Plan & Report Directorate

Your responsibilities, complete workflow, exact clicks and return paths.

Read first: the Start Here guide explains how the whole system works. Then use this manual to do your part, check the outcome and hand work to the right person.

Understand your job before the buttons

Keep this page in mind whenever you receive a new record. It explains your responsibility and where your part stops.

Your job

Check the Expert's work for completeness and consistency, make traceable permitted edits, and send ready records to the Plan and Report Chief.

What you receive

Submitted objective hierarchies, departmental performance reviews or correction requests, period weights, written reports, feedback and plan narration.

Who receives your work

Correct records go to the Plan and Report Chief. Where a Return action exists, send unclear or incomplete work back to the Expert with the exact correction needed.

Your limits and important distinctions

Forwarding is not final approval. Keep the workflows separate: a report document approval does not approve numeric results, and an objective review does not approve historical KPI mappings.

Your workflow, from first action to finish

Read down the page. Each step has an outcome; do not jump ahead simply because a button is visible.

1

Open the correct review queue

Identify the record type, department, year, period and submitted status.

2

Read the Expert's work

Check the plan hierarchy or results, evidence and previous comments rather than just the headline totals.

3

Make permitted changes transparently

Where editing is available, record the required reviewer change reason before saving.

4

Return work that needs correction

Use the record's available Return action and explain exactly what the Expert must change.

5

Send ready work to the Head

Use the workflow-specific forwarding control and verify the resulting status.

6

Track the final decision

If the Head returns the review, resolve the stated issue and forward the same record again; do not create a replacement.

Find the task you need

Use the page number or click a task name in the PDF. Section introductions explain the purpose before the screen-by-screen actions.

First access and everyday account safety 5

Review the submitted objective hierarchy 11

Review departmental performance and correction requests 14

Review the proposed period-weight distribution 16

Review written reports and feedback 18

Review and forward the organization plan narration 21

Review a historical KPI comparison mapping 23

Completion checklist and help 27

First access and everyday account safety

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

Use your own account. Your department and role decide what you can see and which decisions you can make. Never use somebody else's account to reach a missing button.

Before you click

Have your official account details ready. Open the address supplied by IT, enter your email and Access Key, then click Authenticate. A first-password screen appears only when your account requires it.

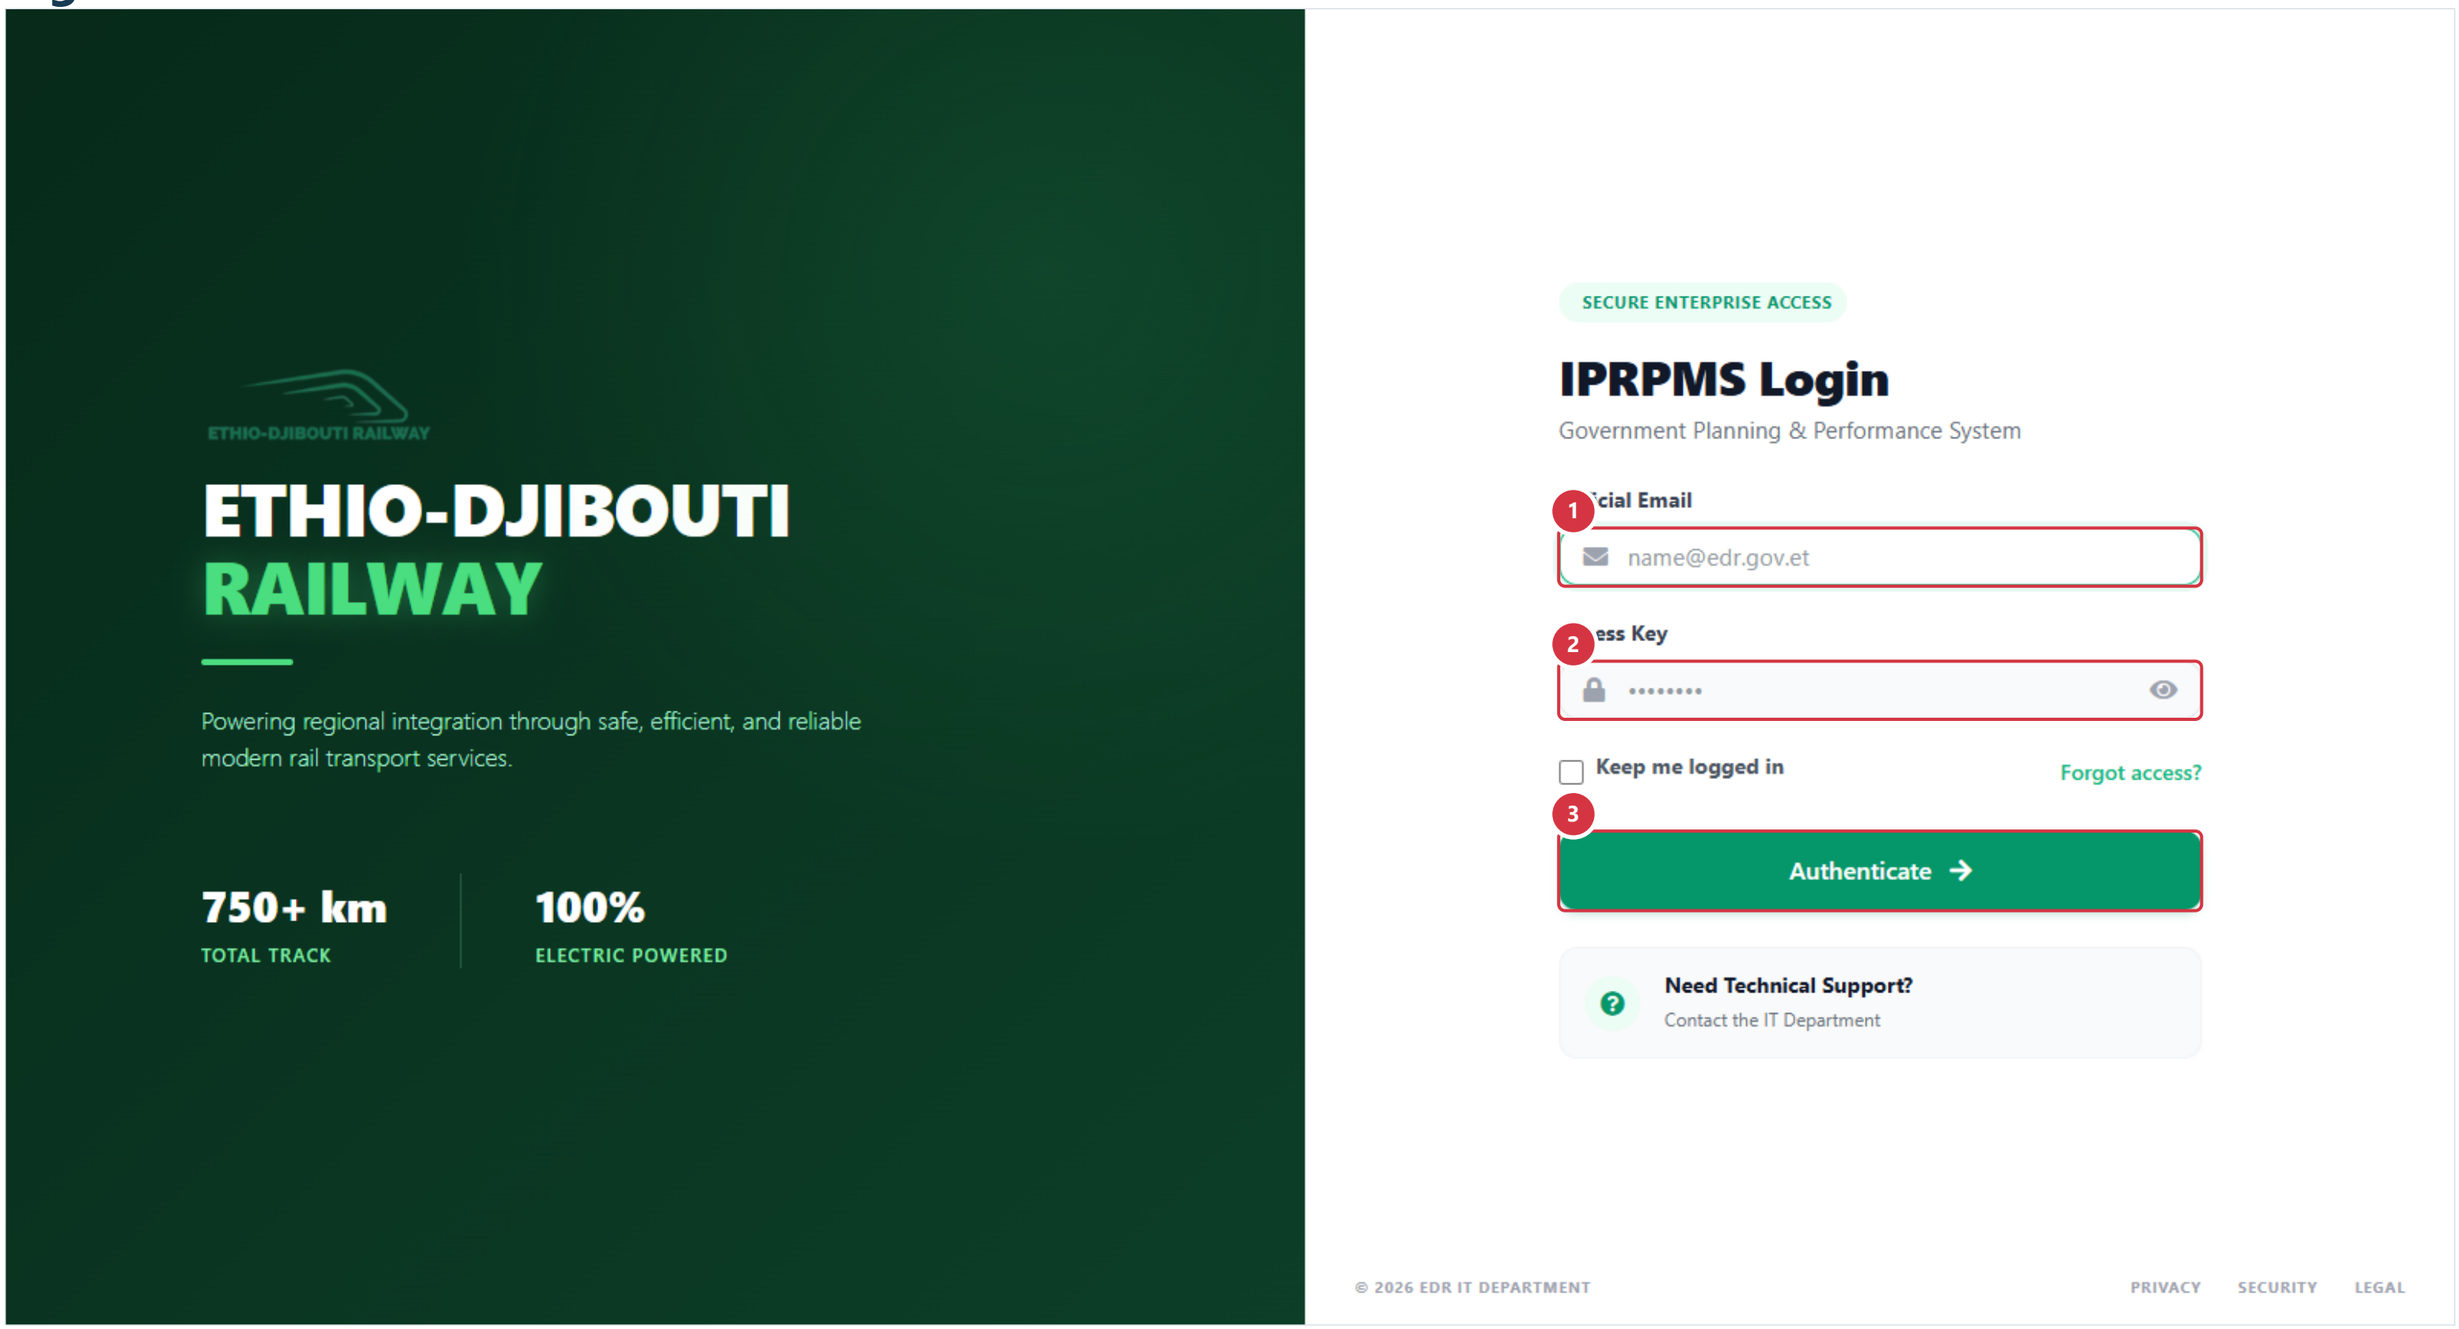

What to check

Check the name and role at the top right. Change your temporary password when prompted. Your profile is for your own name, email and password; department and role changes belong to the administrator.

How you know it worked

You can open the dashboard with the correct account. The notification bell shows work sent to you. On a shared computer, sign out when finished and do not choose Keep me logged in.

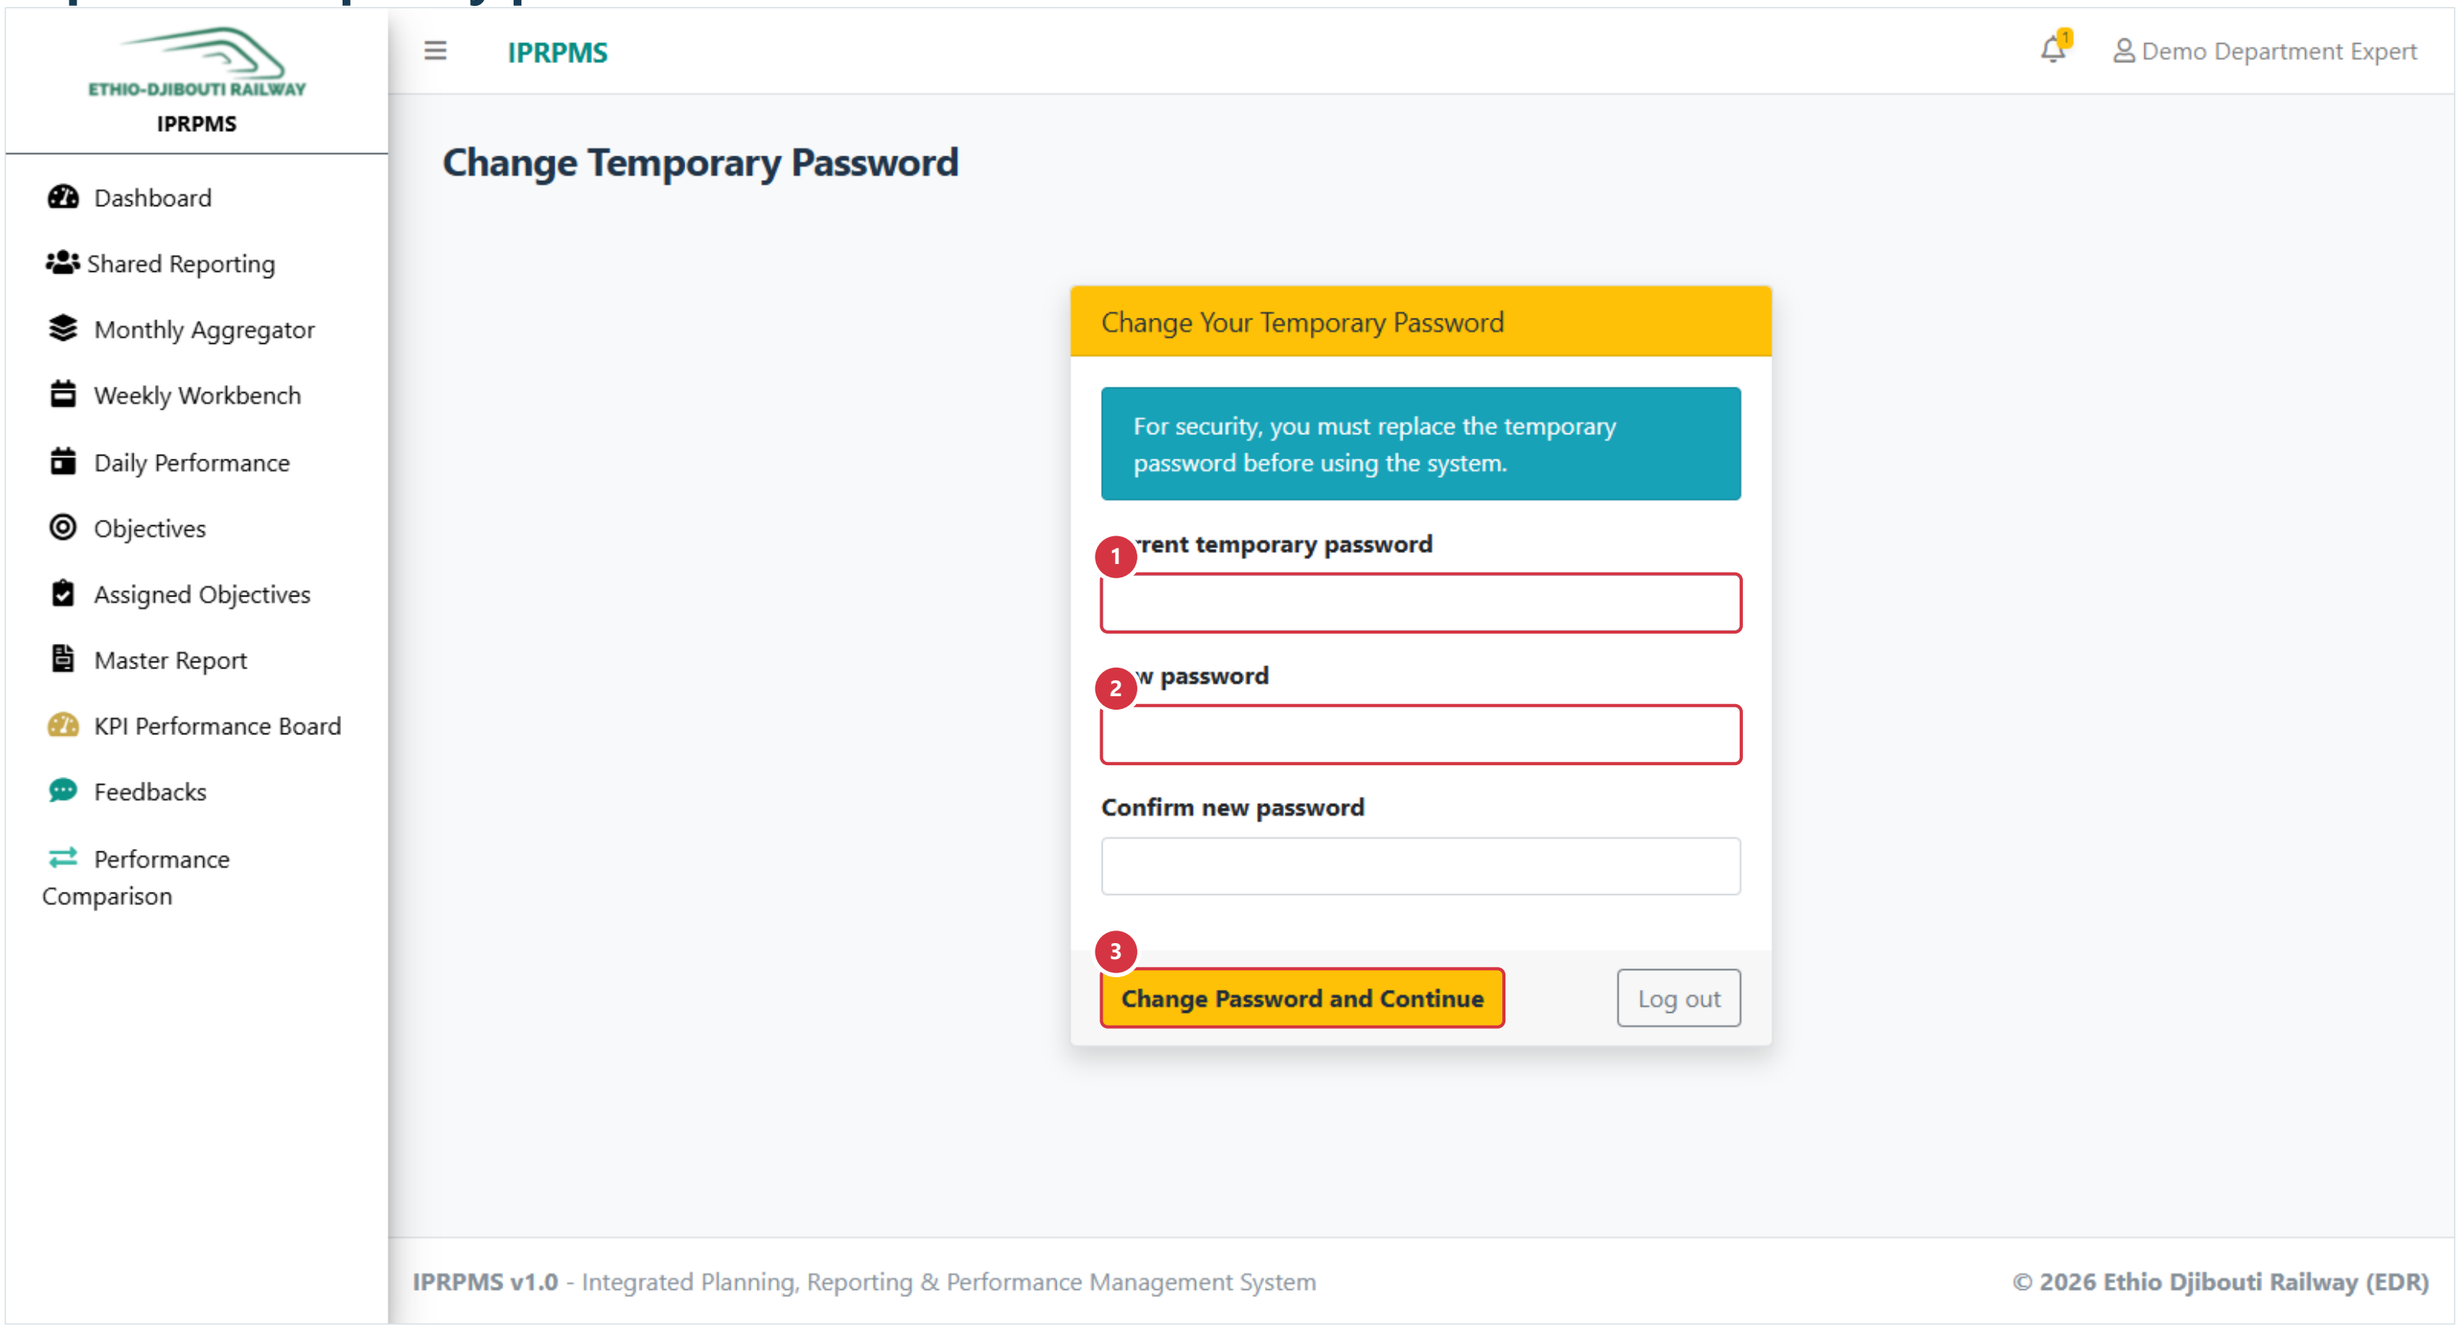

Sign in to IPRPMS

1. Enter your official email in Official Email.
2. Enter your own access key in Access Key.
3. Select Keep me logged in only on your own device, then click Authenticate.

