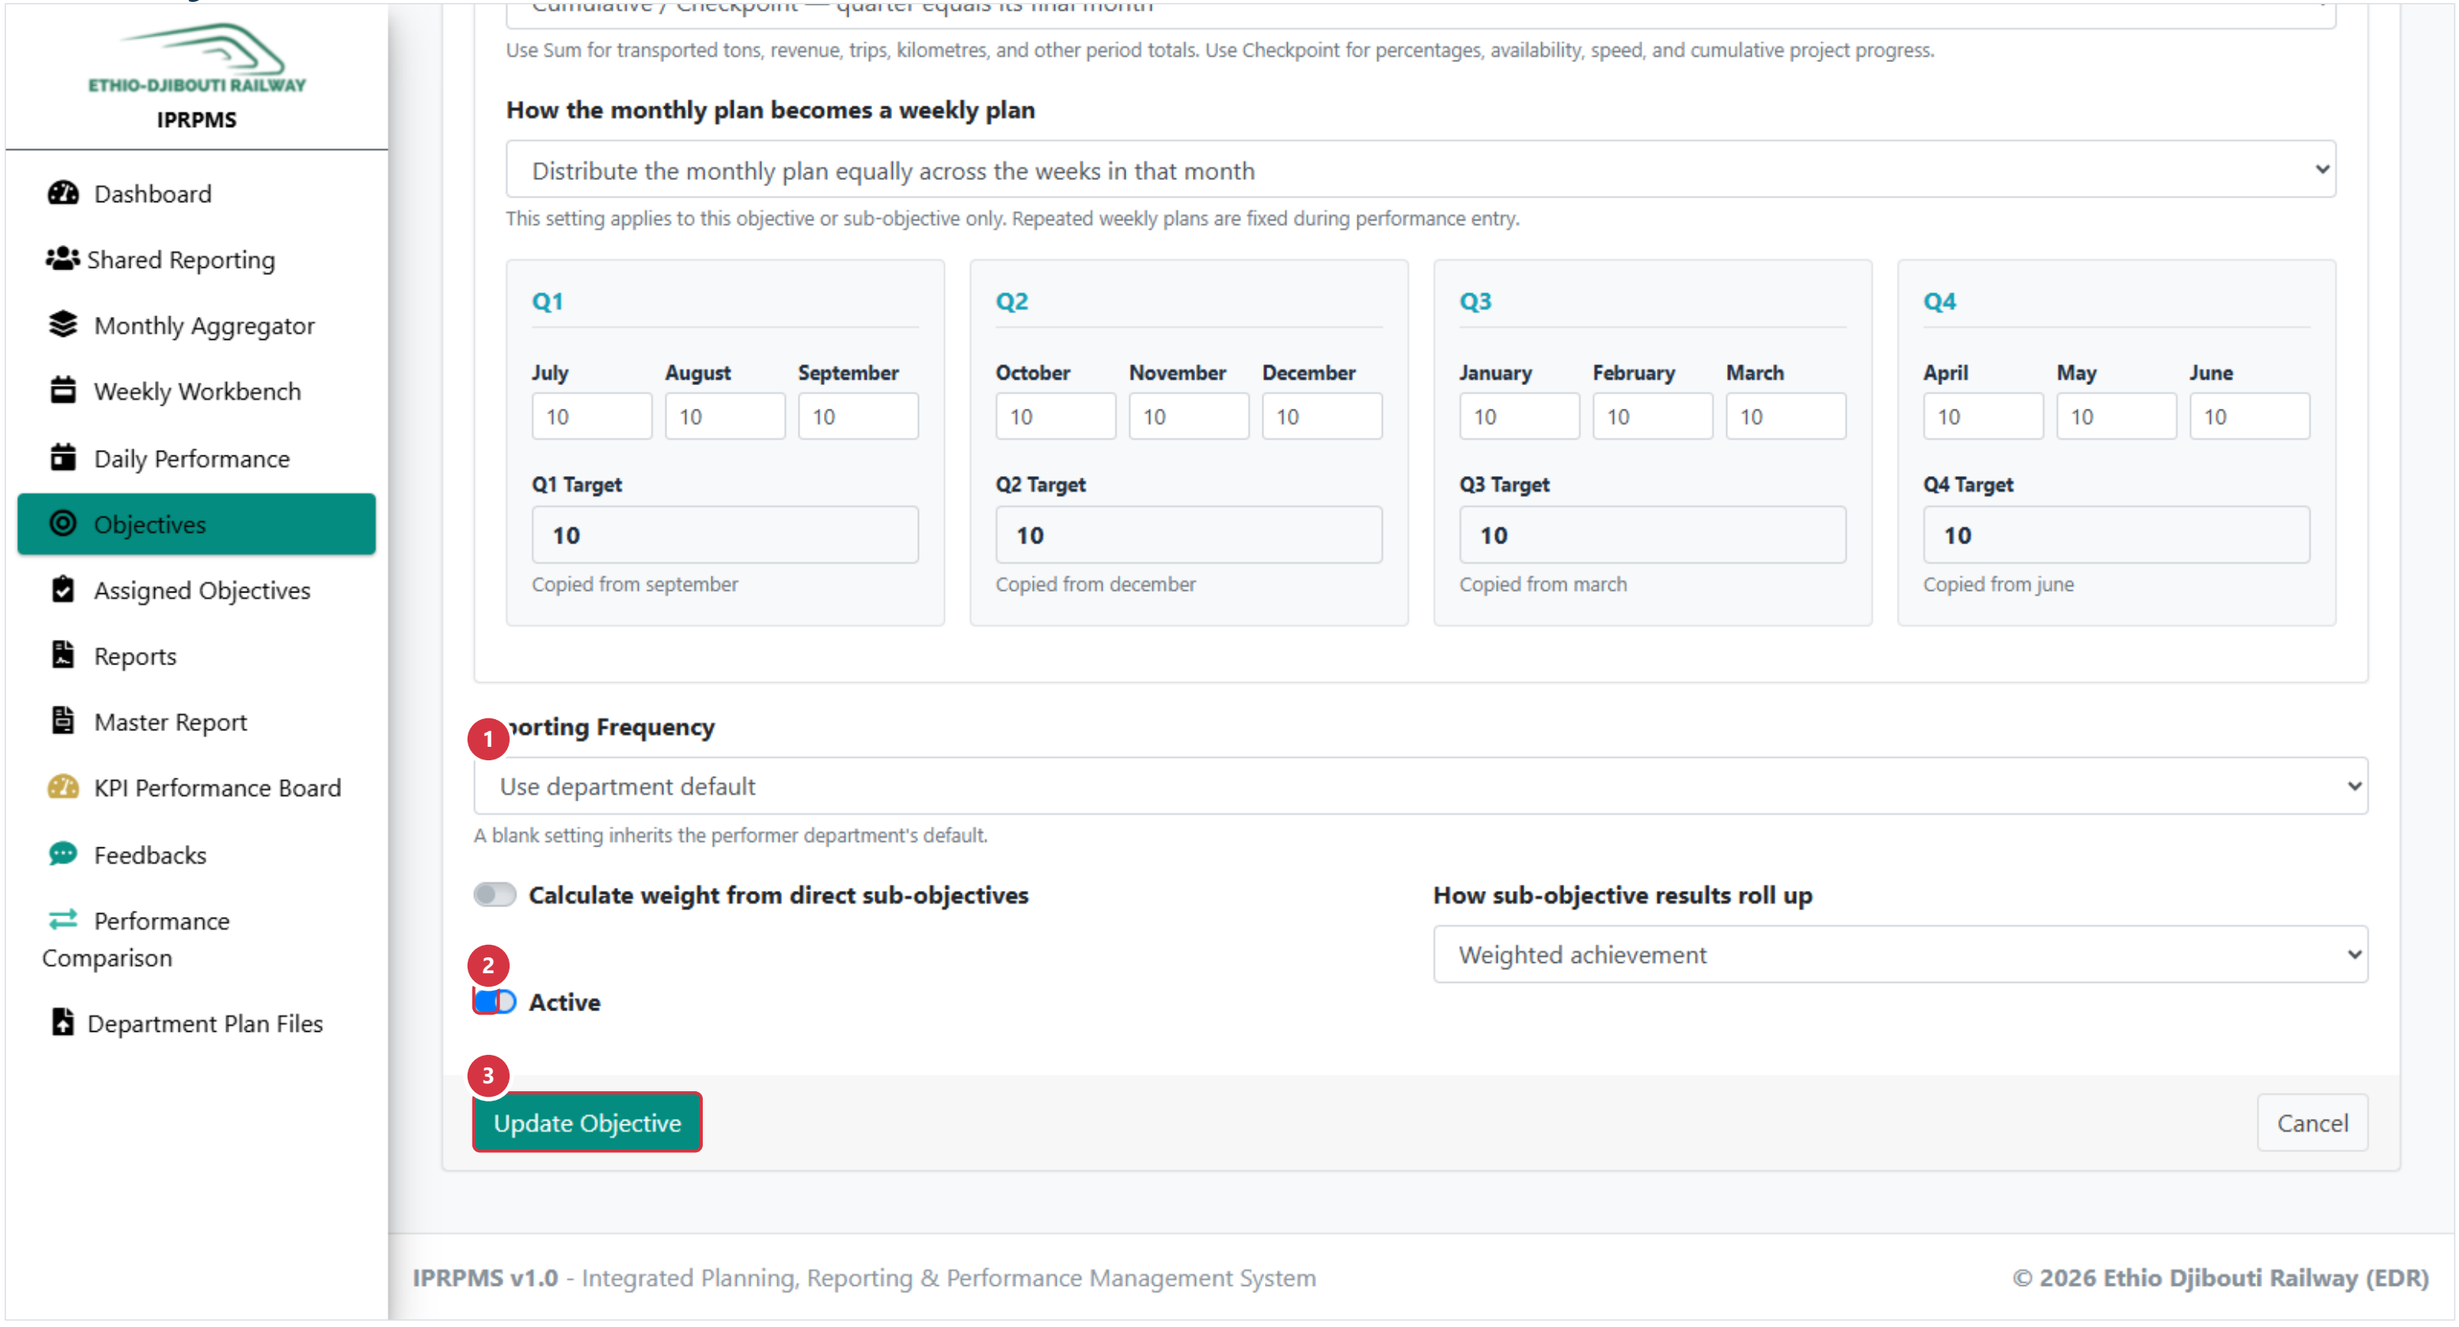

Edit a draft objective

1. Correct the objective Description.
2. Confirm the Main Objective hierarchy.
3. Check Goal Direction and other relevant fields before updating.

After this step: Only permitted roles can edit at the record current workflow stage.

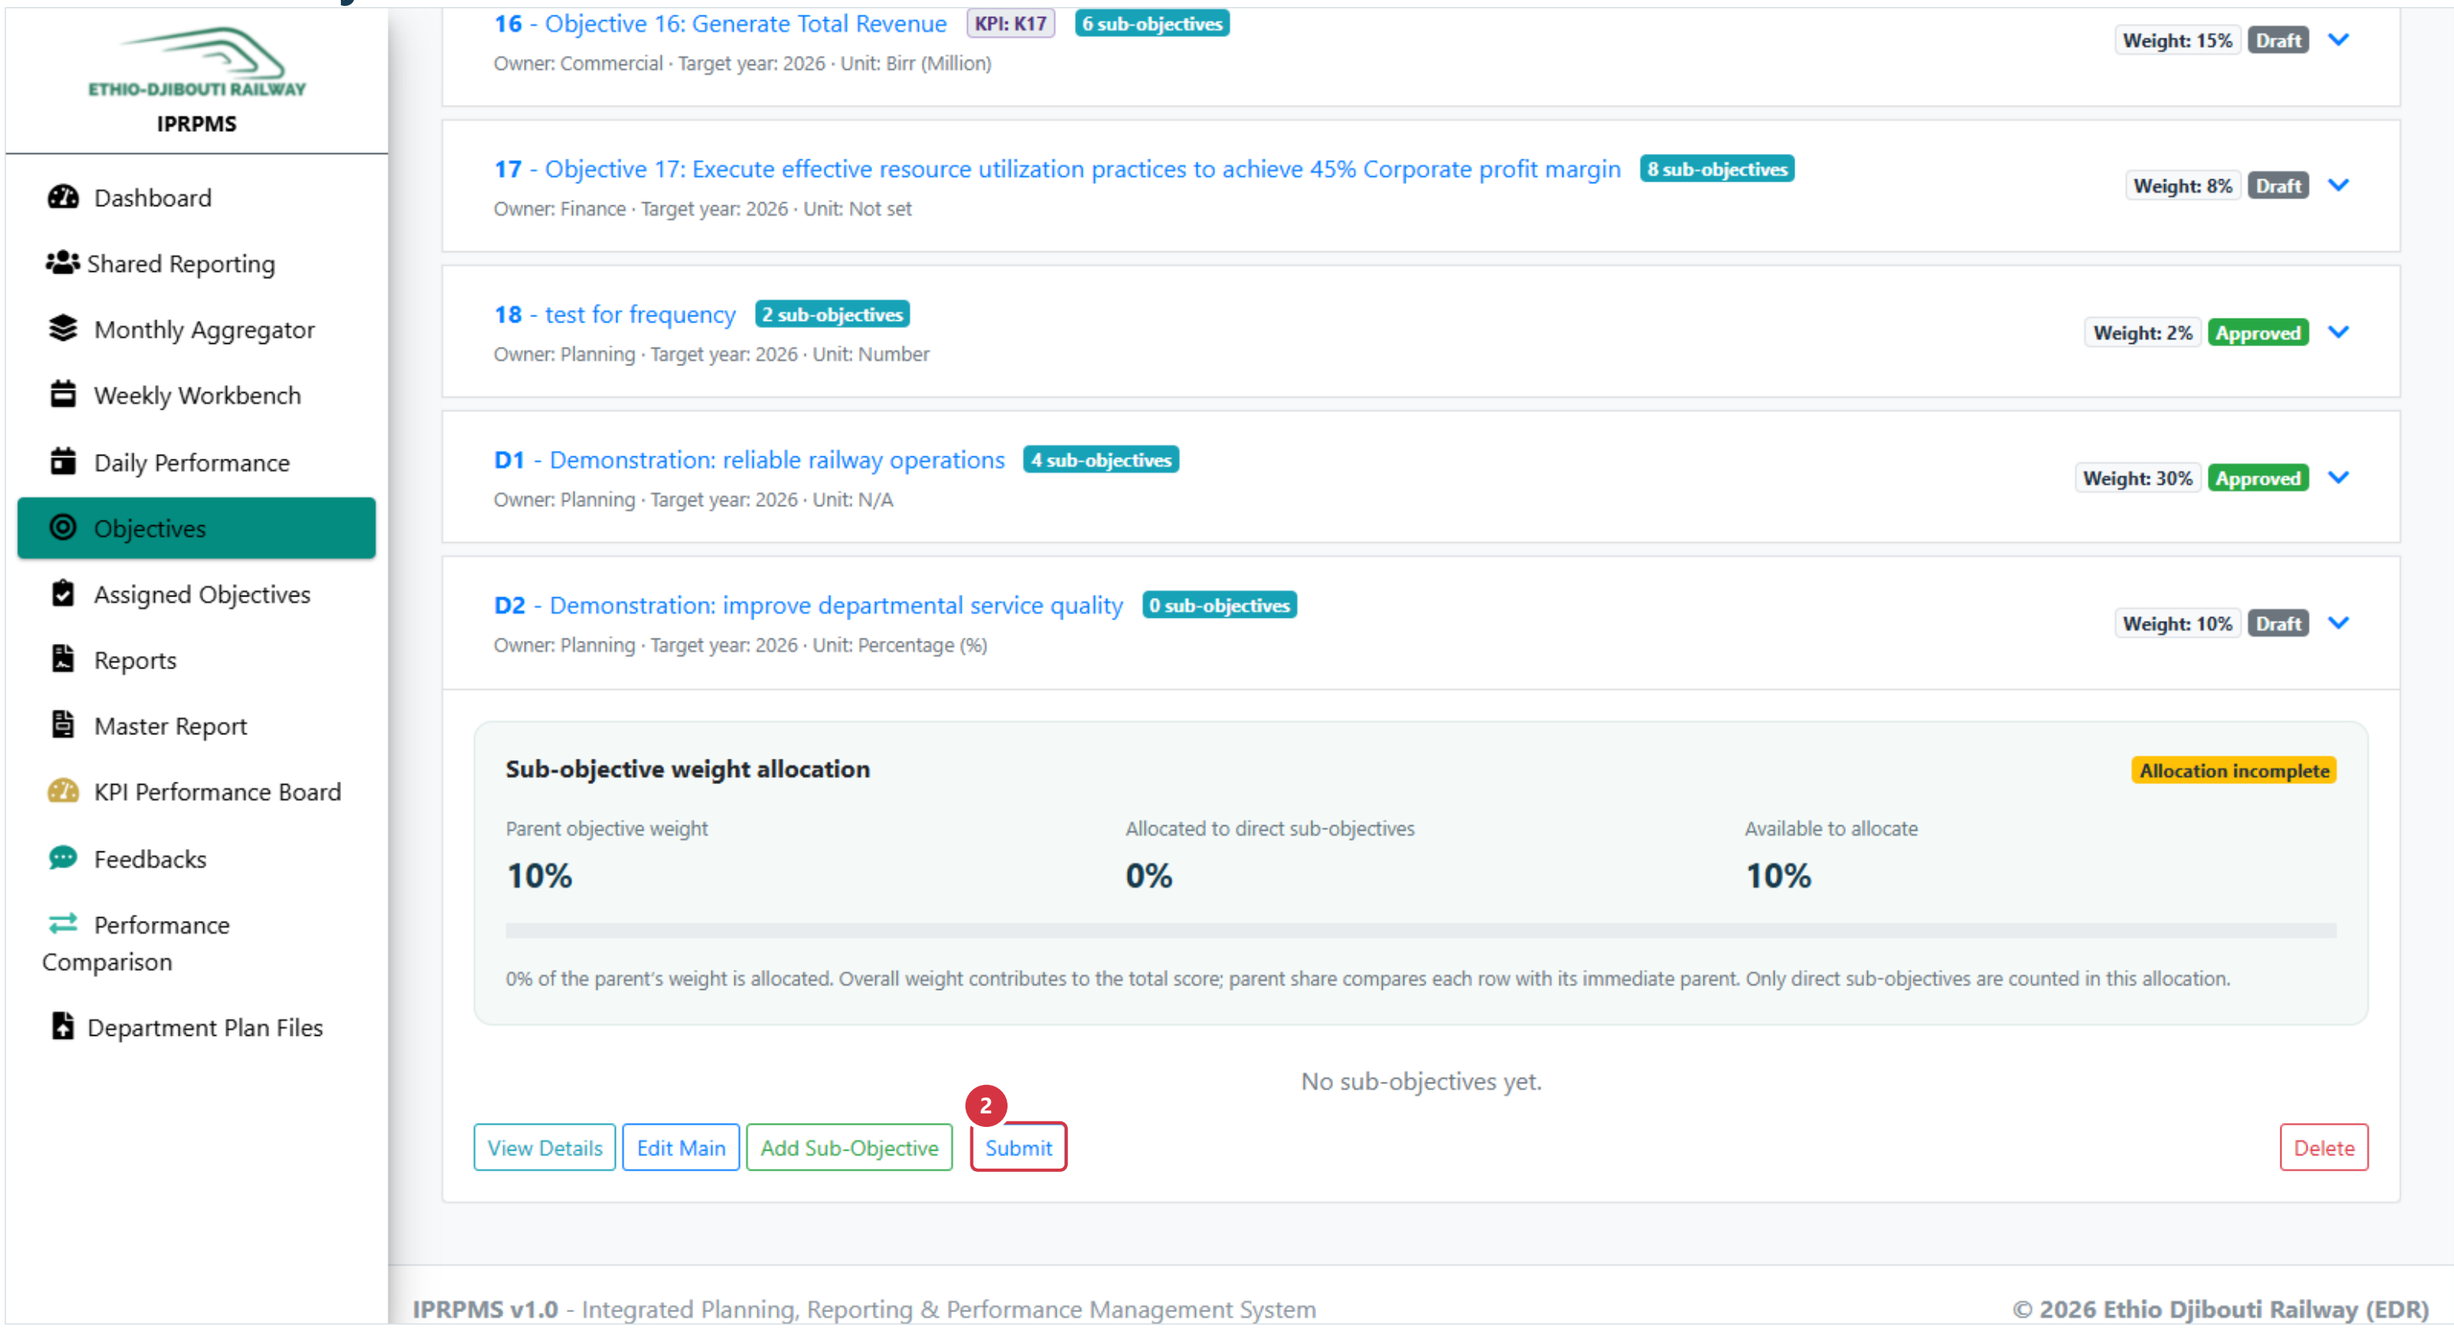

Save objective corrections

1. Review the reporting frequency and rollup settings.
2. Confirm whether the objective remains Active.
3. Click Update Objective.

After this step: Reviewers must also enter a reason when the reviewer-change field is required.

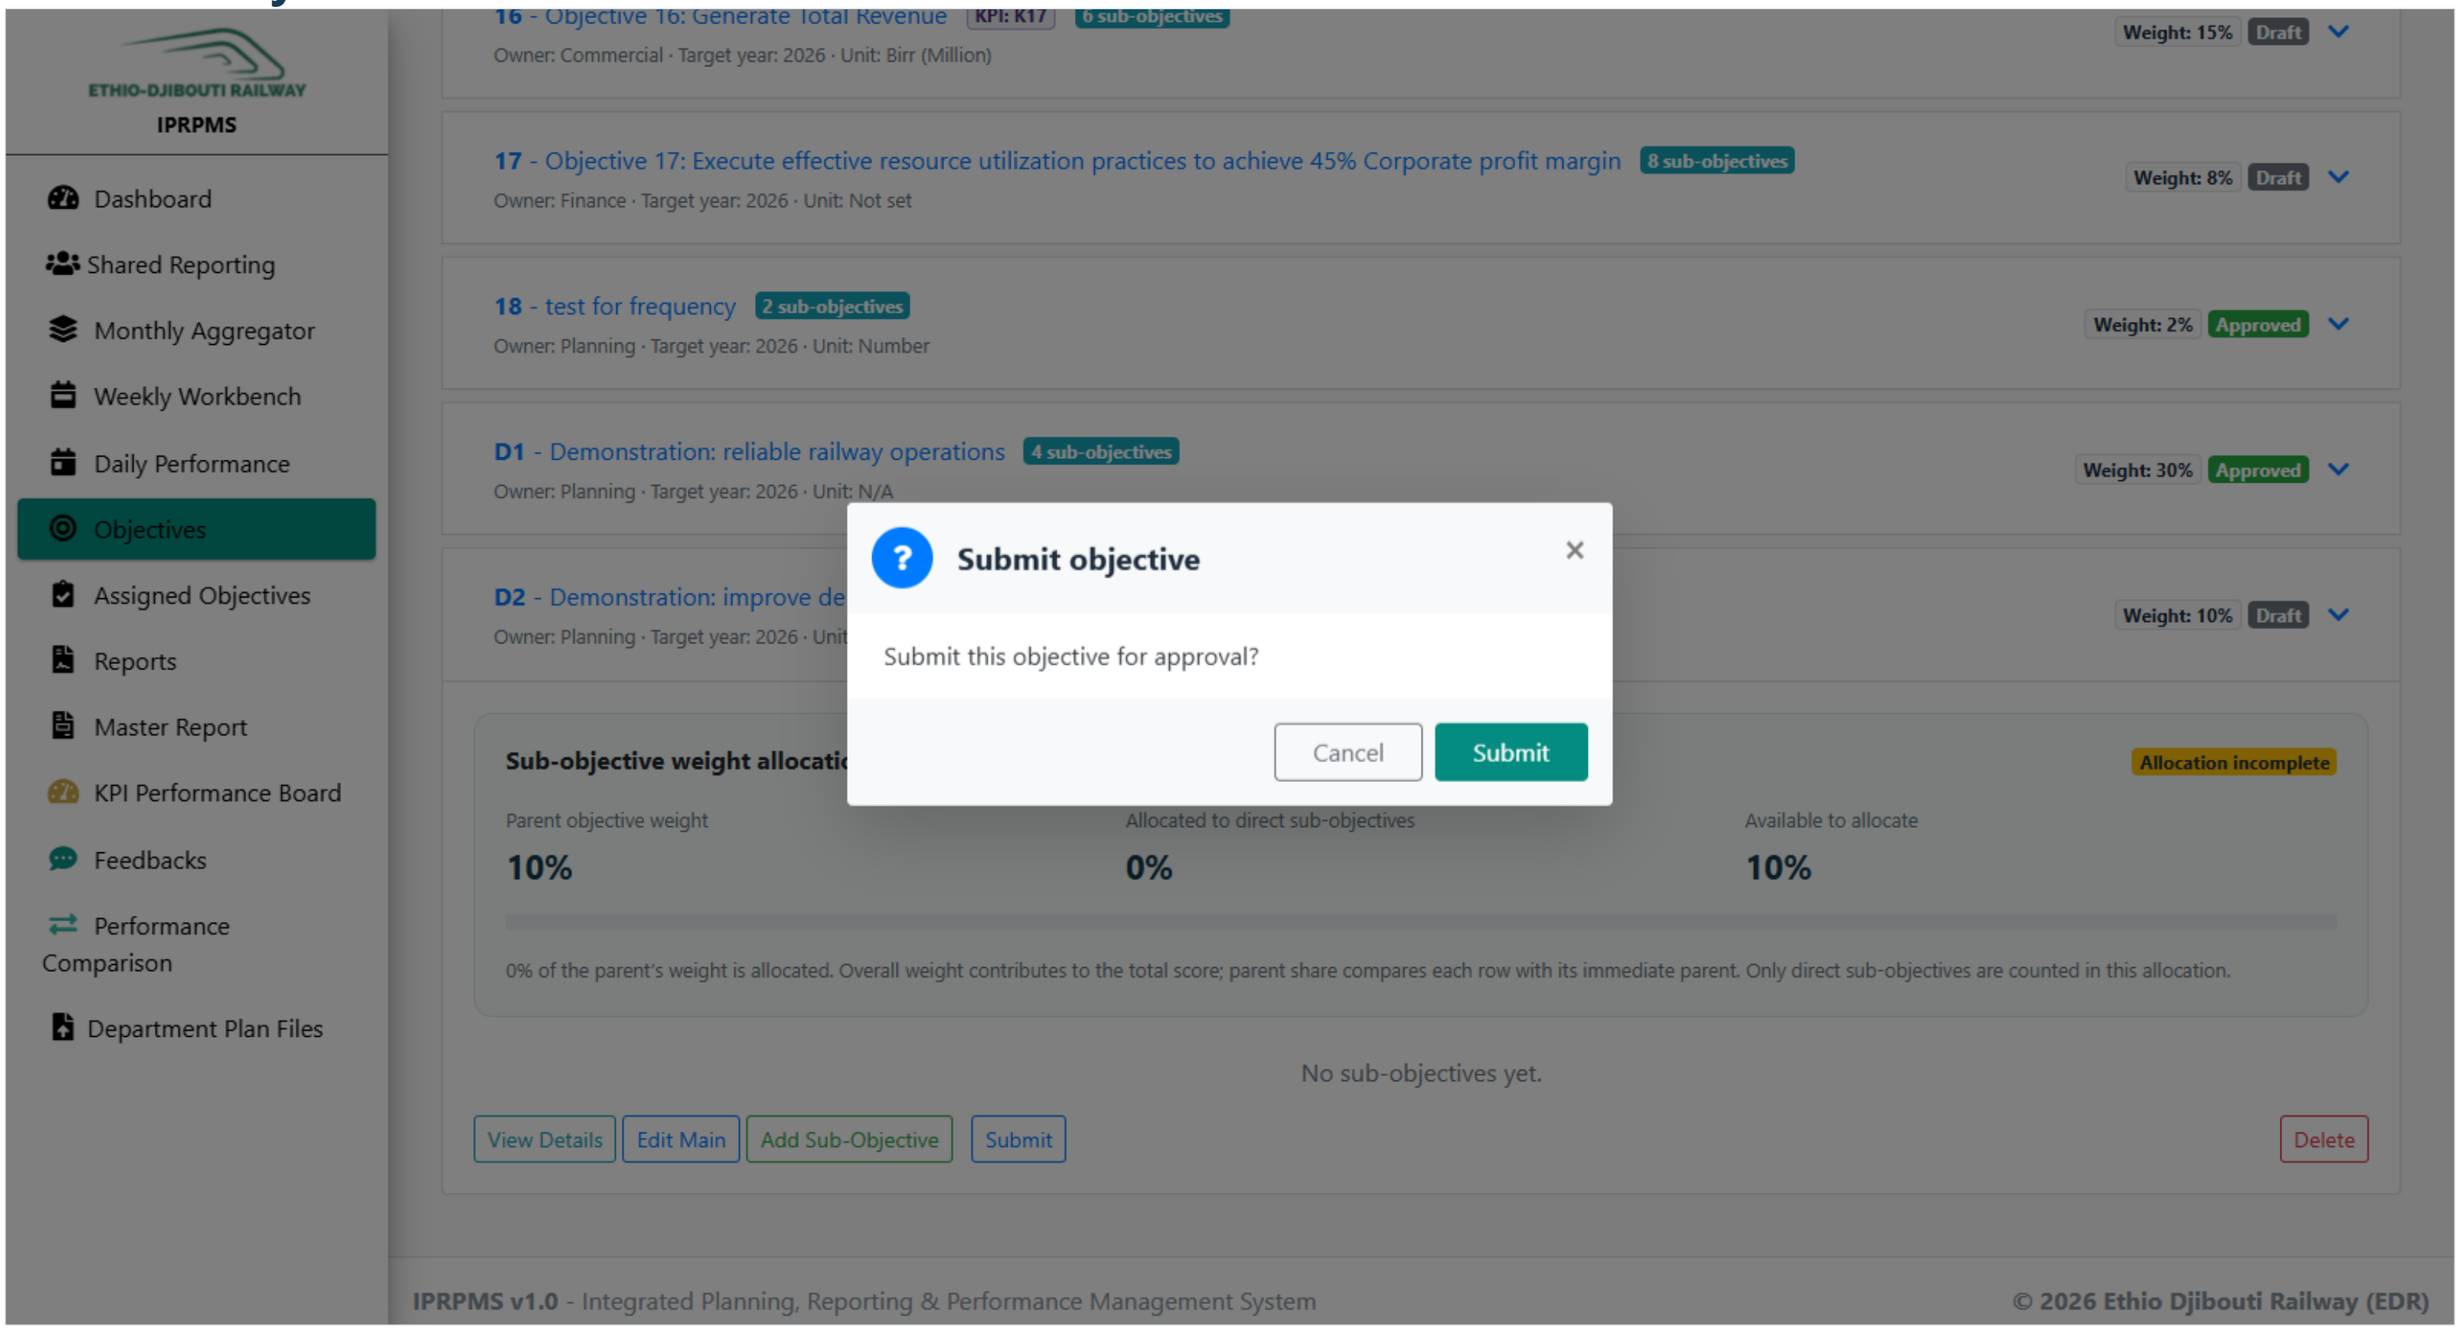

Submit the objective for Directorate review

1. Expand the completed draft.
2. Click Submit.
3. Confirm the submission in the confirmation dialog.

After this step: The objective moves to Submitted to Plan Report Directorate. The Expert can request recall if further edits are needed.

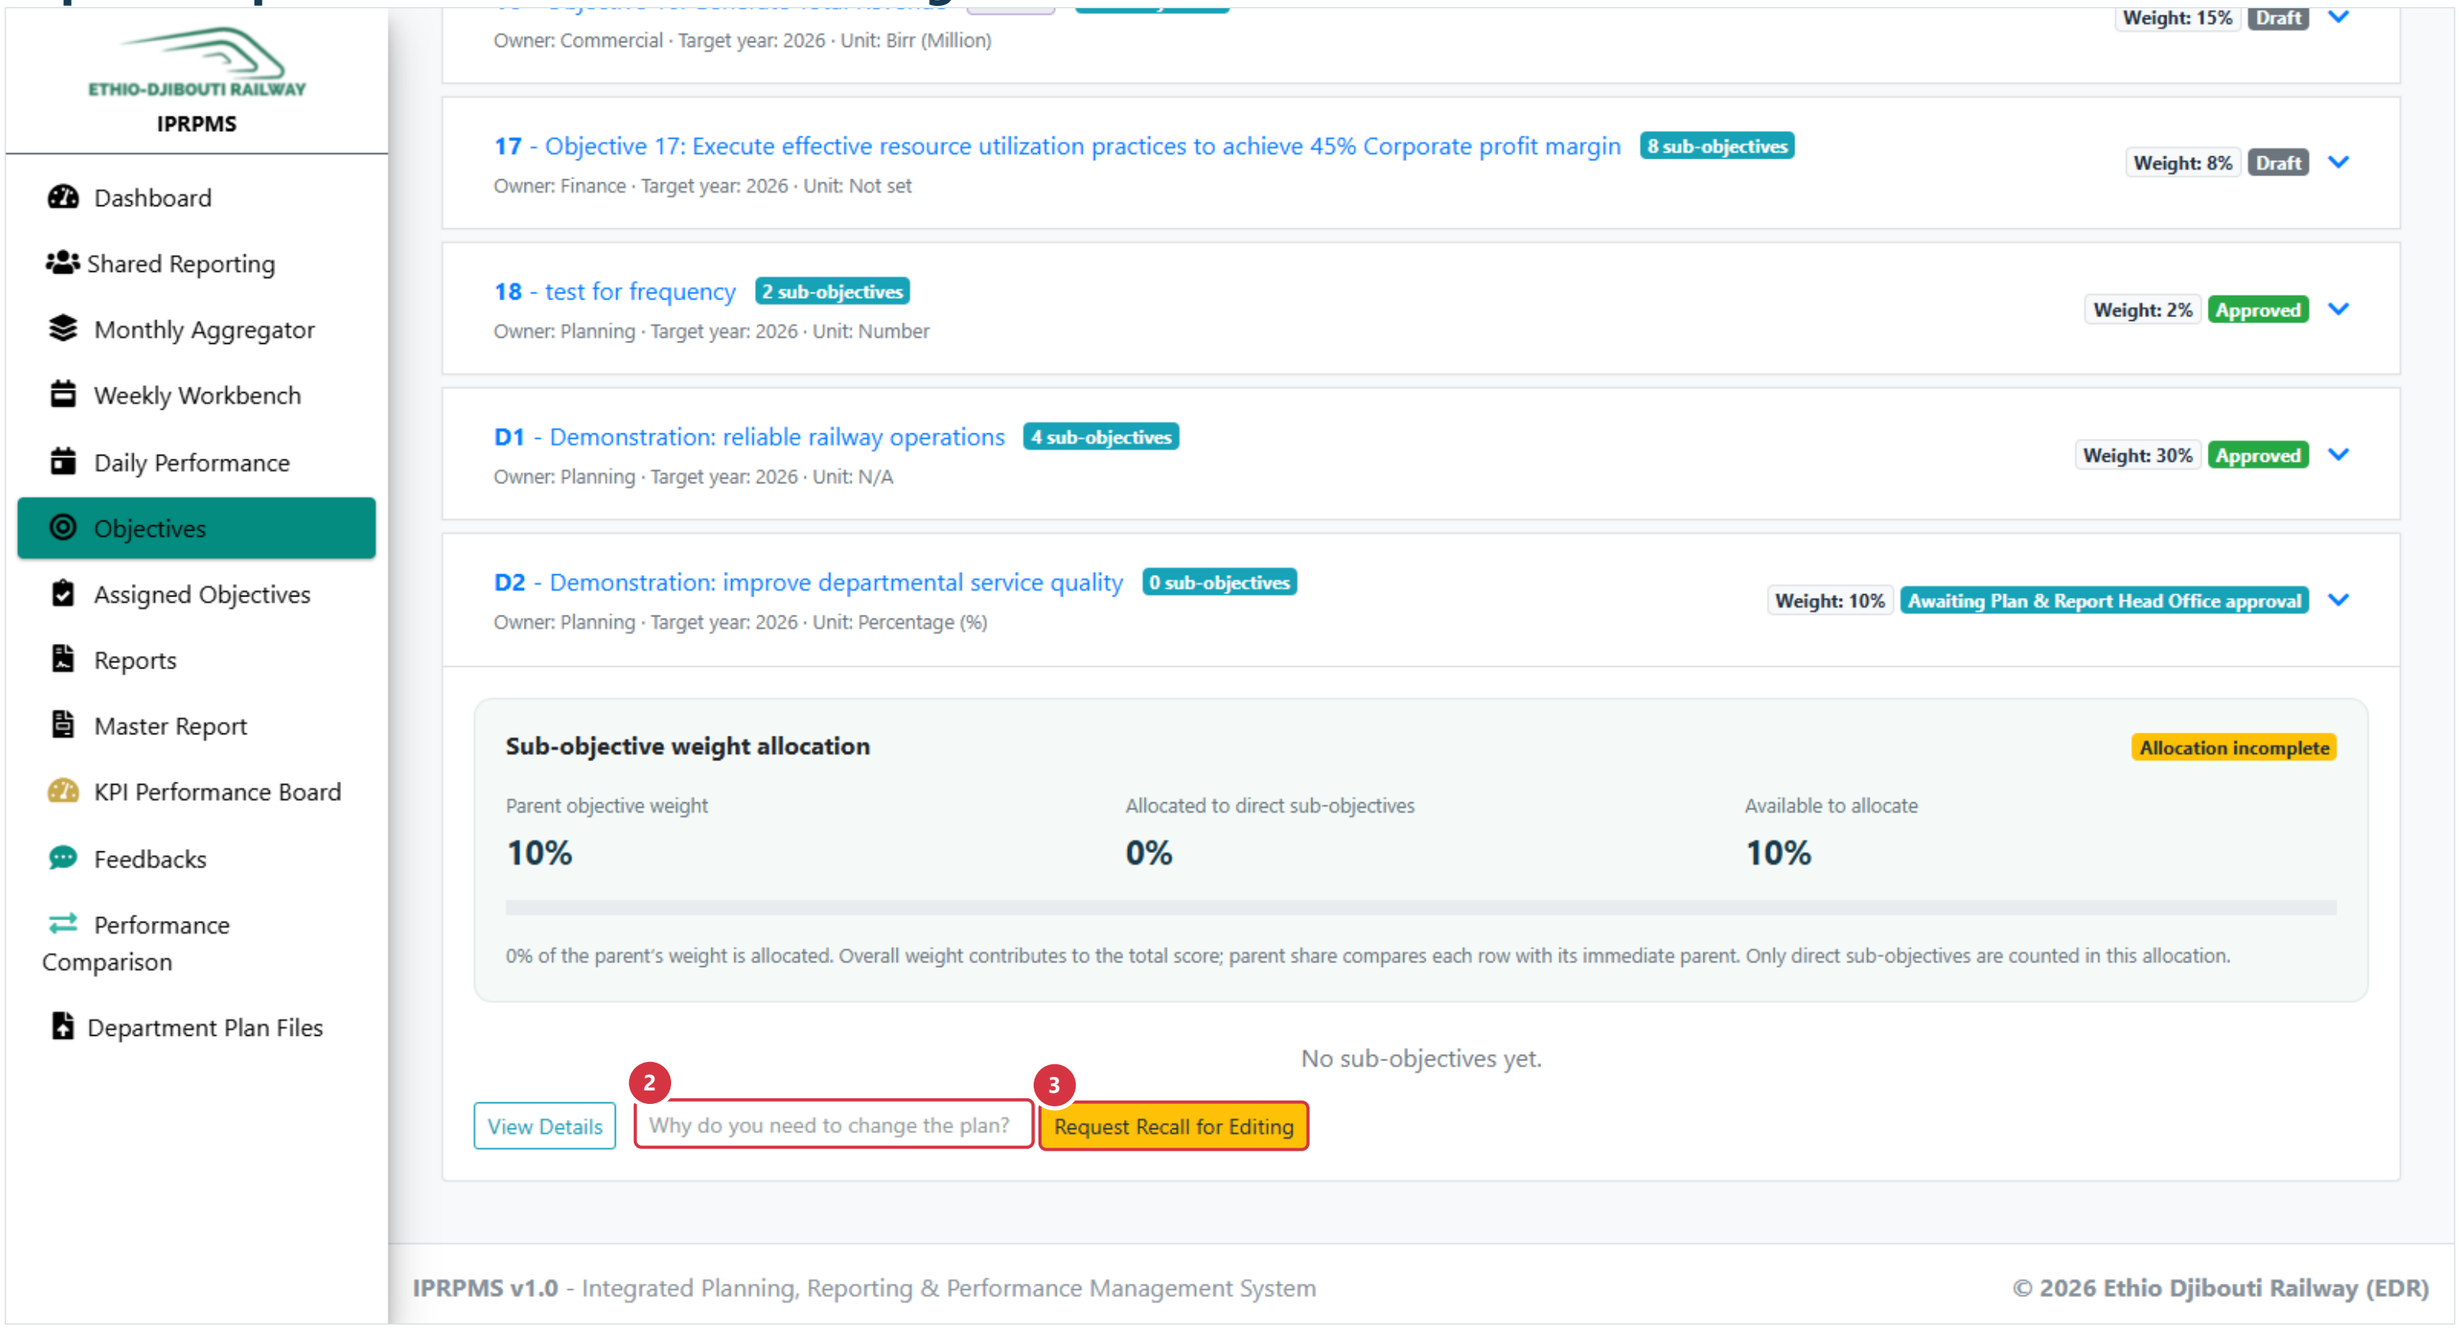

Confirm objective submission

1. Read the submission confirmation.
2. Click the dialog Submit control to continue, or Cancel to keep the draft.

After this step: Confirm only after you have checked the complete main objective and sub objective hierarchy.

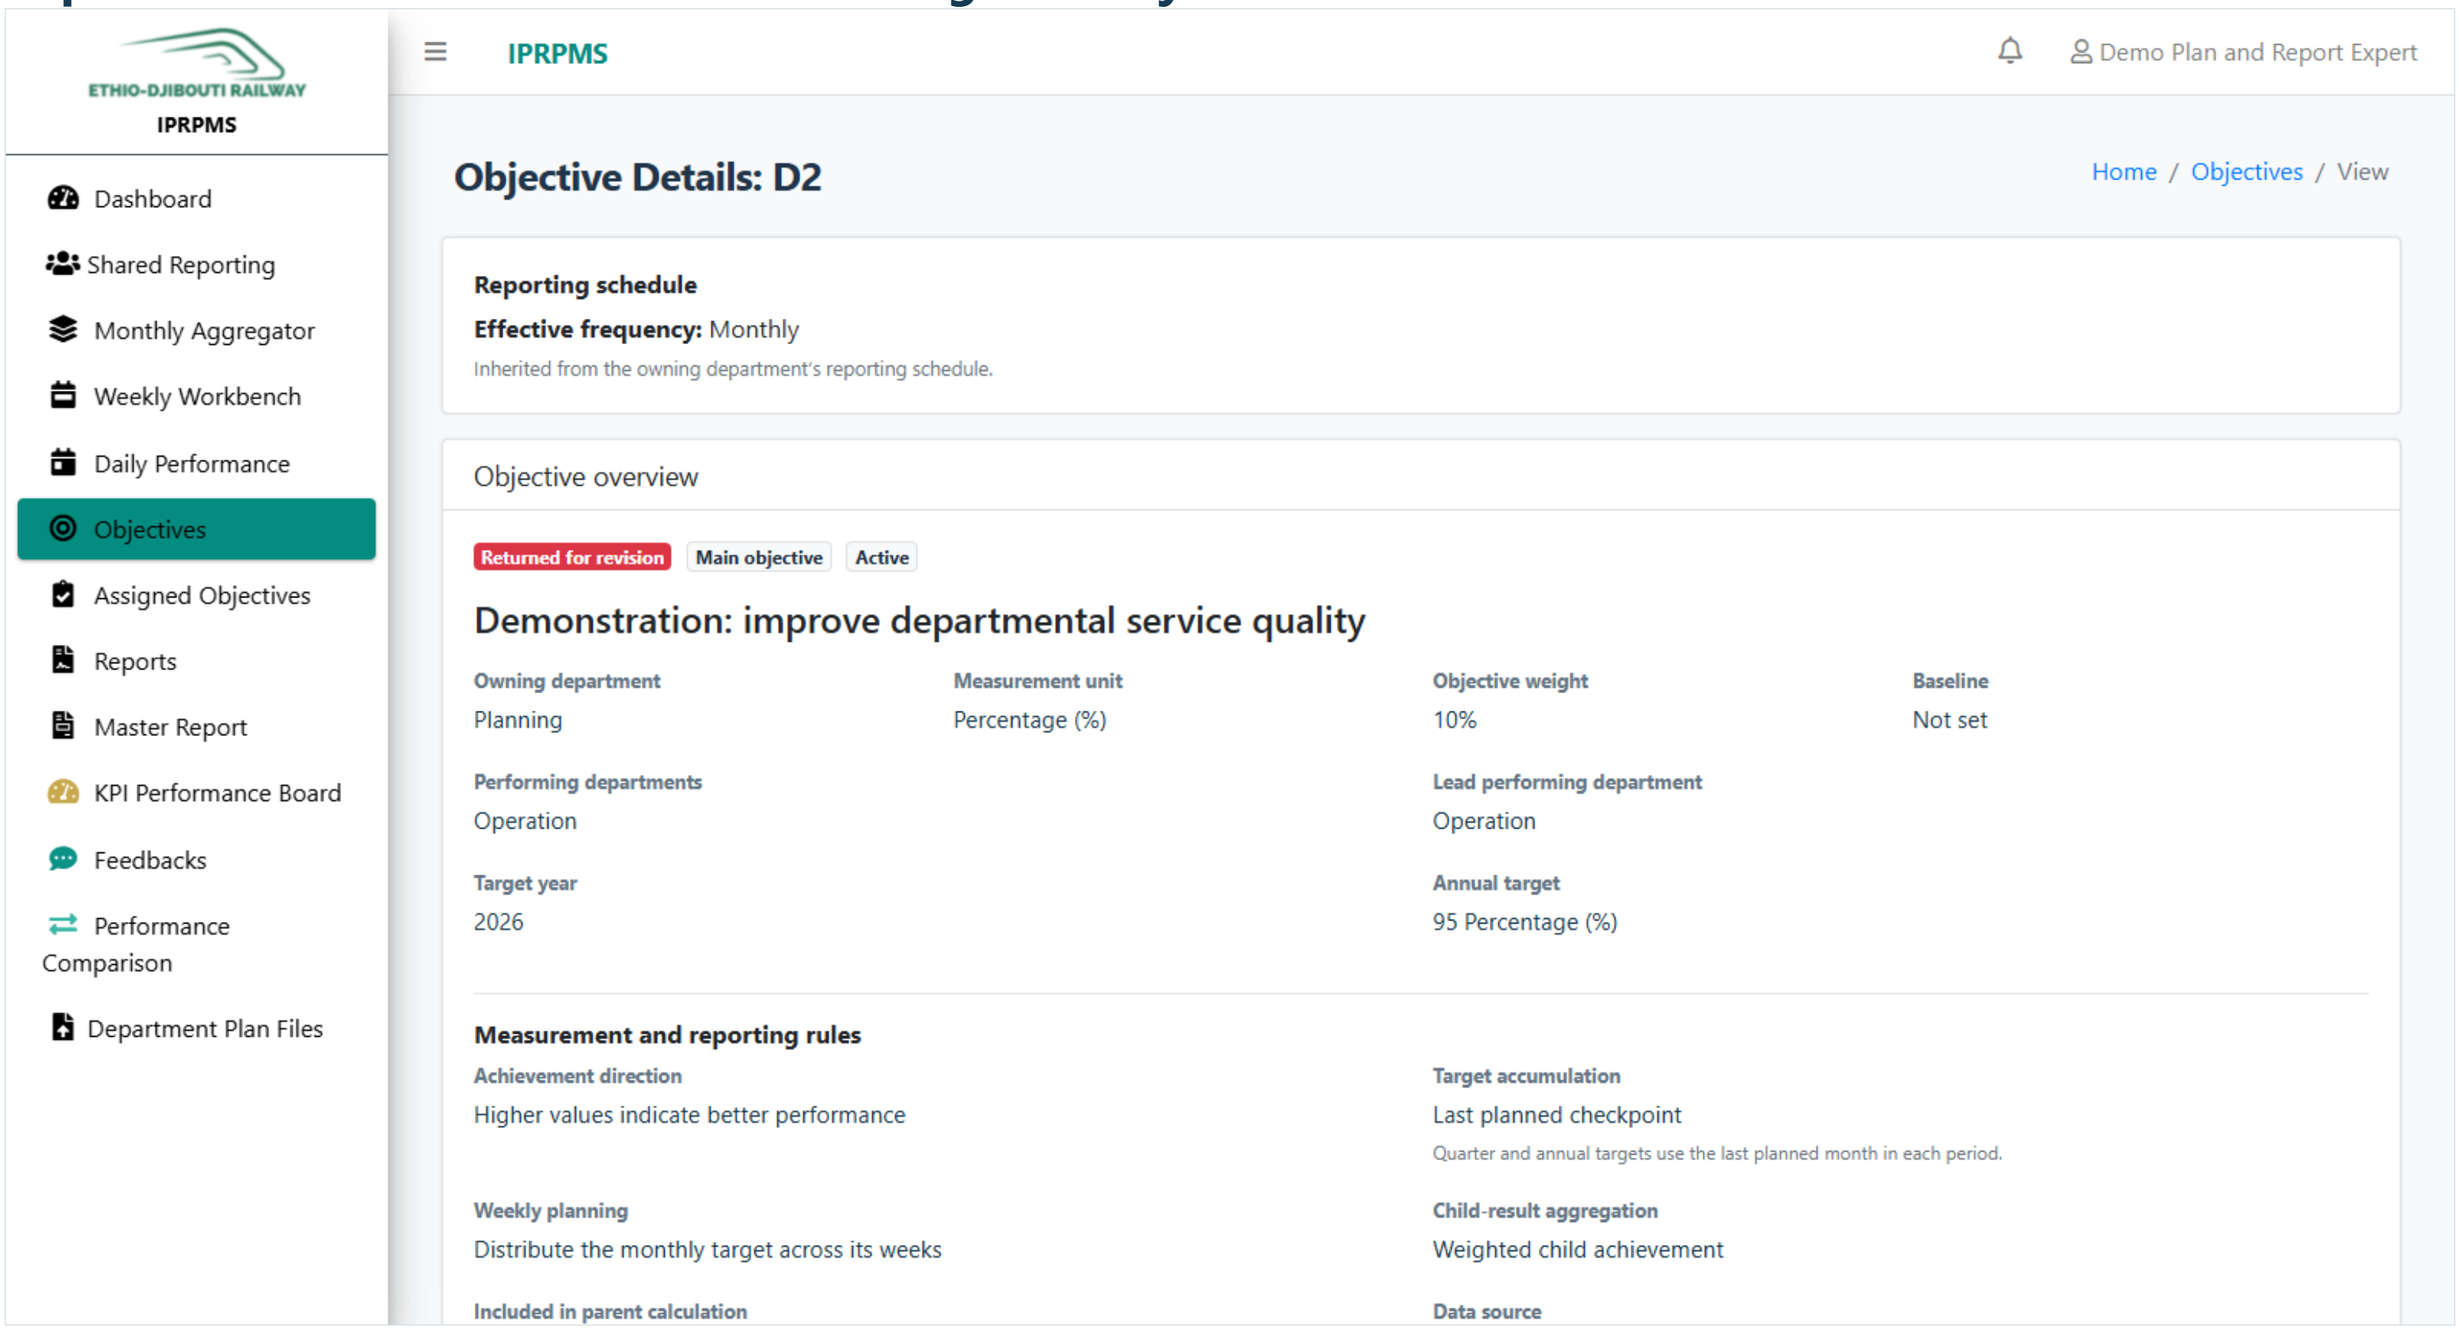

Expert: request recall for further editing

1. Expand the submitted objective.
2. Enter the reason in Why do you need to change the plan?
3. Click Request Recall for Editing and await the current reviewer decision.

