Plan & Report Chief (Head)

Your responsibilities, complete workflow, exact clicks and return paths.

Read first: the Start Here guide explains how the whole system works. Then use this manual to do your part, check the outcome and hand work to the right person.

Understand your job before the buttons

Keep this page in mind whenever you receive a new record. It explains your responsibility and where your part stops.

Your job

Make the final organization decisions for plans and performance, approve period-weight distributions and written documents, release feedback and control authorized period locks.

What you receive

Directorate-reviewed plans, performance reviews and correction requests, proposed weights, written reports, feedback and plan narration.

Who receives your work

Approved plan activities become available to performer departments. Final approved results feed official reporting. Performance returns go to the selected responsible level with your comment.

Your limits and important distinctions

This role is different from general Head Office viewing access. A final decision carries responsibility: read the underlying scope, evidence and reviewer comments before approving or locking.

Your workflow, from first action to finish

Read down the page. Each step has an outcome; do not jump ahead simply because a button is visible.

1

Make the final planning decision

Review the full objective hierarchy. Correct permitted fields with a reason, approve valid work or return it with an explanation.

2

Resolve recall and frequency requests

Check why the request is necessary and what reporting periods or approved activities it affects.

3

Approve or return performance

Check the source department and period. Grant final approval or return to the responsible level with a specific comment.

4

Approve weights and written records

Make a separate final decision for period weights, reports, feedback and plan narration.

5

Close the reporting month

Read coverage and the monthly matrix. Certify and lock only after the required results and checks are complete.

6

Manage exceptions transparently

Reopen a locked month or weight distribution only for an authorized reason, then follow the applicable correction and approval workflow.

Find the task you need

Use the page number or click a task name in the PDF. Section introductions explain the purpose before the screen-by-screen actions.

First access and everyday account safety 5

Approve objectives and resolve planning exceptions 11

Give the final performance decision 16

Approve, lock or reopen a period distribution 19

Approve reports, release feedback and approve narration 22

Review coverage, certify the month and handle reopening 27

Optional: approve a separately submitted departmental plan 31

Review a historical KPI comparison mapping 34

Completion checklist and help 38

First access and everyday account safety

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

Use your own account. Your department and role decide what you can see and which decisions you can make. Never use somebody else's account to reach a missing button.

Before you click

Have your official account details ready. Open the address supplied by IT, enter your email and Access Key, then click Authenticate. A first-password screen appears only when your account requires it.

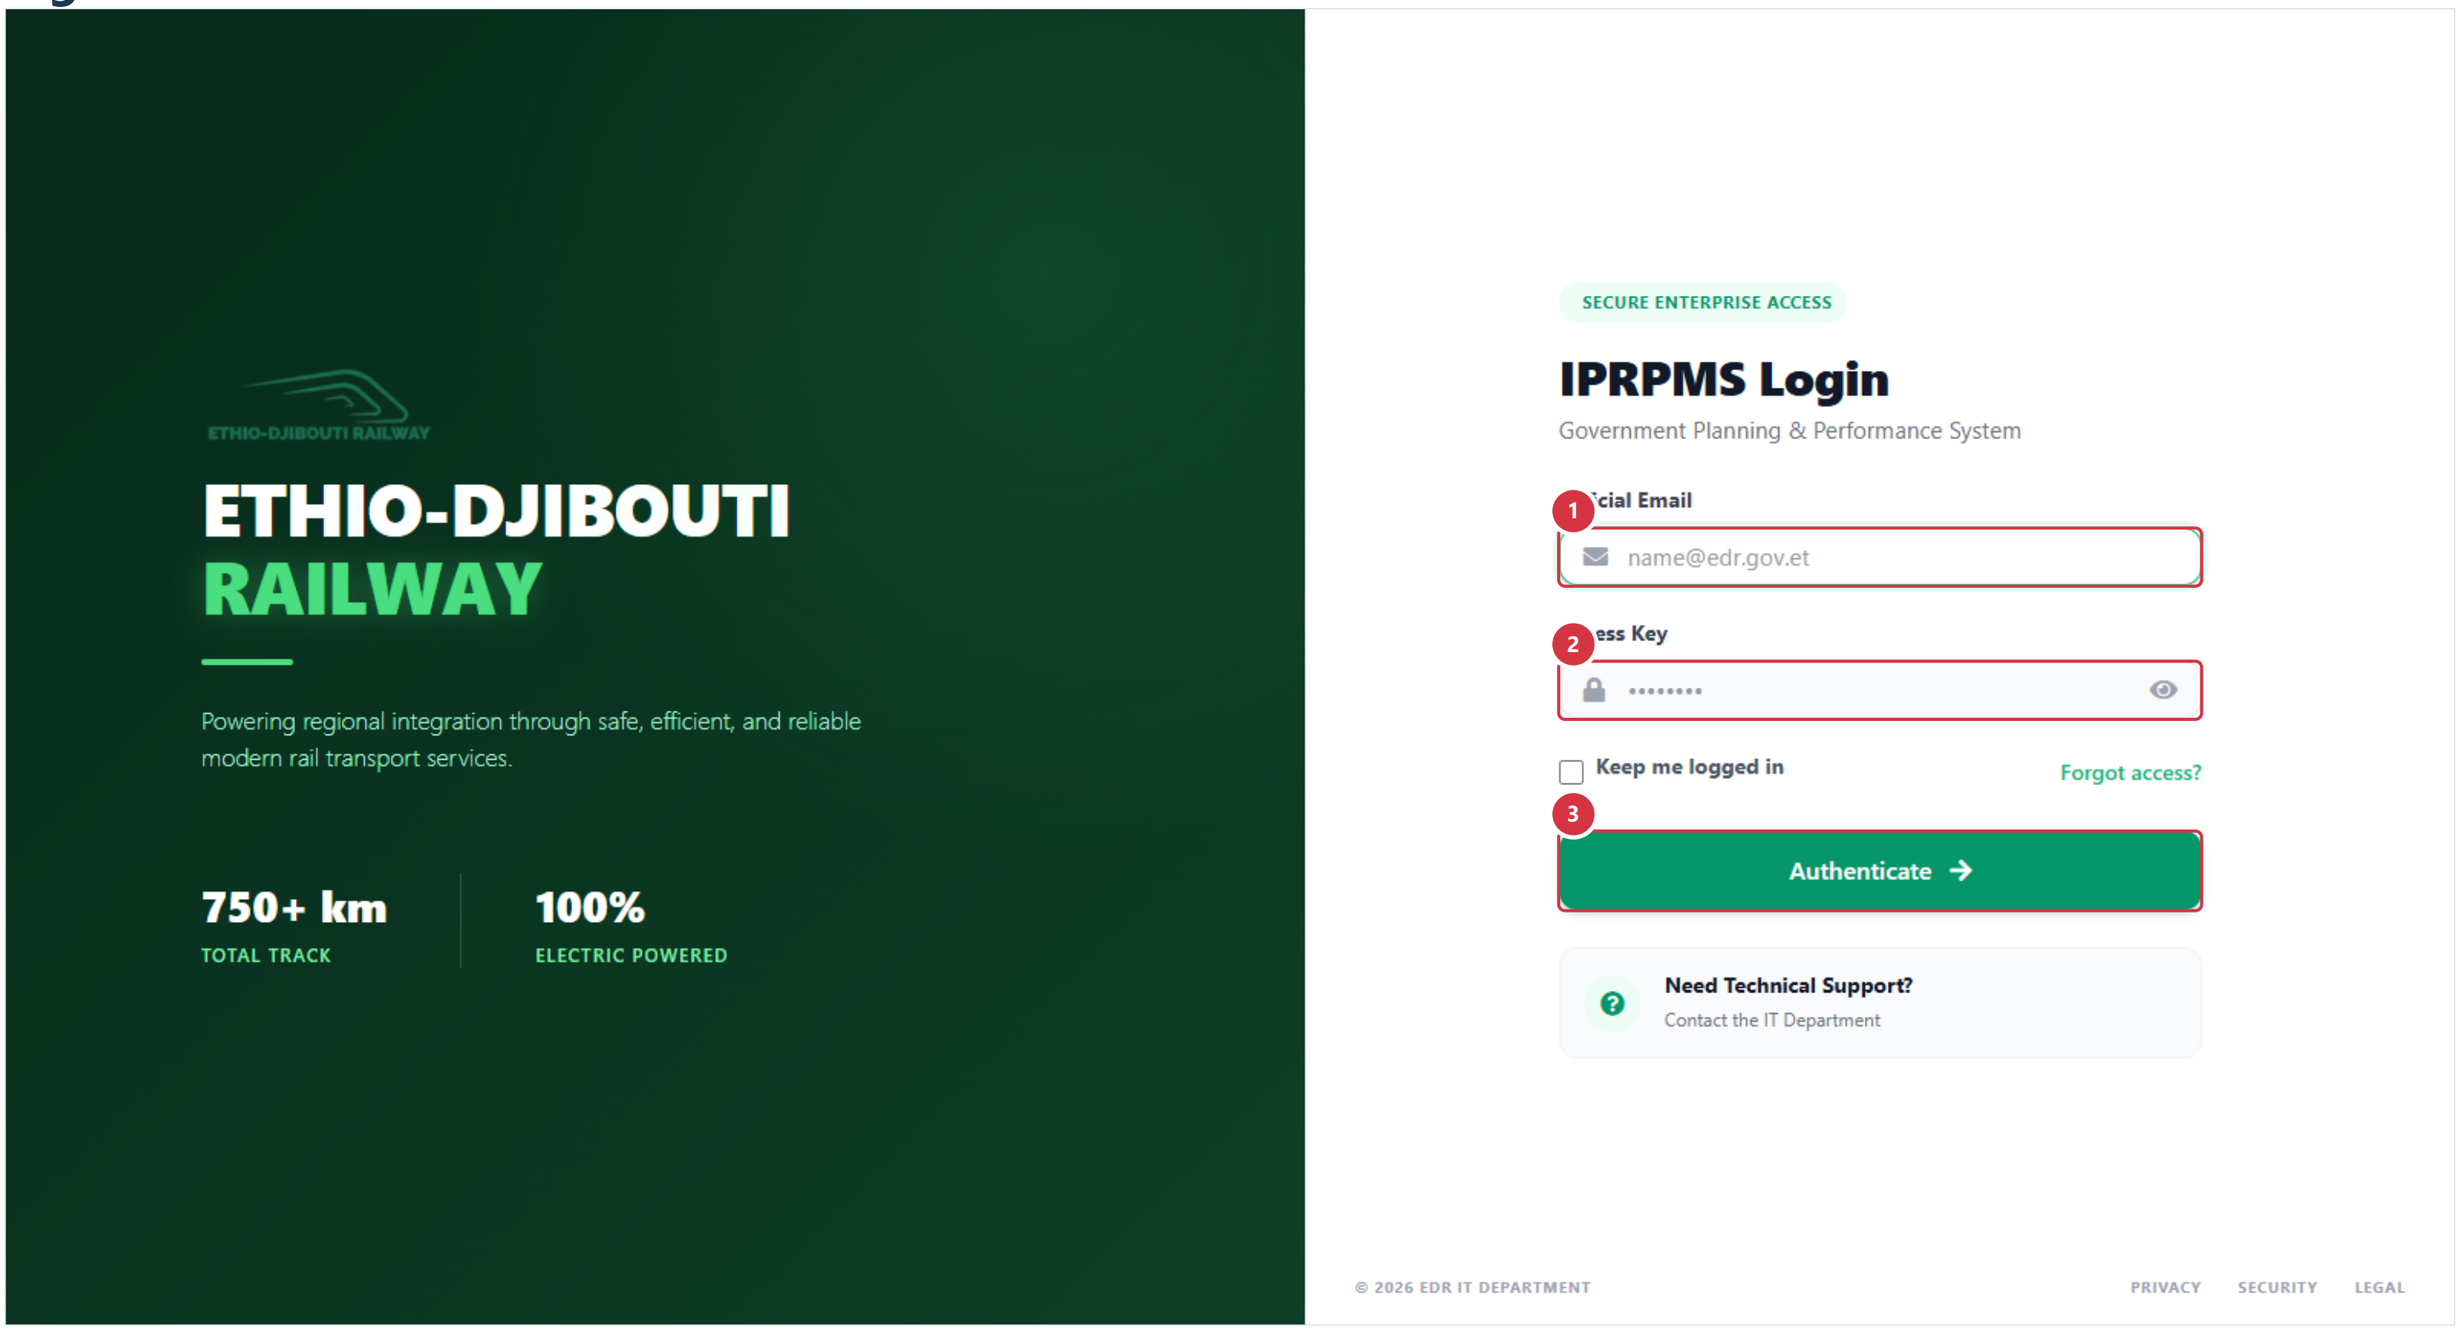

What to check

Check the name and role at the top right. Change your temporary password when prompted. Your profile is for your own name, email and password; department and role changes belong to the administrator.

How you know it worked

You can open the dashboard with the correct account. The notification bell shows work sent to you. On a shared computer, sign out when finished and do not choose Keep me logged in.

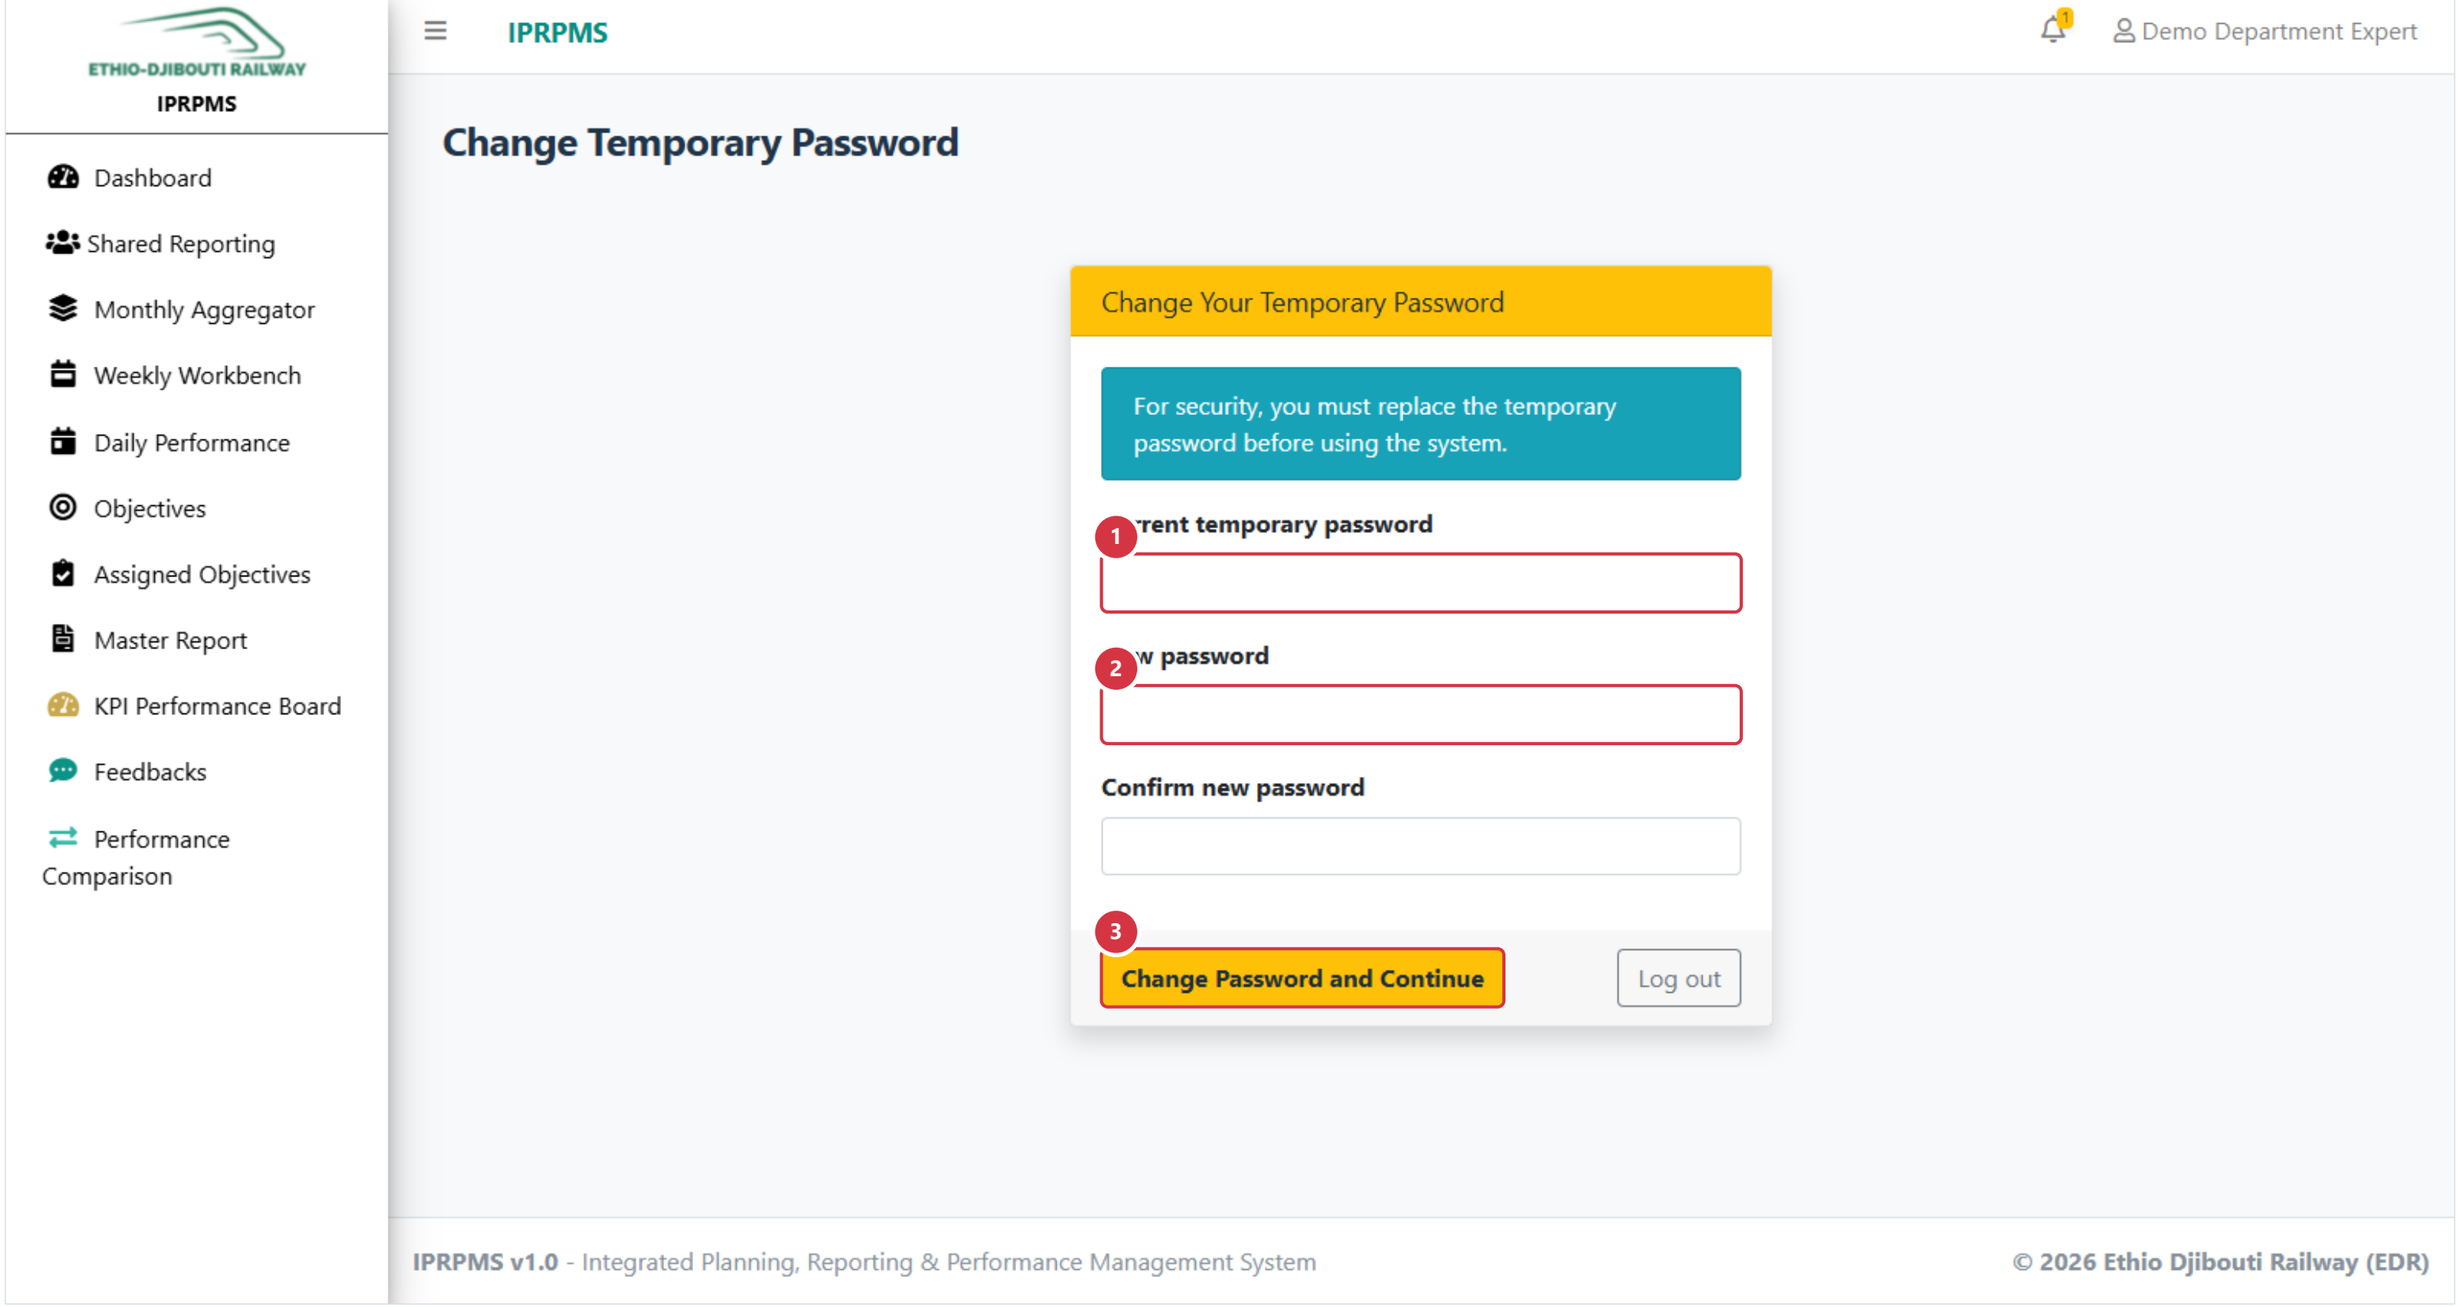

Sign in to IPRPMS

1. Enter your official email in Official Email.
2. Enter your own access key in Access Key.
3. Select Keep me logged in only on your own device, then click Authenticate.

After this step: The dashboard opens after authentication. Password fields in this handbook remain blank.

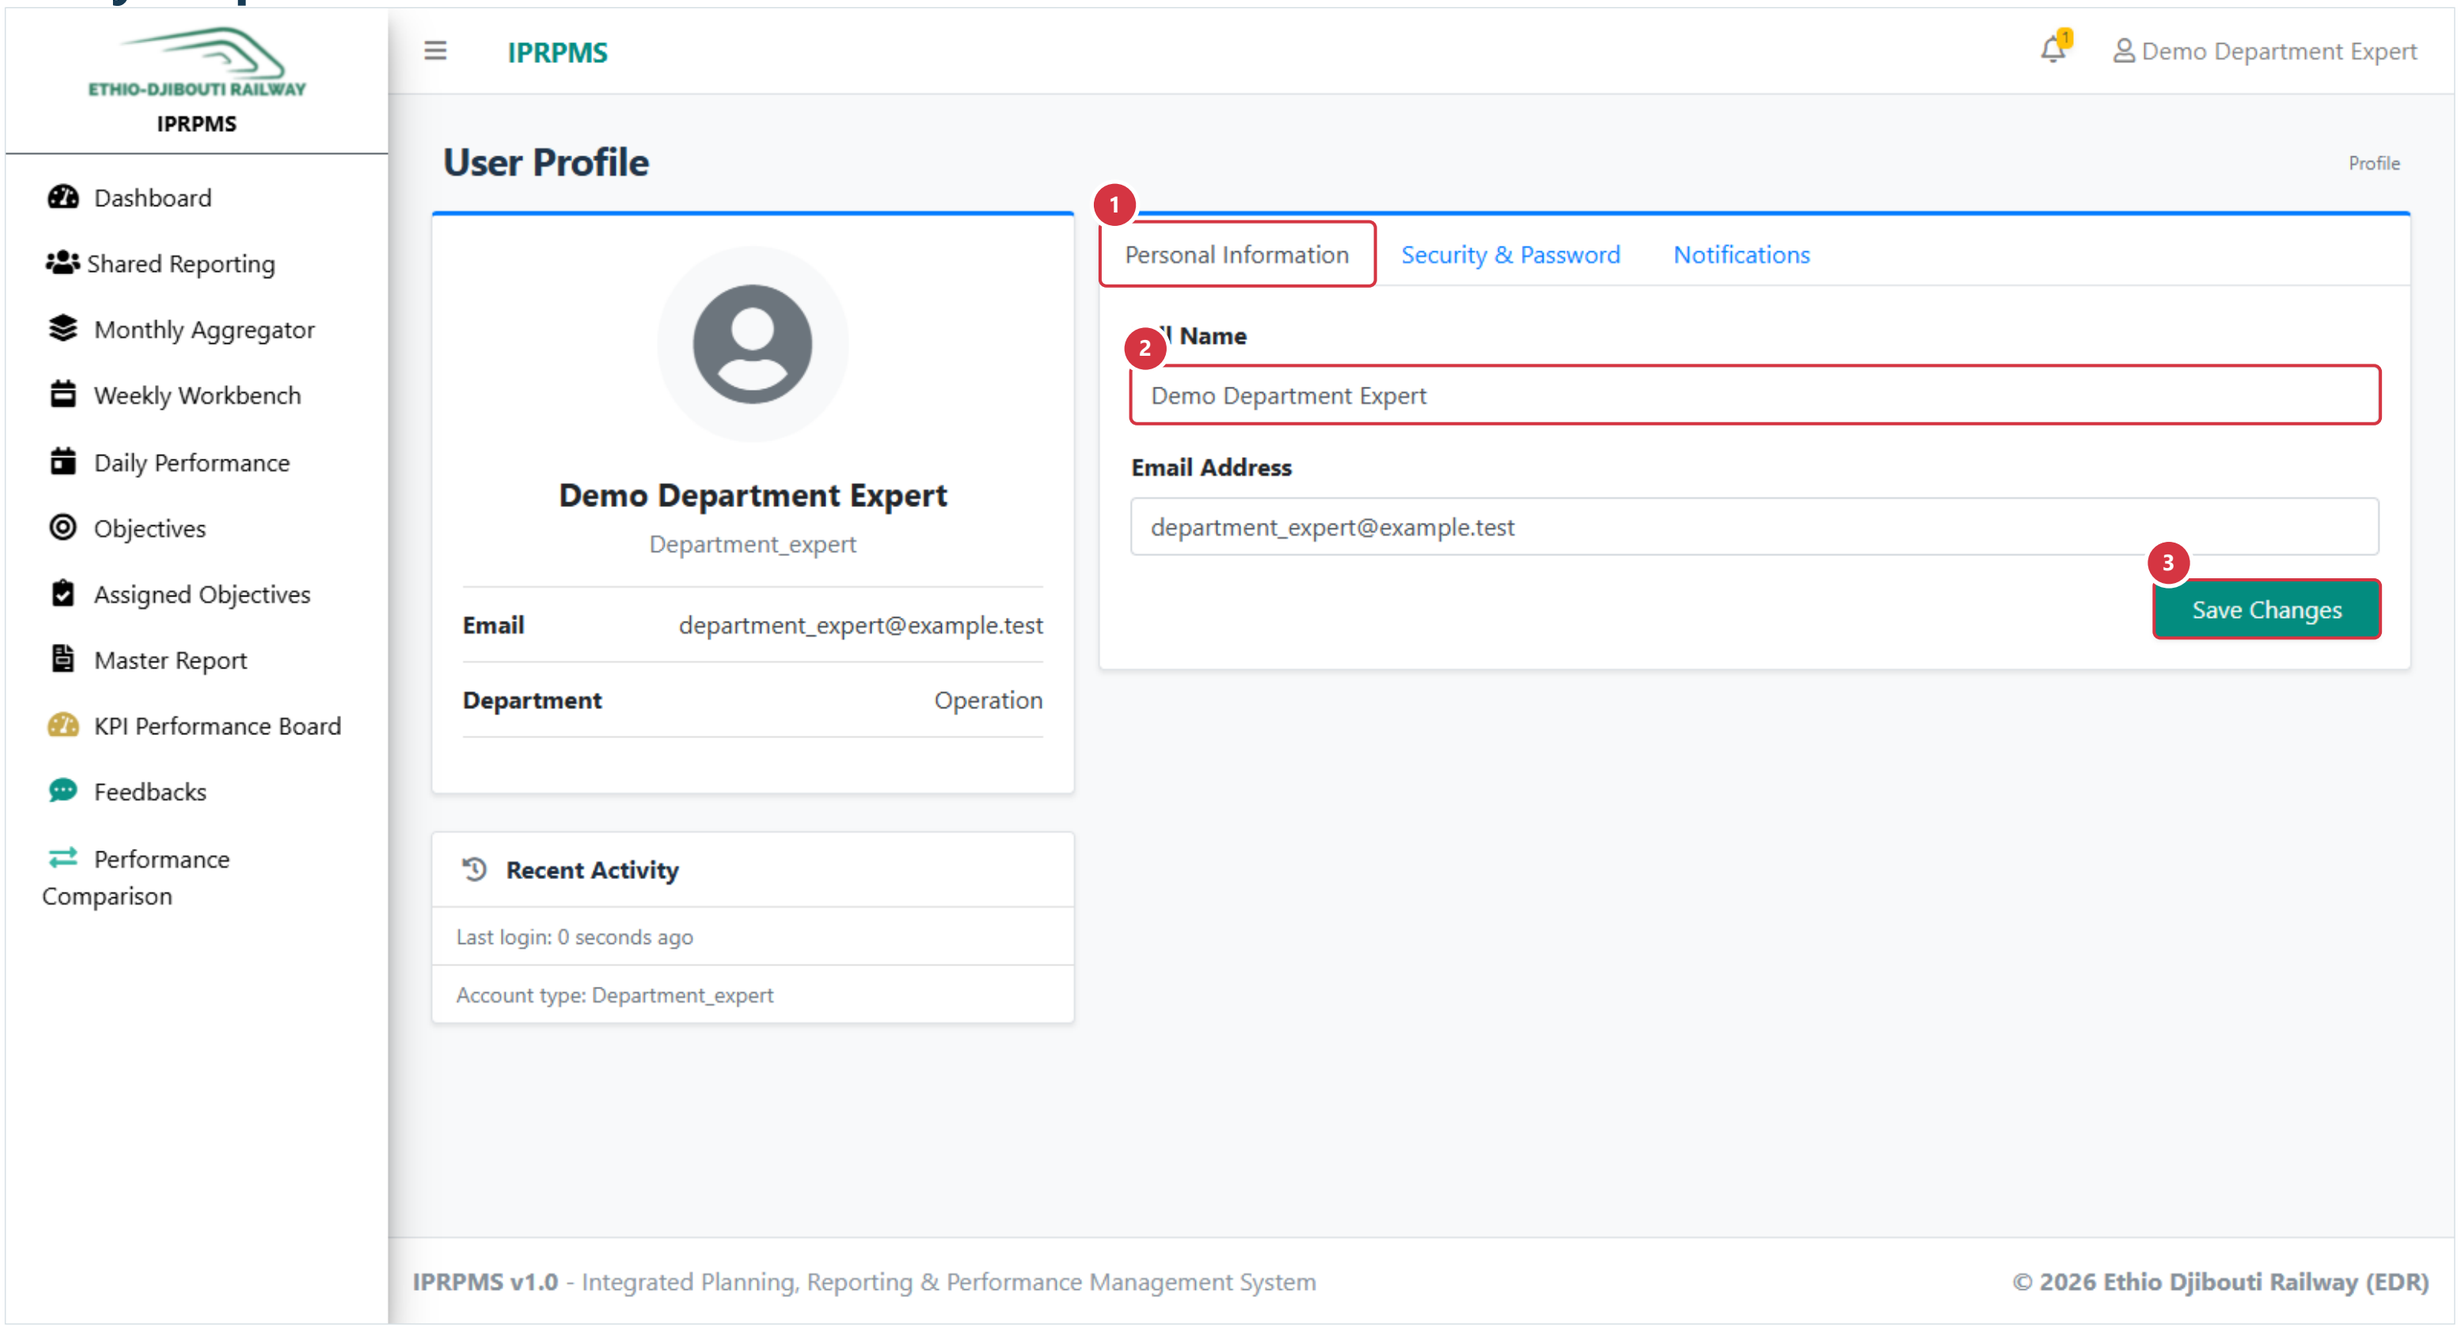

Replace a temporary password

1. Enter the current temporary password.
2. Enter a new private password and repeat it in Confirm new password.
3. Click Change Password and Continue.