After this step: The dashboard opens after authentication. Password fields in this handbook remain blank.

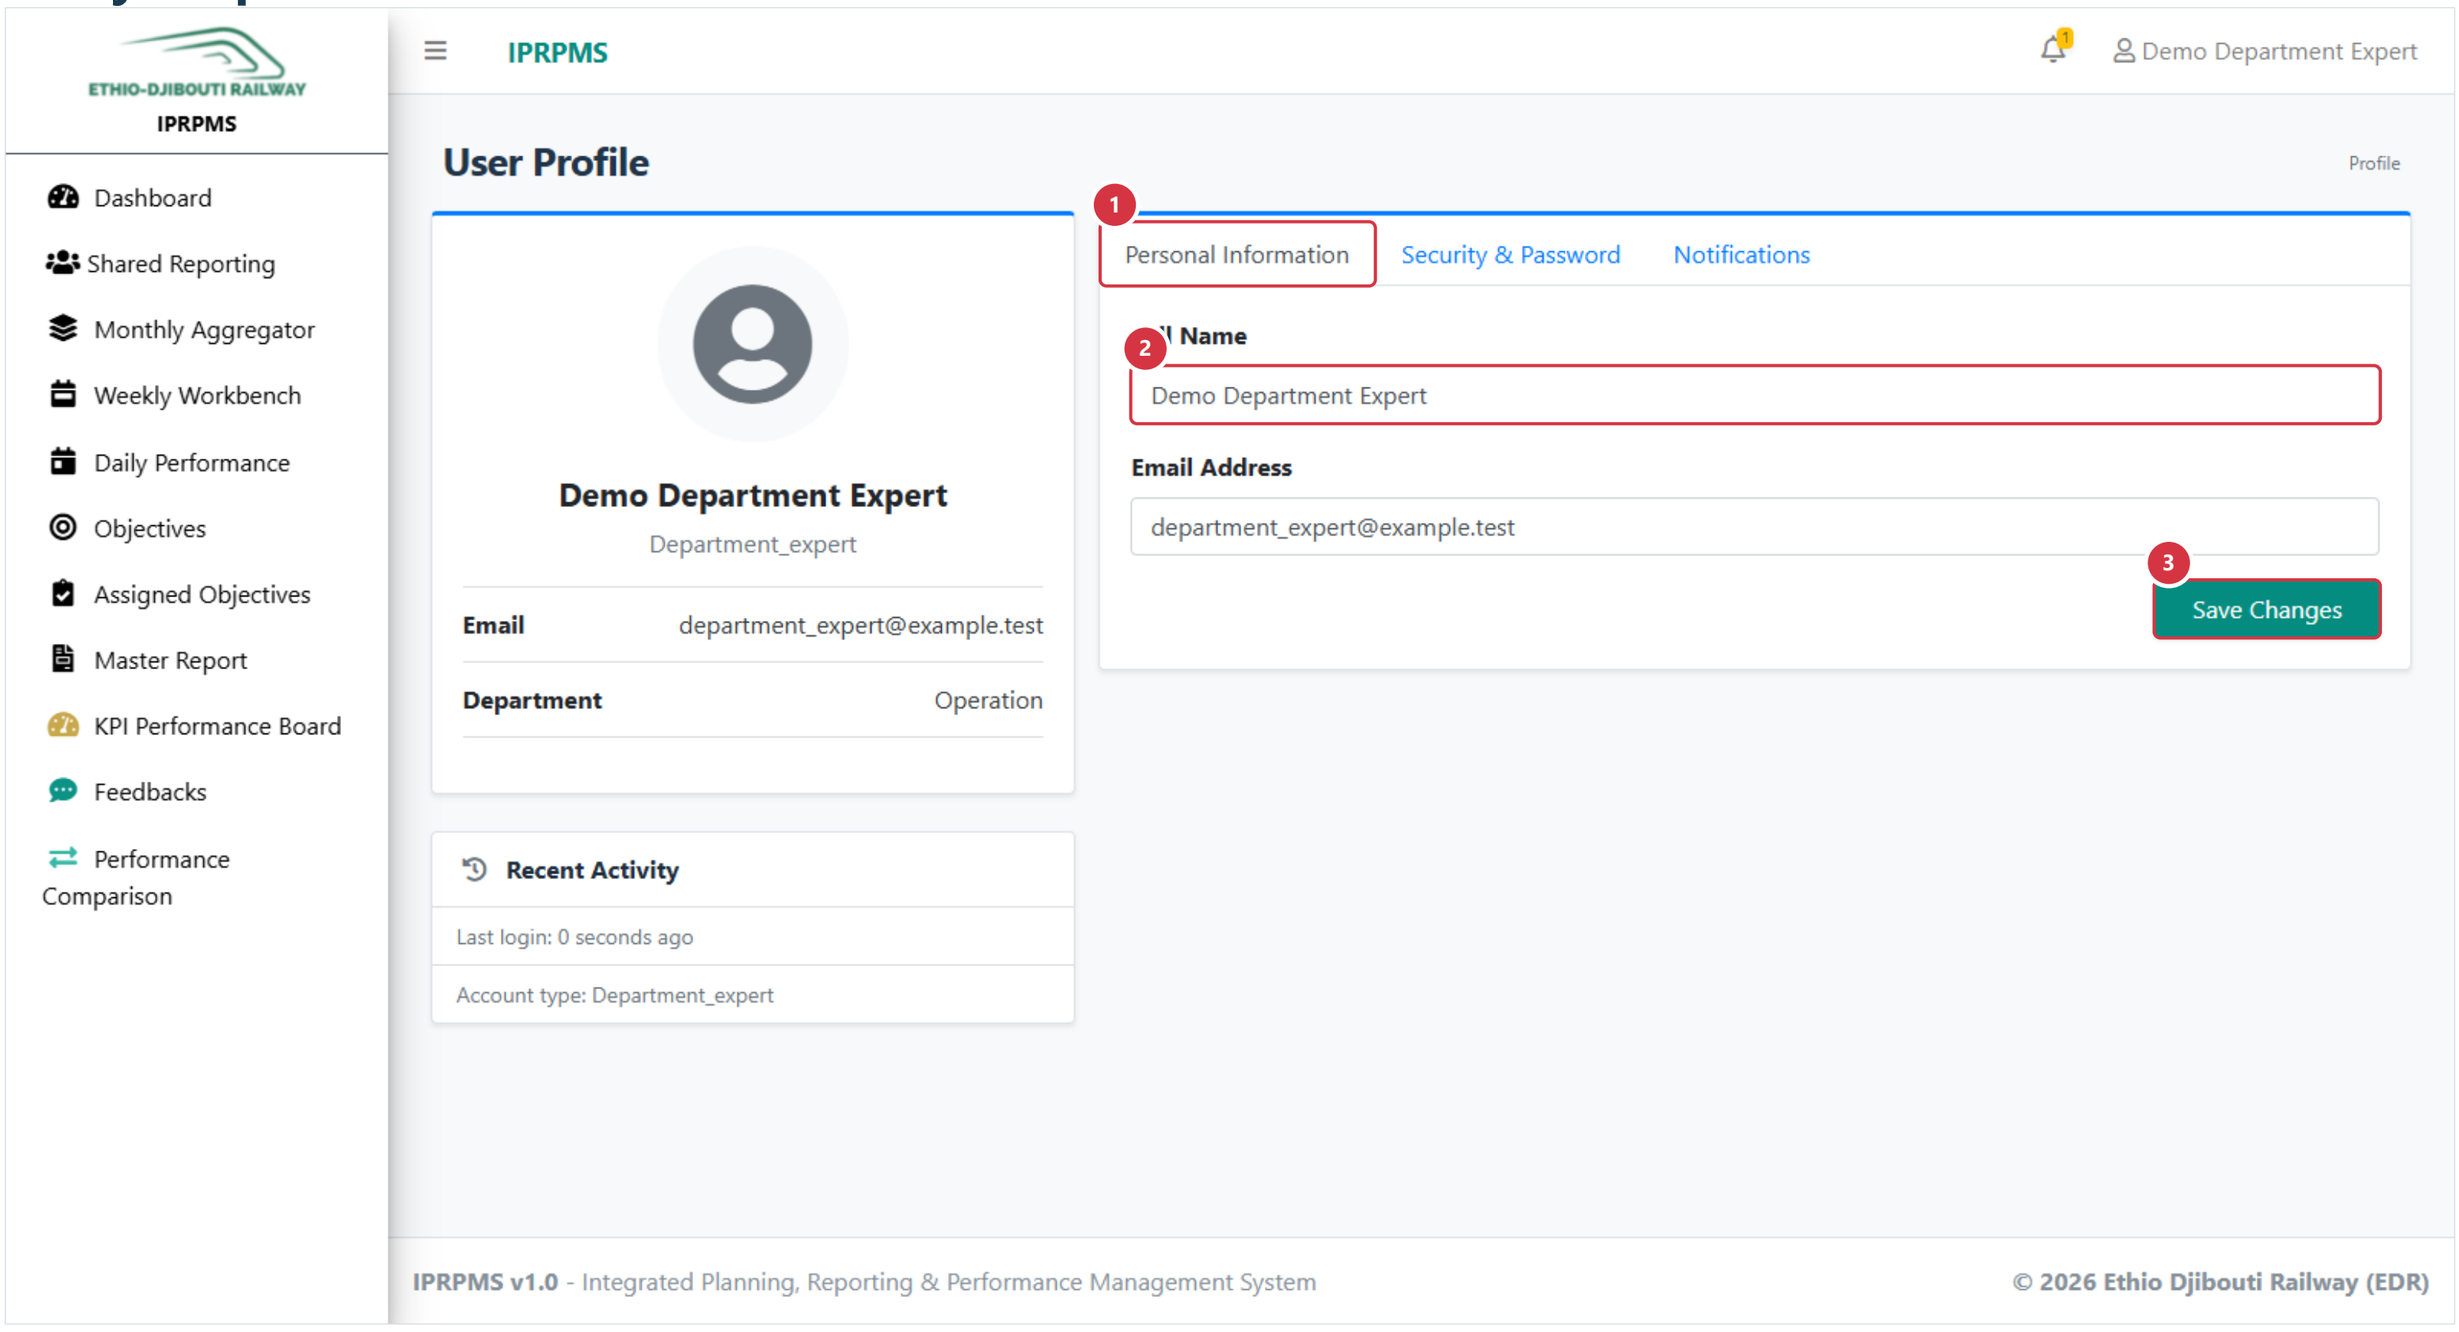

Replace a temporary password

1. Enter the current temporary password.
2. Enter a new private password and repeat it in Confirm new password.
3. Click Change Password and Continue.

After this step: This screen appears when the administrator requires a first password change.