After this step: The current reviewer controls the recall decision. An approved objective is not an ordinary editable draft.

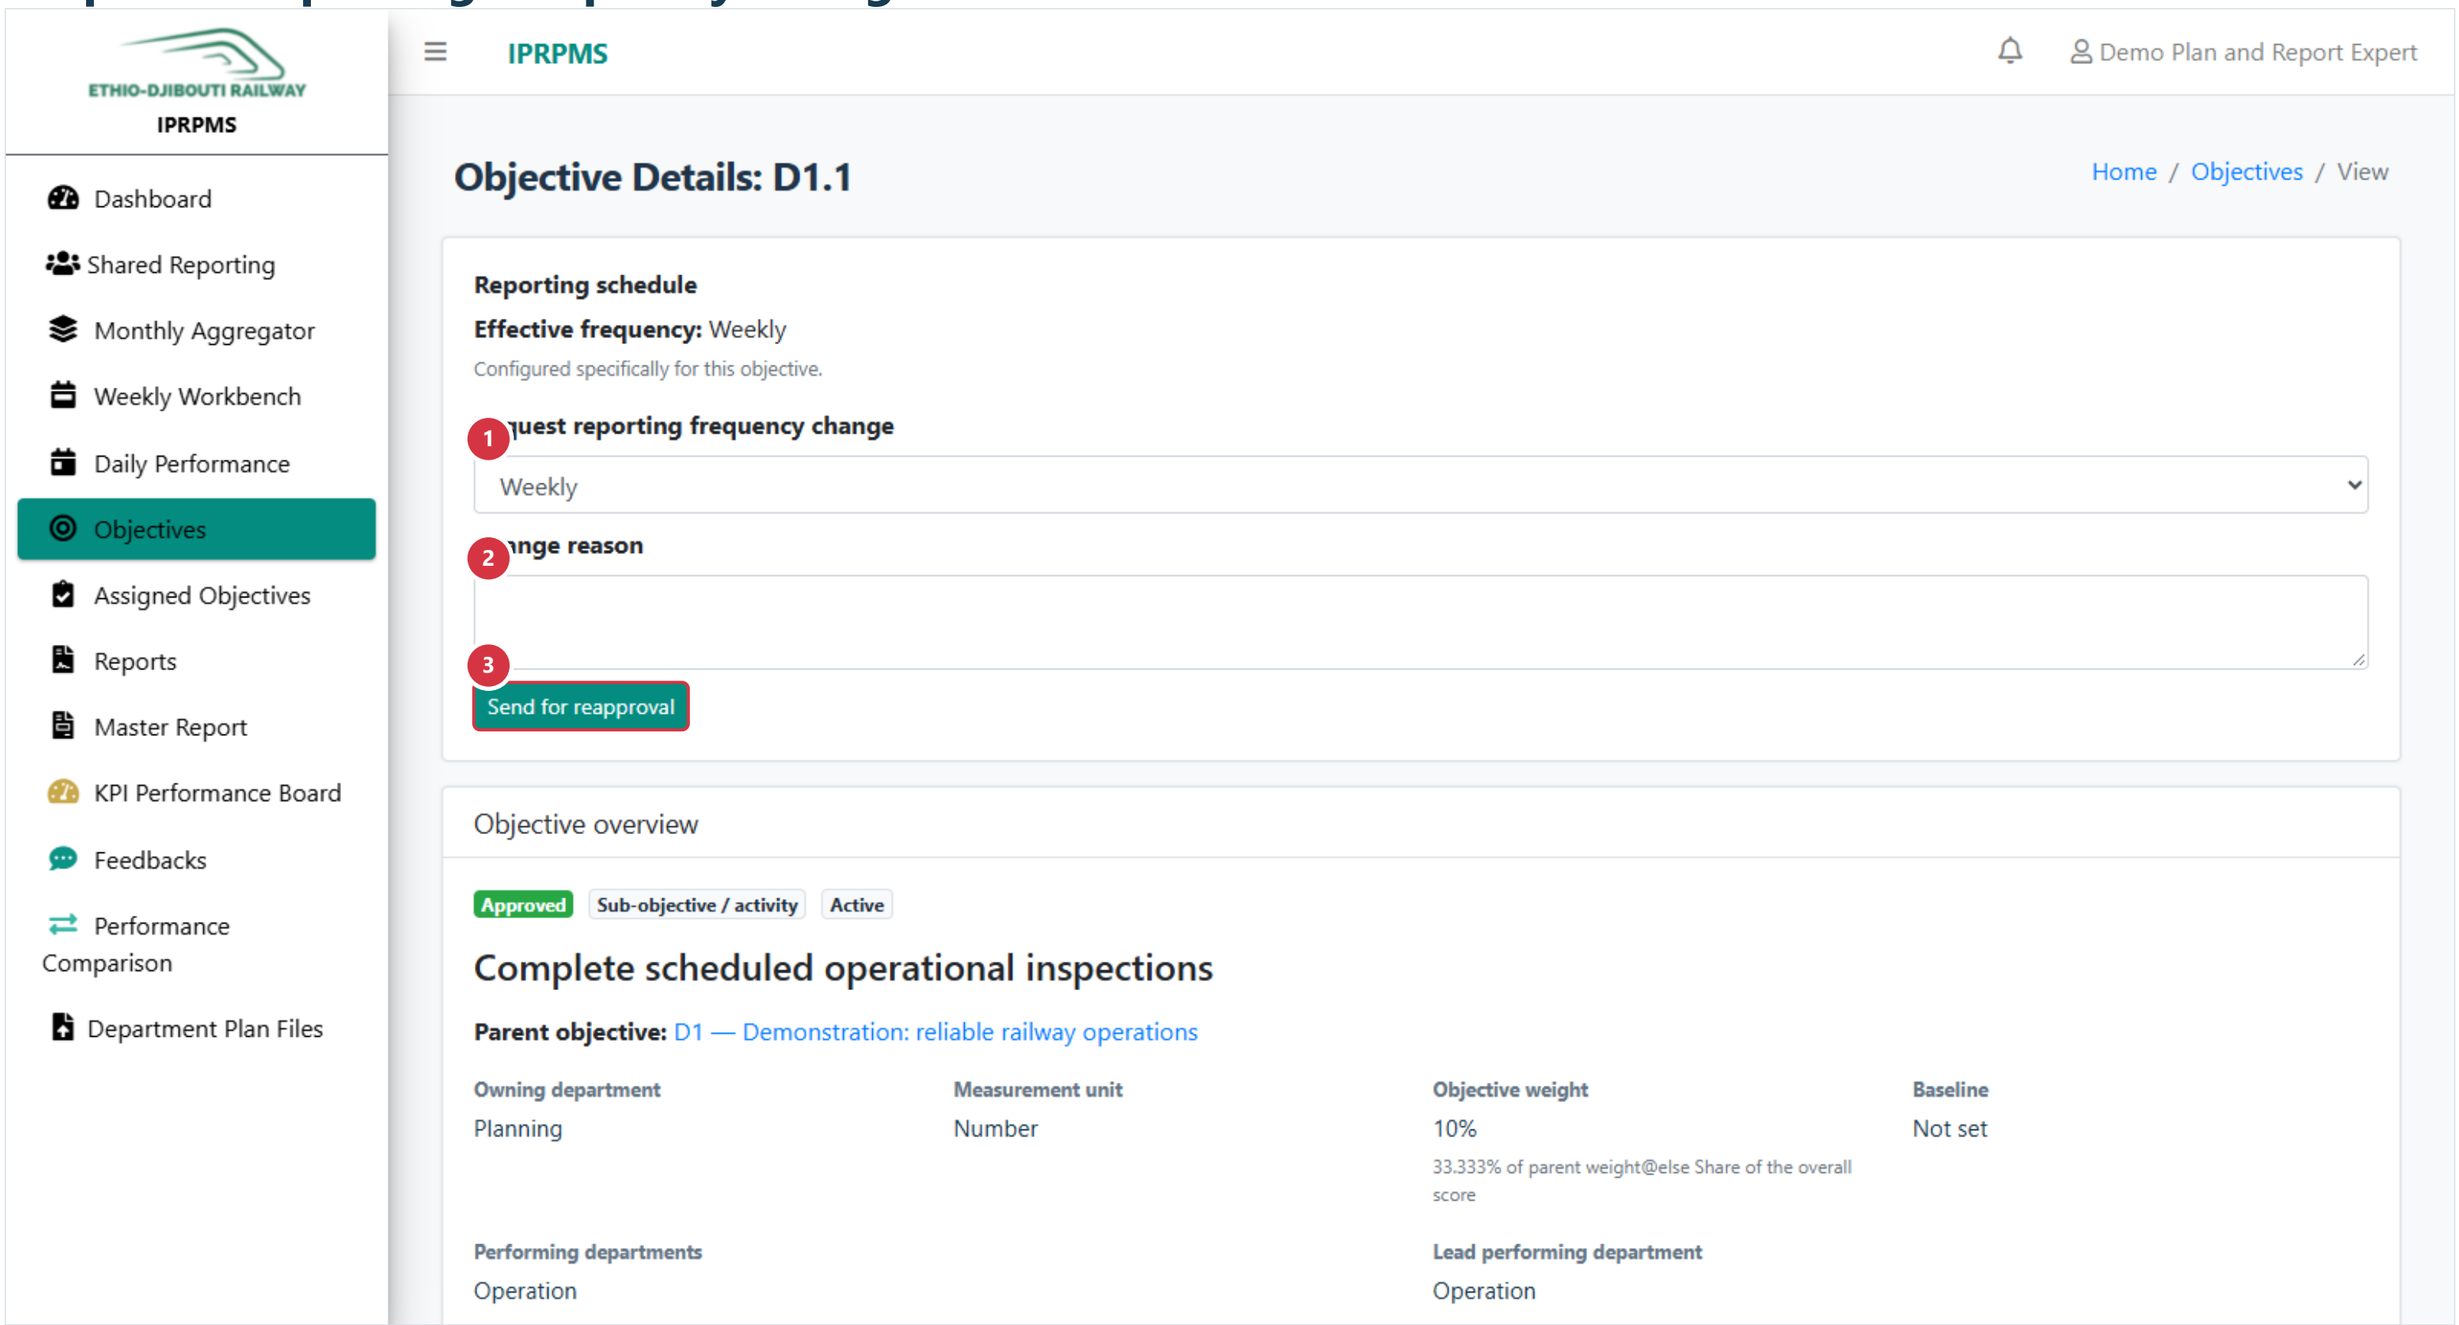

Expert: read return comments and change history

1. Open the returned objective from its notification or Objectives.
2. Read the review comment and available change-history information.
3. Open Edit, apply the requested correction, save and resubmit.

After this step: Use the objective code and reviewer comment to identify the requested correction.

Request a reporting-frequency change

1. Choose the requested reporting frequency in the objective details.
2. Enter the Change reason.
3. Click Send for reapproval.

After this step: An approved frequency change controls whether the KPI appears in Daily, Weekly or Monthly reporting.

Review the department's performance submission

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

Check whether the Department Chief-approved results are consistent, supported and ready for organization review.

Before you click

Open the correct shared report. Read department, year, period, unit, evidence and the department review comments.

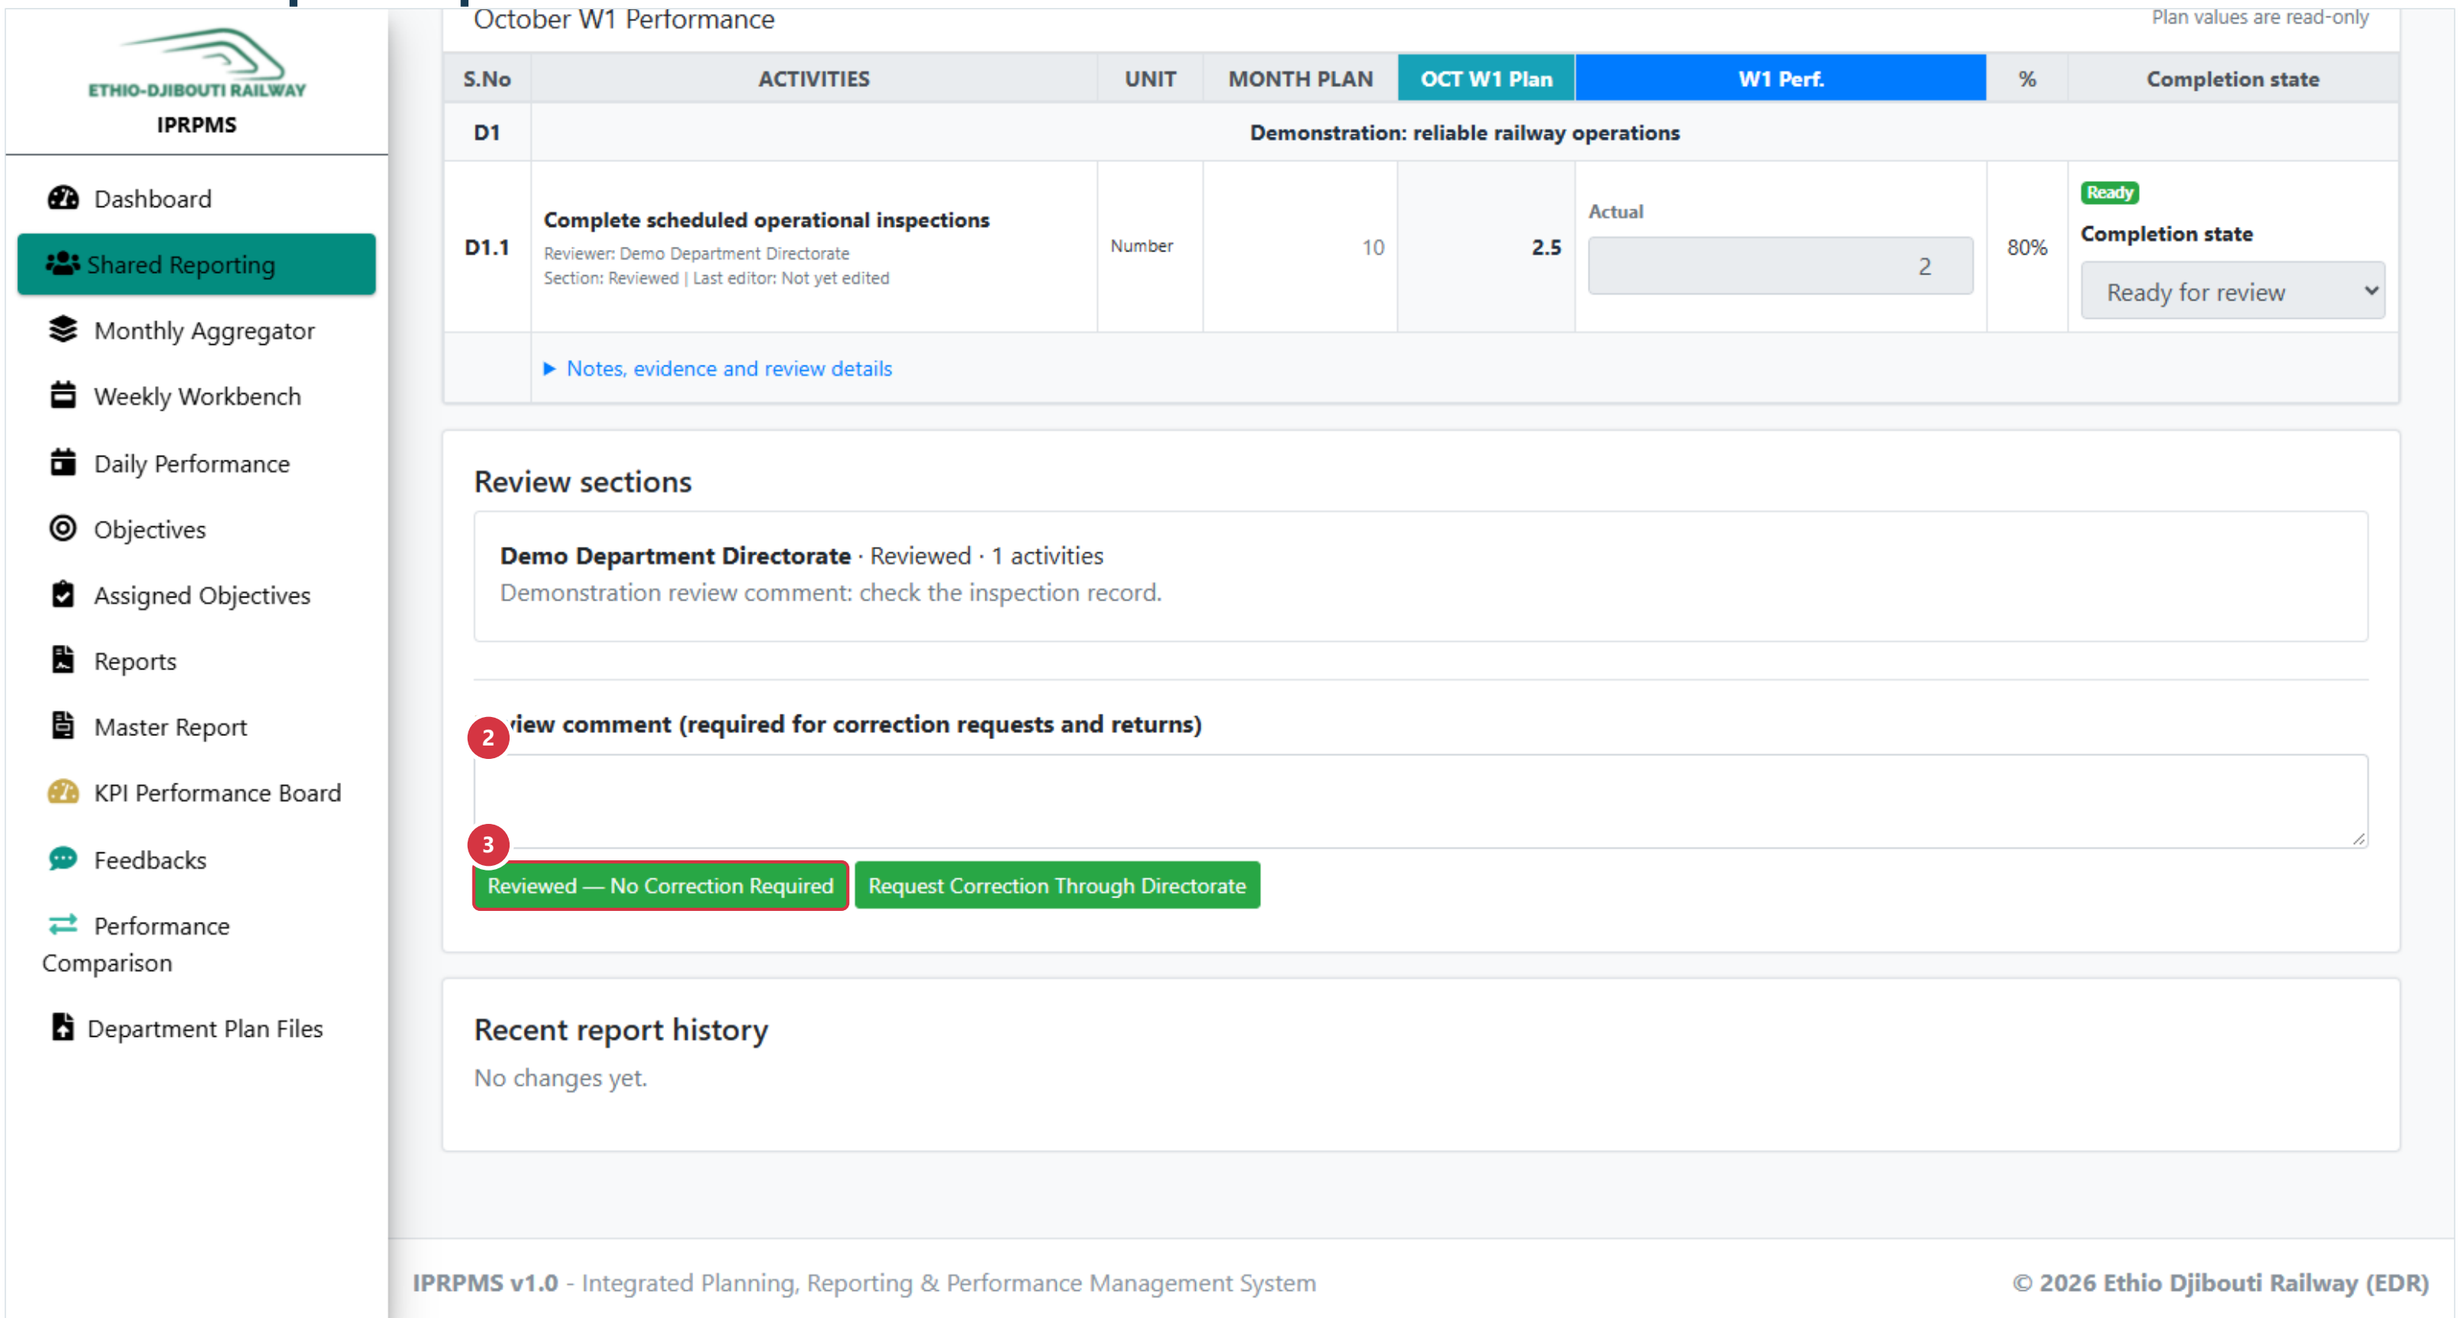

What to check

For weekly/monthly shared reporting, choose Reviewed - No Correction Required for clean work, or Request Correction Through Directorate with the exact correction needed. Daily reports can show a different available route; follow the actual controls.

How you know it worked

Your Directorate receives the review. A correction request continues through the Plan and Report hierarchy before the Head returns it to the Department Chief.

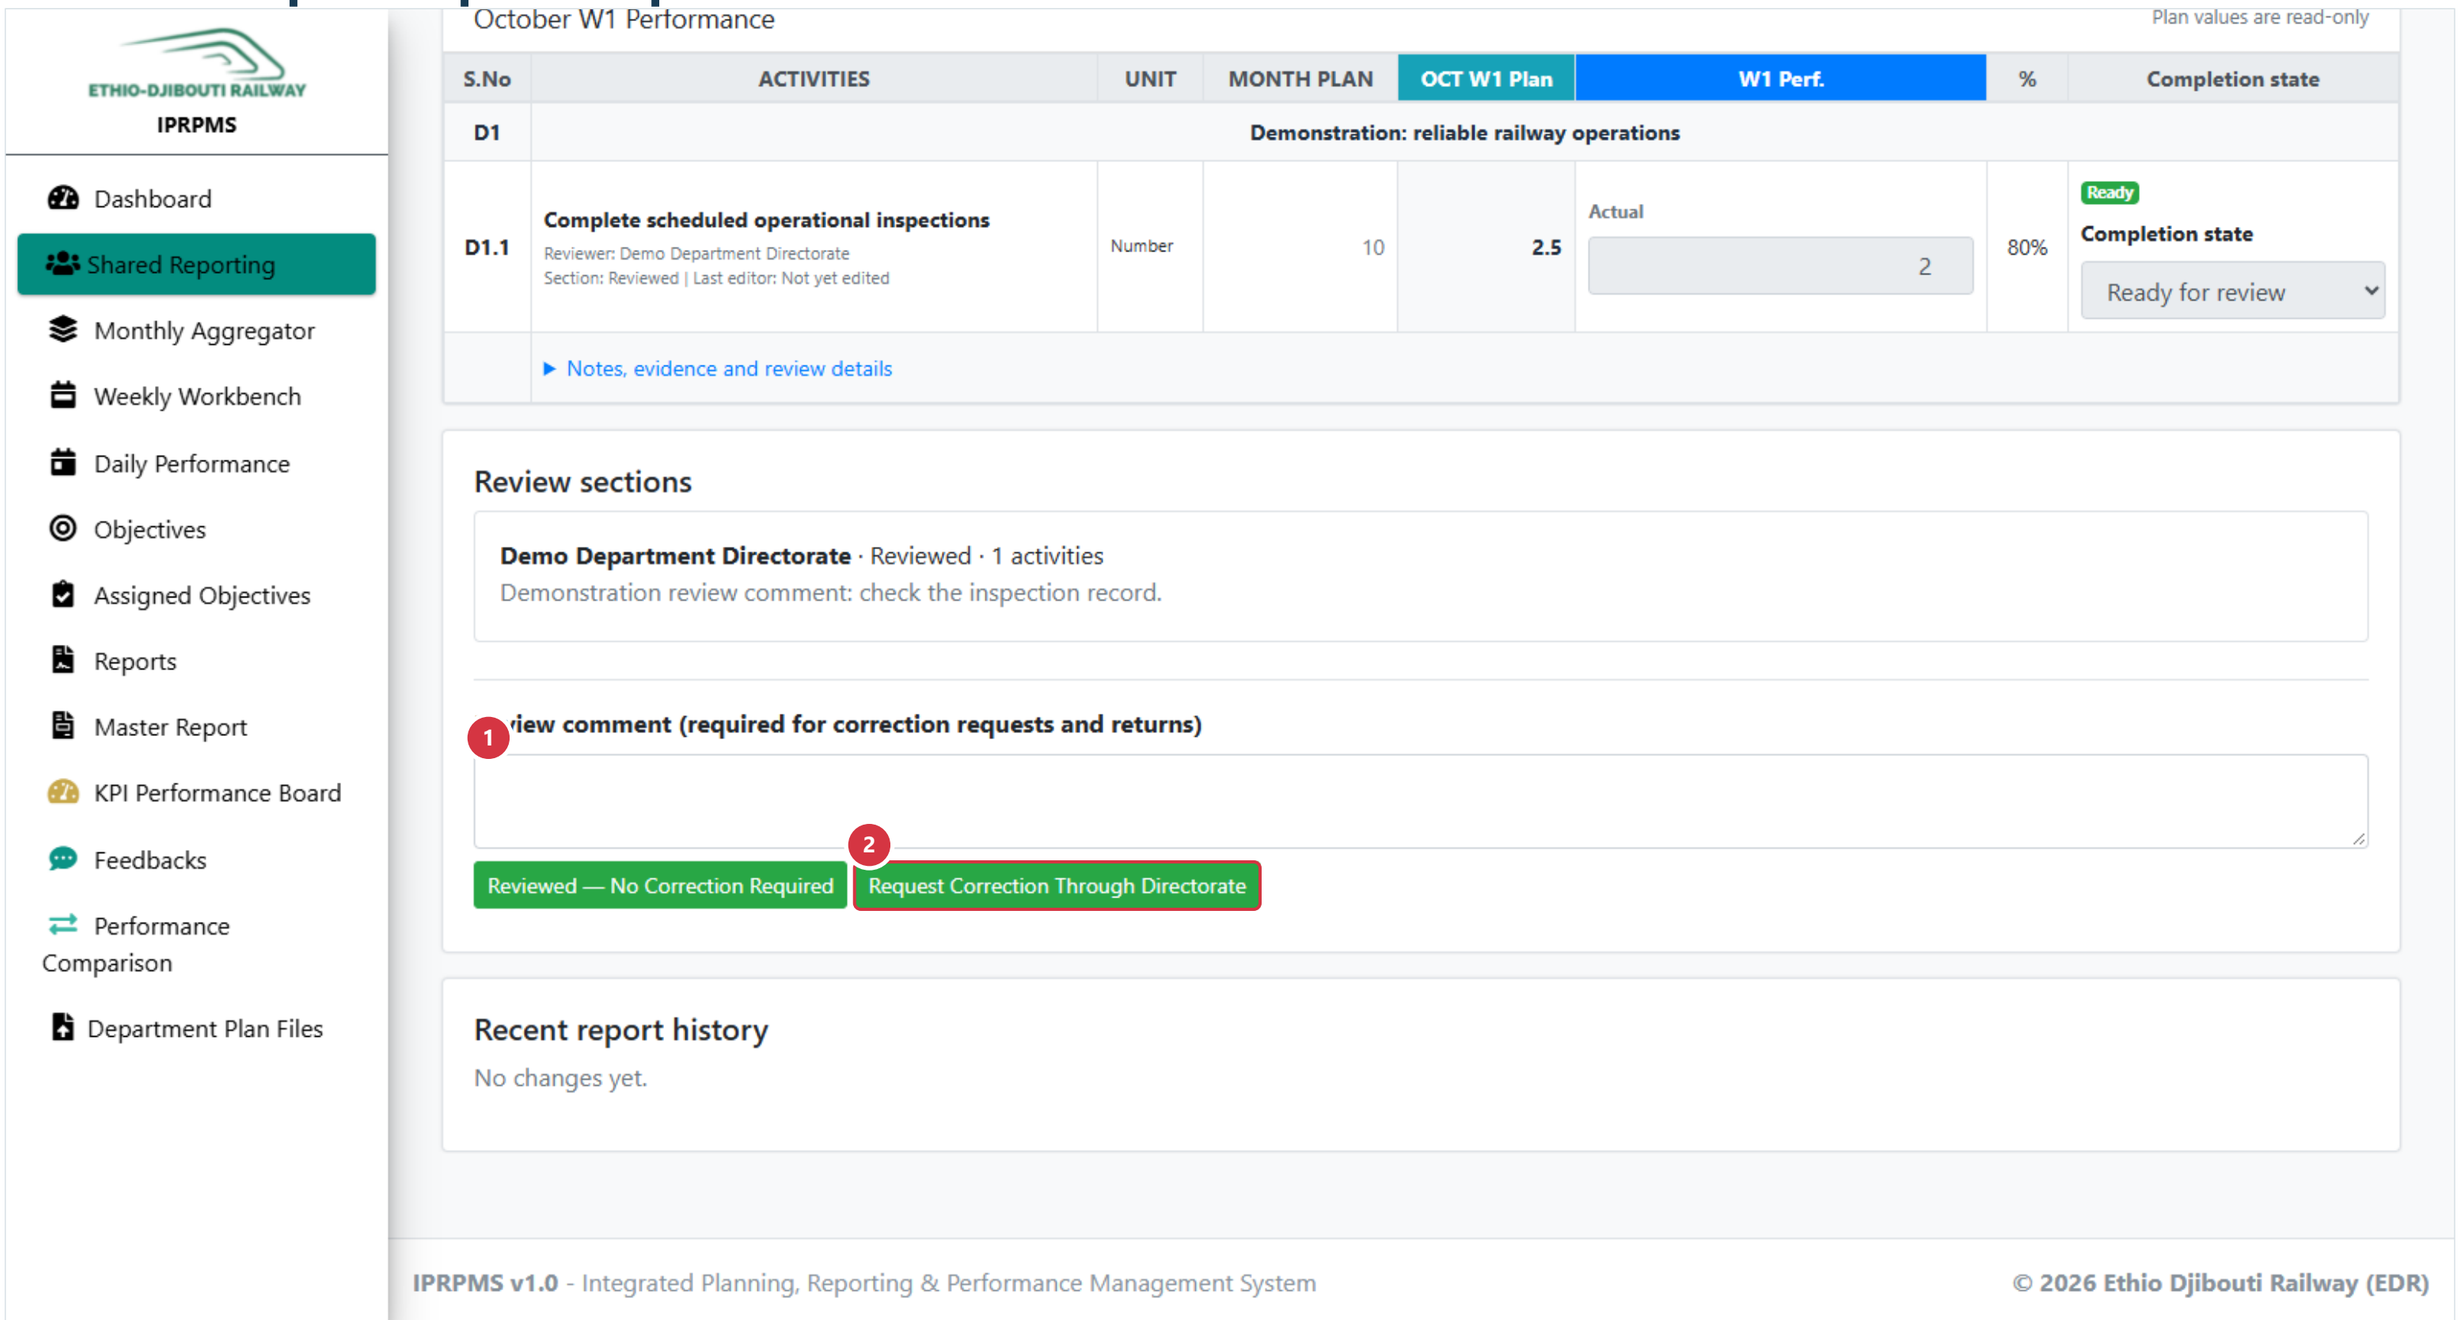

Plan and Report Expert: confirm review without correction

1. Check the department, period, evidence and approved departmental figures.
2. Add a Review comment as needed.
3. Click Reviewed - No Correction Required.

After this step: The report moves to Plan and Report Directorate for confirmation and forwarding.

Plan and Report Expert: request a correction

1. Enter a precise correction in Review comment.
2. Click Request Correction Through Directorate.
3. Monitor the request as it goes through Directorate and Head Office.

After this step: For weekly/monthly shared reporting, the correction request goes through the Plan and Report hierarchy to the Department Chief.

Prepare period weights without changing annual weights

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

Period weights decide how eligible planned work shares a particular period's score when some annual activities are not planned in that period. They are not a way to change performance actuals.

Before you click

Choose the correct department, year and month or quarter. Review which activities are planned. A single eligible planned activity may receive its distribution automatically.

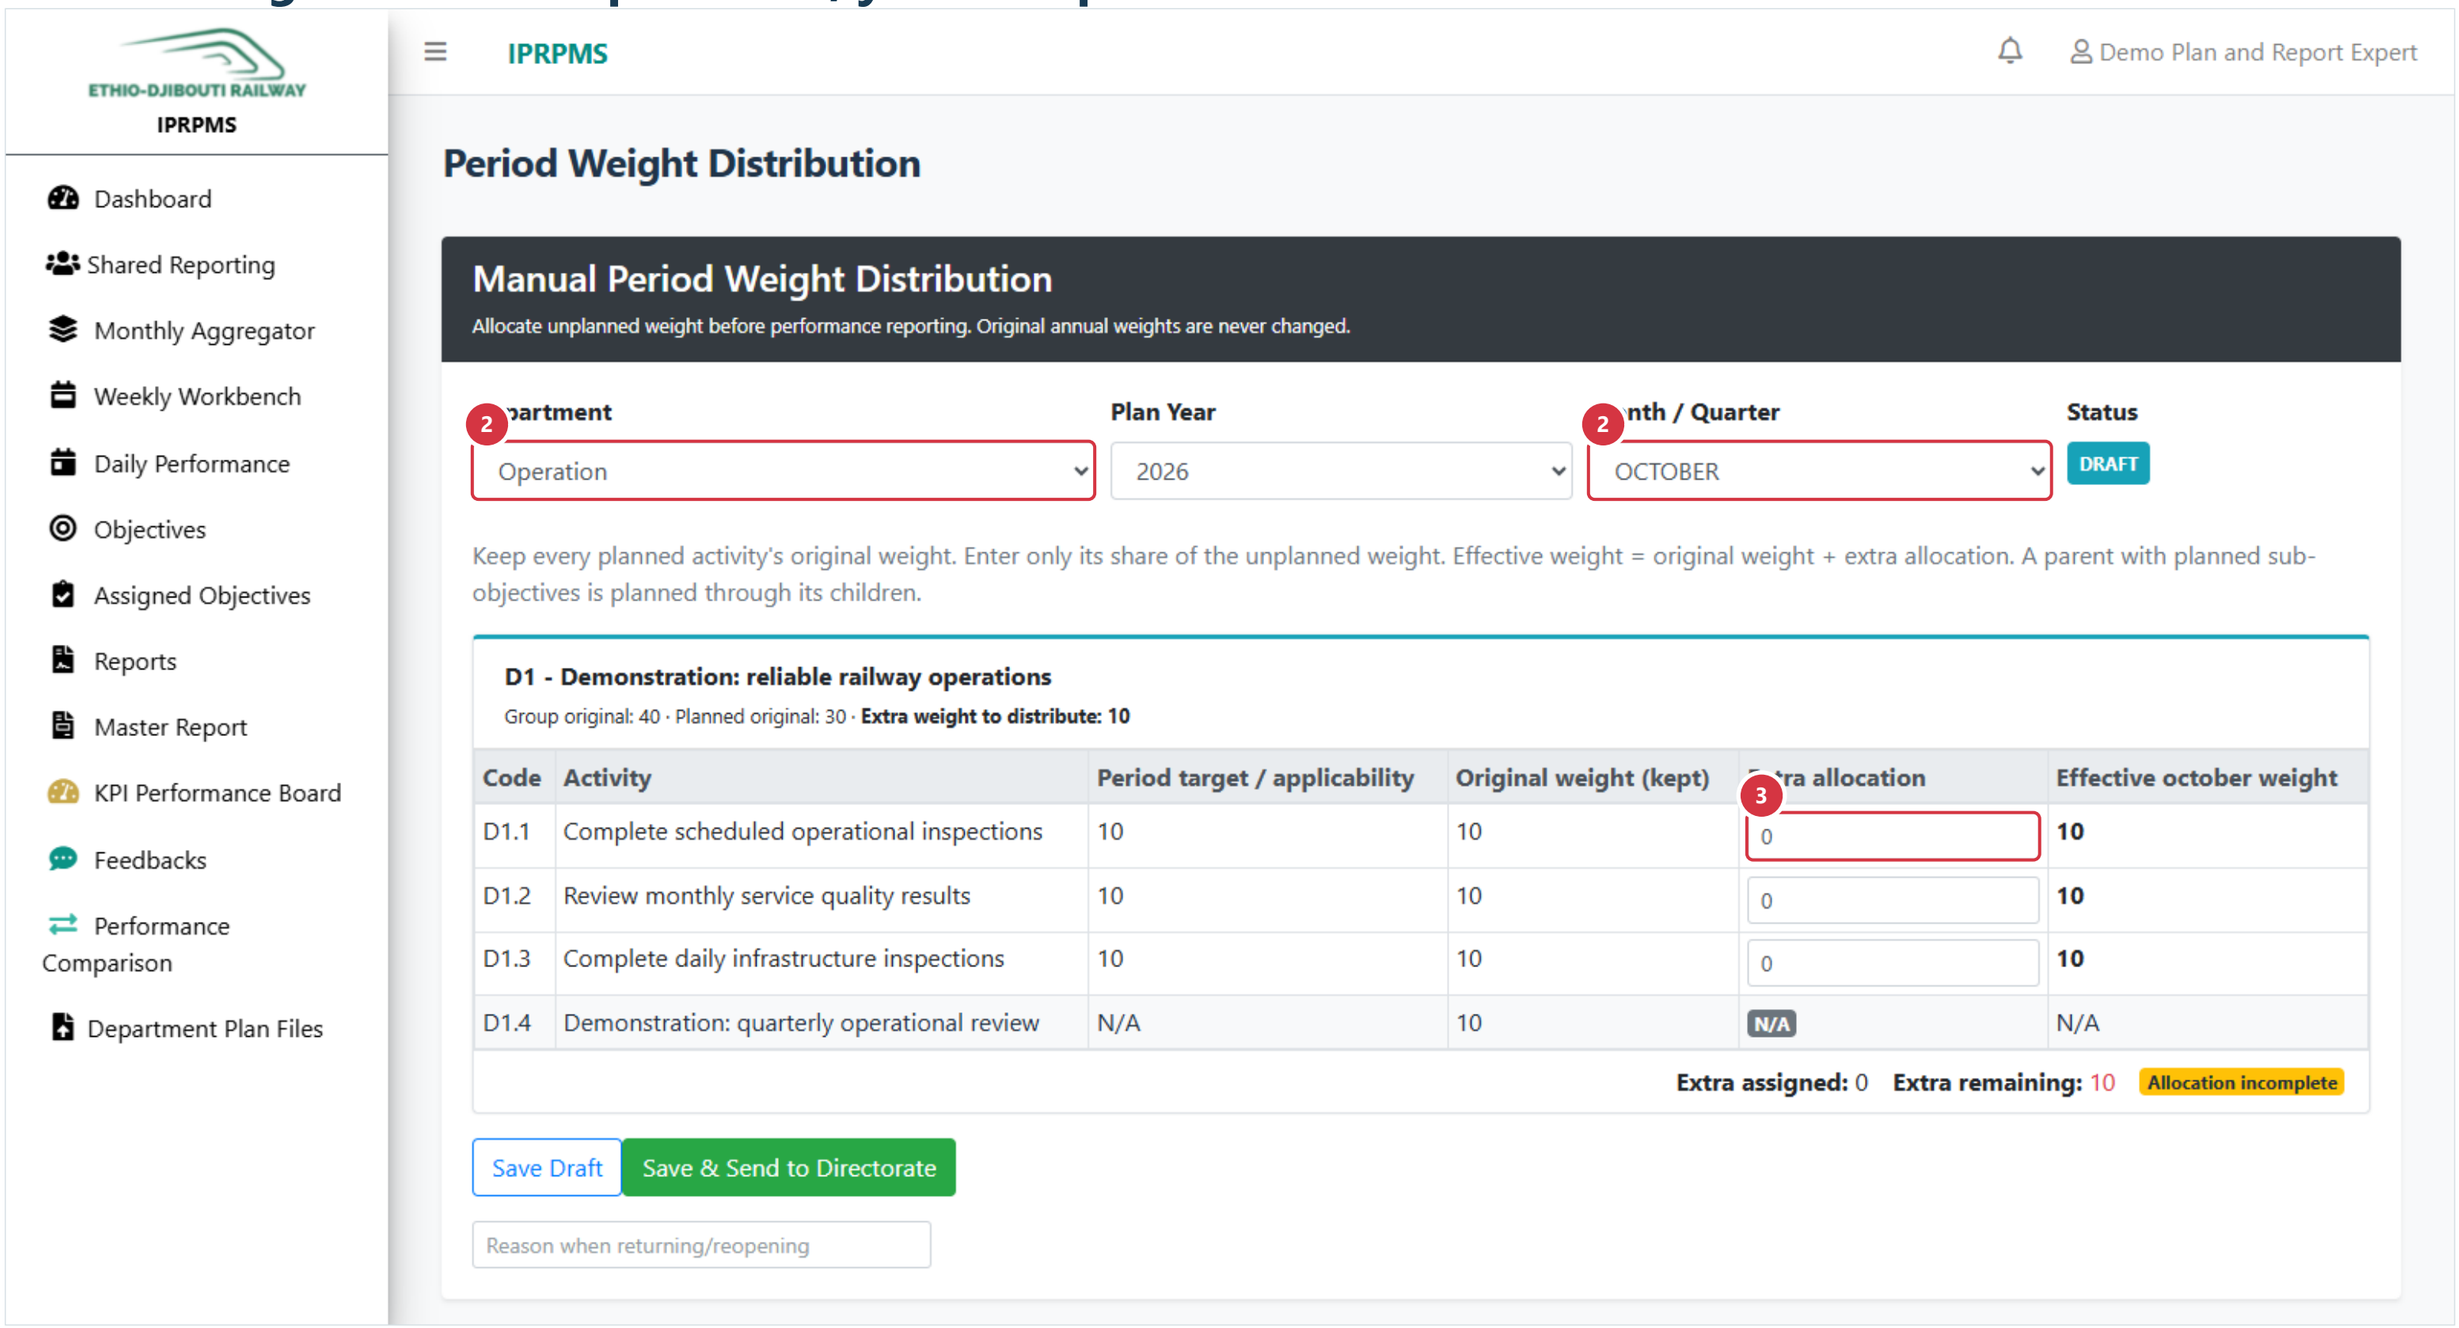

What to check

Allocate only to eligible planned activities and respect the available weight shown by the screen. Do not allocate weight to an activity with no plan for that period. Annual objective weights remain unchanged.

How you know it worked

Save a draft to continue later, or Save & Send to Directorate when complete. The Directorate reviews it and the Chief approves and locks the distribution.