After this step: This screen appears when the administrator requires a first password change.

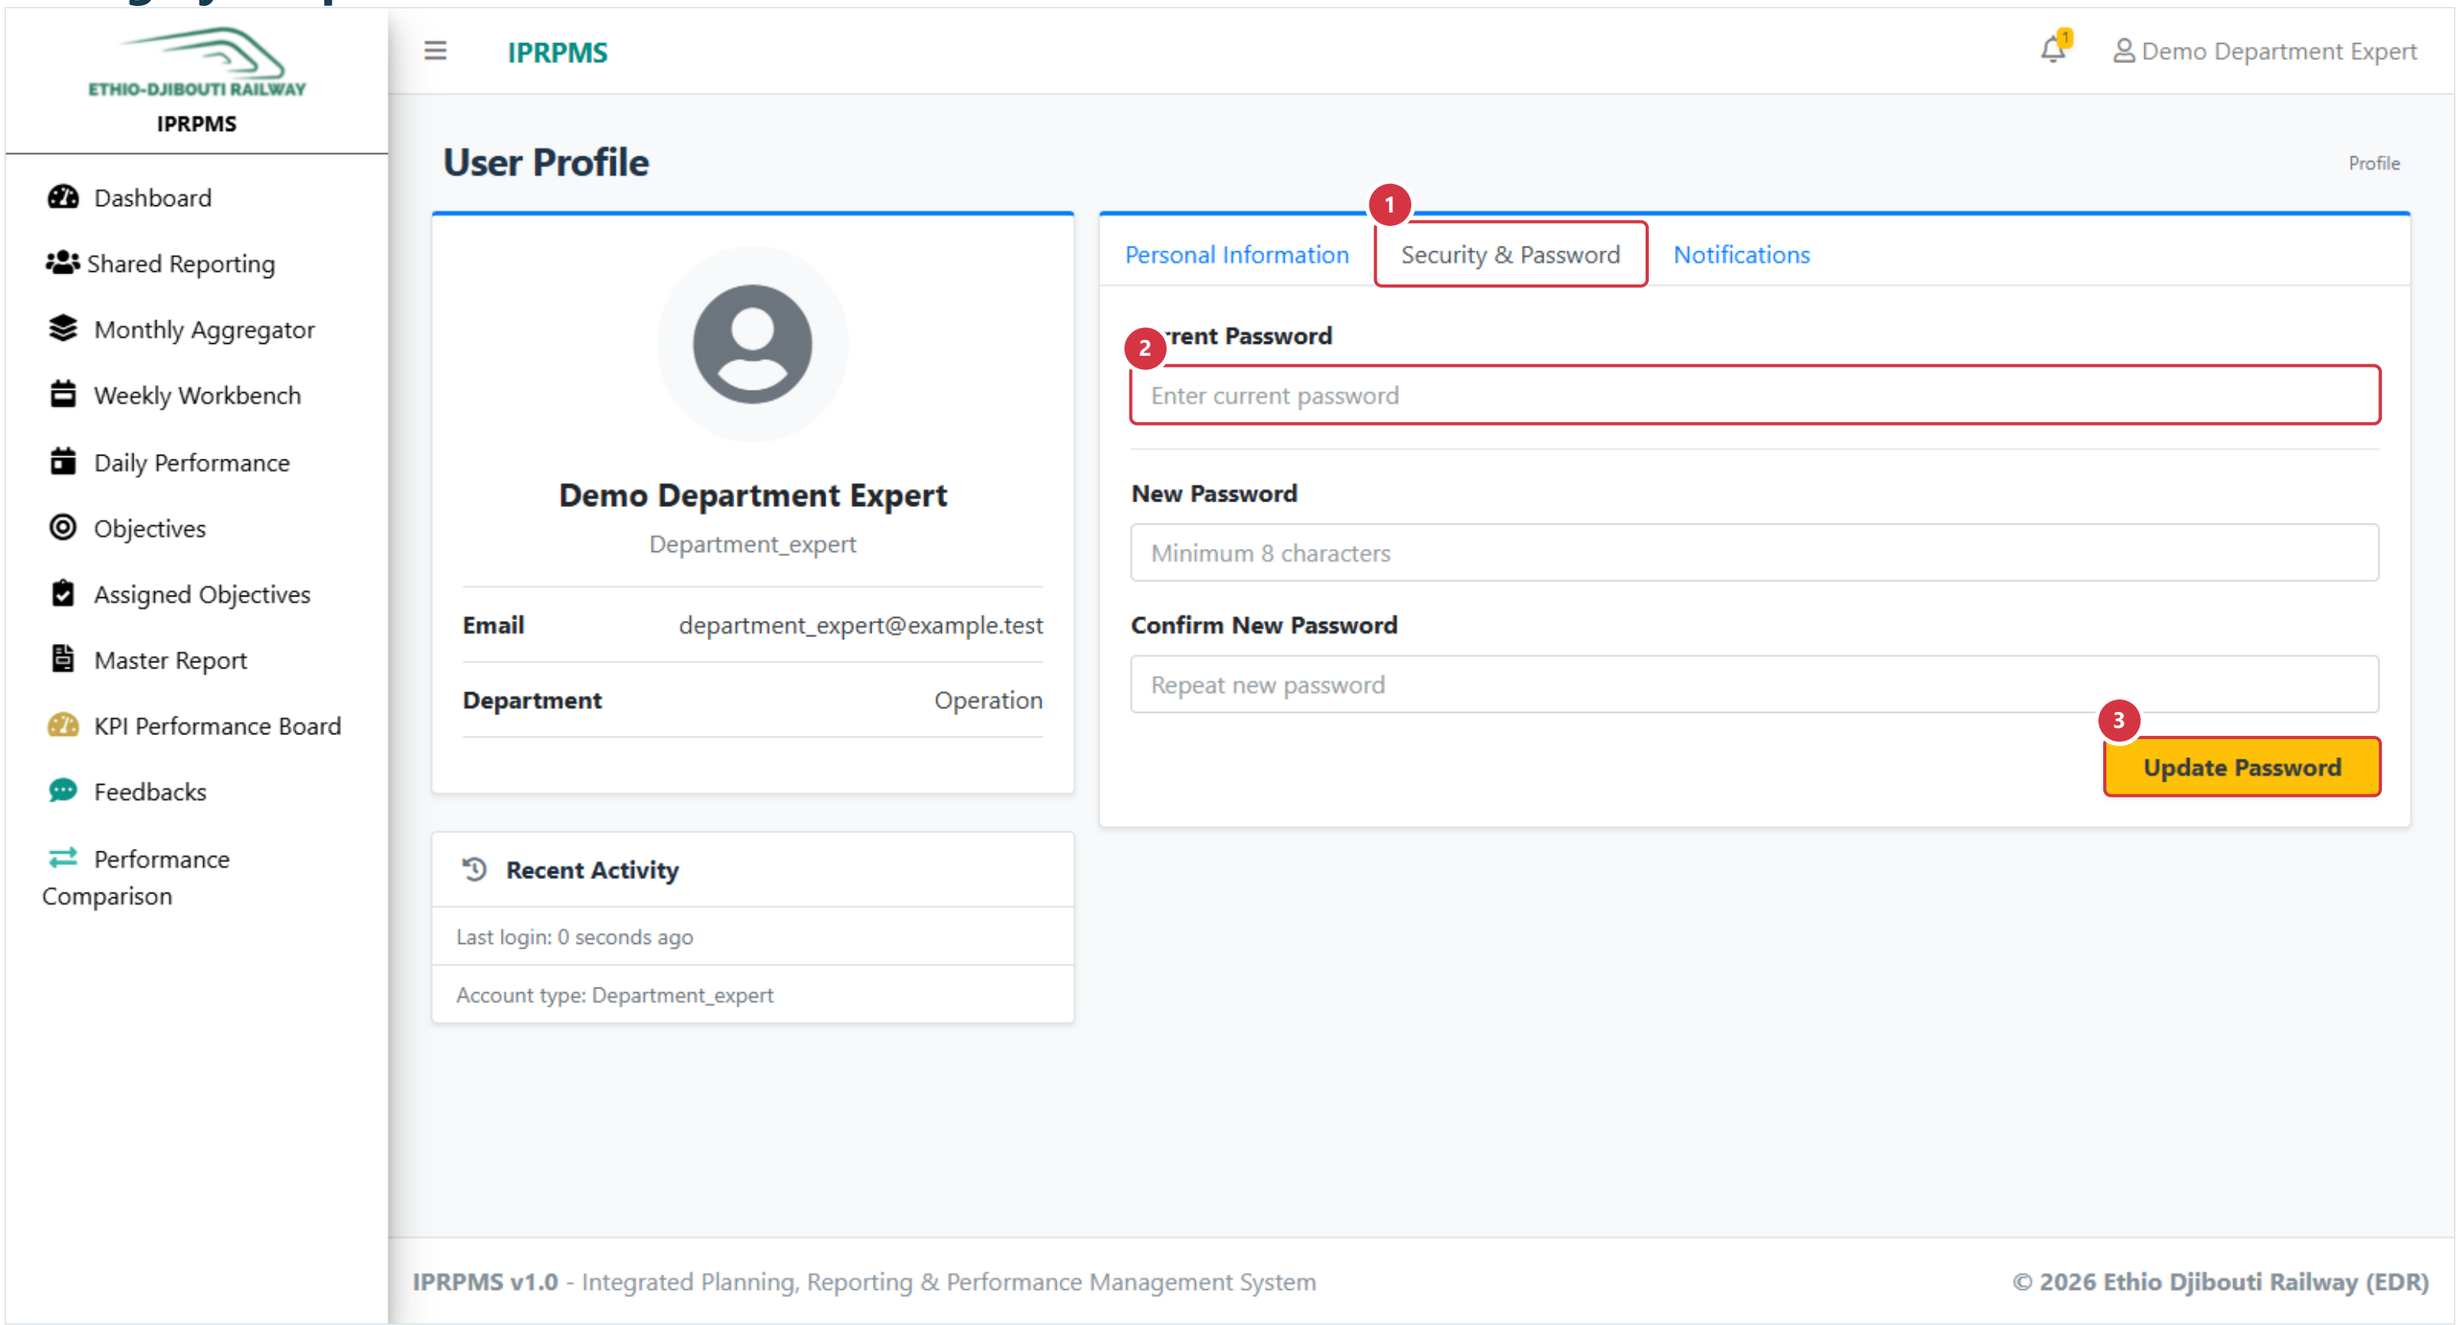

Edit your personal information

1. Click Personal Information in Profile.
2. Update Full Name or Email Address.
3. Click Save Changes and confirm the success message.

After this step: Department and role assignments are managed by the administrator, not through this form.

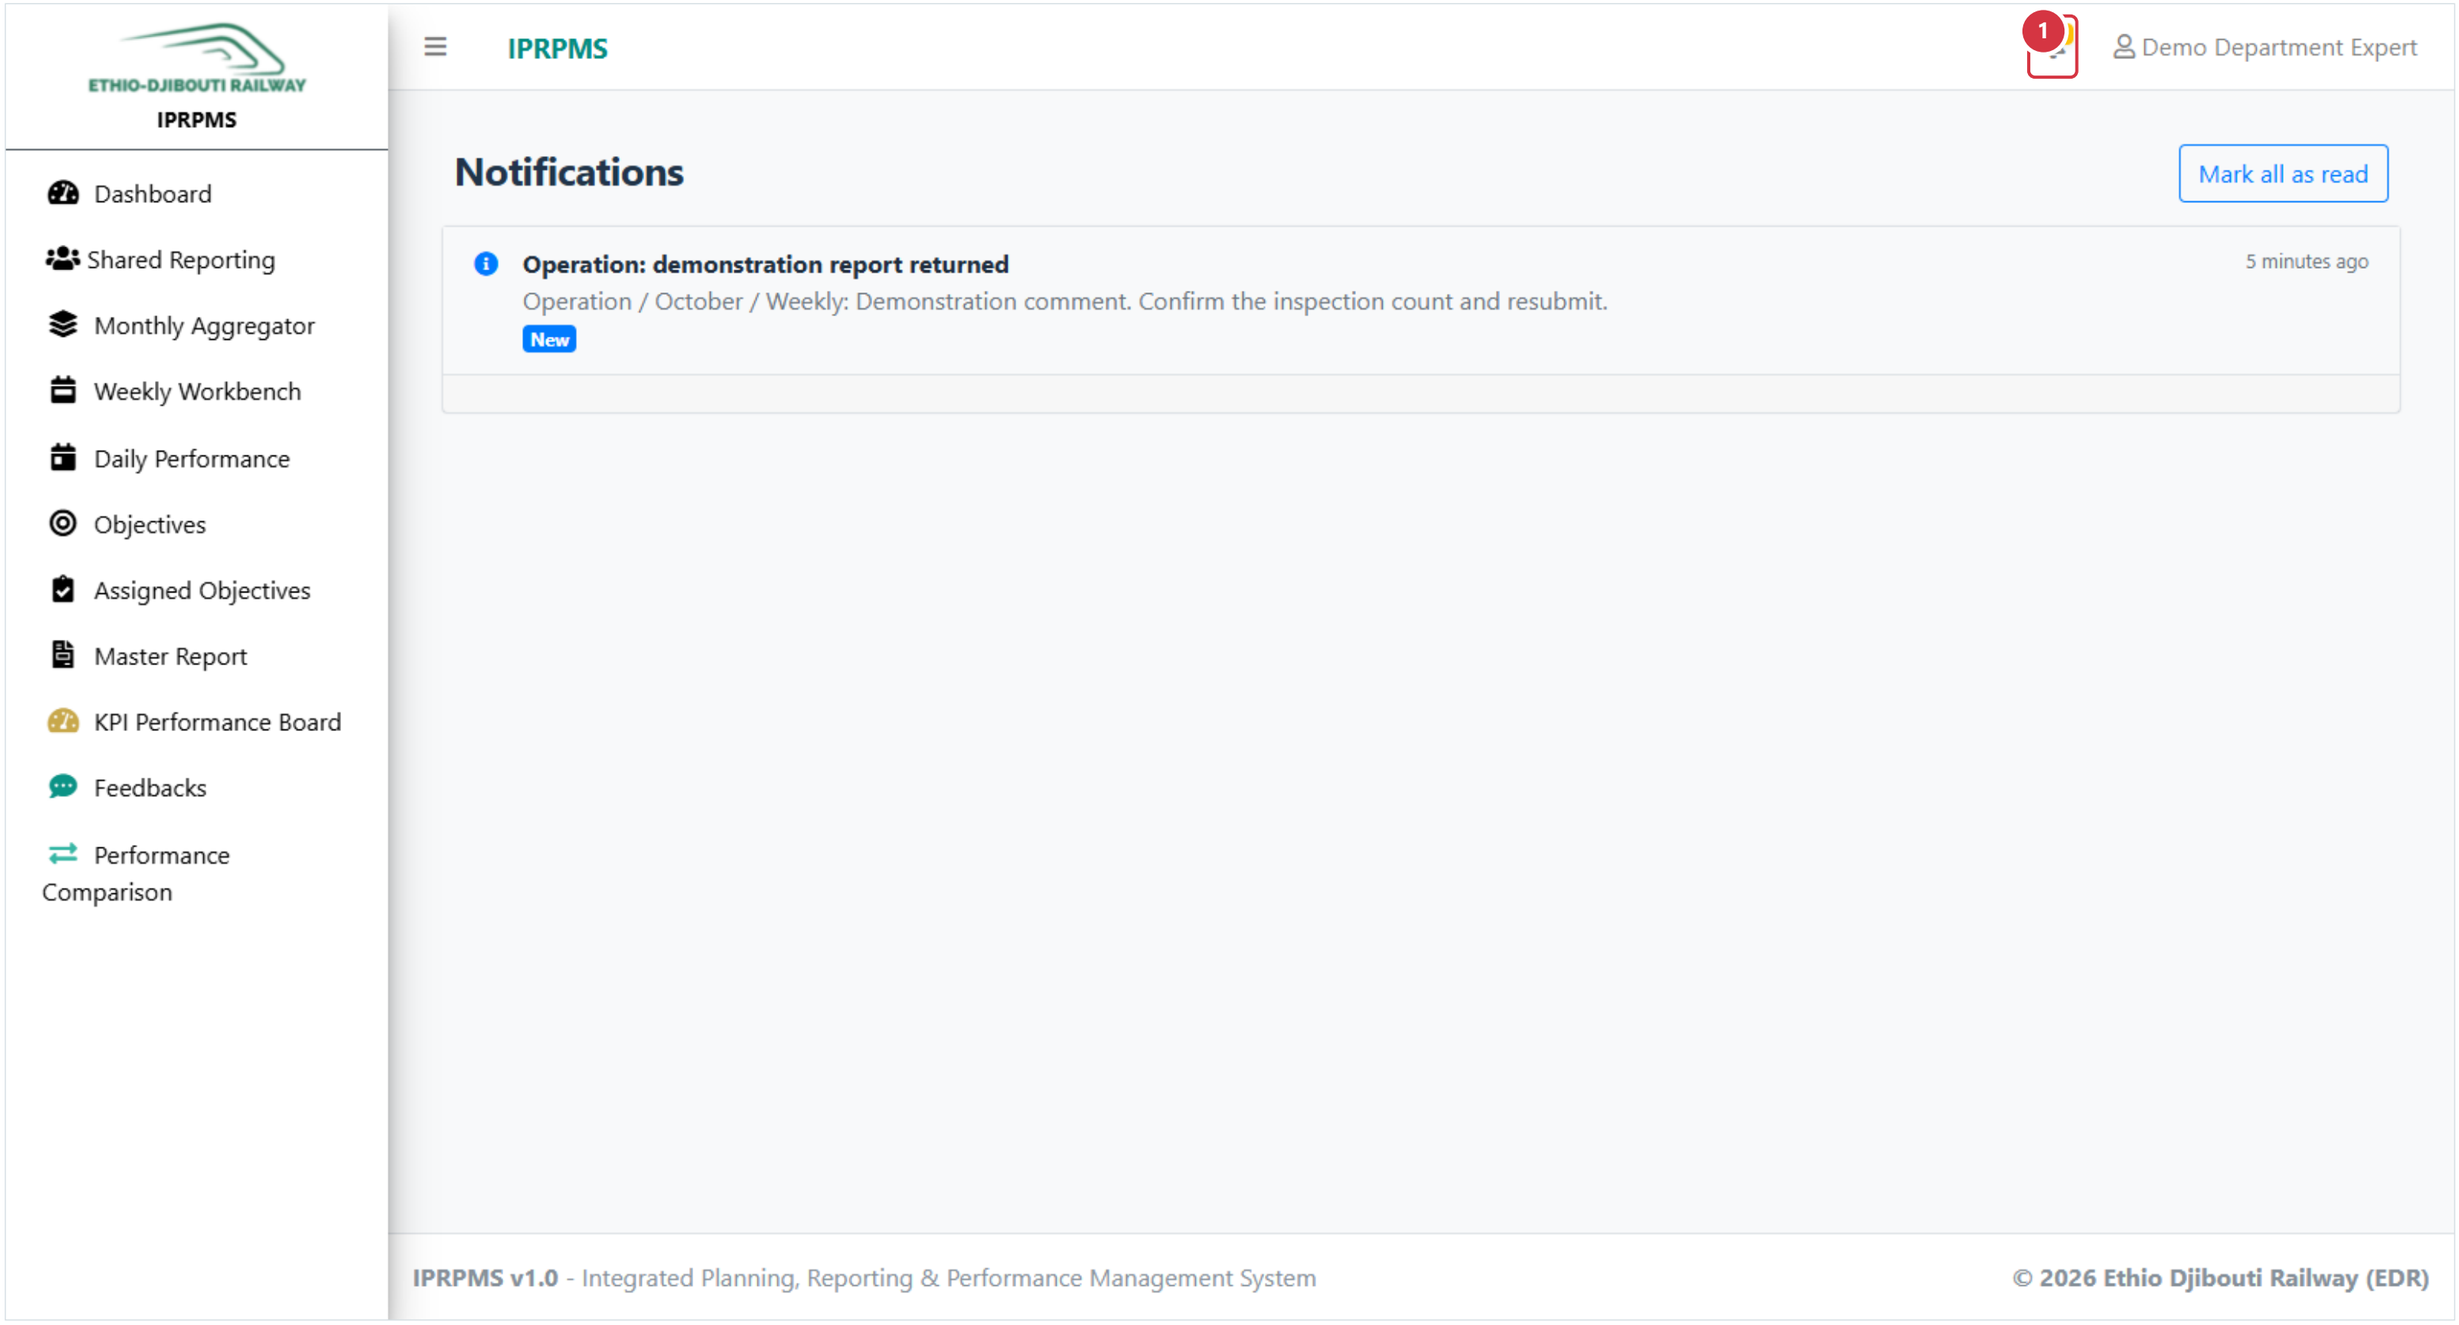

Change your password

1. Click Security & Password.
2. Enter your current password, a new password and its confirmation.
3. Click Update Password.

After this step: Use a private password. The fields are deliberately empty in this training capture.

Read workflow notifications

1. Open the notification bell or Notifications page.
2. Read the department, period, action and review comment.
3. Open the linked record or mark the notice read after acting on it.

After this step: Marking a notification read does not approve, correct or submit the underlying record.

Approve objectives and resolve planning exceptions

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

Final objective approval publishes the planned responsibilities to performer departments.

Before you click

Open the Directorate-reviewed hierarchy in Objectives. Check the main objective and all relevant sub objectives, not just the title.

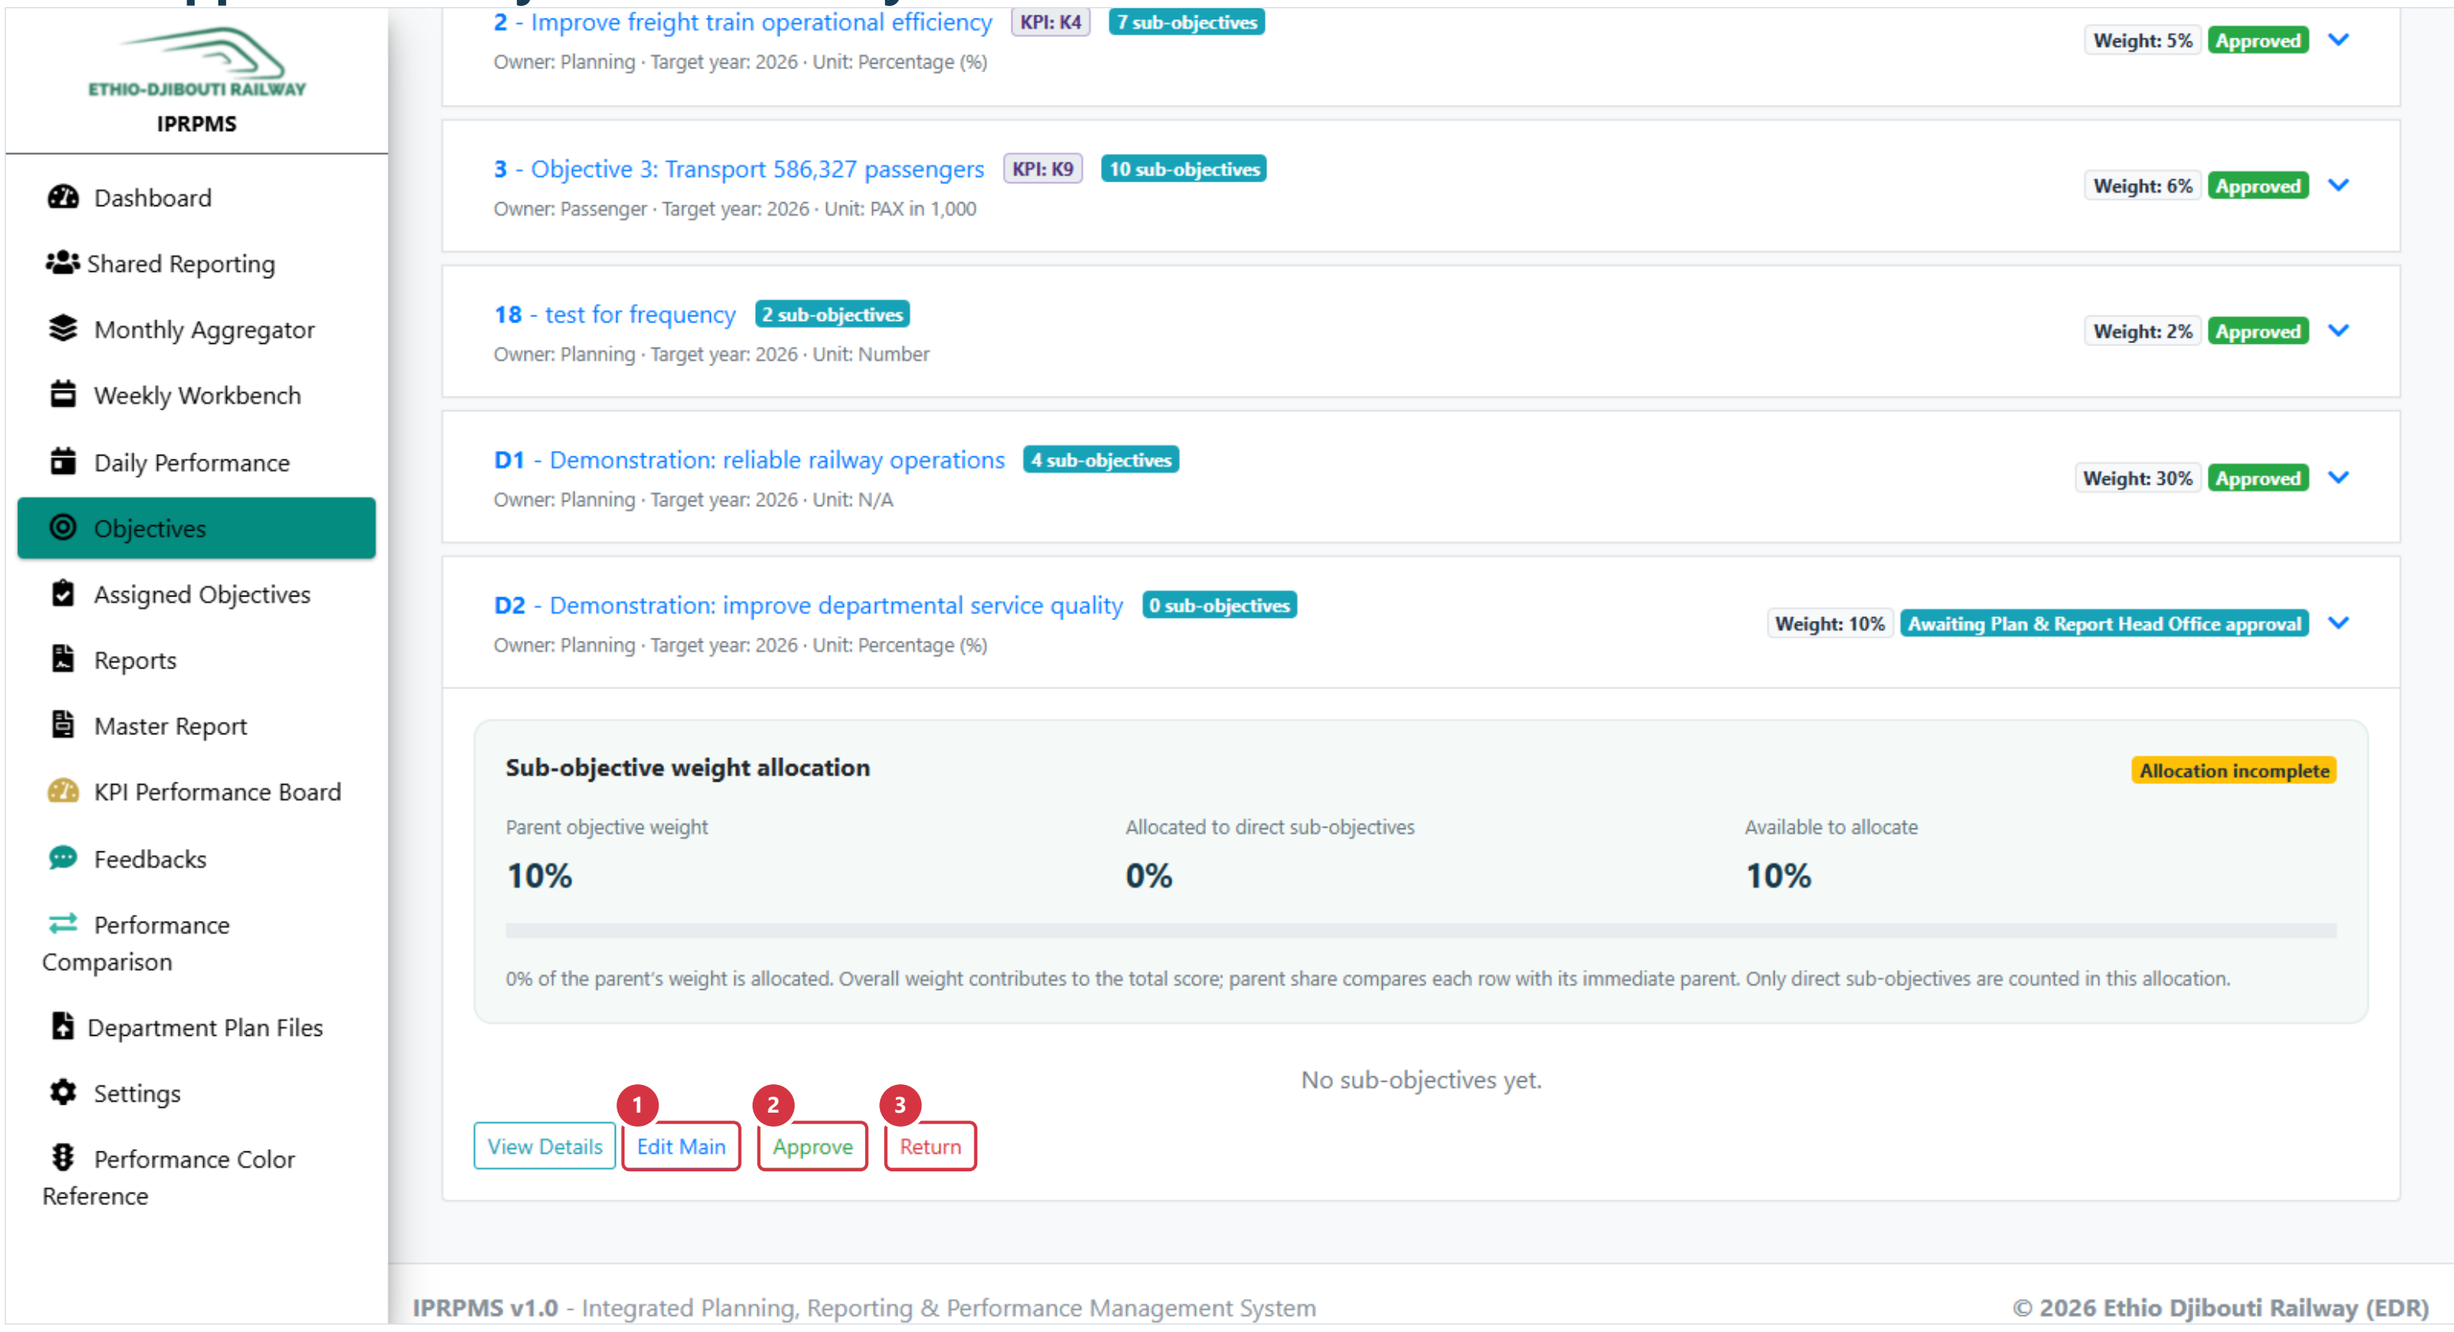

What to check

Read targets, units, performers, frequency, weights and reviewer changes. Require a reason for permitted edits. Evaluate recall or frequency requests on their stated business need.

How you know it worked

Use Approve for a correct hierarchy. Use Return with a precise comment otherwise. Departments then complete Chief and Directorate assignment acceptance before Experts report.