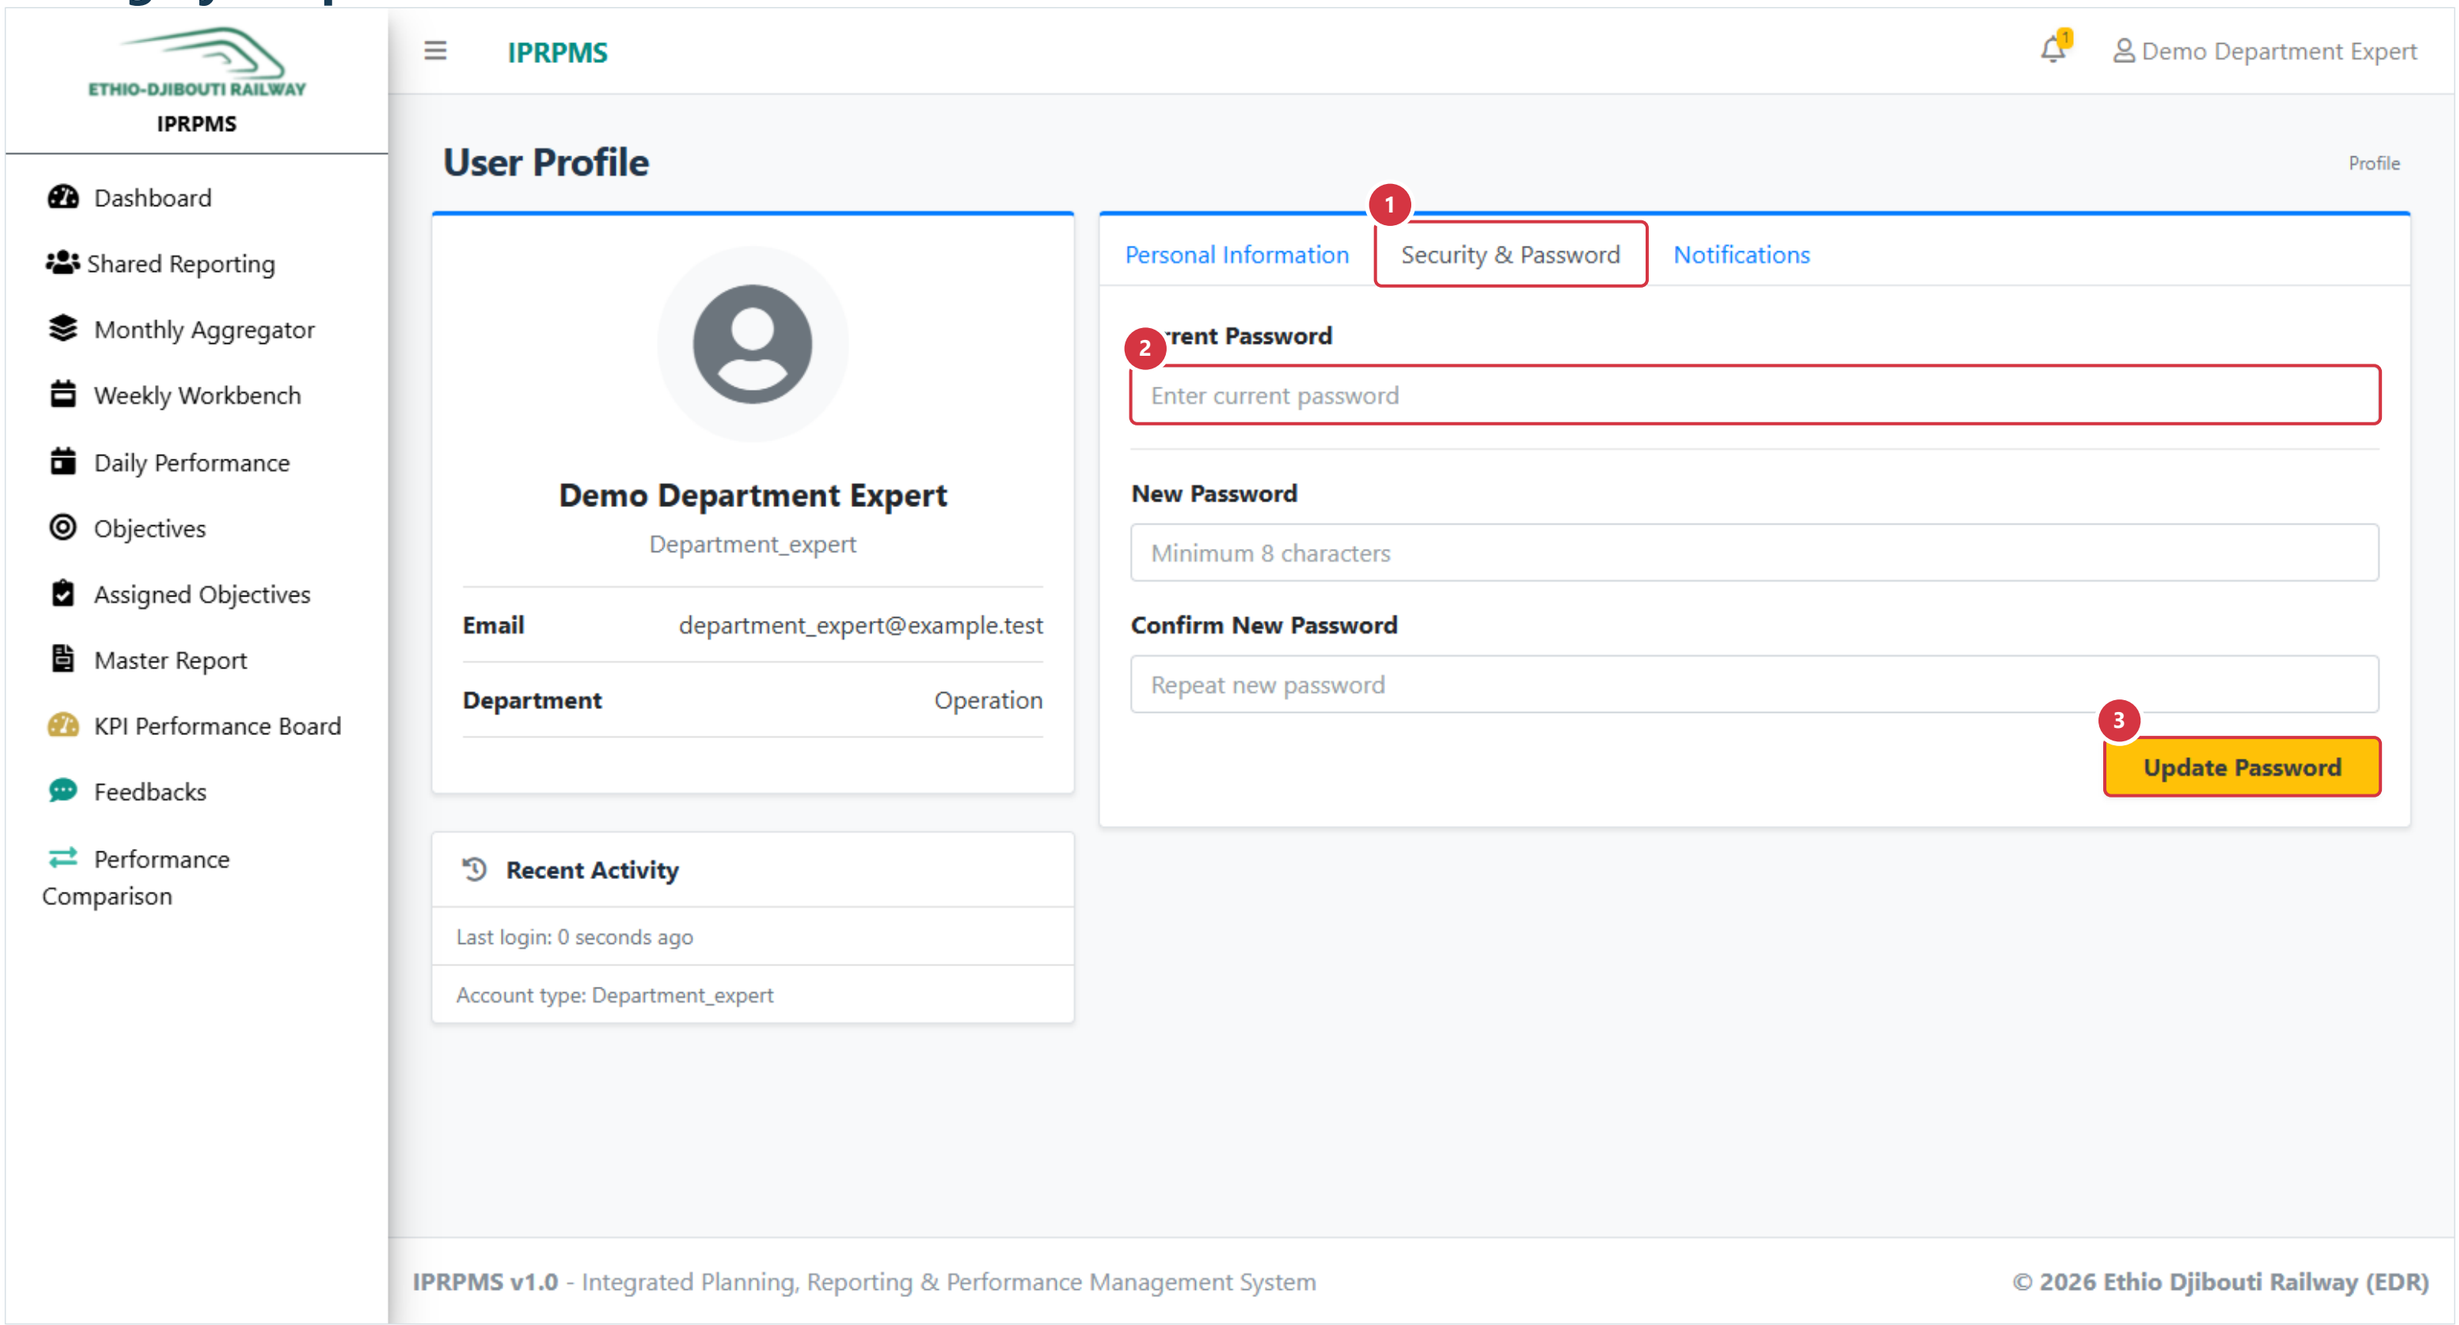

Edit your personal information

1. Click Personal Information in Profile.
2. Update Full Name or Email Address.
3. Click Save Changes and confirm the success message.

After this step: Department and role assignments are managed by the administrator, not through this form.

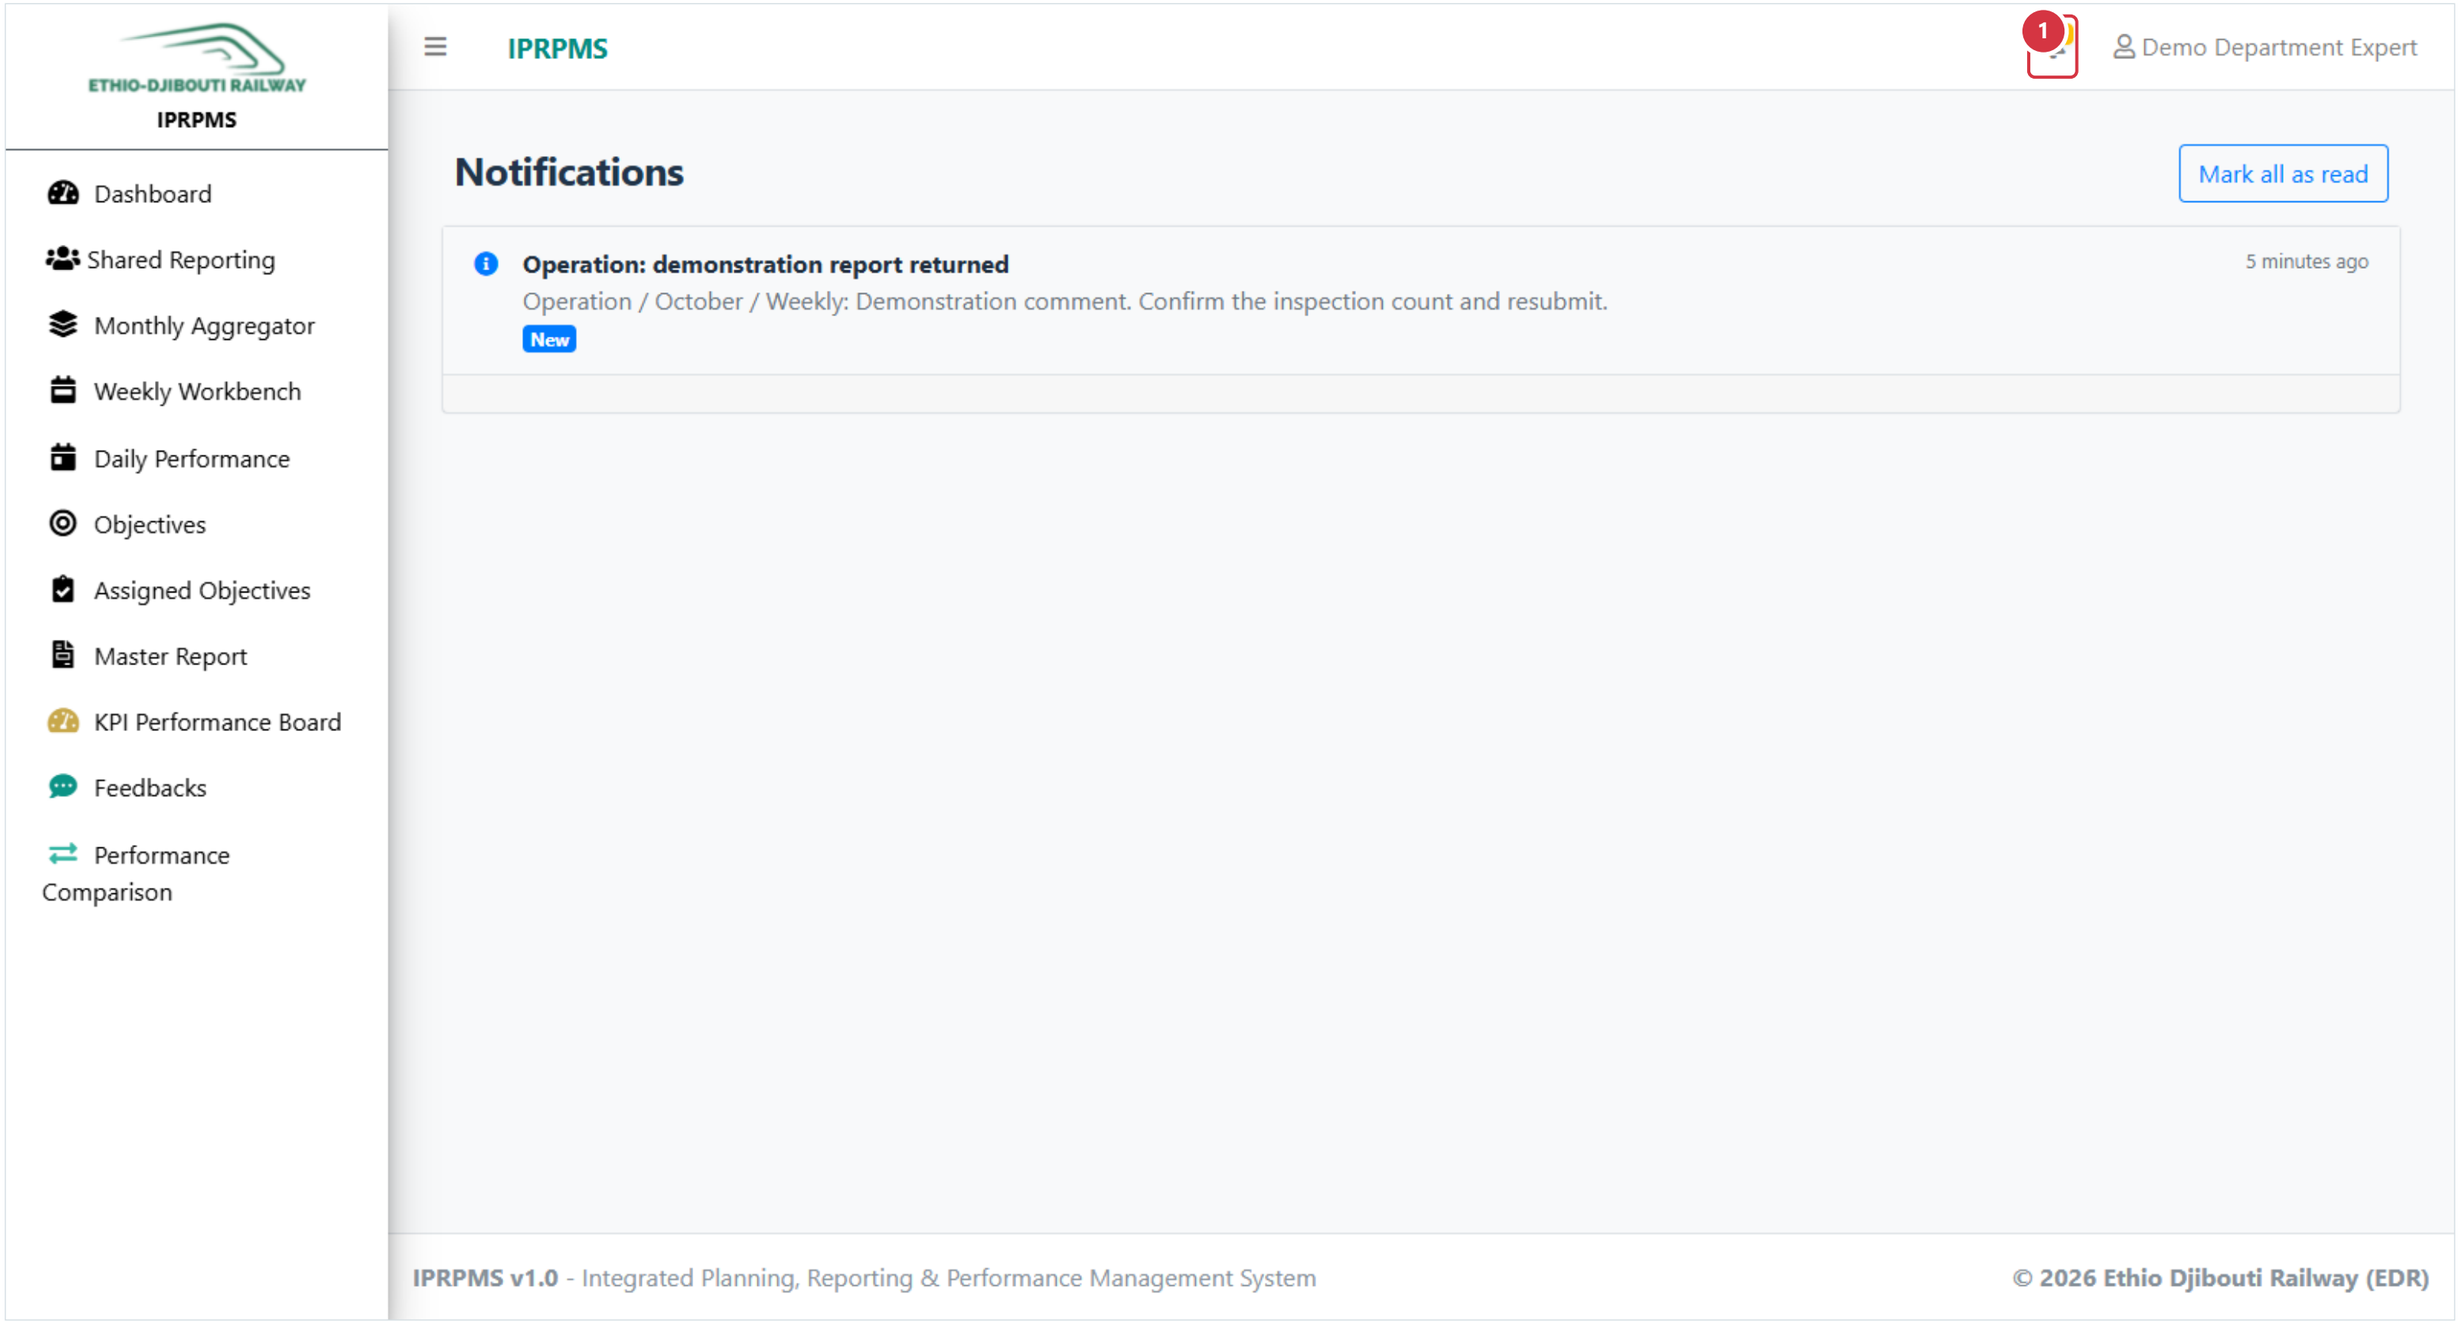

Change your password

1. Click Security & Password.
2. Enter your current password, a new password and its confirmation.
3. Click Update Password.

After this step: Use a private password. The fields are deliberately empty in this training capture.

Read workflow notifications

1. Open the notification bell or Notifications page.
2. Read the department, period, action and review comment.
3. Open the linked record or mark the notice read after acting on it.

After this step: Marking a notification read does not approve, correct or submit the underlying record.

Review the submitted objective hierarchy

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

Check the Expert's main and sub objectives before the plan reaches the Chief.

Before you click

Open Objectives and expand the submitted hierarchy. Read targets, units, periods, weights and performers.