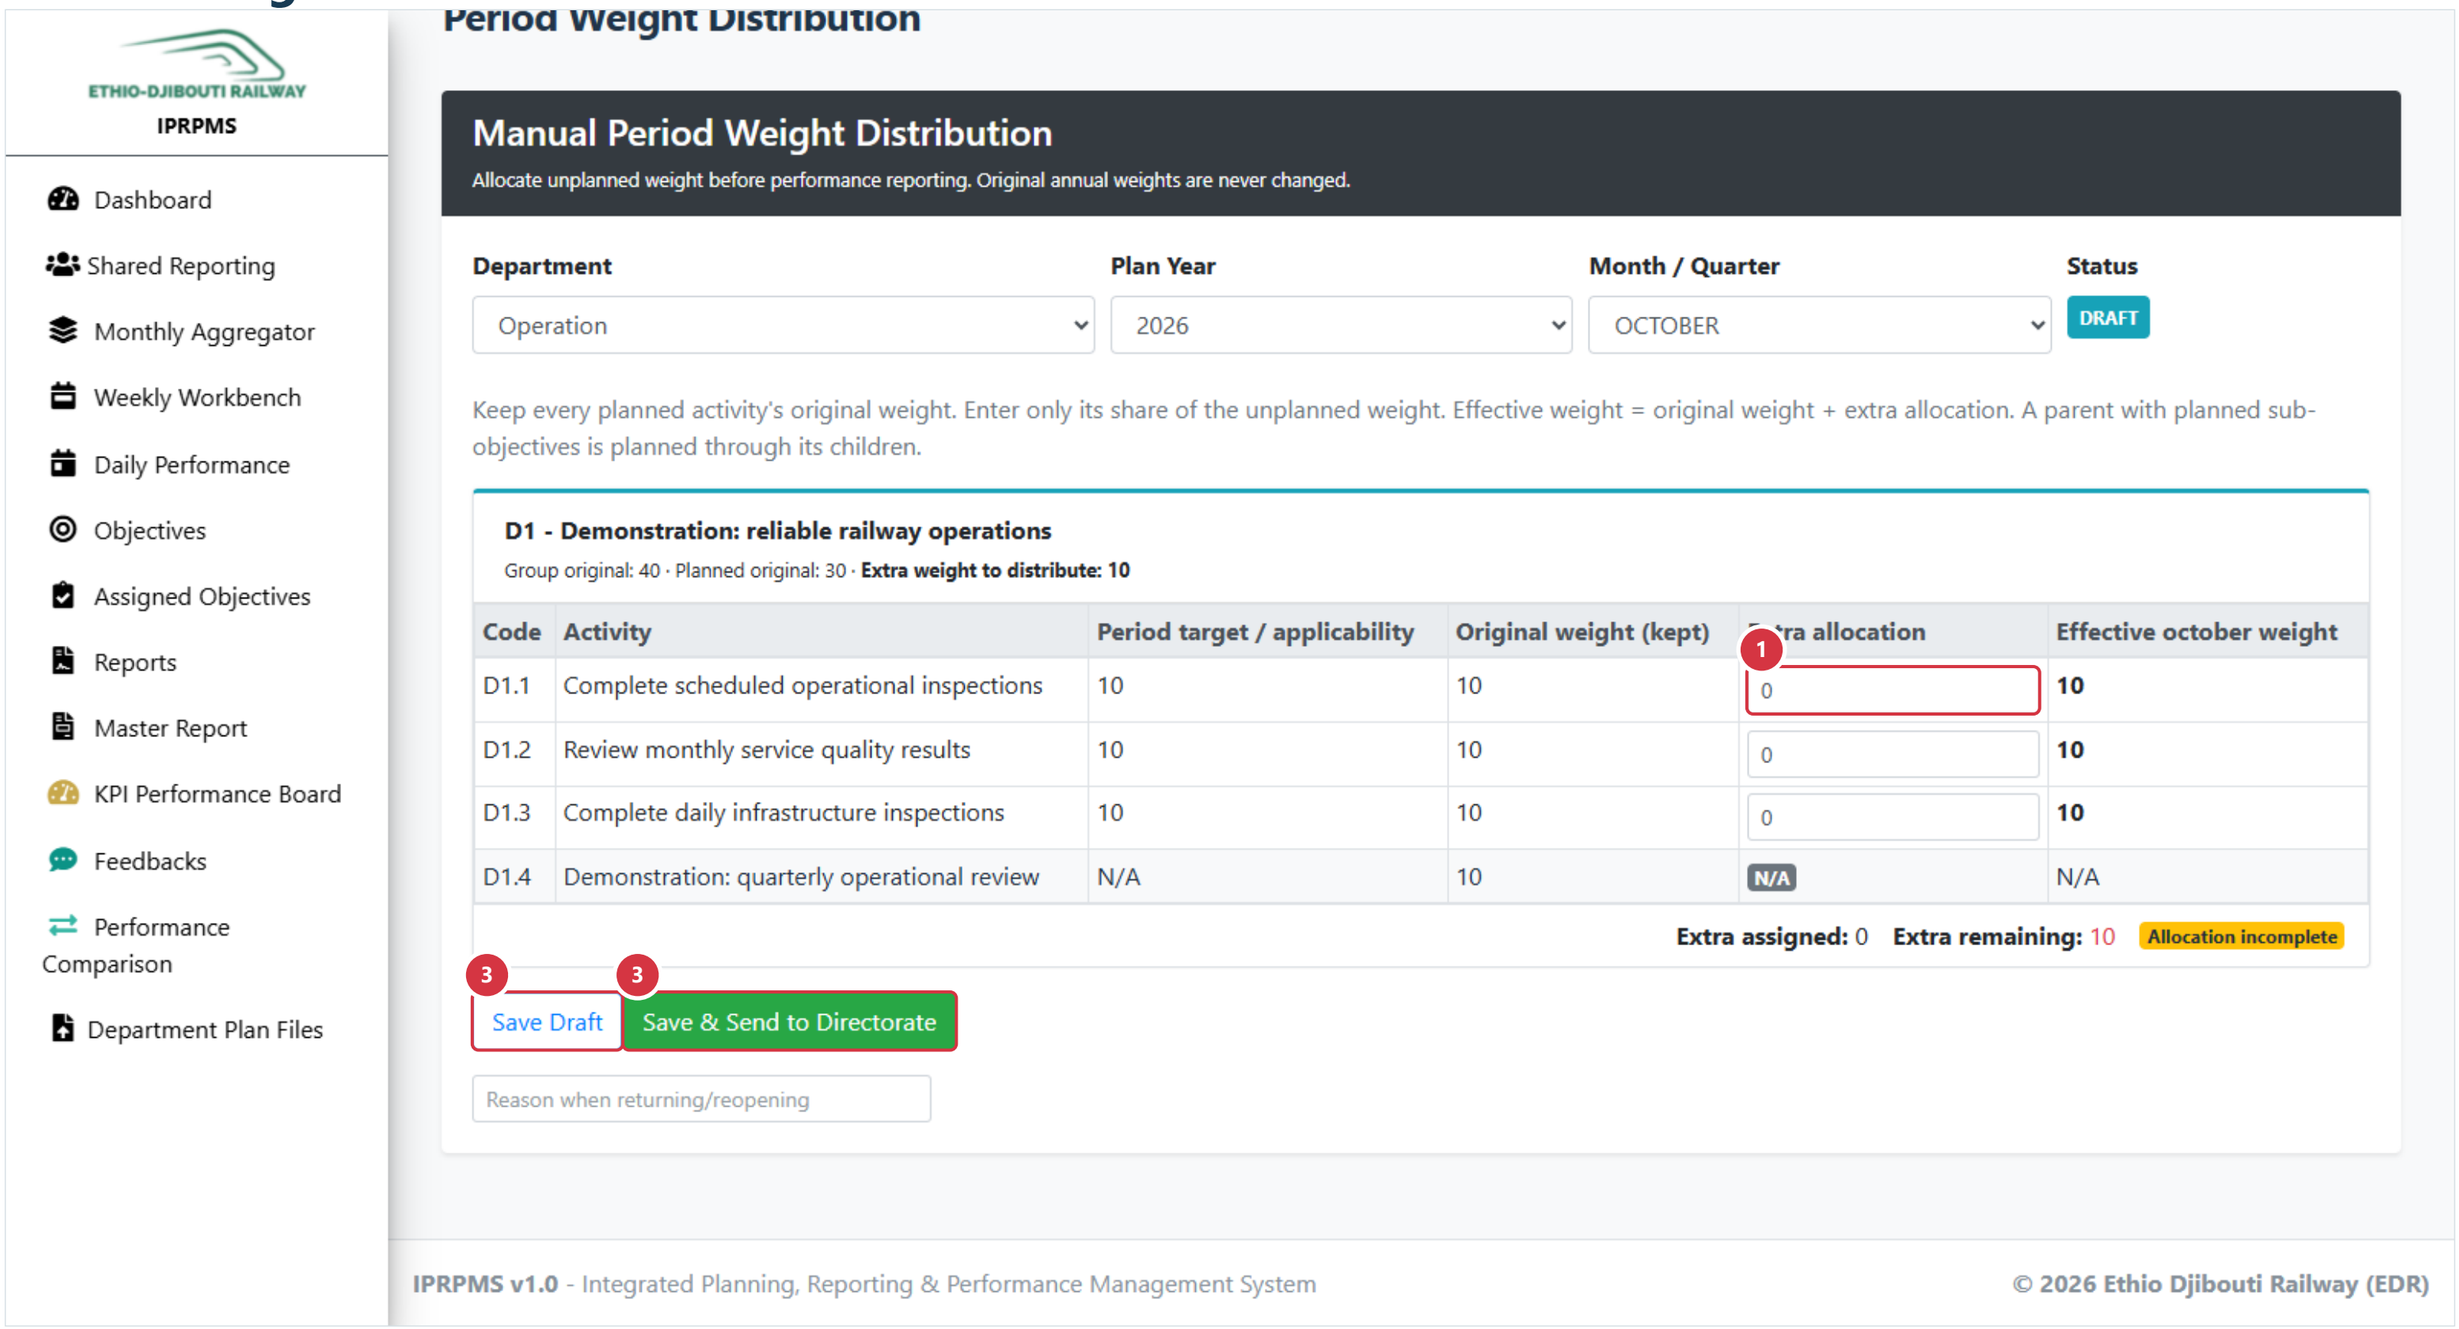

Period Weights: select department, year and period

1. Open Period Weights from Objectives.
2. Select Department, Plan Year and Month / Quarter.
3. Review the original, available and effective weights for the displayed group.

After this step: Only groups requiring redistribution appear. The available extra weight must be allocated across the planned activities.

Period Weights: save and submit a distribution

1. Enter the extra weight for the eligible planned activities.
2. Check the assigned and remaining totals.
3. Click Save Draft or Save & Send to Directorate.

After this step: Distribution must balance before submission. The annual objective weights do not change.

Prepare the written performance report

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

The written report explains the figures: what was achieved, what prevented delivery, what was learned and what happens next. It is a separate document workflow from submitting numeric performance.

Before you click

Select the right year, period and organizational or department scope. Use the approved performance figures and relevant evidence. Check that your narrative describes the same period as the selected results.

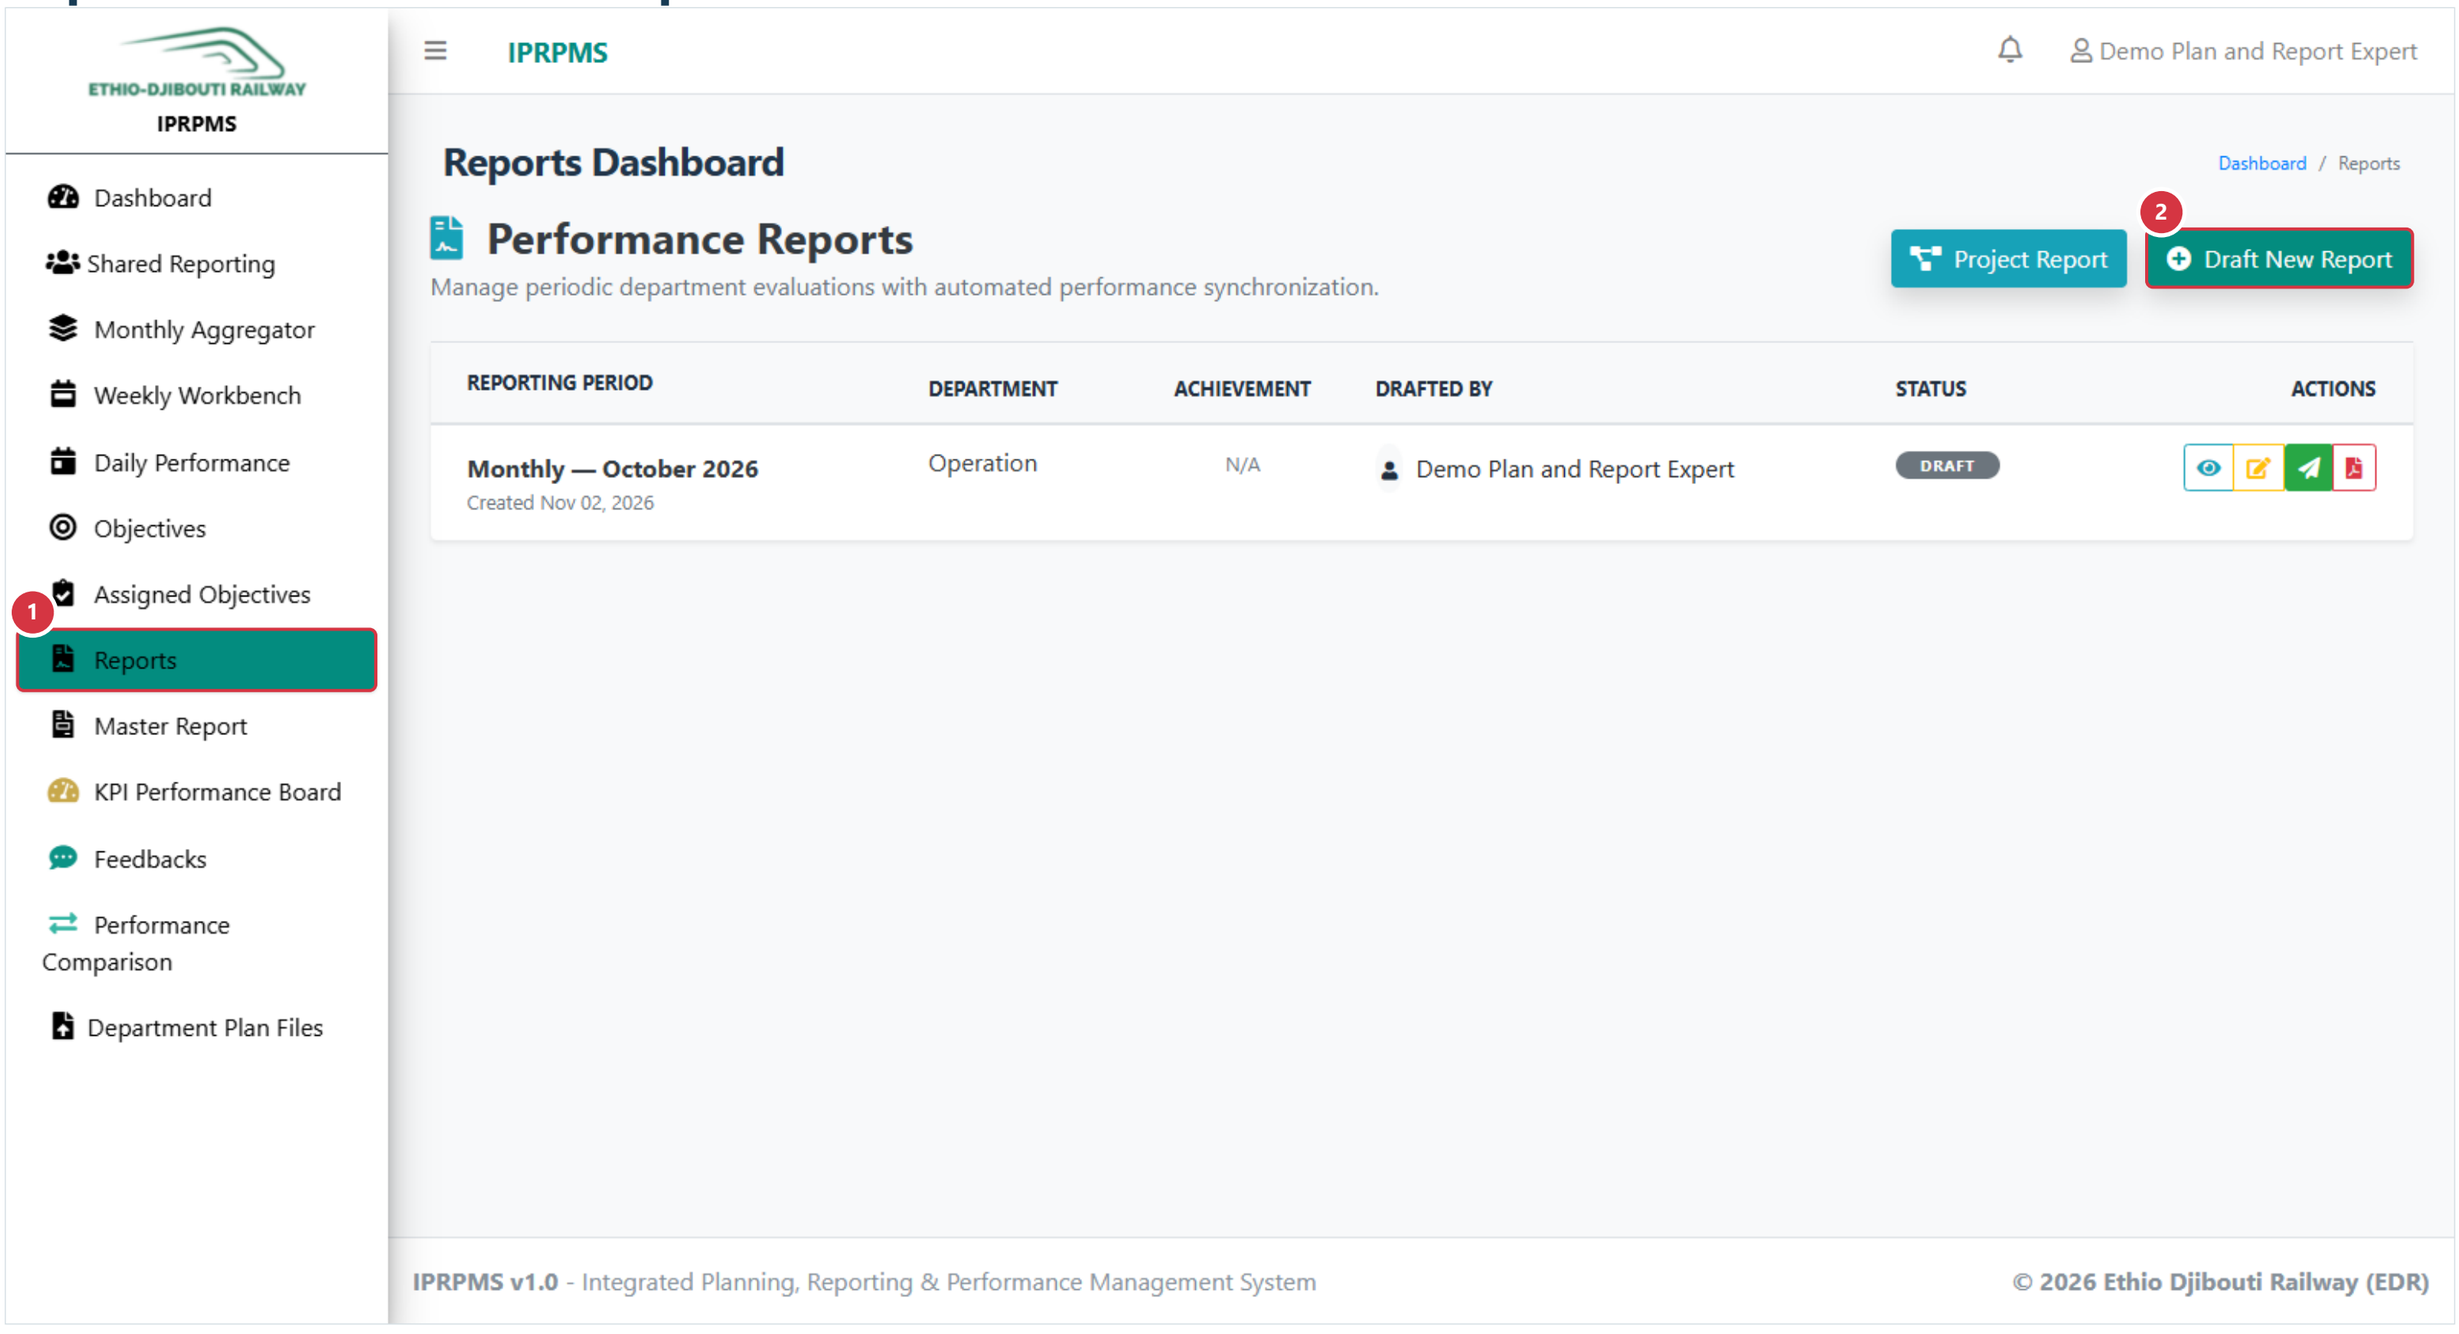

What to check

Complete summary, introduction, challenges and solutions, non-planned activities, strengths, weaknesses, best practices and next focus. Attach only relevant, safe annexes. Save before sending.

How you know it worked

Return to the Reports list and use the Send to Directorate action. The Directorate forwards to the Head and the Chief approves. Follow the list icons and their tooltips; sending the report is not the same as approving the results.

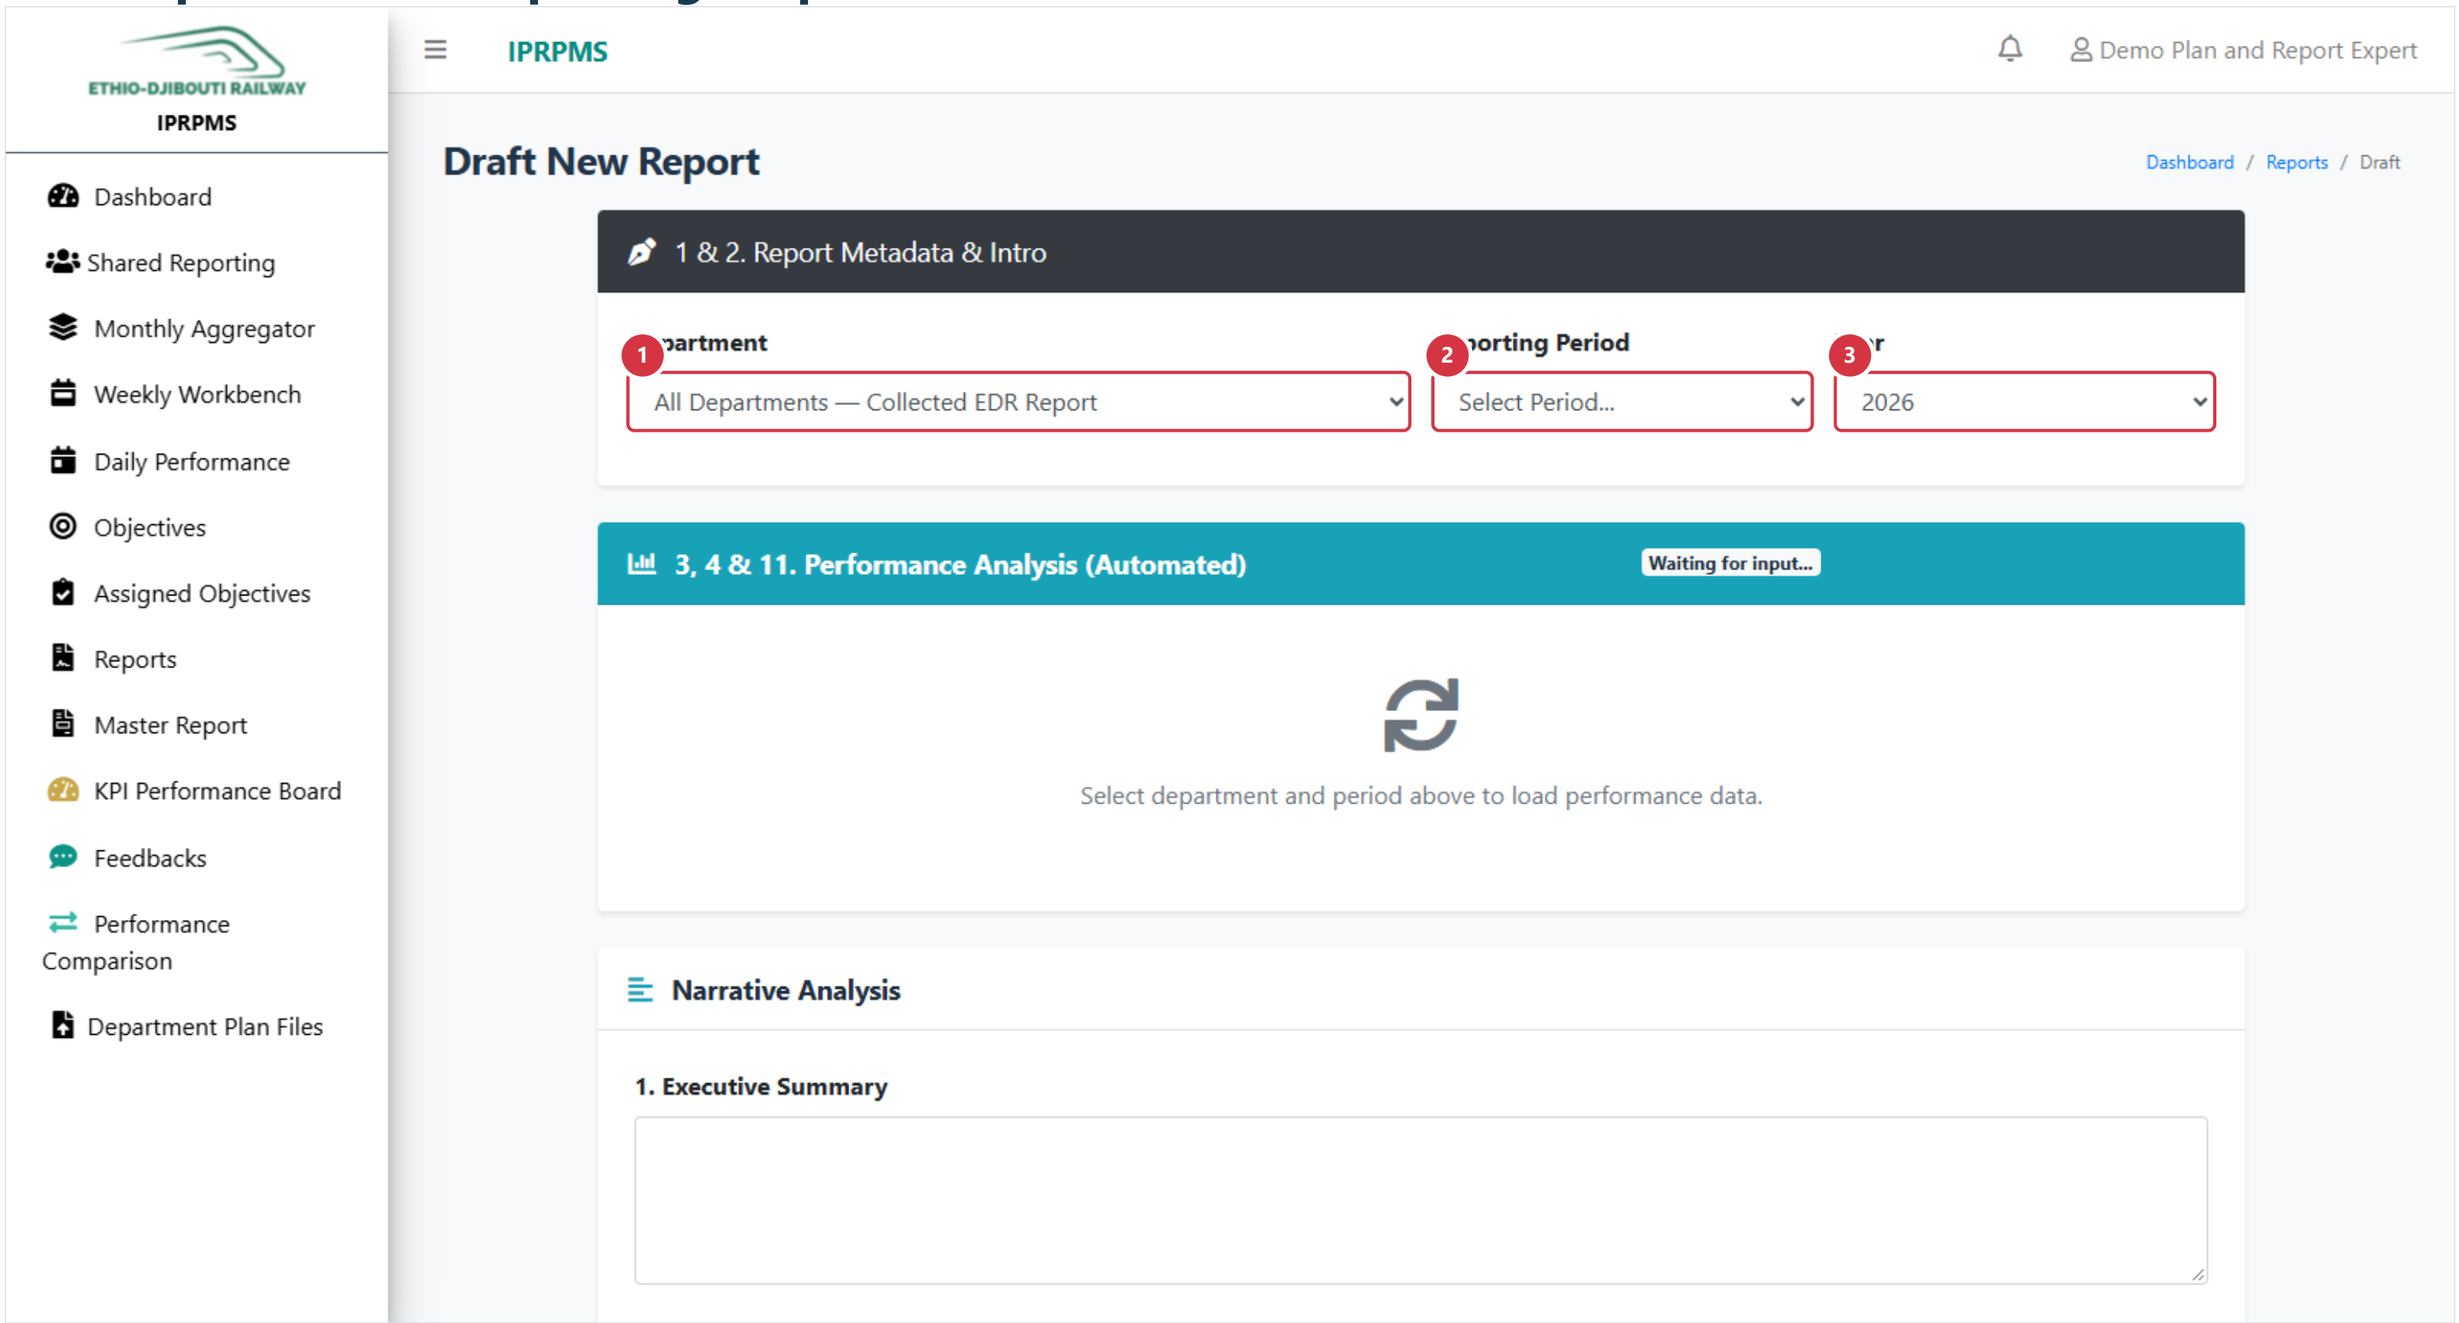

Reports: start a narrative report

1. Open Reports.
2. Select the new-report action to prepare a report.
3. Open an existing report to review its scope and status.

After this step: The report preparation workflow is separate from entry and approval of the underlying performance actuals.

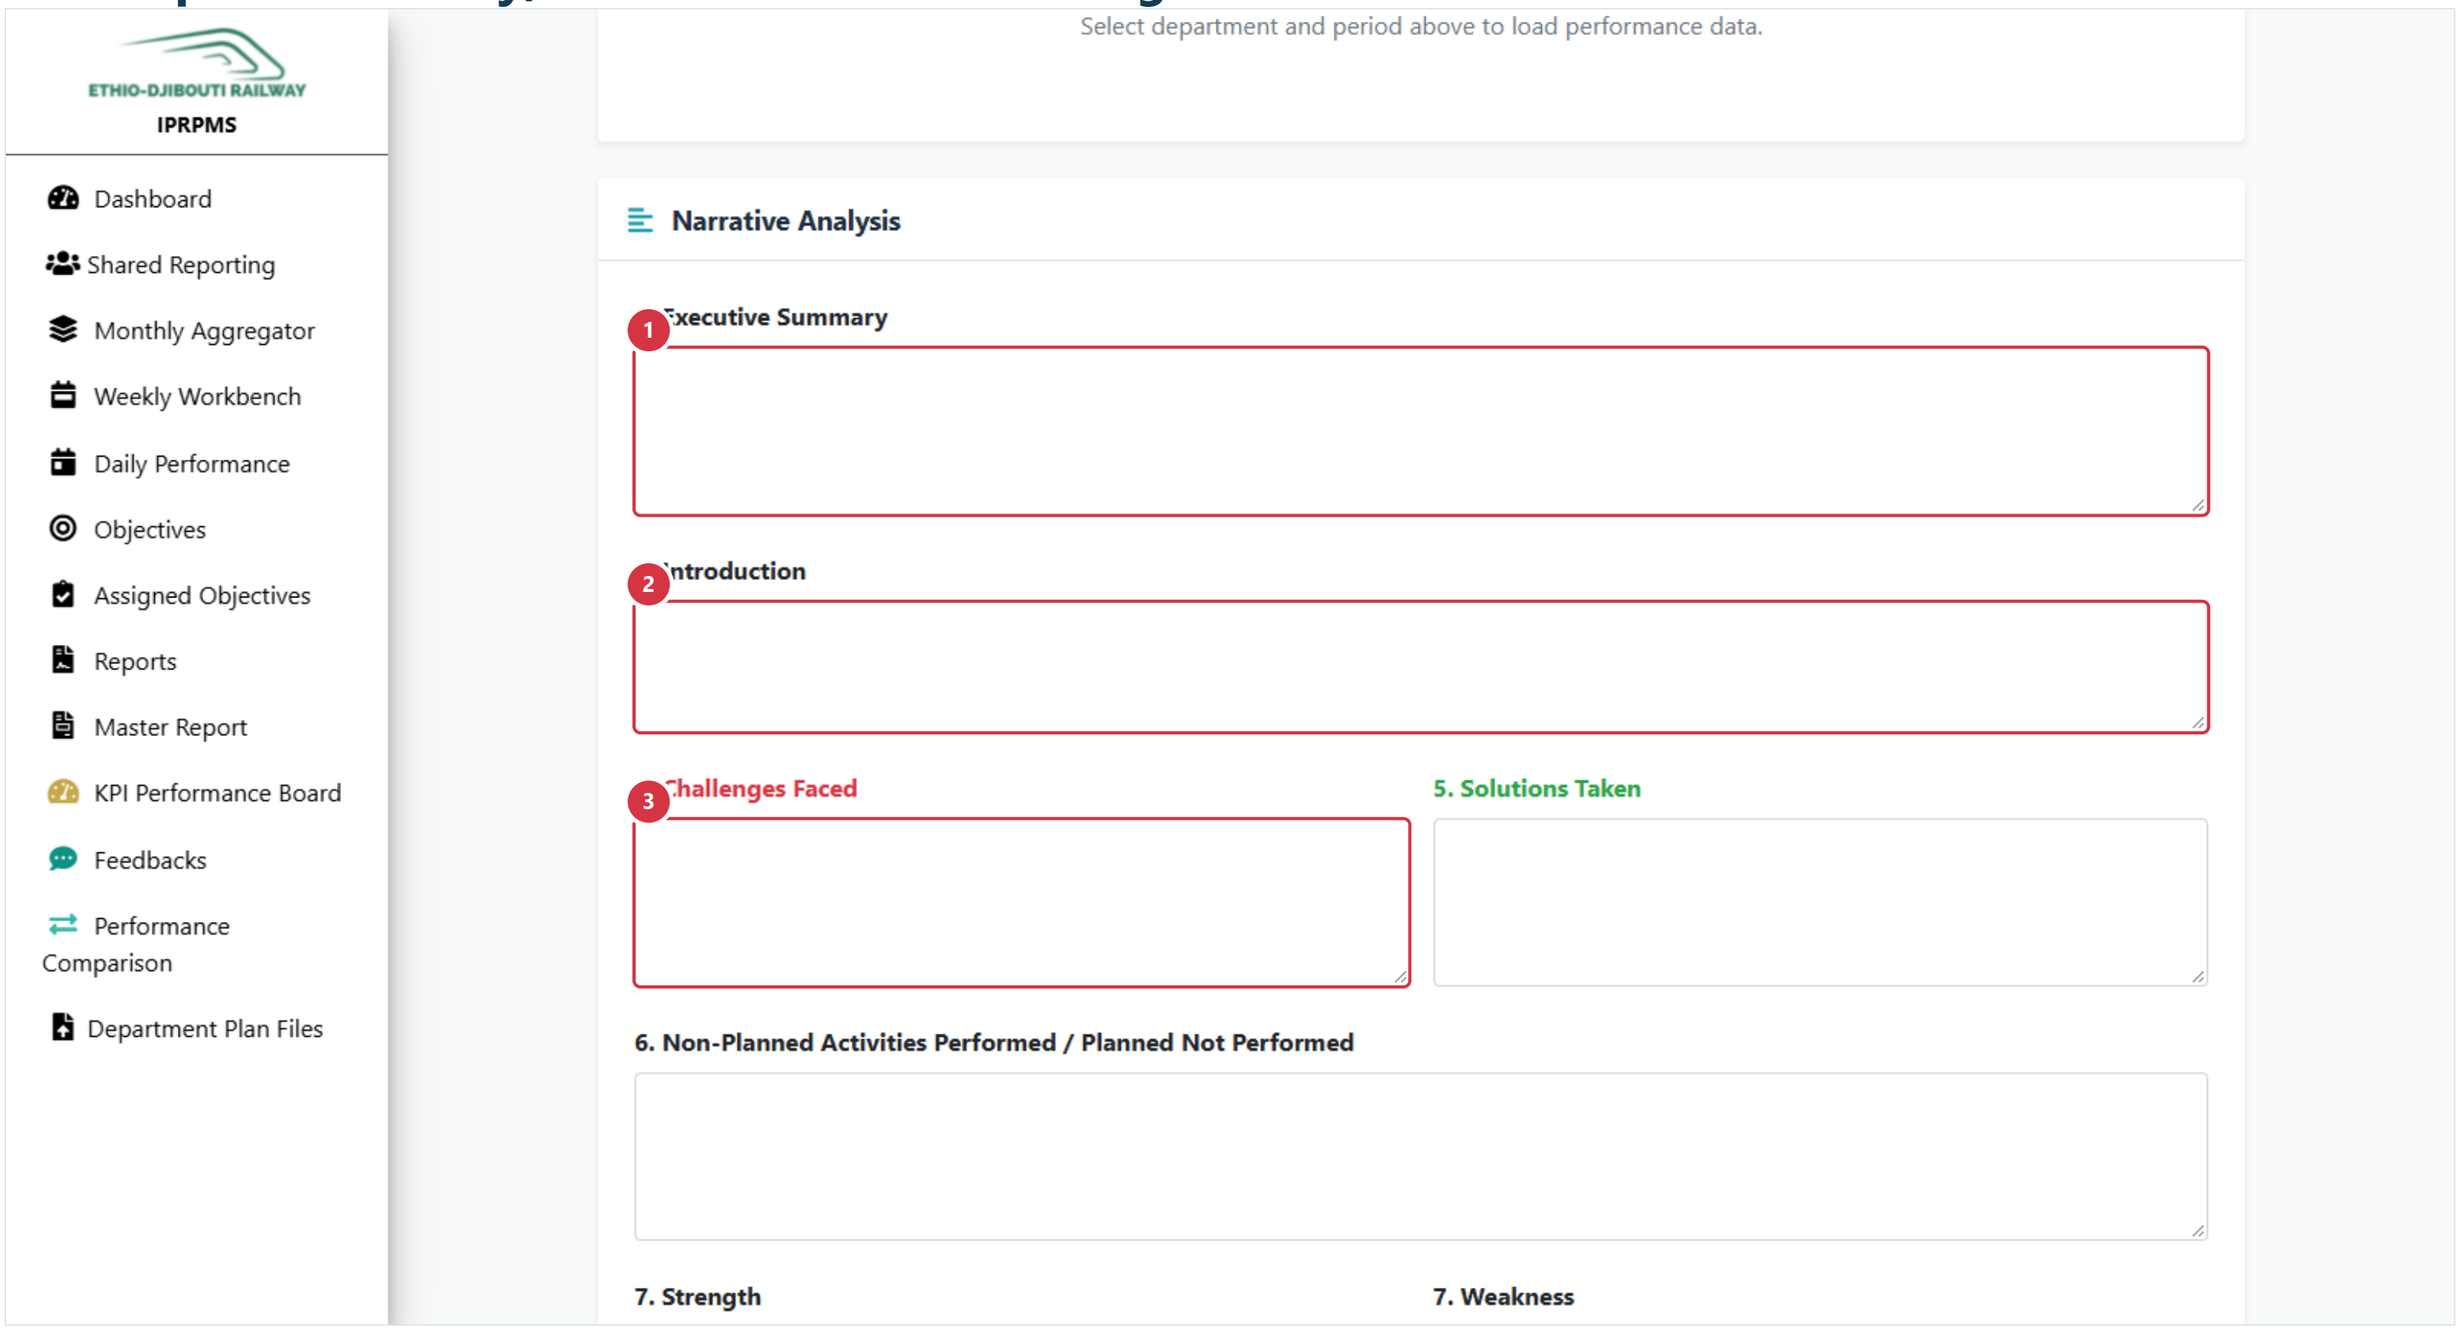

New report: set the reporting scope

1. Choose the department or organization scope offered.
2. Select Reporting Period, including its month/week when applicable.
3. Select Year and review the scope before writing the narrative.

After this step: Monthly and weekly periods use their specific month/week selections when offered.

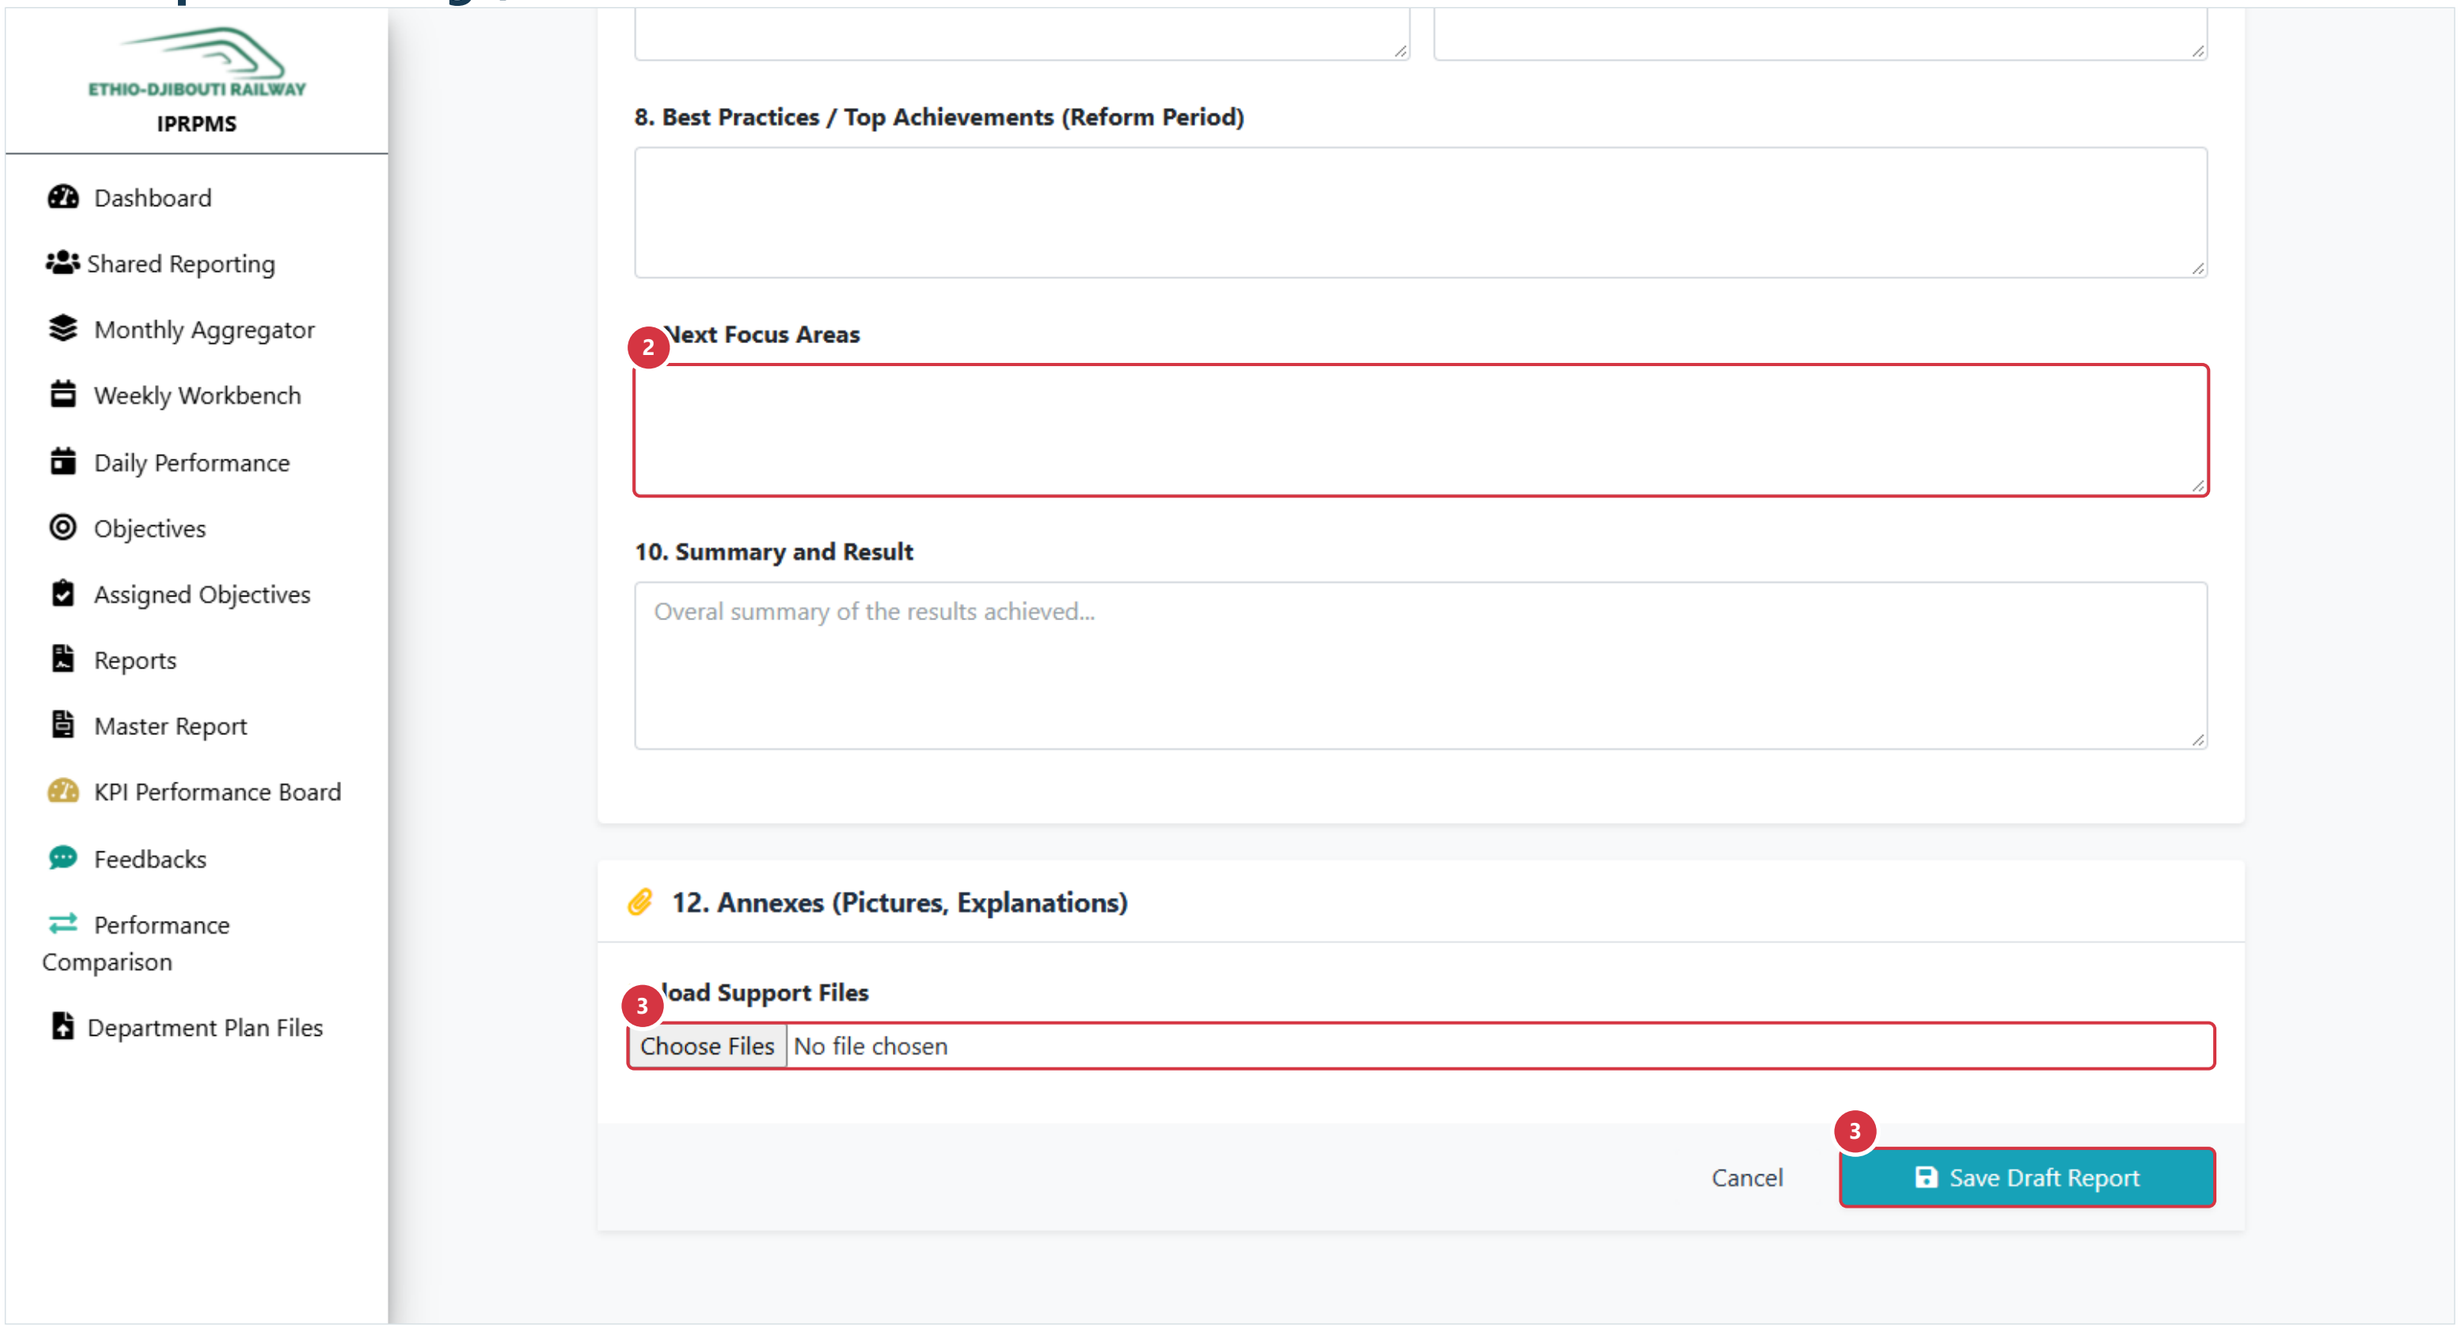

New report: summary, introduction and challenges

1. Enter Executive Summary.
2. Complete Introduction.
3. Describe Challenges and Solutions, then record any Non-planned Activities.