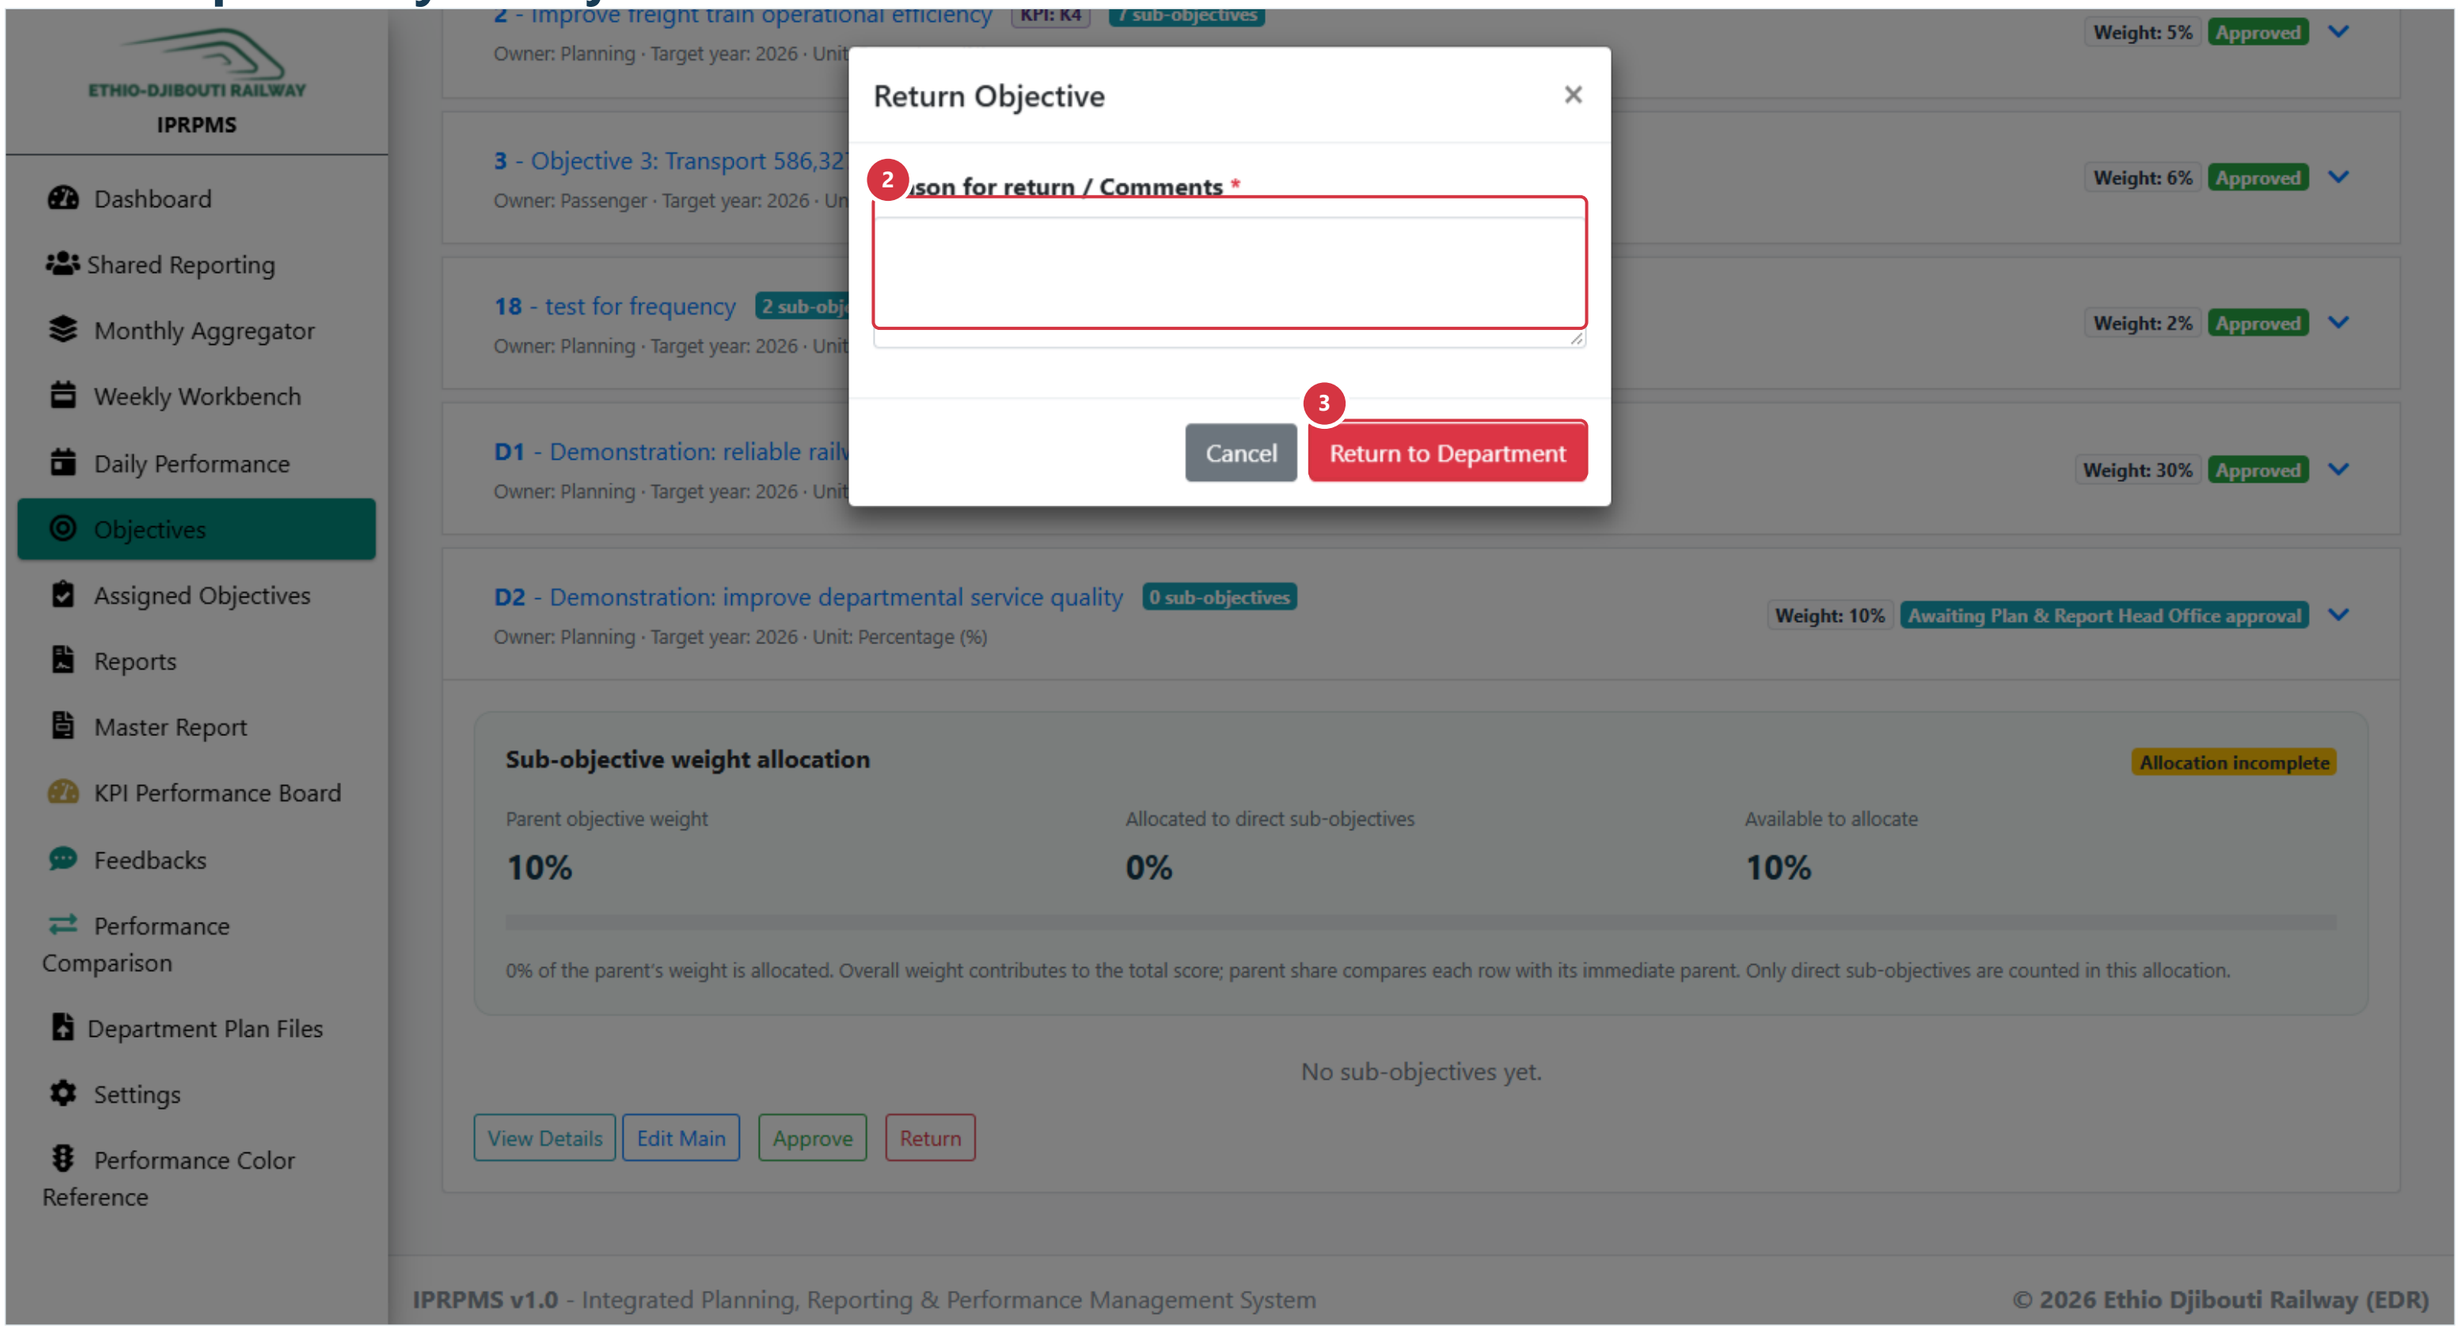

Chief: approve the objective hierarchy

1. Review the objective and use Edit Main when a permitted correction is needed.
2. Click Approve and confirm when the hierarchy is correct.
3. Use Return to request a correction with an explanatory comment.

After this step: Final objective approval publishes the assigned plan items to the performer departments.

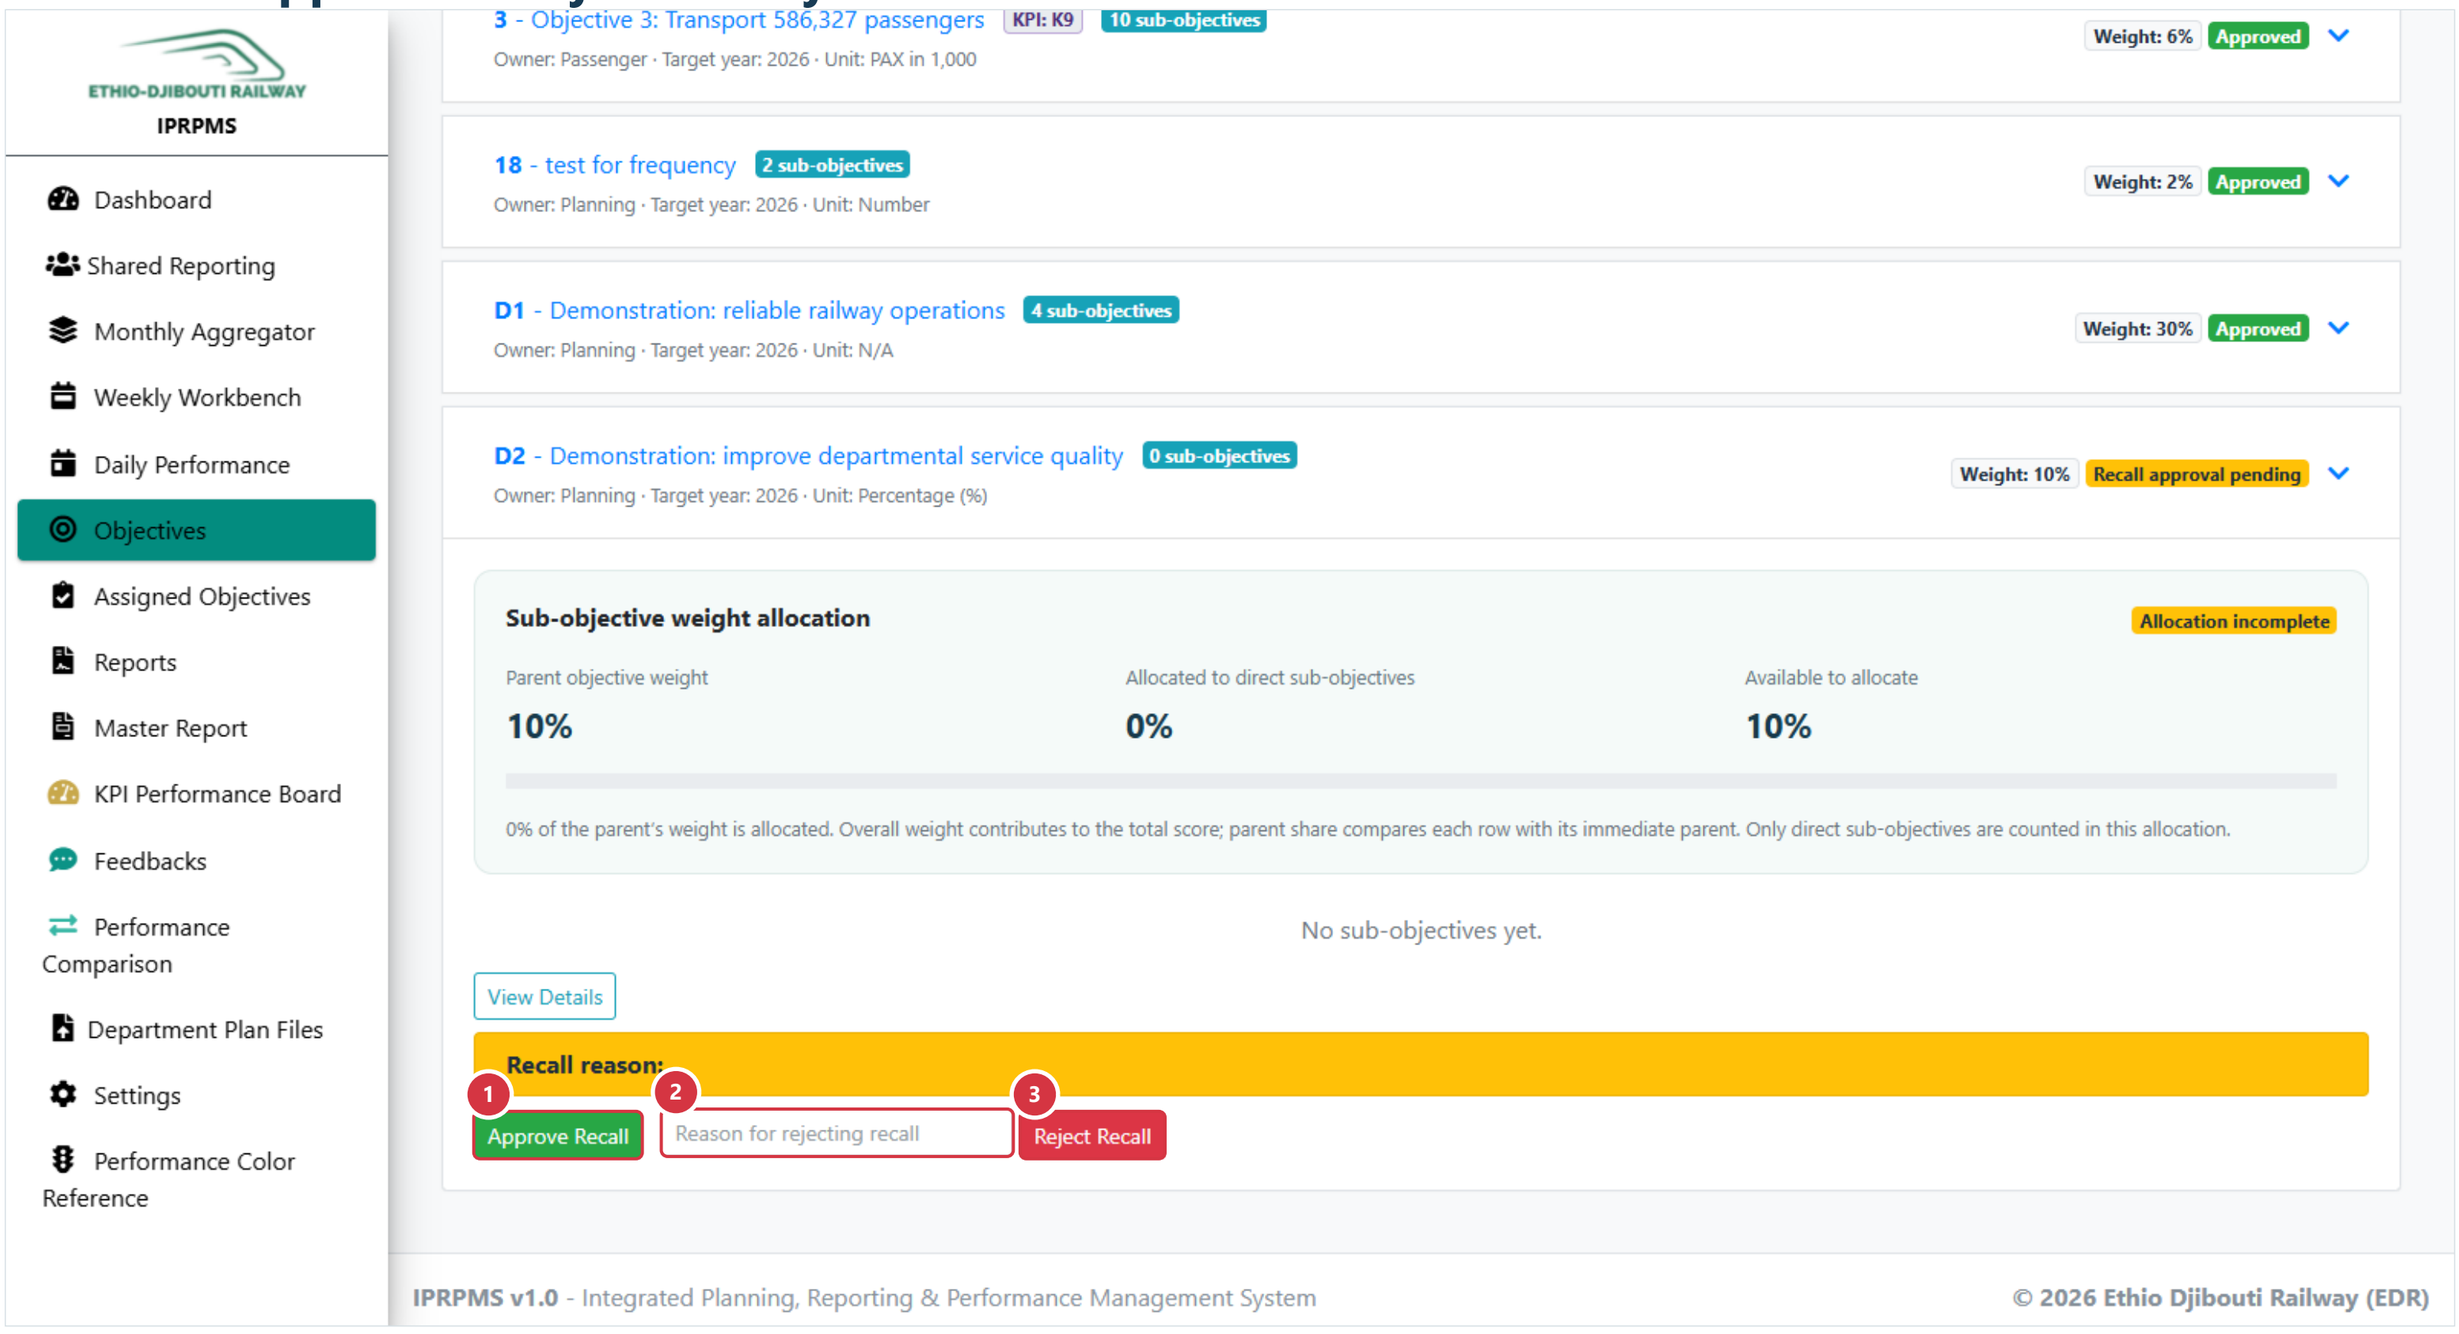

Chief: explain why an objective is returned

1. Click Return on the objective.
2. Enter the required Reason for return / Comments.
3. Click Return to Department in this dialog.

After this step: Read the actual dialog label as shown. The Expert must review the comment, correct and resubmit.

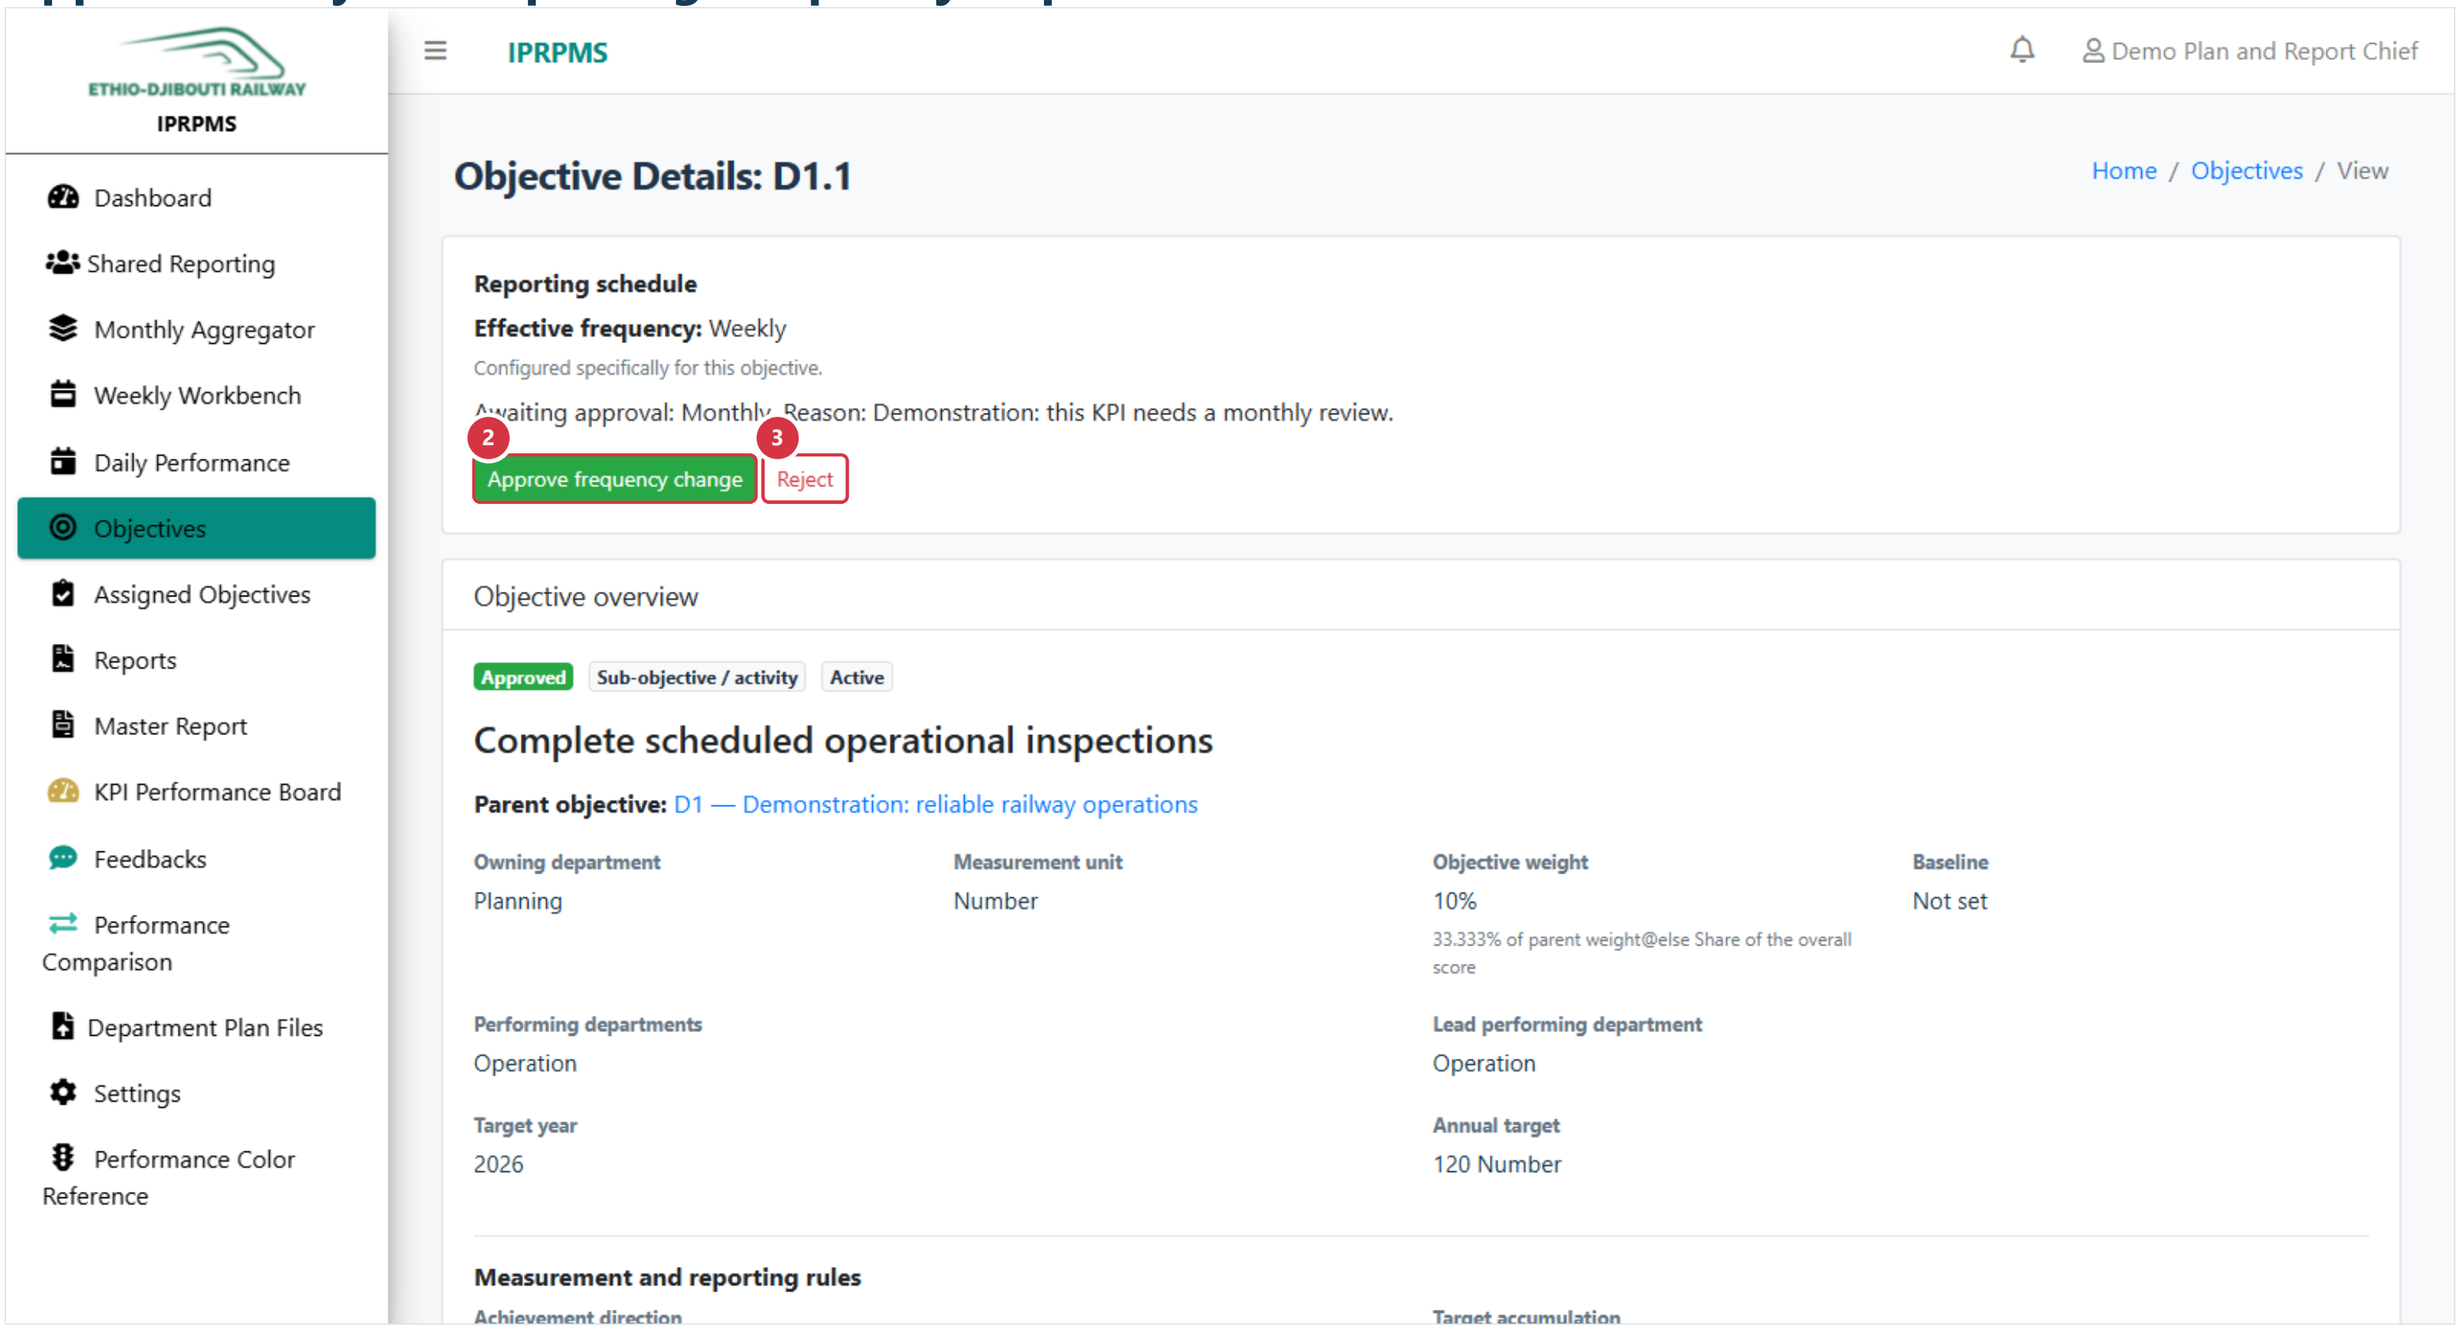

Reviewer: approve or reject an objective recall

1. Read the recall reason under the expanded objective.
2. Click Approve Recall to reopen editing.
3. To reject, enter a decision reason and click Reject Recall.

After this step: The approved recall returns the hierarchy for correction. The Expert then saves and submits it through review again.

Approve or reject a reporting-frequency request

1. Read the requested frequency and change reason.
2. Click Approve frequency change to accept it.
3. Click Reject when the request should not take effect.

After this step: After approval, the reporting frequency determines which performance entry screen lists this KPI.

Give the final performance decision

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

This is the organization's final approval of the numeric departmental results.

Before you click

Confirm department, year, frequency and reporting period. Read evidence and comments from each previous reviewer.