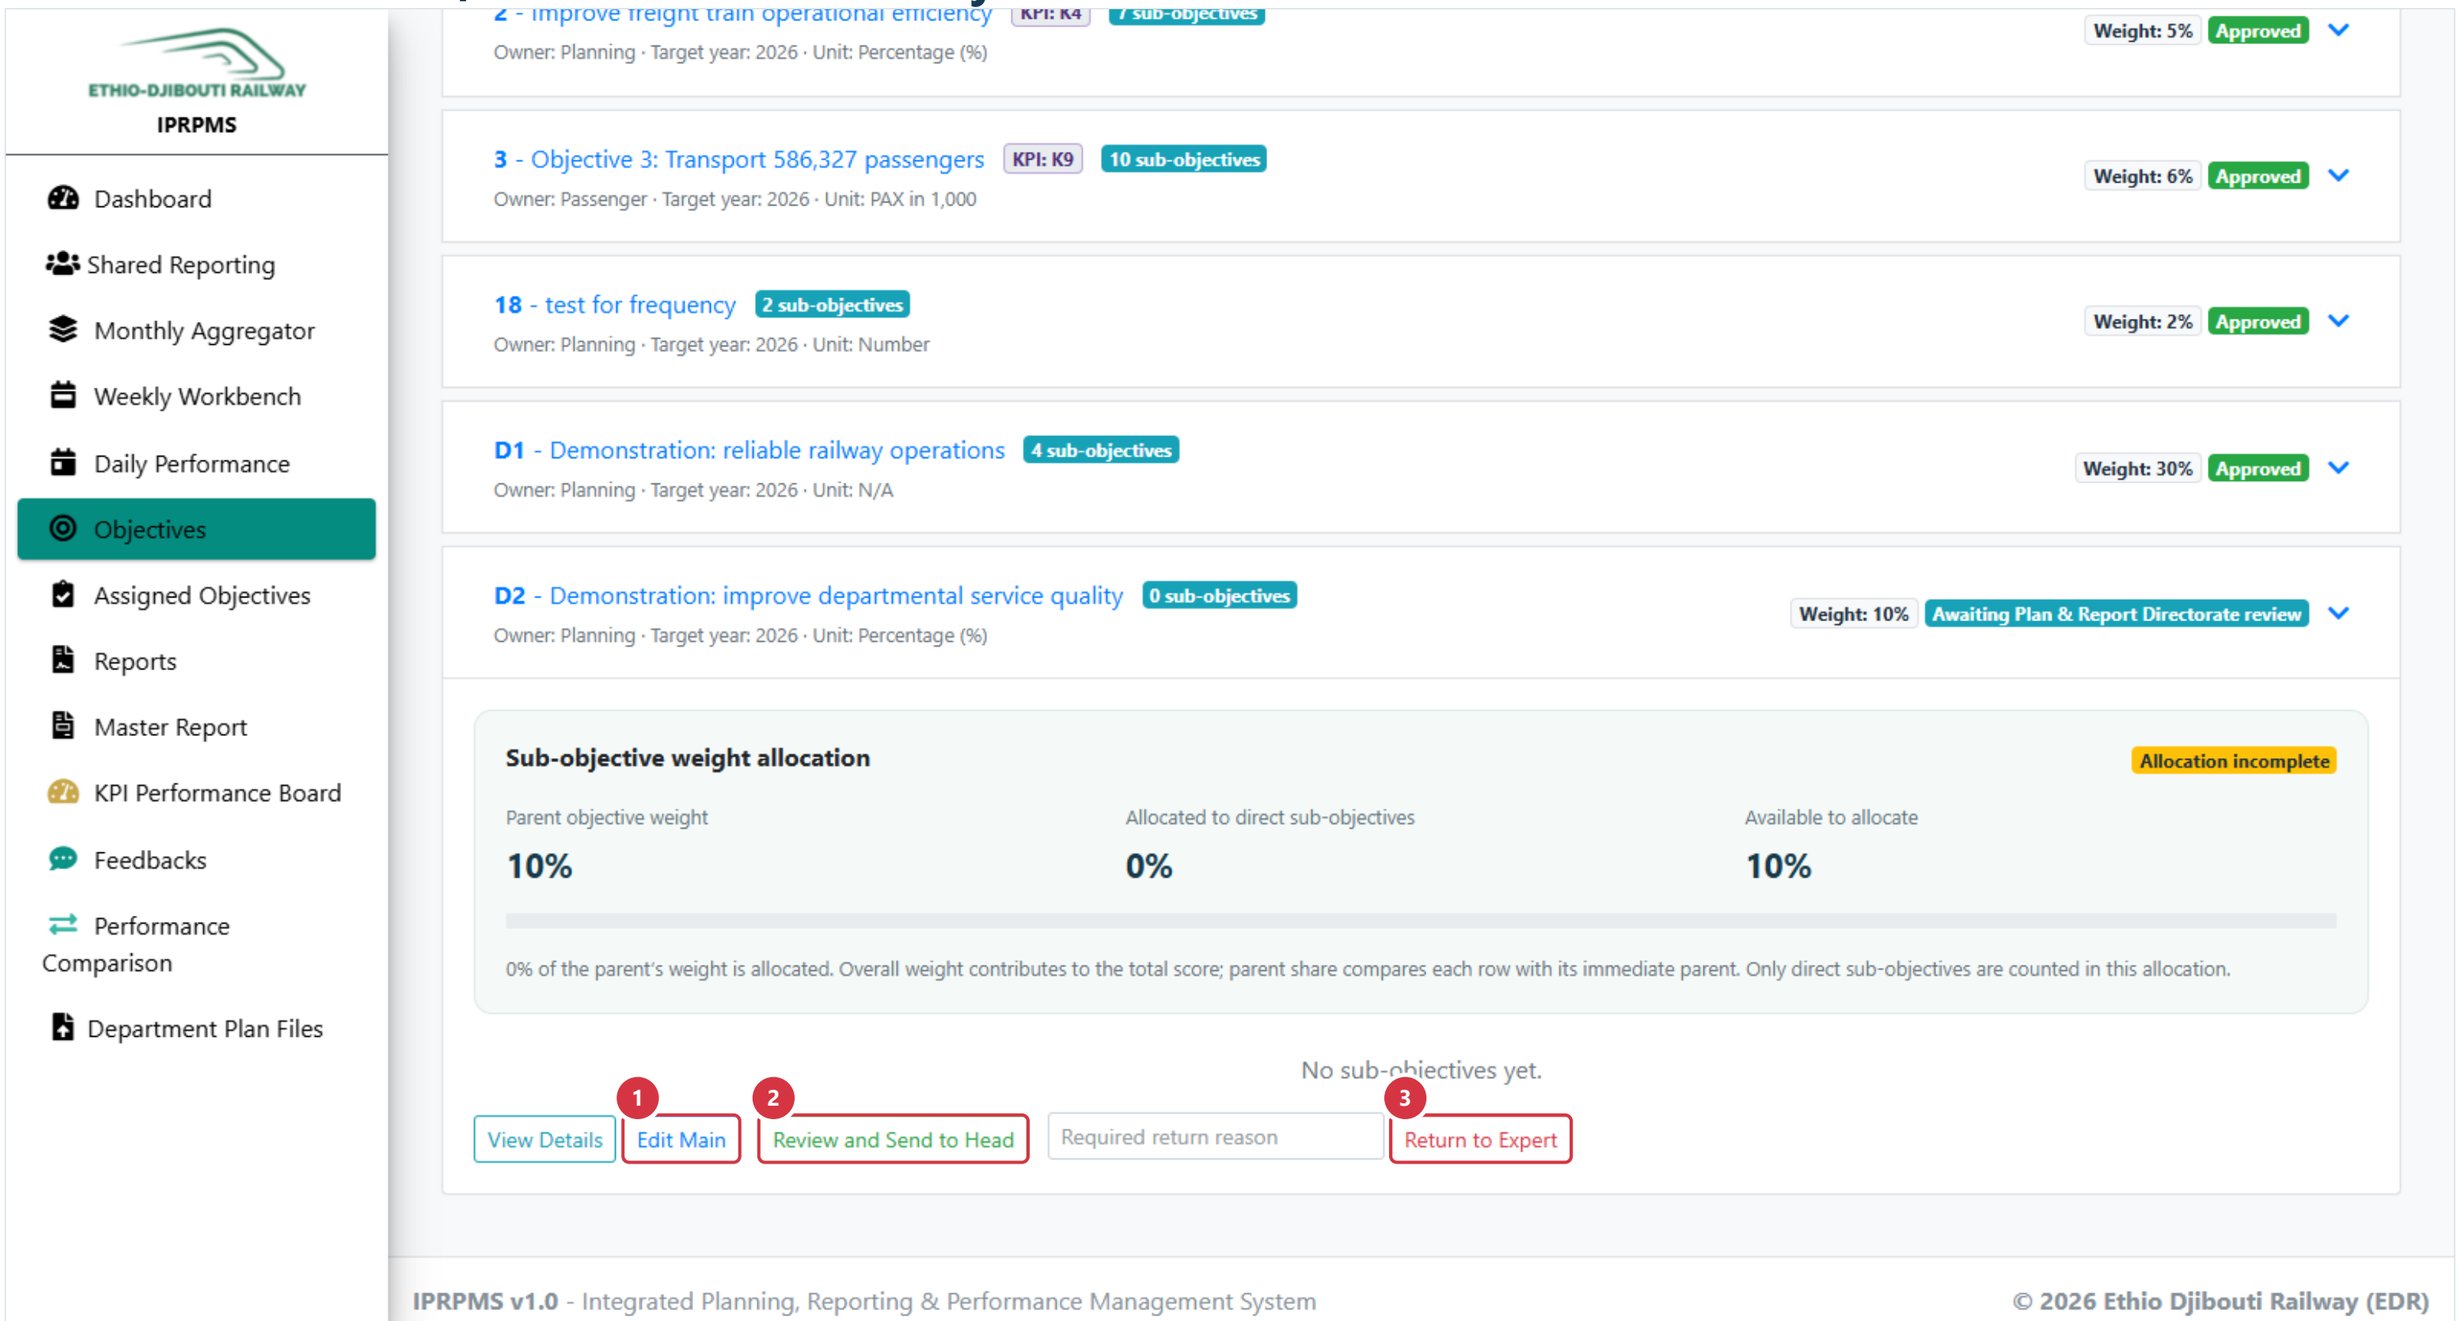

What to check

Use Edit Main for a permitted correction and explain the reviewer change. Use Return to Expert with a required return reason if preparation is incomplete.

How you know it worked

Click Review and Send to Head for correct work. The Chief receives the hierarchy for the final planning decision.

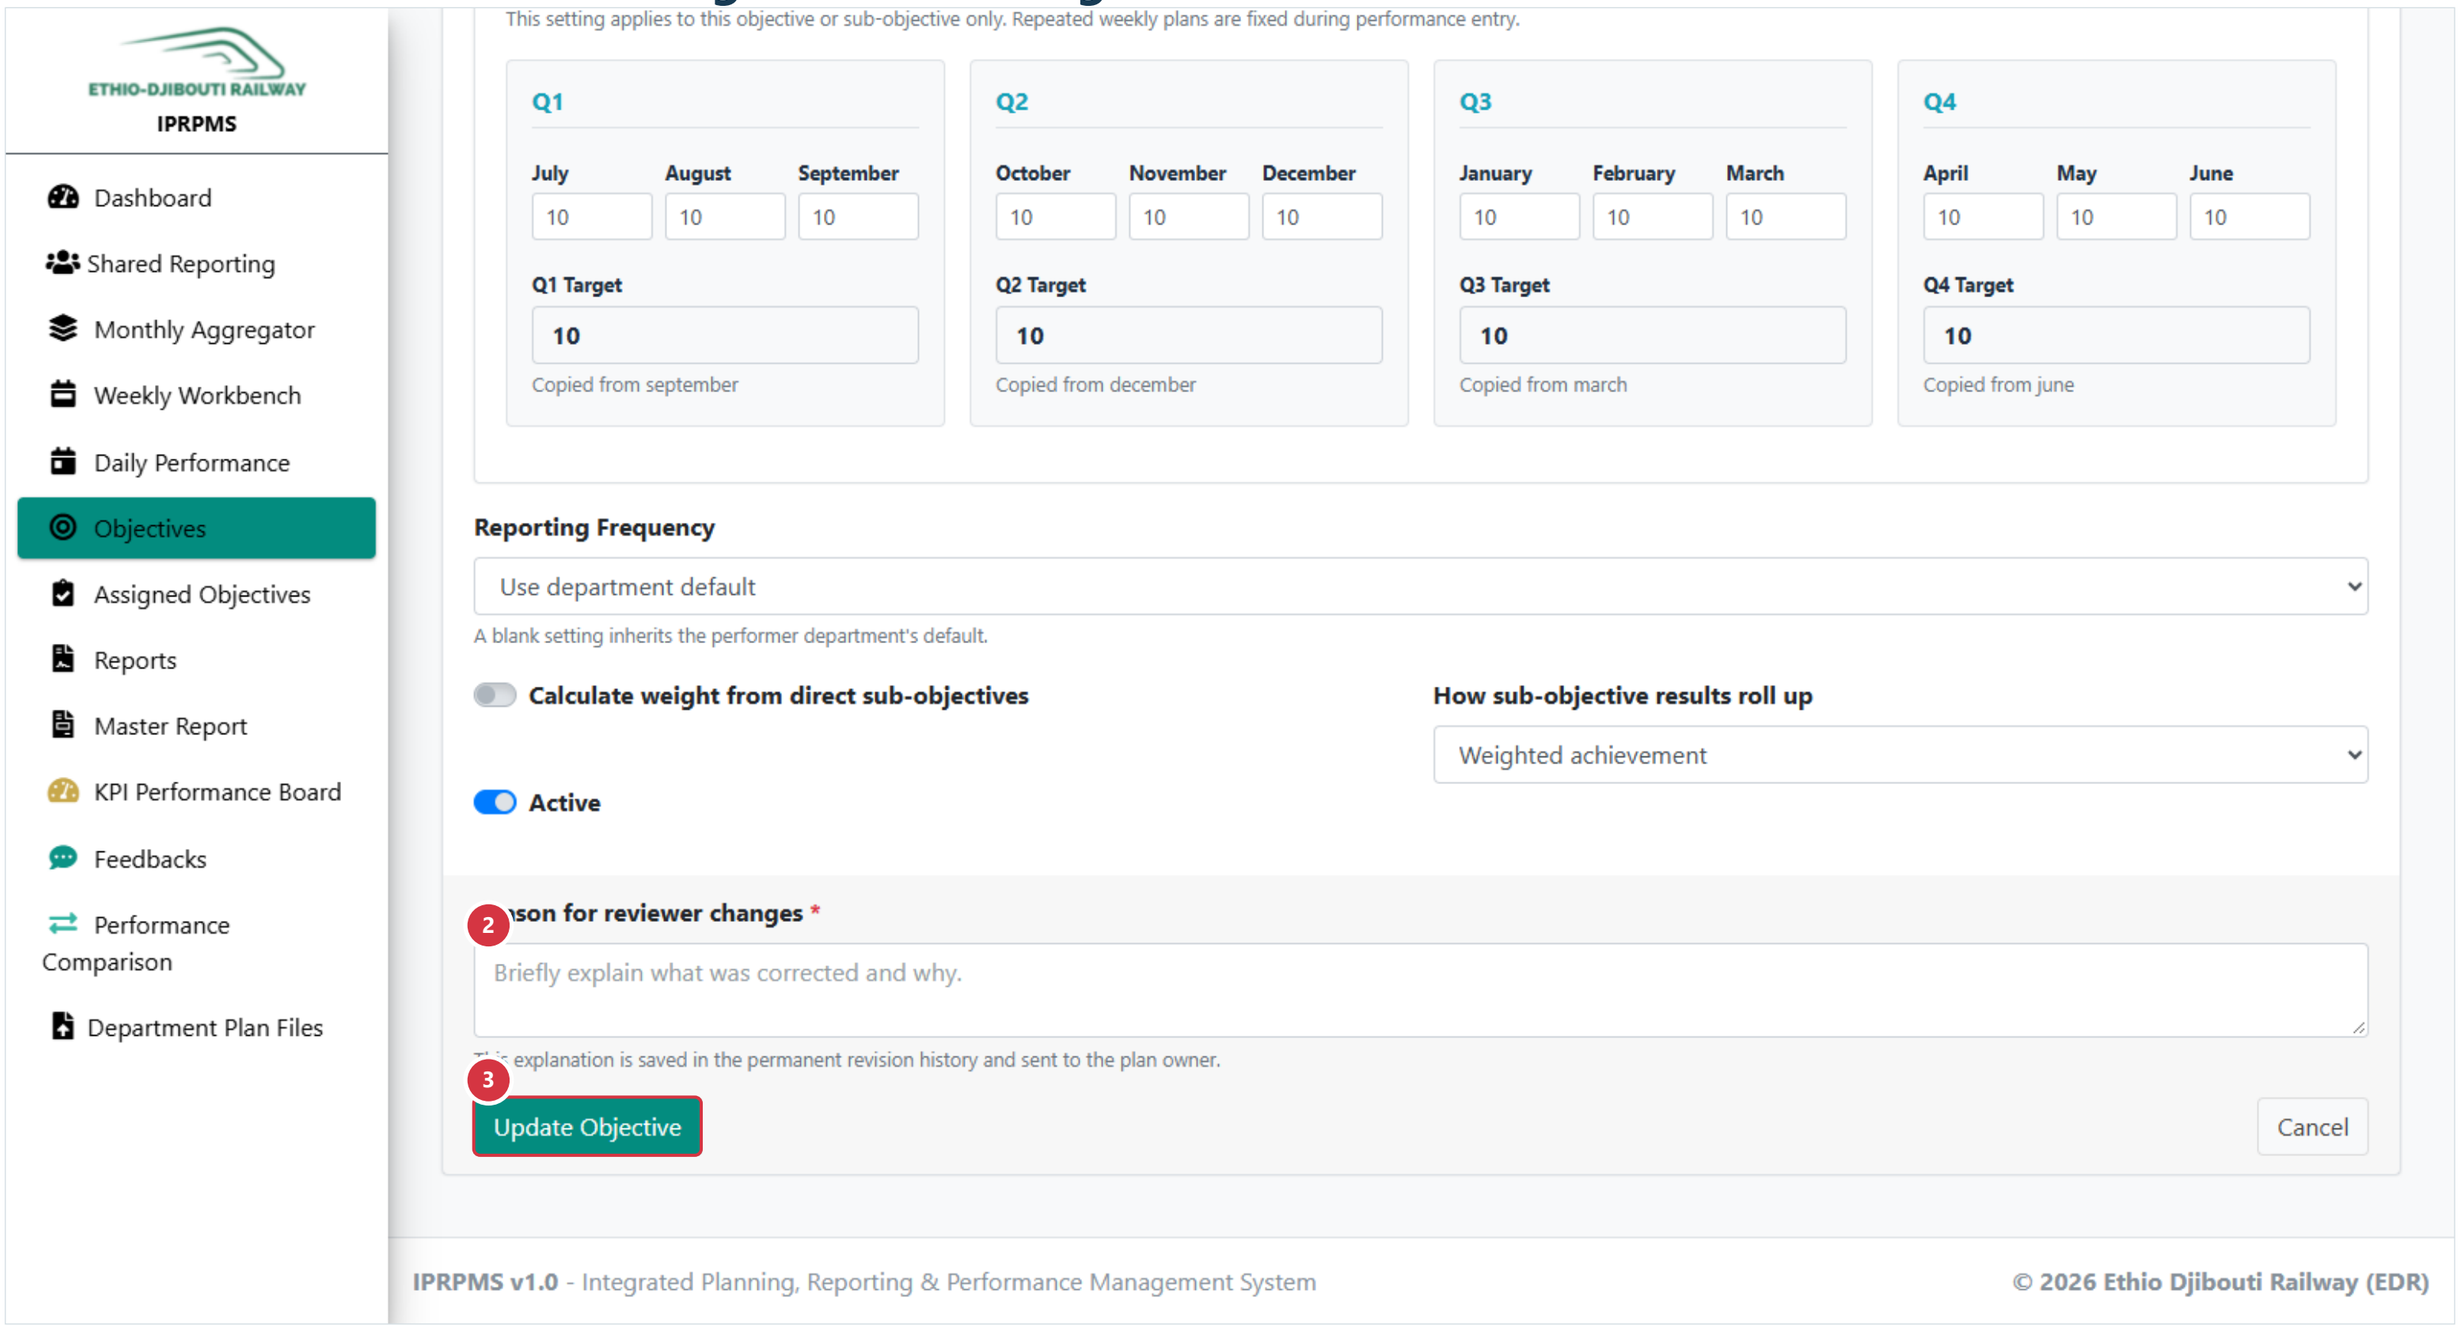

Directorate: review, edit or return the objective

1. Use Edit Main when the submitted objective needs a permitted correction.
2. Click Review and Send to Head when it is ready.
3. To return it, enter a Required return reason and click Return to Expert.

After this step: The Directorate uses Objectives for this planning review. Assigned Objectives is the department assignment workflow.

Directorate: document a change before saving

1. Make the required correction in the relevant field.
2. Enter the Reason for reviewer changes.
3. Click Update Objective, then return to the objective list to forward it.

After this step: The change reason records why the reviewer altered the submitted plan.

Review departmental performance and correction requests

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

Your review checks both the department's results and the Plan and Report Expert's recommendation.

Before you click

Open the shared report at your review stage and verify department, year and period.