After this step: Use approved results and documented evidence to support the narrative.

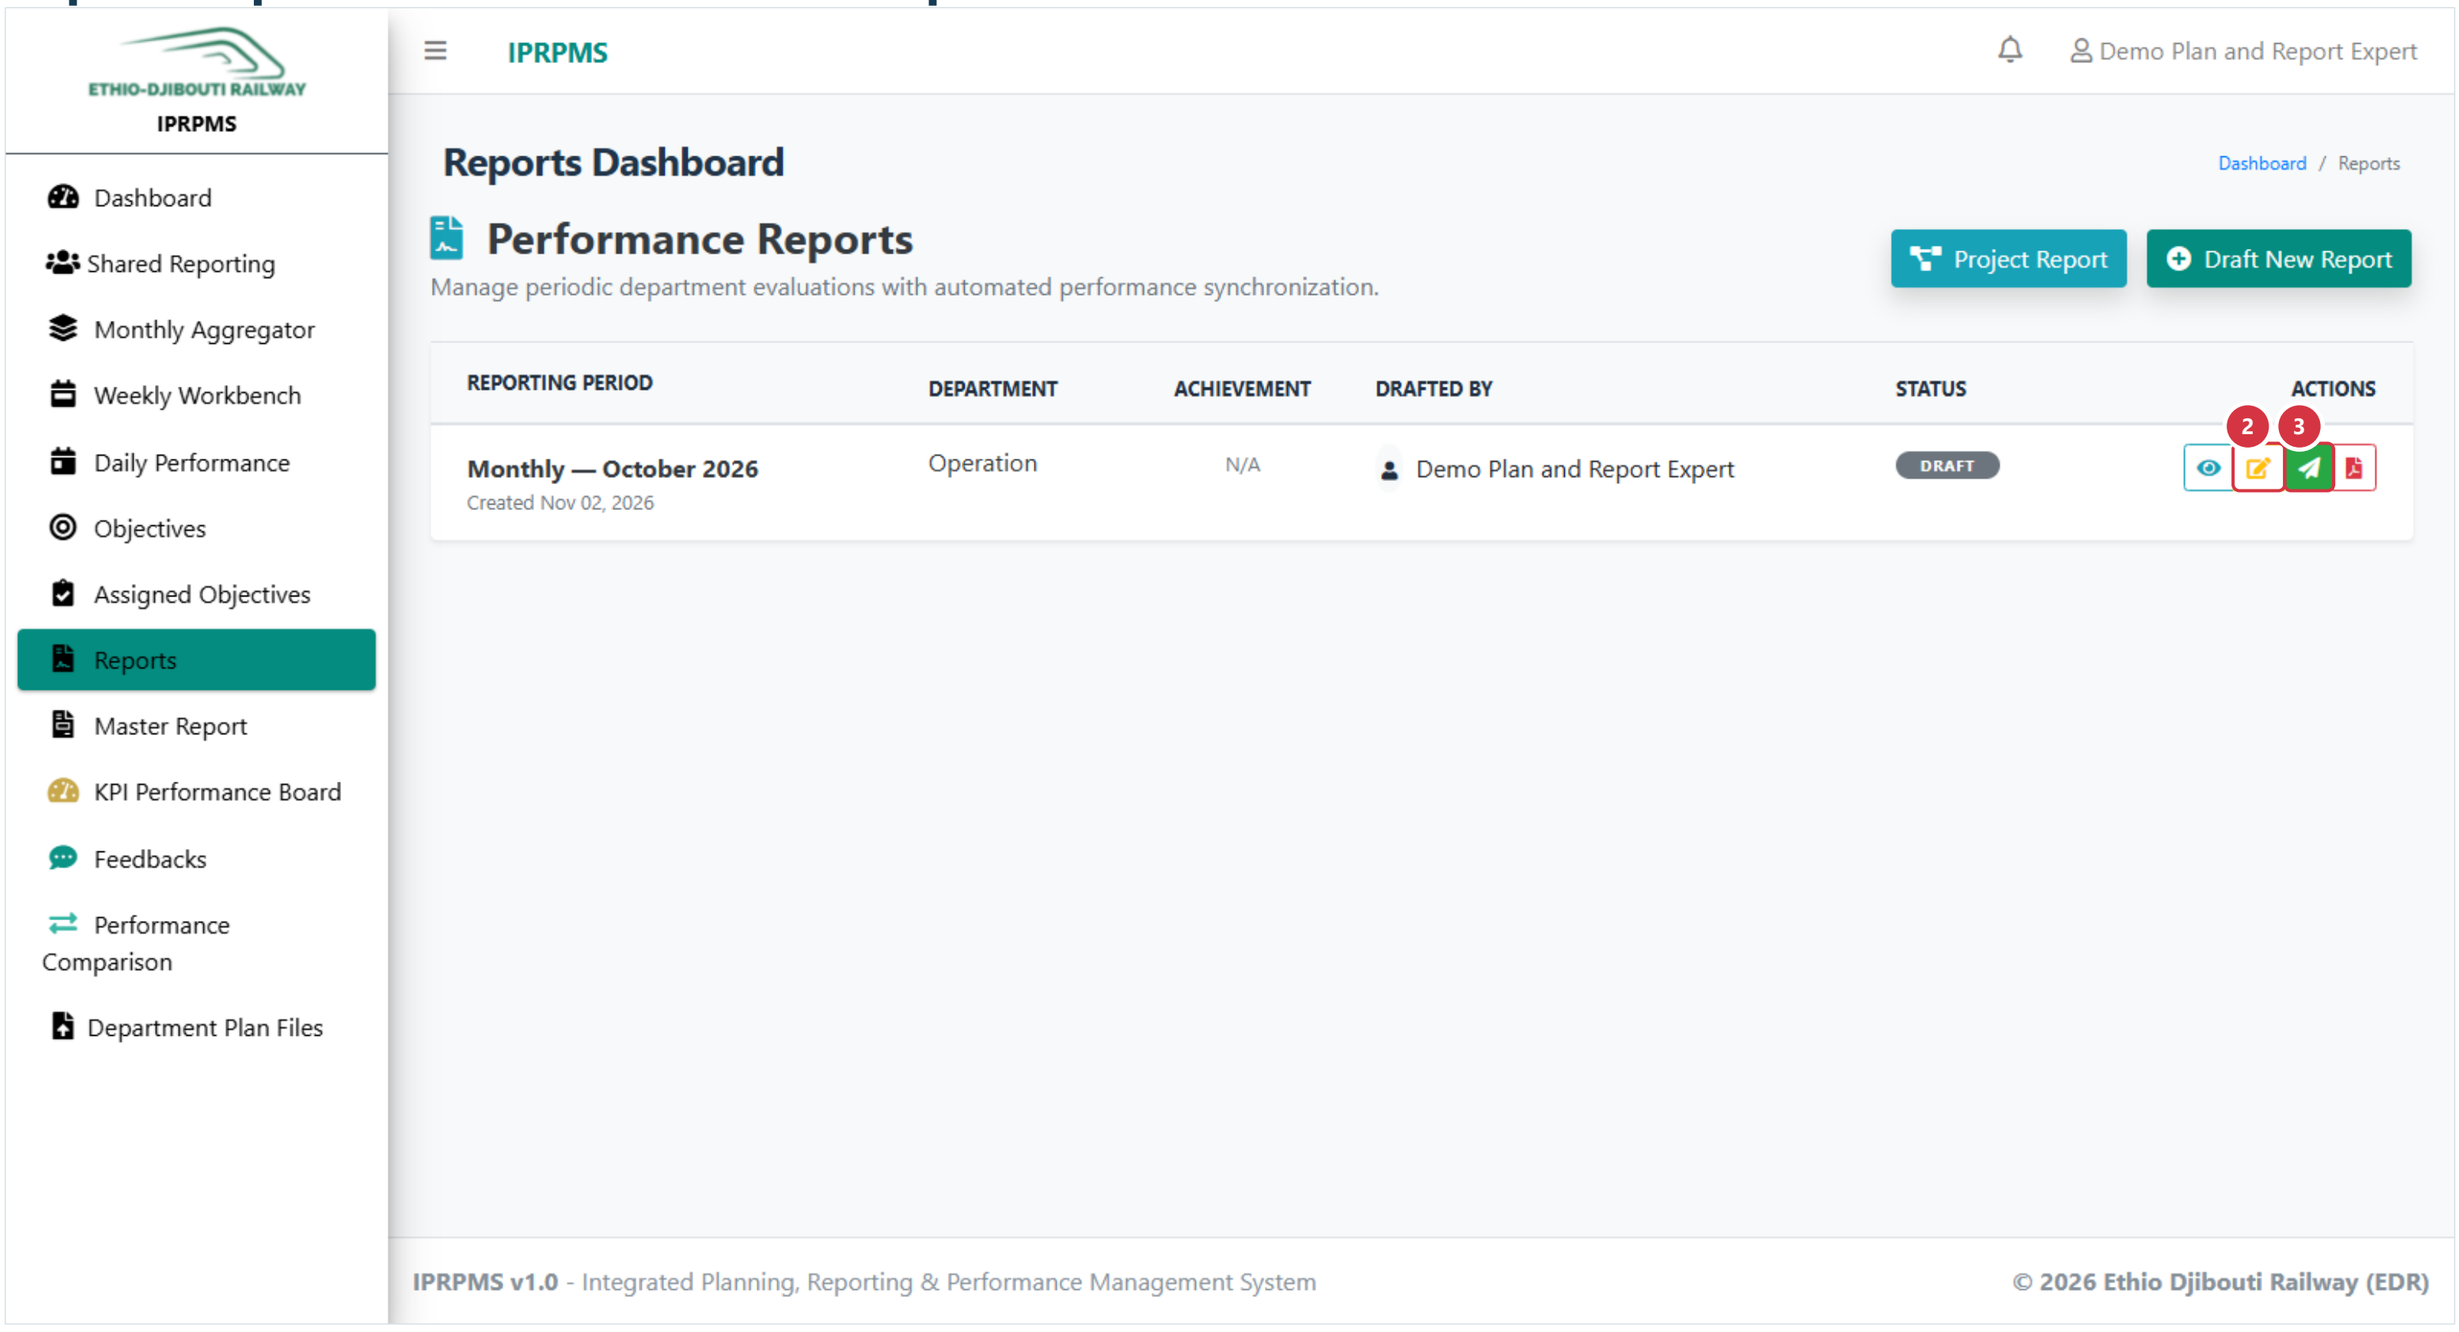

New report: findings, next focus and attachments

1. Complete Strengths, Weaknesses and Best Practices.
2. Enter Next Focus Areas and Summary and Result.
3. Attach permitted annexes and click Save Draft Report.

After this step: Save first. The saved report supplies the submission and review actions for the next stage.

Report: Expert submission from the Reports list

1. Locate the saved report in Reports.
2. Use the edit icon to correct the narrative when needed.
3. Click the paper-plane icon titled Send to Directorate.

After this step: The submission control is in the Reports list, not on the report-reading page.

Prepare formal feedback for a department

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

Feedback tells a department what it did well, what needs attention and where to focus next. A saved draft is internal review material, not yet the department's official feedback.

Before you click

Choose the department, plan year and reporting period. Read the loaded performance preview and the supporting submission. Use clear evidence rather than personal remarks.

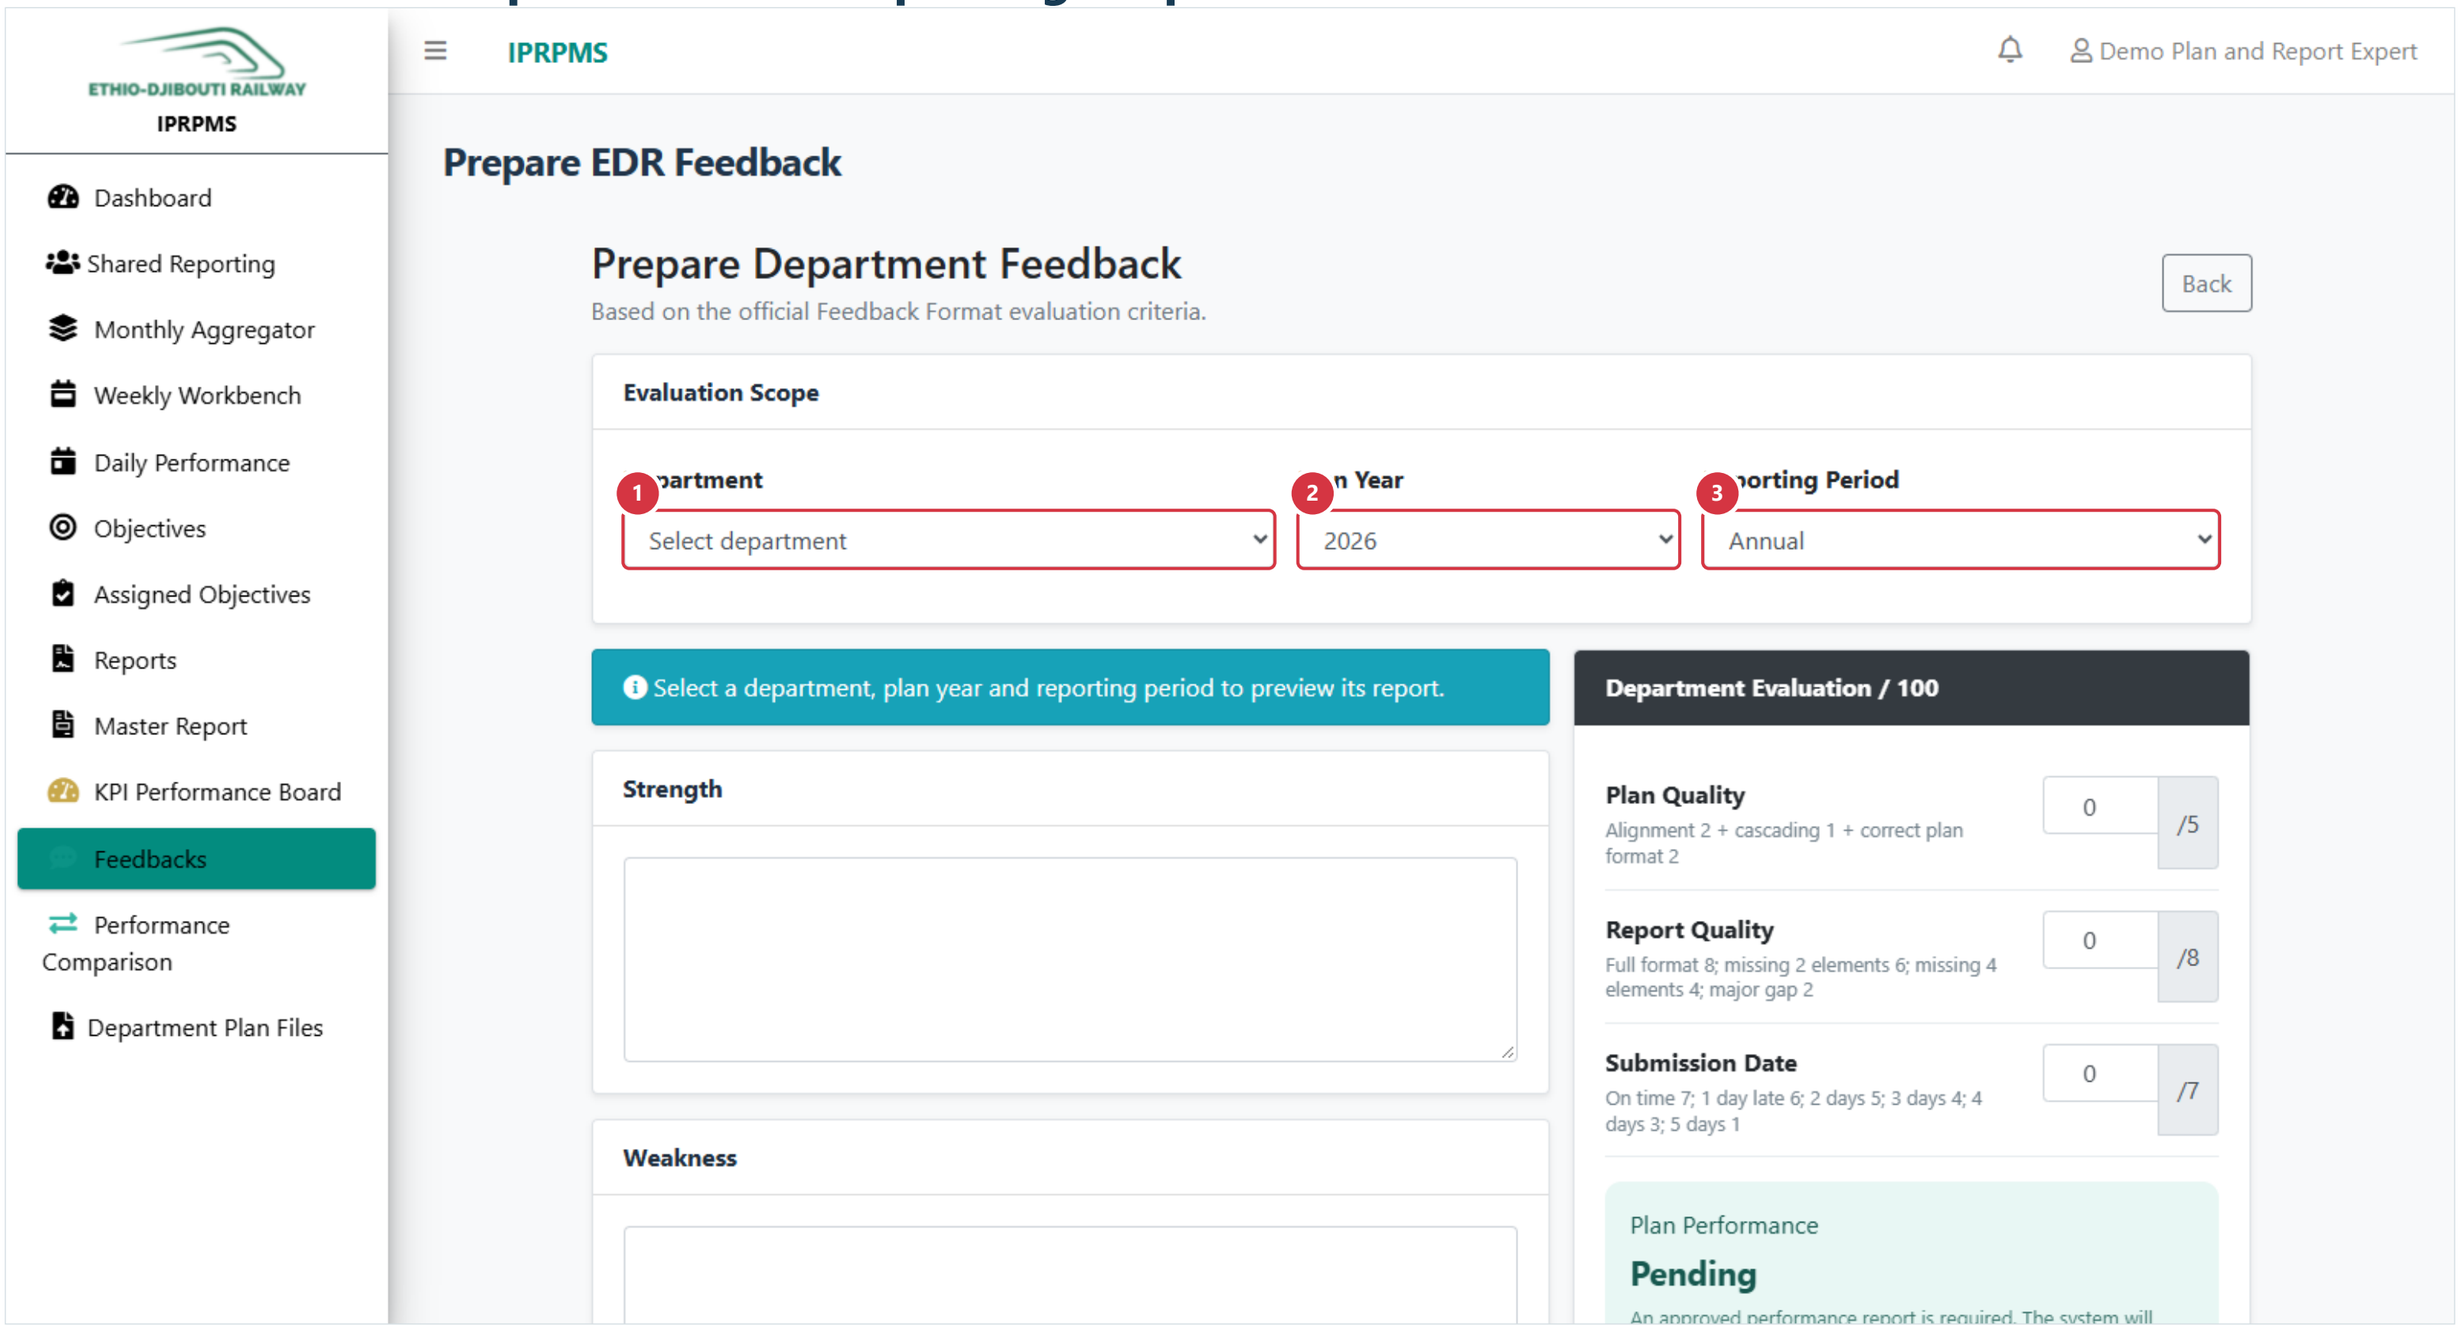

What to check

Write strengths, weaknesses and next focus. Respect the displayed quality limits: plan quality 5, report quality 8 and submission 7. The performance component is calculated automatically out of 80.

How you know it worked

Save and send from the Feedbacks list to the Directorate. The Chief finalizes and releases feedback after the required performance approval. The Department Chief then receives the released feedback; ordinary Experts do not see the internal draft.

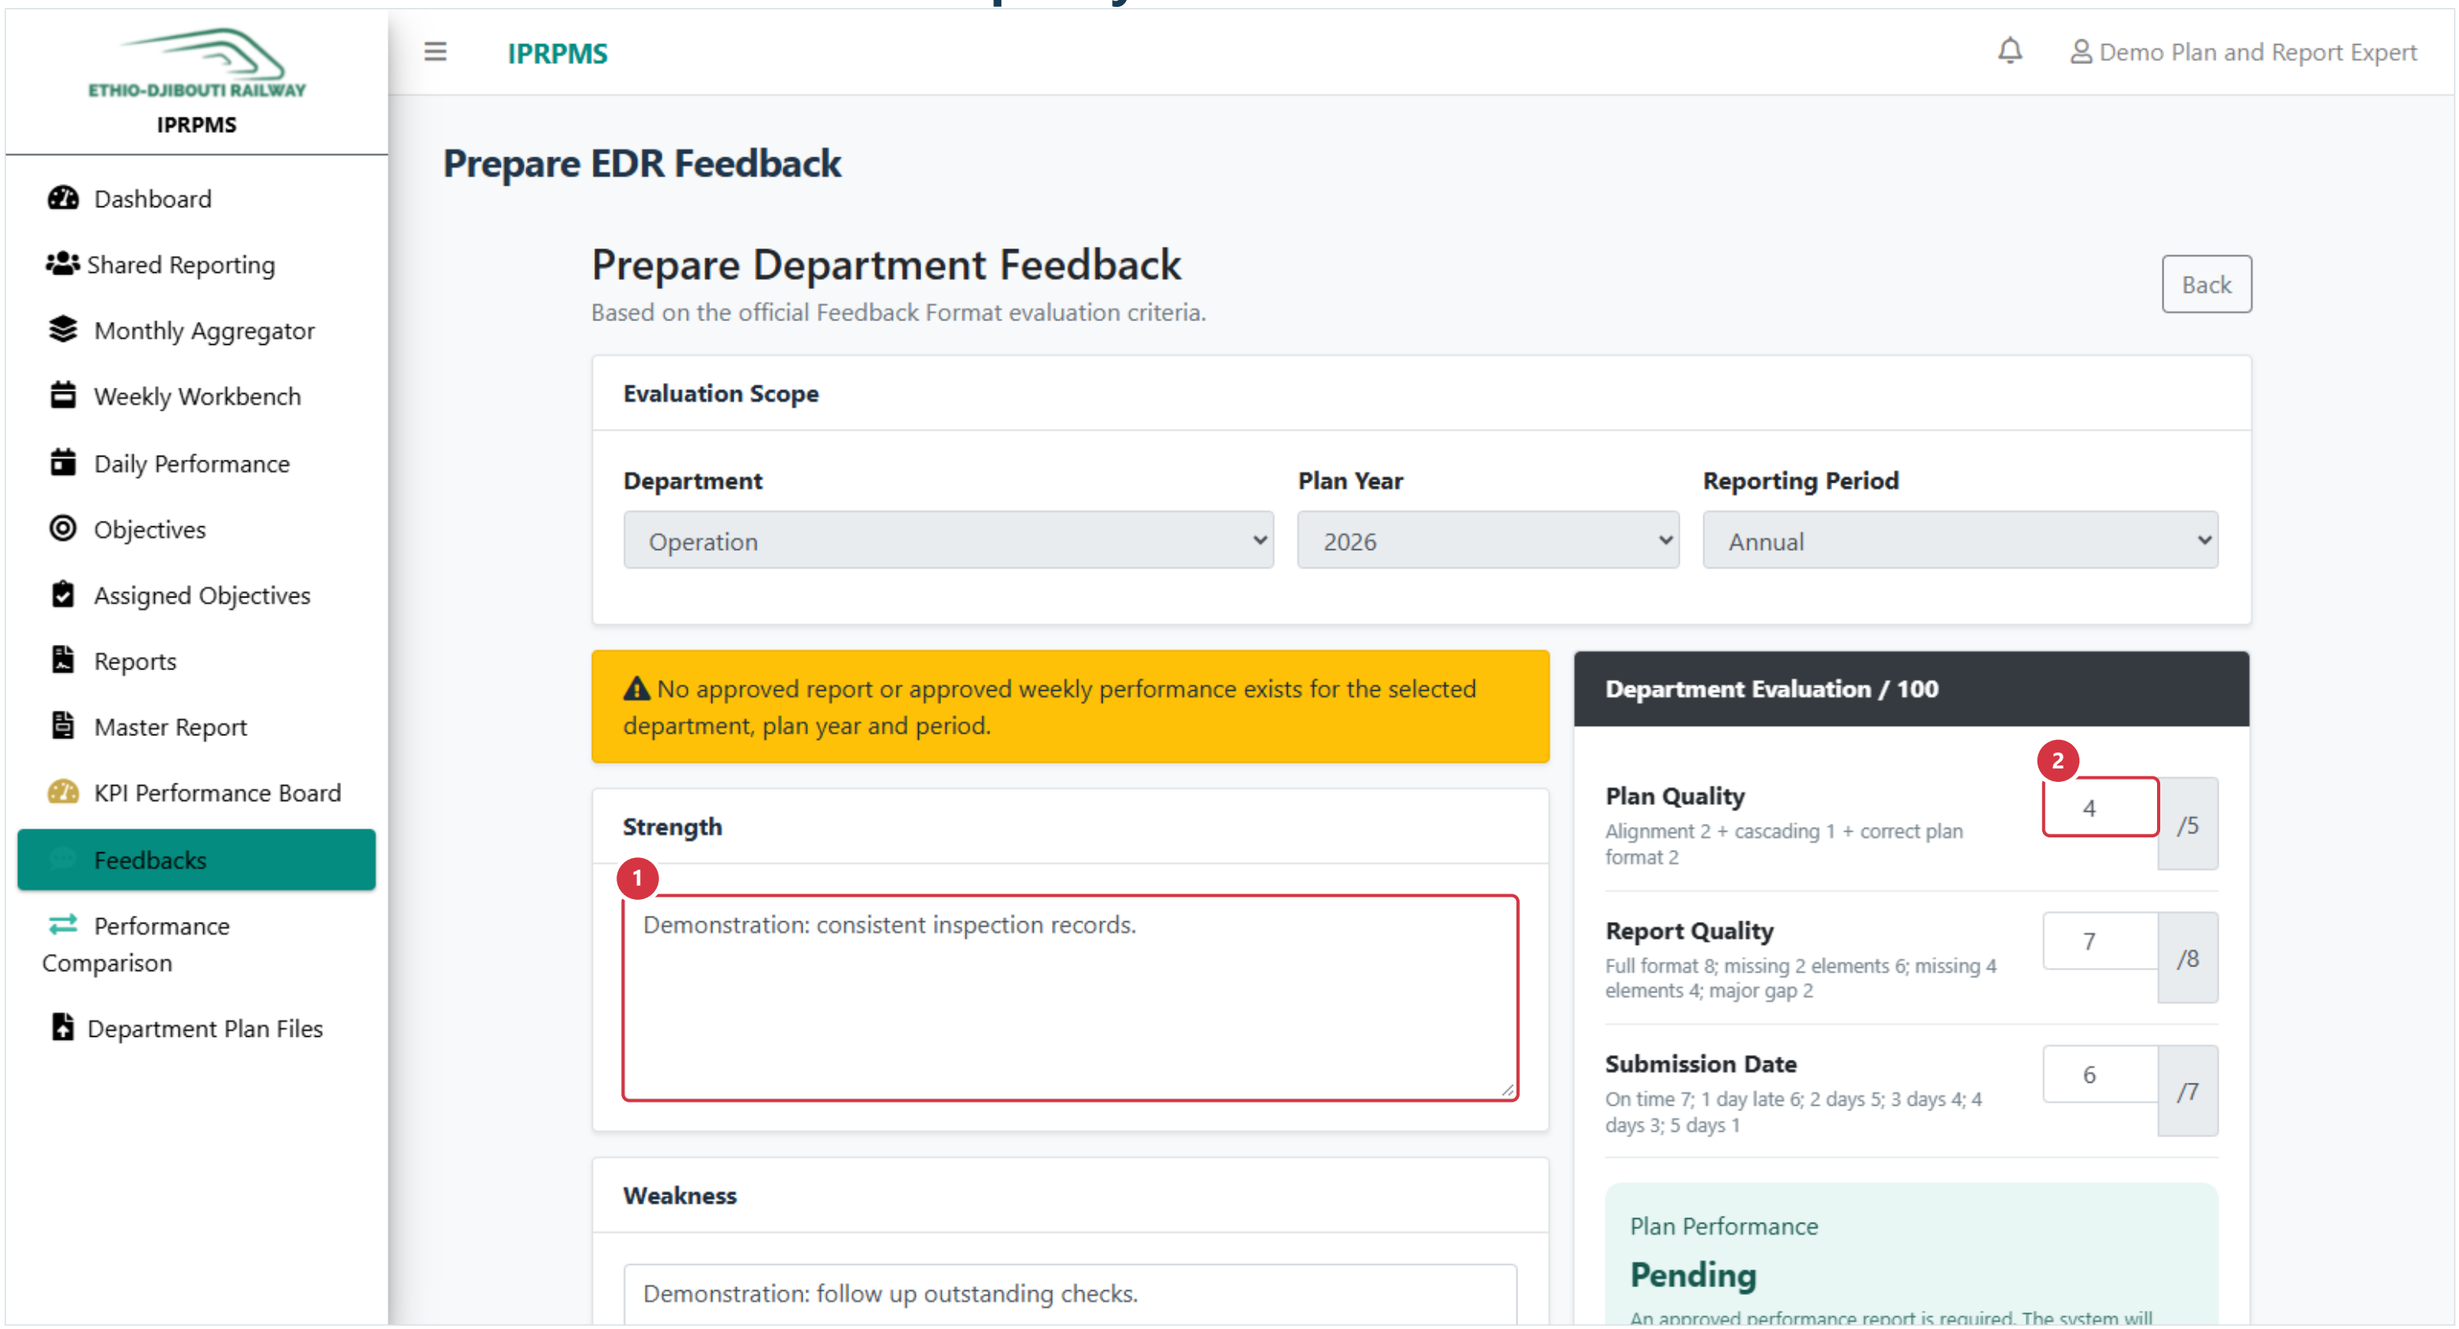

Feedback: select a department and reporting scope

1. Choose the Department for the feedback.
2. Select Plan Year.
3. Select Reporting Period and review the performance preview loaded for that scope.

After this step: The evaluation uses the selected department and available approved performance.

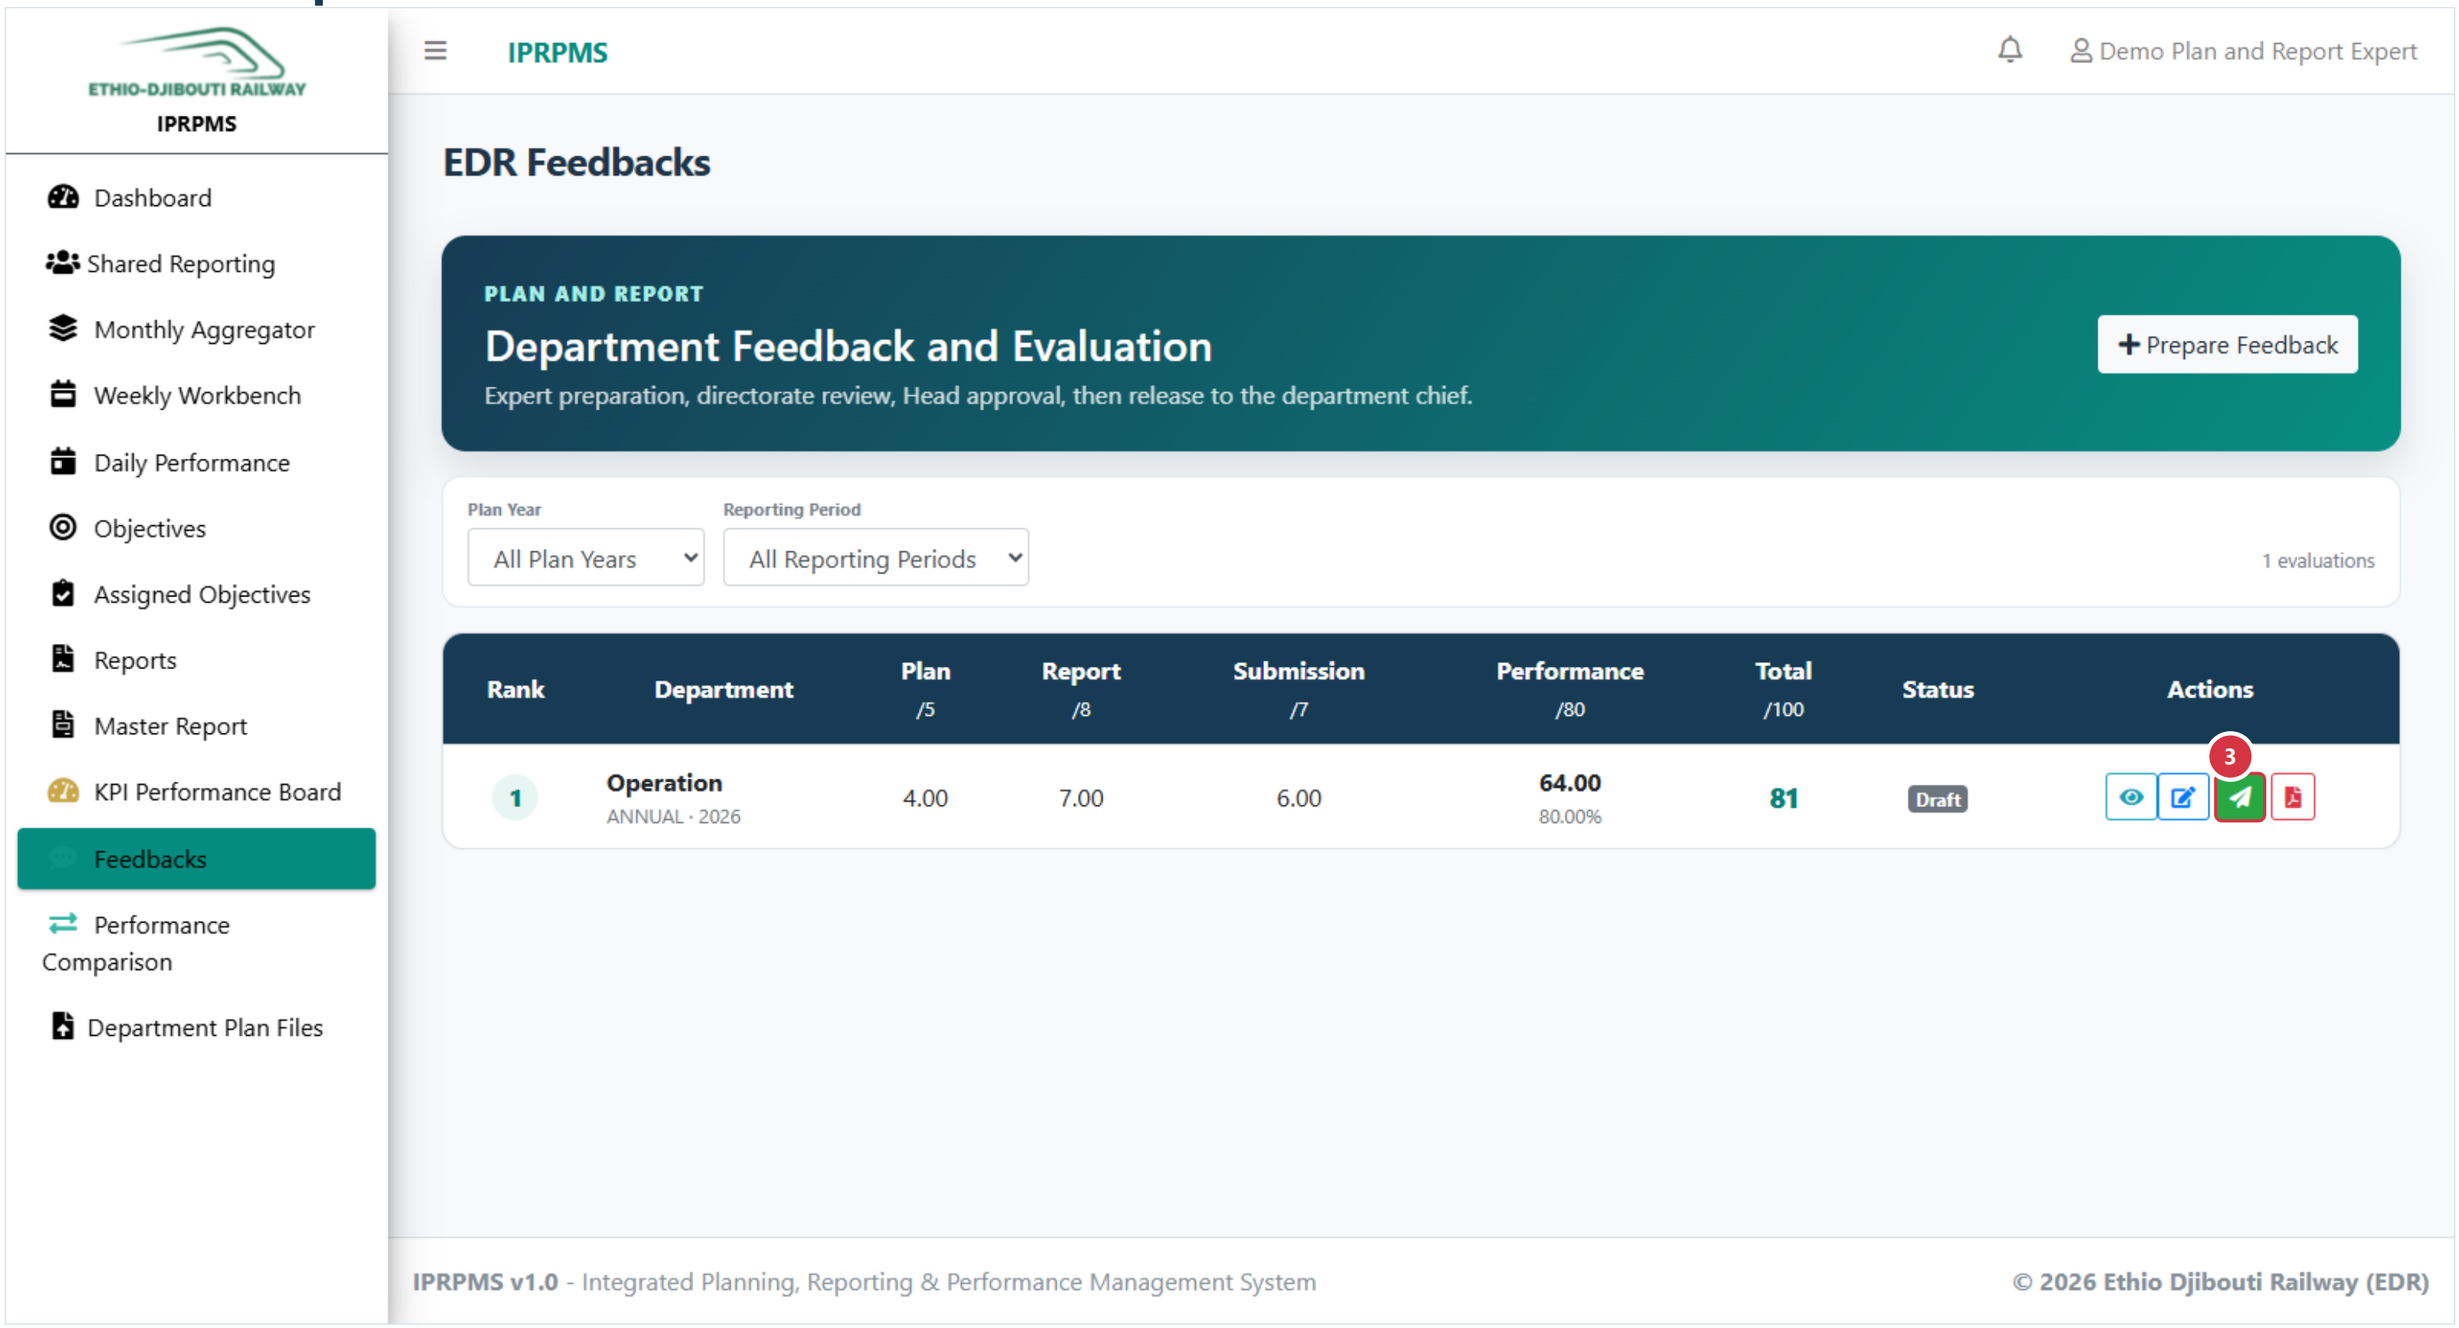

Feedback: write comments and evaluate quality

1. Write Strength, Weakness and Next Focus Areas.
2. Enter Plan Quality, Report Quality and Submission Date scores within the displayed maximums.
3. Click Save Feedback Changes.

After this step: The plan-performance component is calculated from approved performance. The form shows each evaluation limit.

Feedback: Expert submission

1. Find the prepared evaluation in Feedbacks.
2. Use the view/edit icons to check it.
3. Click the icon titled Send to Directorate.

After this step: This sends the feedback document for Directorate review.

Write and download the organization plan narration

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

Plan narration explains the full organization plan in words. It covers the selected year's approved plans, not just one department's performance report.

Before you click

Open Prepare Plan Narration from Objectives and select the plan year. Check the approved plan and action-plan item counts. Make sure you are describing that same year.