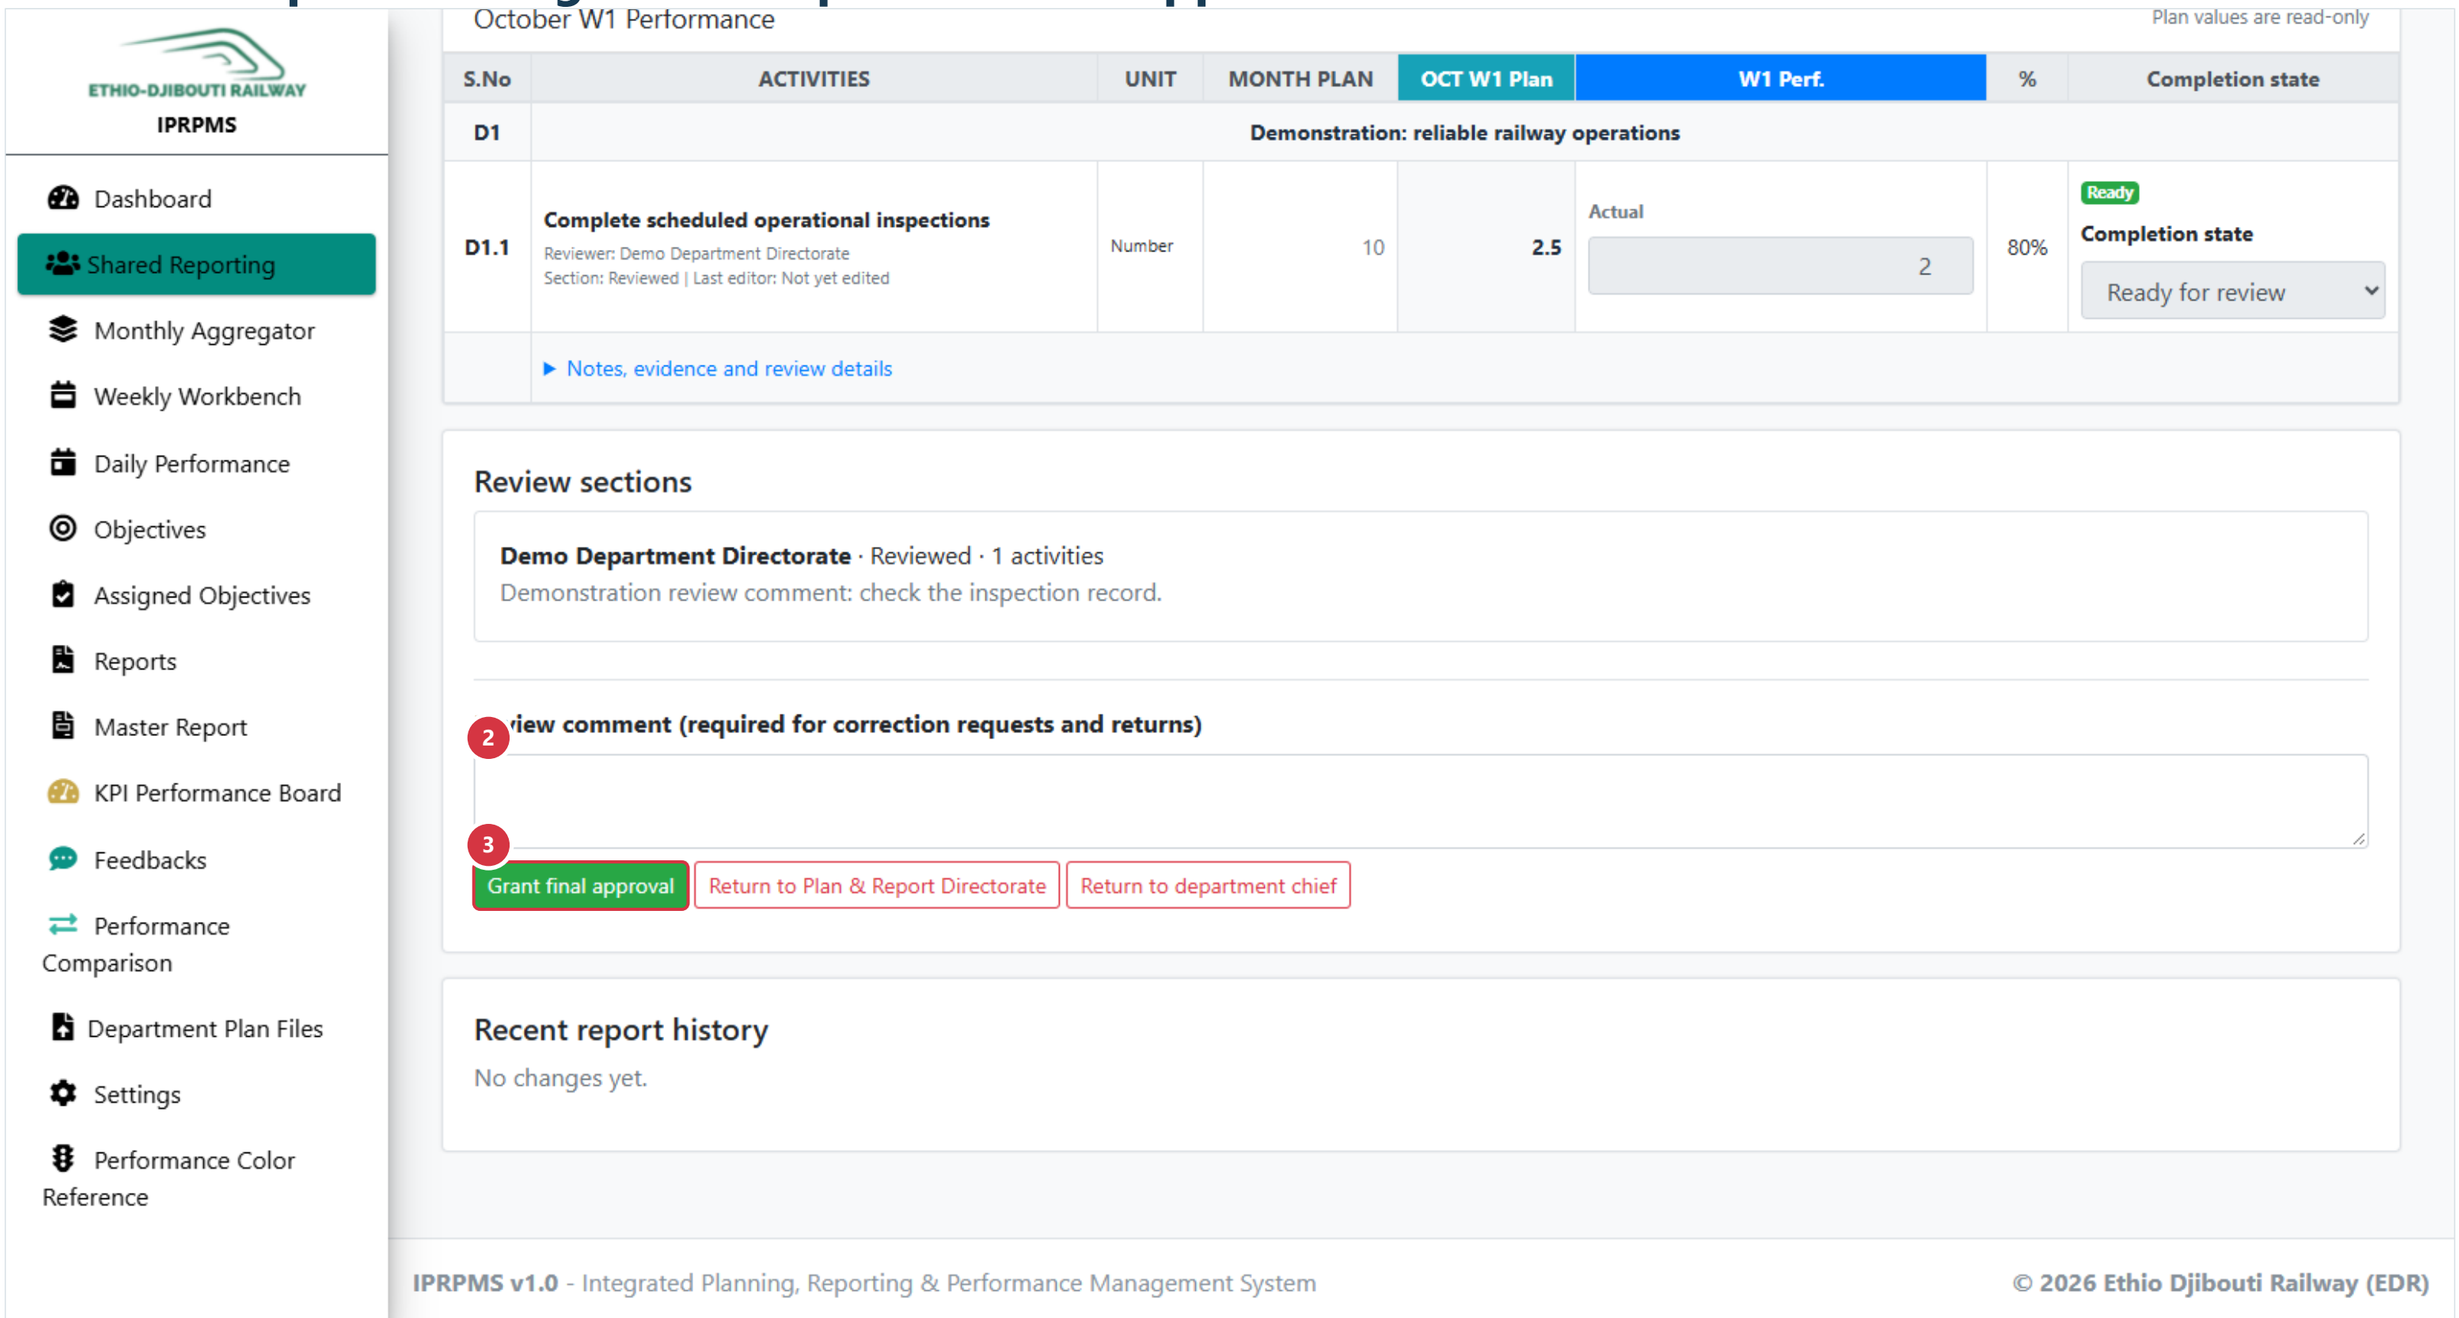

What to check

Grant final approval only for complete supported results. If returning, select the appropriate Plan and Report Directorate or Department Chief route and explain the correction.

How you know it worked

The report status records the final decision. Final approved results become eligible for official reporting and comparison.

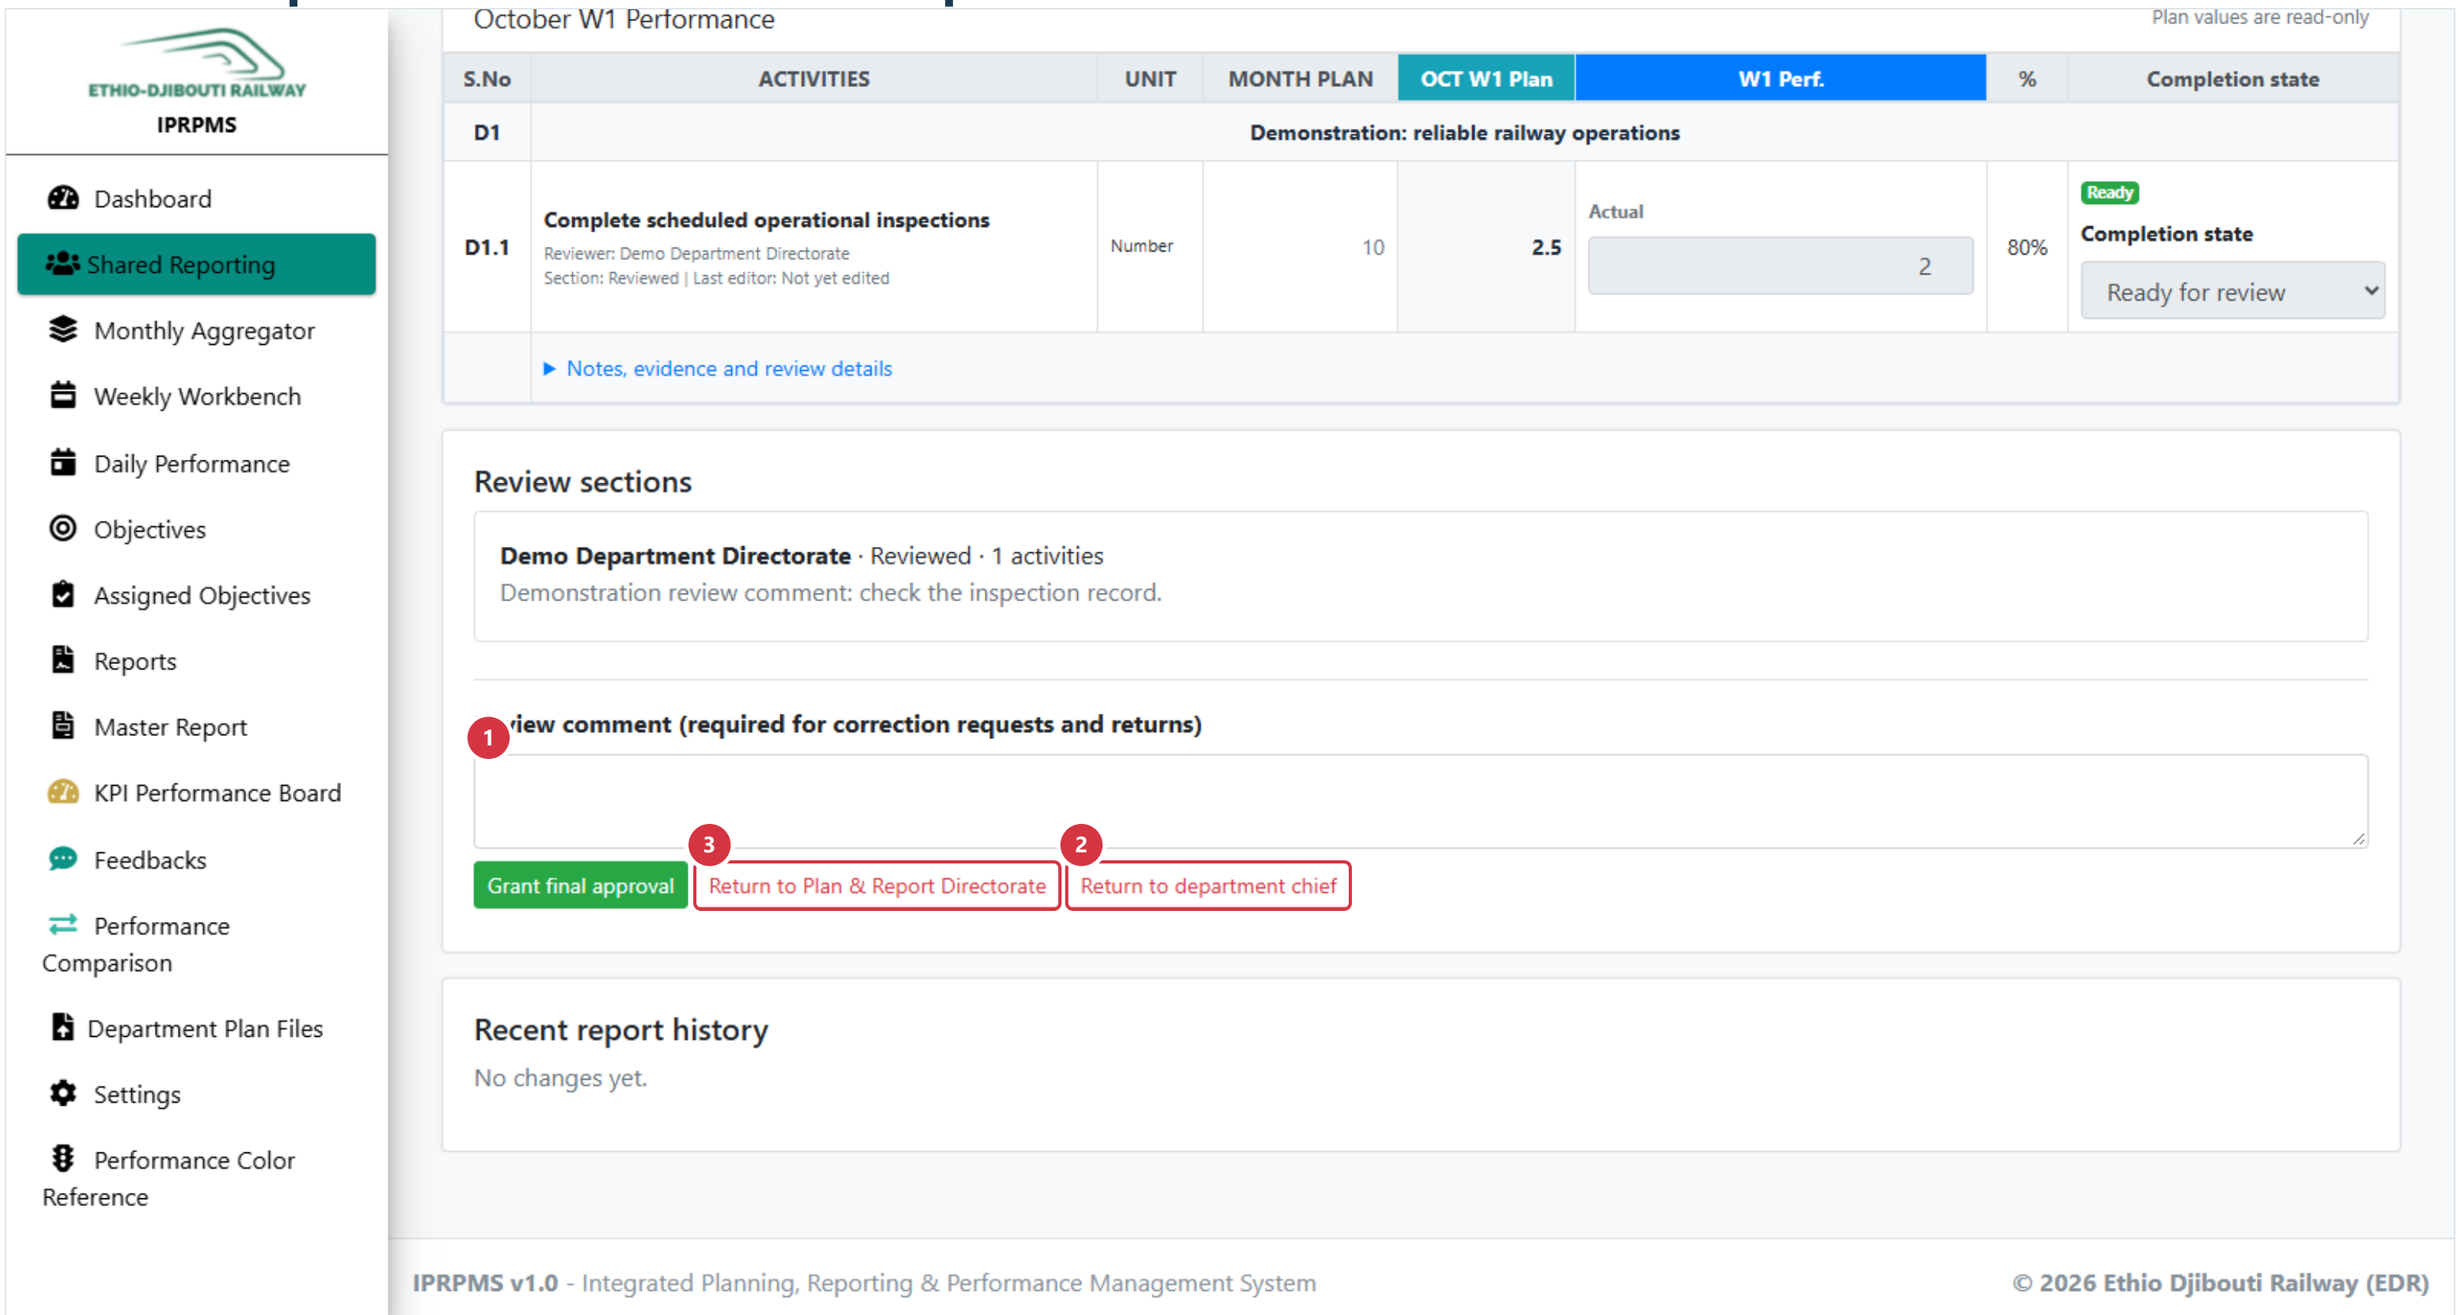

Plan and Report Chief: grant final performance approval

1. Verify the report belongs to the correct department and period.
2. Review the figures and the accumulated comments.
3. Click Grant final approval.

After this step: Final approved results become eligible for official reporting and comparison.

Plan and Report Chief: return to the responsible level

1. Enter the required return comment.
2. Choose Return to department chief for departmental corrections.
3. Choose Return to Plan & Report Directorate for a Directorate review correction.

After this step: The notified recipient can identify the originating department, reporting period and reason.

Approve, lock or reopen a period distribution

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

A locked period-weight distribution protects the approved scoring basis for that period.

Before you click

Confirm the distribution's department, year and period and the Directorate review.

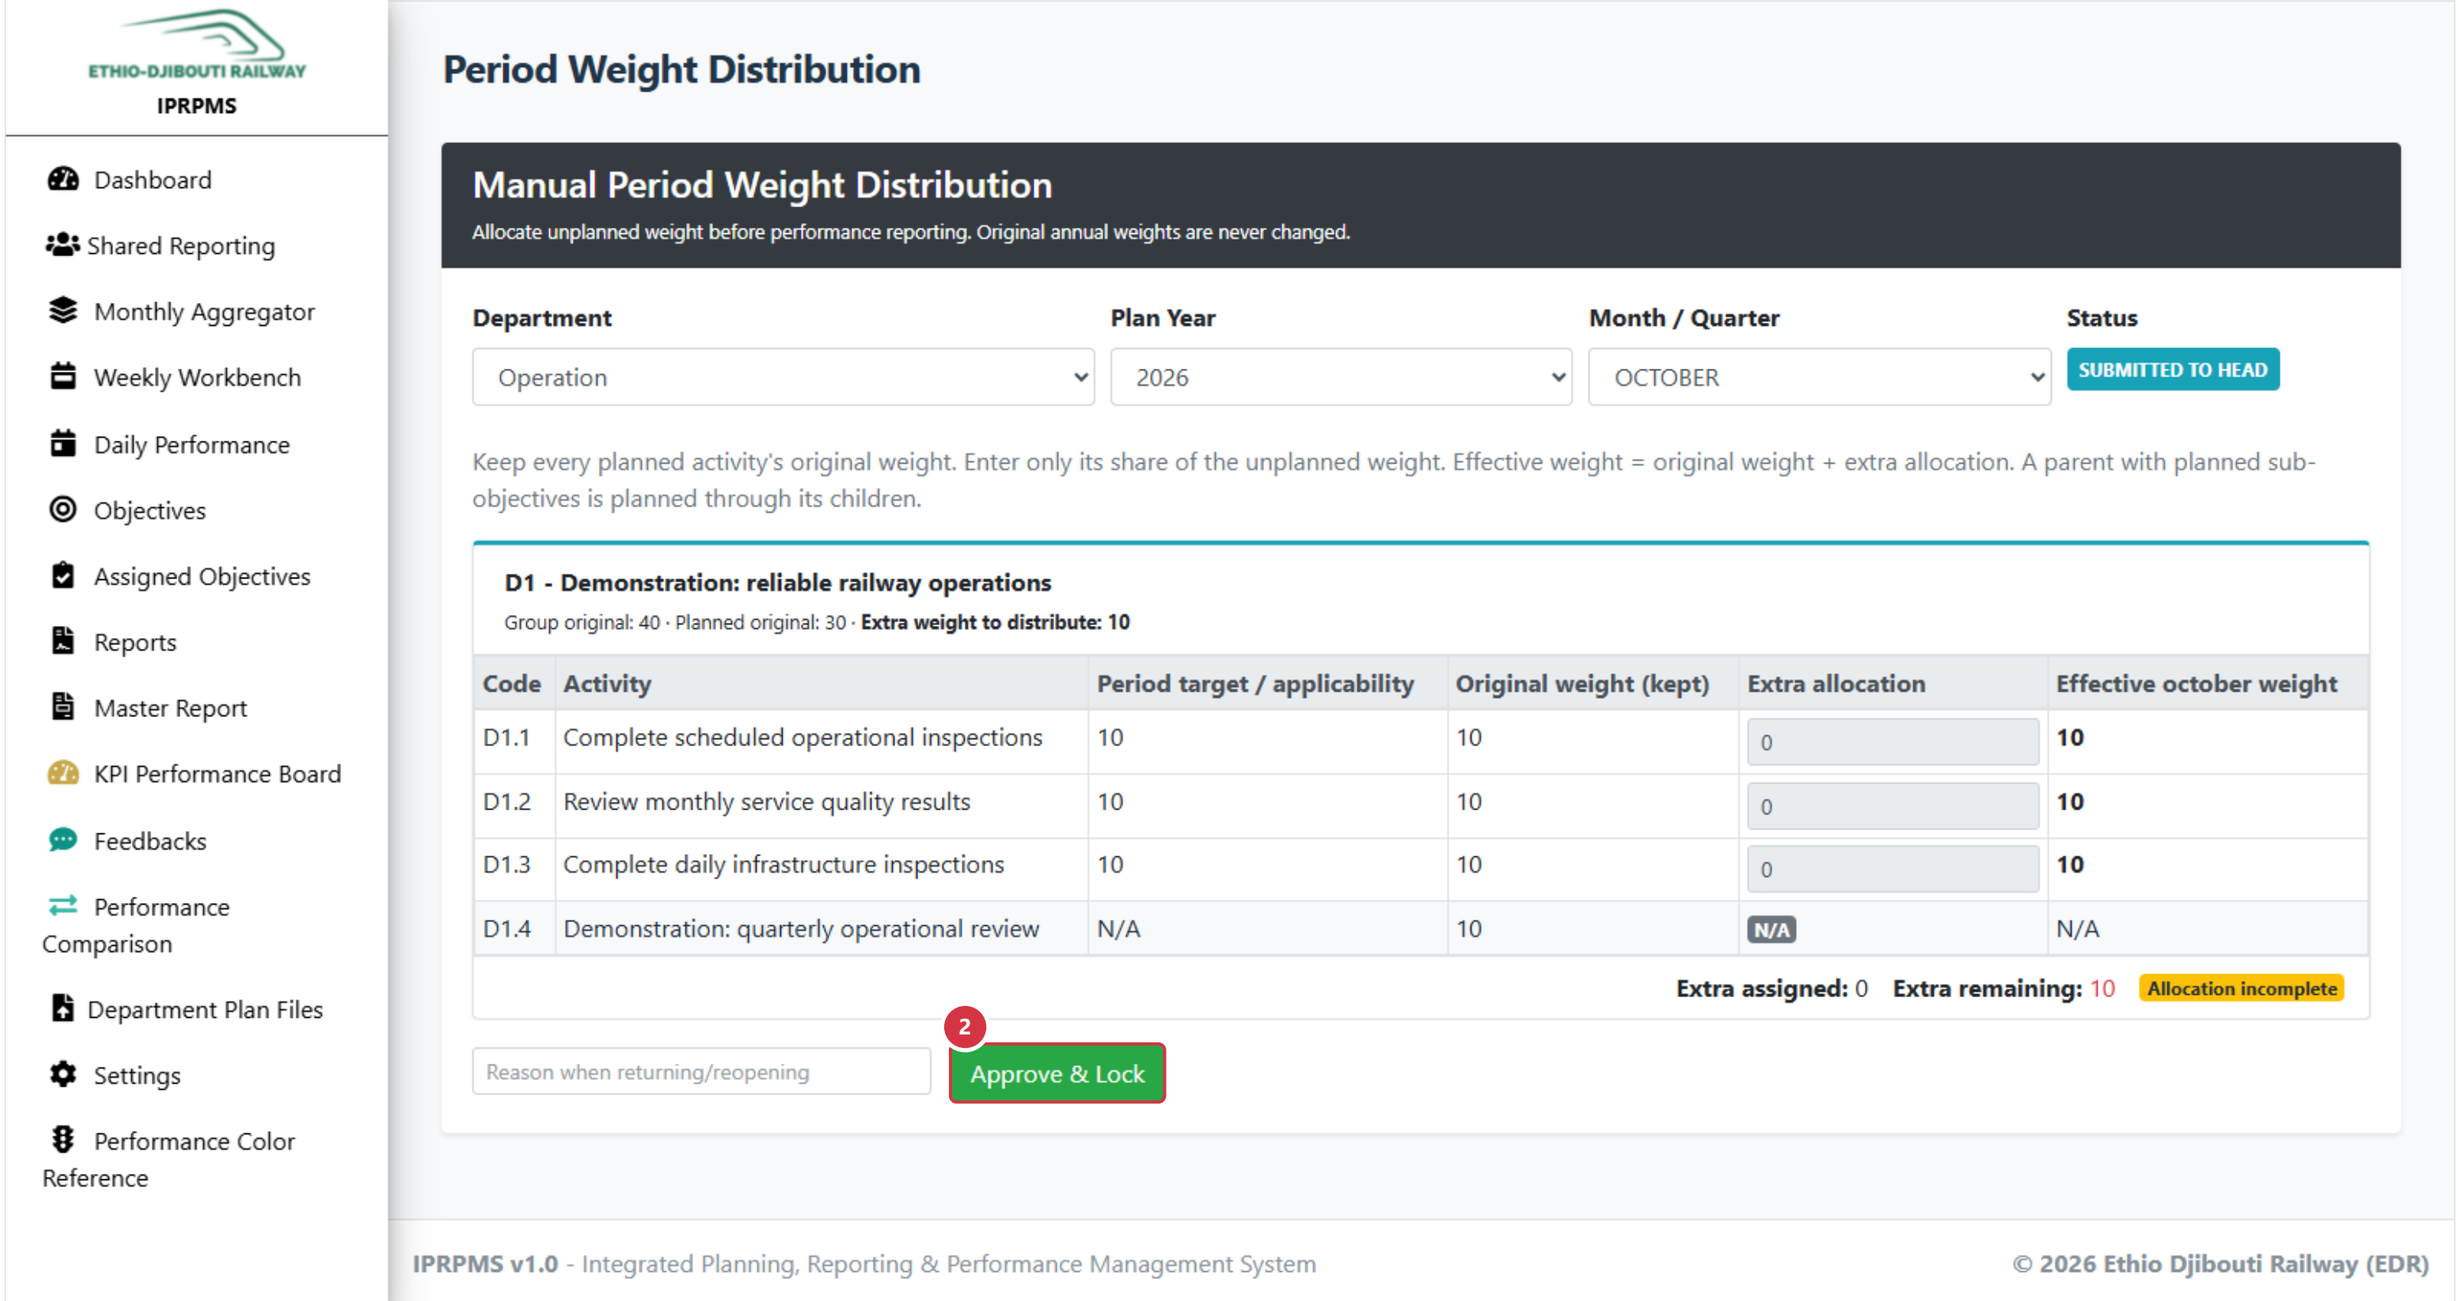

What to check

Check planned-activity eligibility and the available weight. Reopen a locked distribution only when an authorized correction is necessary and record the reason.

How you know it worked

Use Approve & Lock for a valid distribution. A later authorized reopening follows the distribution's own workflow; it does not silently rewrite annual weights.