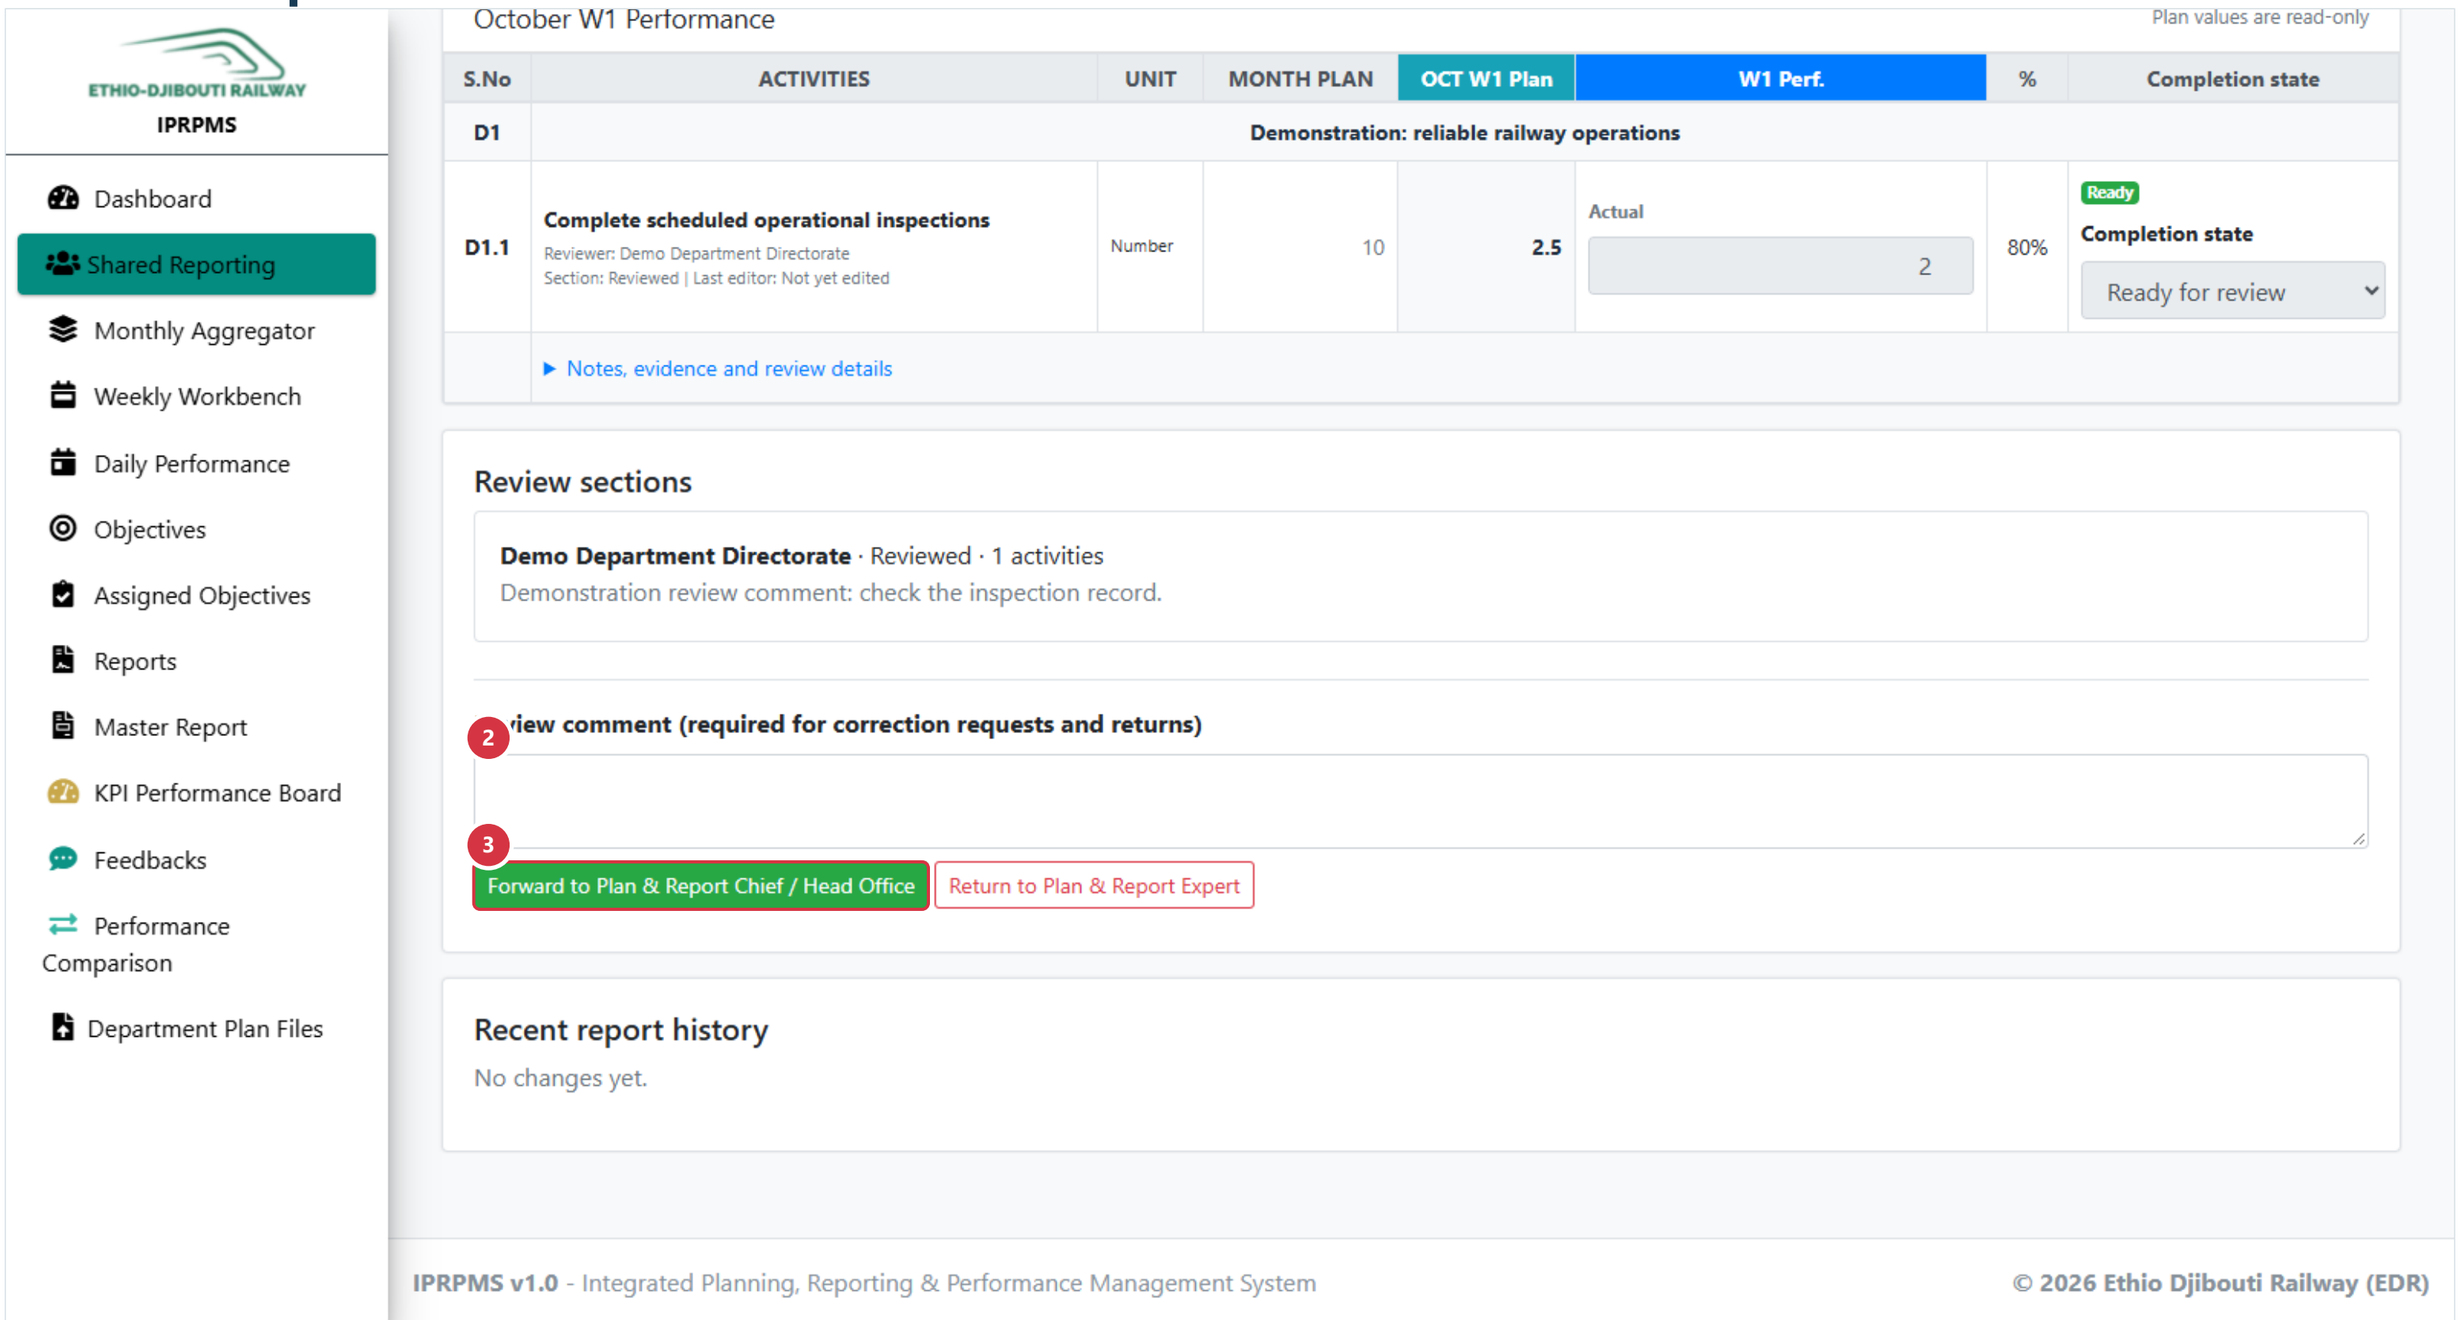

What to check

Read the evidence and Expert comment. A correction request must identify the needed change; do not forward a vague instruction such as fix the figures.

How you know it worked

Click Forward to Plan & Report Chief / Head Office. If the Expert review needs correction, use Return to Plan & Report Expert.

Plan and Report Directorate: forward for final decision

1. Review the department report and Expert comment.
2. Enter a Review comment where needed.
3. Click Forward to Plan & Report Chief / Head Office.

After this step: If the Expert needs to revise the review, use Return to Plan & Report Expert.

Review the proposed period-weight distribution

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

The distribution affects period scoring and must be checked separately from actual performance.

Before you click

Use the same department, year and period as the Expert's submitted distribution.

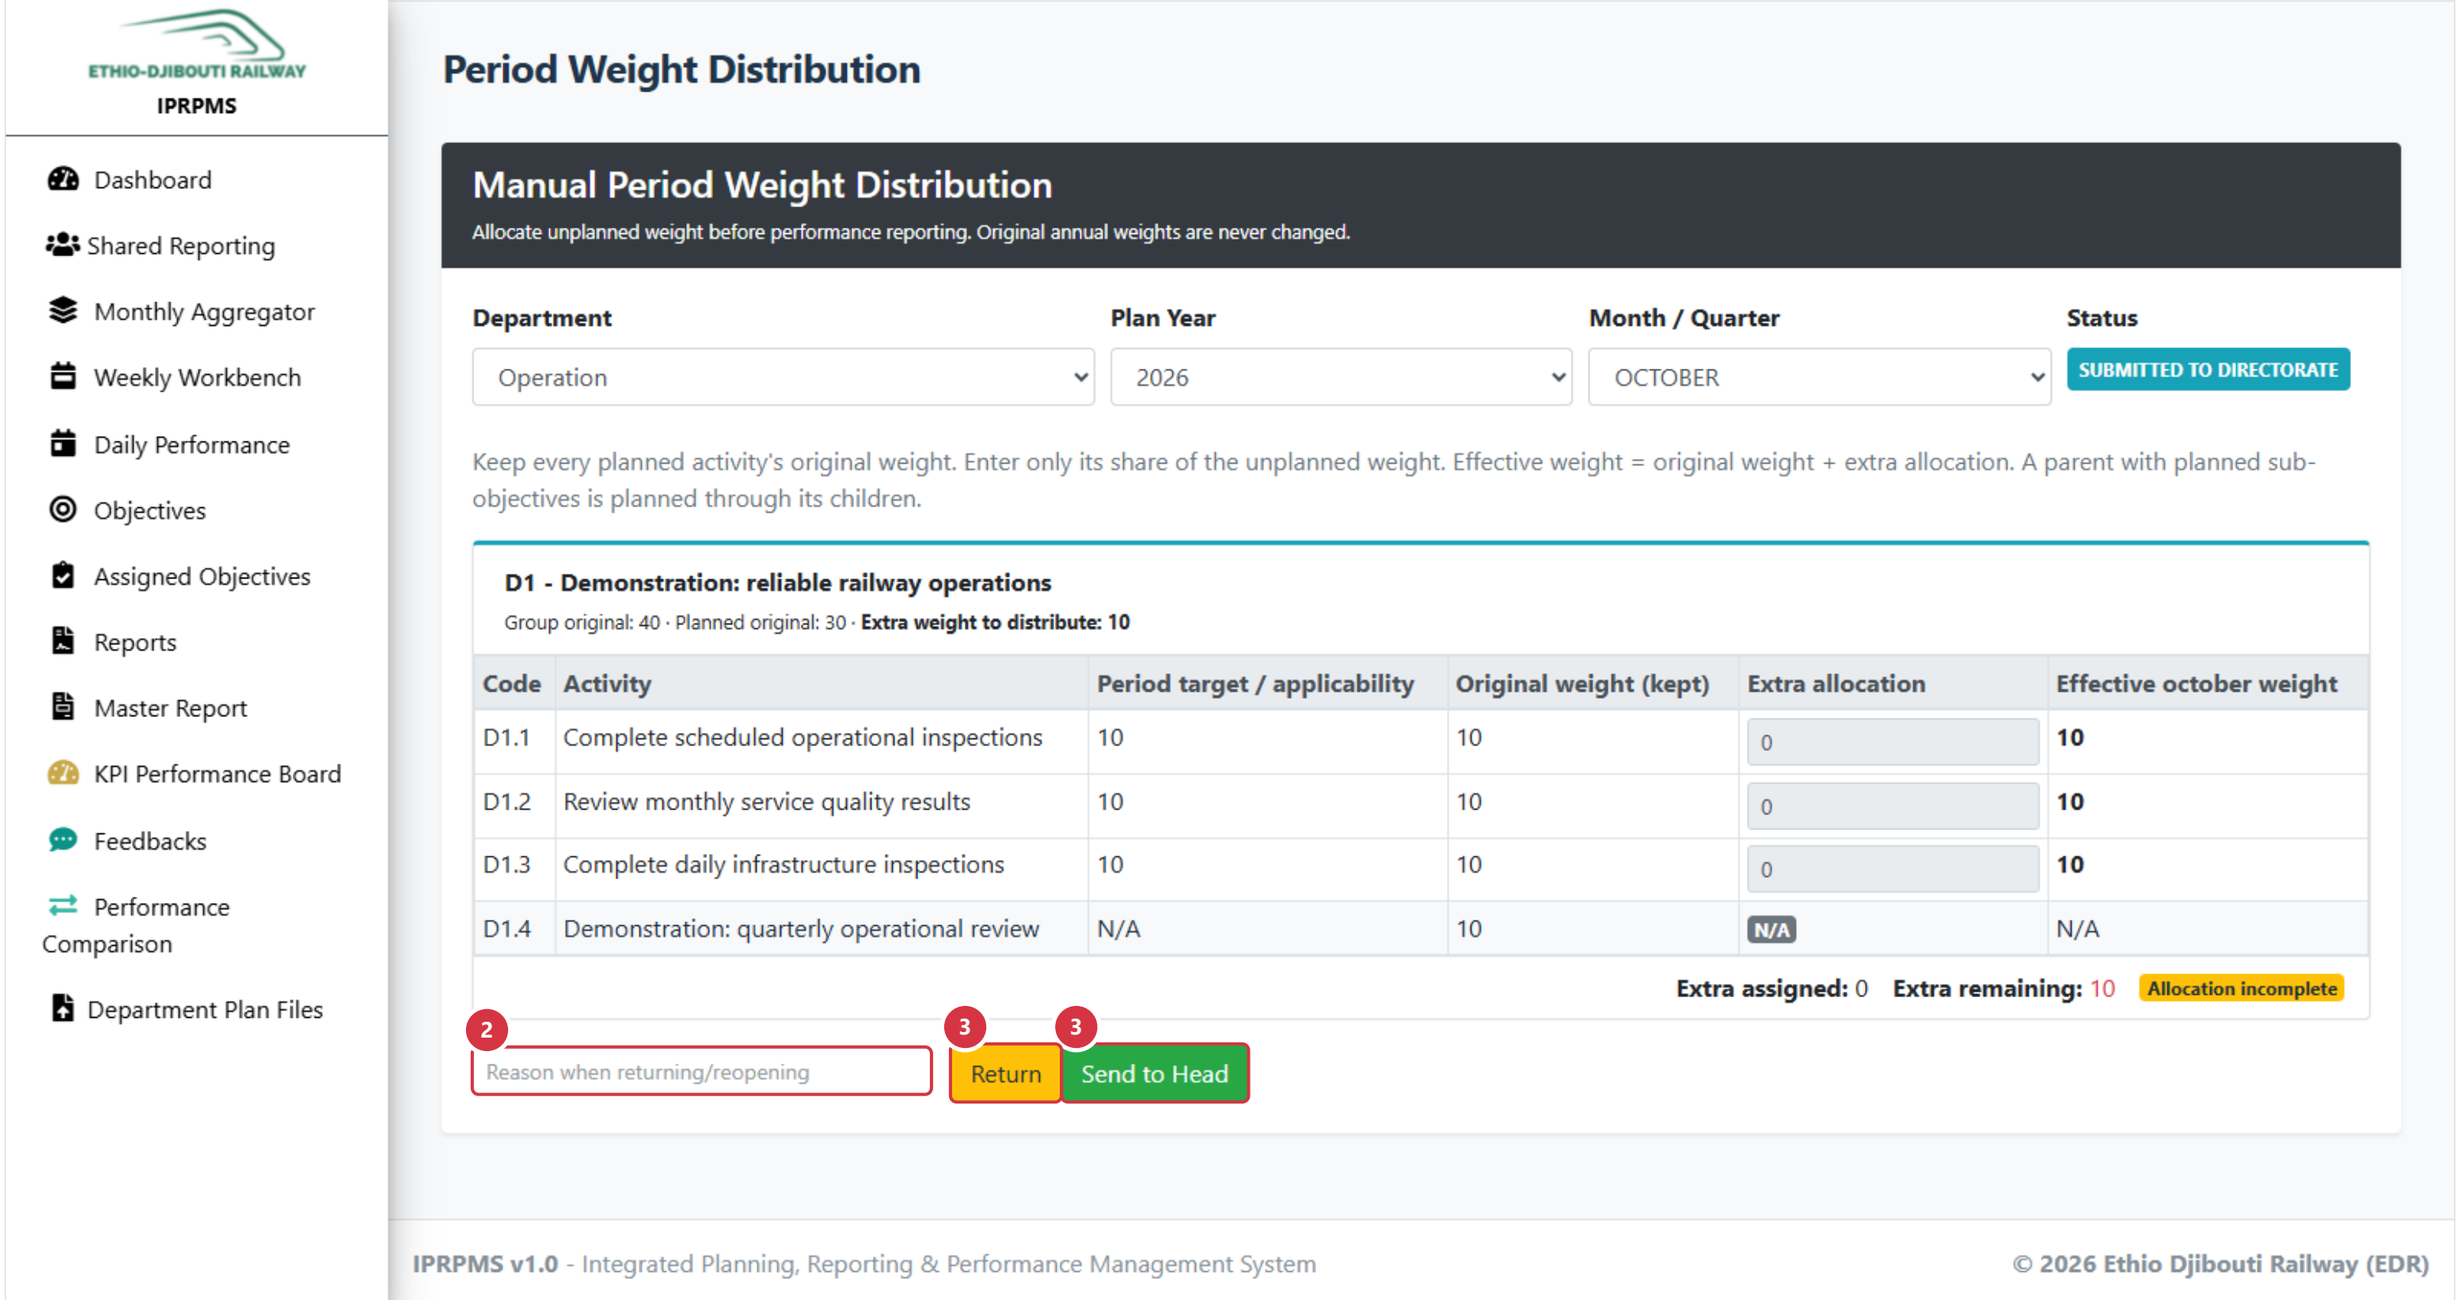

What to check

Check eligibility and available weight. Enter a reason if returning. Do not change the annual objective weights through this period workflow.

How you know it worked

Use Send to Head to forward a correct distribution, or Return for correction. The Chief approves and locks it.

Period Weights: Directorate review

1. Review the proposed distribution.
2. Enter a reason when returning it.
3. Click Send to Head, or Return for correction.

After this step: The Chief receives the distribution for approval.

Review written reports and feedback

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

Reports explain performance; feedback provides formal improvement advice to departments. Both need a separate document review.

Before you click

Open the submitted record and confirm its department, year and period. Read the figures, comments and annexes before using the list action.