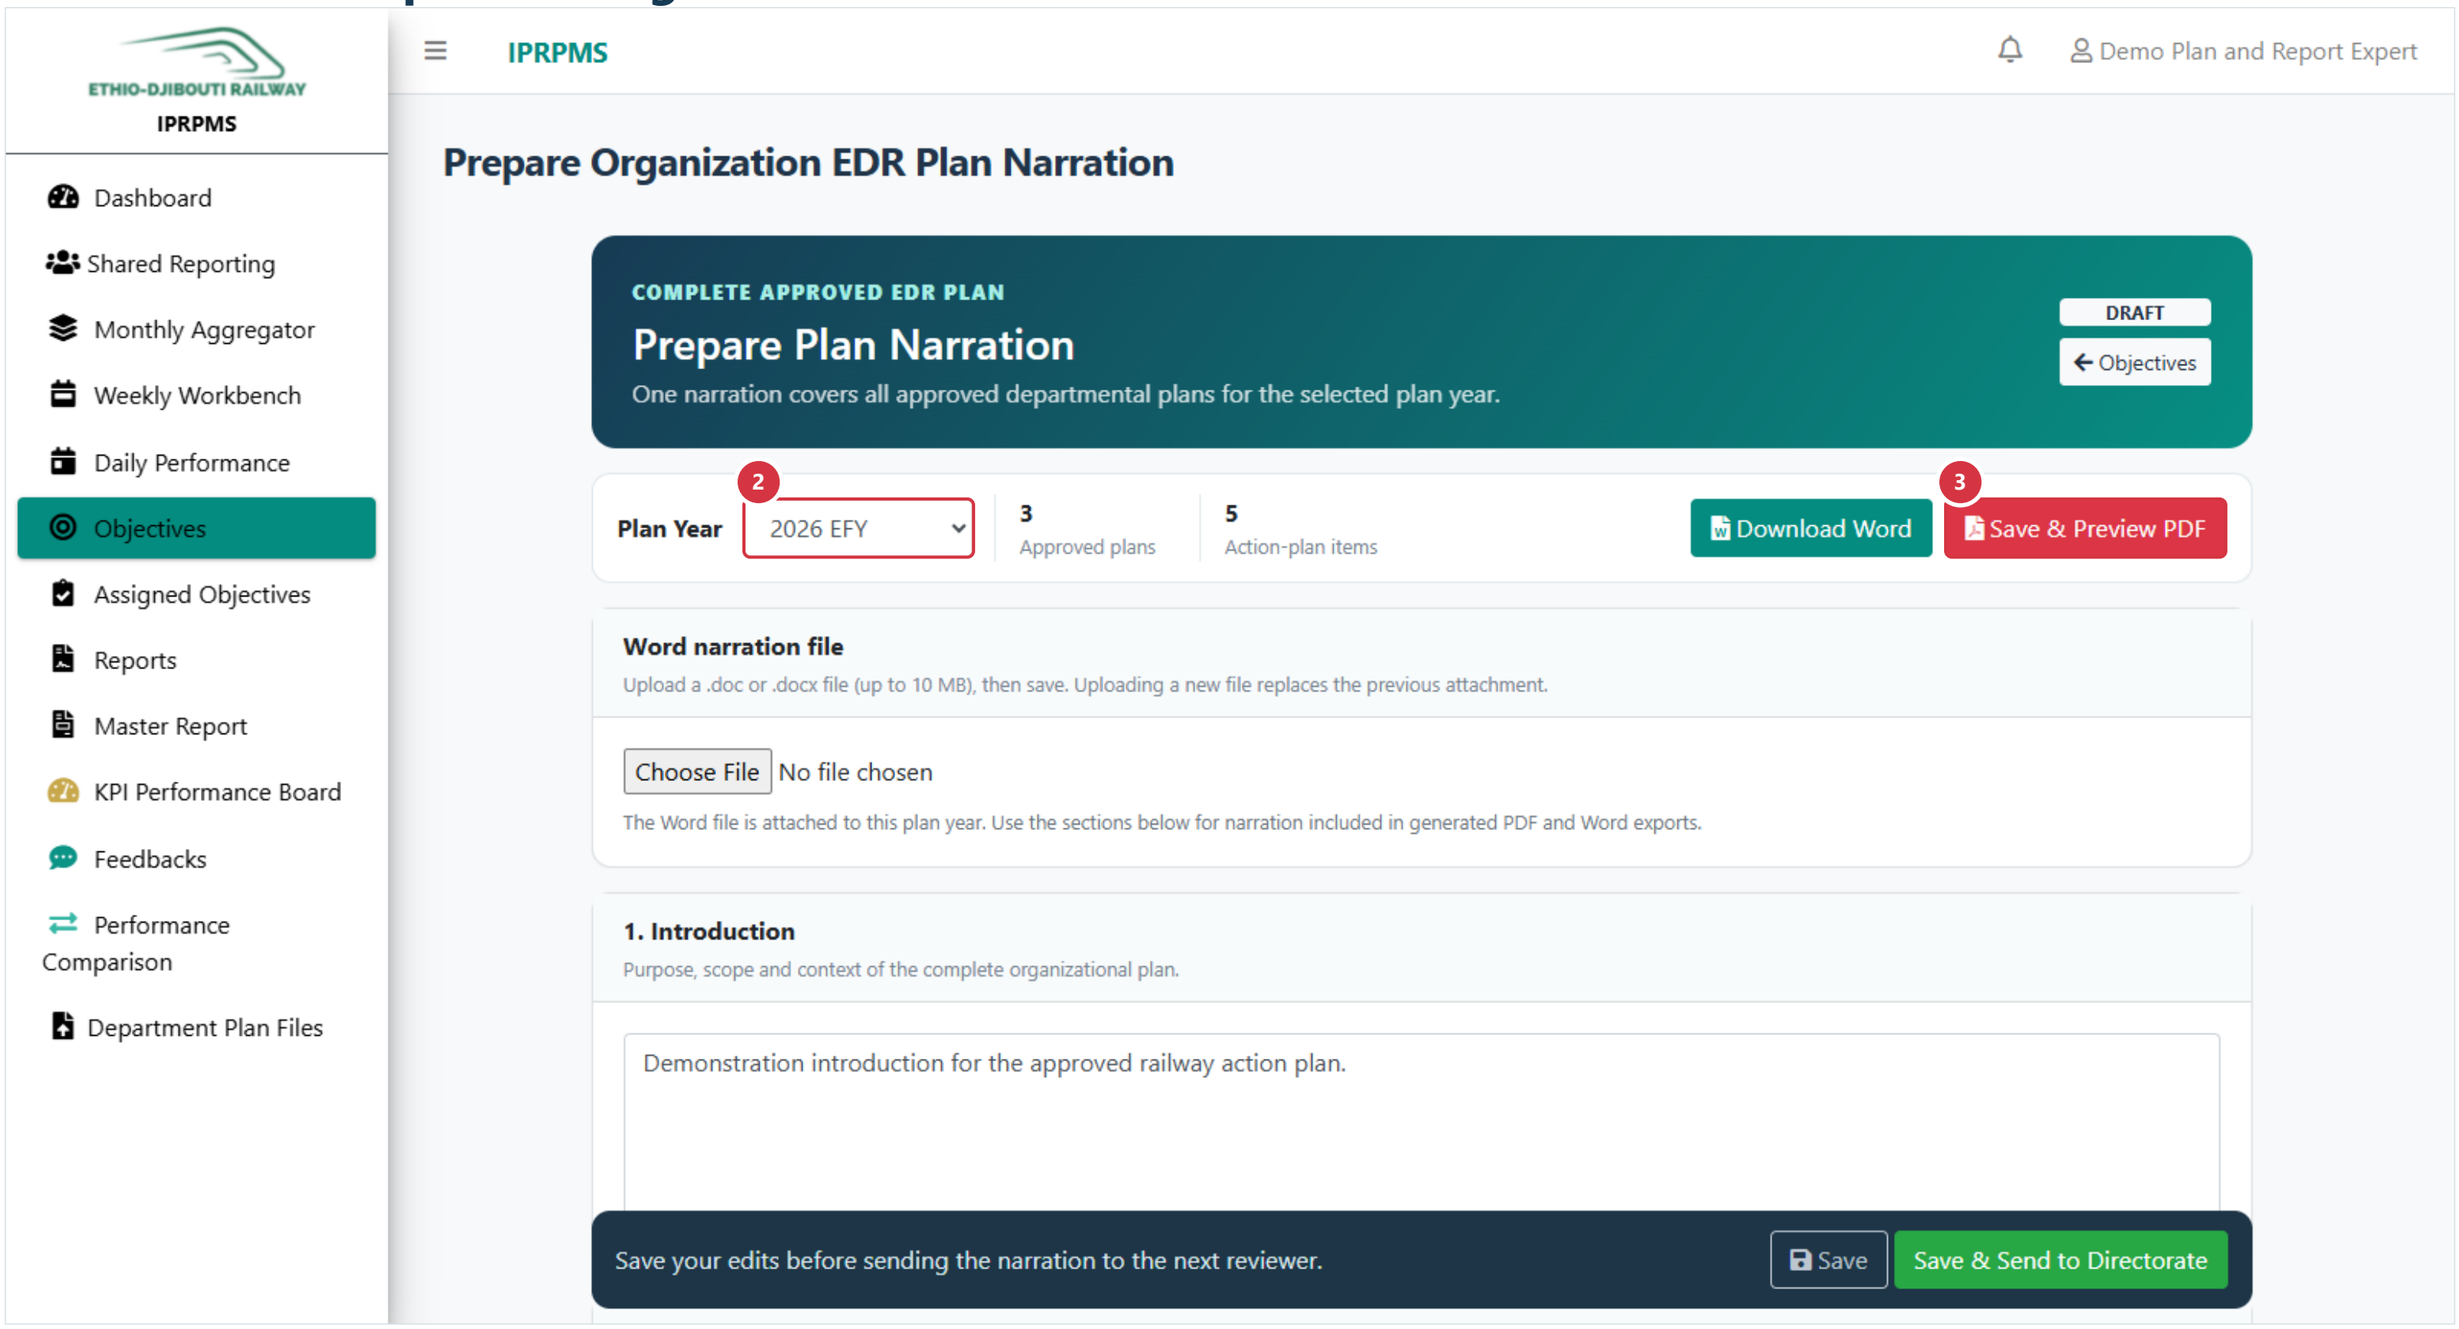

What to check

Complete the six narrative sections: introduction; past year performance and focus; strategic issues; implementation strategies; monitoring and evaluation; challenges and solutions. The plan activities and schedules are generated automatically.

How you know it worked

Save, preview PDF or download Word using the controls shown. A DOC/DOCX attachment can be added where required. Save & Send to Directorate starts review; the Directorate sends to the Head and the Chief approves the narration.

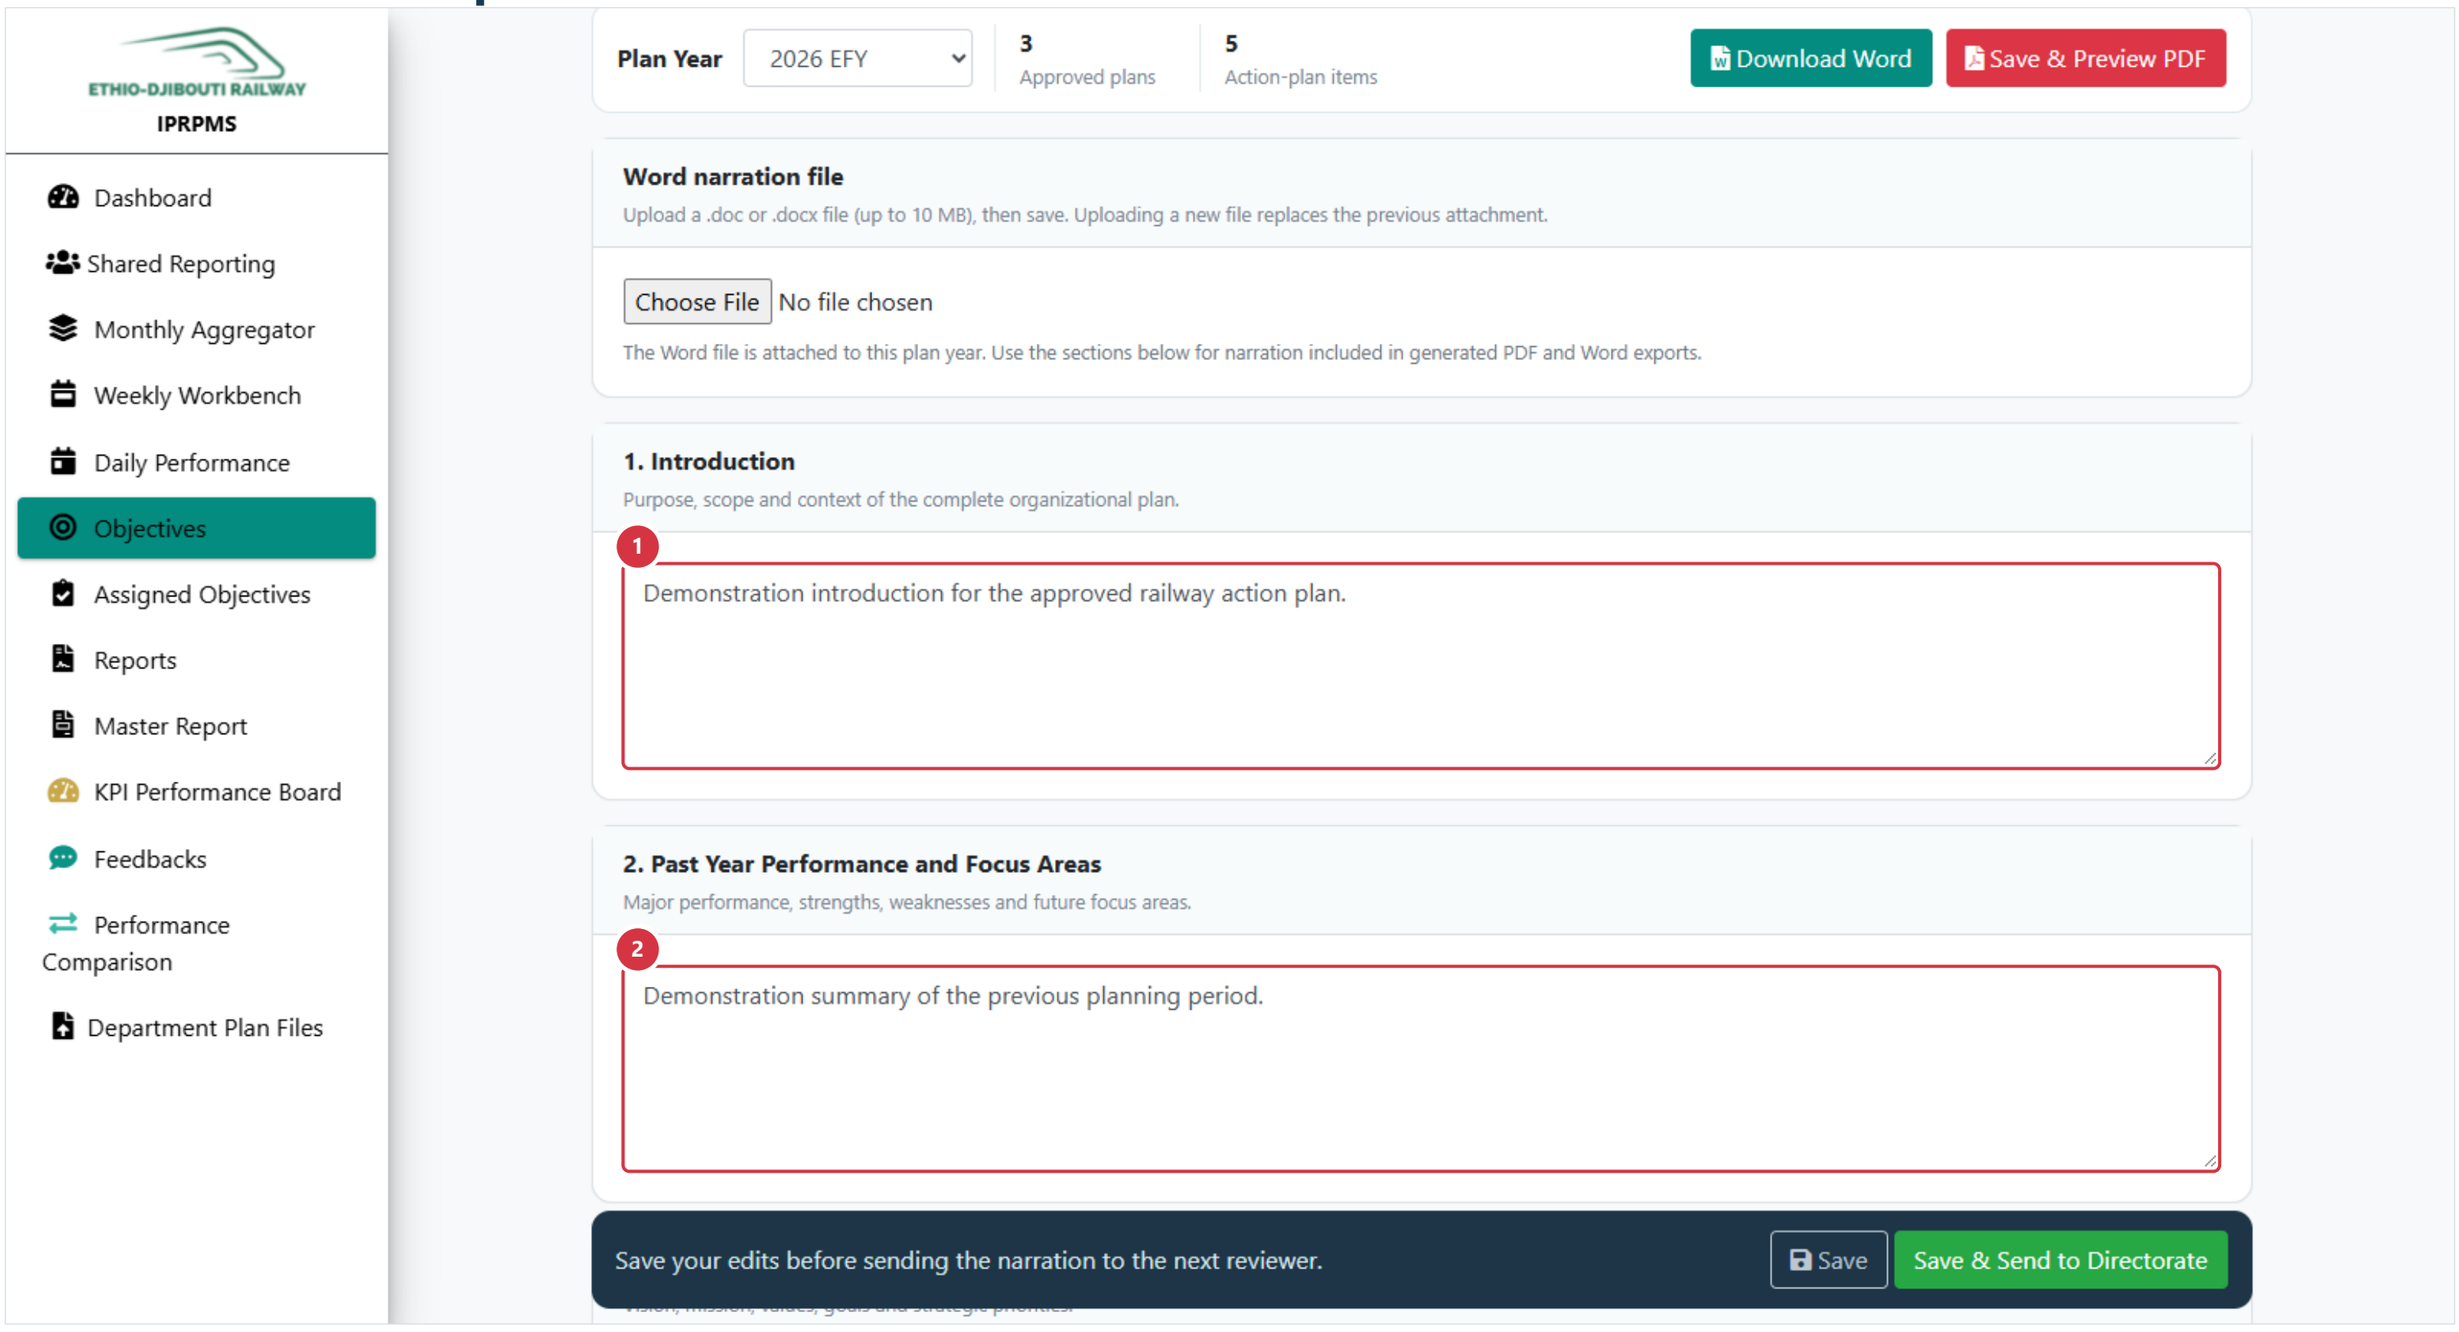

Plan narration: open the organization document

1. Open Objectives and click Prepare Plan Narration.
2. Select Plan Year.
3. Confirm the approved-plan and action-plan-item counts before editing.

After this step: The narration covers the approved departmental plans for the selected year.

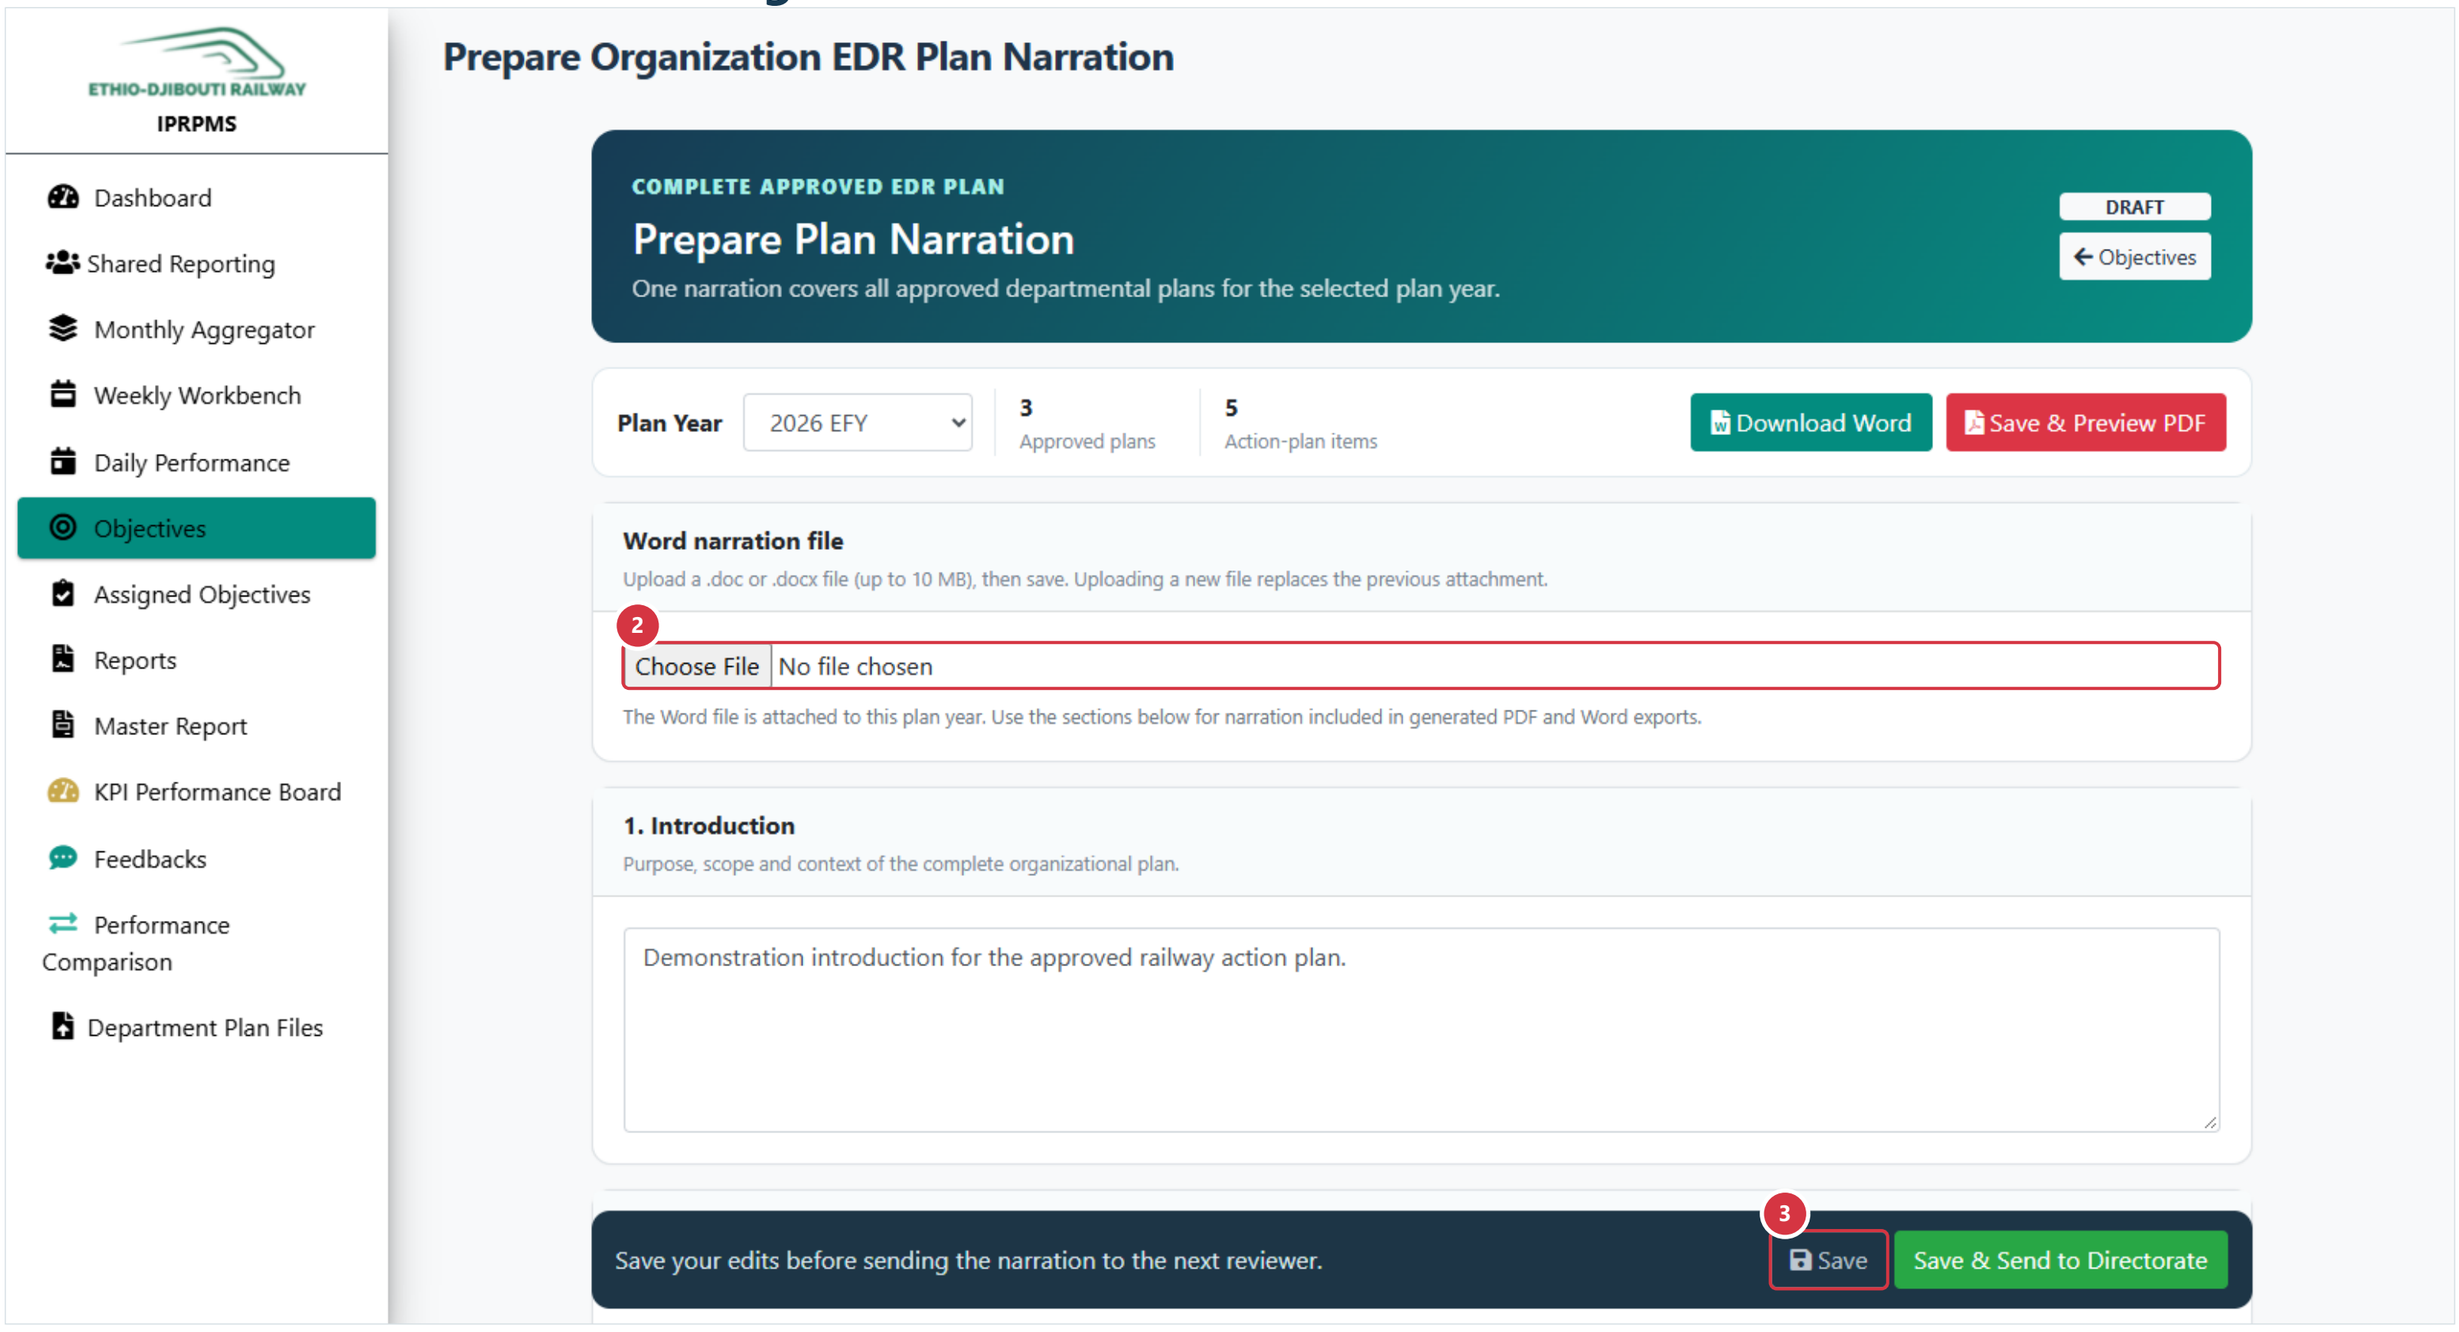

Plan narration: complete the narrative sections

1. Complete Introduction.
2. Complete Past Year Performance and Focus Areas.
3. Continue through Strategic Issues, Implementation Strategies, Monitoring/Evaluation and Challenges/Solutions, then save.

After this step: Complete the six narrative sections shown on the page. The objectives and action-plan schedules are generated automatically.

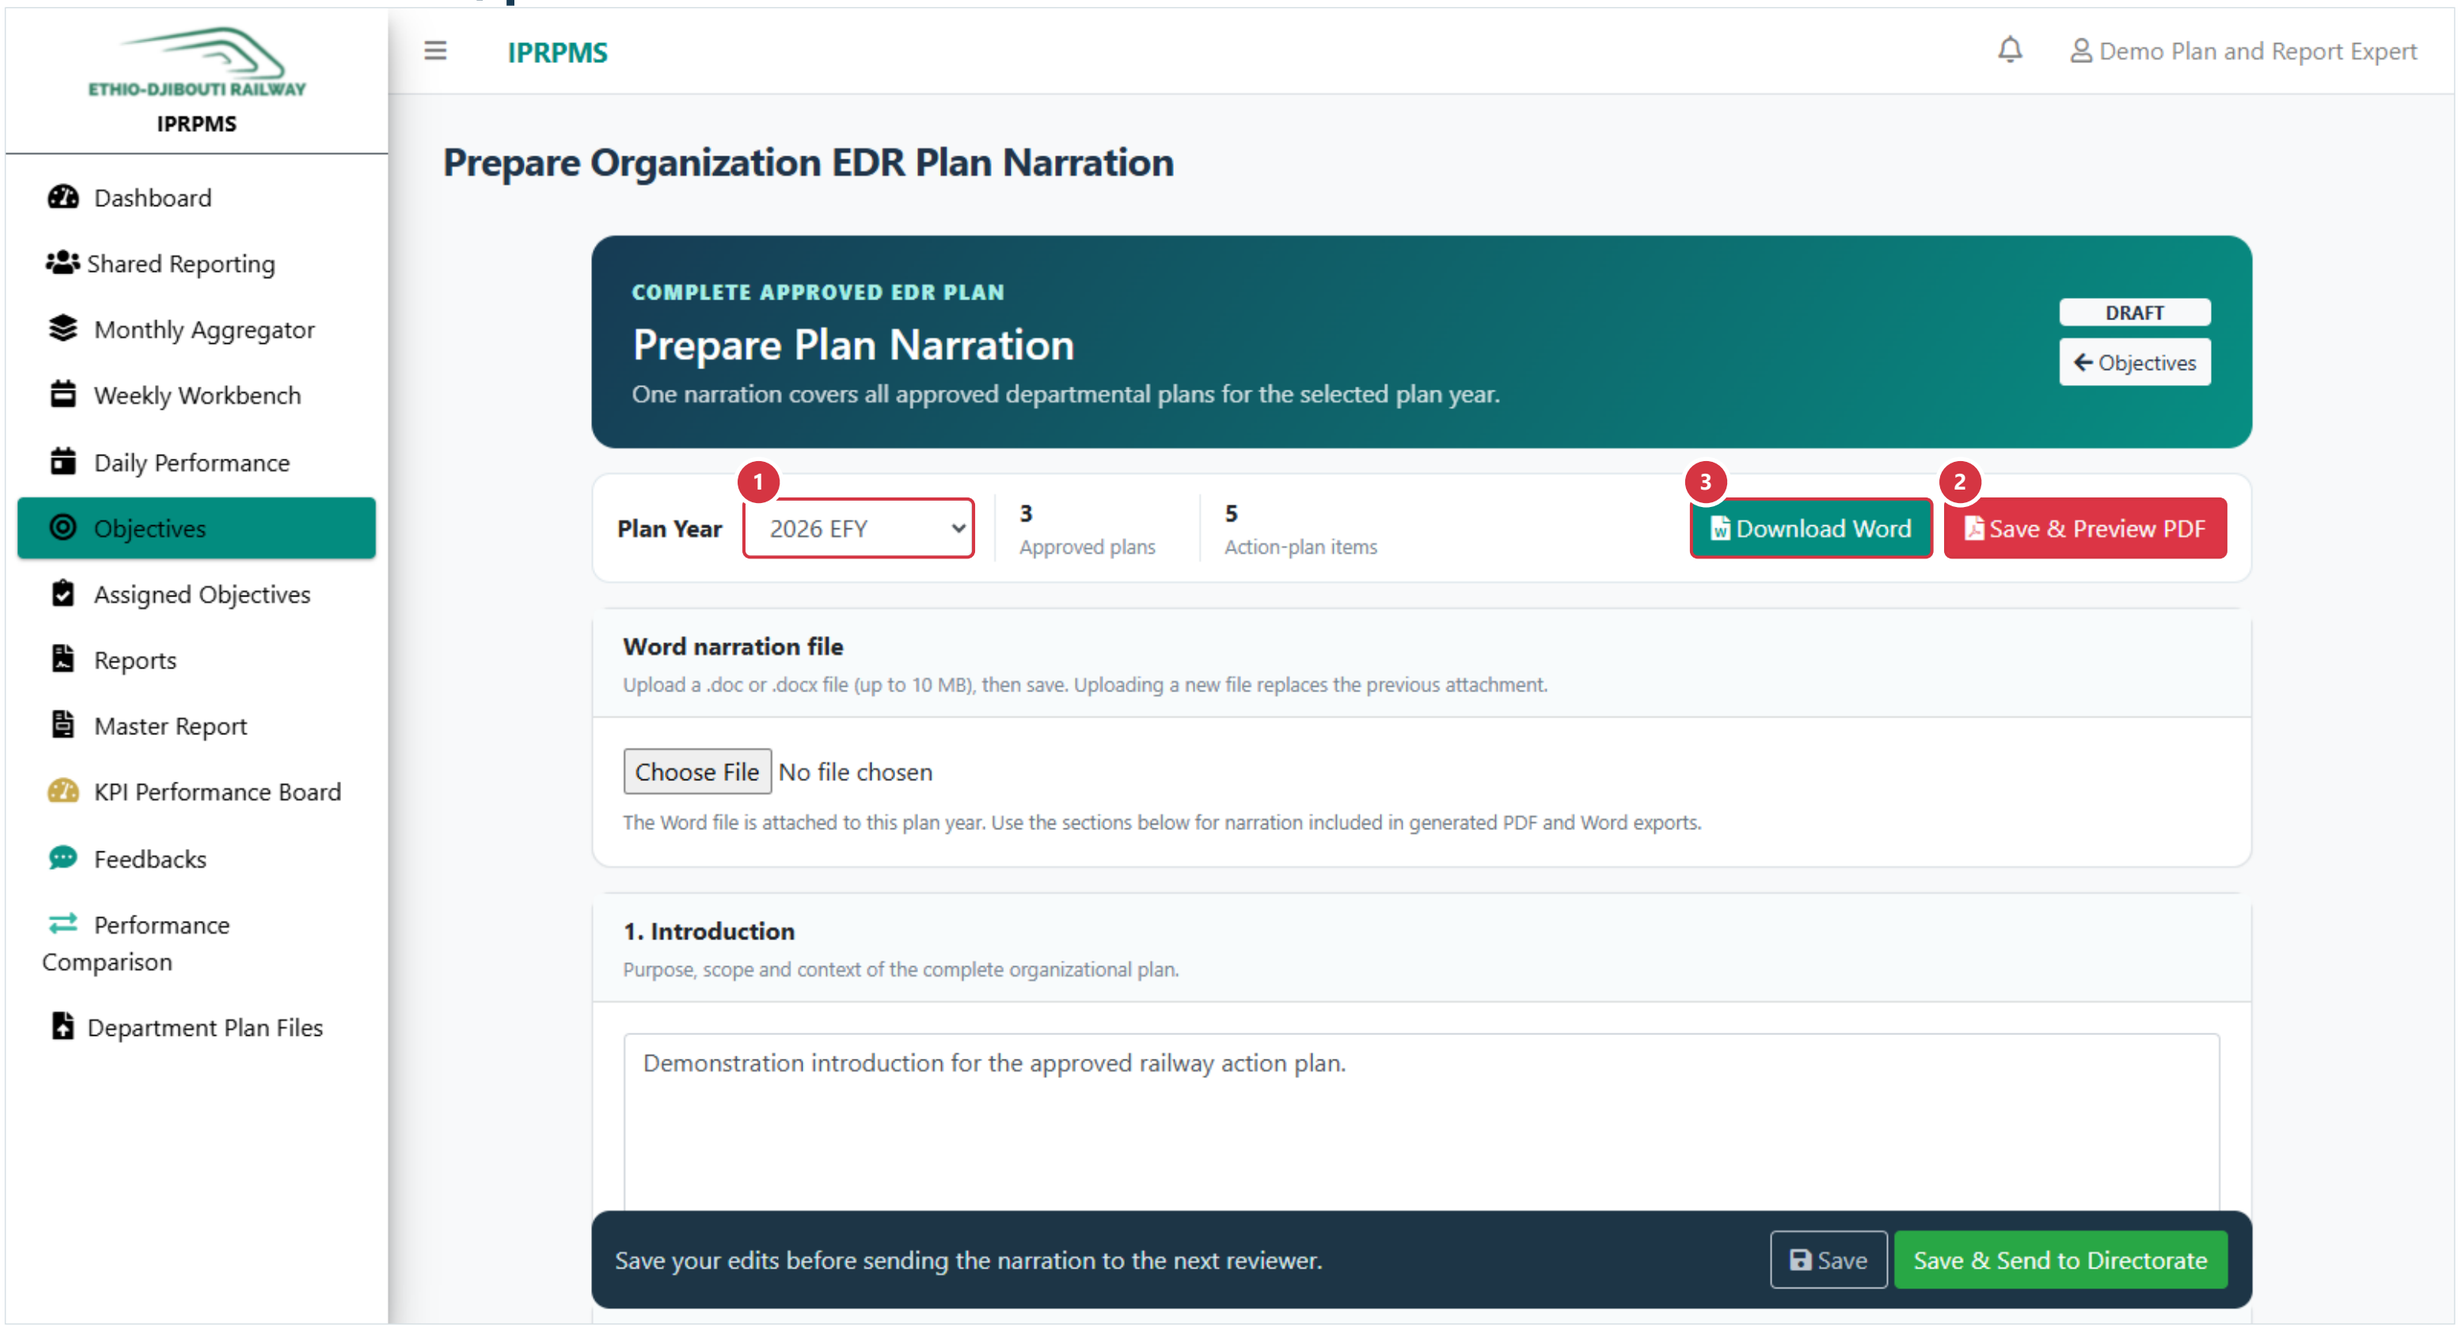

Plan narration: attach an existing Word file

1. Use Choose file in Word narration file.
2. Select a .doc or .docx file within the displayed 10 MB limit.
3. Save the document before using its attachment download.

After this step: Uploading a new Word attachment replaces the previous one for that plan year. The section text supplies the generated PDF/Word narration.

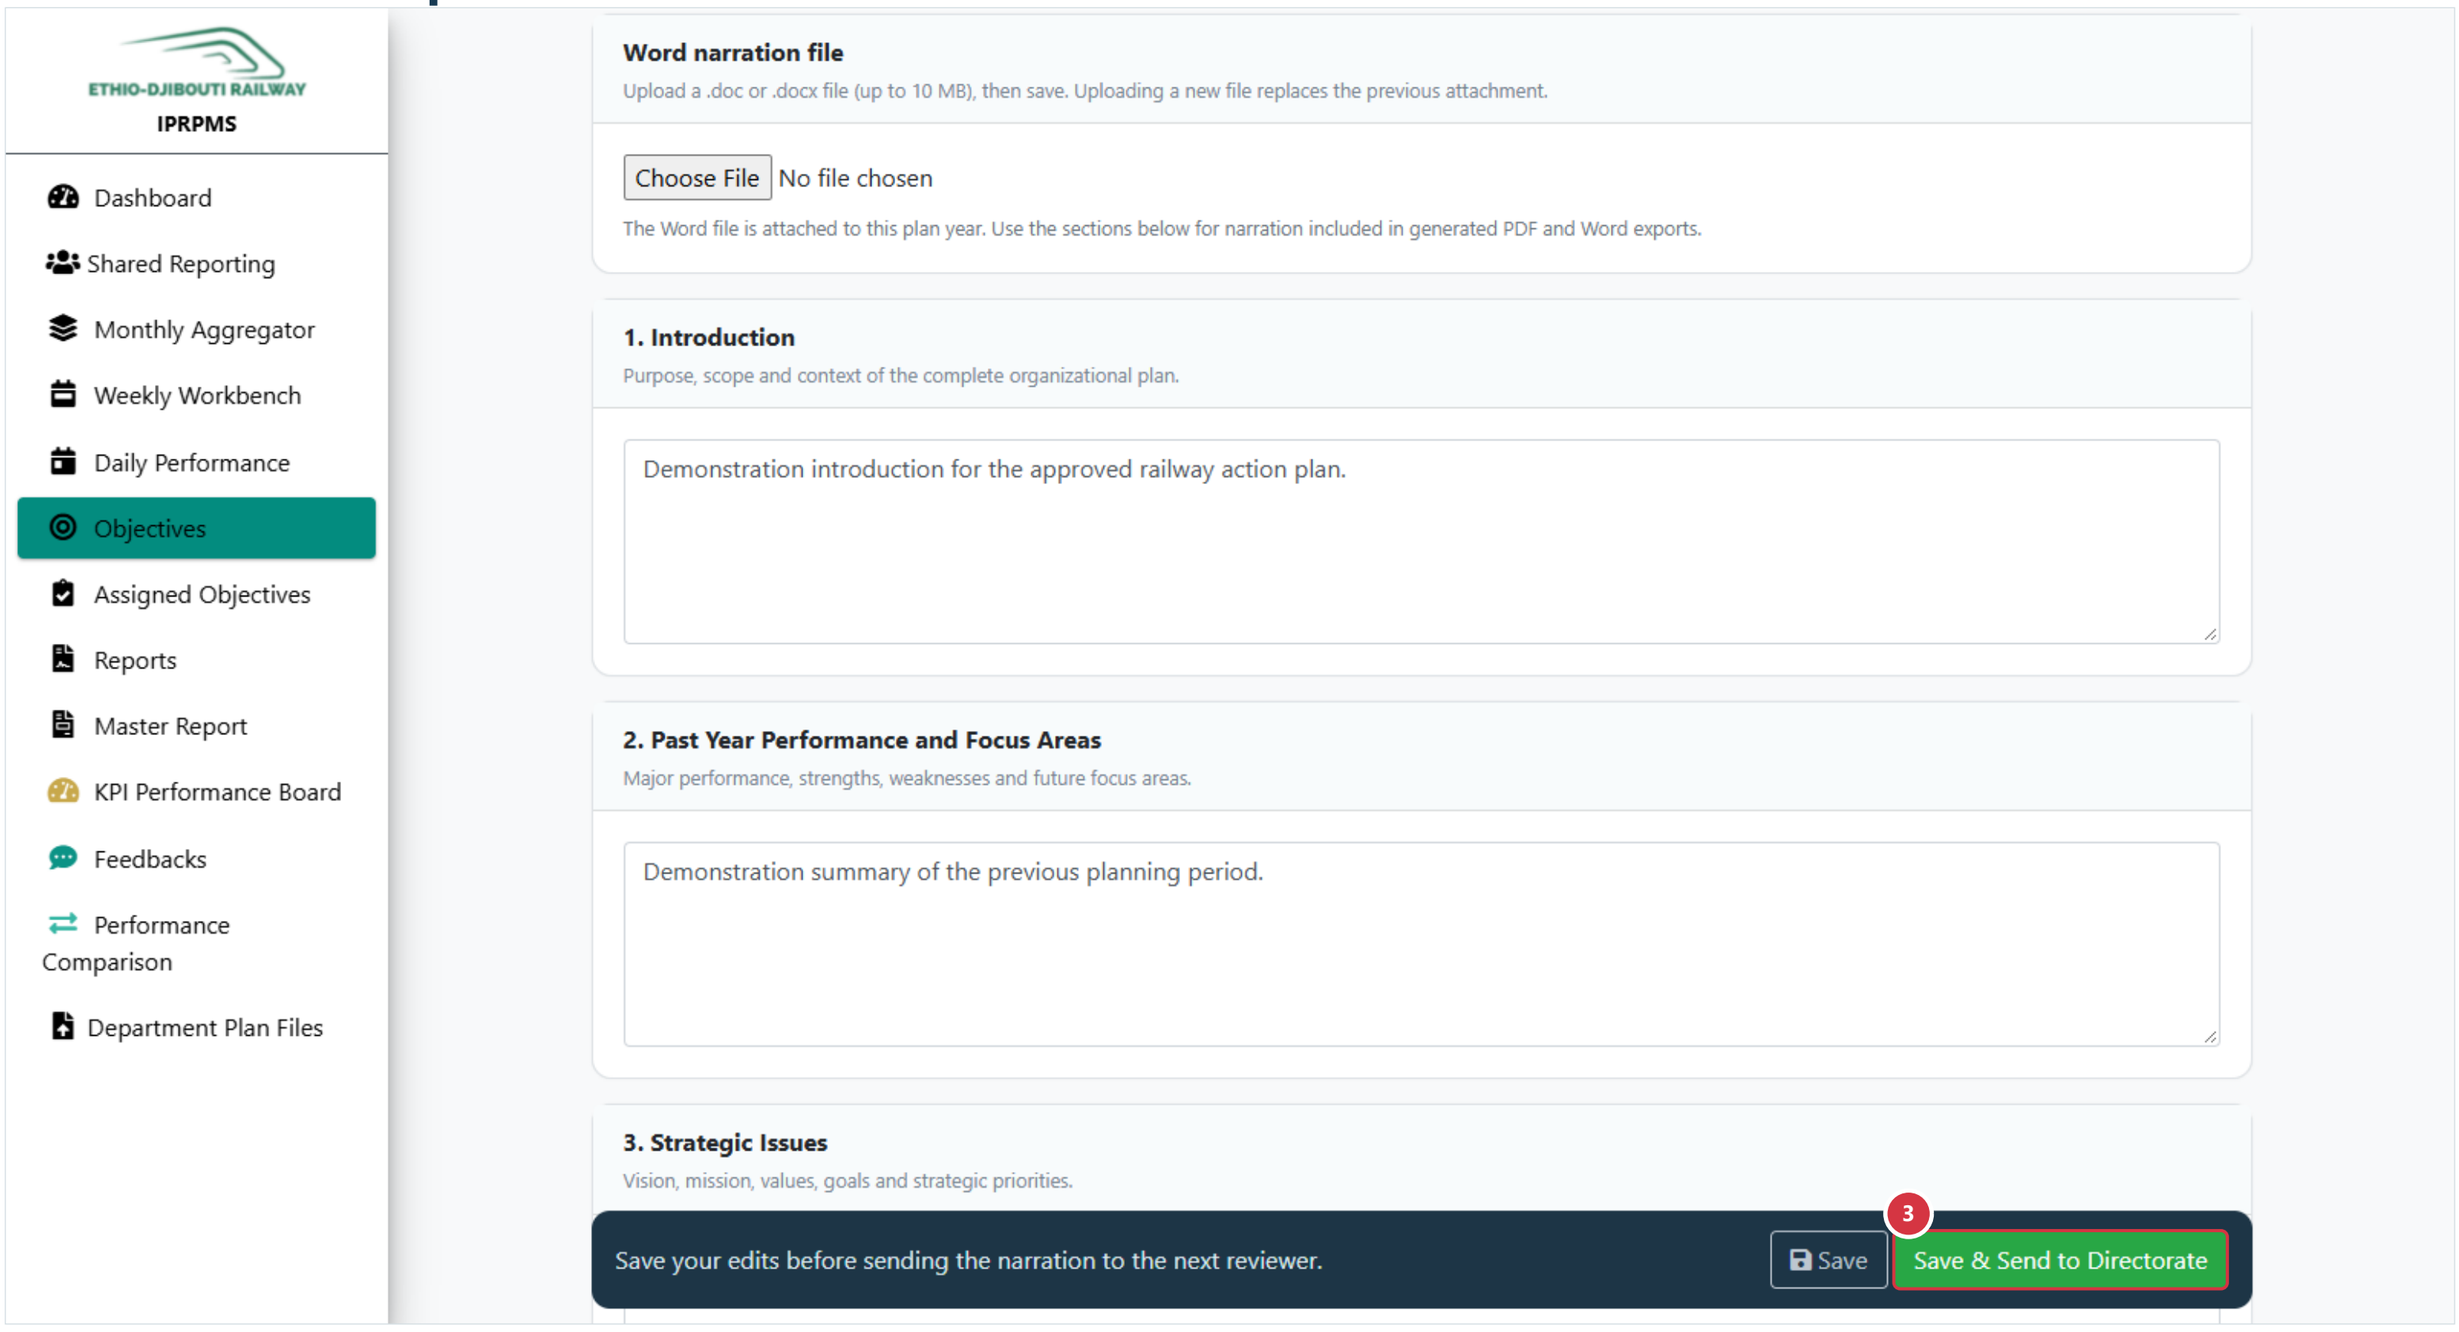

Plan narration: save, preview and Word download

1. Select the correct plan year and save your latest edits.
2. Click Save & Preview PDF to inspect the formatted document.
3. Click Download Word for the generated Word file.