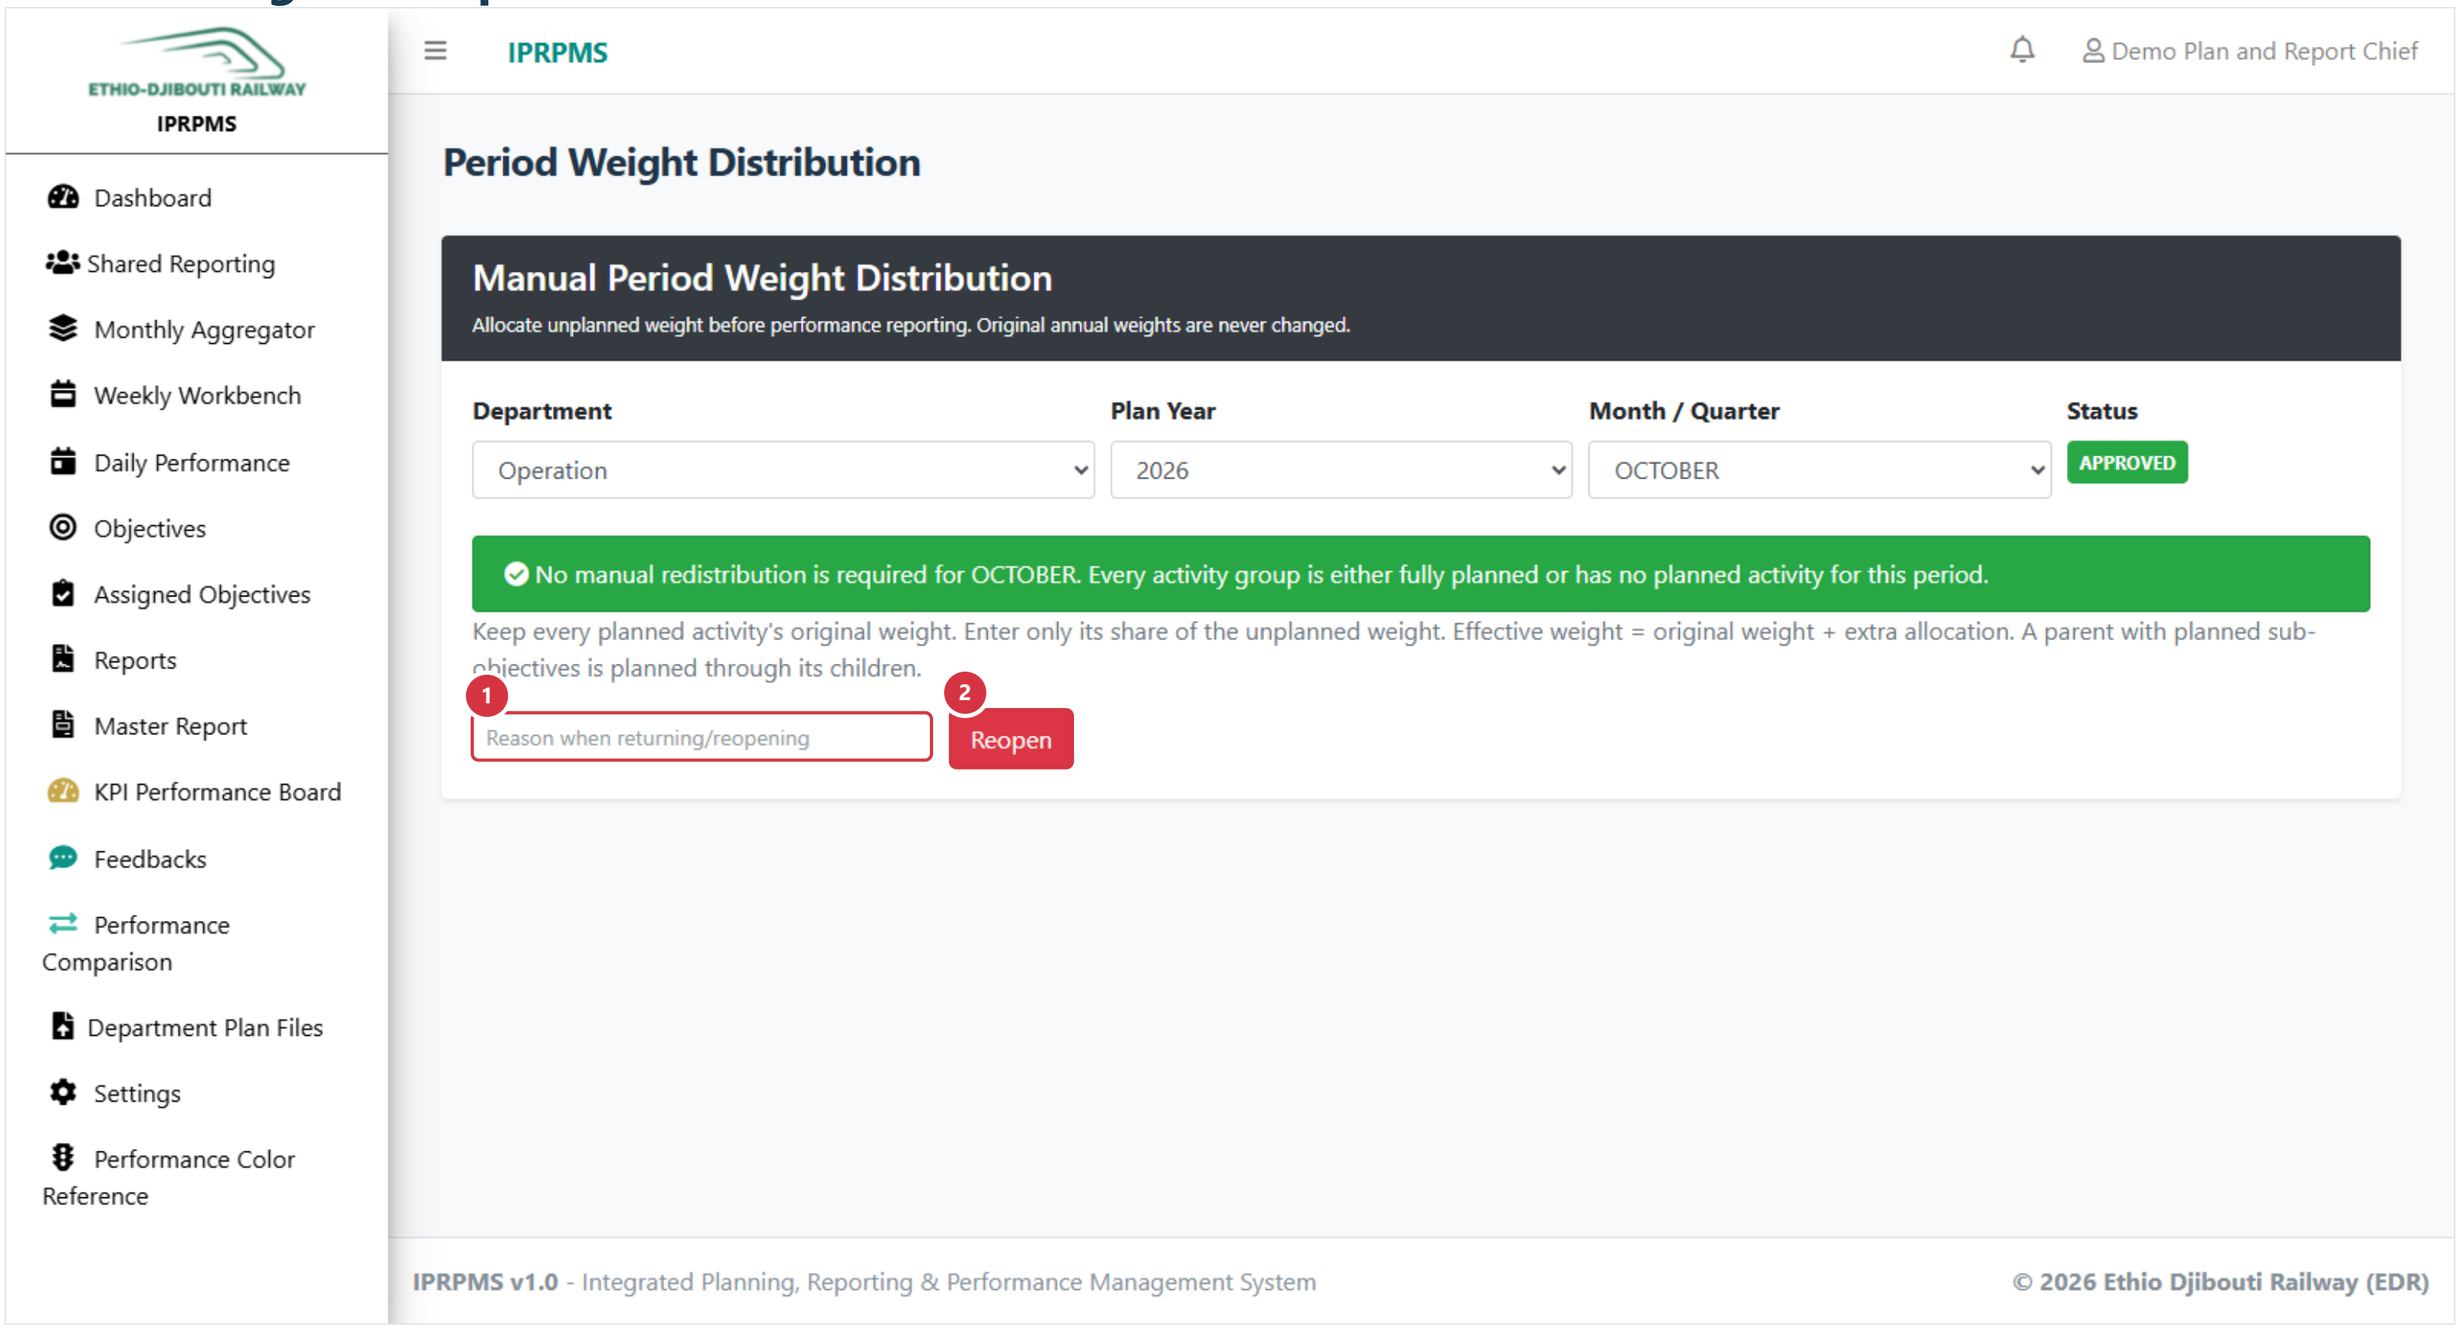

Period Weights: Chief approval and lock

1. Check the distribution and the selected period.
2. Click Approve & Lock to make the approved weights official.

After this step: The approved distribution is locked. A later reopen requires a reason.

Period Weights: reopen a locked distribution

1. Enter the reason for reopening.
2. Click Reopen.
3. The Expert corrects and submits the distribution through review again.

After this step: Reopening removes the approval on this distribution so the correction can be reviewed.

Approve reports, release feedback and approve narration

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

Numeric results, written reports, formal feedback and plan narration are related but have distinct final decisions.

Before you click

Read the submitted document and verify scope, year and period. Before final feedback release, confirm the required underlying performance is approved.

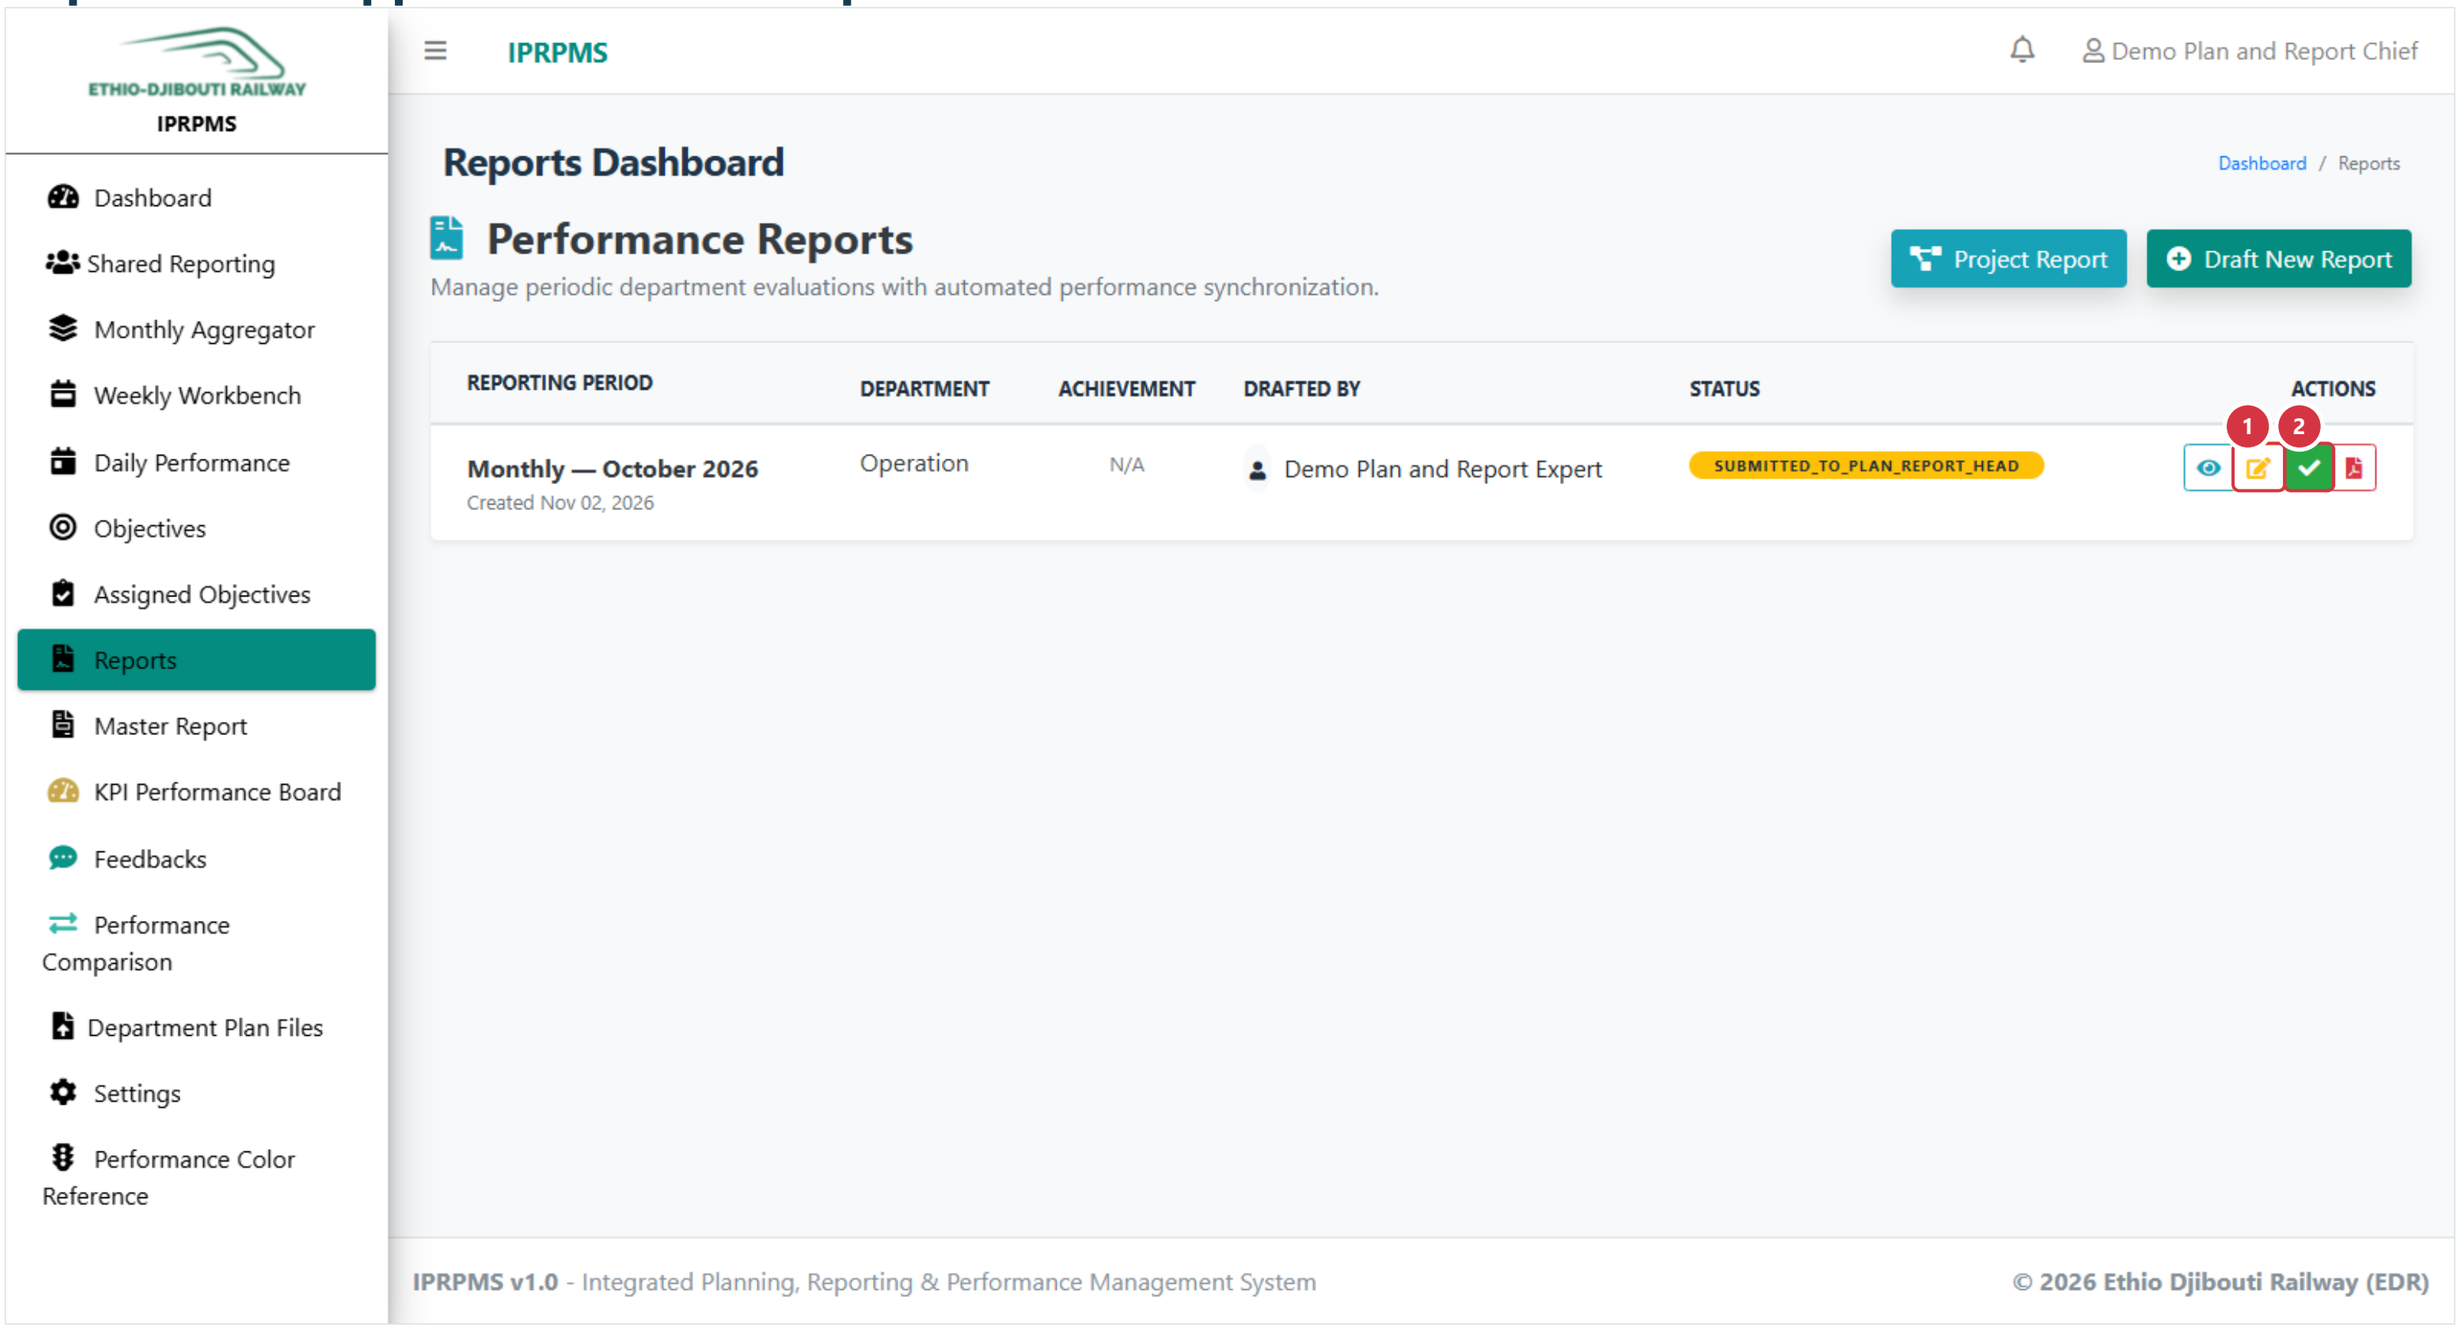

What to check

Use the Reports list approval action, finalize and release feedback from its list, and Save & Approve Narration on the narration form. Do not confuse a PDF/Word download with an approval.

How you know it worked

The approved document or released feedback carries its own updated status. The Department Chief can read released departmental feedback.

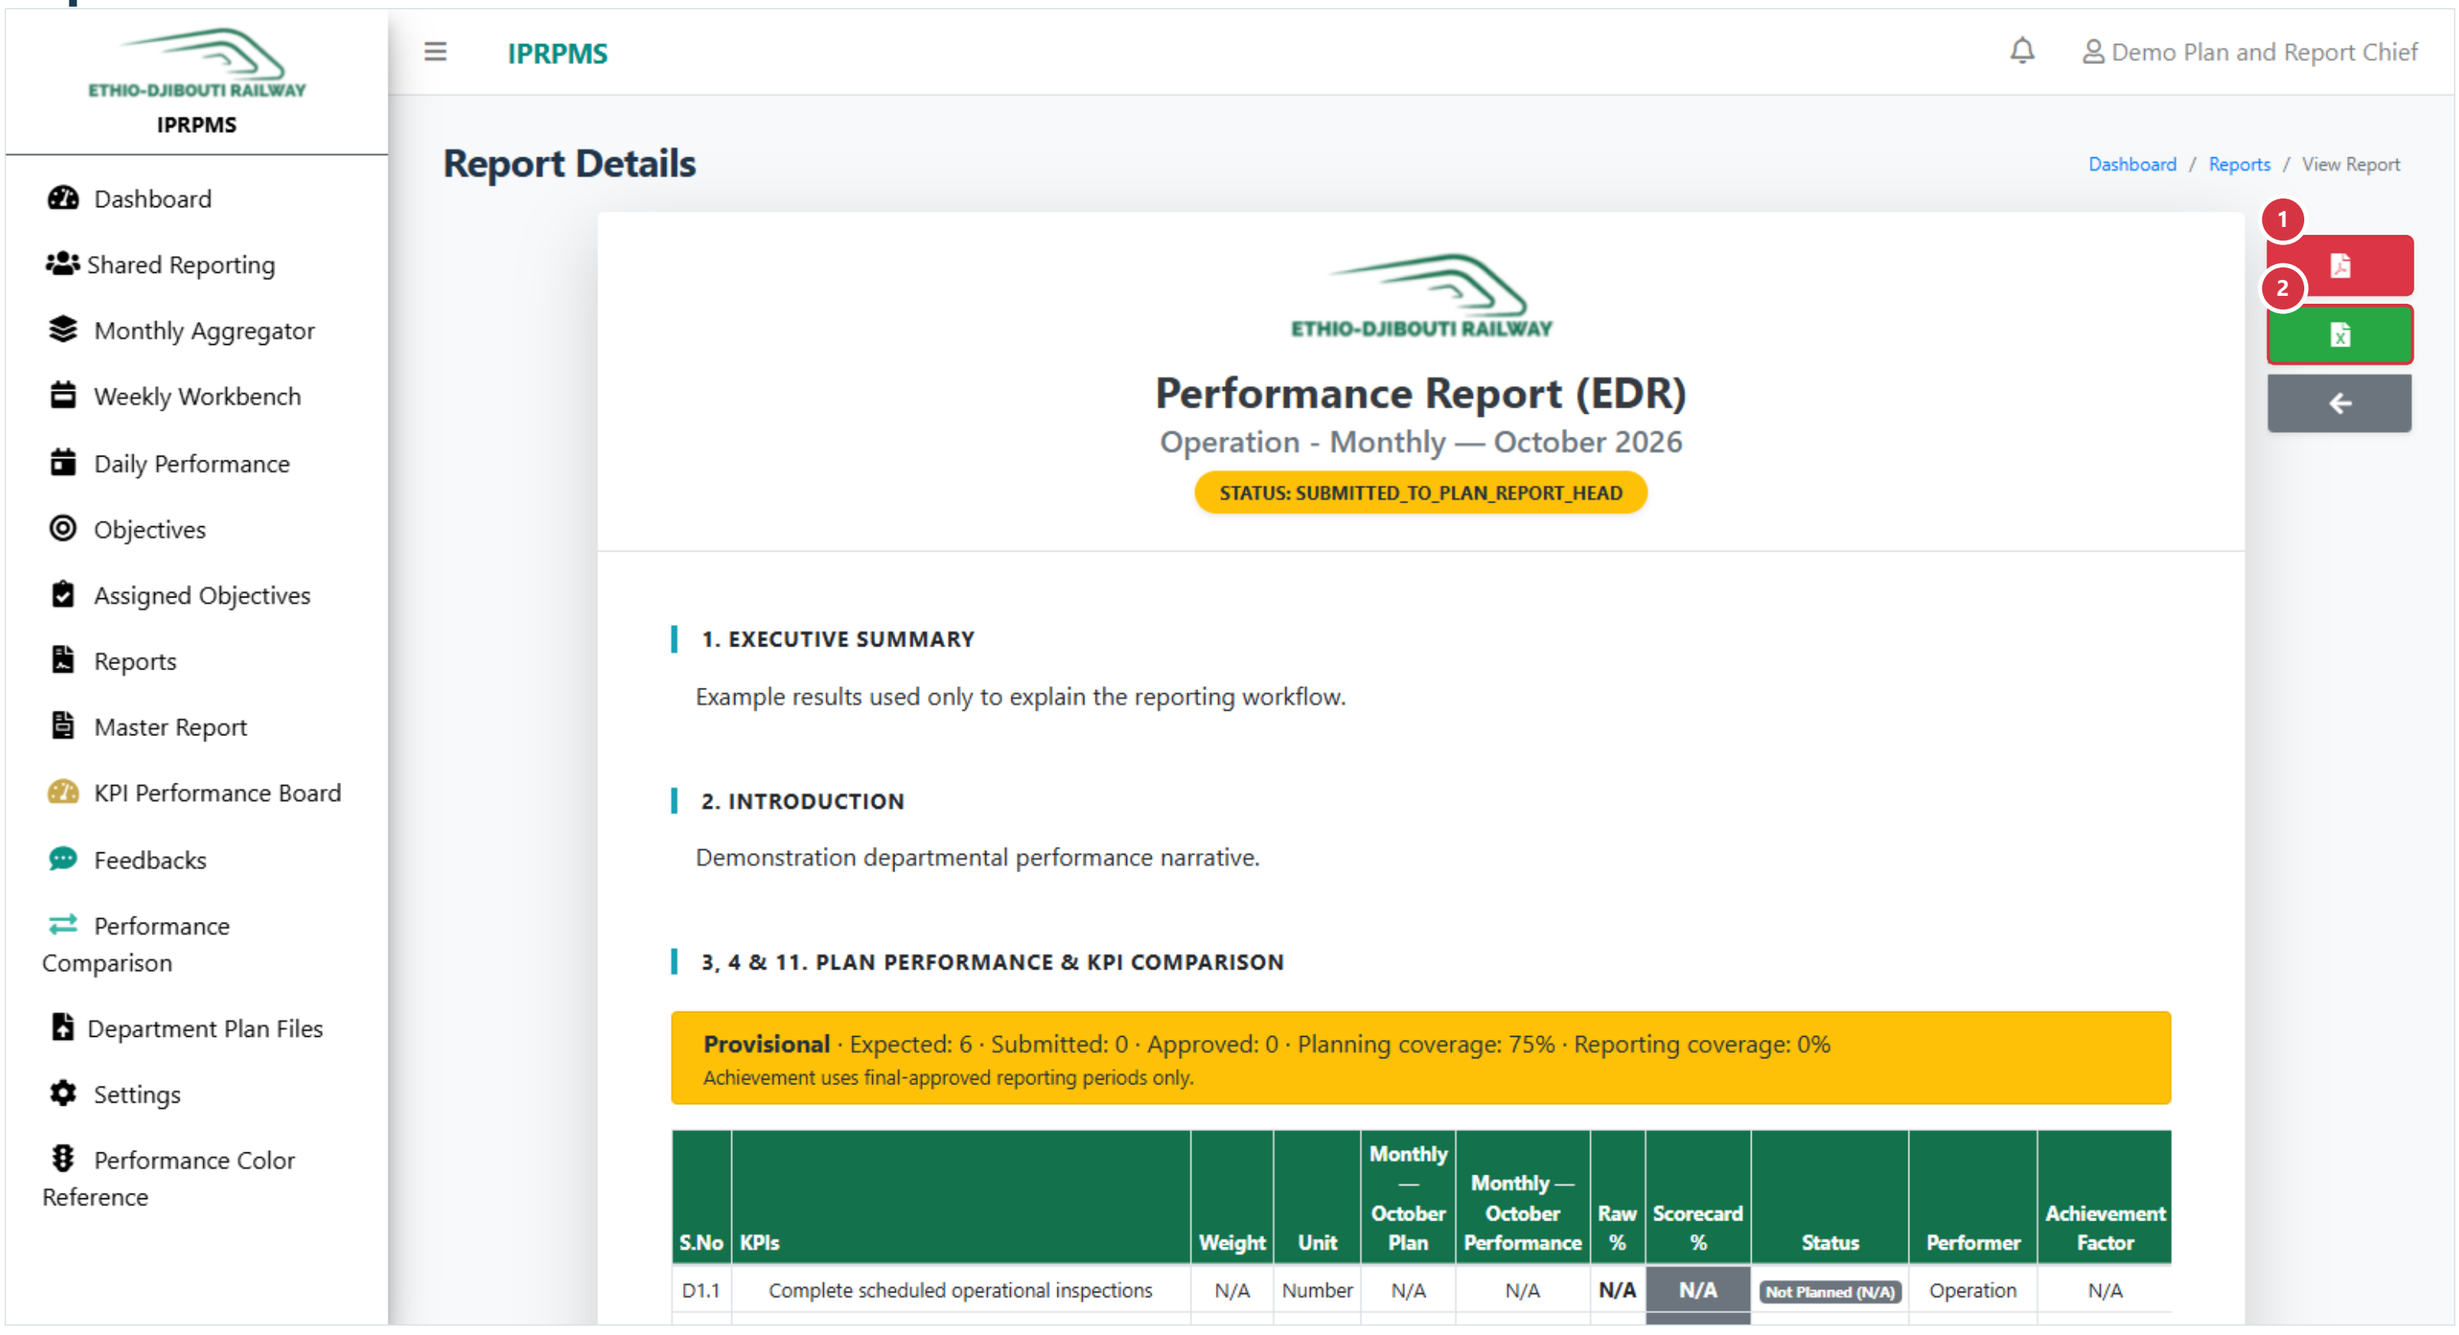

Report: Chief approval from the Reports list

1. Review or edit the forwarded narrative.
2. Click the checkmark titled Save and approve.
3. Confirm the report status changes to Approved.

After this step: The Reports list carries the workflow actions. Open the report to read it and use its download controls.

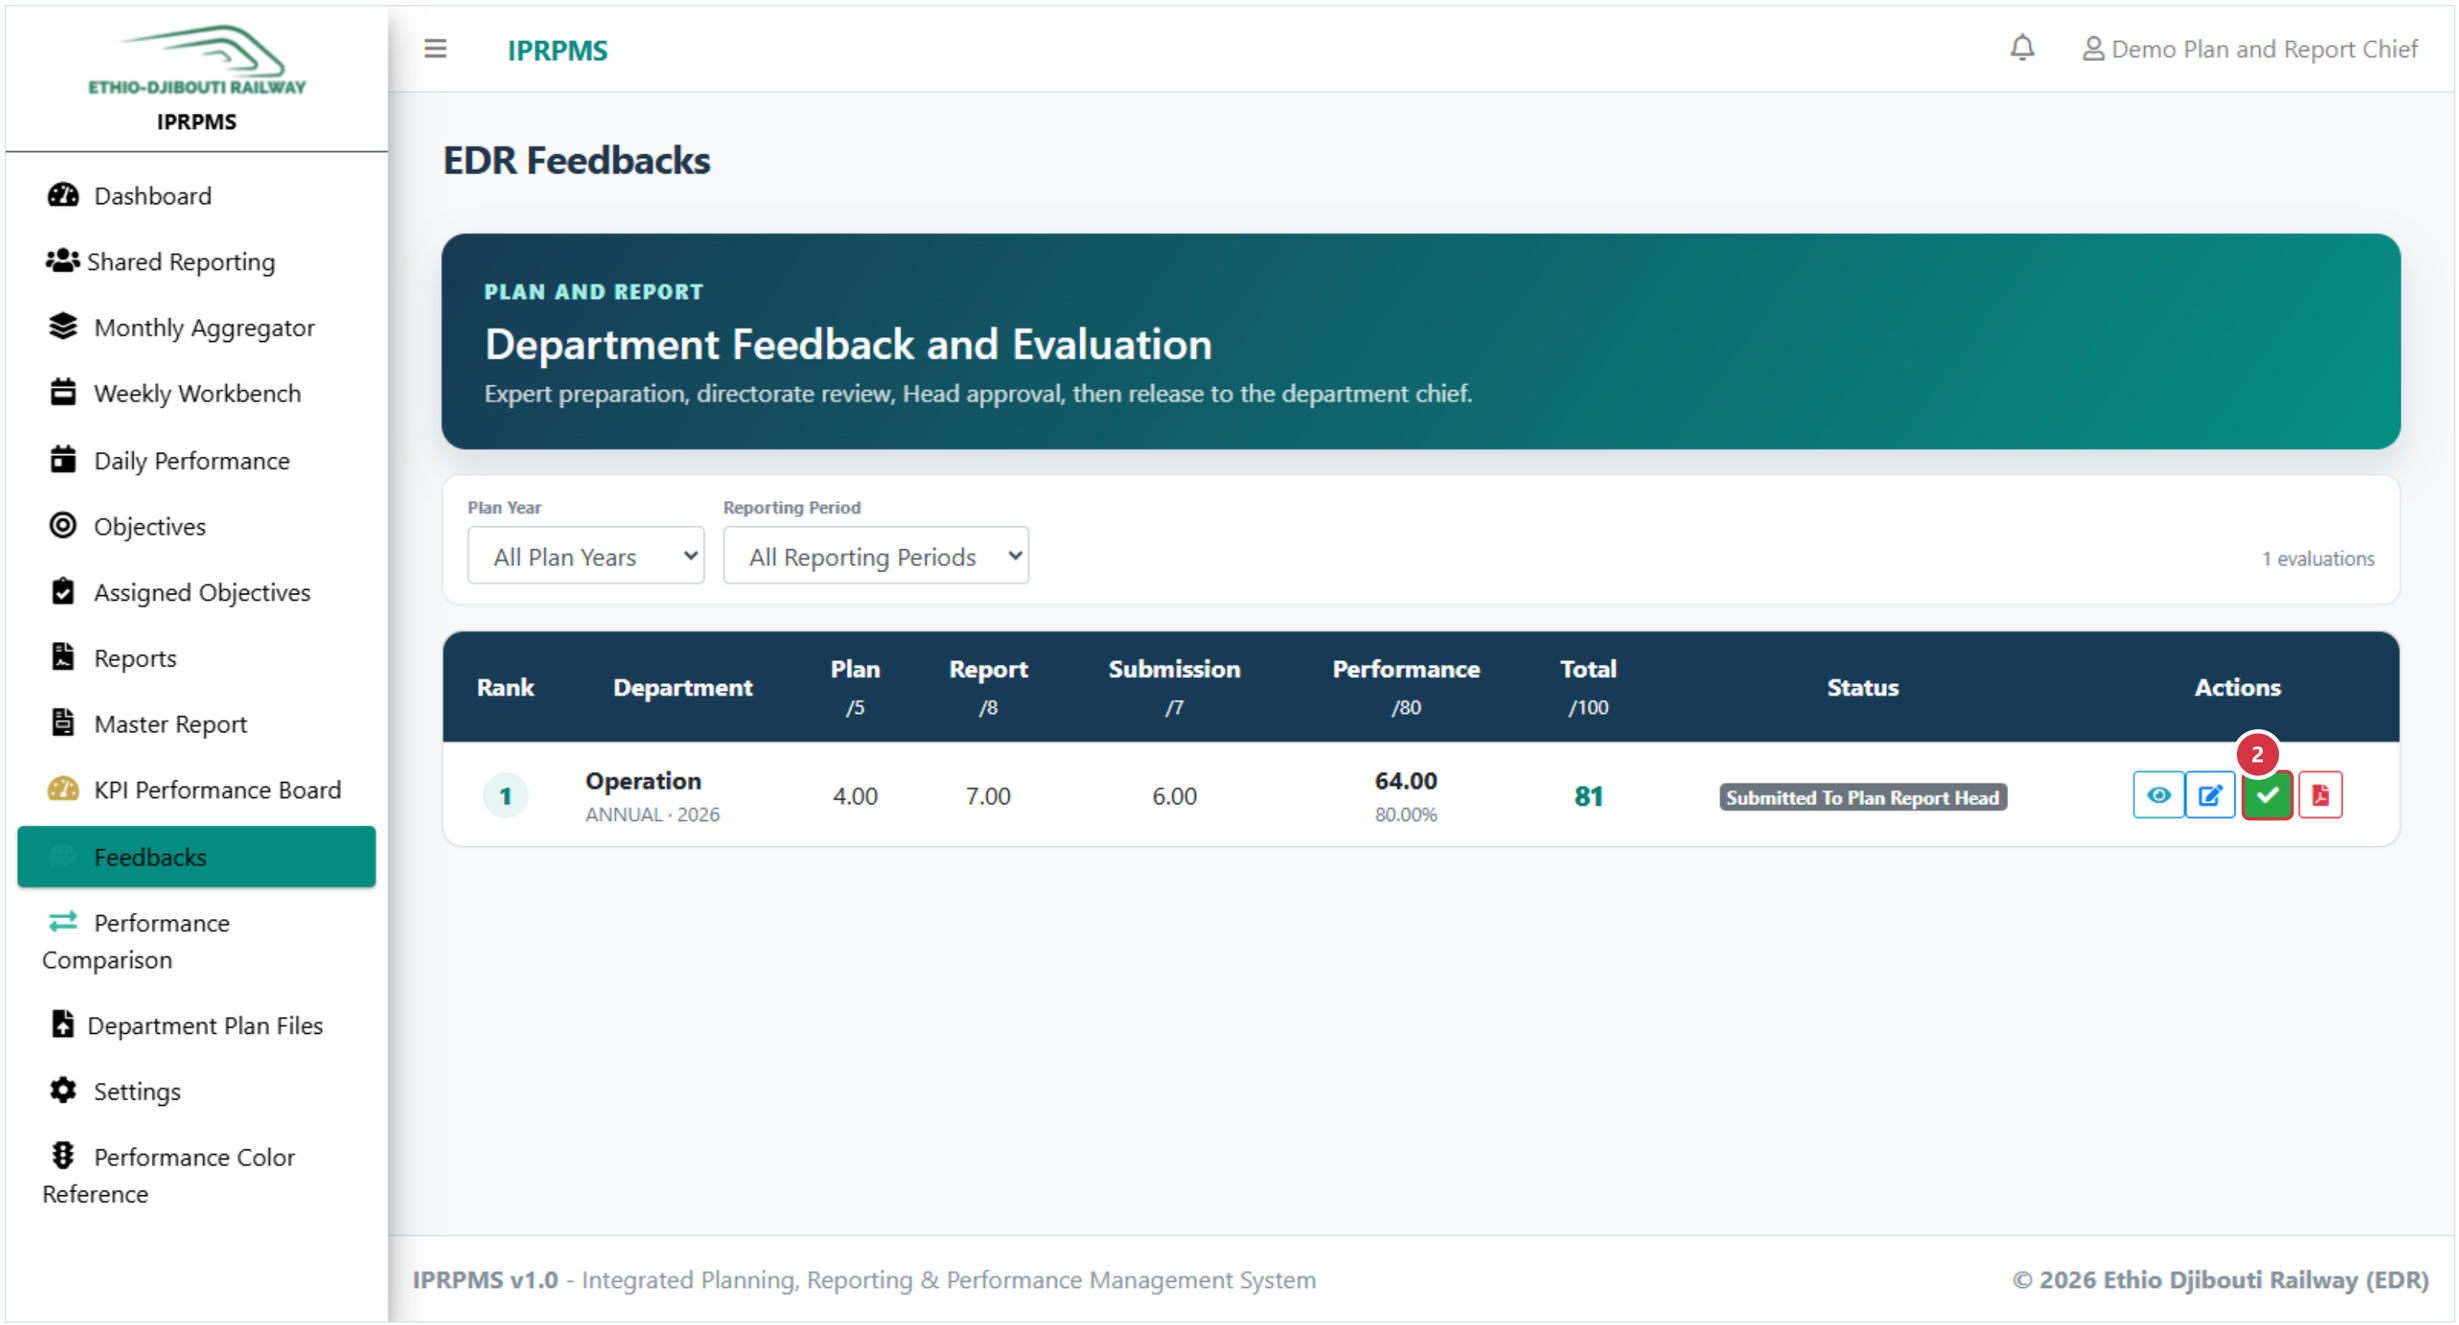

Report: download PDF or Excel

1. Use the PDF icon on the report to download PDF.
2. Use the Excel icon for the spreadsheet export when permitted.
3. Verify the department, reporting period and year before distributing it.