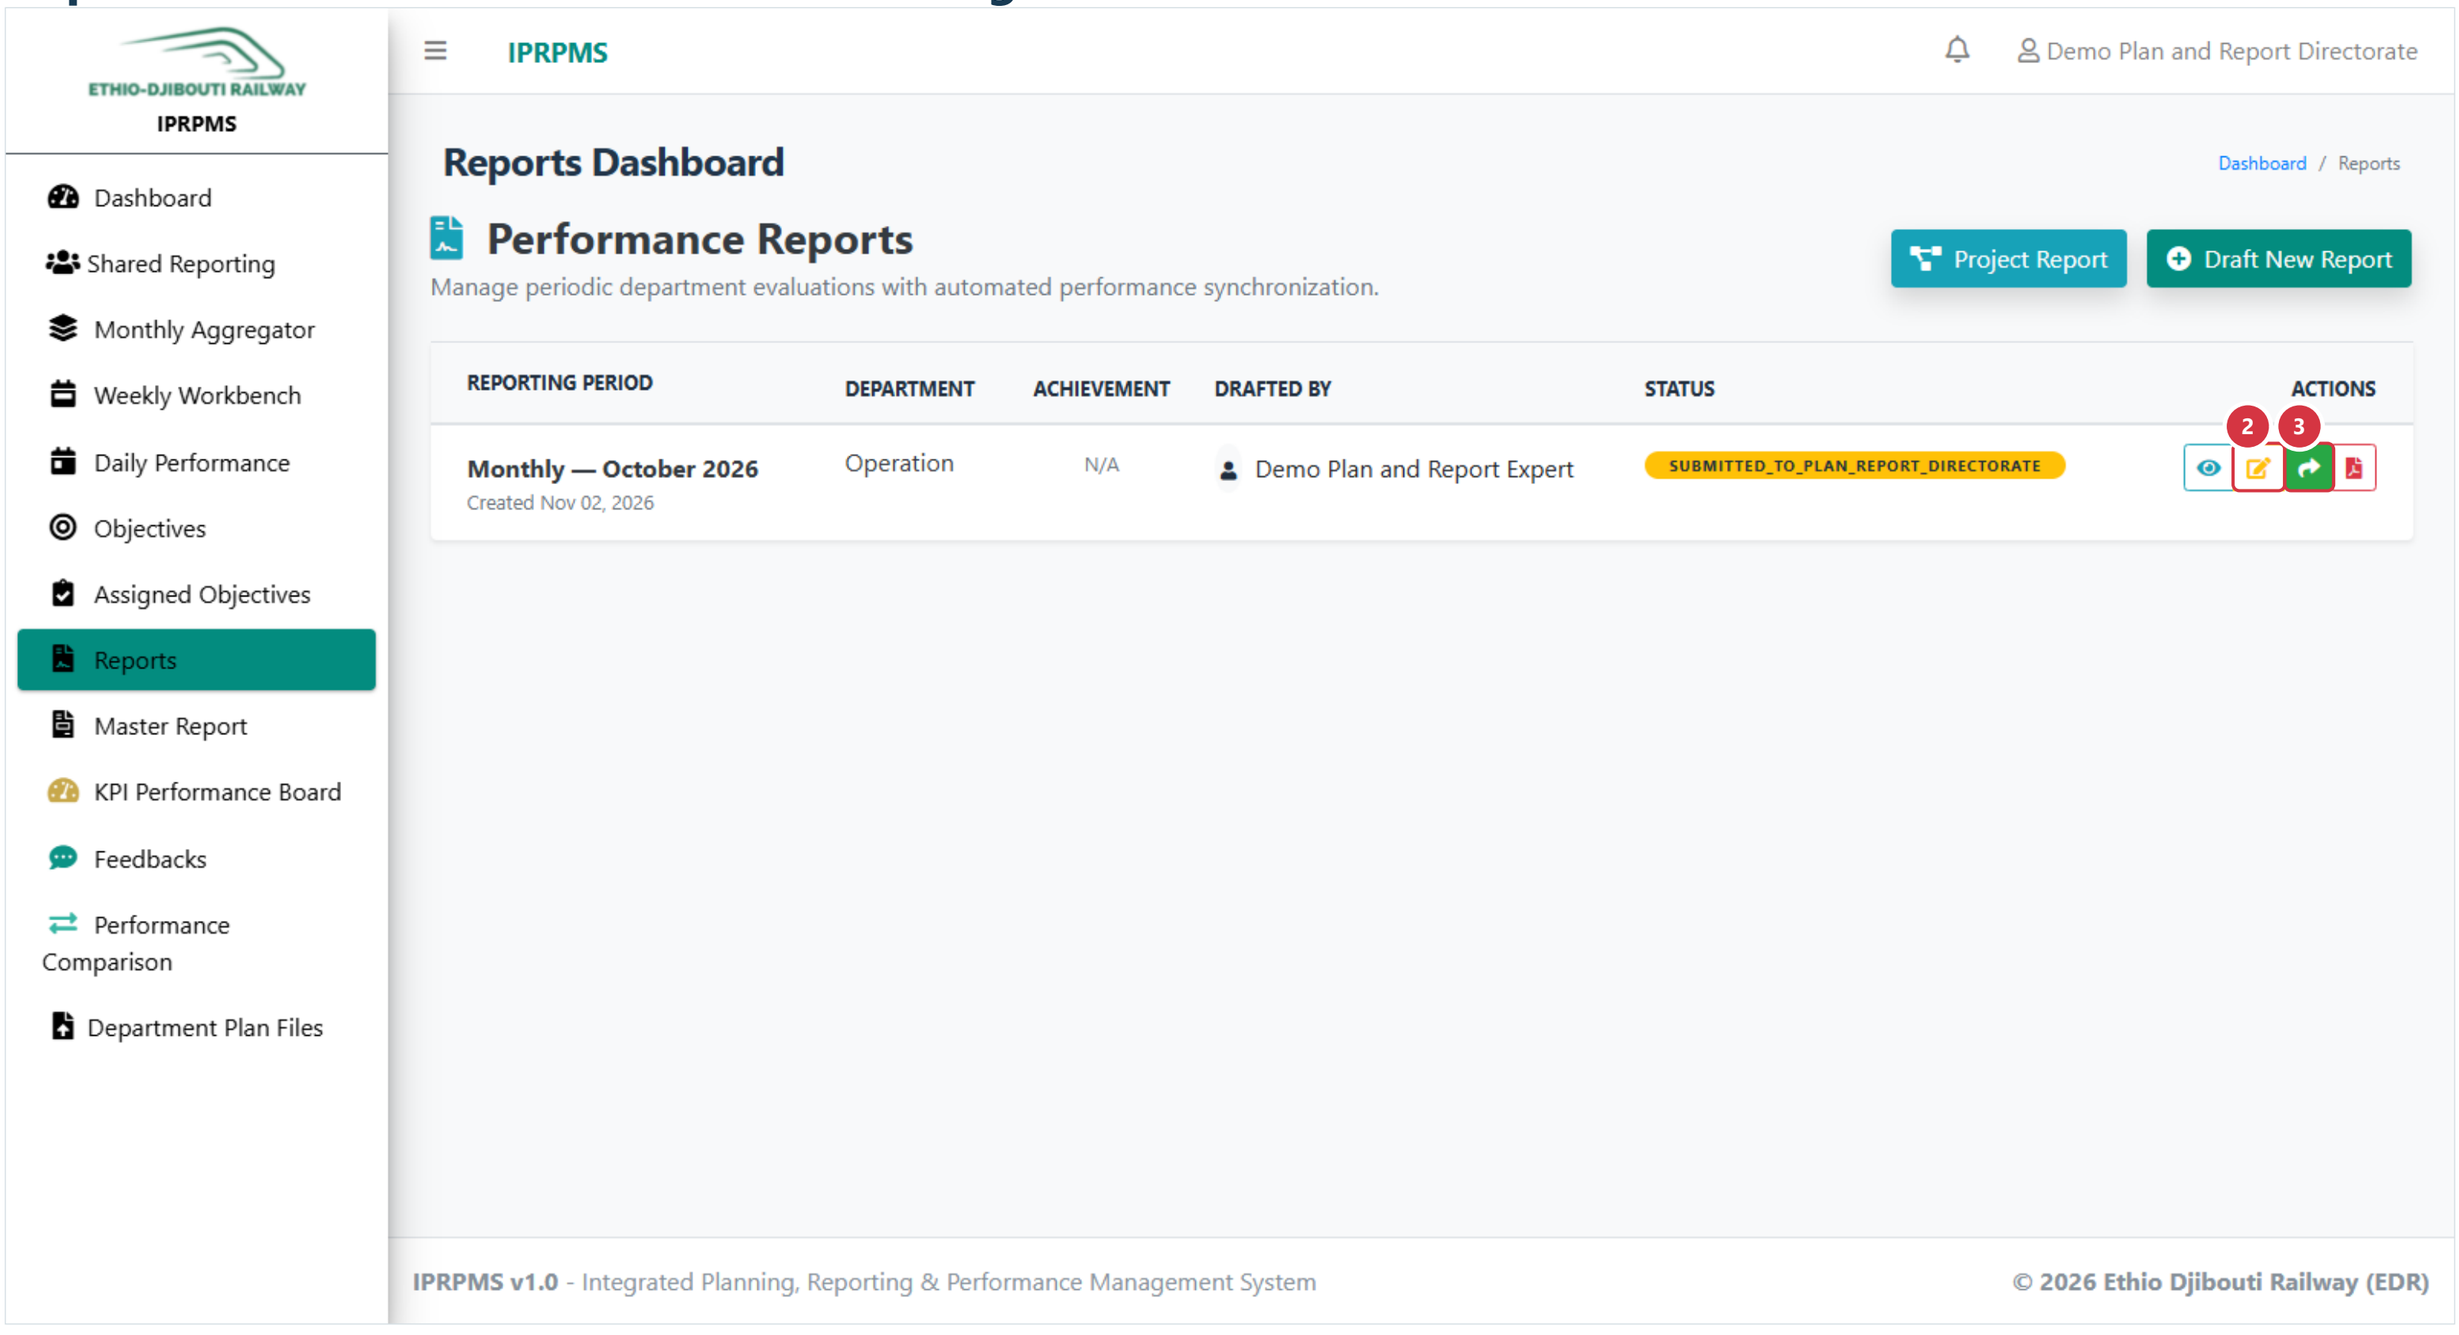

What to check

Keep wording evidence-based and understandable. Use available edit controls for permitted changes. Do not assume a Return button exists on every written-document workflow.

How you know it worked

Use the Reports or Feedbacks list action to send to the Head. Only the Chief's final feedback release makes it official for the Department Chief.

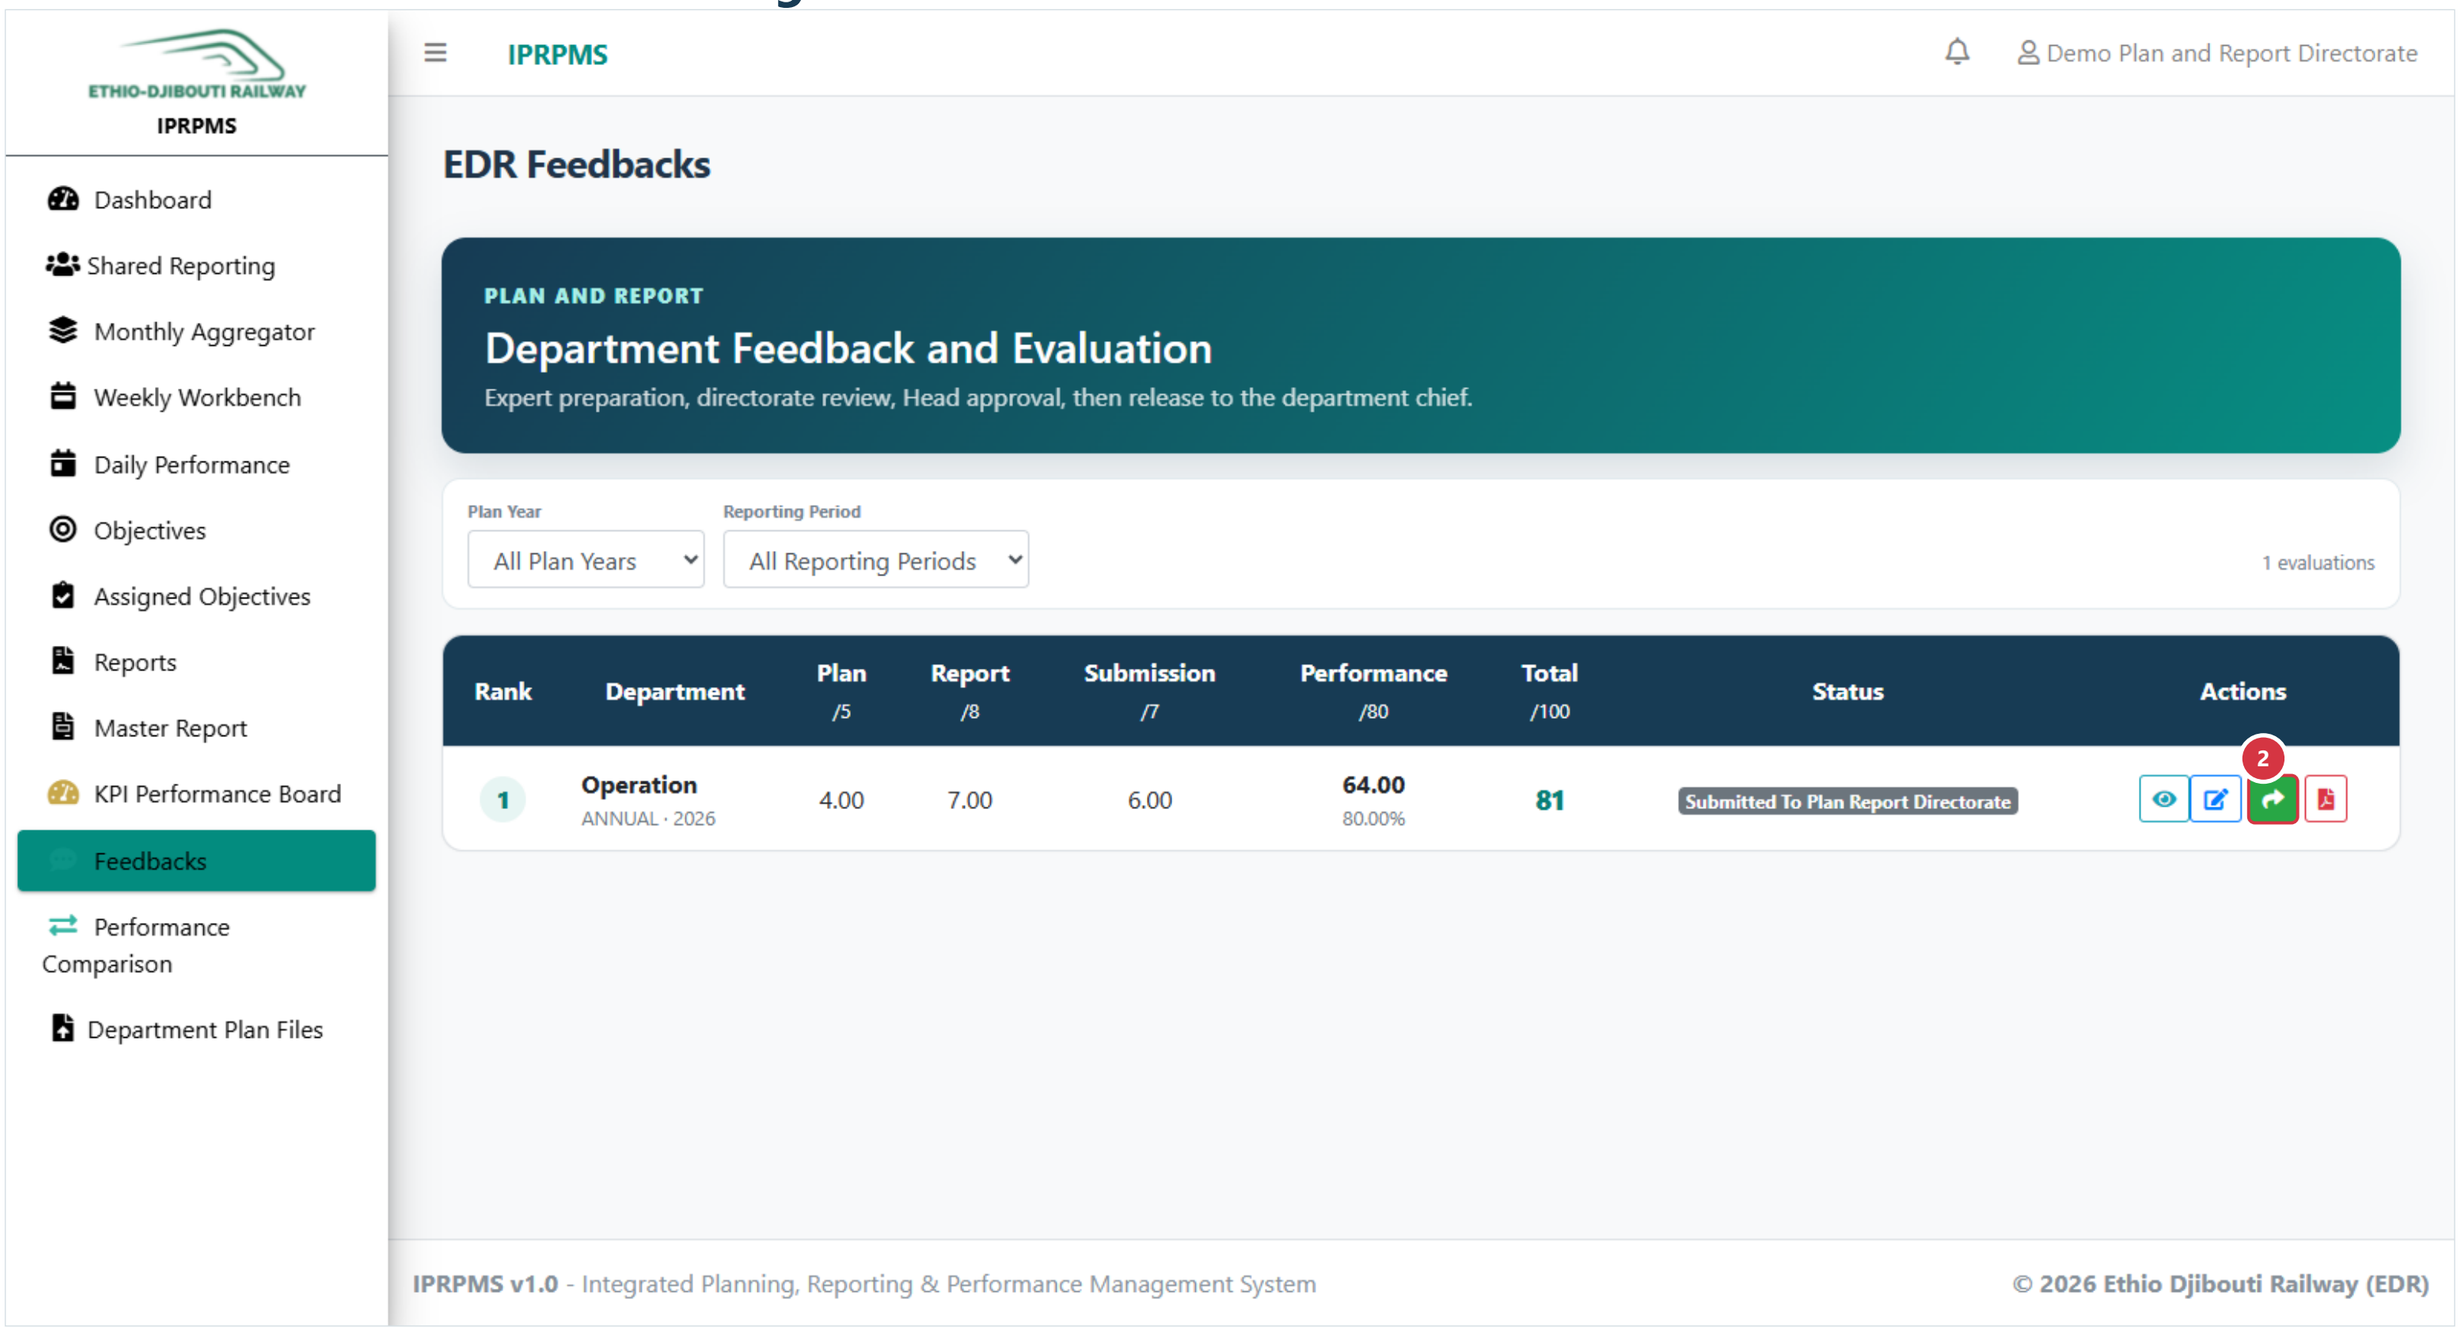

Report: Directorate review and forwarding

1. Open/view the submitted report and check its content.
2. Use Edit Narrative if a correction is needed at this stage.
3. Click the icon titled Send to Head.

After this step: The report advances to Plan and Report Chief review.

Feedback: Directorate forwarding

1. Review the feedback and permitted narrative edits.
2. Click the icon titled Send to Head.

After this step: The Plan and Report Chief receives the evaluation for the final release decision.

Review and forward the organization plan narration

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

The narration describes the complete approved organization plan for one year.

Before you click

Open the narration in its submitted Directorate stage and read all six narrative sections plus the generated activities and schedules.