After this step: The page also permits a separate uploaded Word narration attachment for the selected year.

Plan narration: Expert submission

1. Read the narration and make any permitted corrections.
2. Save the changes before leaving the page.
3. Click Save & Send to Directorate to move the document forward.

After this step: The status badge records the current narration stage. Automatic sections collect approved plan activities and schedules.

Read comparisons without comparing unlike results

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

Performance Comparison explains change between compatible results. It does not approve objectives or replace the performance reporting workflow. The Master Report and KPI Board provide related views of approved results.

Before you click

Choose the method, years, department and reporting period. For the supplied 2018 history, use annual comparison; that workbook cannot supply missing monthly history. Use final annual current results for a final annual comparison.

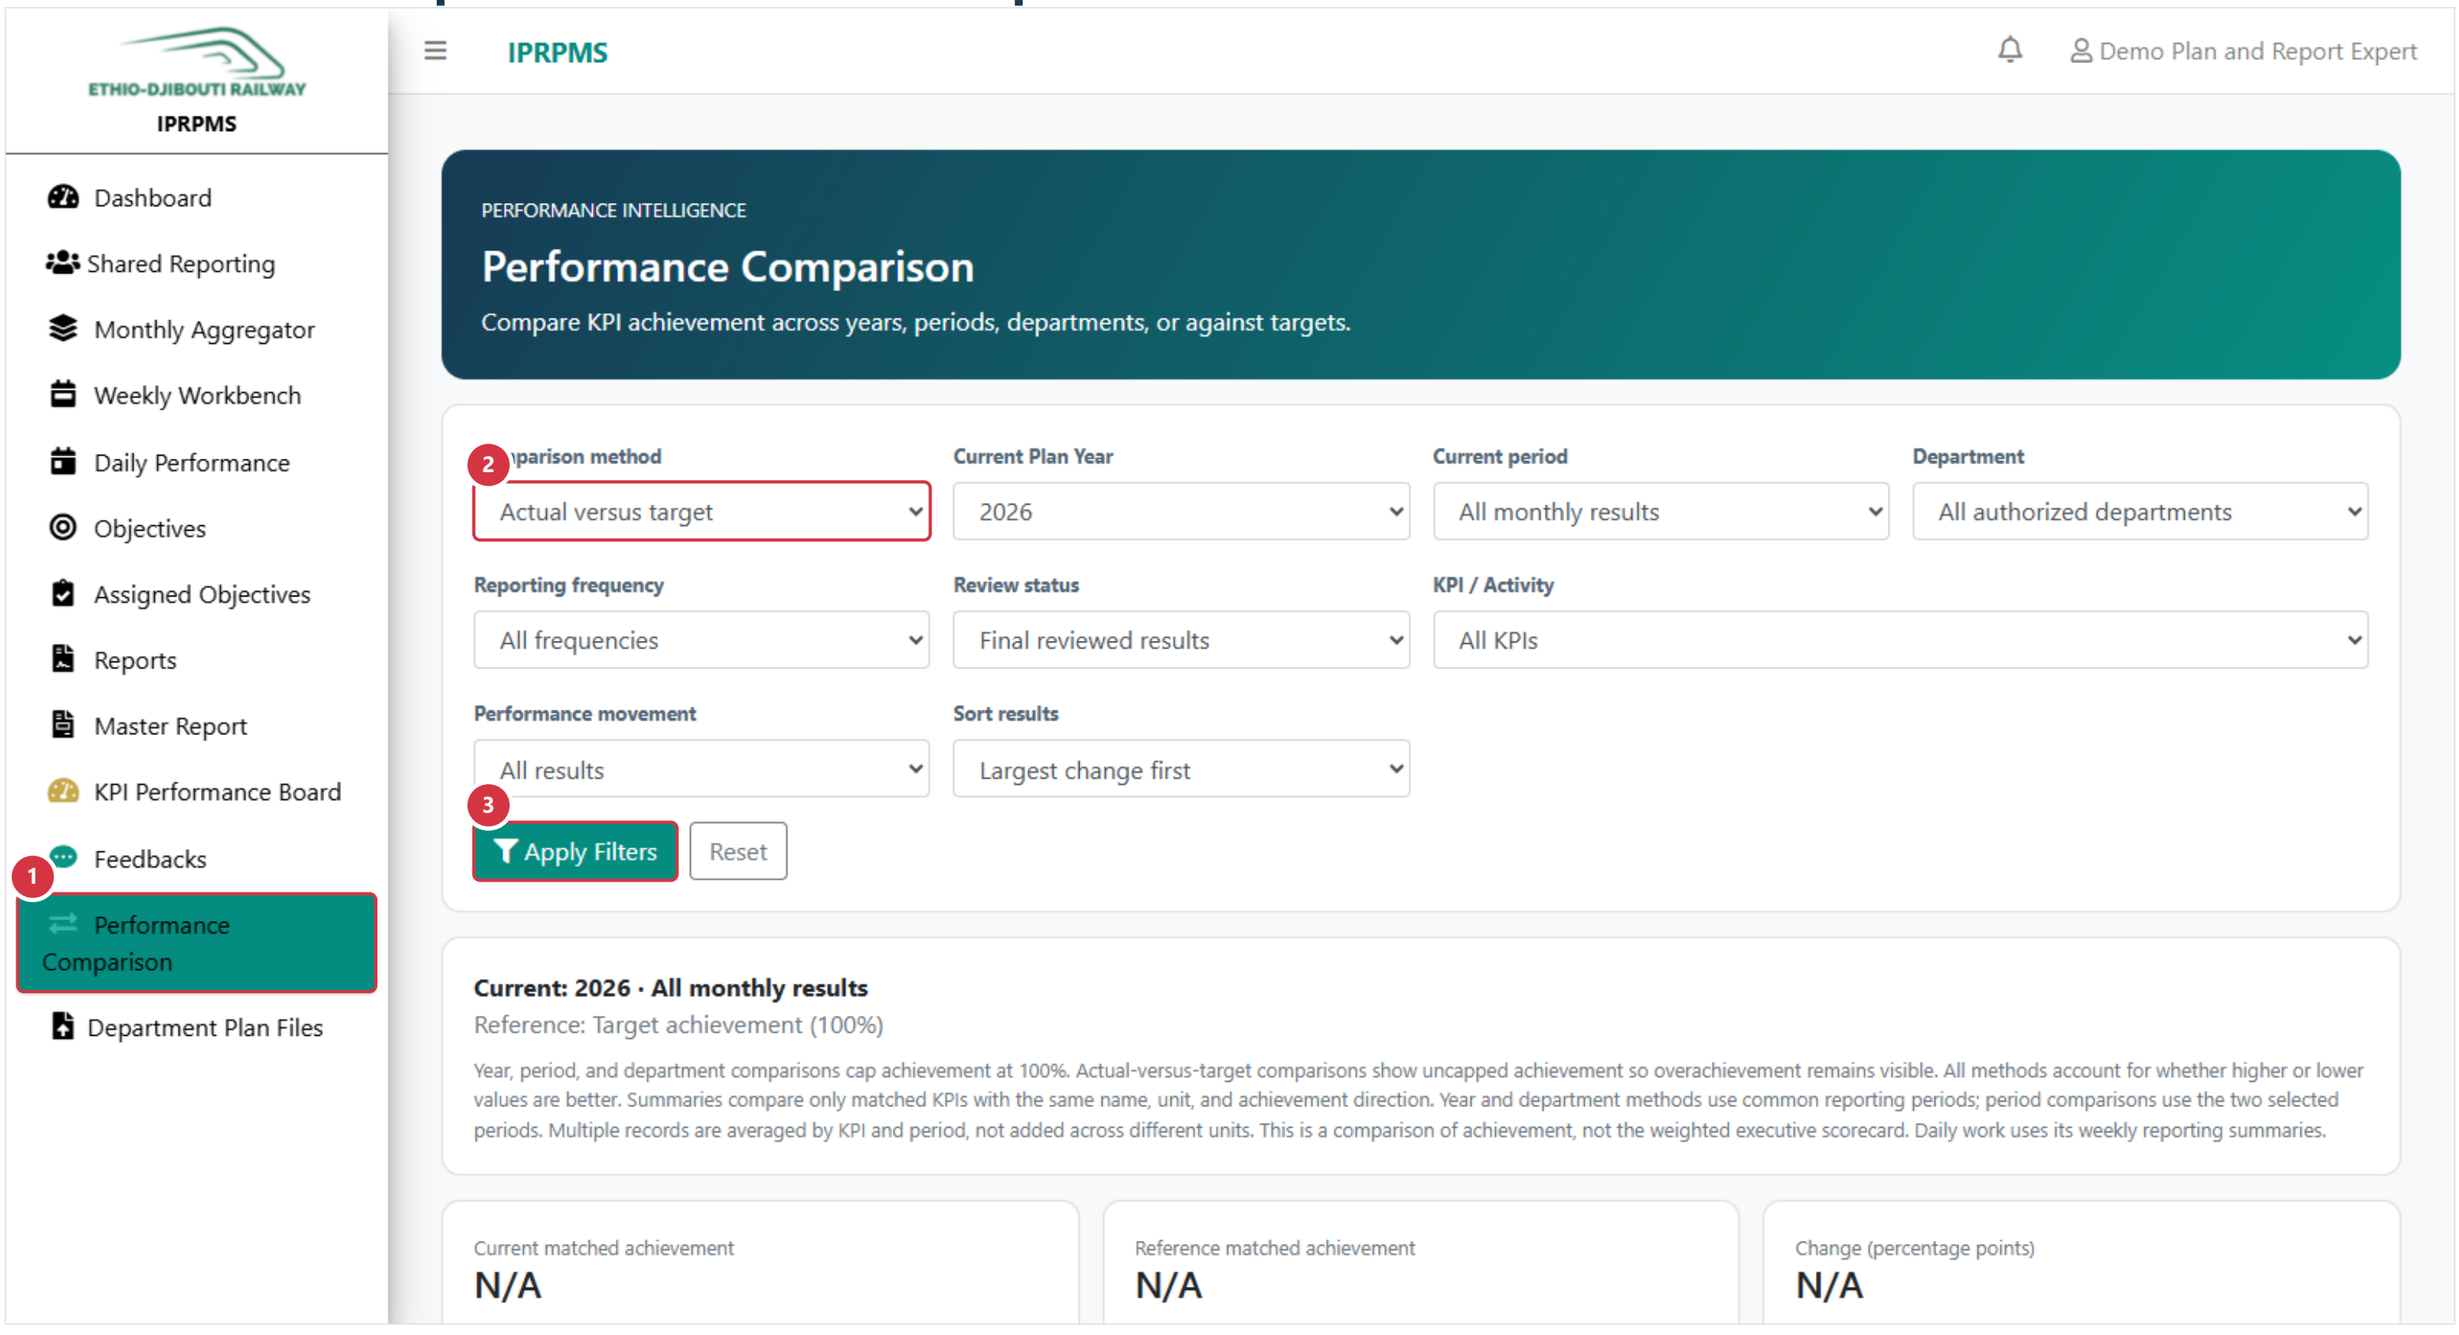

What to check

Compare the same KPI definition, compatible units, direction and time span. A missing result is not zero. Read mapping status and coverage. A fall in days can be an improvement for a lower-is-better KPI.

How you know it worked

Use approved mappings and eligible results for an official comparison. Show uncertain matches for review. A change from 80% to 85% is 5 percentage points, not automatically 5% raw-value growth. Explain coverage with the report.

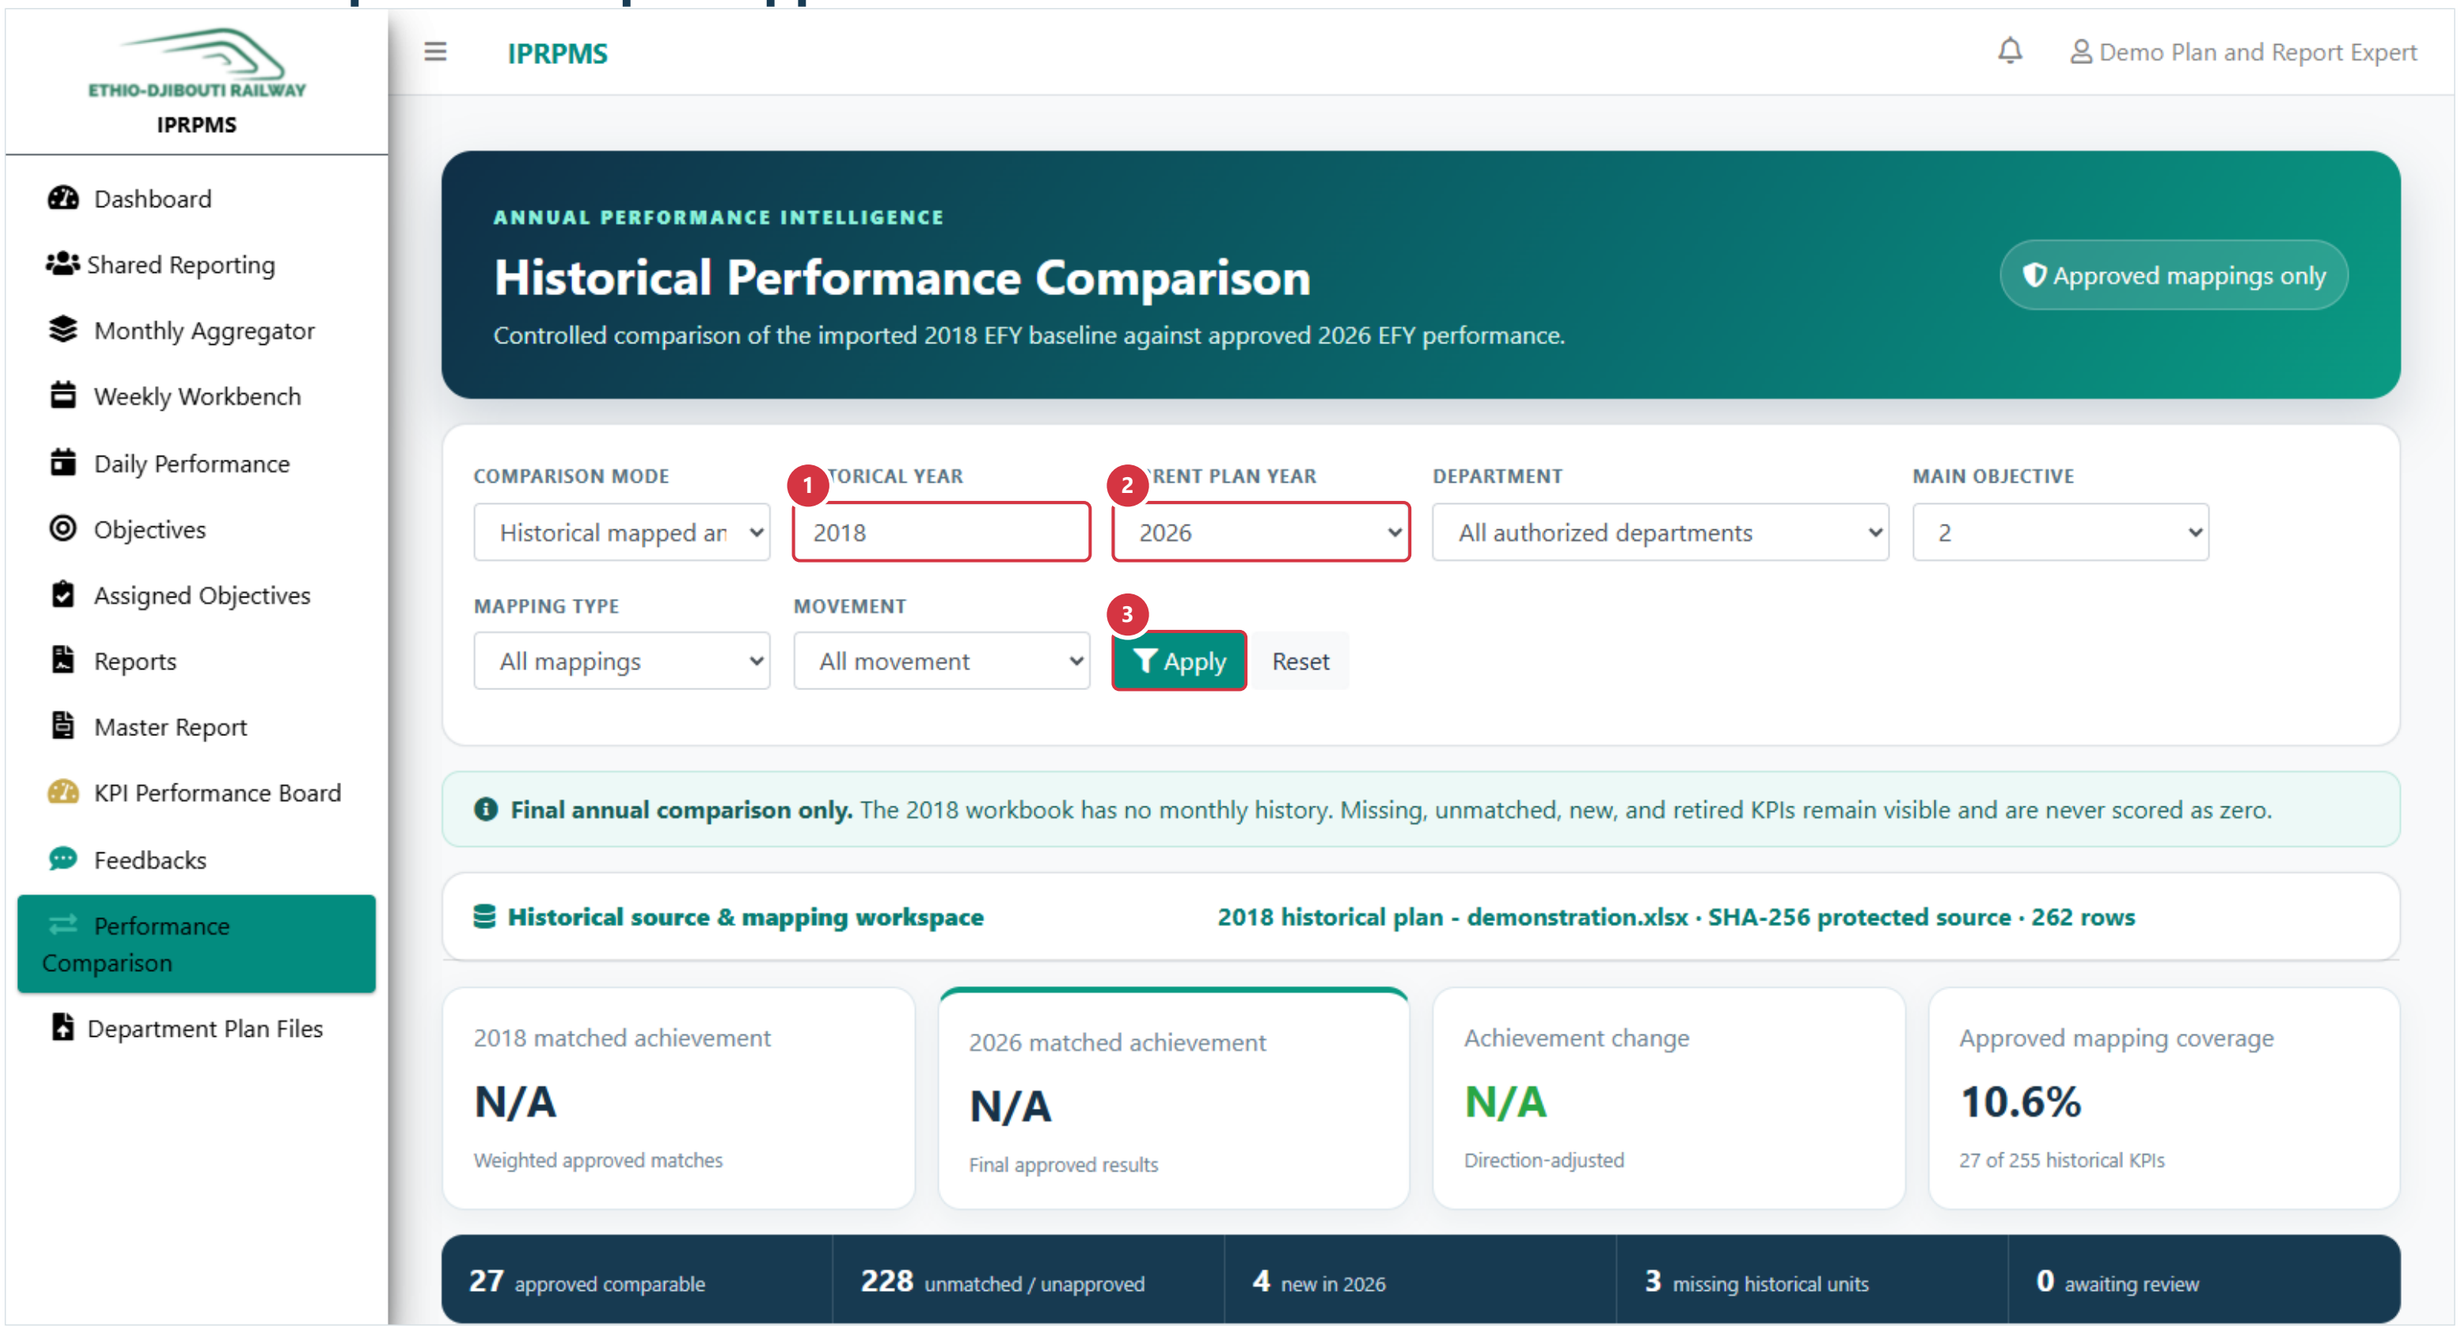

Performance Comparison: choose the comparison method

1. Open Performance Comparison.
2. Choose the comparison method and relevant year/period filters.
3. Click Apply Filters and inspect the permitted department scope.

After this step: Available methods include year, period, department, actual versus target, and historical mapped annual comparison.

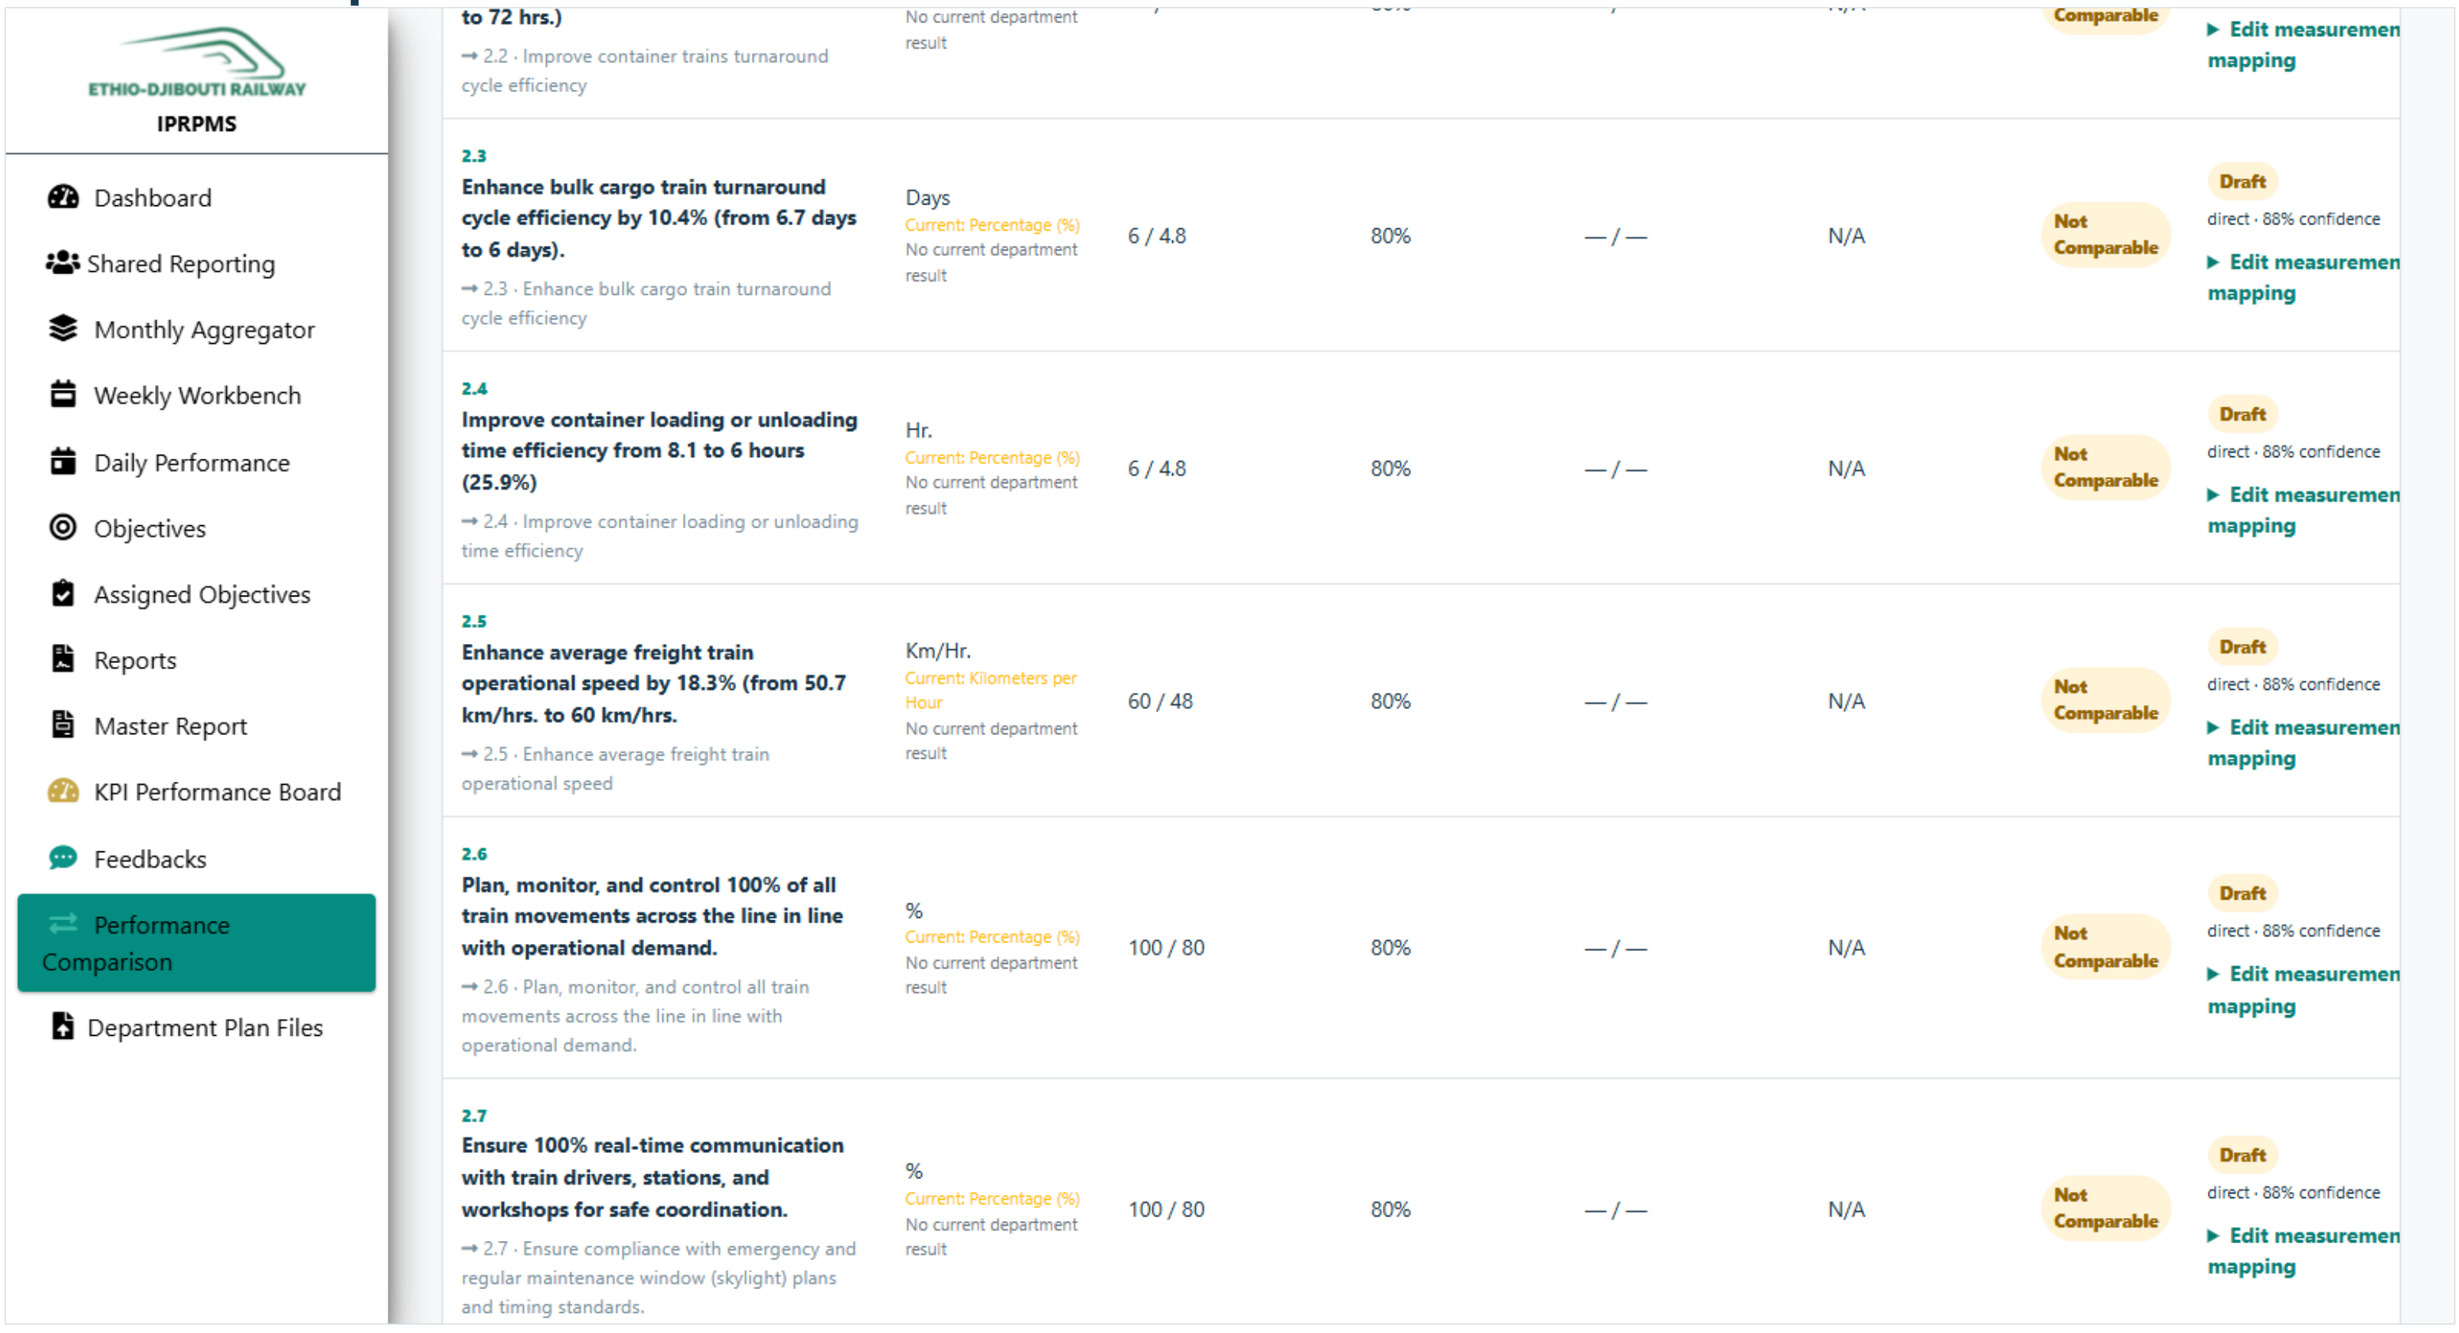

Historical comparison: inspect approved KPI matches

1. Set Historical year and Current plan year.
2. Use Department, Main objective, Mapping type and Movement to focus the results.
3. Click Apply and inspect coverage and matched achievement.

After this step: The capture uses a main-objective filter for readable details. Historical performance values are demonstration values.

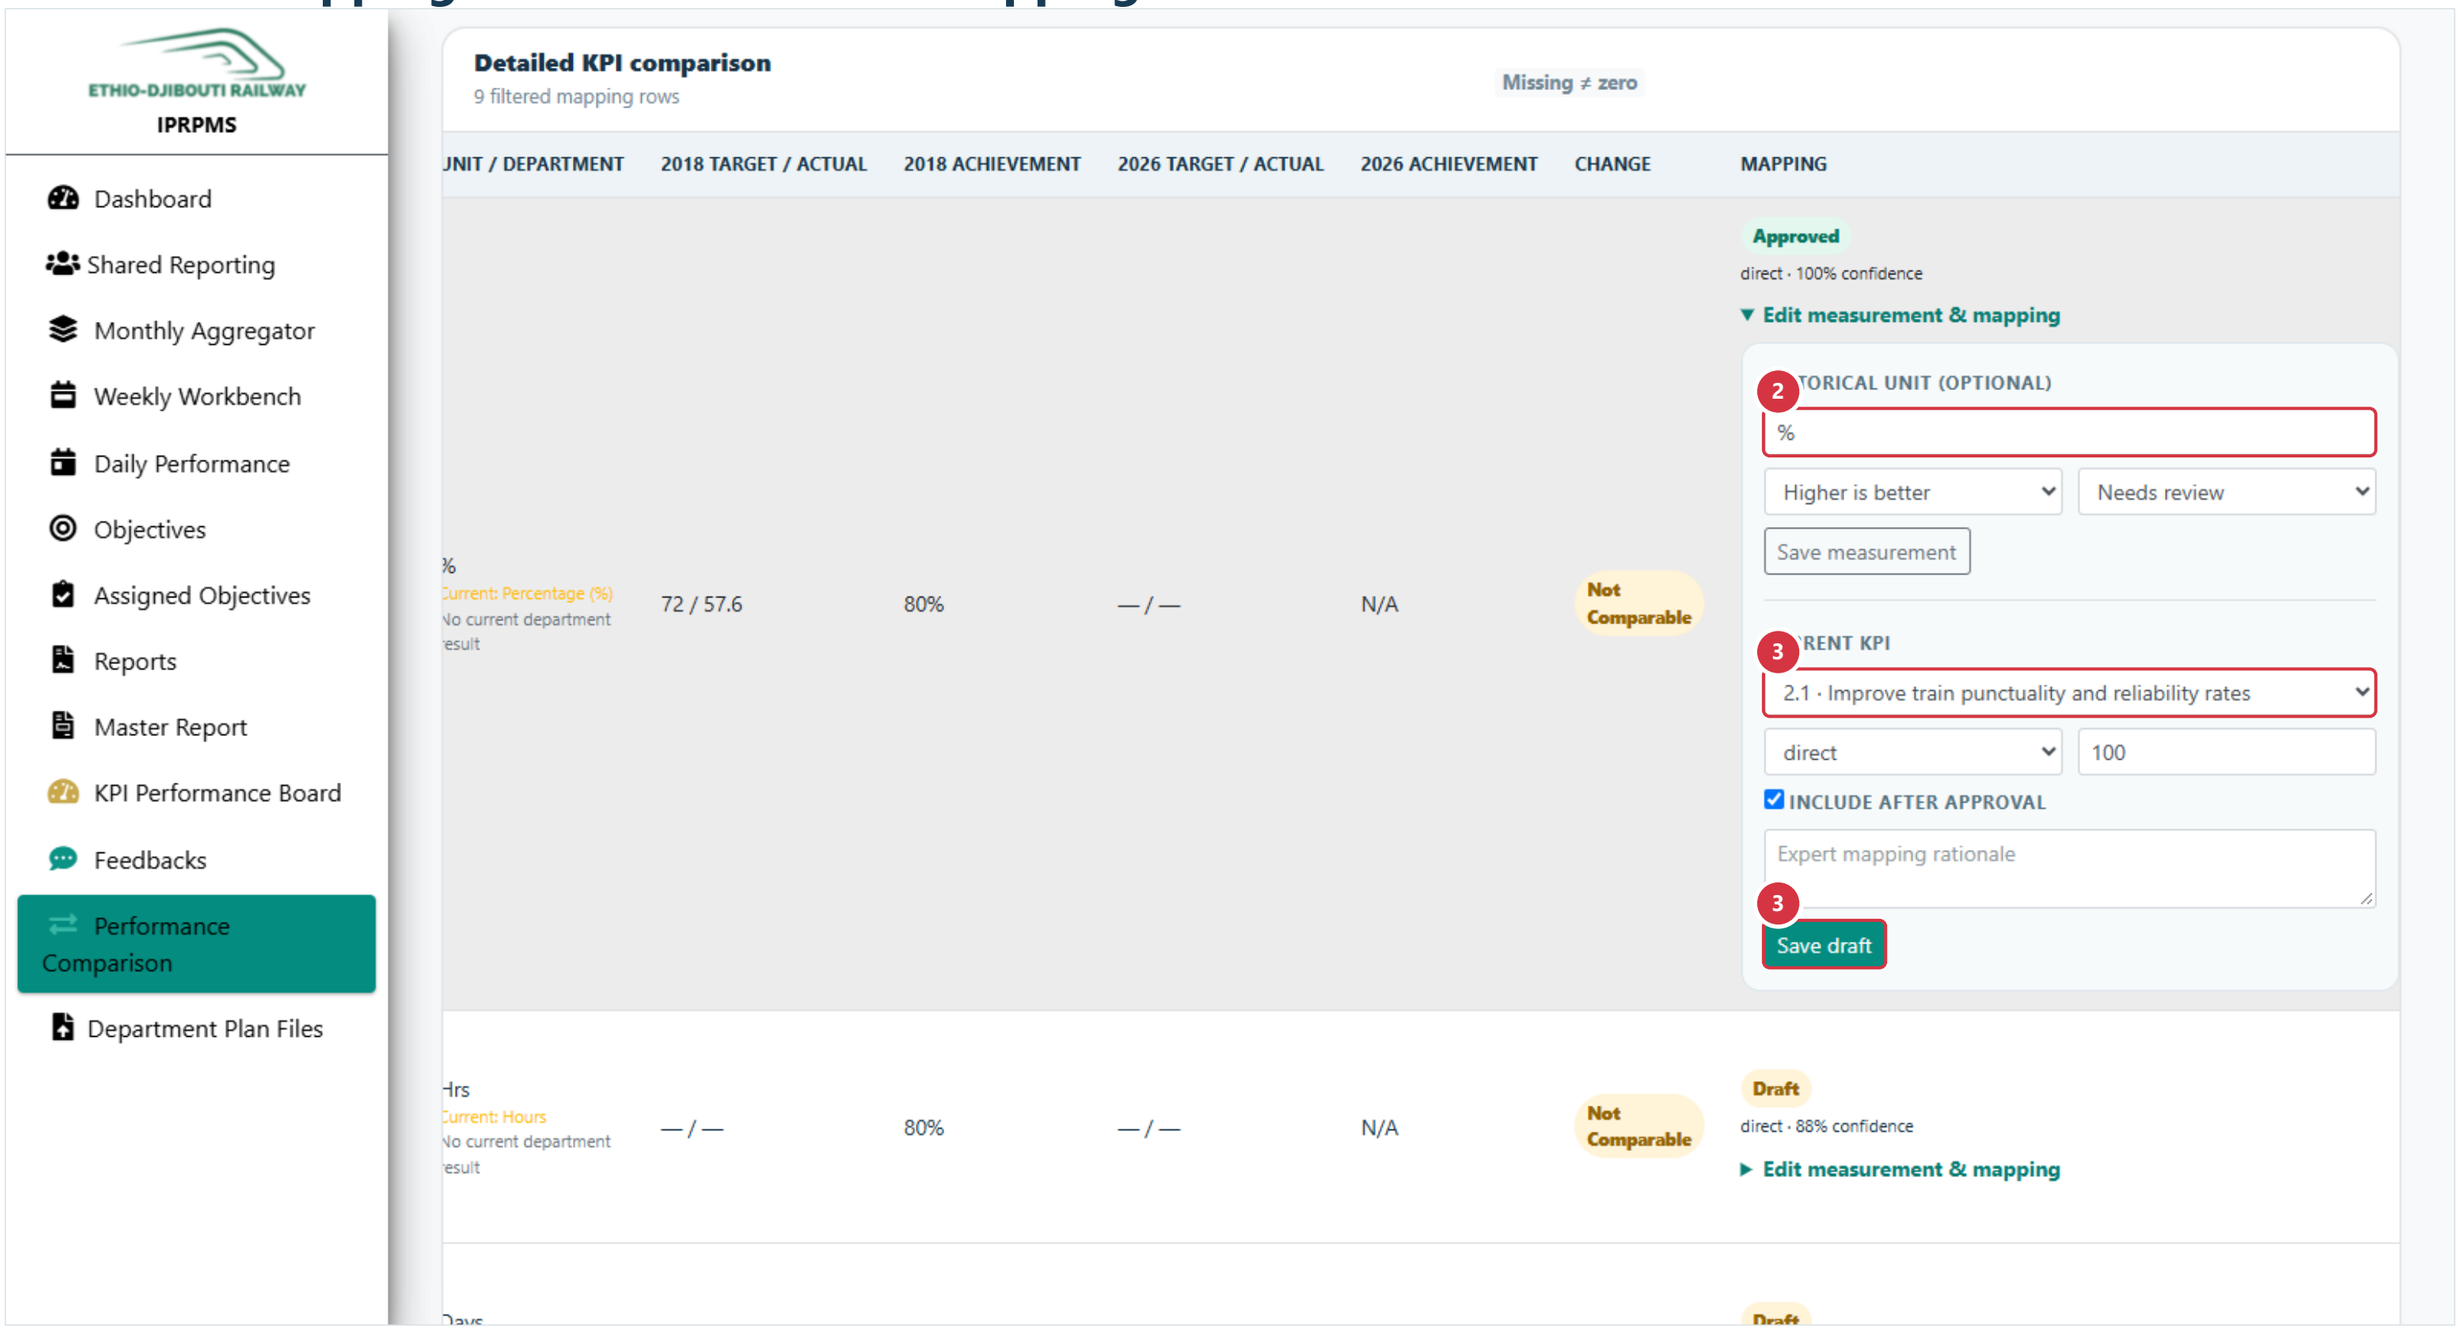

Historical comparison: read the detailed KPI table

1. Read each historical/current mapping and its unit.
2. Compare targets, actuals and achievement only when the mapping is officially comparable.
3. Read the percentage-point change and mapping status.

After this step: Unmapped and unapproved rows remain visible. They do not represent an official zero.