After this step: The actual reading page has PDF and Excel icons. Other formats depend on the report workspace available to your role.

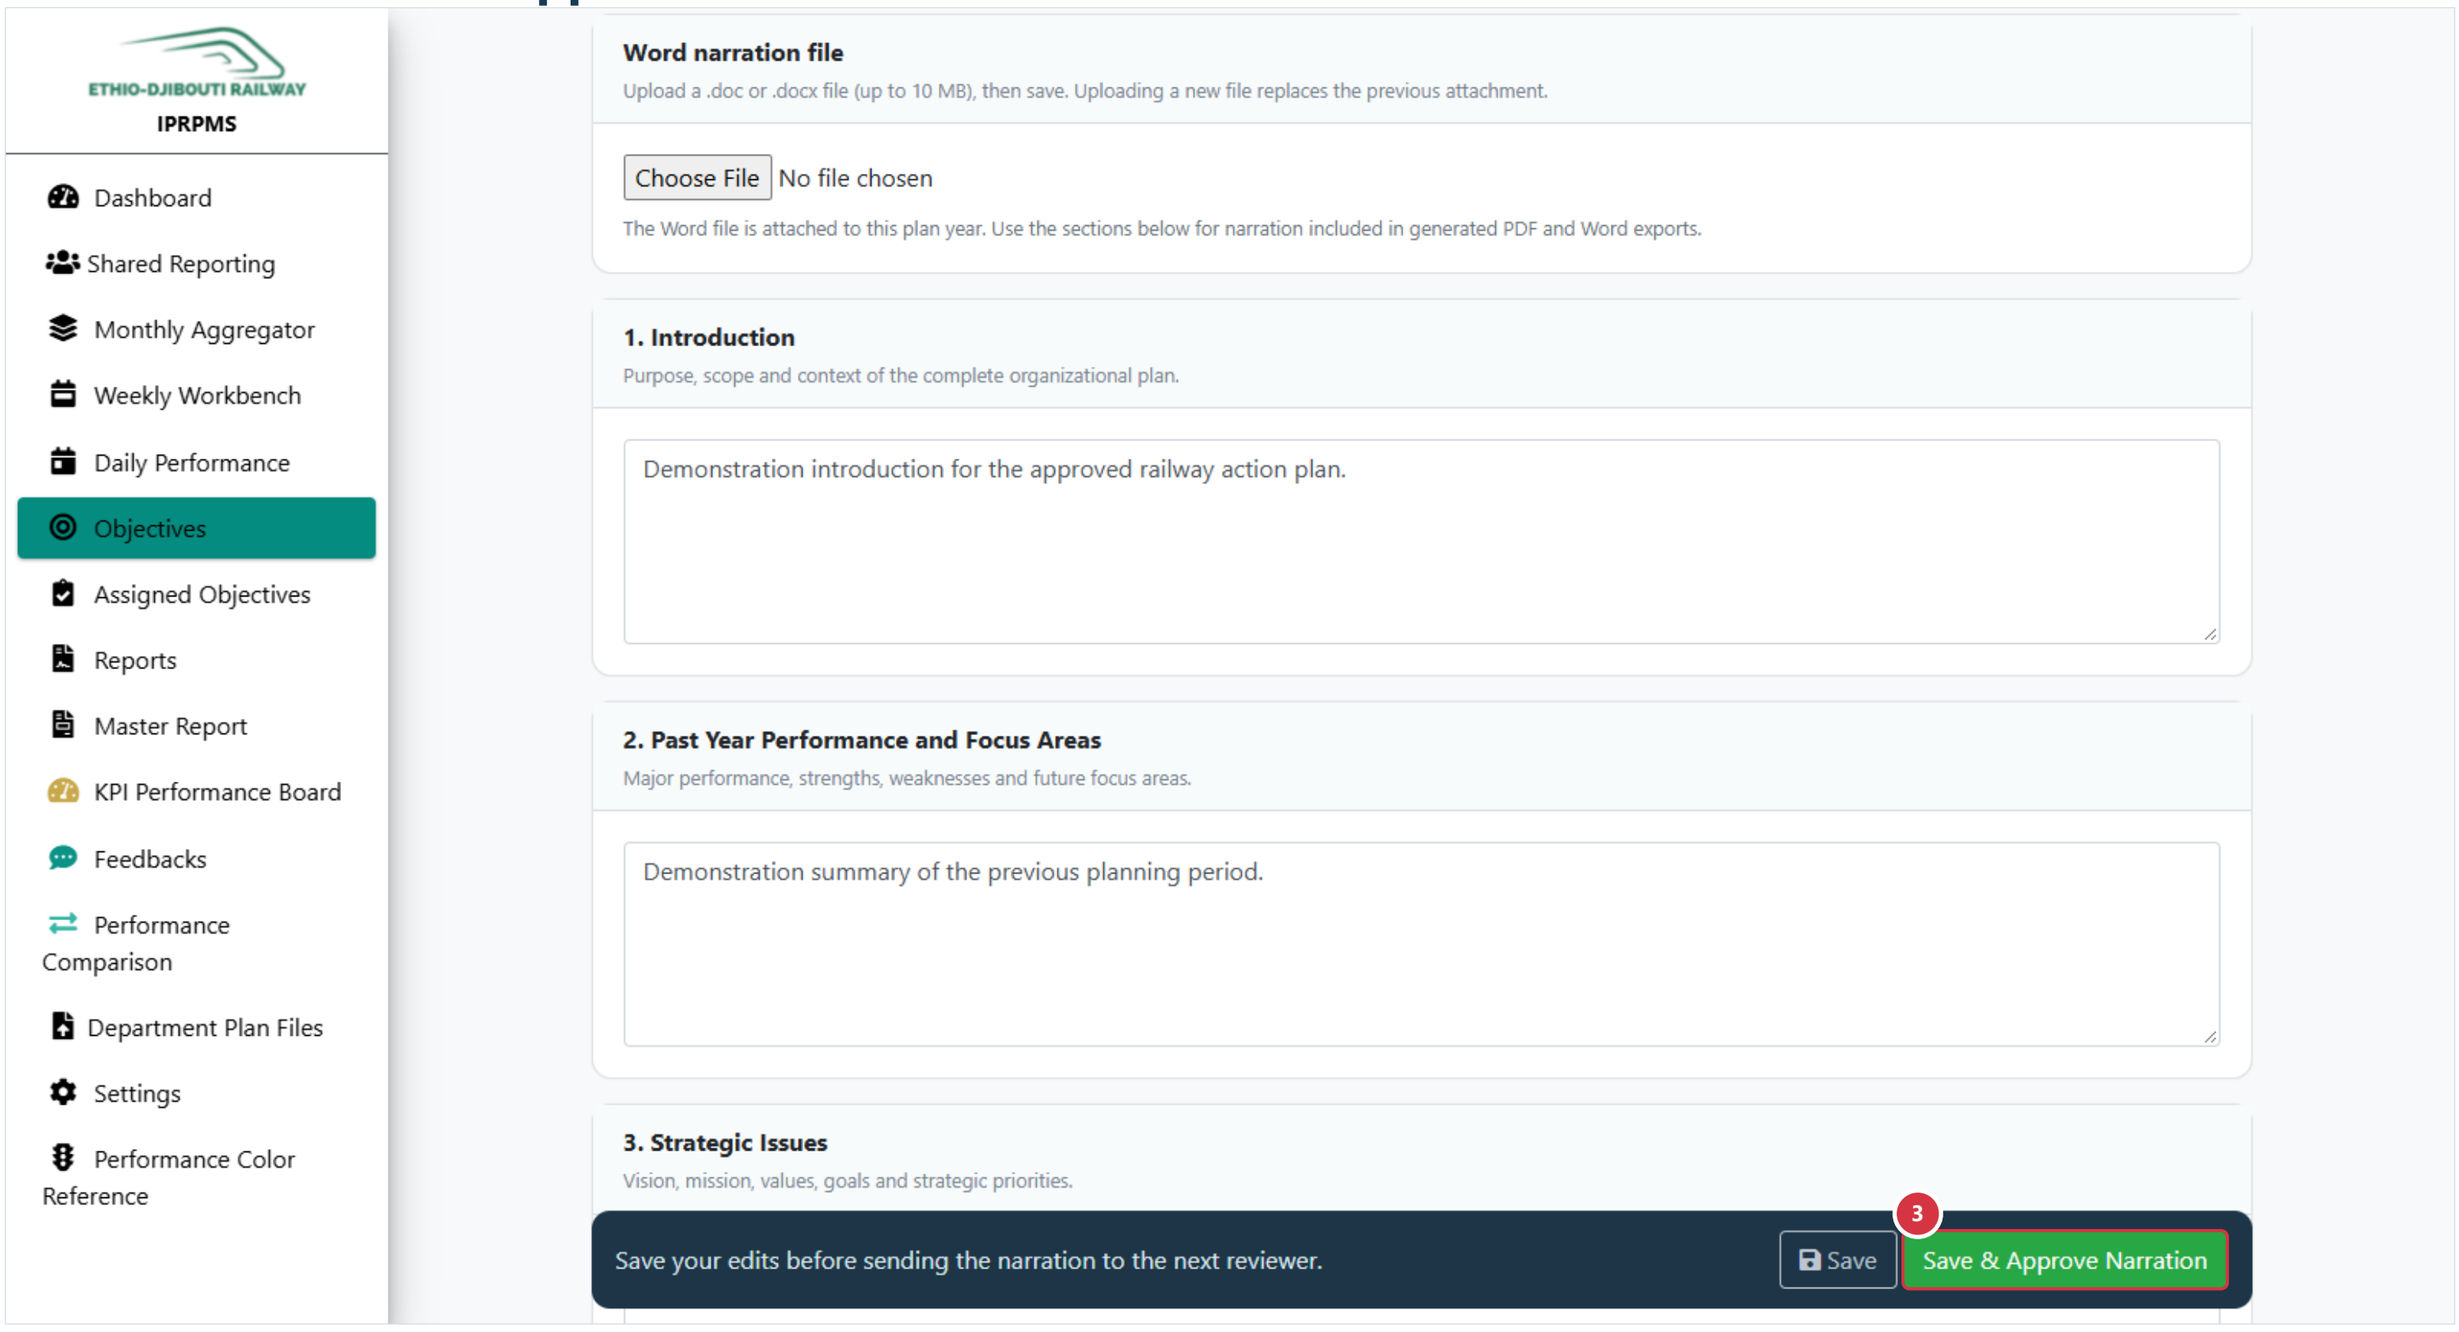

Feedback: Chief finalization and release

1. Open and review the evaluation.
2. Click the checkmark titled Finalize and release.
3. If the system reports missing approved performance, complete that approval first.

After this step: Finalization requires approved departmental performance. Released feedback becomes visible to the Department Chief.

Plan narration: Chief approval

1. Read the narration and make any permitted corrections.
2. Save the changes before leaving the page.
3. Click Save & Approve Narration to move the document forward.

After this step: The status badge records the current narration stage. Automatic sections collect approved plan activities and schedules.

Review coverage, certify the month and handle reopening

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

Certification closes an approved reporting period; a good-looking percentage alone is not proof that all required work is complete.

Before you click

Open the month-end view for the right month and year. Review the matrix, planning coverage, reporting coverage and approved results.

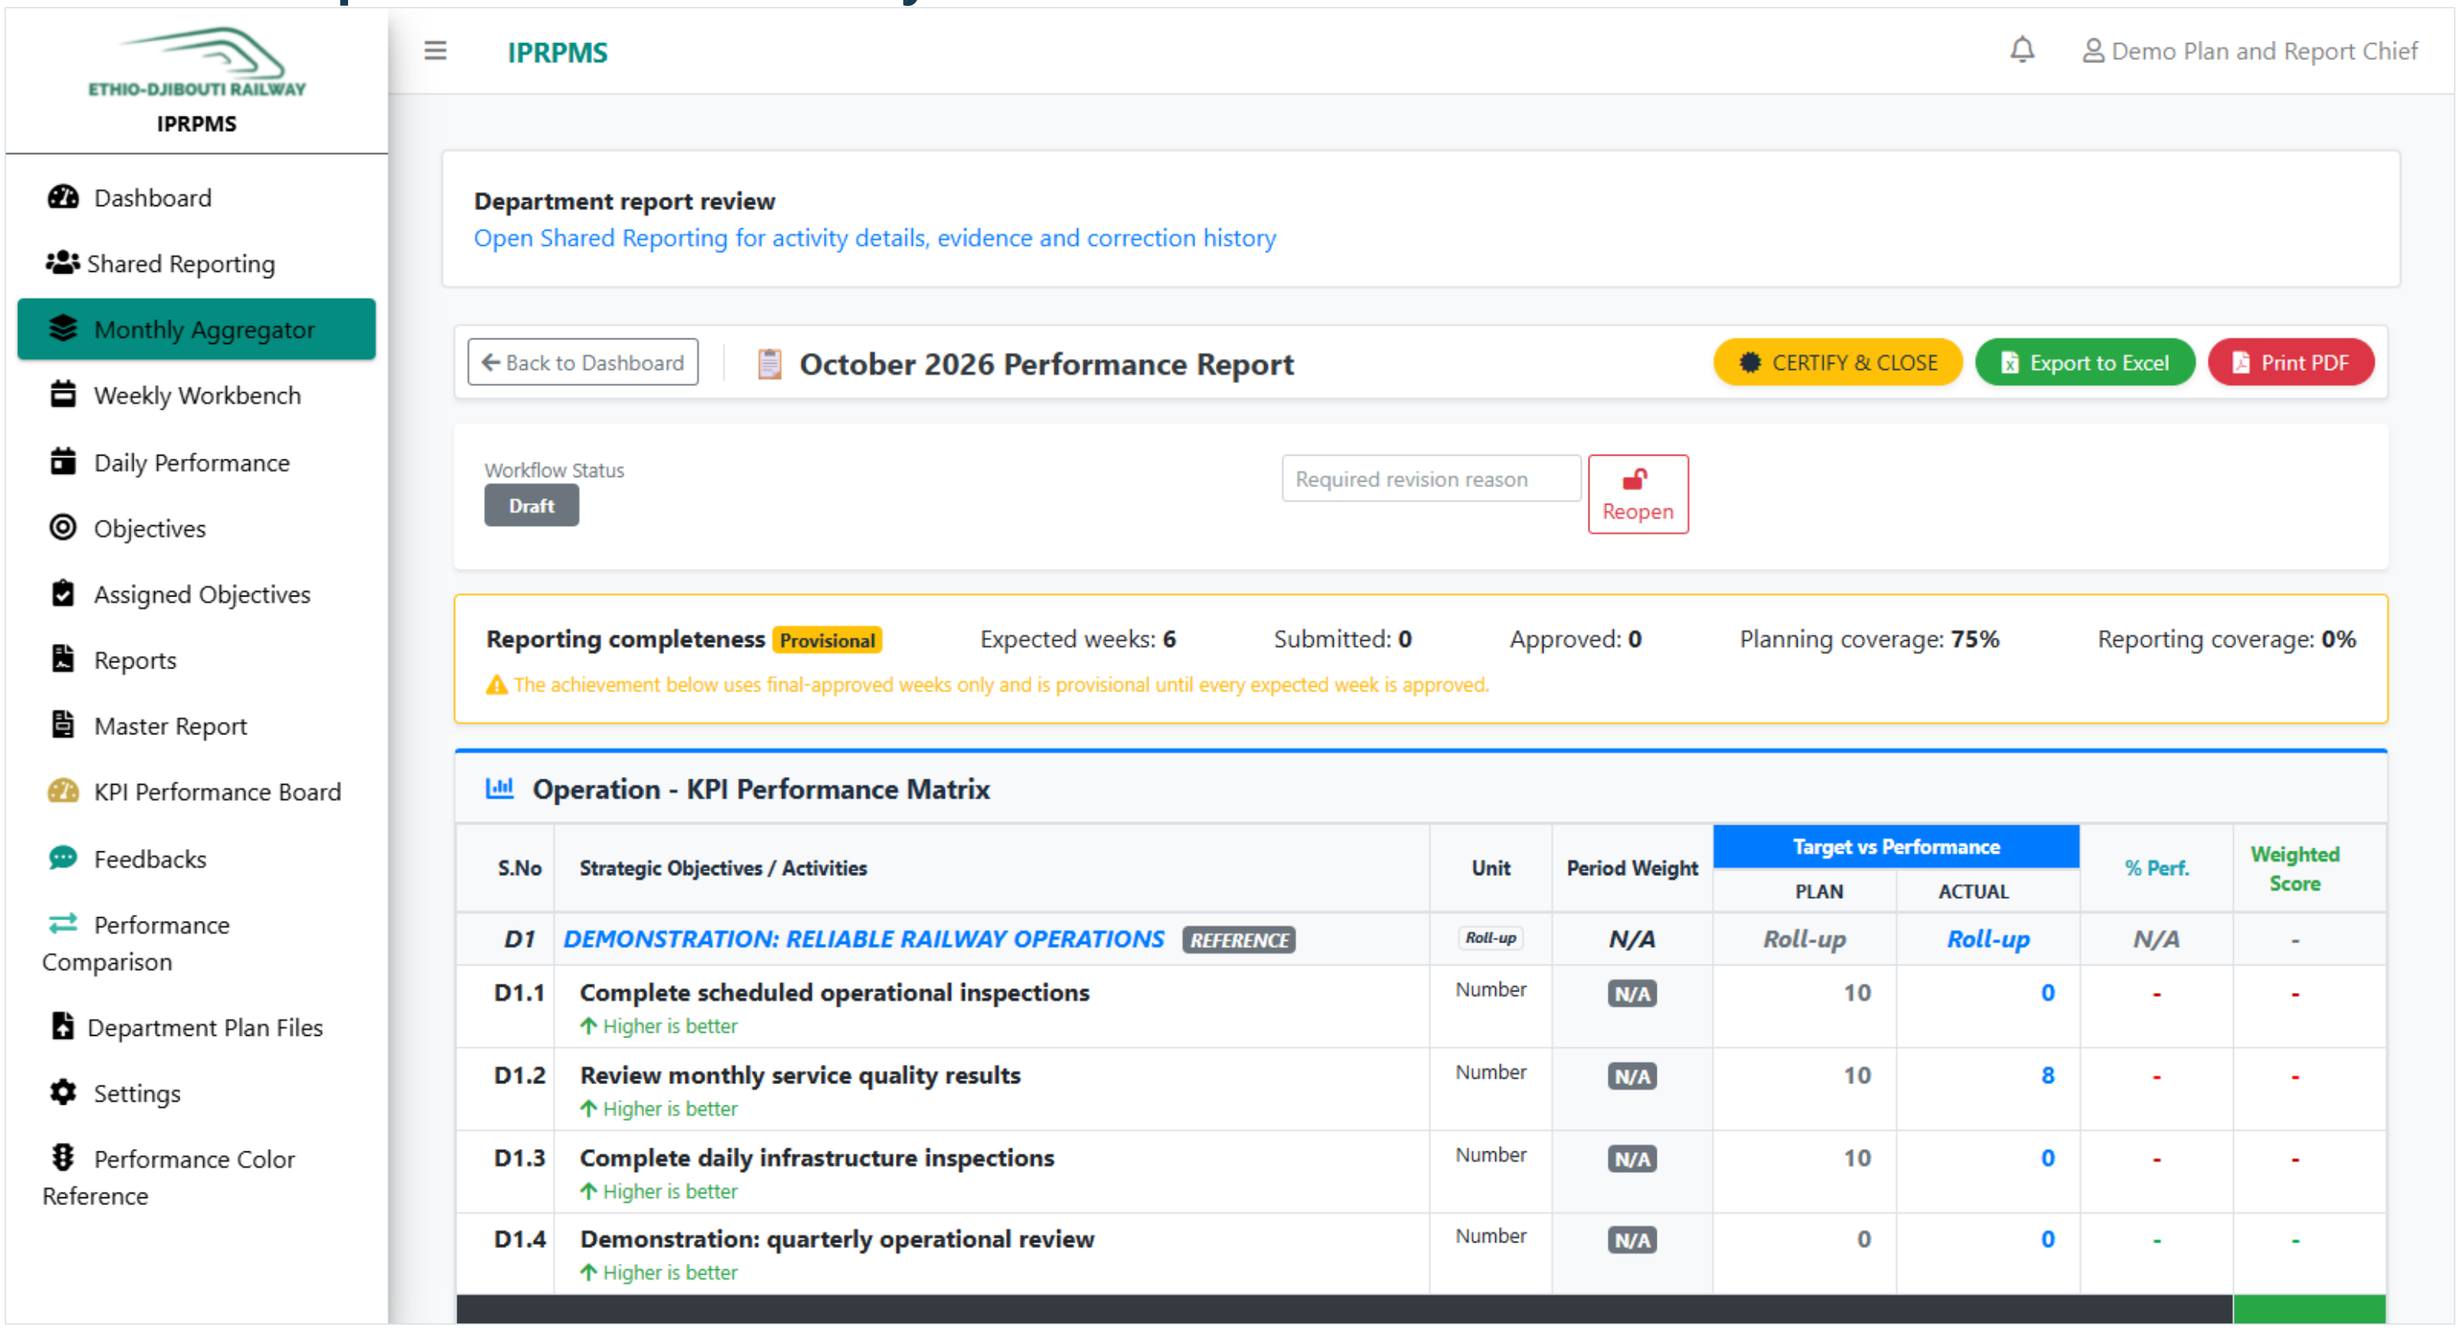

What to check

Check missing submissions and any pending weight distributions before certification. Reopen only under your authority with a meaningful reason; reopening does not automatically erase all prior approvals.

How you know it worked

The period shows its locked or reopened status. Corrections must follow the existing report workflow and be rechecked before the next closure.

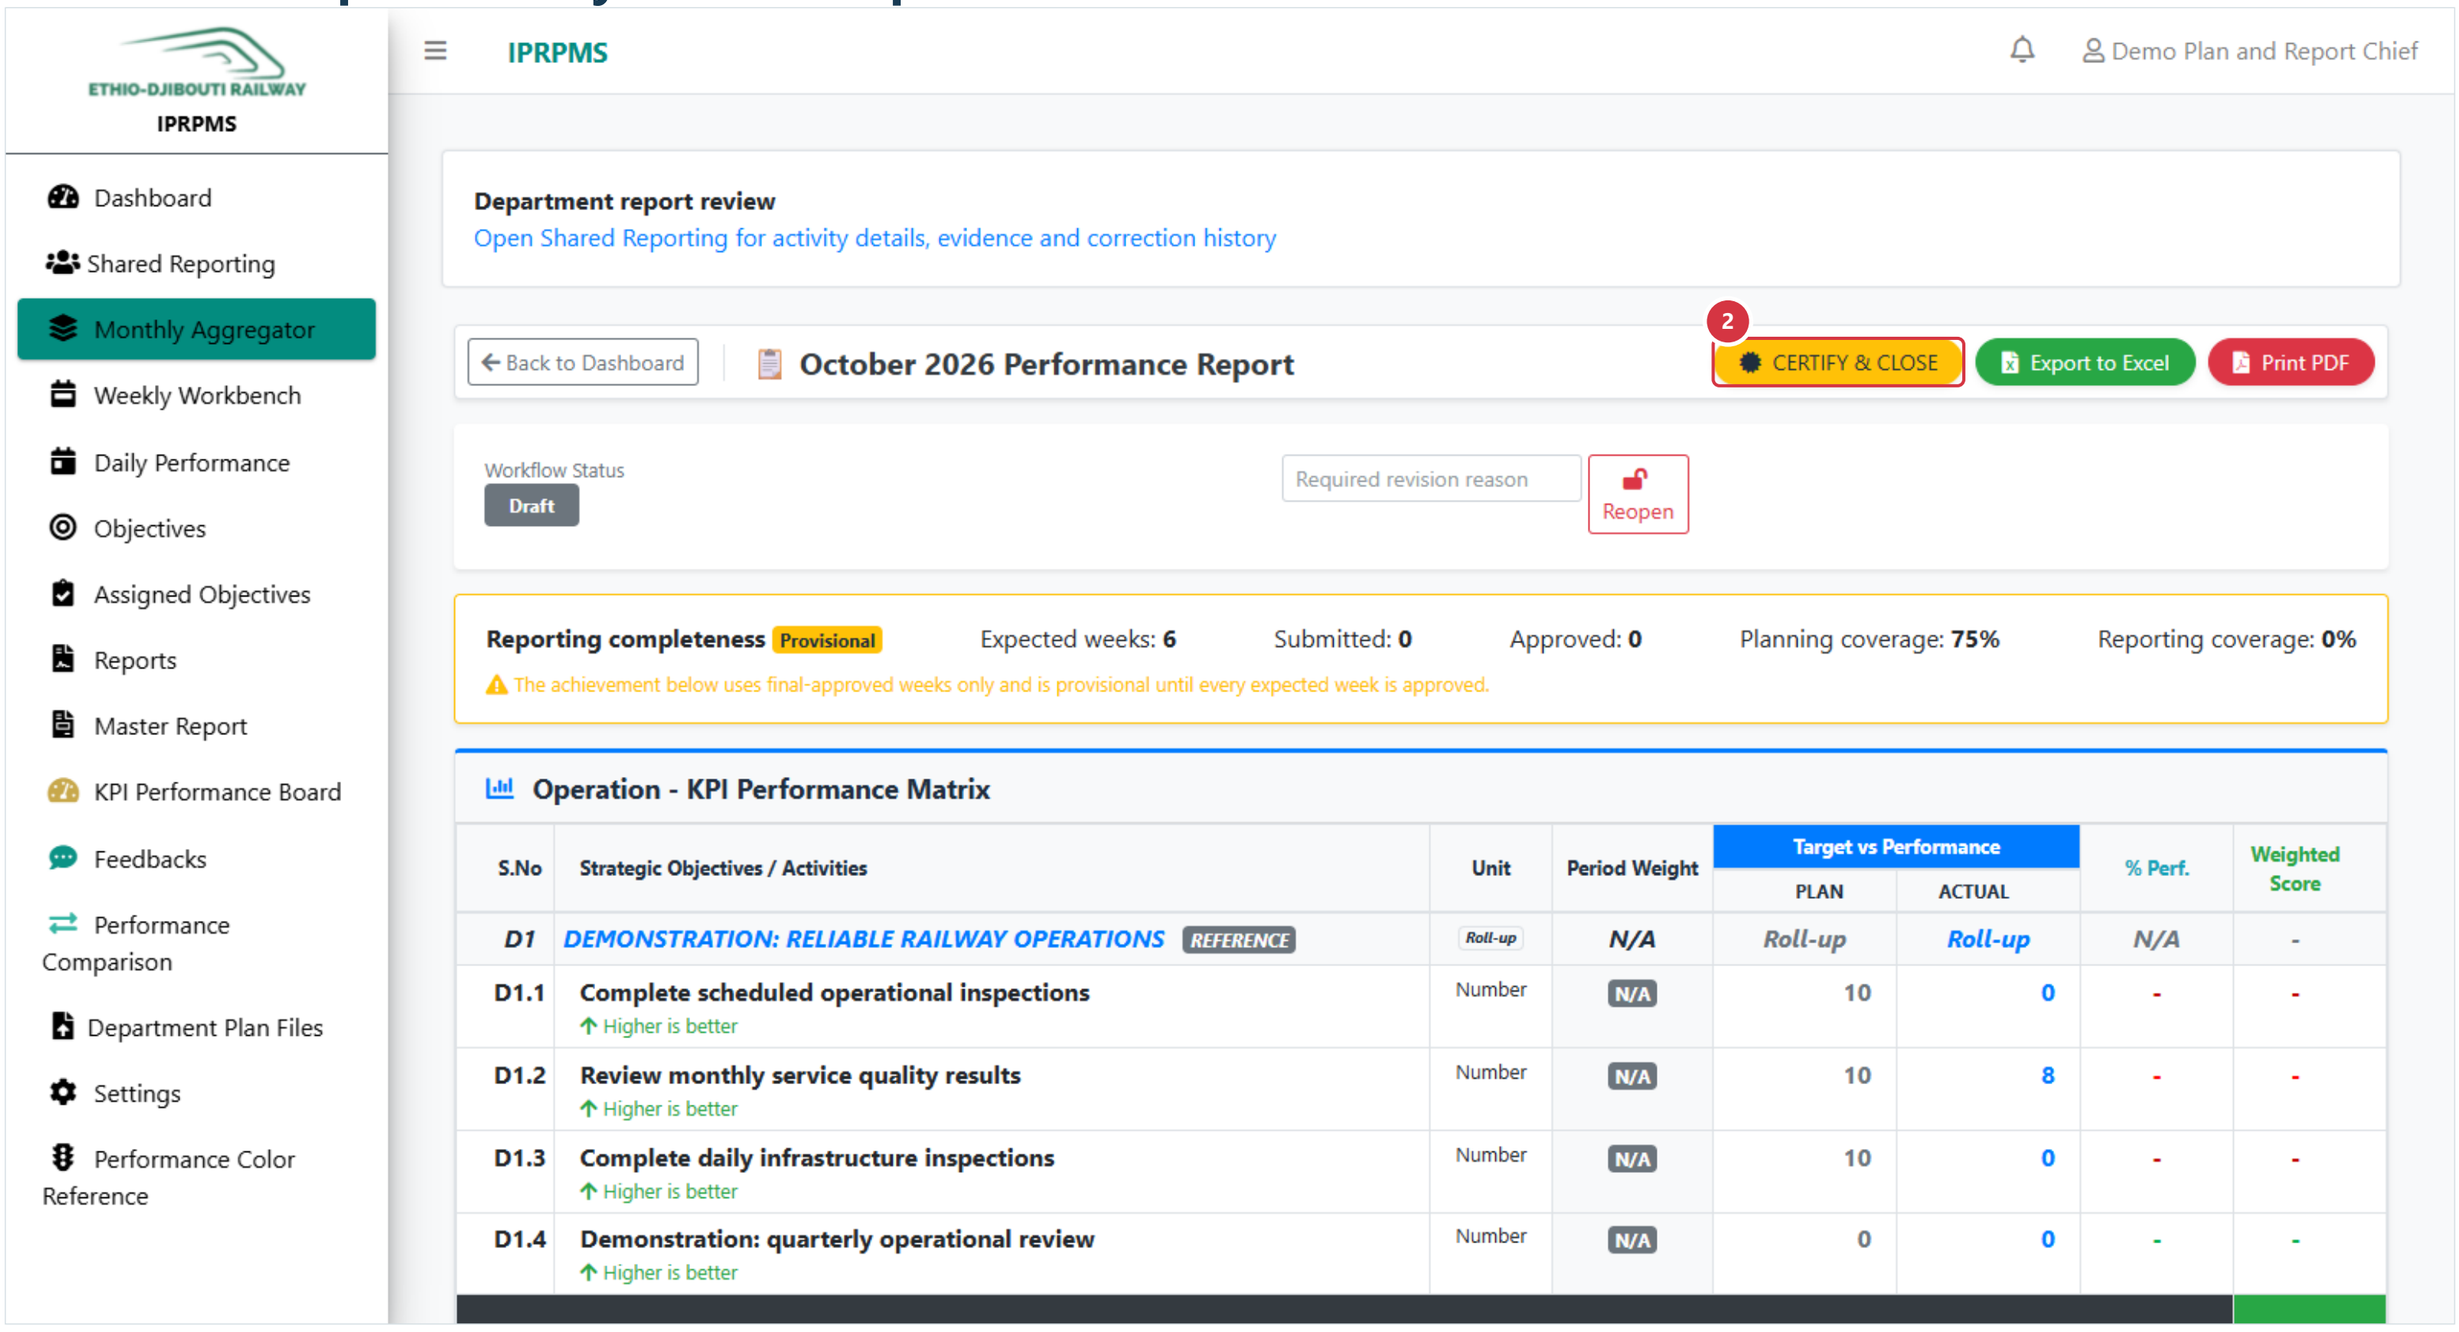

Month-end report: review the monthly matrix

1. Open the monthly report for the correct year and department.
2. Read planning/reporting coverage and weighted achievement.
3. Use the displayed shared-report or workflow link to resolve outstanding reviews.