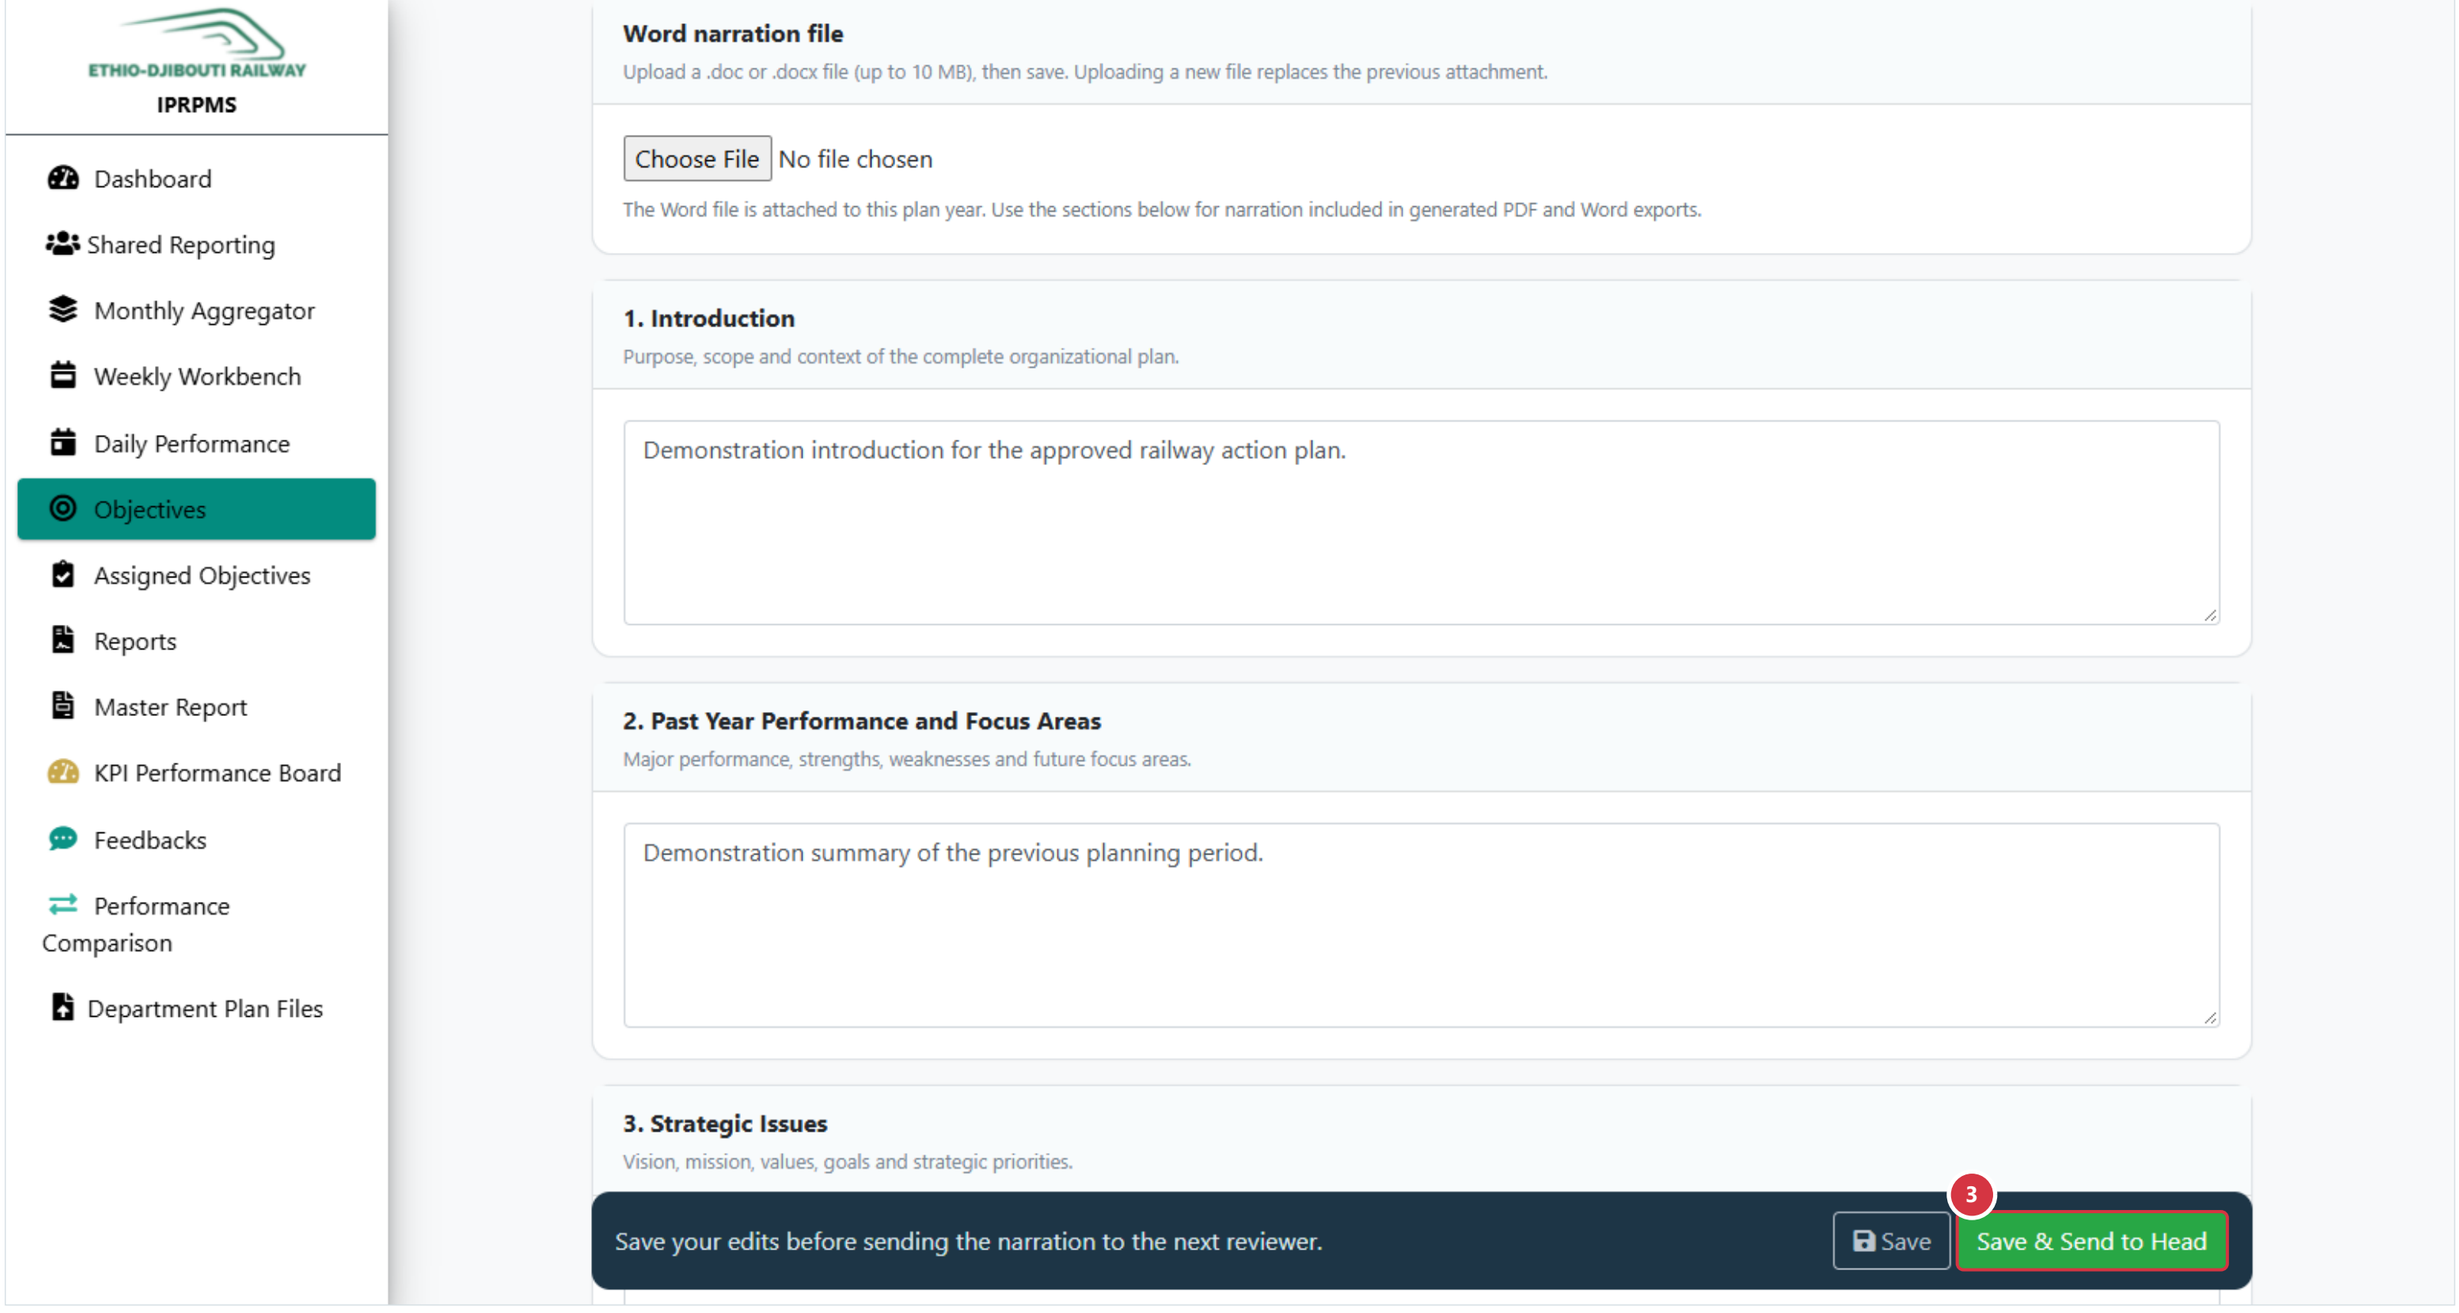

What to check

Check that the text agrees with the selected year and approved plan. Make permitted corrections and save them.

How you know it worked

Click Save & Send to Head. Read the status to confirm the Chief is the next reviewer.

Plan narration: Directorate forwarding

1. Read the narration and make any permitted corrections.
2. Save the changes before leaving the page.
3. Click Save & Send to Head to move the document forward.

After this step: The status badge records the current narration stage. Automatic sections collect approved plan activities and schedules.

Review a historical KPI comparison mapping

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

Check whether the historical and current activities genuinely measure comparable work. This is separate from objective approval and performance-result approval.

Before you click

Open Historical comparison, find the submitted mapping and expand Edit measurement & mapping. Compare the definitions, units, measurement direction and proposed link.

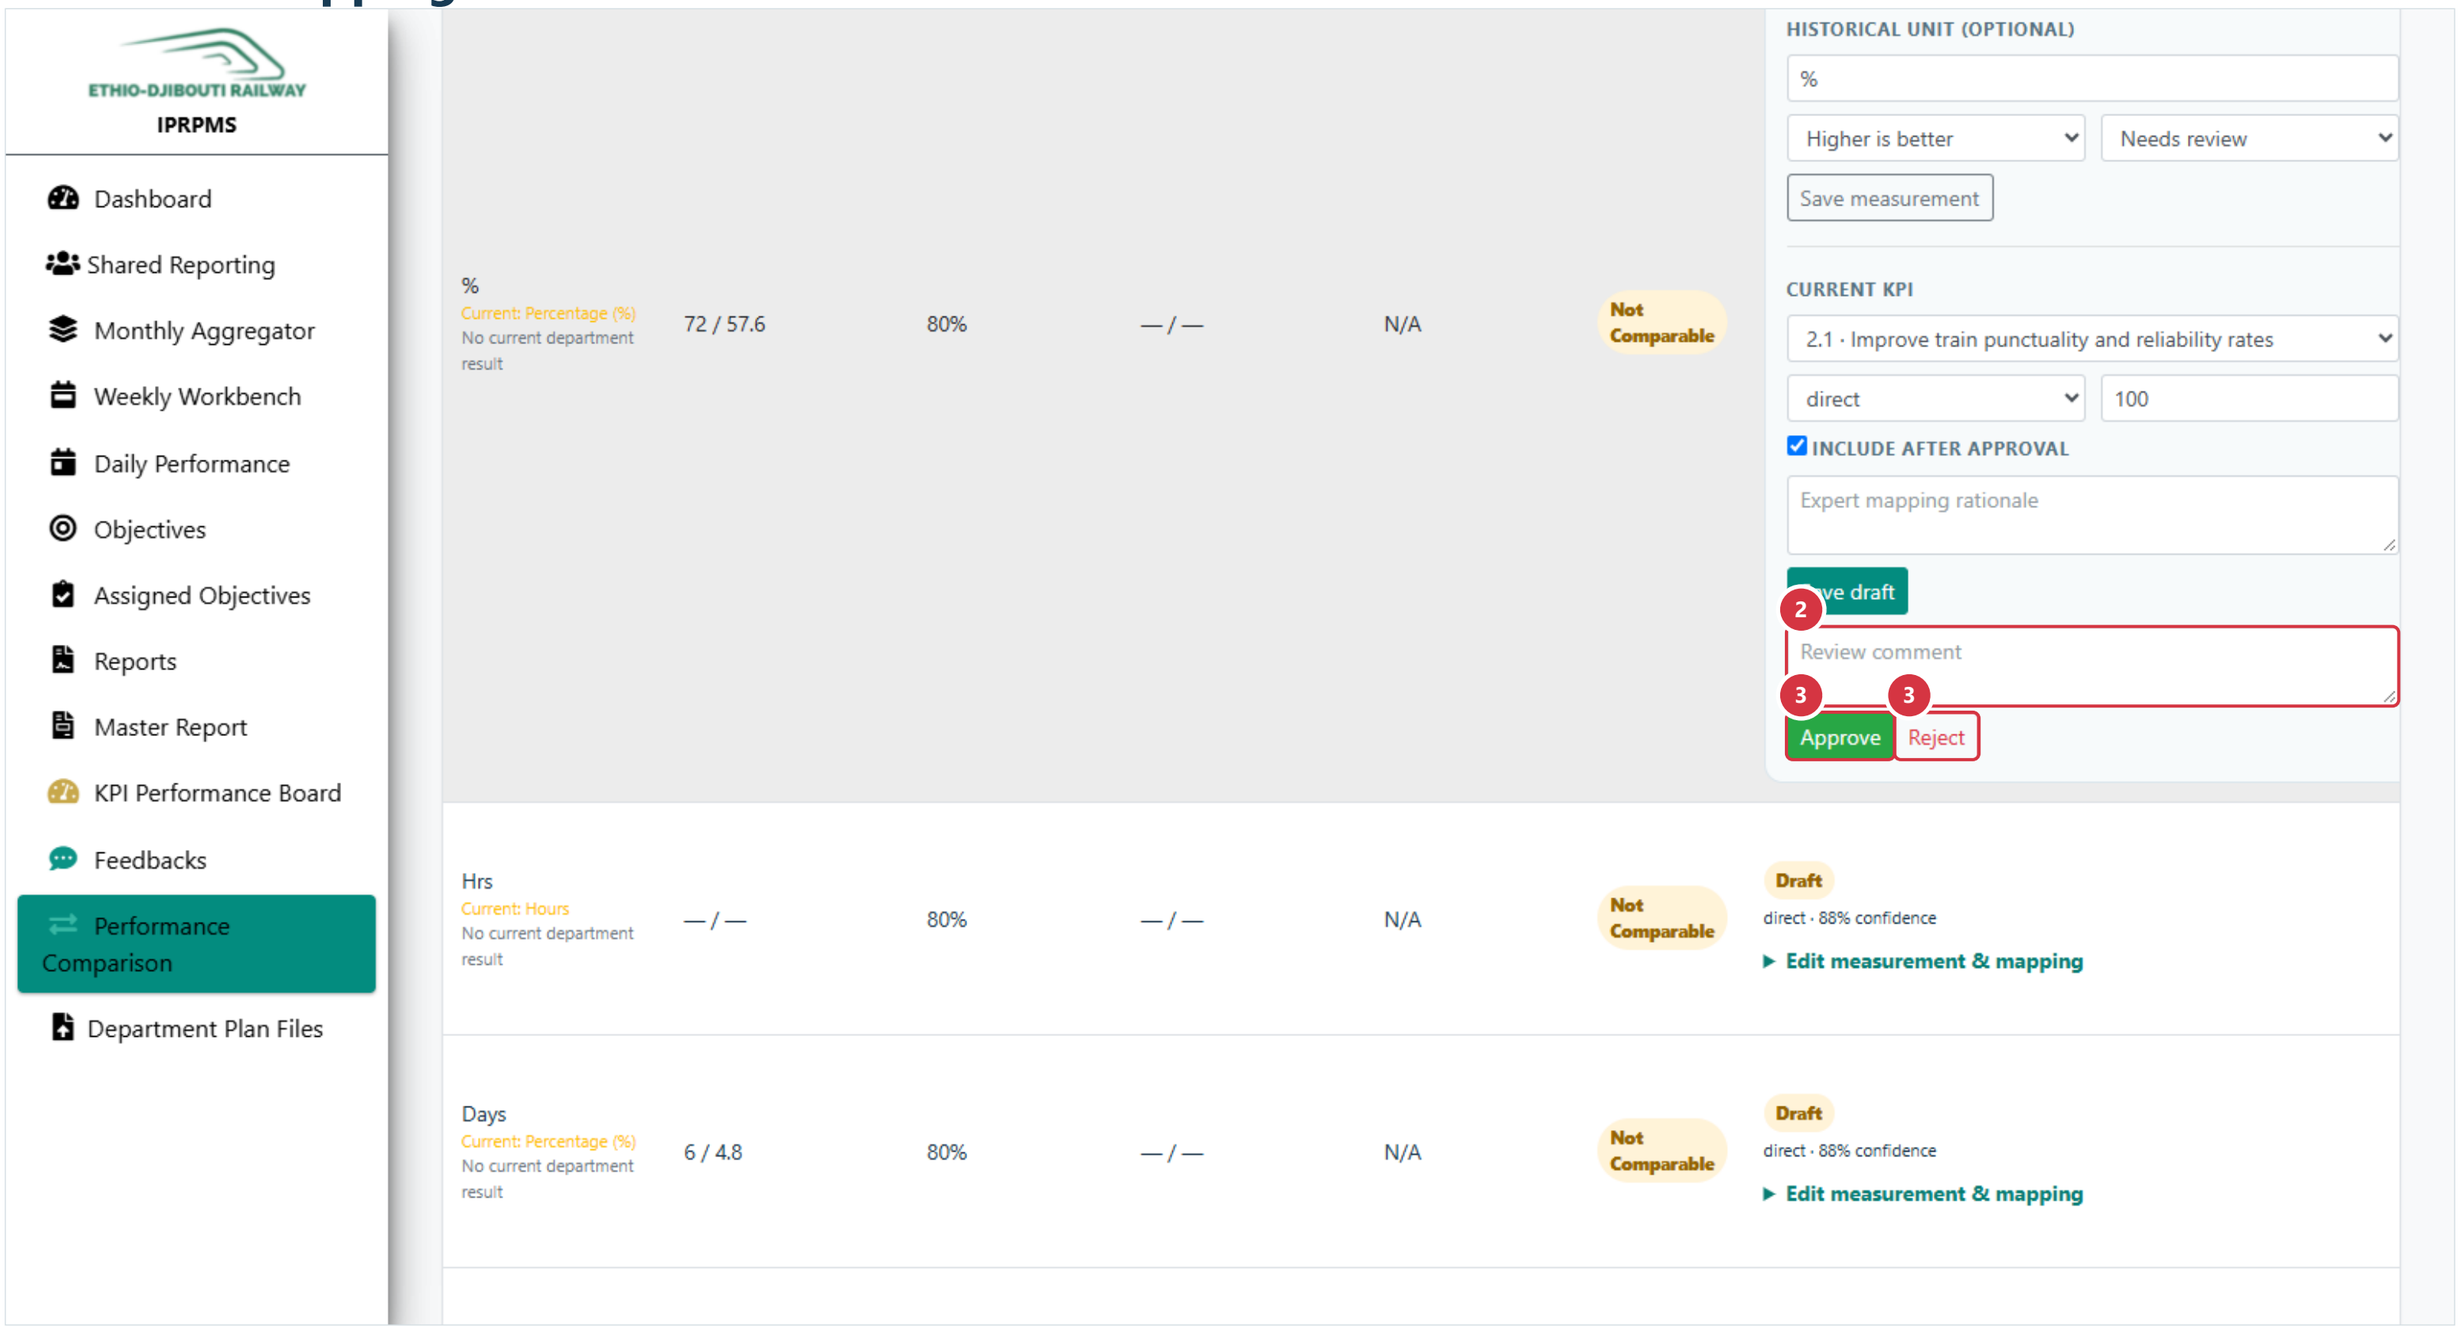

What to check

Read the preparer's rationale. Approve only a valid comparable link; otherwise explain the issue in Review comment and Reject. Do not approve a link merely to increase the coverage percentage.

How you know it worked

The mapping shows its decision. An authorized Directorate or Chief can review it; this is not a compulsory Directorate-then-Chief chain. Missing or incompatible results remain gaps even after the link is approved.