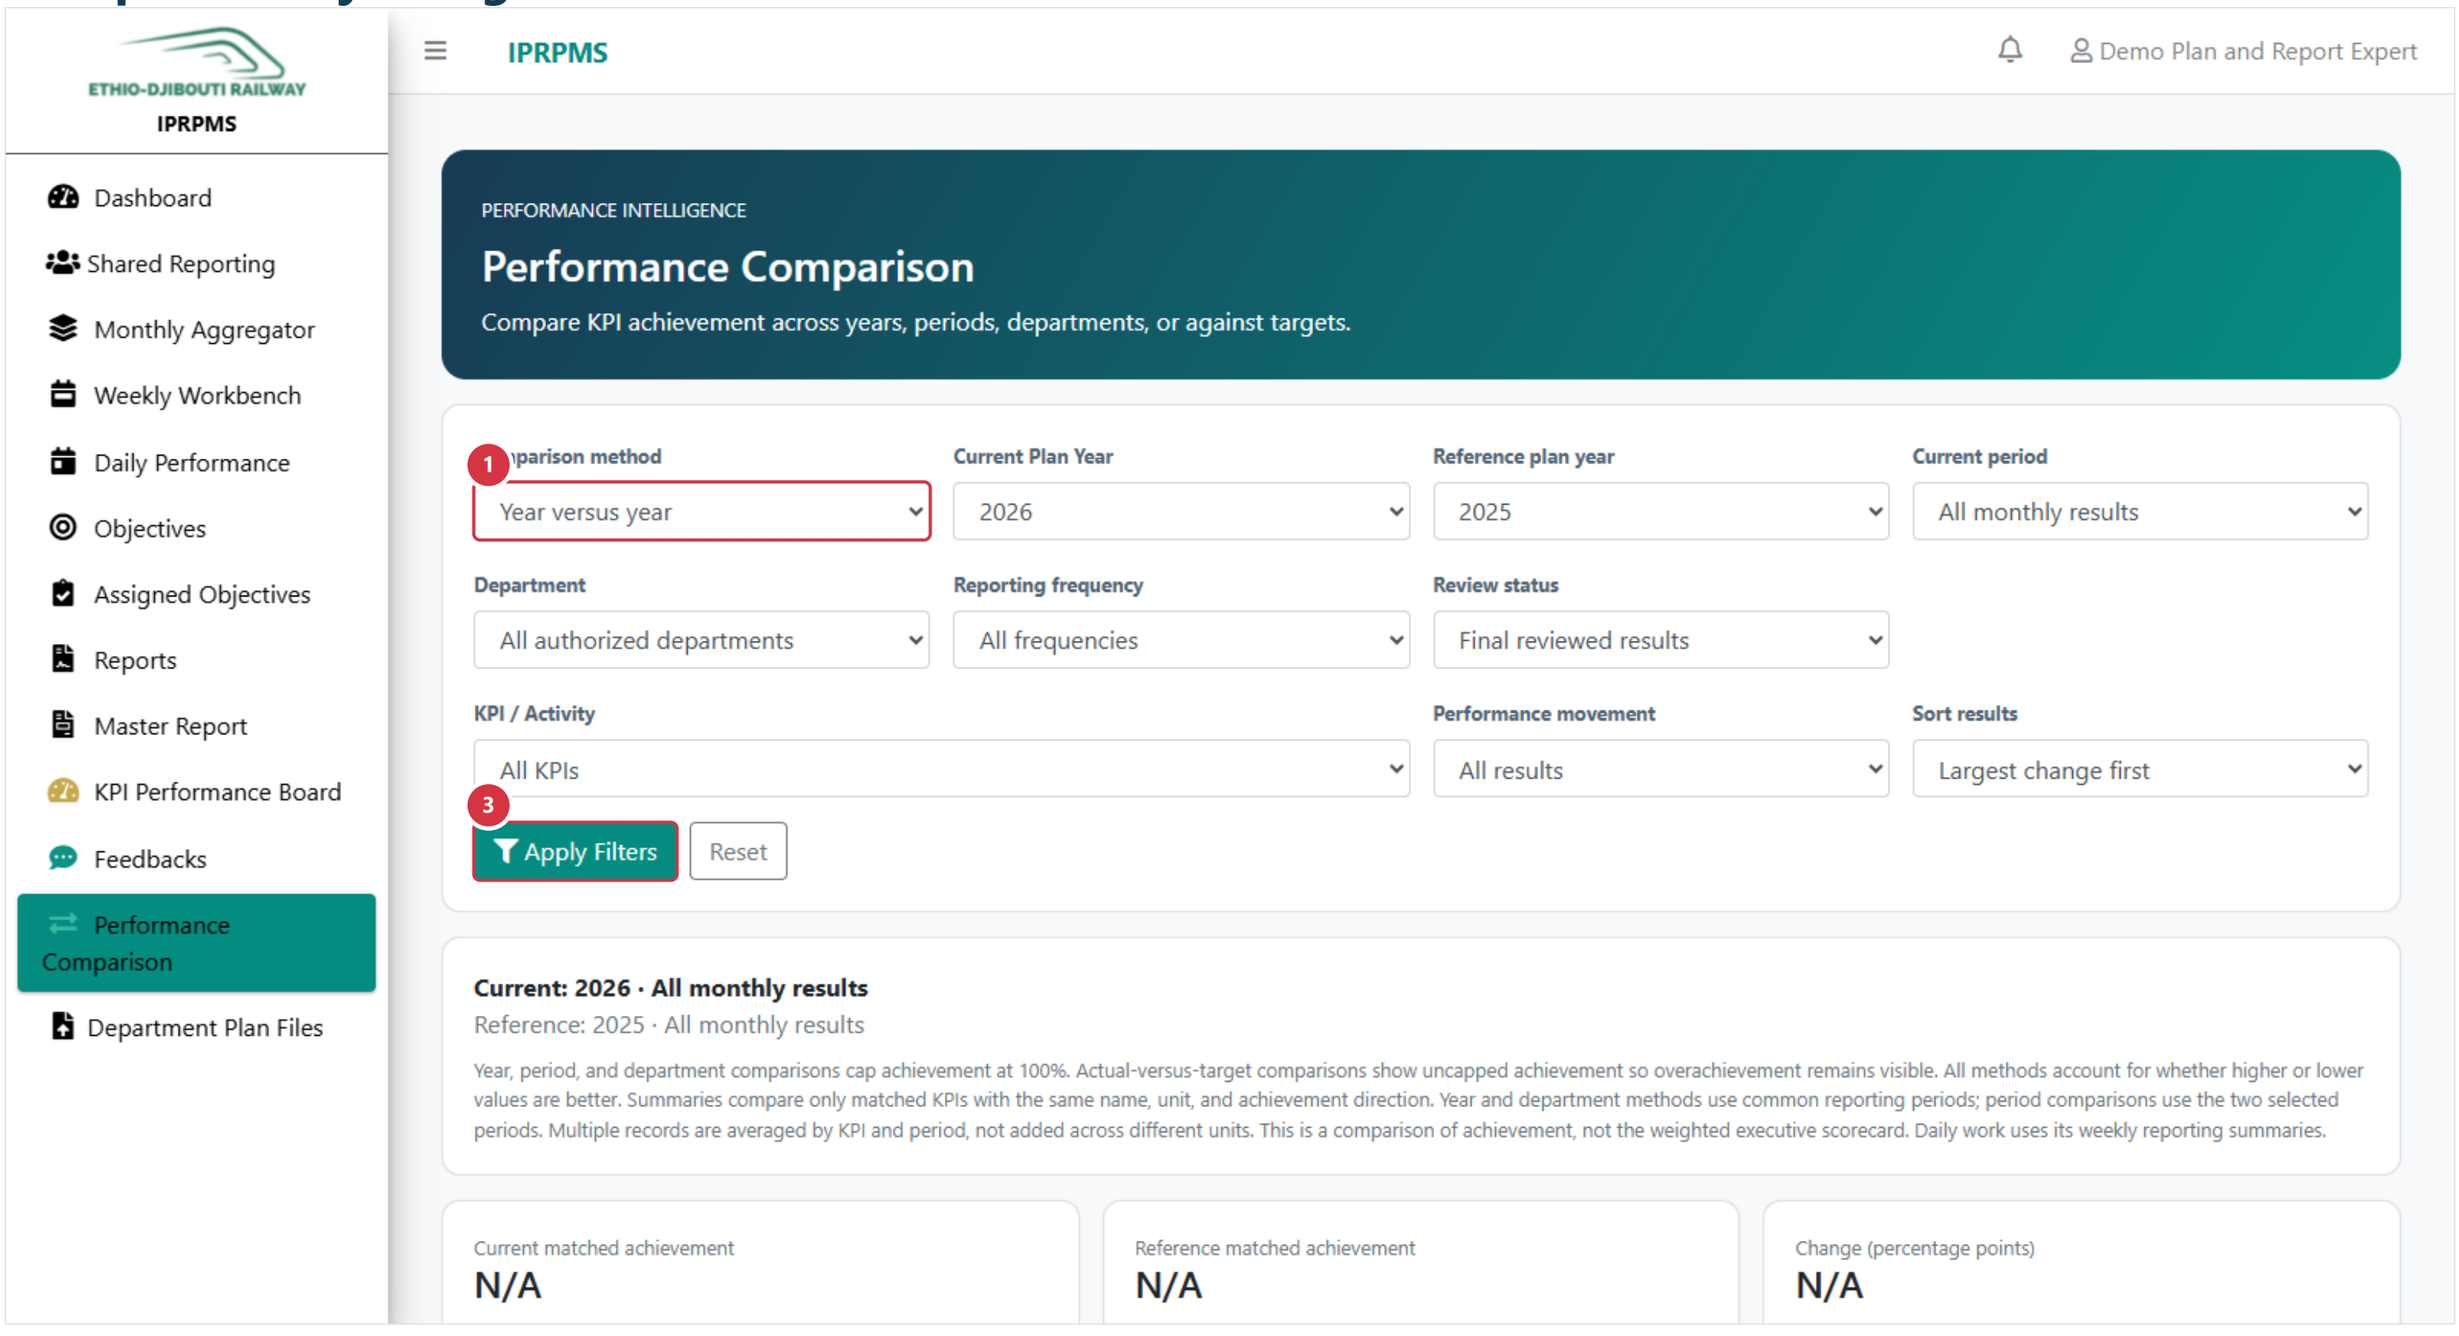

Historical mapping: measurement and mapping editor

1. Expand Edit measurement & mapping on the intended row.
2. Correct a supported historical measurement definition and click Save measurement.
3. Choose the matching current KPI, type and rationale, then Save draft or Submit for review.

After this step: Only a valid approved comparable mapping supports the official annual comparison.

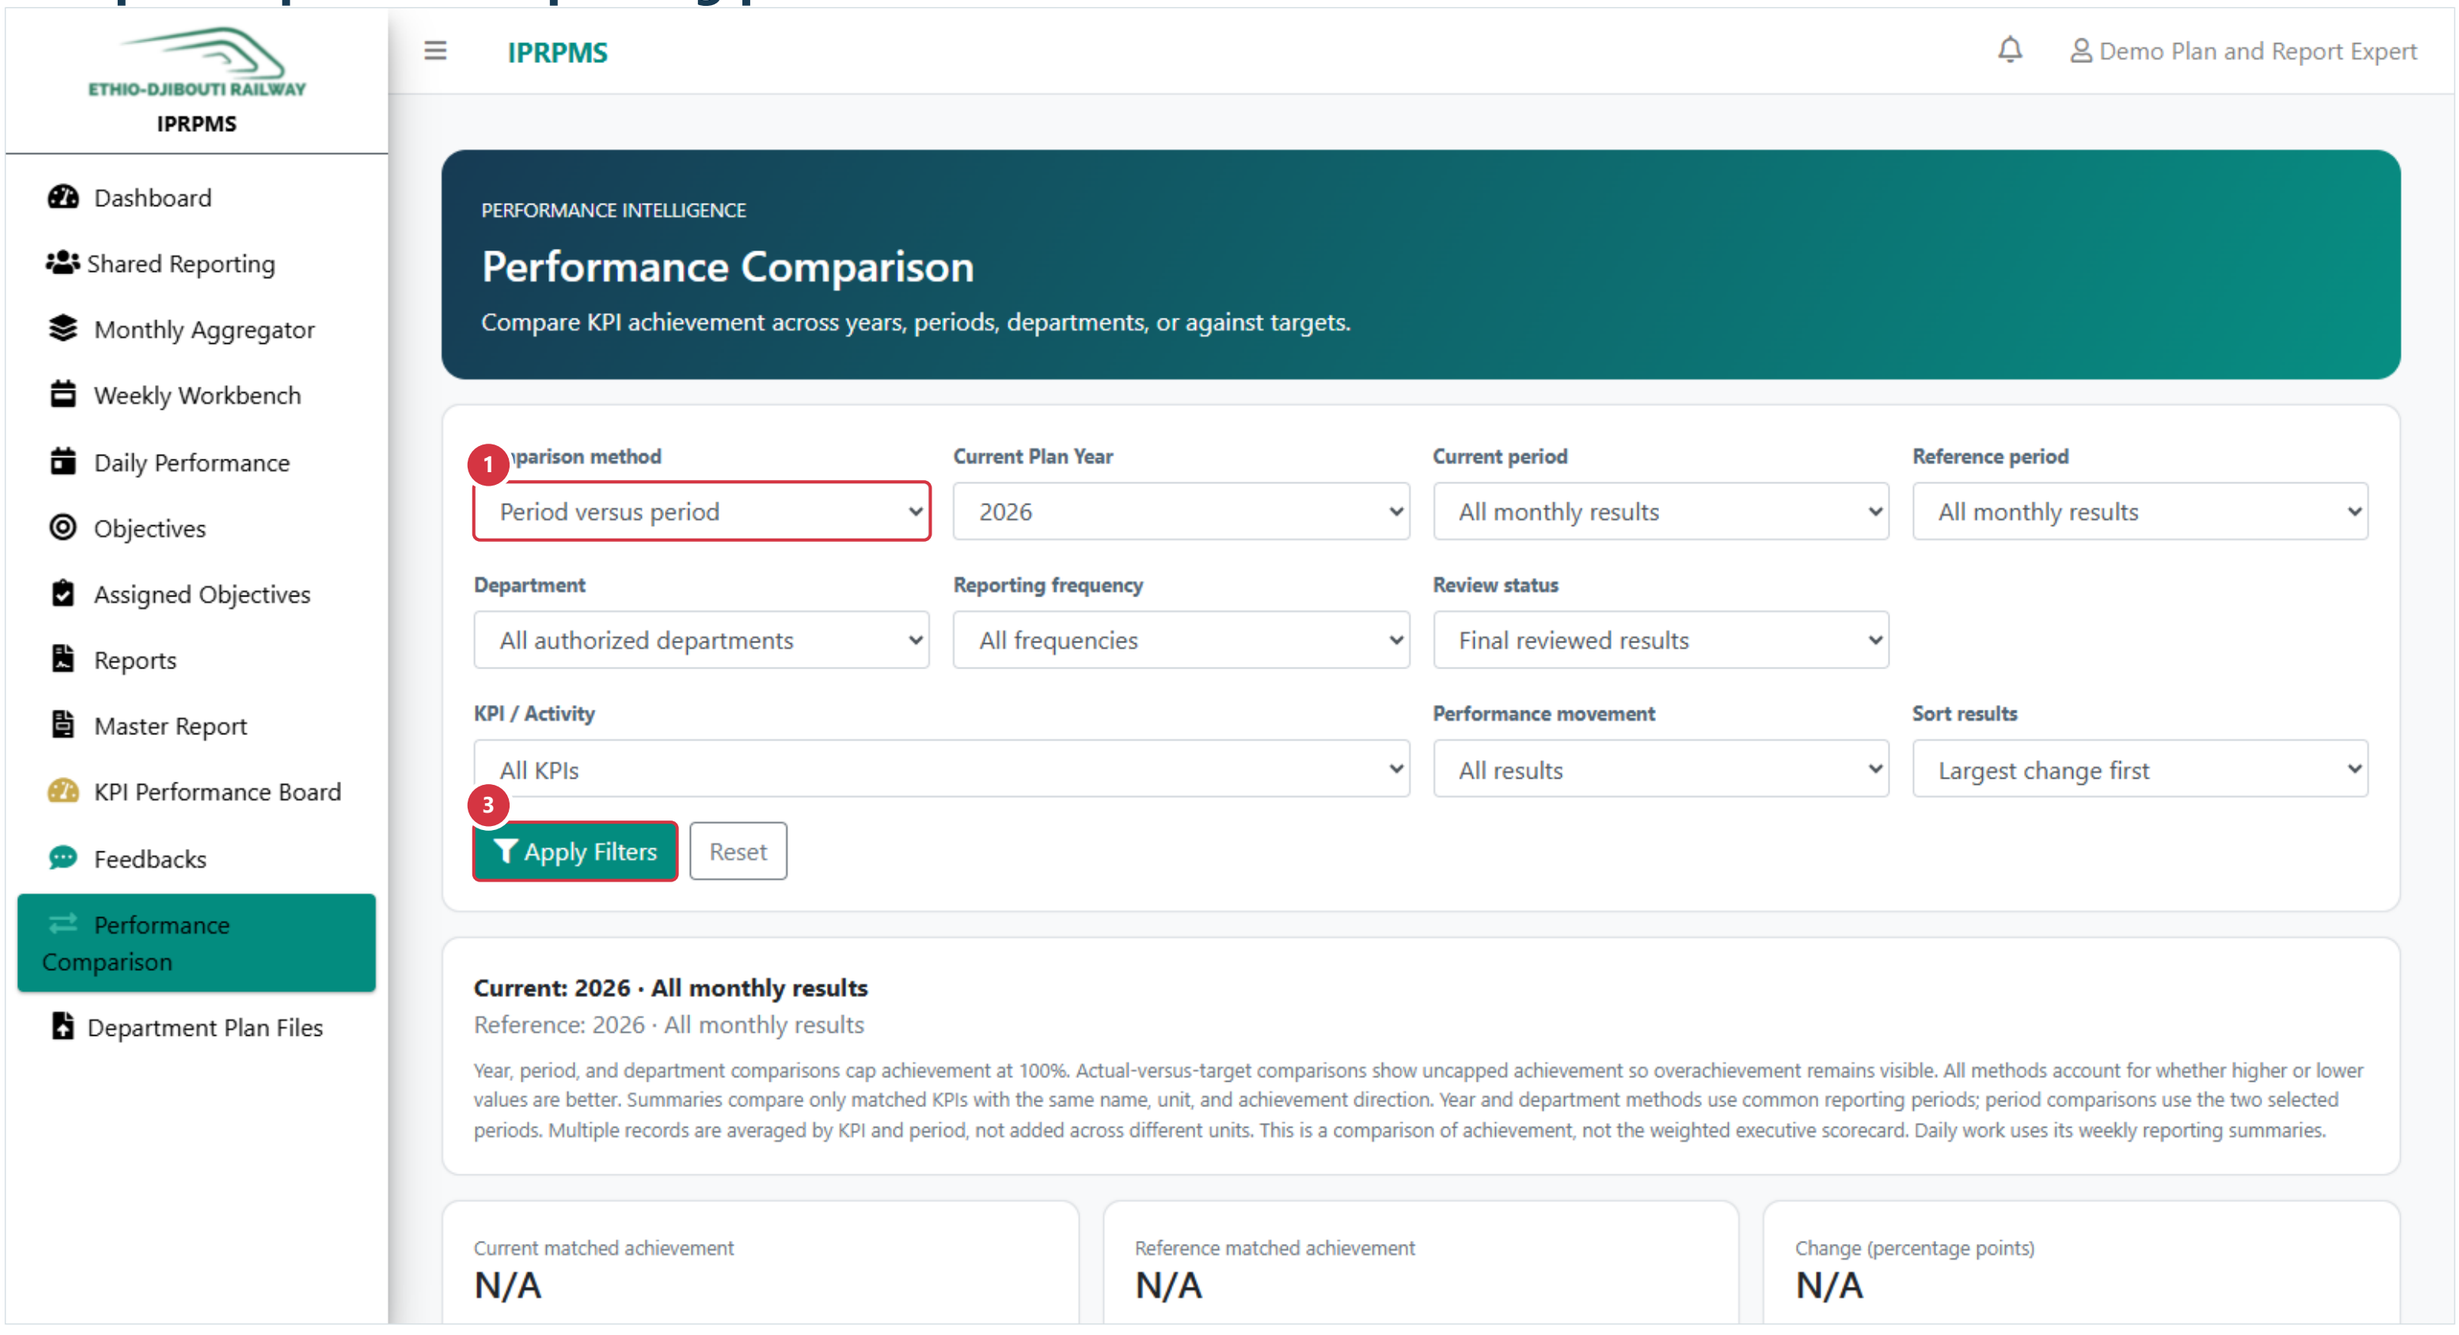

Compare one year against another

1. Select the comparison method.
2. Set the current and reference scopes displayed by that method.
3. Click Apply Filters, then read the matching coverage and detailed table.

After this step: Use the same measurement definitions and appropriate periods when interpreting differences.

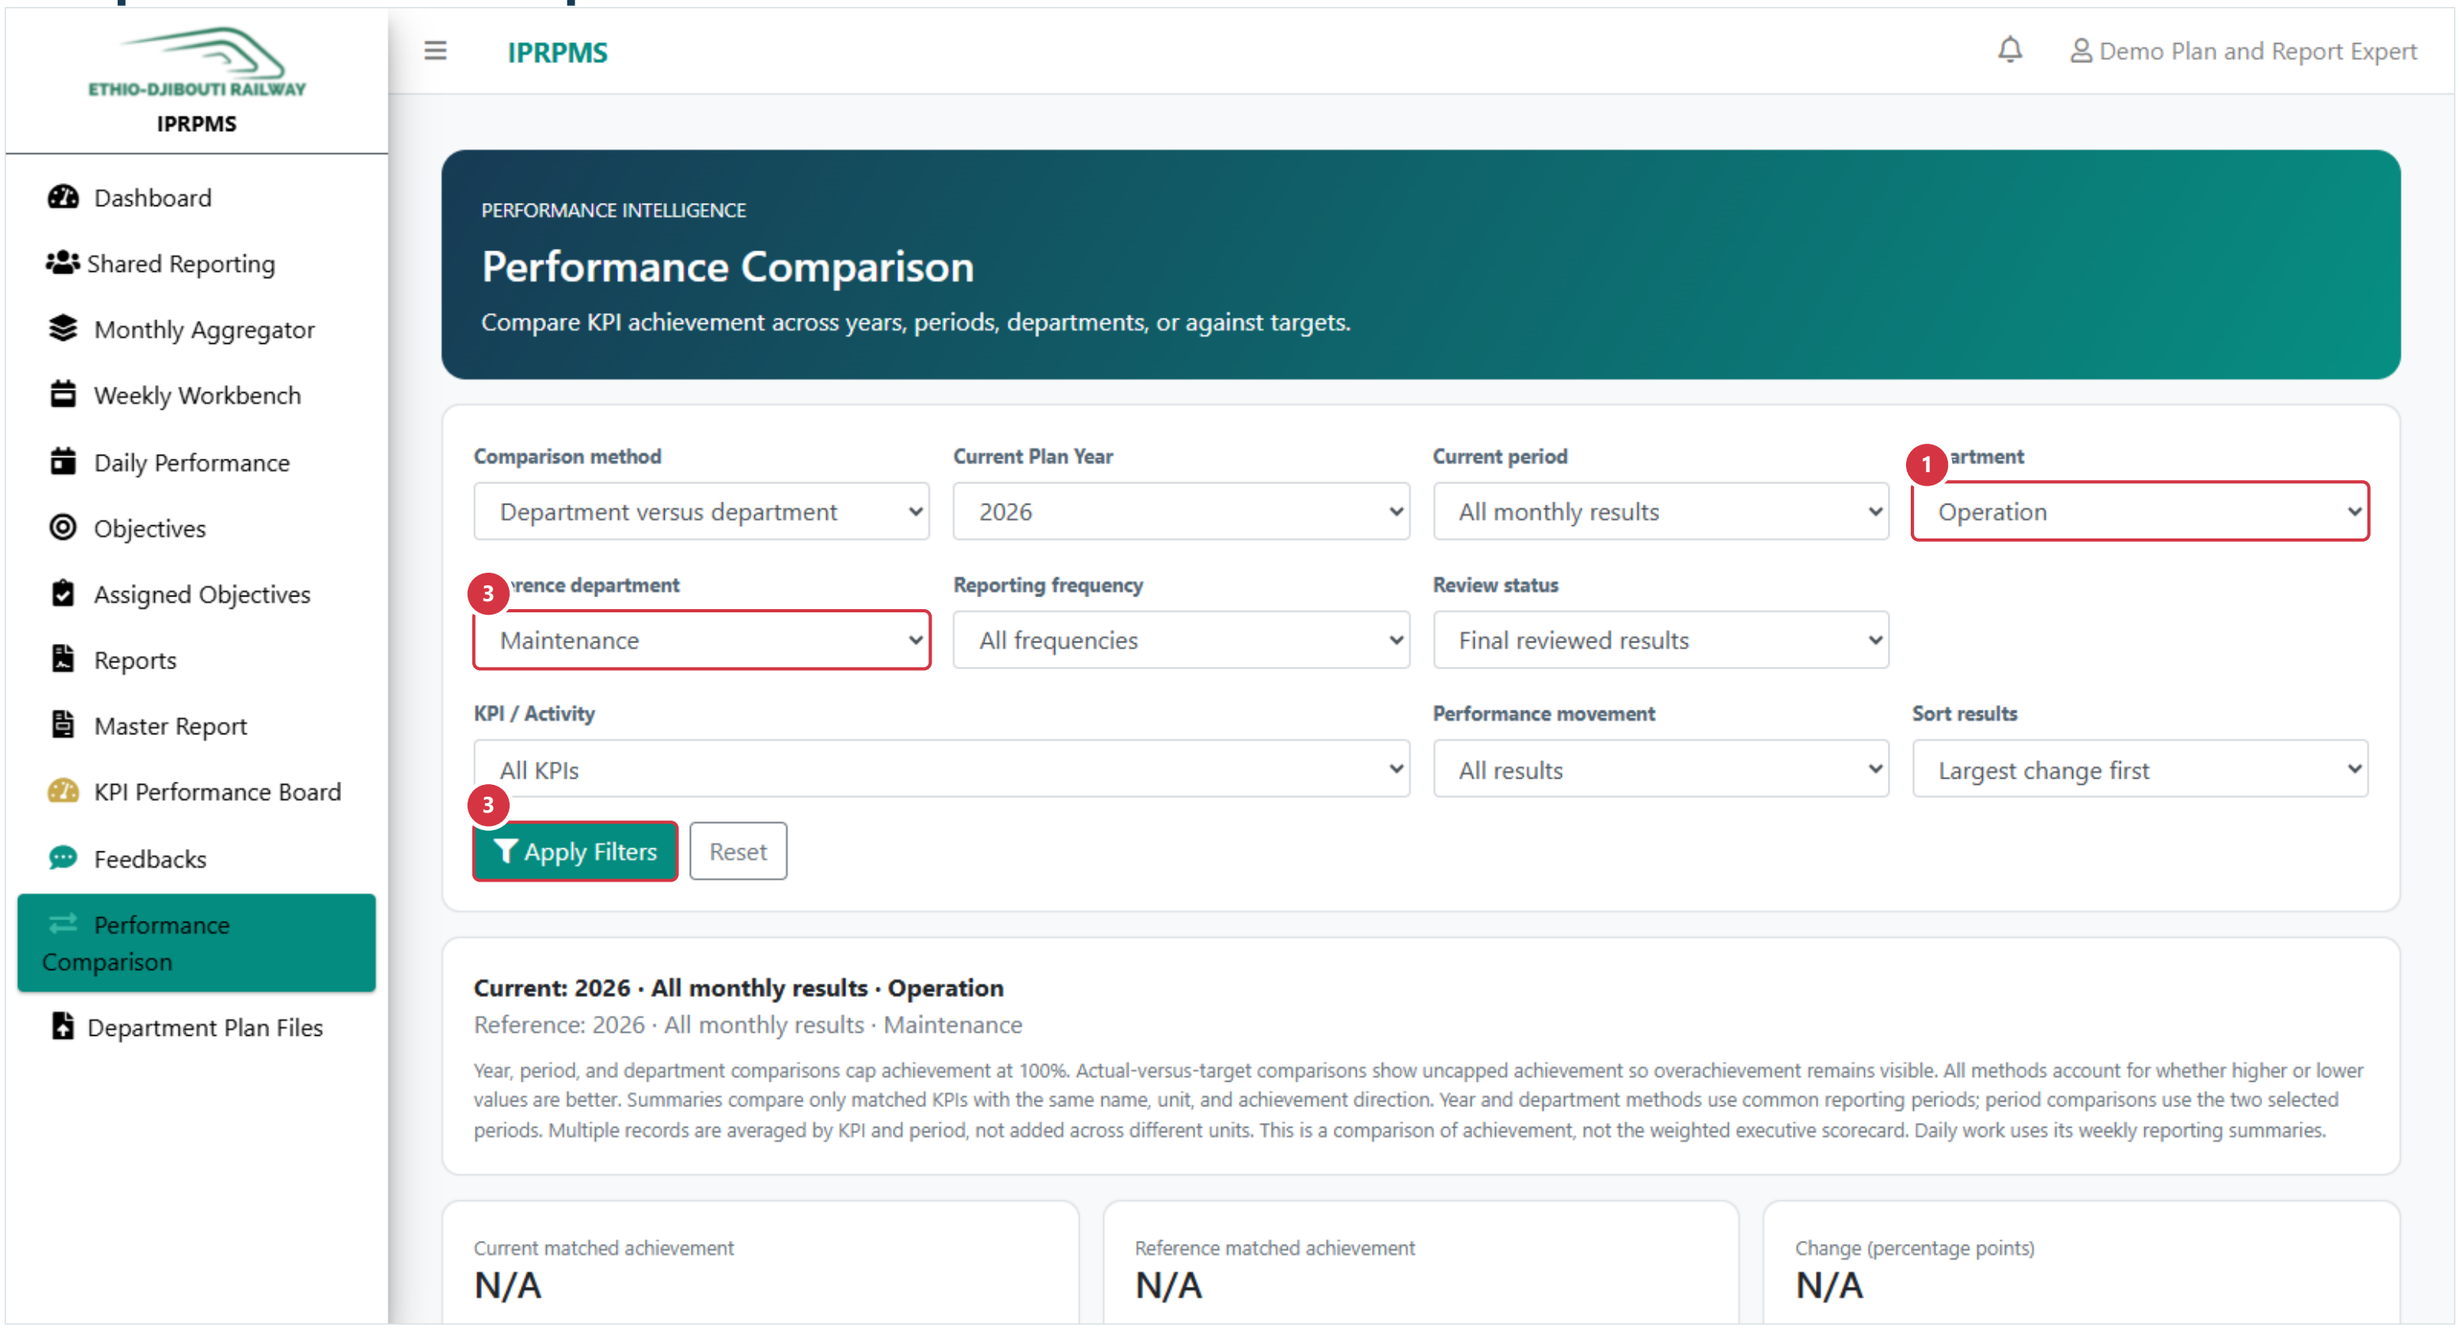

Compare equivalent reporting periods

1. Select the comparison method.
2. Set the current and reference scopes displayed by that method.
3. Click Apply Filters, then read the matching coverage and detailed table.

After this step: Use the same measurement definitions and appropriate periods when interpreting differences.

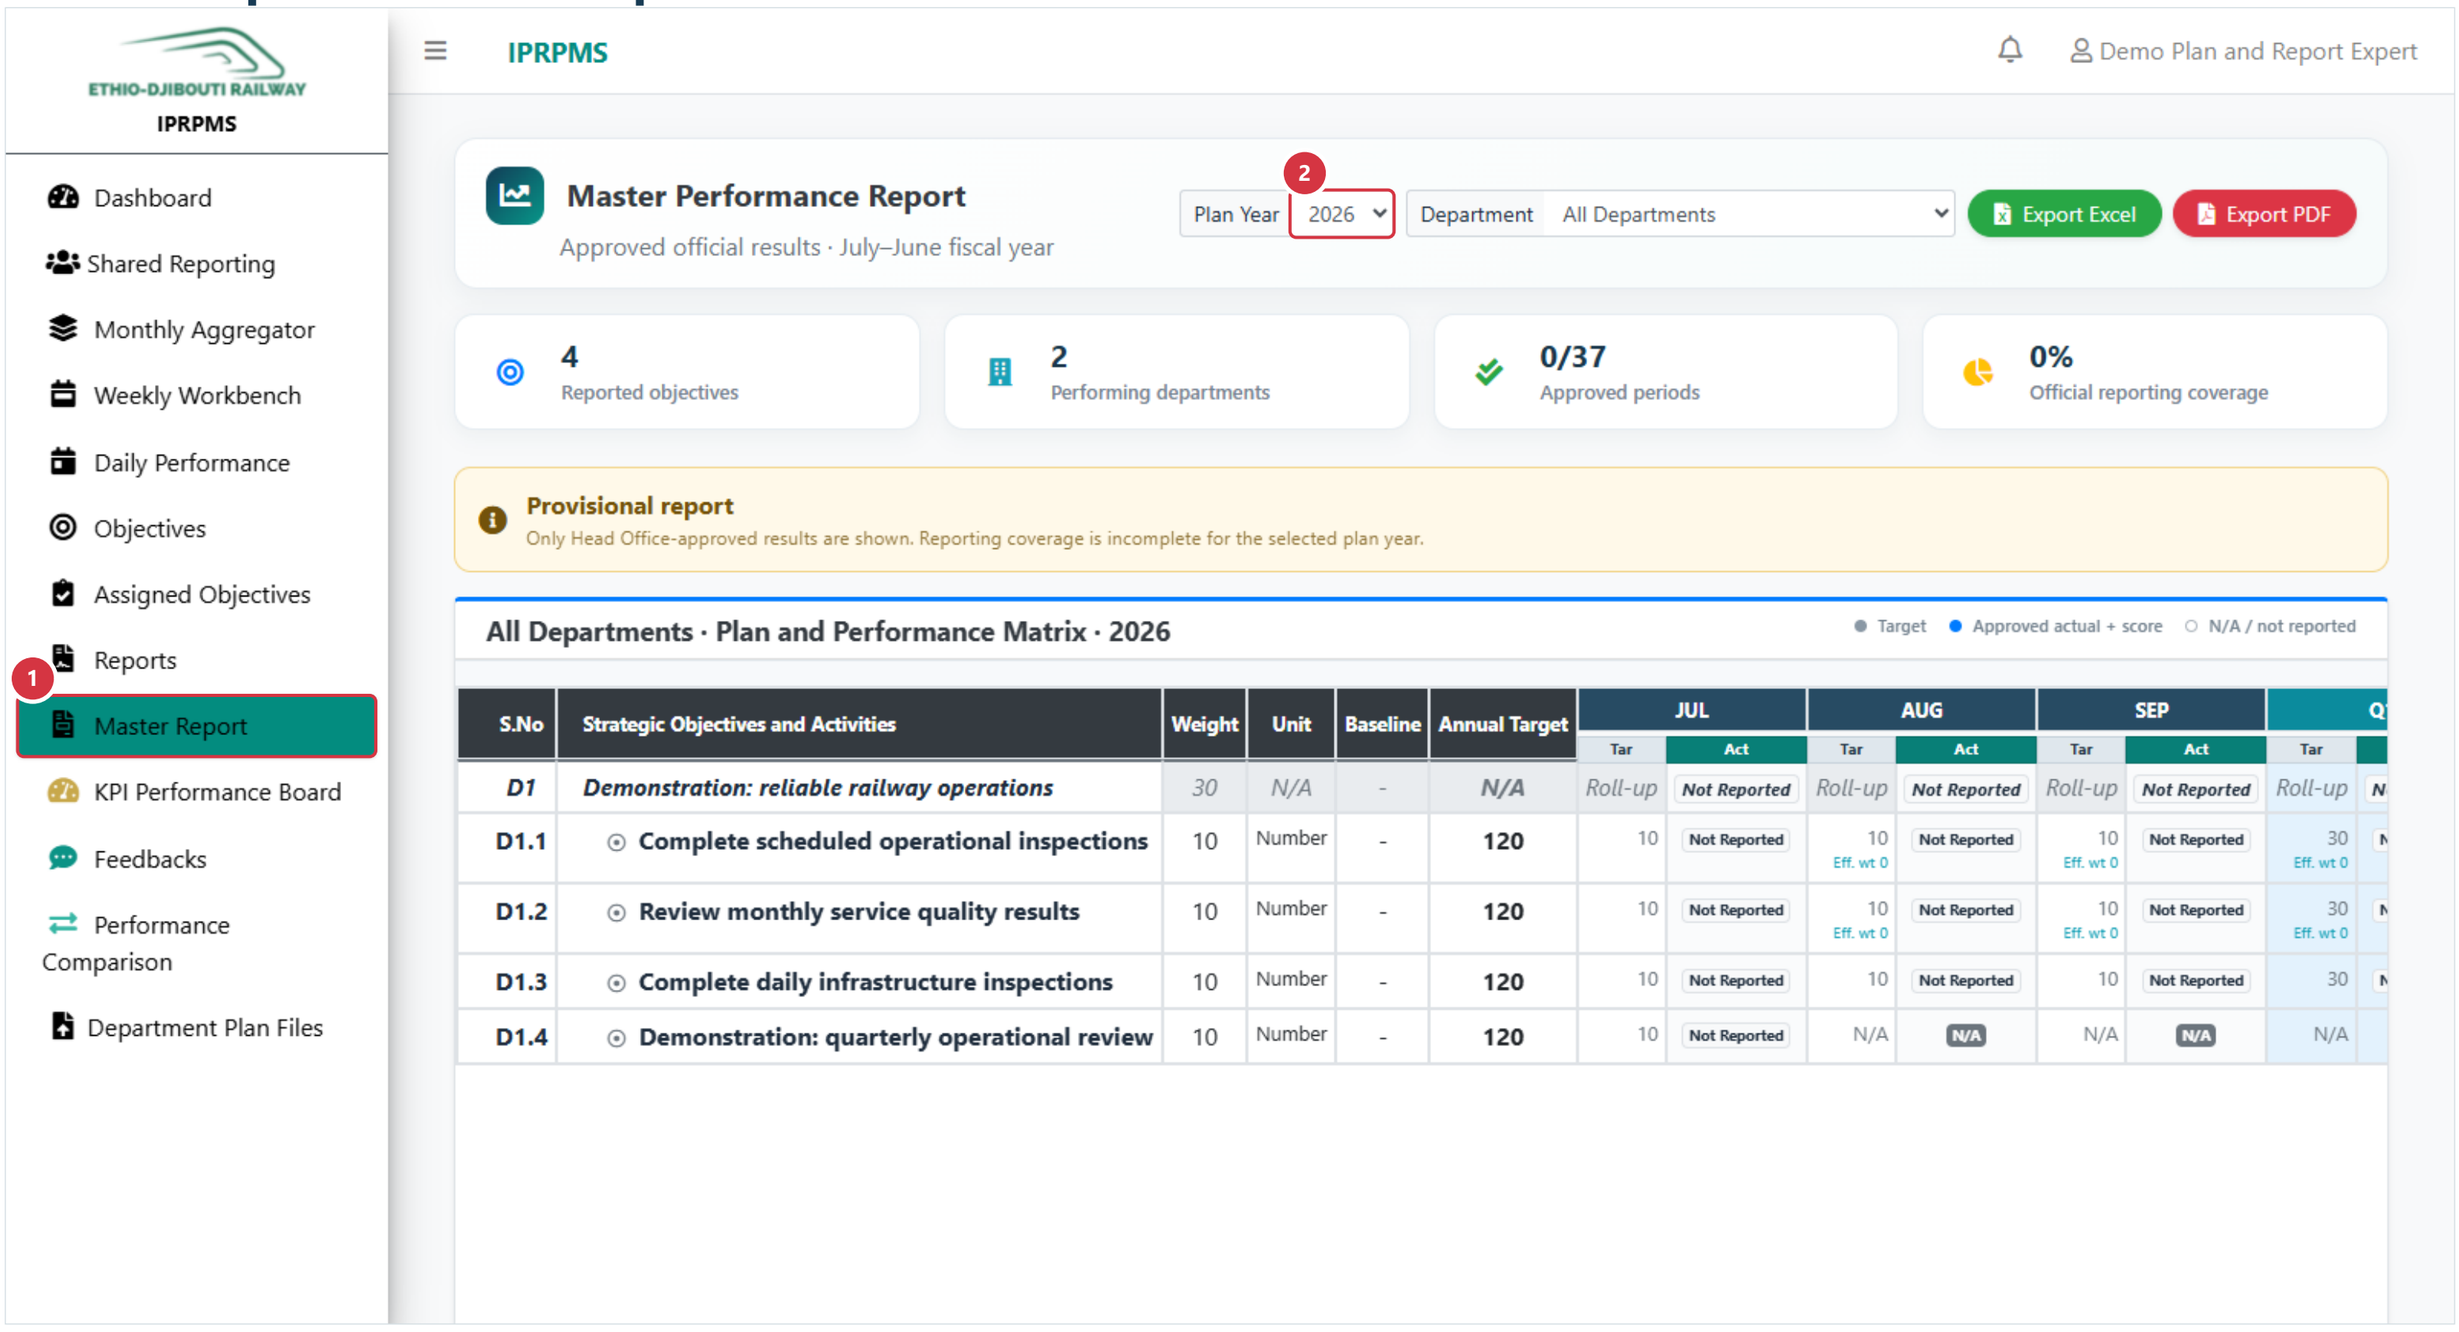

Compare authorized departments

1. Choose Department versus department as the comparison method.
2. Select the current department and a different reference department.
3. Click Apply Filters and read the comparable coverage and results.

After this step: Only authorized department choices are offered. Missing compatible performance produces an empty comparison.

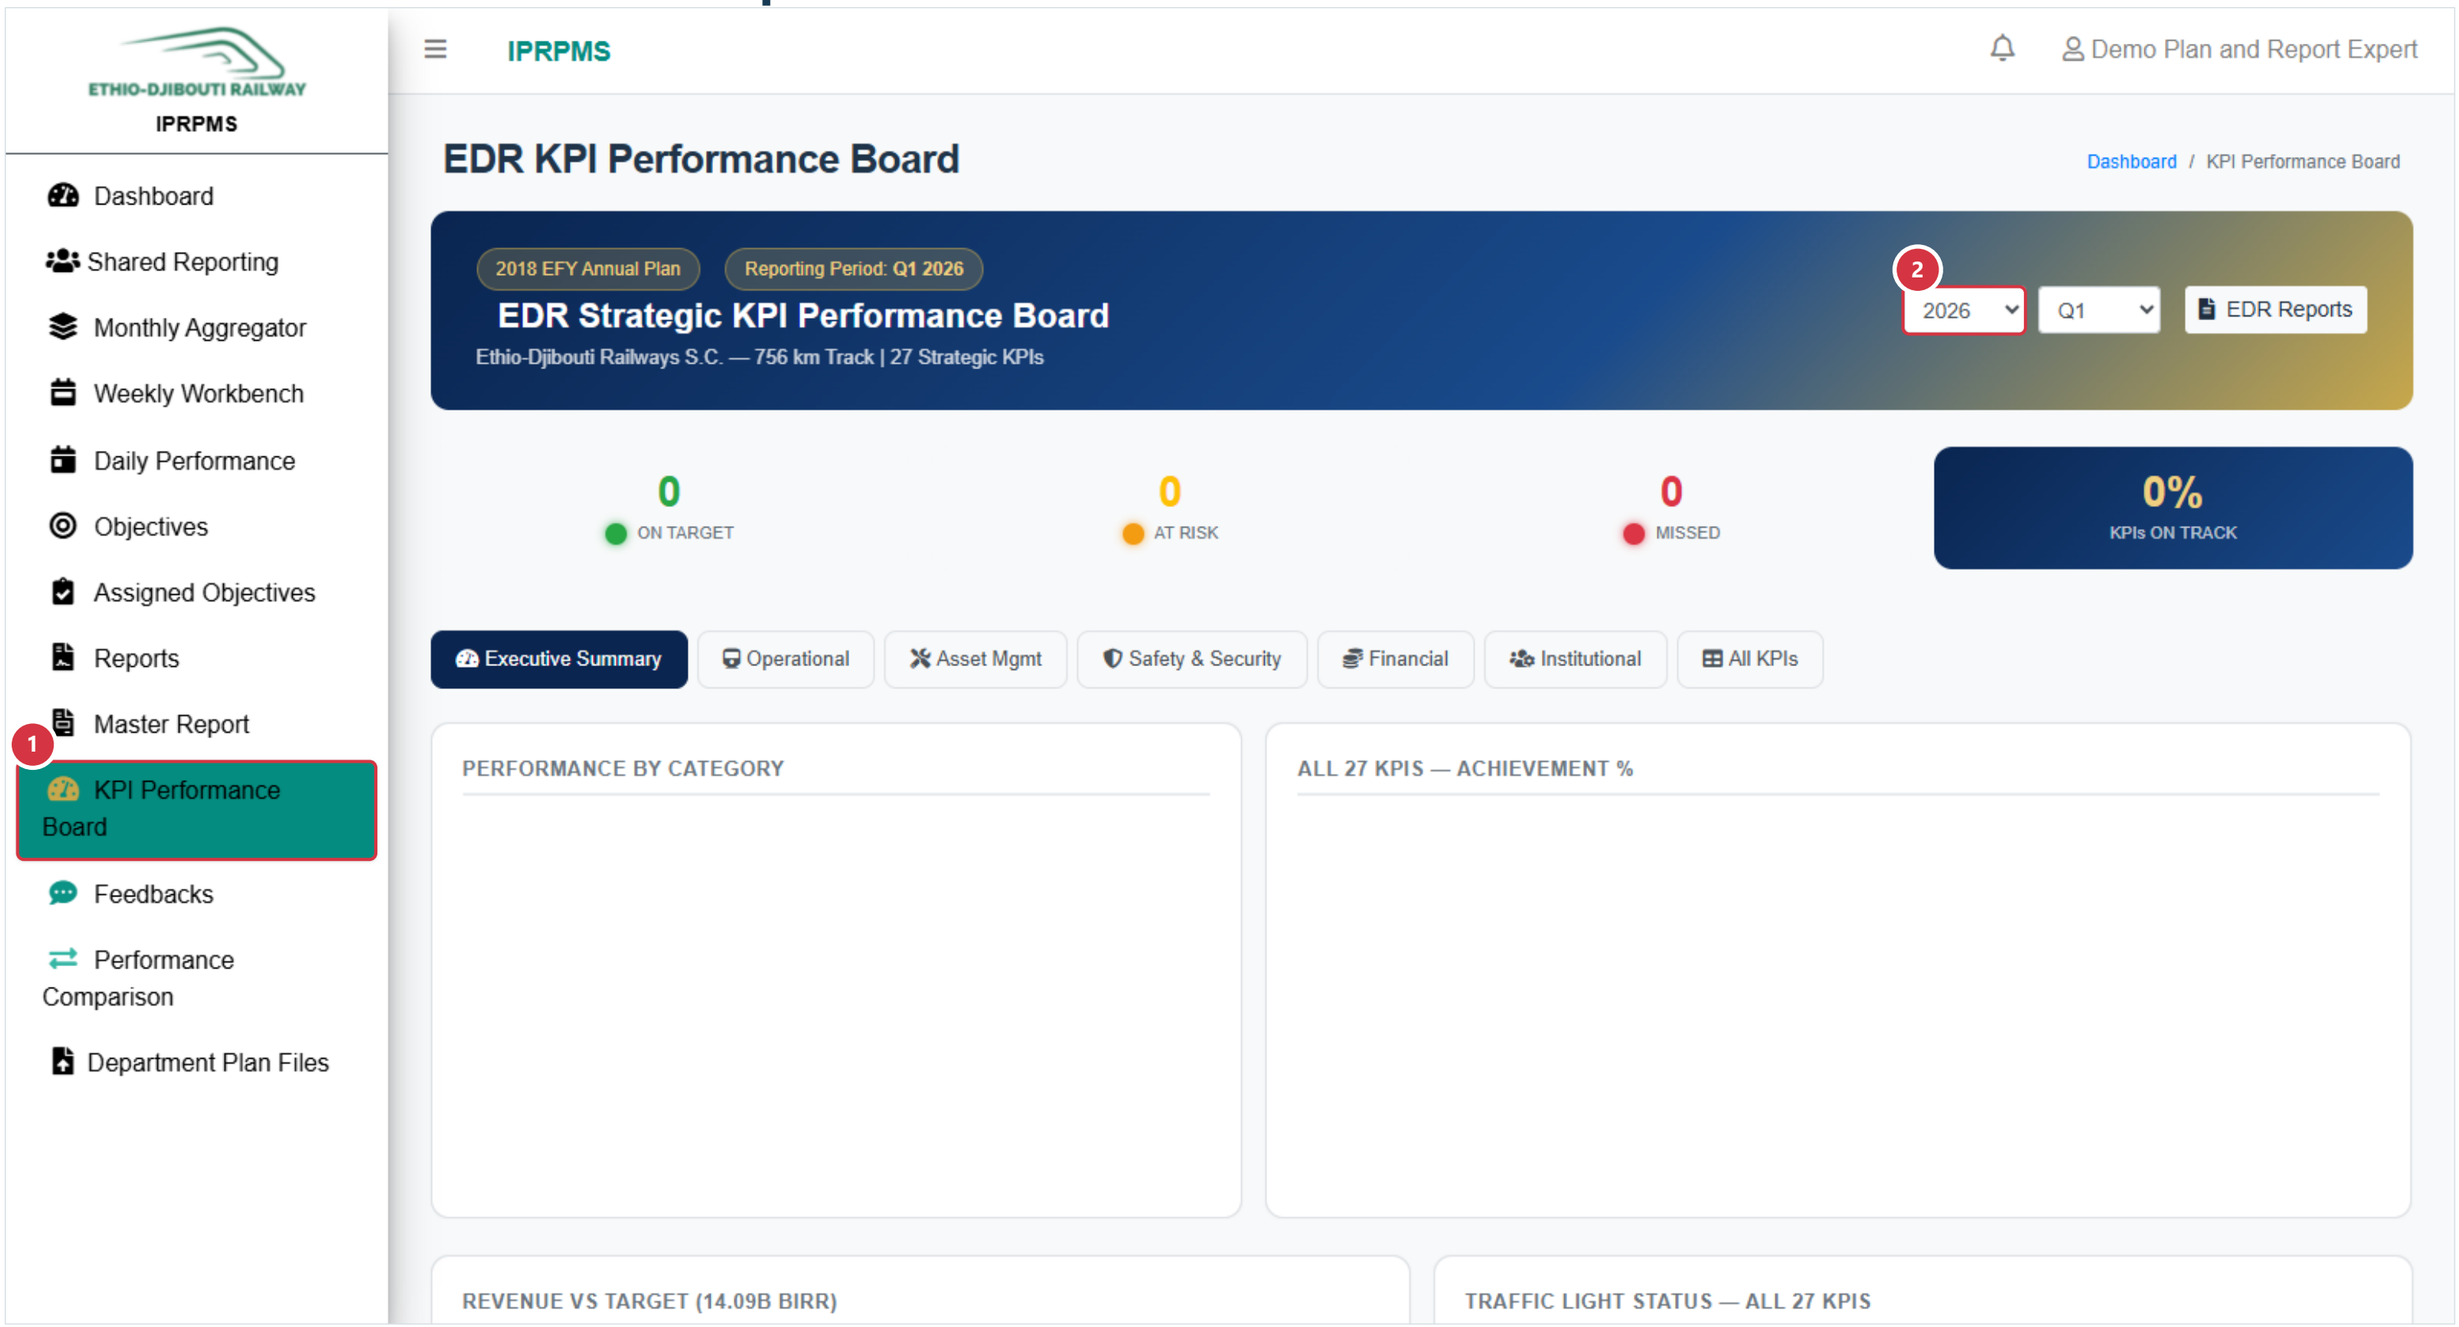

Master Report: choose scope and download

1. Open Master Report.
2. Choose the permitted department, year and period filters.
3. Read the plan/performance table and use the available PDF or Excel download.