After this step: Daily and weekly results can contribute to monthly reporting. Confirm the underlying final approval state.

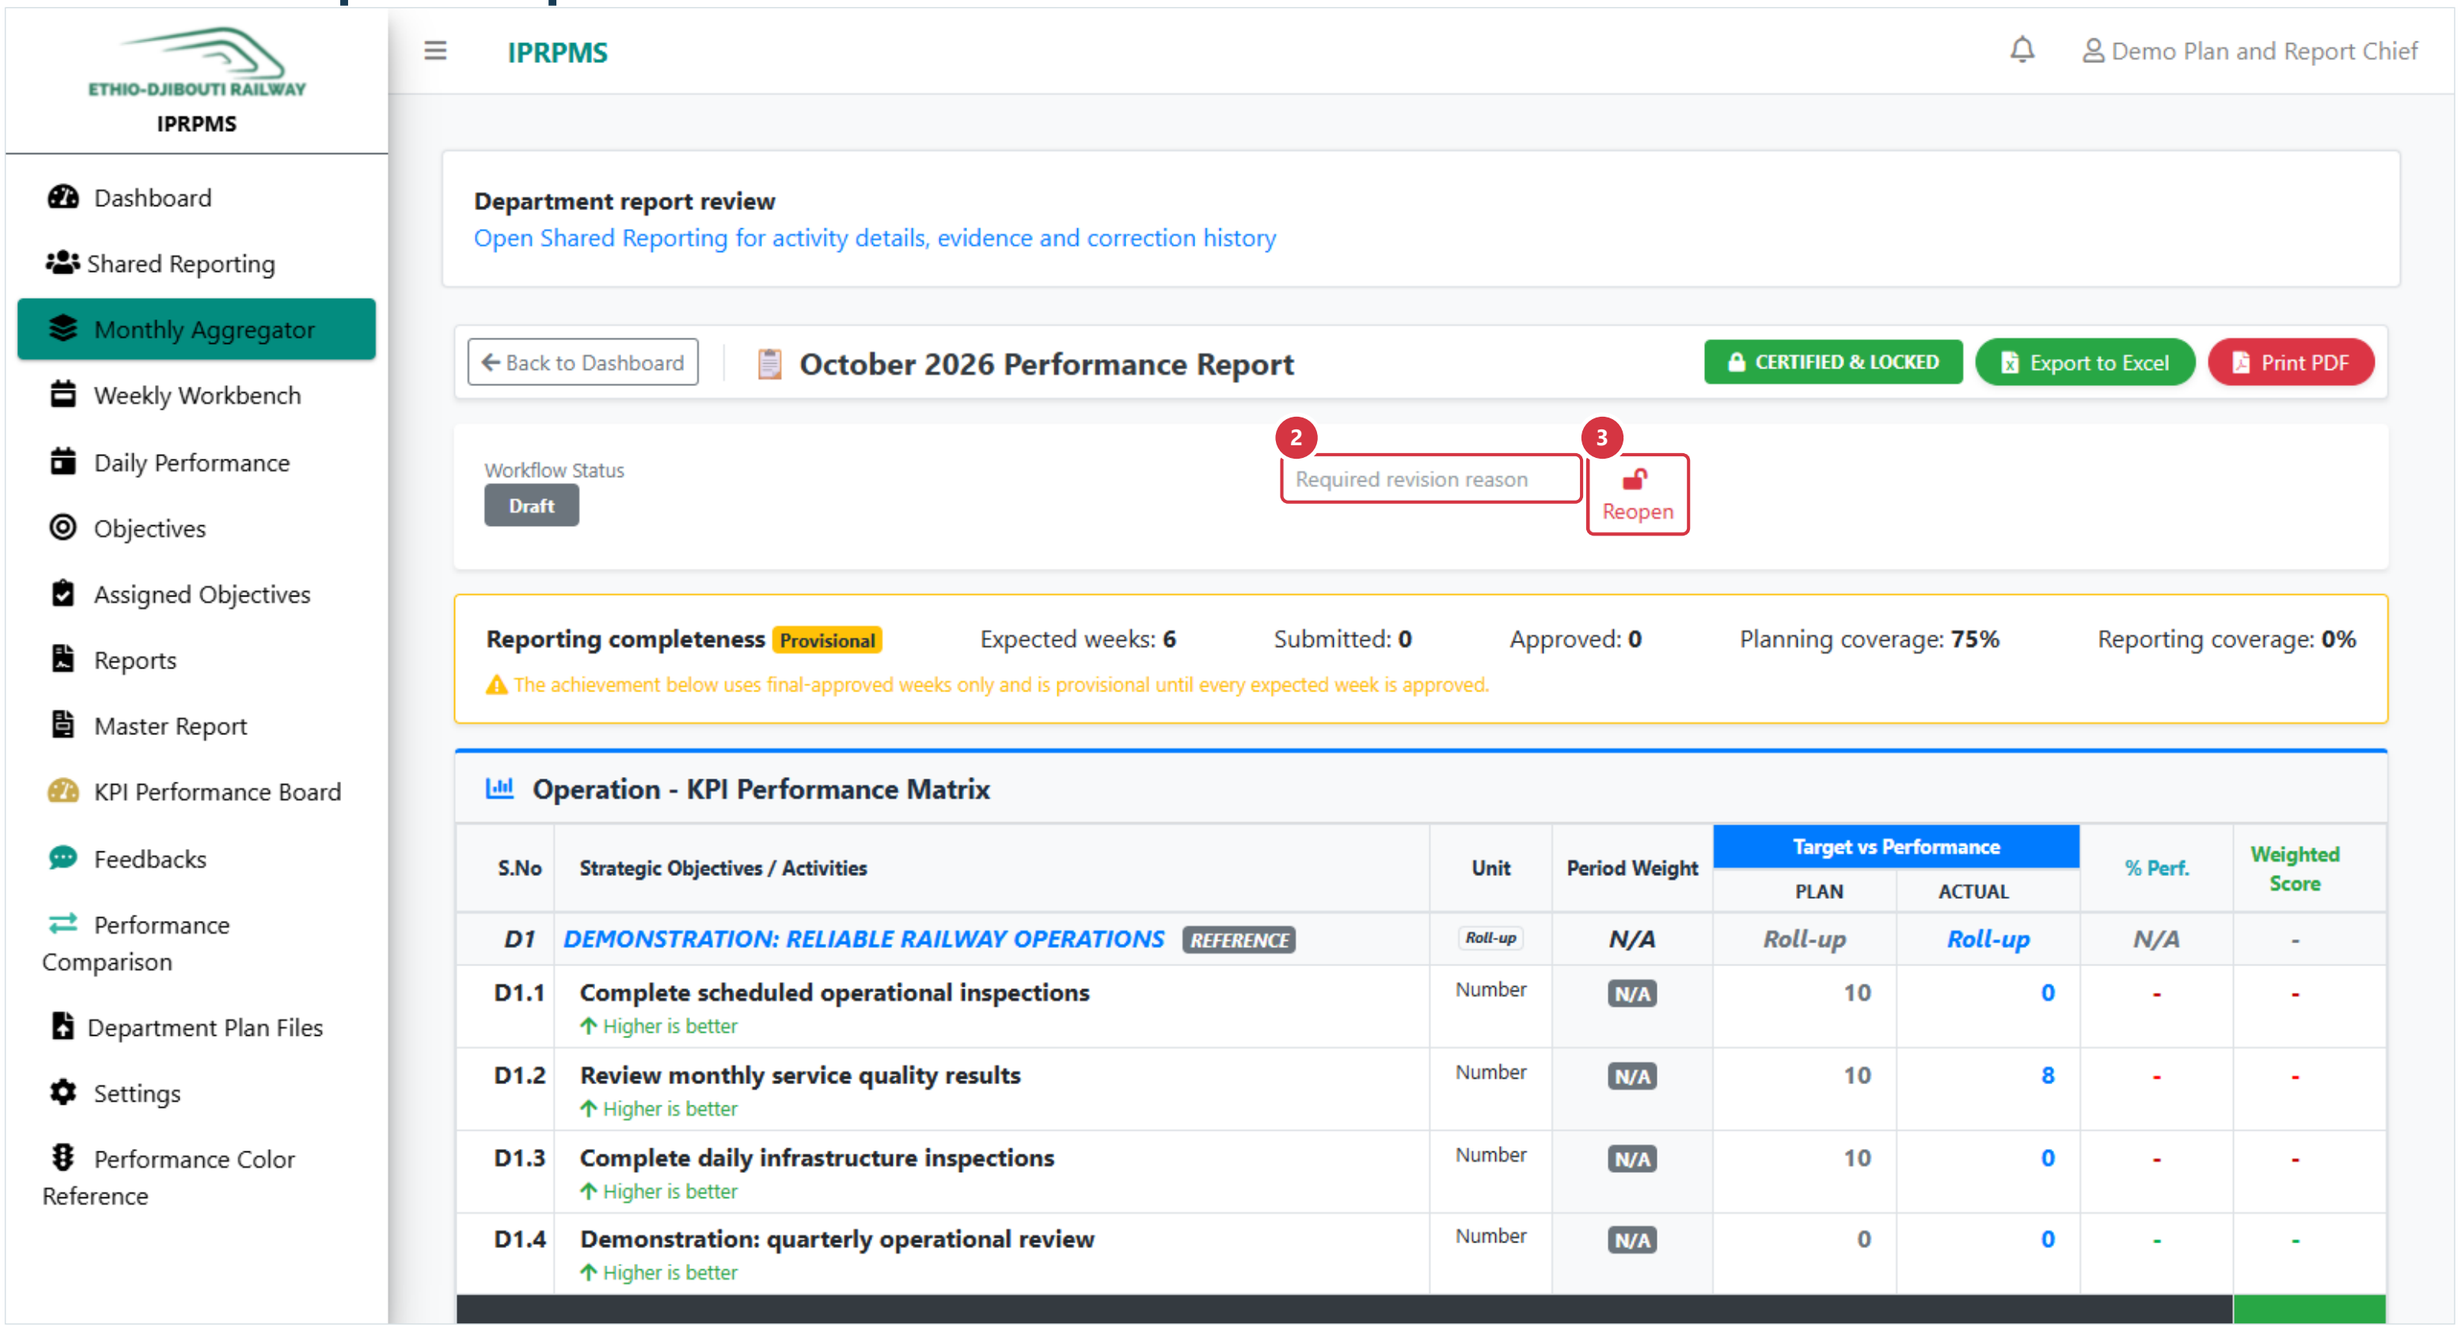

Month-end report: certify and lock a period

1. Review the month and department scope.
2. Use the Certify/Lock action displayed at the bottom of the report.
3. Confirm the action after checking the reporting coverage.

After this step: Certification locks the reporting month. Plan and Report Head Office or System Administrator performs this action.

Month-end report: reopen a certified month

1. Locate the certified-period notice and reopen control.
2. Enter the required reopening reason.
3. Use Reopen when an authorized correction is necessary.

After this step: Reopening removes the month lock. Follow the applicable reporting-review process for corrected data.

Optional: approve a separately submitted departmental plan

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

Some permitted users can submit a separate departmental plan record. This is not a replacement for the objective publication and assignment workflow.

Before you click

Open the submitted plan and verify department, year, targets and performer items.

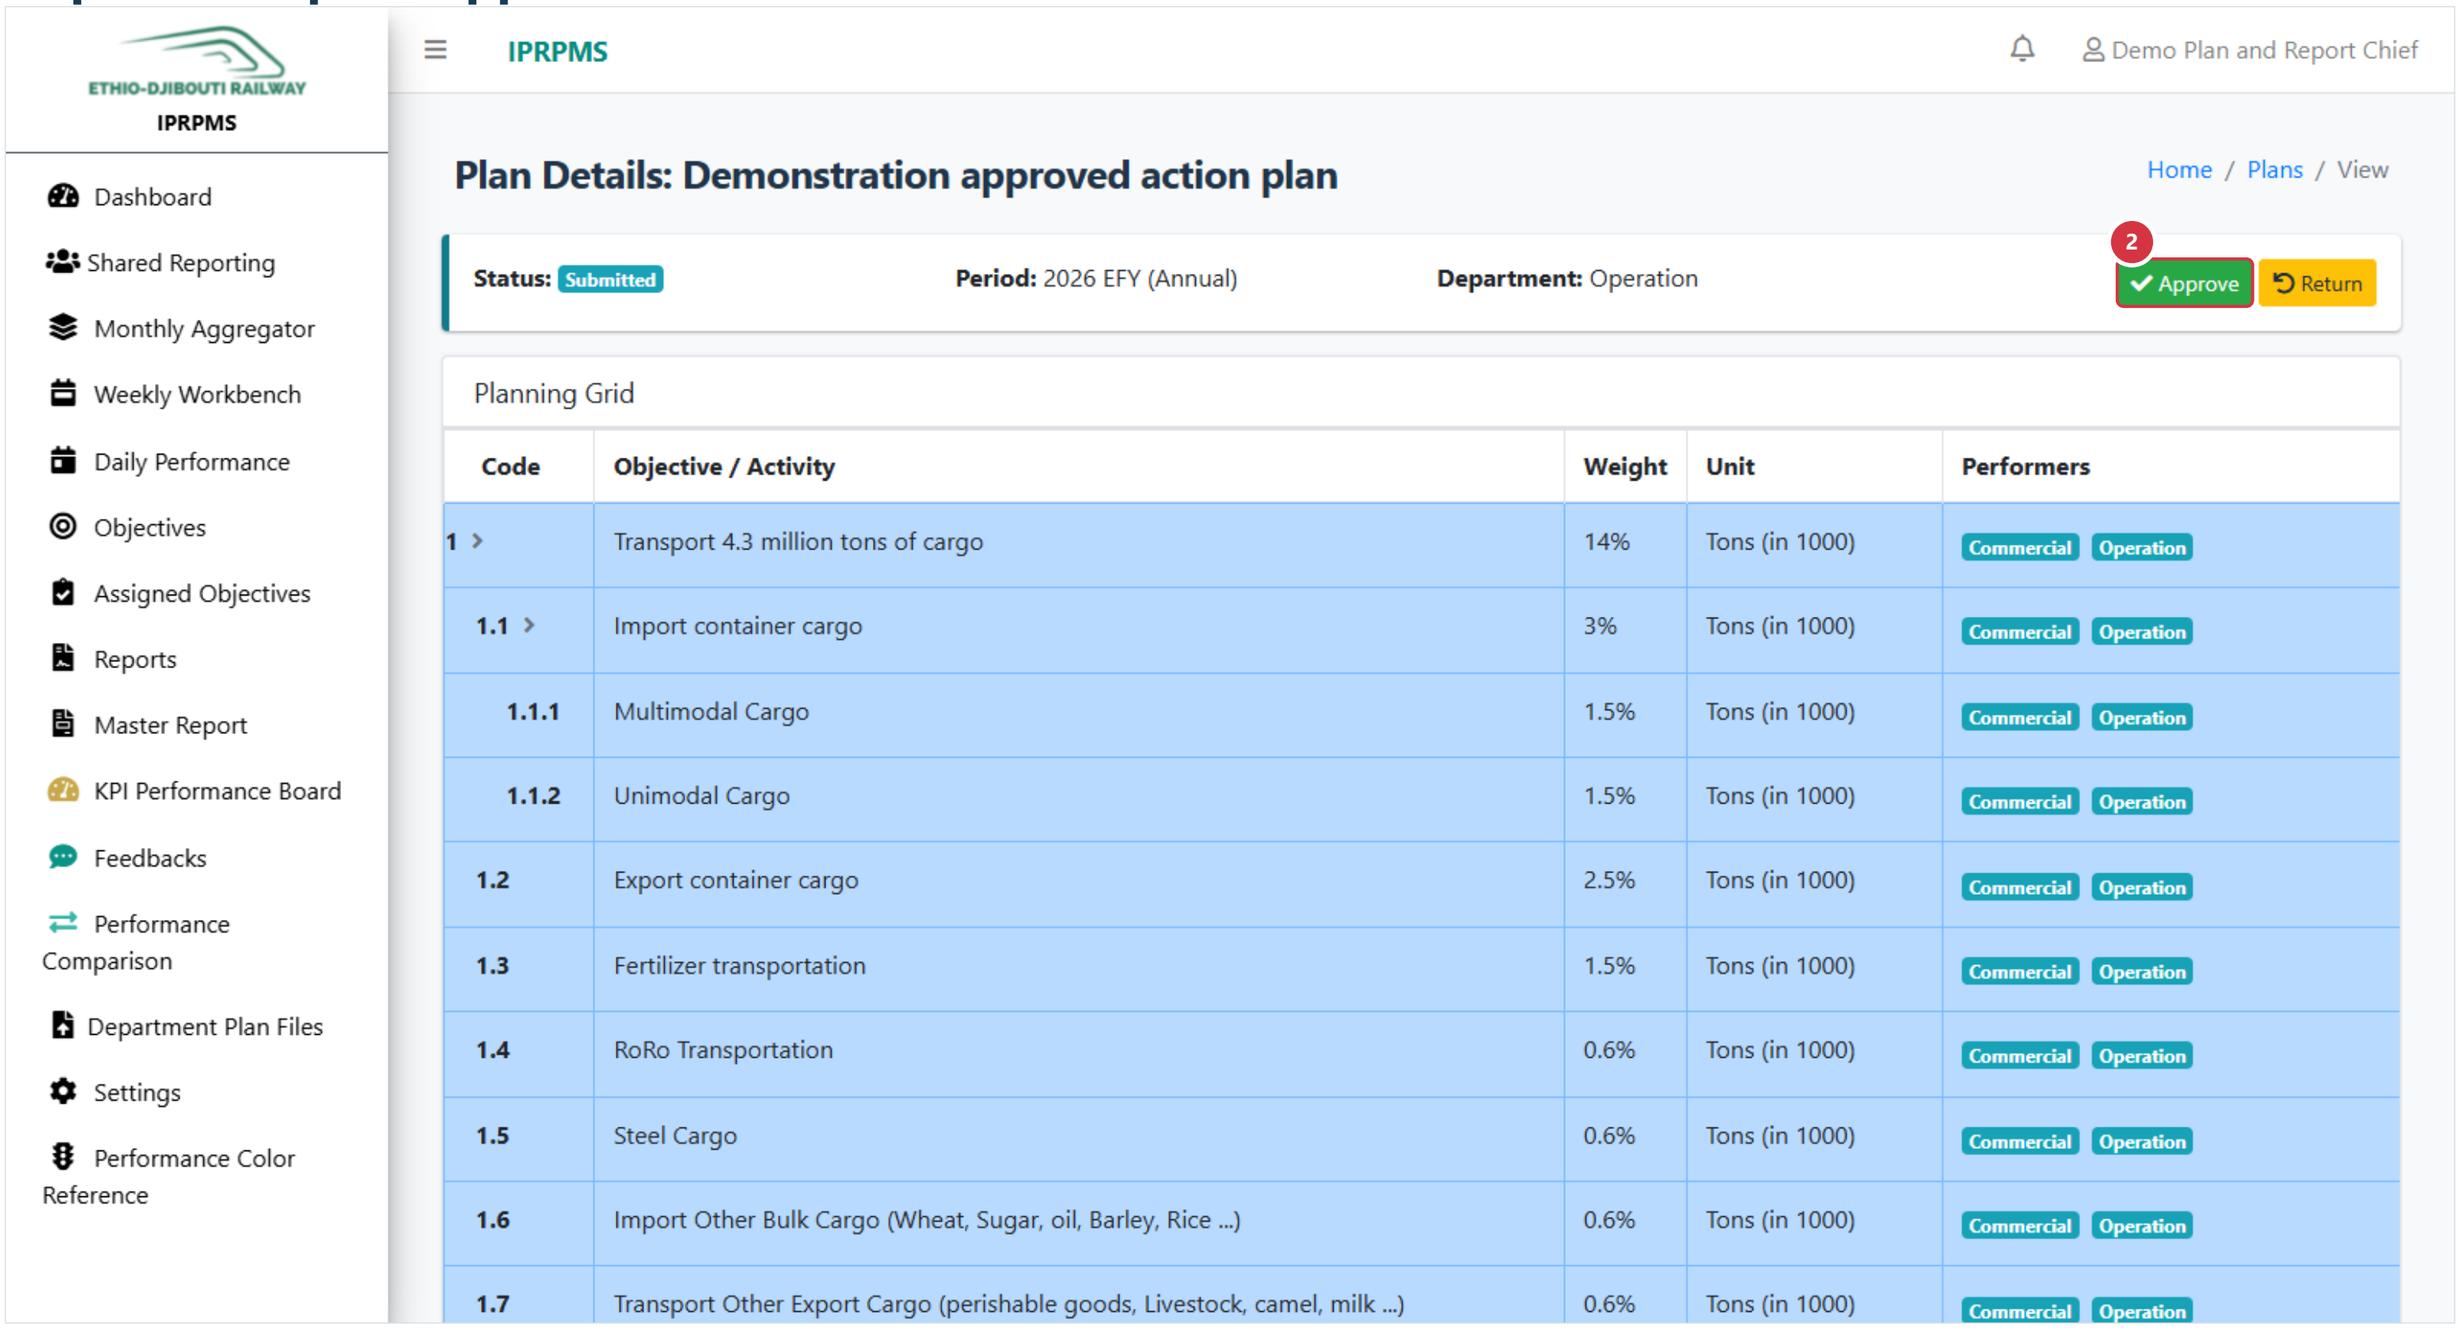

What to check

Read the full record. If a correction is needed, use Return/Reject and enter a useful comment rather than approving an incomplete plan.

How you know it worked

Use Approve for the correct plan, or return it to the preparer. Read the resulting status before leaving.

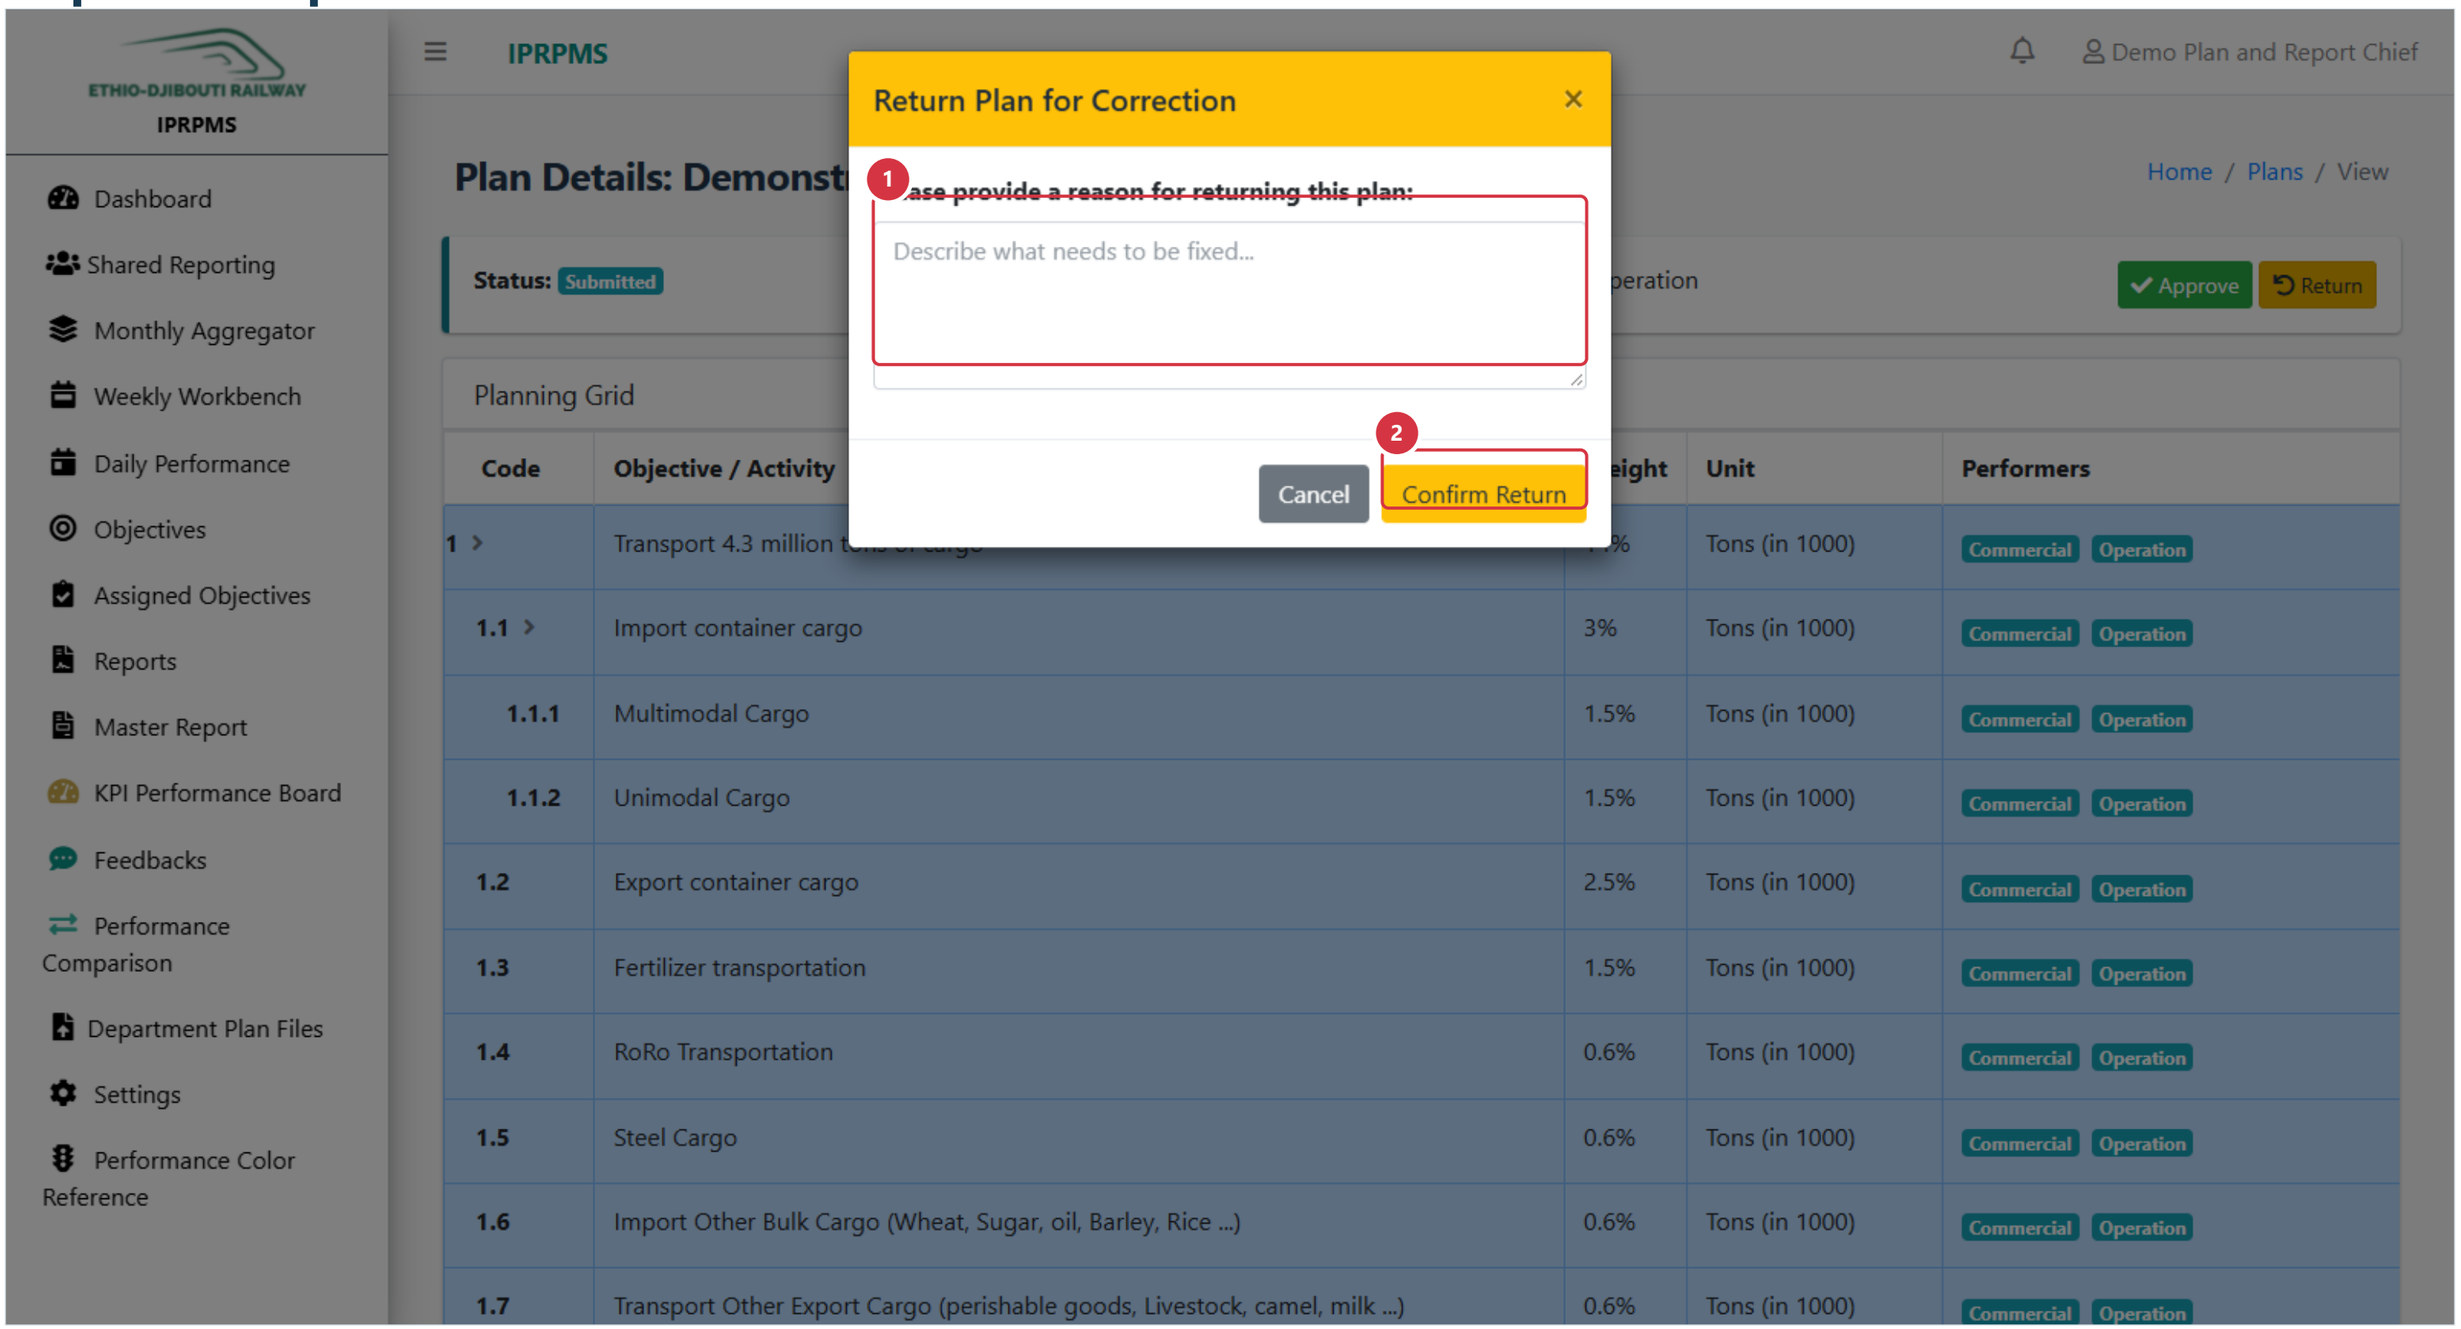

Department plan: approve or return

1. Review the submitted plan.
2. Use Approve for a correct plan, or open Return/Reject and enter a comment.

After this step: The plan controls depend on status and permission. A returned plan comment explains what the preparer must correct.