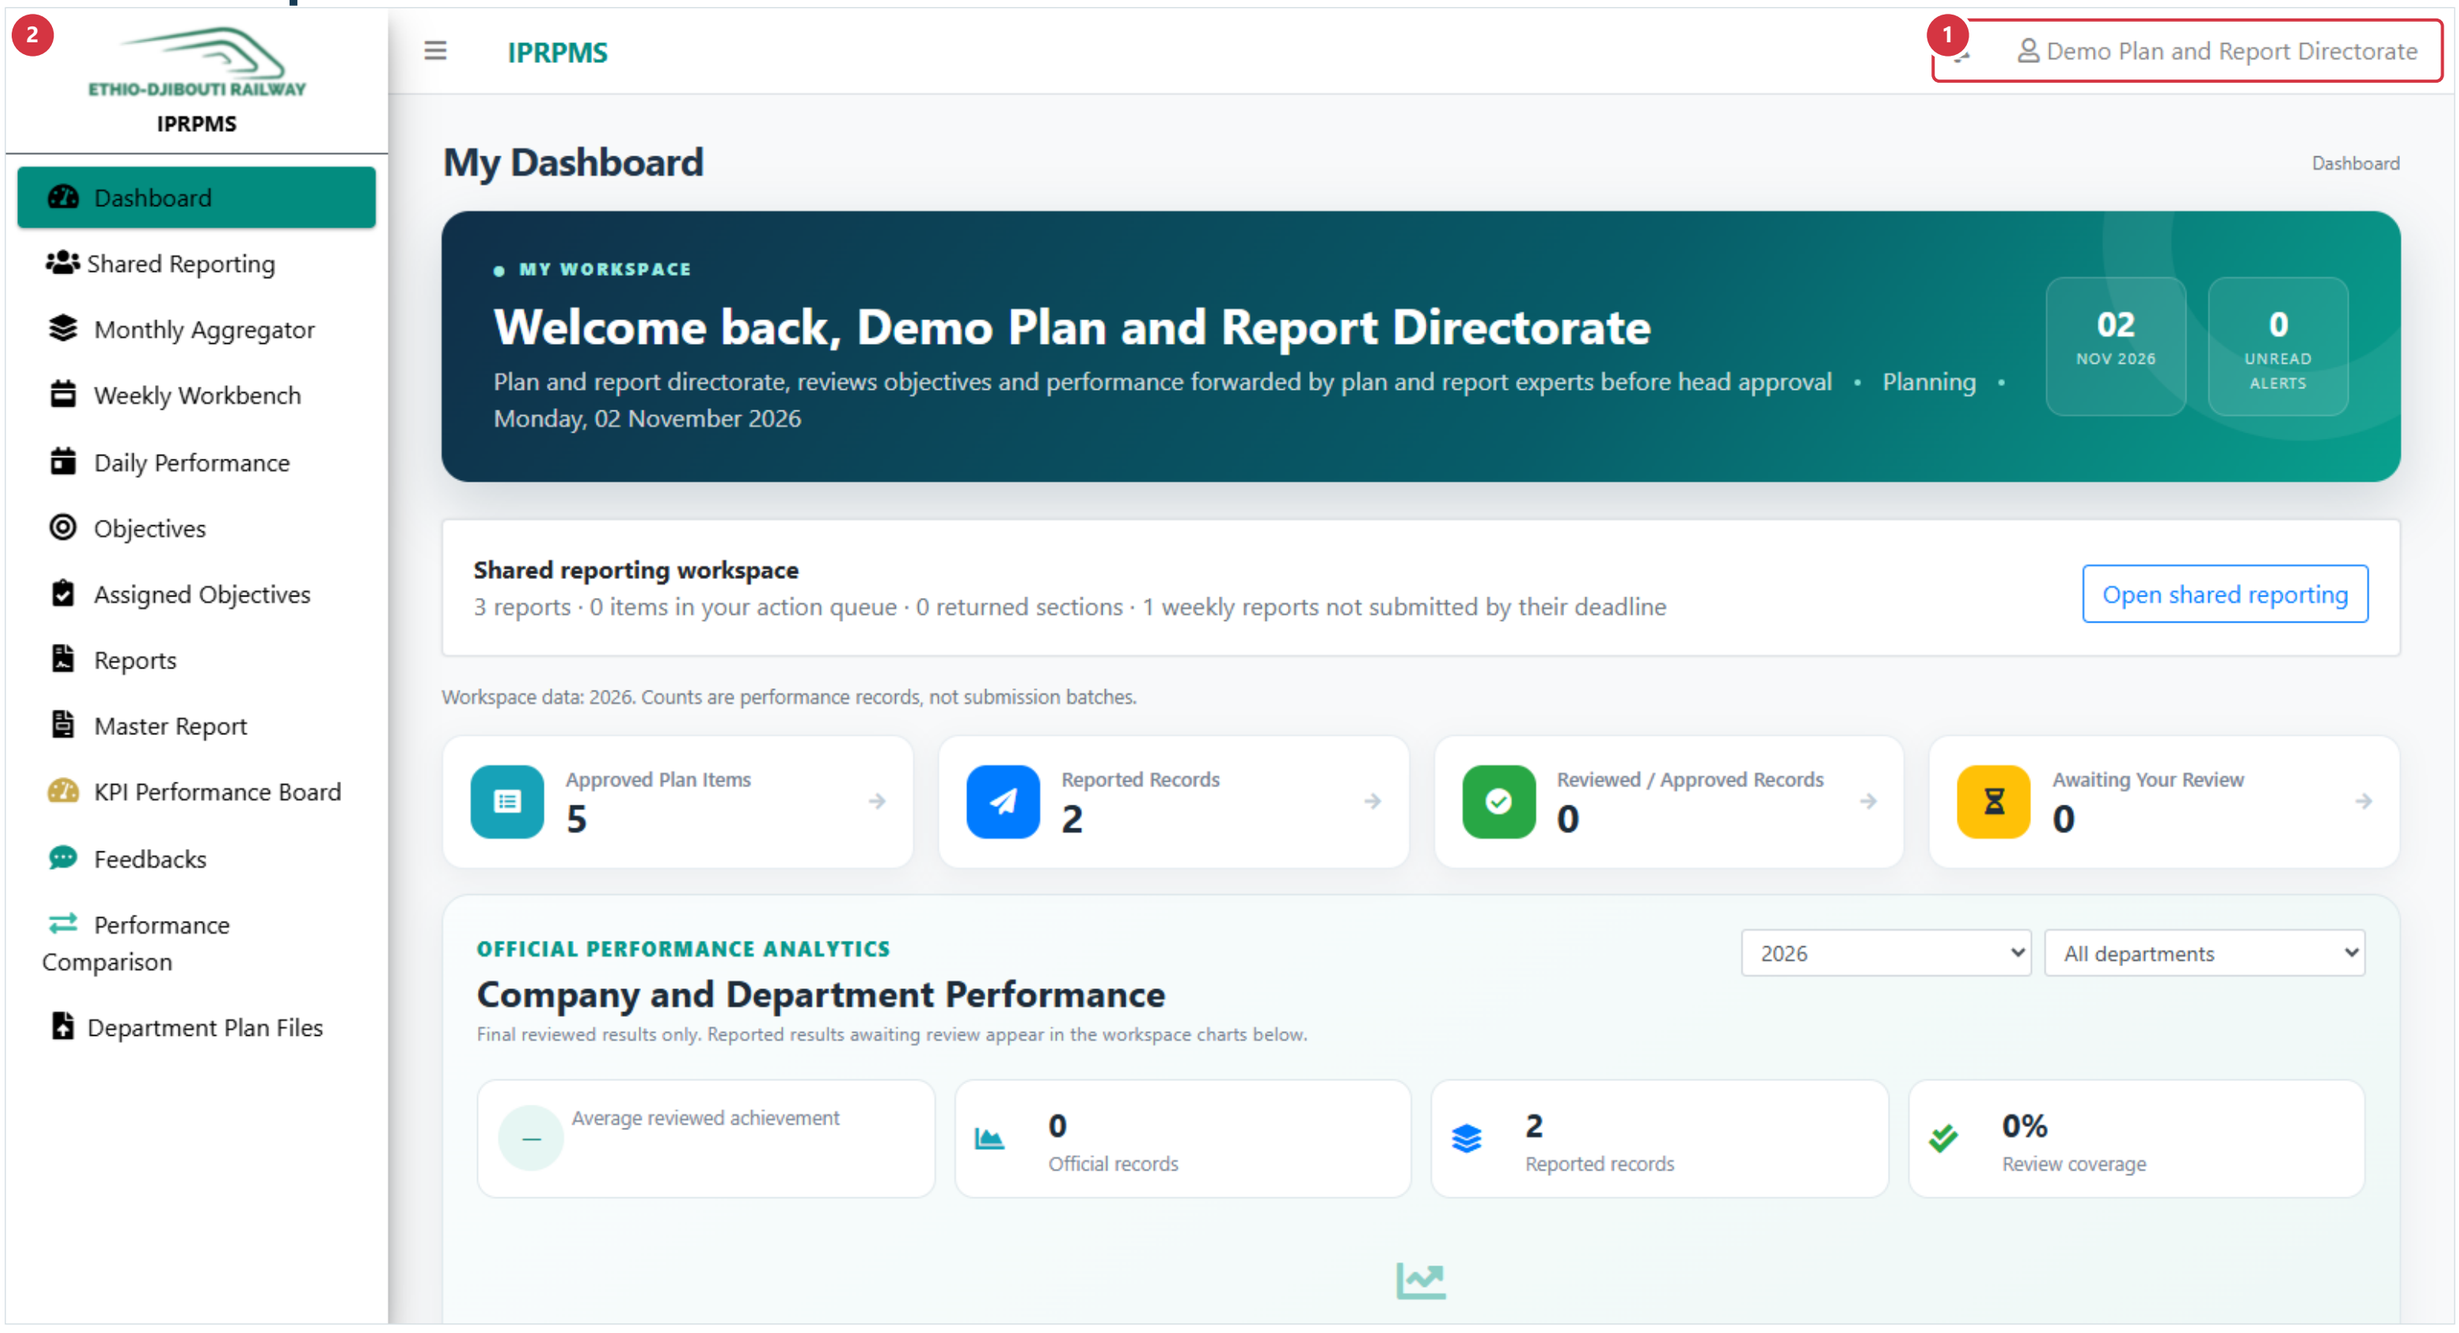

Historical mapping: Directorate review decision

1. Open the submitted mapping and compare both KPI definitions, units and direction.
2. Enter Review comment; a rejection needs an explanation.
3. Click Approve for a valid comparable mapping, or Reject when the proposed link is wrong.

After this step: An authorized Directorate or Chief reviewer can decide this mapping. It is not a mandatory two-stage Directorate-then-Chief chain.

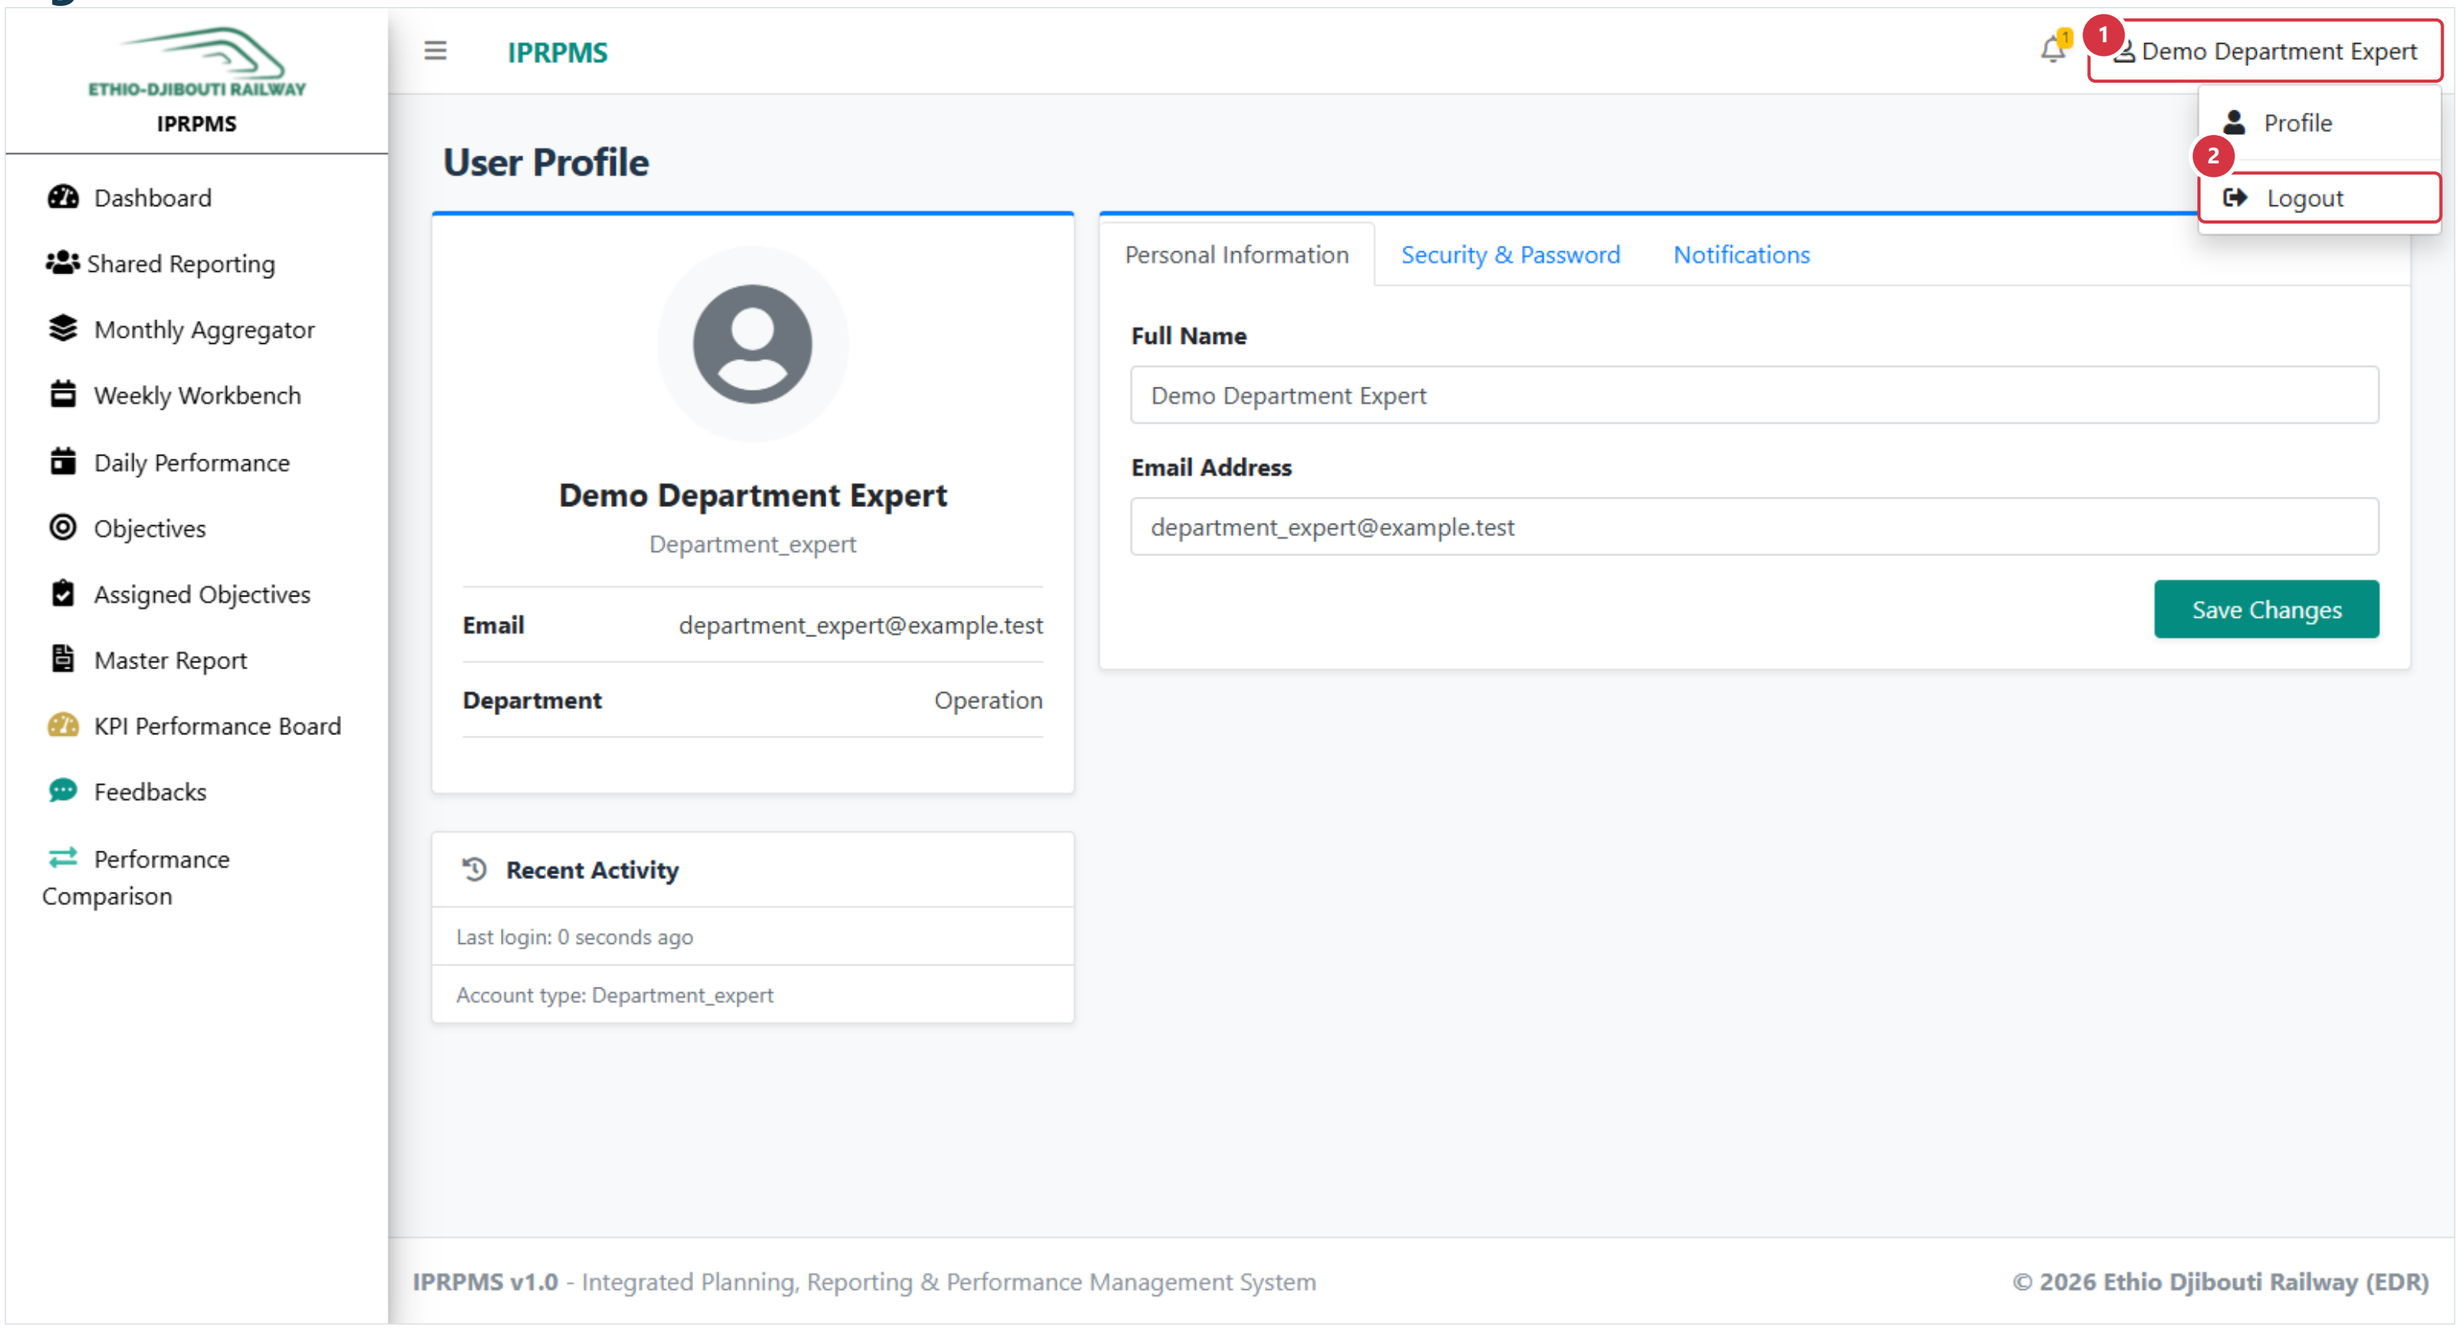

Plan and Report Directorate: home screen

1. Confirm your signed-in role at the top right.
2. Review submitted objectives and documented edits, reports, narration, feedback and period-weight distributions.
3. Forward correct records to the Head. Use the available return controls when the previous review needs correction.

After this step: Menus vary by permission, department and reporting frequency.

Sign out on a shared device

1. Click your name at the top right to open the user menu.
2. Click Logout after you finish your work.

After this step: The application returns to the sign-in screen after logout.

Before you finish, check these four things

Finish means your part is complete and you know who has the next action. It does not always mean the whole record is finally approved.

Your completion checklist

1. I verified record type, department and year/period. 2. I recorded reasons for edits or returns where required. 3. I used the correct forwarding control for each workflow. 4. I checked the new status rather than assuming Save sent the record.

If a menu or button is missing

If the expected action is absent, check that the record has reached your stage and that the logged-in account is Plan and Report Directorate, not Department Directorate.

Ask for help with useful details

Give IT or the responsible reviewer the module, department, year, reporting period, objective or record reference and exact message. Include a safe screenshot. Never send your password.

Keep the process and data safe

Use your own account, save before sending, read return comments and keep the same record for corrections. Demonstration screenshots are teaching examples, not official performance figures. The separate logistics Import/Export module is excluded.