After this step: Use matching year and period filters when reconciling a report against entered performance.

KPI Performance Board: review permanent KPIs

1. Open KPI Performance Board.
2. Select the reporting year and period.
3. Read the KPI-level plan, actual and achievement in your authorized scope.

After this step: Permanent KPI codes identify the stable indicators used on the board.

Prepare a historical KPI match for review

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

A historical mapping links an earlier indicator to the correct current activity. It is a comparison definition, not approval of either year's performance.

Before you click

Open Historical comparison and Edit measurement & mapping for the intended row. Read both descriptions, definitions, units and whether higher or lower is better.

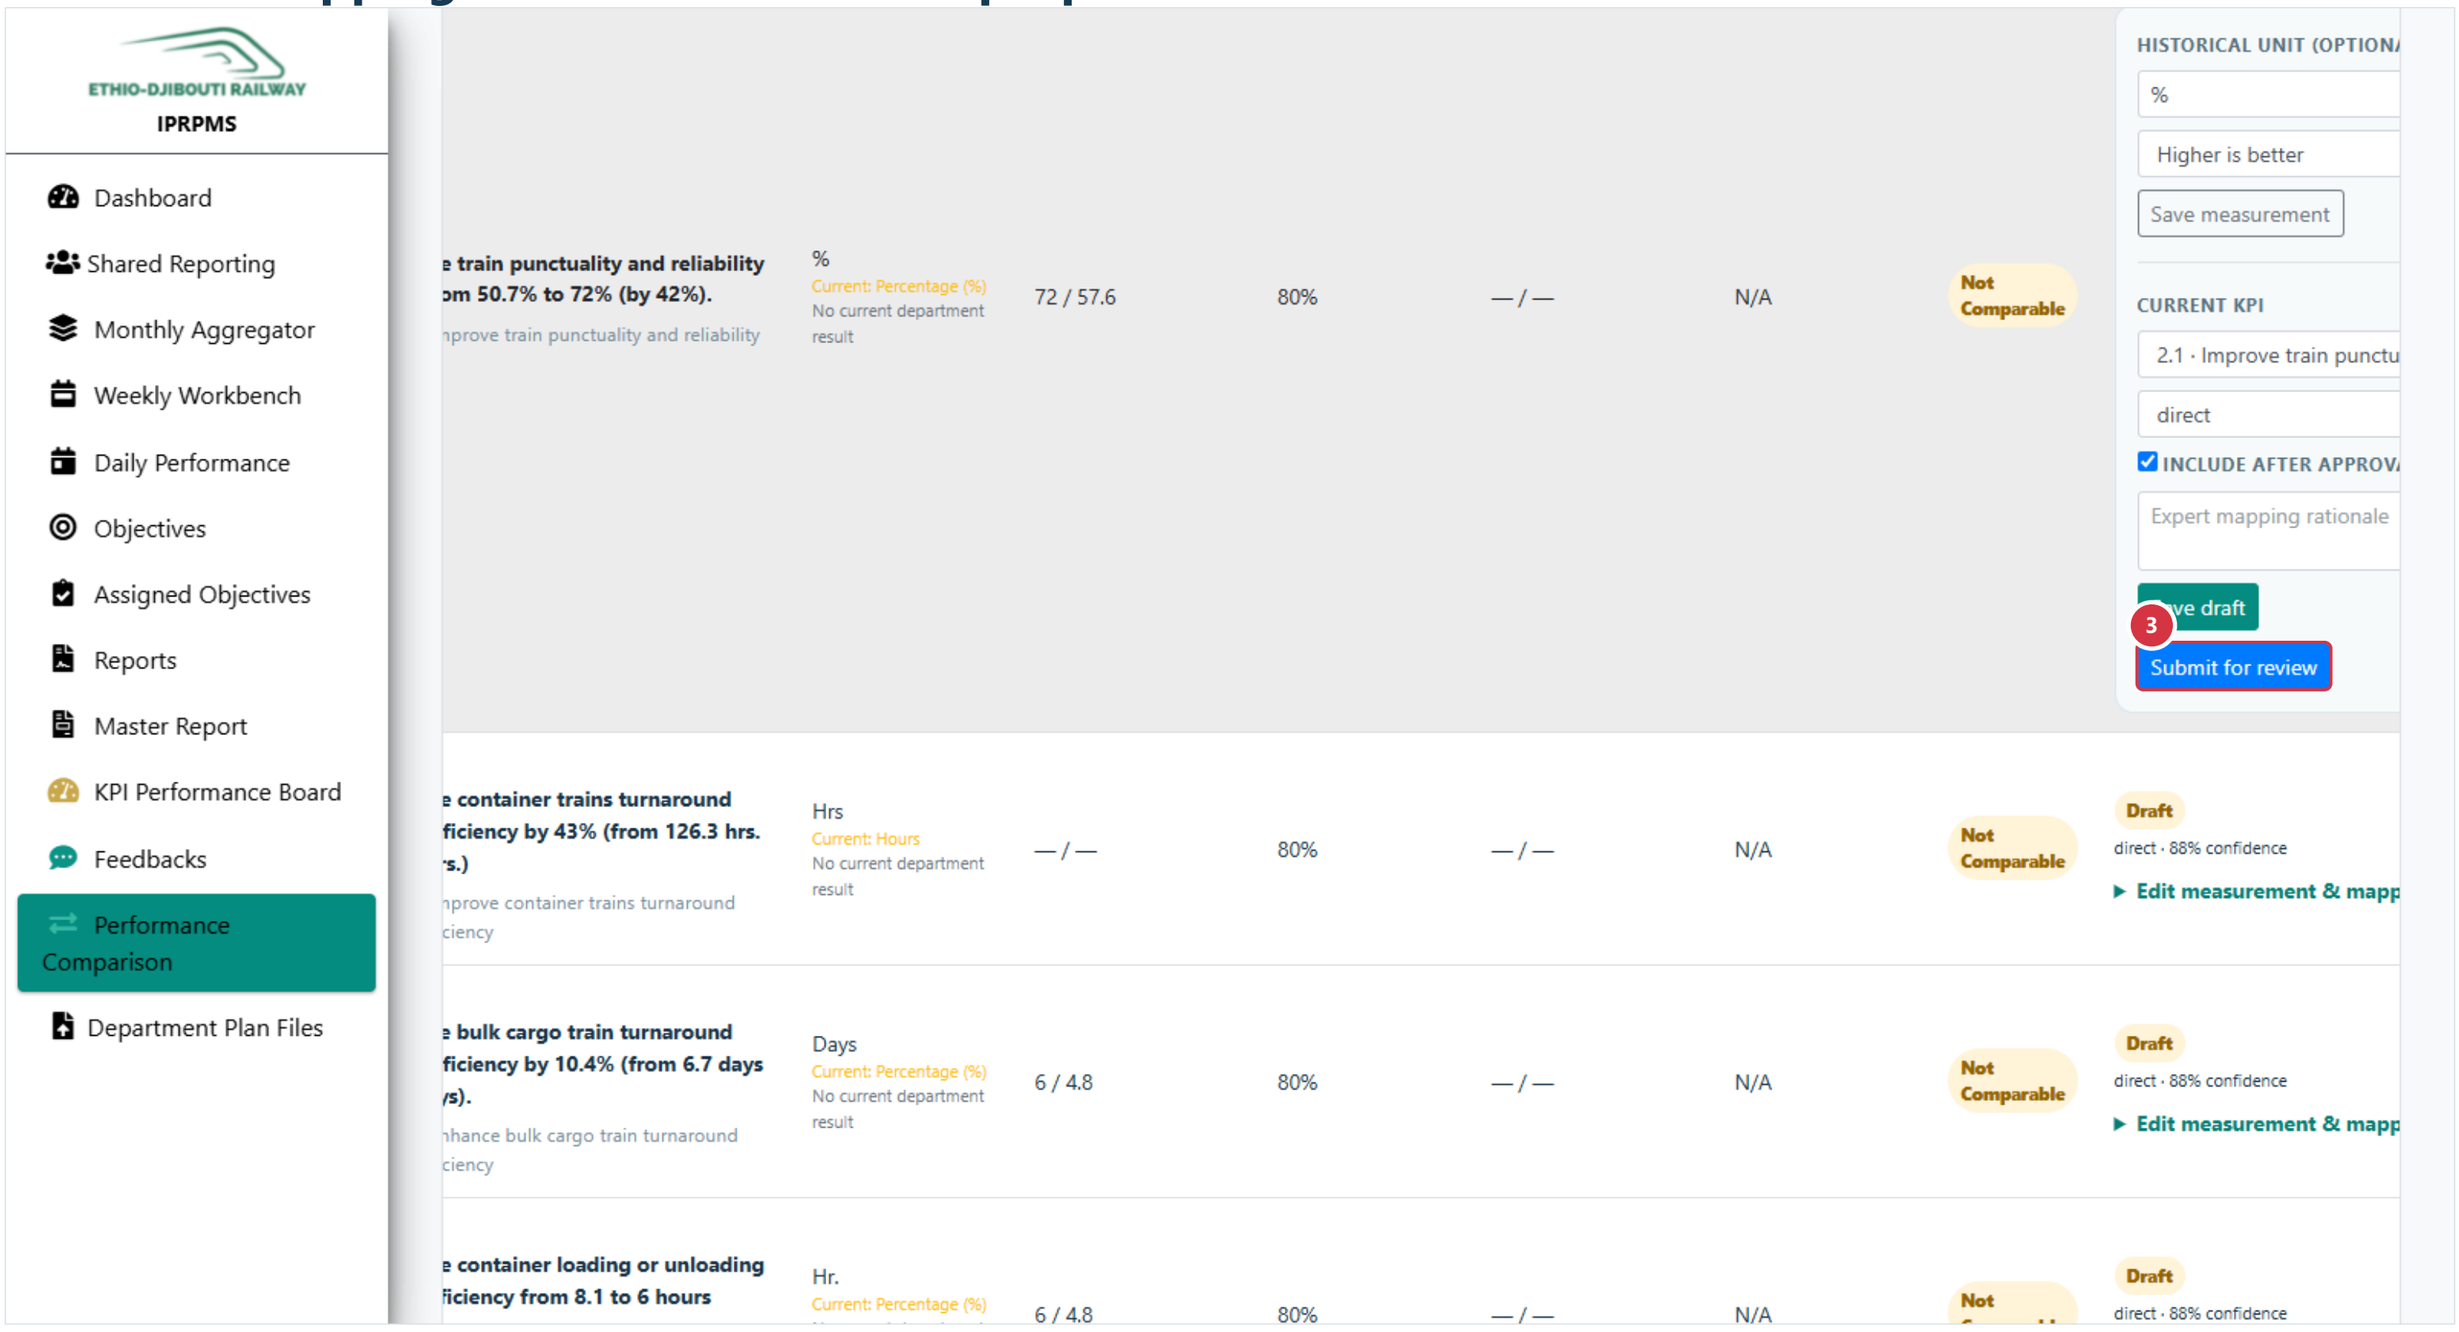

What to check

Leave Historical unit blank if it is genuinely not provided; it can be corrected later when verified. Select Current KPI, mapping type, confidence and comparability, explain the rationale and Save draft. Do not infer equivalence from a similar code alone.

How you know it worked

Click Submit for review. An authorized Plan and Report Directorate or Chief reviewer approves or rejects the proposed link. Only approved comparable mappings feed the official comparison; editing the mapping creates a new draft.

Historical mapping: save and submit the proposed match

1. Open Edit measurement & mapping and verify unit, direction and the proposed Current KPI.
2. Save draft with the mapping type, comparability and a clear rationale.
3. Click Submit for review when the proposed match is ready.

After this step: Submitting a mapping requests a comparison-link review. It does not approve the objective or enter performance.

Read the department's submitted plan files

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

Department plan files provide source documents from identifiable departments. They are not automatic approval of the plan or its results.

Before you click

Open the plan-files workspace for the required year.

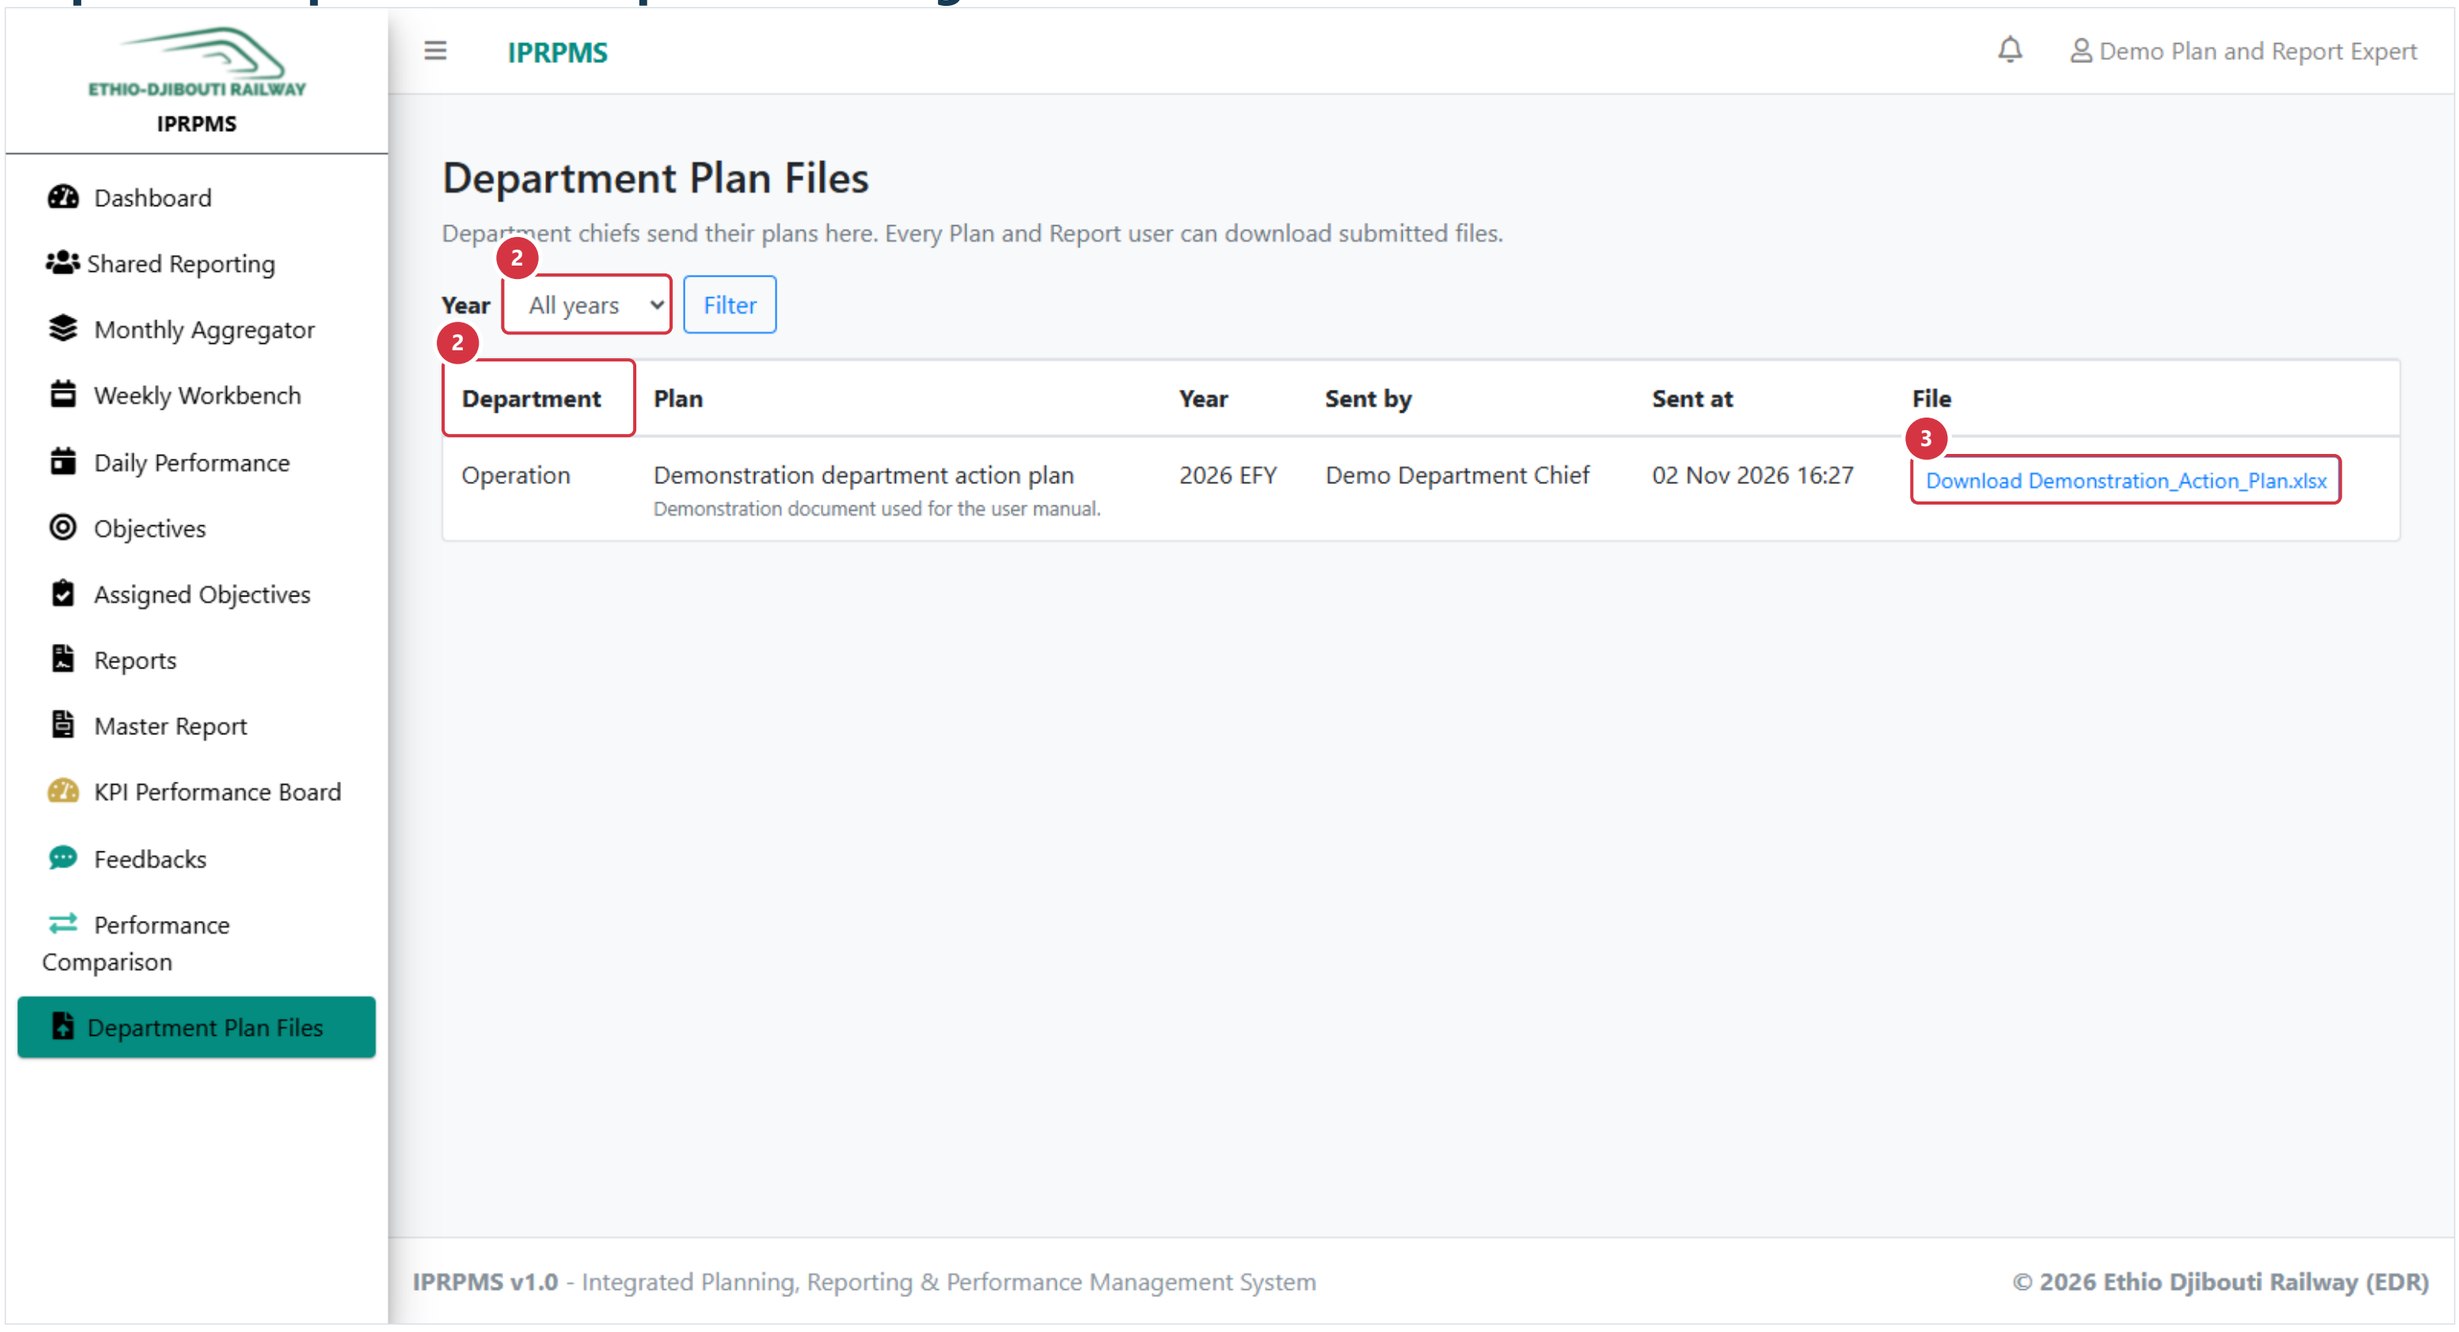

What to check

Filter by the sending department and read the title and date before downloading. Do not confuse an attachment with the generated organization narration.

How you know it worked

The document is associated with its source department and can be used for the authorized planning or review task.

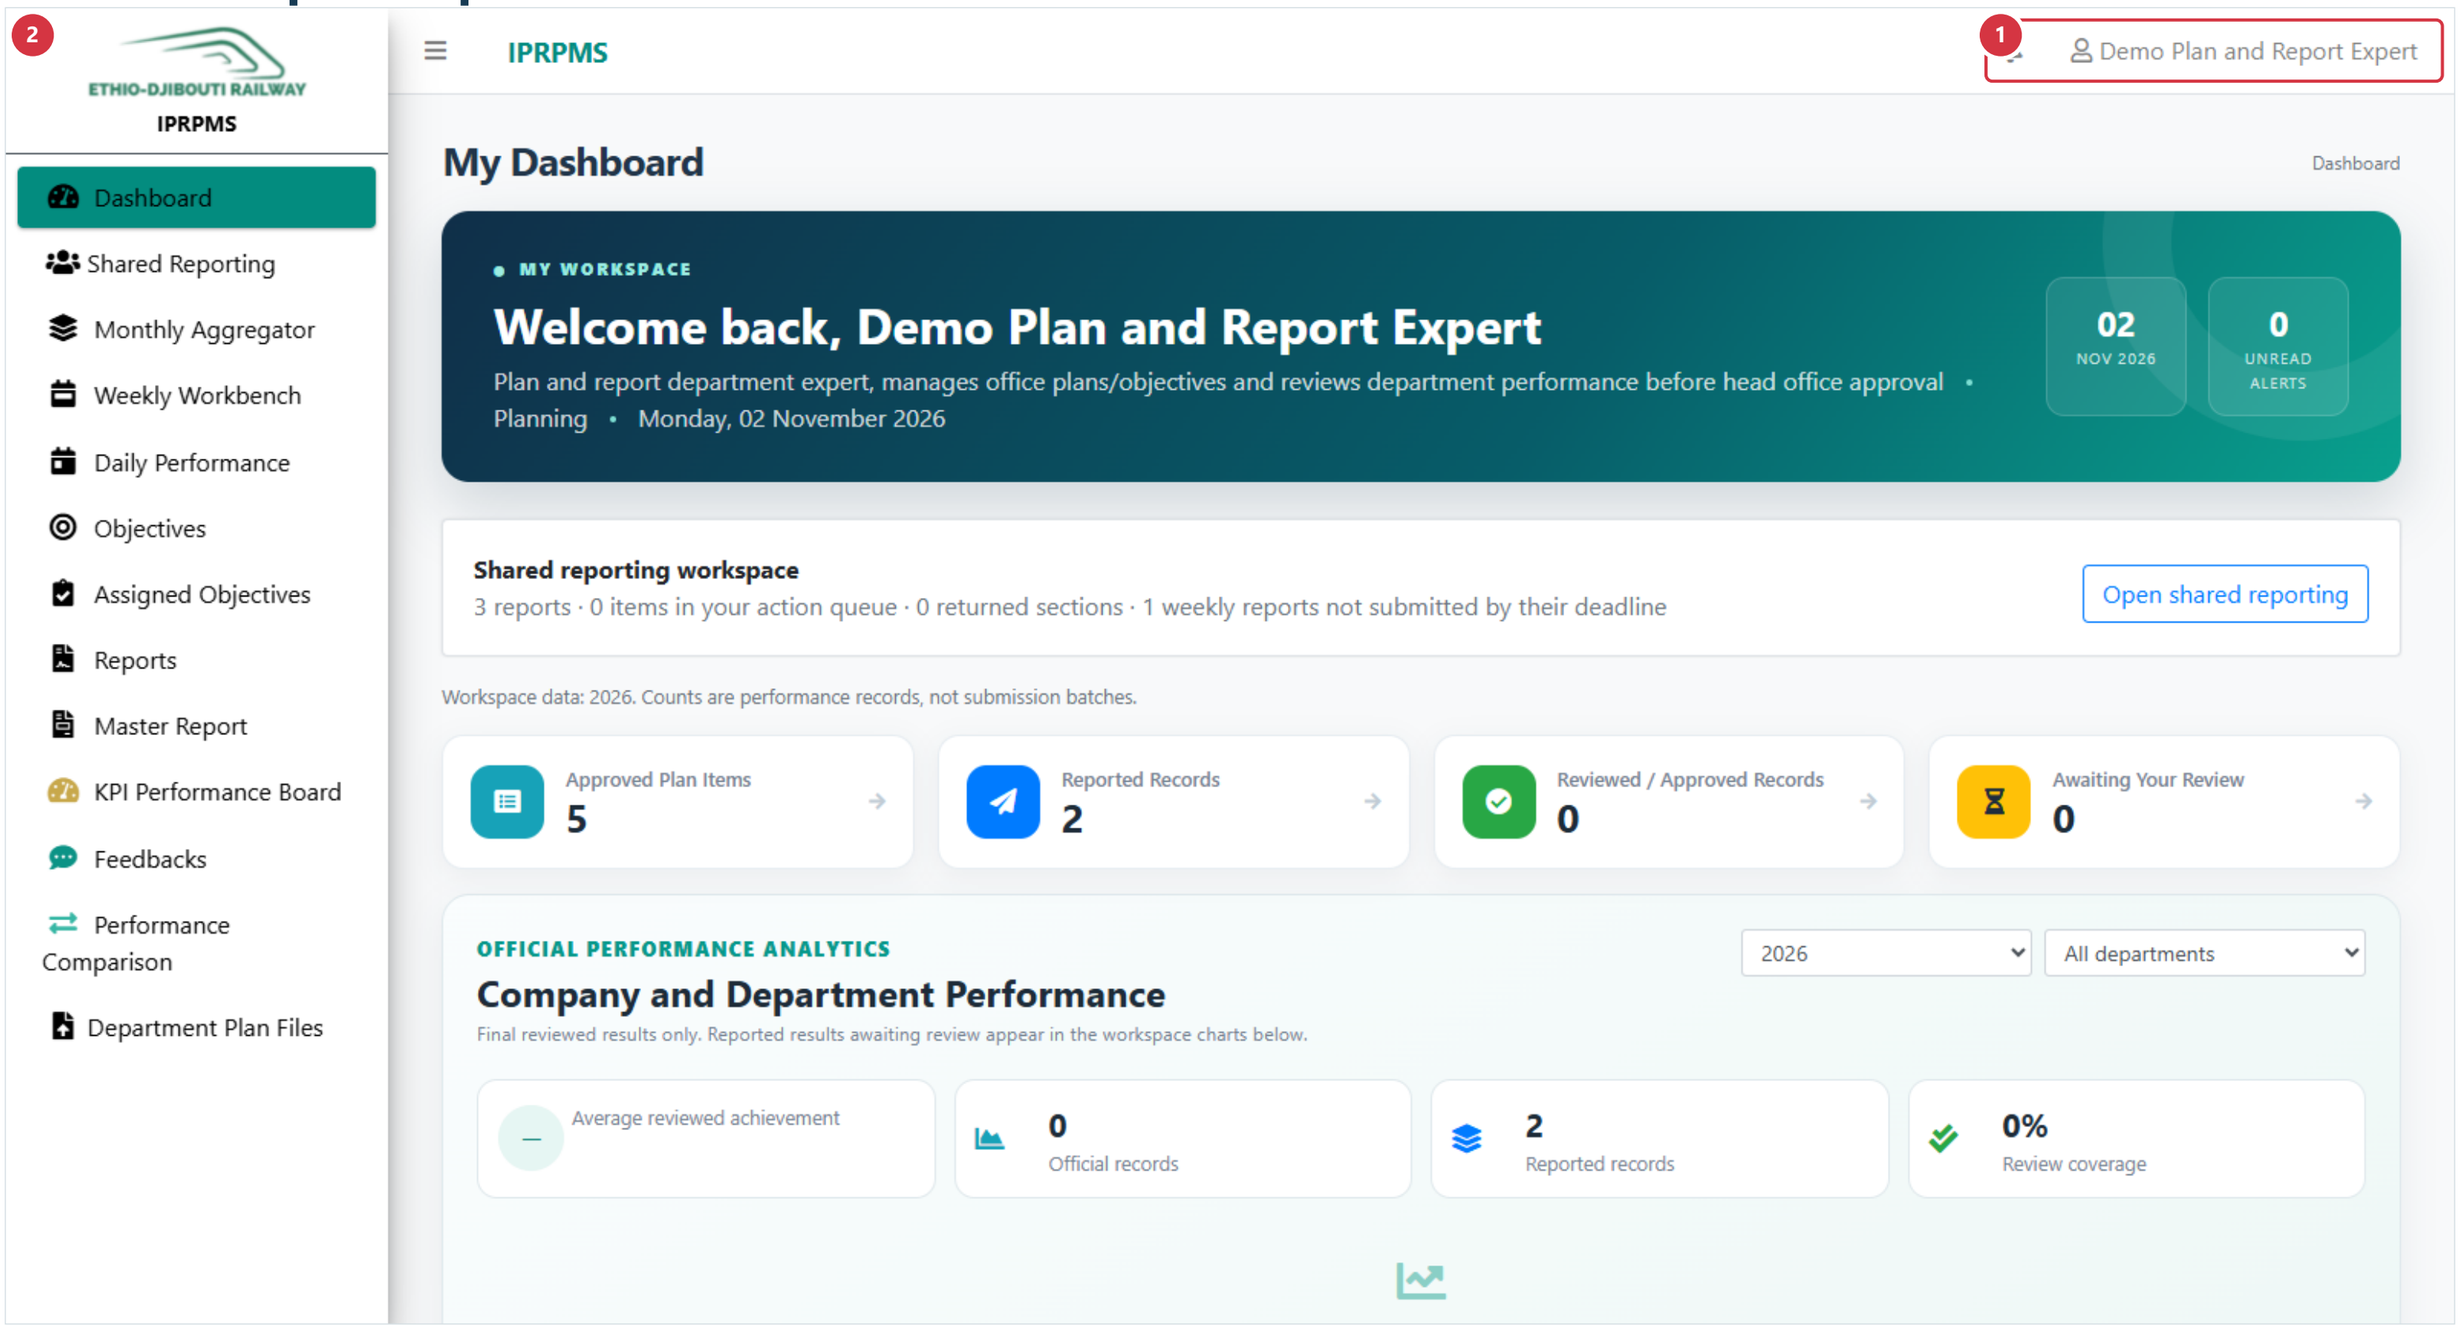

Department plan files: recipient filtering

1. Select the required year and click Filter.
2. Read the originating Department and the plan title.
3. Click Download on the document you need.

After this step: The actual uploaded demonstration workbook appears with its department, sender and submission time.

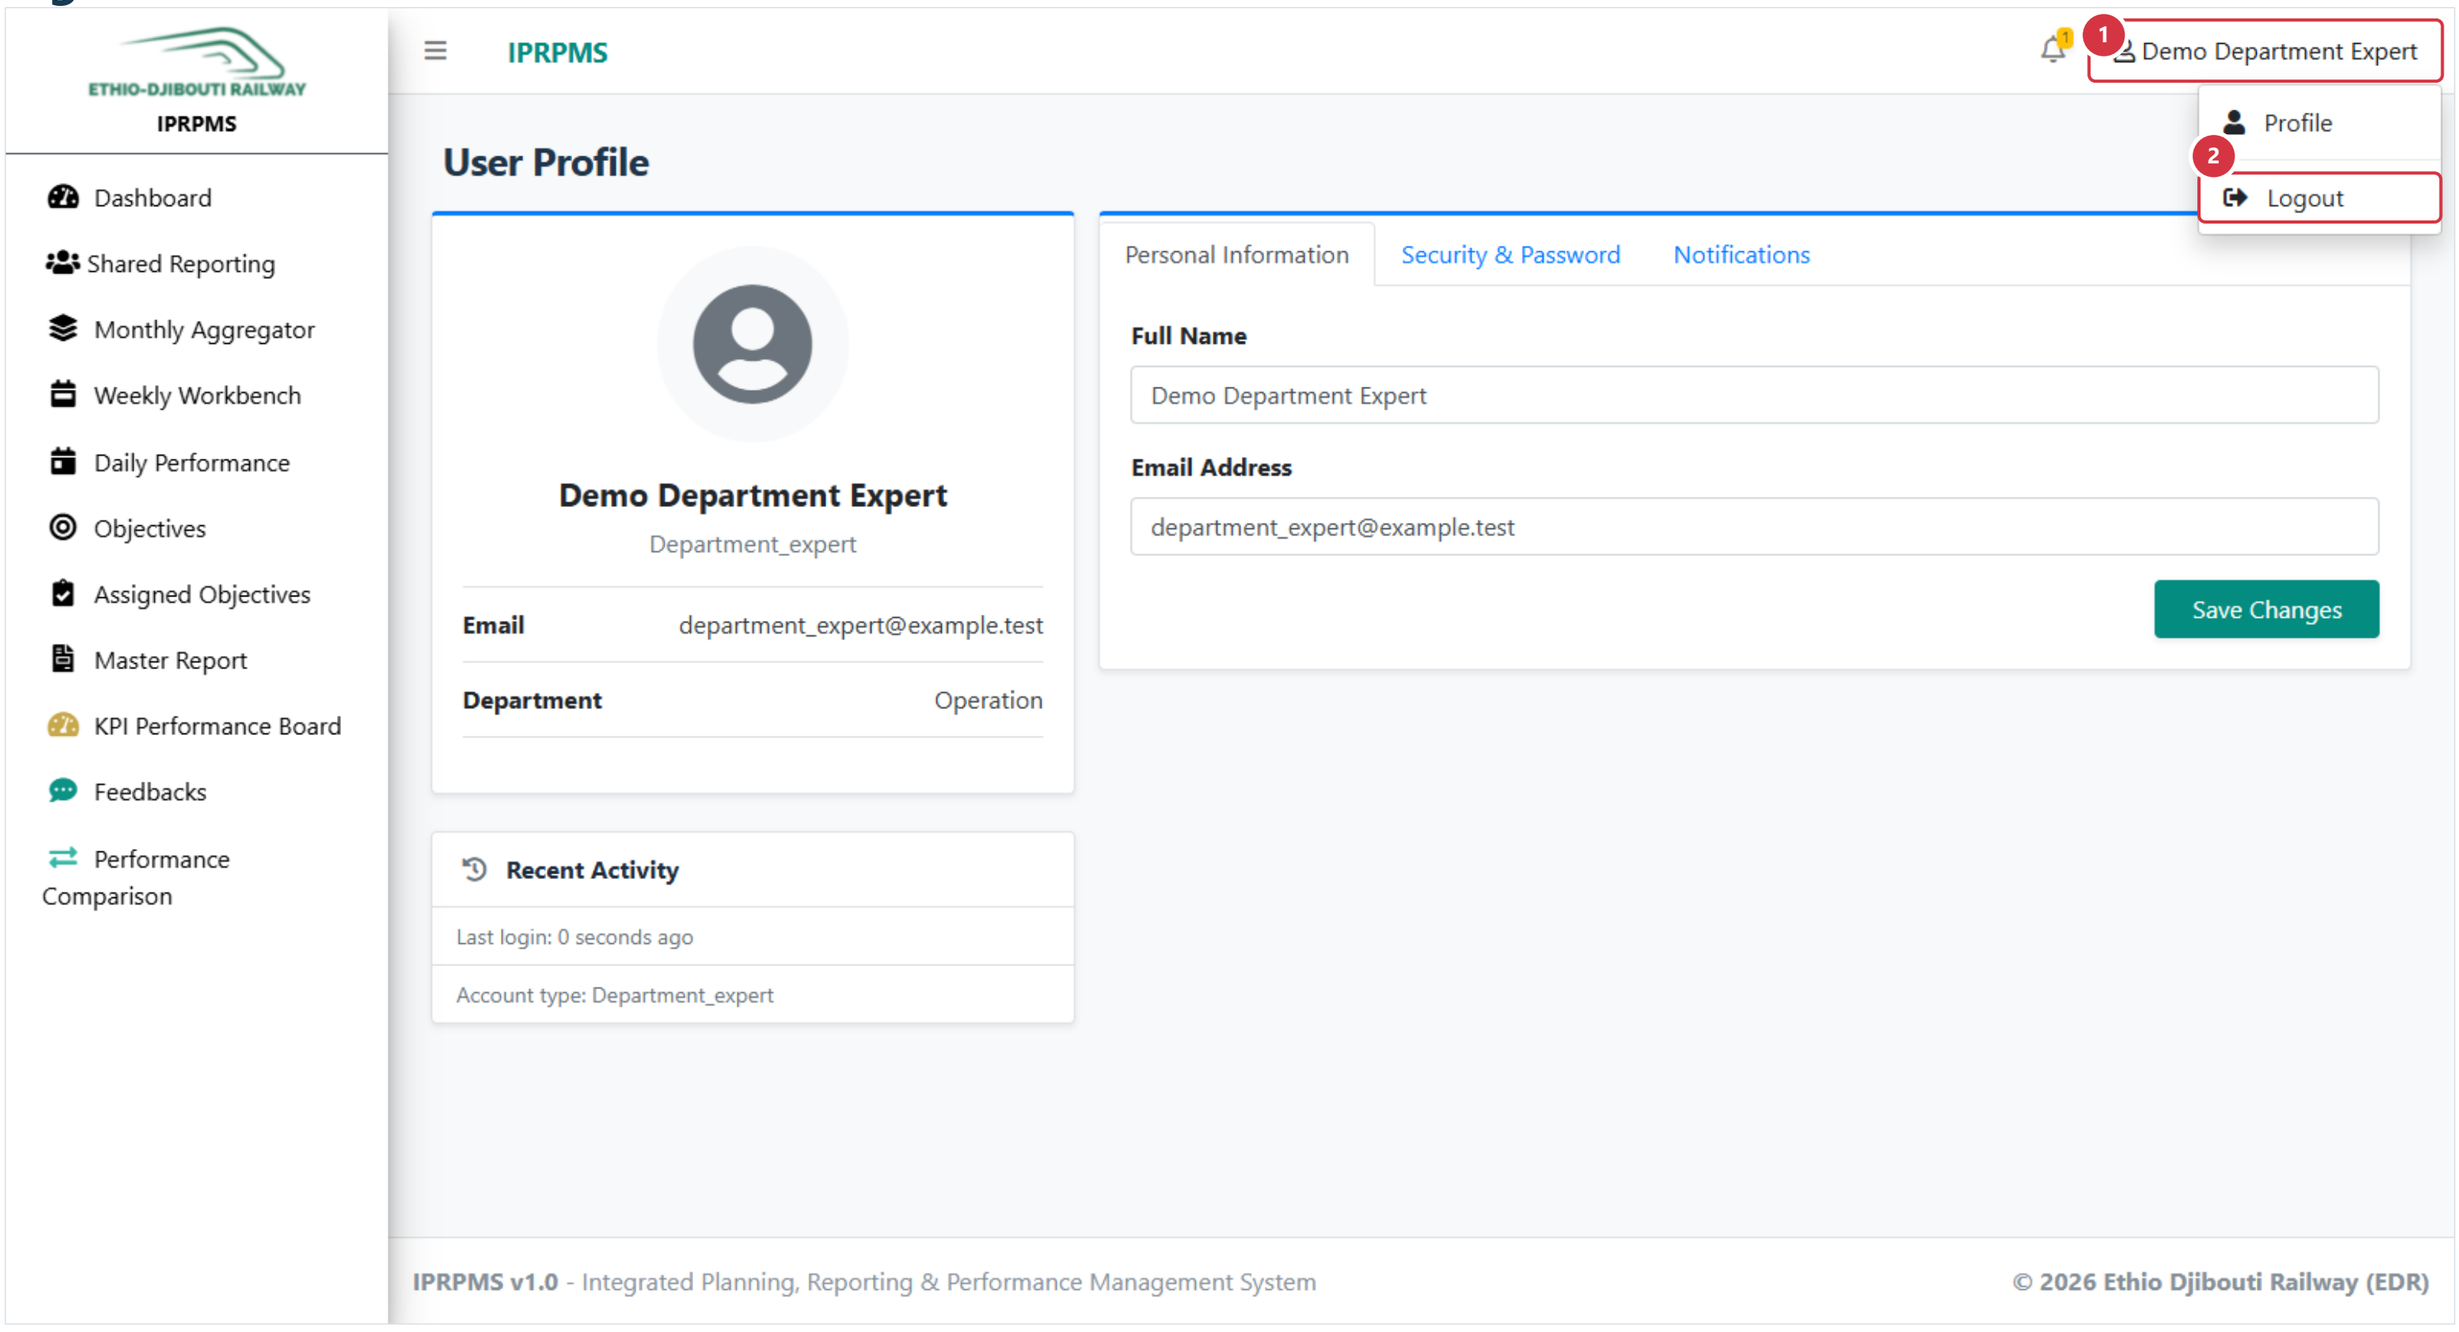

Plan and Report Expert: home screen

1. Confirm your signed-in role at the top right.
2. Prepare main/sub objectives, targets, departments and frequency. Submit plans and prepare period weights, reports, feedback and narration.
3. Review departmental performance. Send no-correction results or correction requests through the Plan and Report hierarchy.

After this step: Menus vary by permission, department and reporting frequency.

Sign out on a shared device

1. Click your name at the top right to open the user menu.
2. Click Logout after you finish your work.

After this step: The application returns to the sign-in screen after logout.

Before you finish, check these four things

Finish means your part is complete and you know who has the next action. It does not always mean the whole record is finally approved.

Your completion checklist

1. Each draft uses the correct year, scope and performers. 2. Each submission is saved and sent through the right Directorate workflow. 3. Correction comments say which activity, period and evidence need attention. 4. Comparisons show compatible approved results and mapping coverage.

If a menu or button is missing

A missing current-year comparison can mean performance is not final yet. A draft KPI mapping is not a failed KPI result. Check record status, coverage and period before drawing conclusions.

Ask for help with useful details

Give IT or the responsible reviewer the module, department, year, reporting period, objective or record reference and exact message. Include a safe screenshot. Never send your password.

Keep the process and data safe

Use your own account, save before sending, read return comments and keep the same record for corrections. Demonstration screenshots are teaching examples, not official performance figures. The separate logistics Import/Export module is excluded.