Department plan: enter a return reason

1. Click Return on the submitted plan.
2. Describe the required correction in the return-reason field.
3. Click Confirm Return.

After this step: The preparer sees the return reason and can correct the draft before submitting it again.

Review a historical KPI comparison mapping

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

Check whether the historical and current activities genuinely measure comparable work. This is separate from objective approval and performance-result approval.

Before you click

Open Historical comparison, find the submitted mapping and expand Edit measurement & mapping. Compare the definitions, units, measurement direction and proposed link.

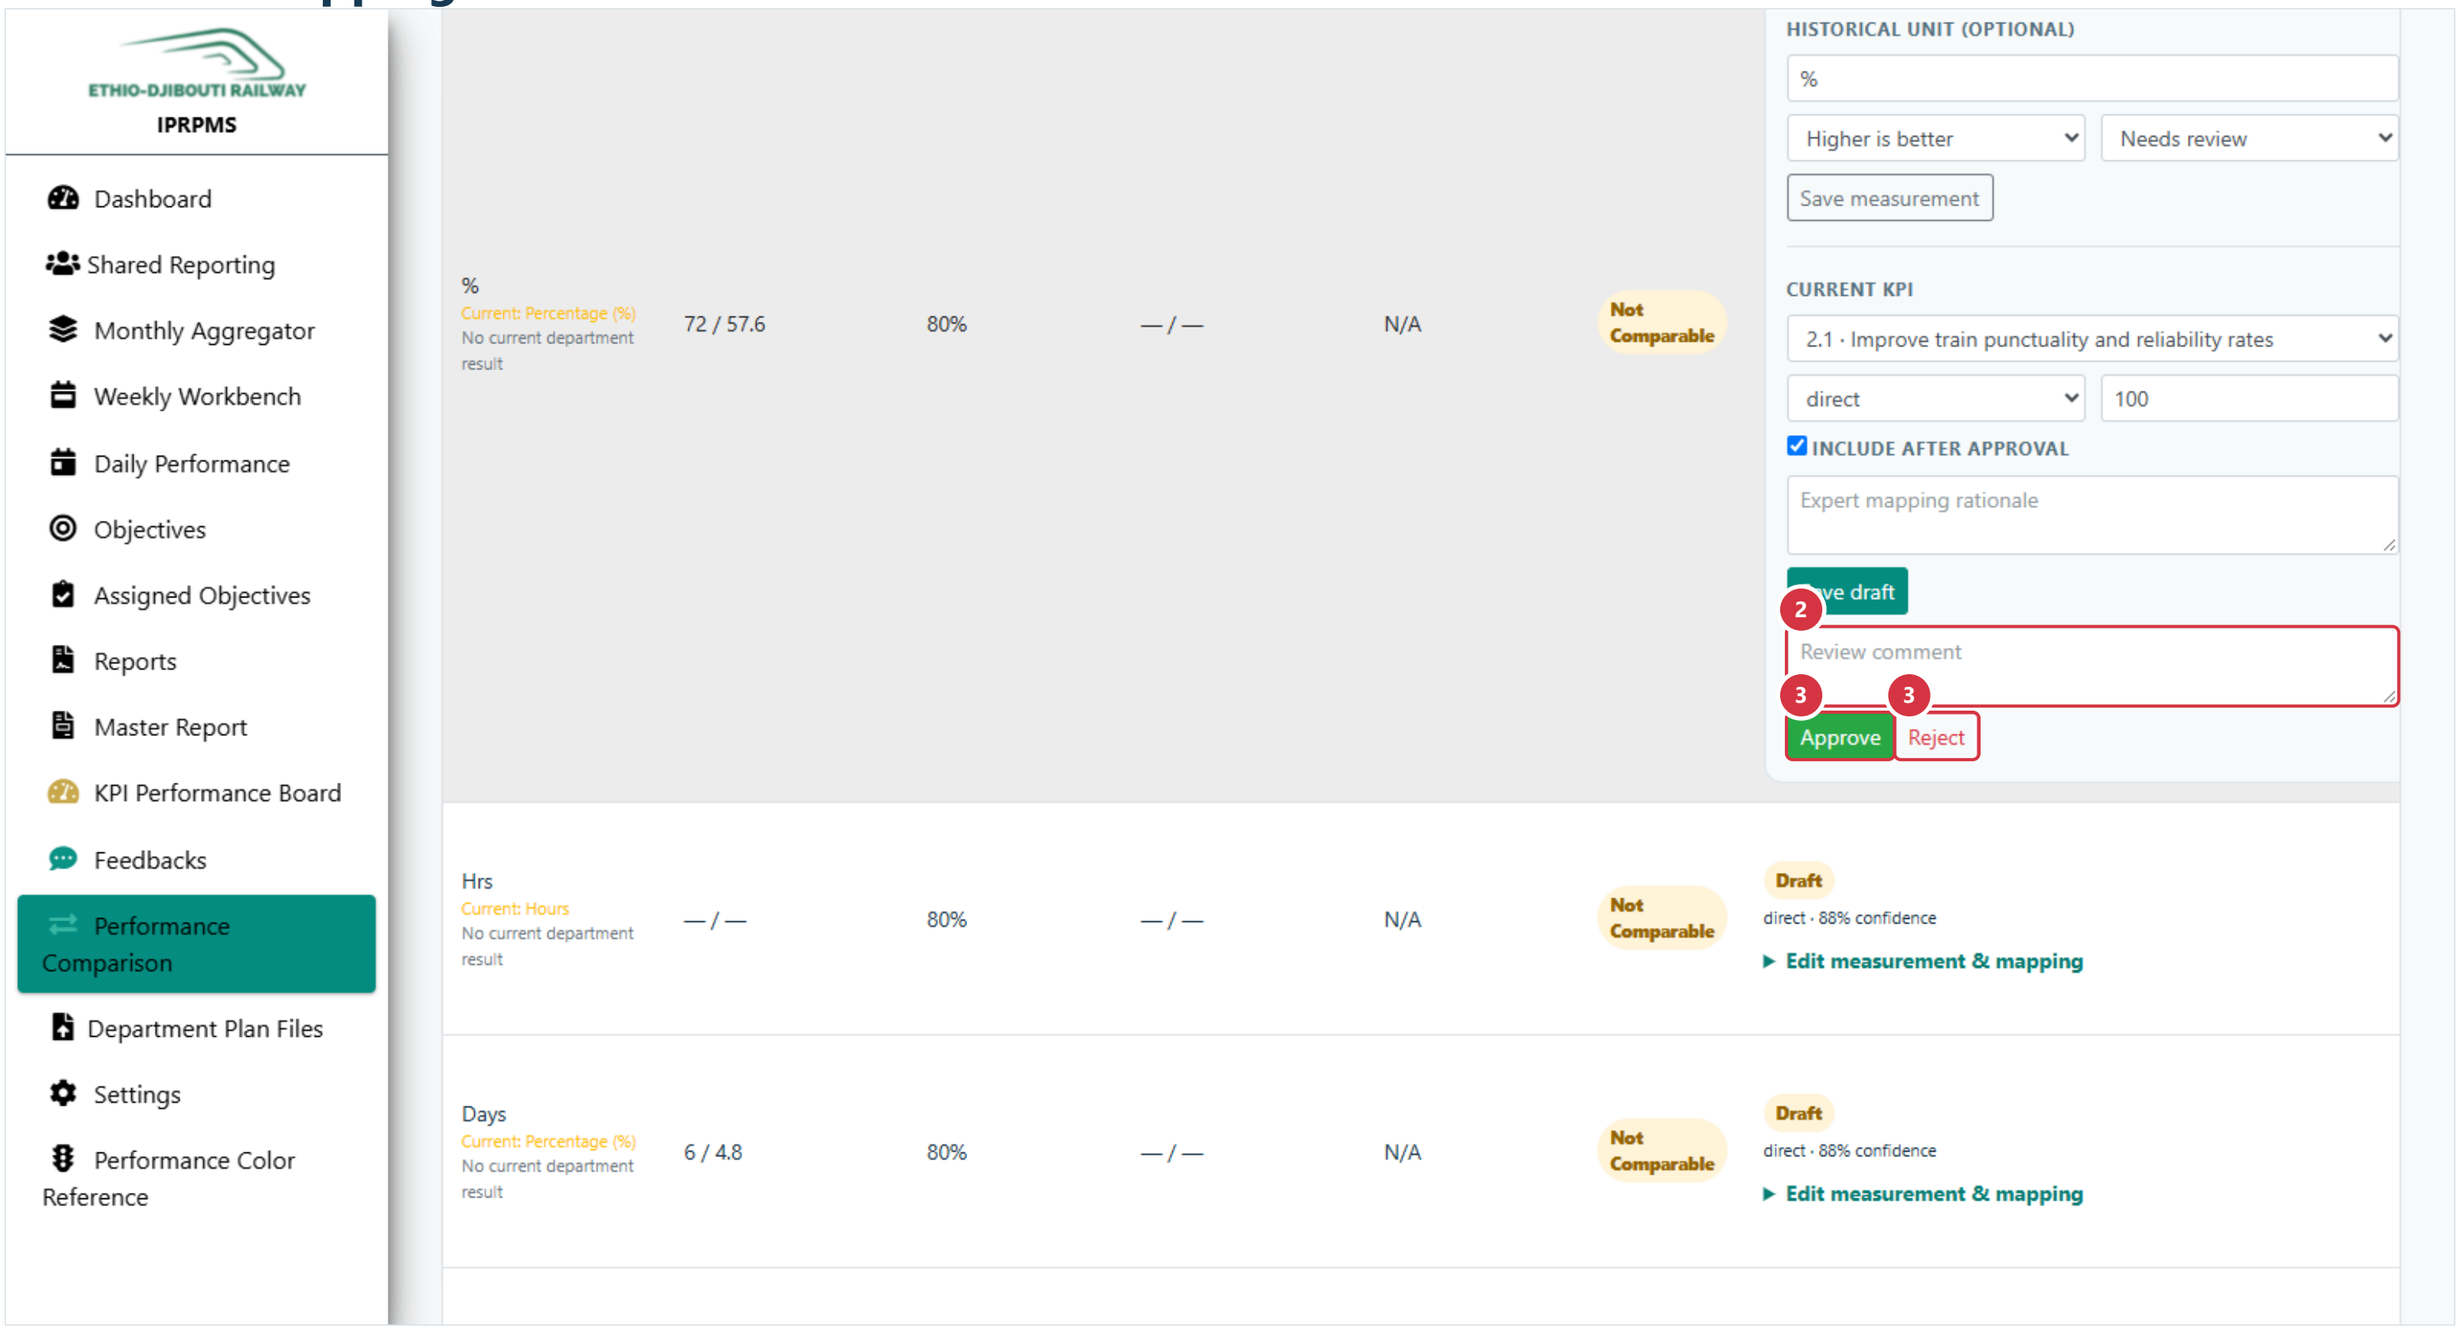

What to check

Read the preparer's rationale. Approve only a valid comparable link; otherwise explain the issue in Review comment and Reject. Do not approve a link merely to increase the coverage percentage.

How you know it worked

The mapping shows its decision. An authorized Directorate or Chief can review it; this is not a compulsory Directorate-then-Chief chain. Missing or incompatible results remain gaps even after the link is approved.

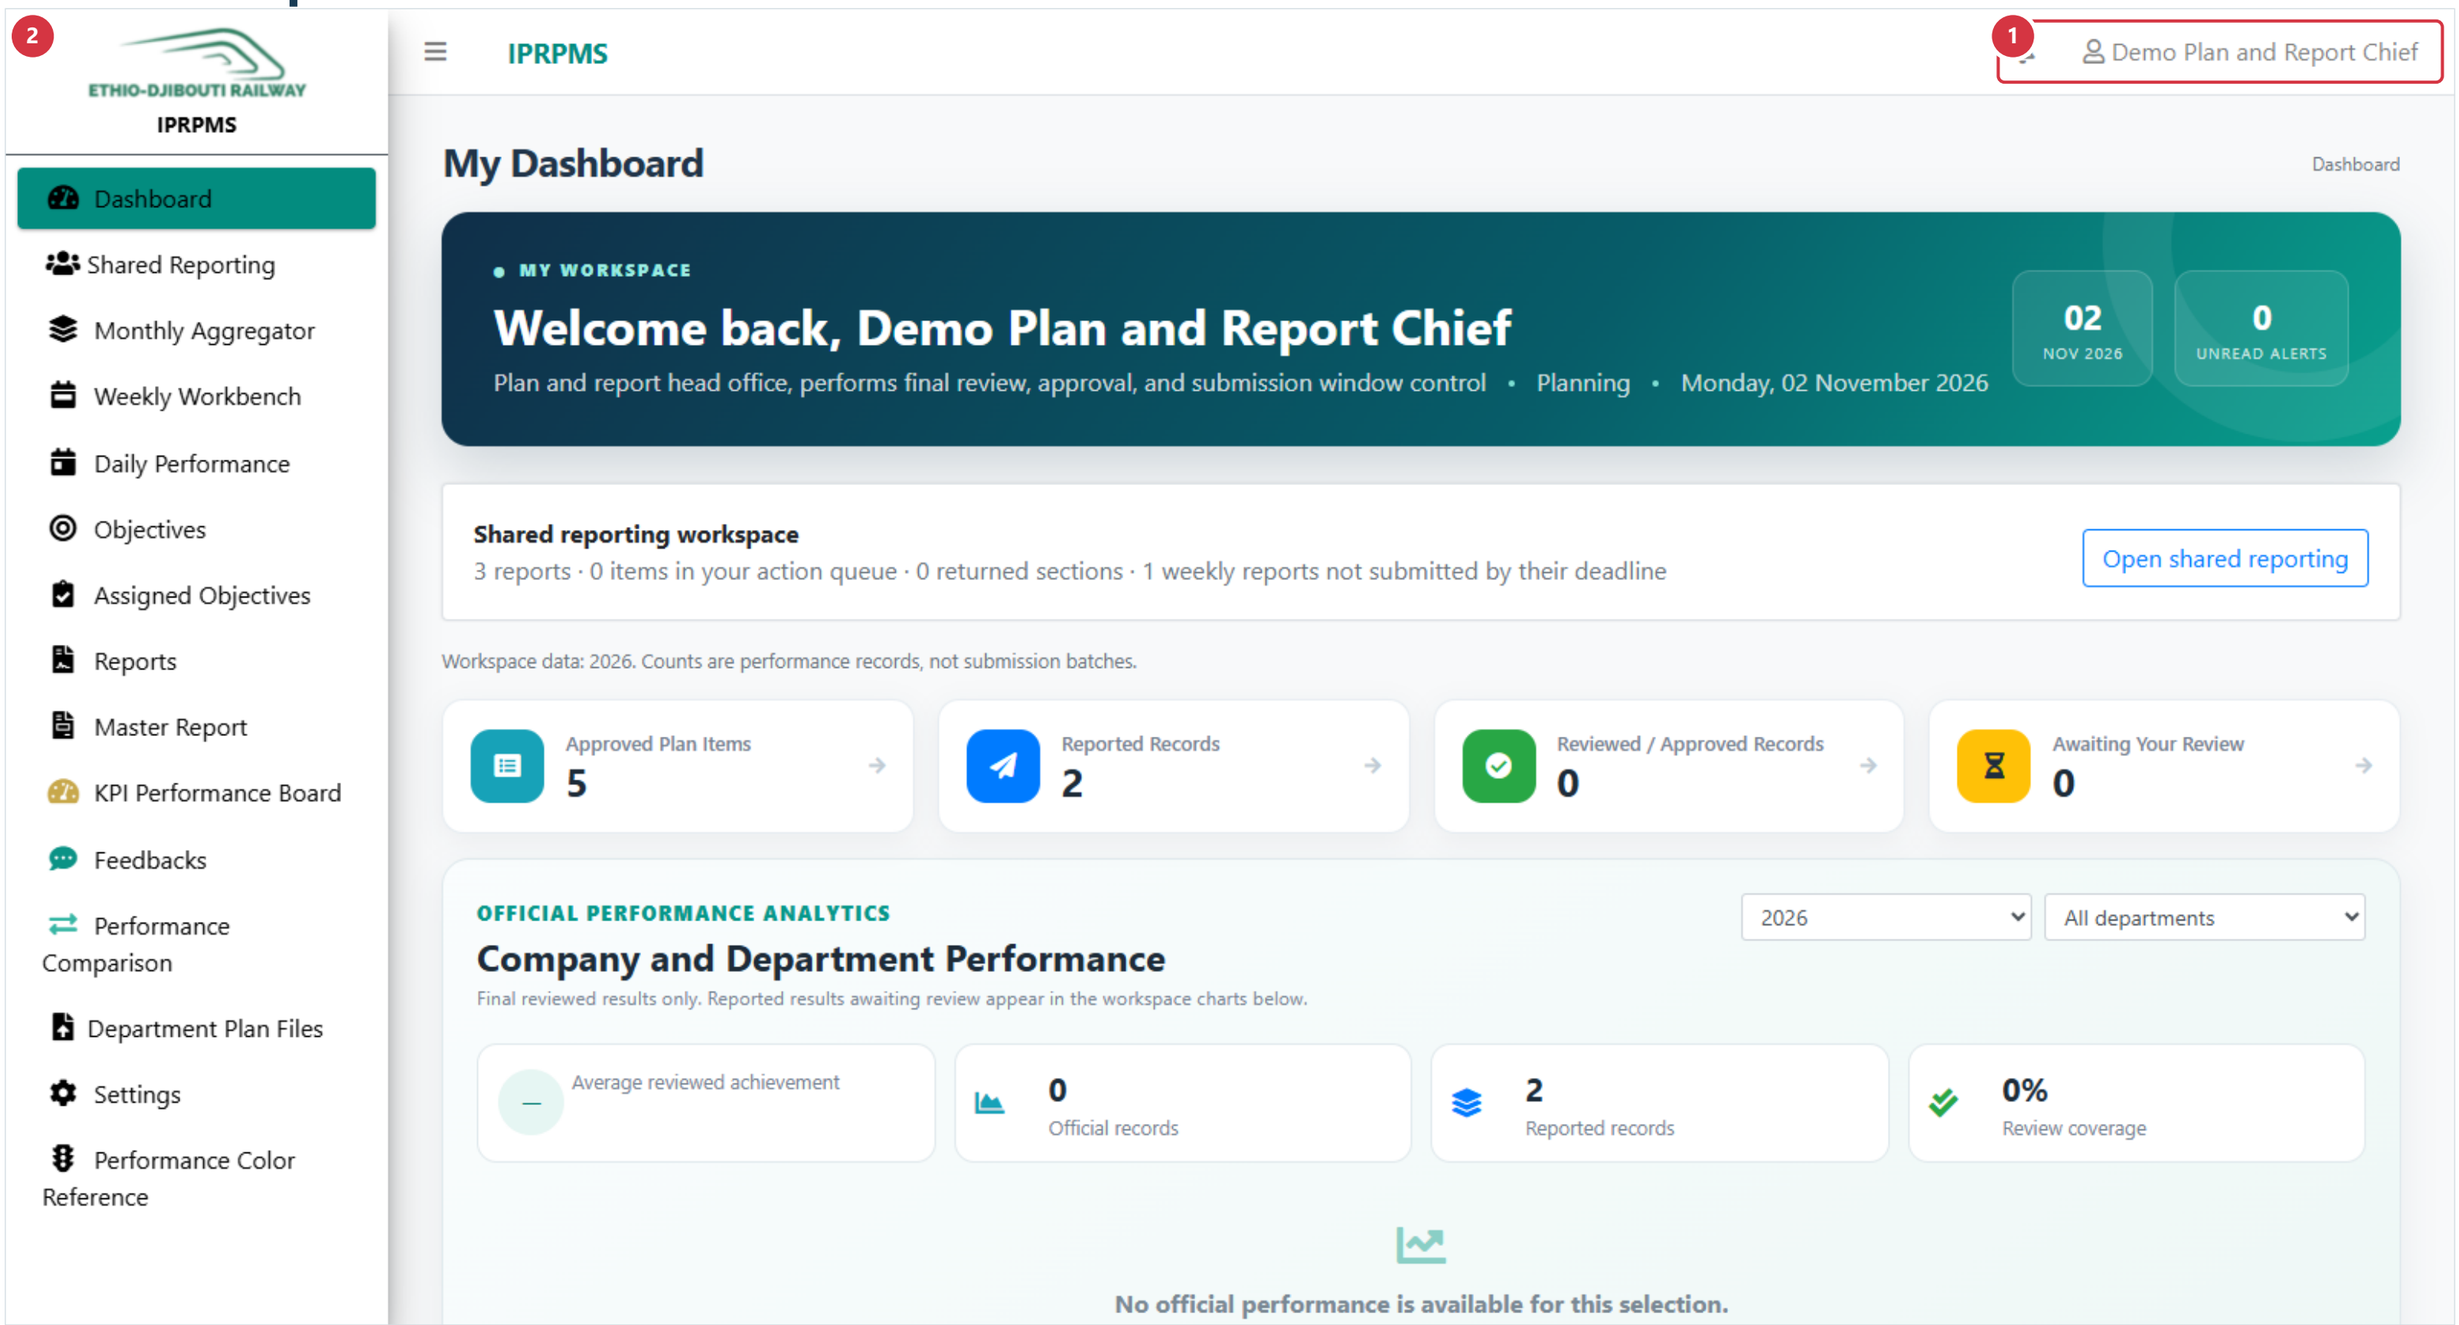

Historical mapping: Chief review decision

1. Open the submitted mapping and compare both KPI definitions, units and direction.
2. Enter Review comment; a rejection needs an explanation.
3. Click Approve for a valid comparable mapping, or Reject when the proposed link is wrong.

After this step: An authorized Directorate or Chief reviewer can decide this mapping. It is not a mandatory two-stage Directorate-then-Chief chain.

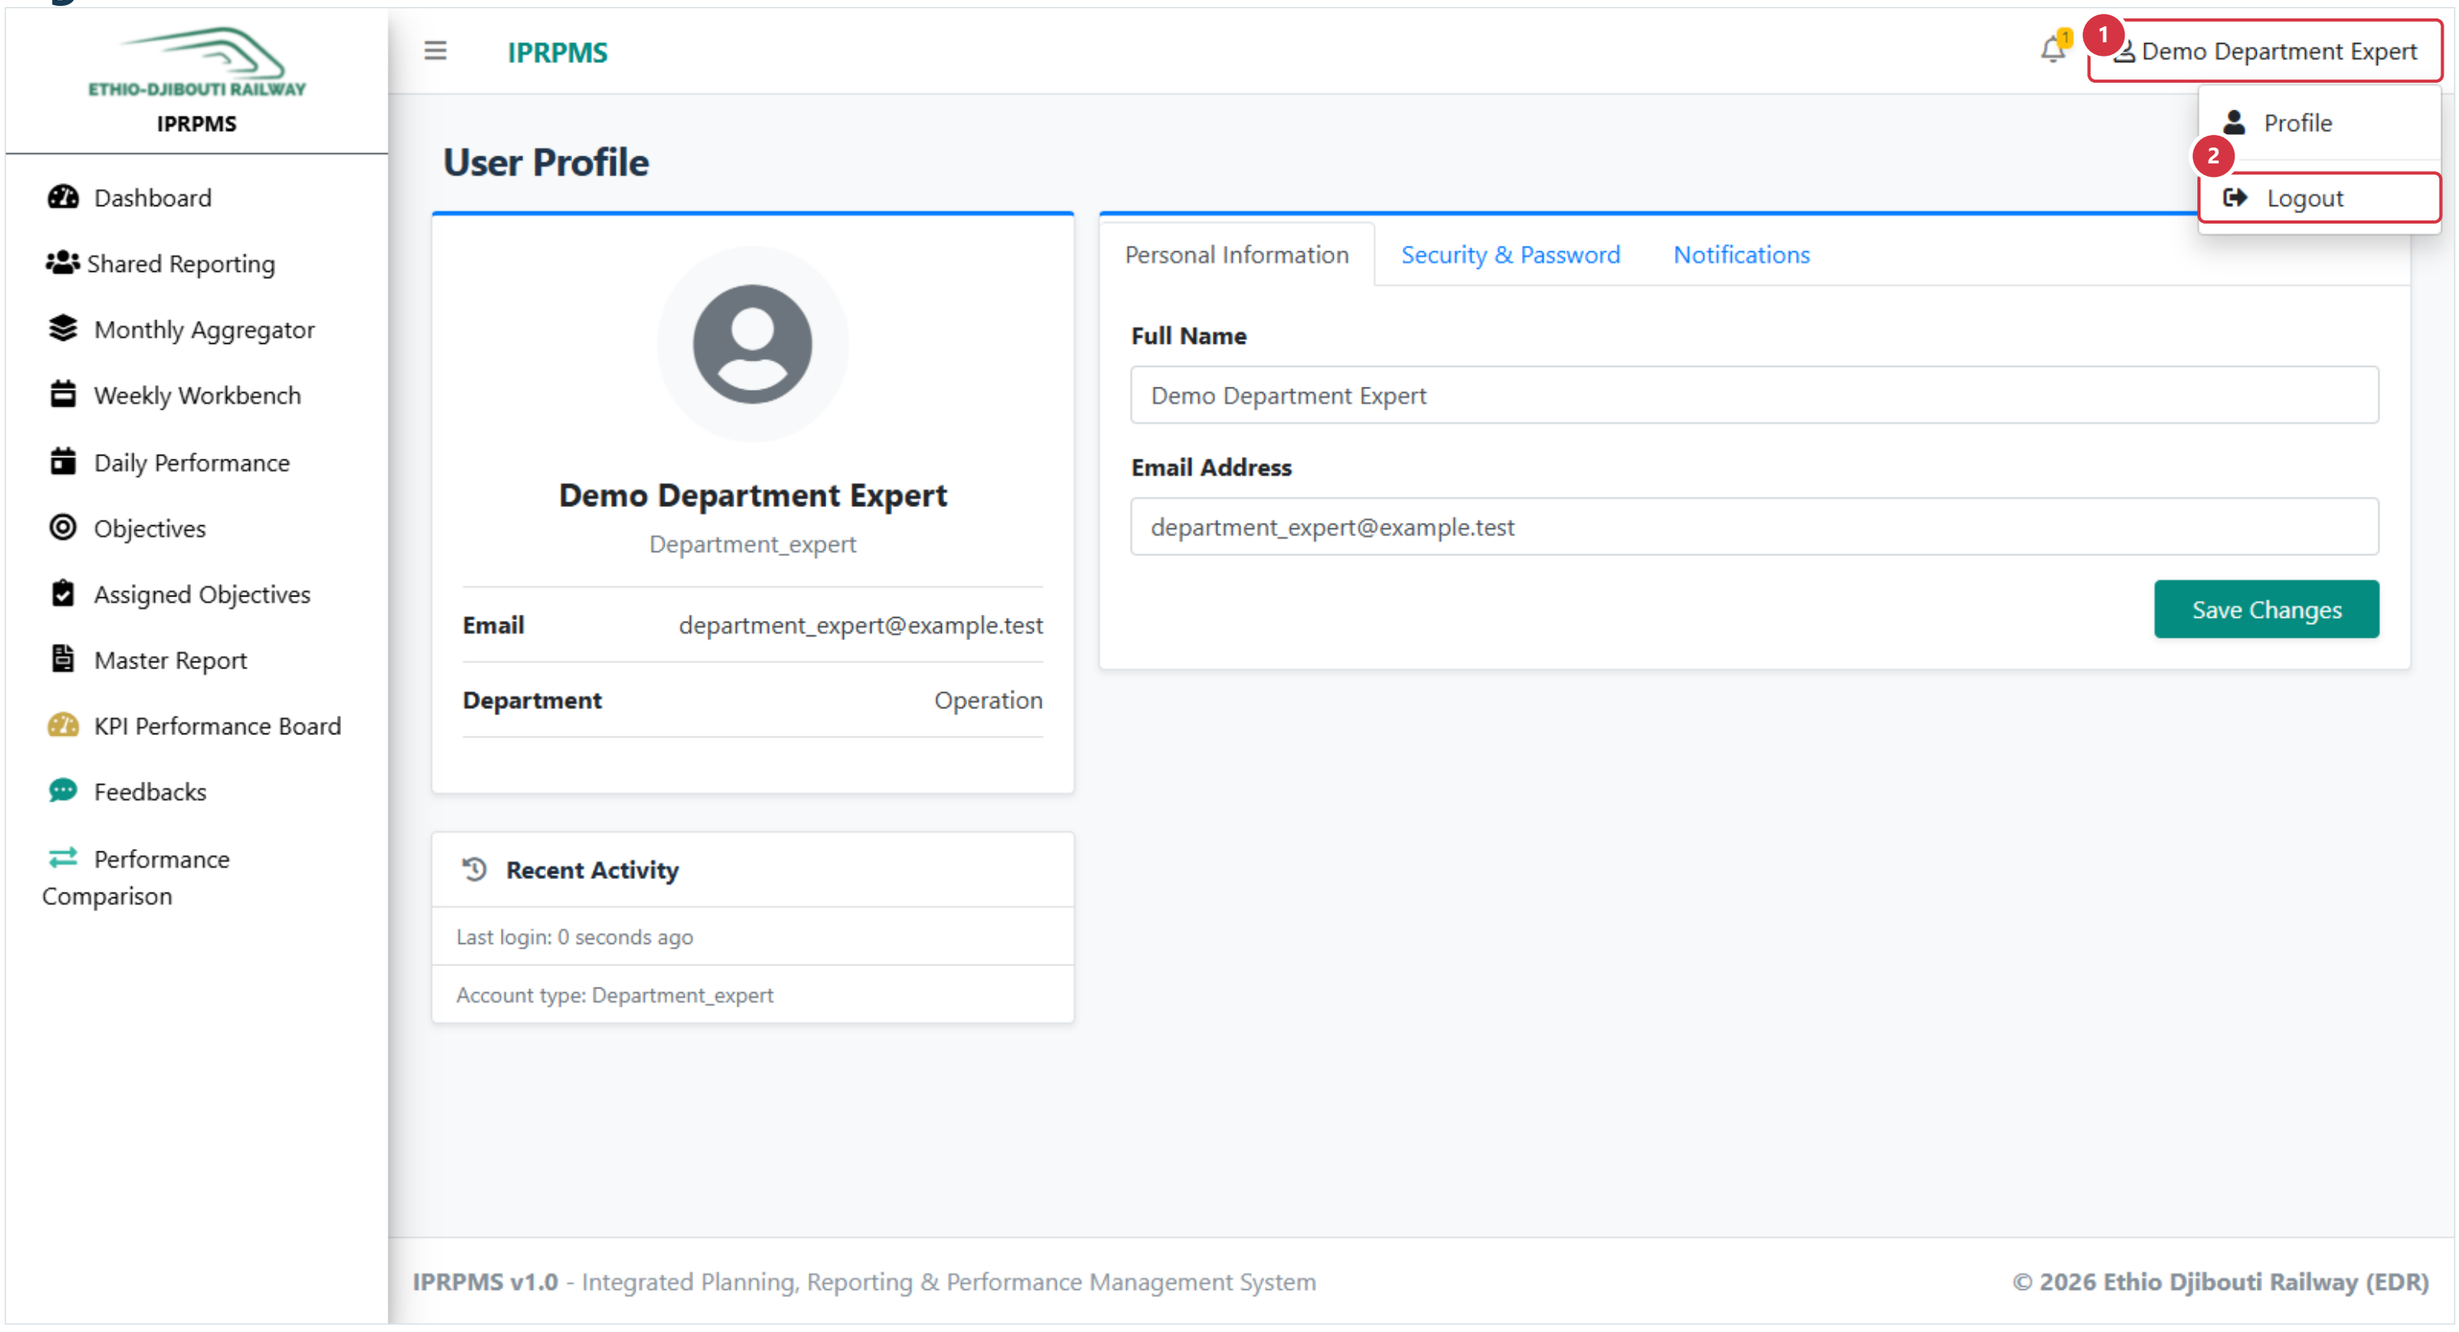

Plan and Report Chief: home screen

1. Confirm your signed-in role at the top right.
2. Review and approve organization objectives, period weights, performance, narratives and released departmental feedback.
3. Return performance to the correct level with a comment. Certify or reopen months only under your assigned authority.

After this step: Menus vary by permission, department and reporting frequency.

Sign out on a shared device

1. Click your name at the top right to open the user menu.
2. Click Logout after you finish your work.

After this step: The application returns to the sign-in screen after logout.

Before you finish, check these four things

Finish means your part is complete and you know who has the next action. It does not always mean the whole record is finally approved.

Your completion checklist

1. I reviewed the full scope and preceding comments. 2. Every final approval refers to the correct record and period. 3. Returns identify the responsible level and exact required correction. 4. Locks or reopening have the required authority and reason.

If a menu or button is missing

Do not approve a report simply to unlock a comparison or feedback action. Resolve missing evidence, unapproved results or incompatible periods first.

Ask for help with useful details

Give IT or the responsible reviewer the module, department, year, reporting period, objective or record reference and exact message. Include a safe screenshot. Never send your password.

Keep the process and data safe

Use your own account, save before sending, read return comments and keep the same record for corrections. Demonstration screenshots are teaching examples, not official performance figures. The separate logistics Import/Export module is excluded.
