Department Head

Your responsibilities, complete workflow, exact clicks and return paths.

Read first: the Start Here guide explains how the whole system works. Then use this manual to do your part, check the outcome and hand work to the right person.

Understand your job before the buttons

Keep this page in mind whenever you receive a new record. It explains your responsibility and where your part stops.

Your job

Prepare permitted departmental plan records and assign clear employee tasks within your scope. Read your department's available results.

What you receive

Approved objectives, department planning requirements and employee responsibilities within your permitted area.

Who receives your work

A separately prepared departmental plan goes to its authorized approver. Assigned tasks go to the selected employees.

Your limits and important distinctions

Department Head is a distinct supporting role, not automatically Department Chief in the shared-reporting workflow. Do not assume the same menus or approval powers.

Your workflow, from first action to finish

Read down the page. Each step has an outcome; do not jump ahead simply because a button is visible.

1

Identify the workstream

Confirm whether you are preparing a departmental plan record or assigning an employee task.

2

Use the correct approved plan items

Choose objectives belonging to the intended department and planning year.

3

Save and check the plan

Review targets and performer responsibility. Save a draft until it is complete.

4

Submit the departmental plan

Use Submit when ready and follow its status. Read a return comment before correcting the same record.

5

Assign clear tasks

Choose the employee, plan item, description and dates; confirm the assignment in the task list.

6

Monitor availability and follow up

Use available department views. If task detail fails, report it to IT instead of assuming the employee has submitted or been approved.

Find the task you need

Use the page number or click a task name in the PDF. Section introductions explain the purpose before the screen-by-screen actions.

First access and everyday account safety 5

Prepare and submit a departmental plan record 11

Assign employee tasks clearly 16

Completion checklist and help 21

First access and everyday account safety

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

Use your own account. Your department and role decide what you can see and which decisions you can make. Never use somebody else's account to reach a missing button.

Before you click

Have your official account details ready. Open the address supplied by IT, enter your email and Access Key, then click Authenticate. A first-password screen appears only when your account requires it.

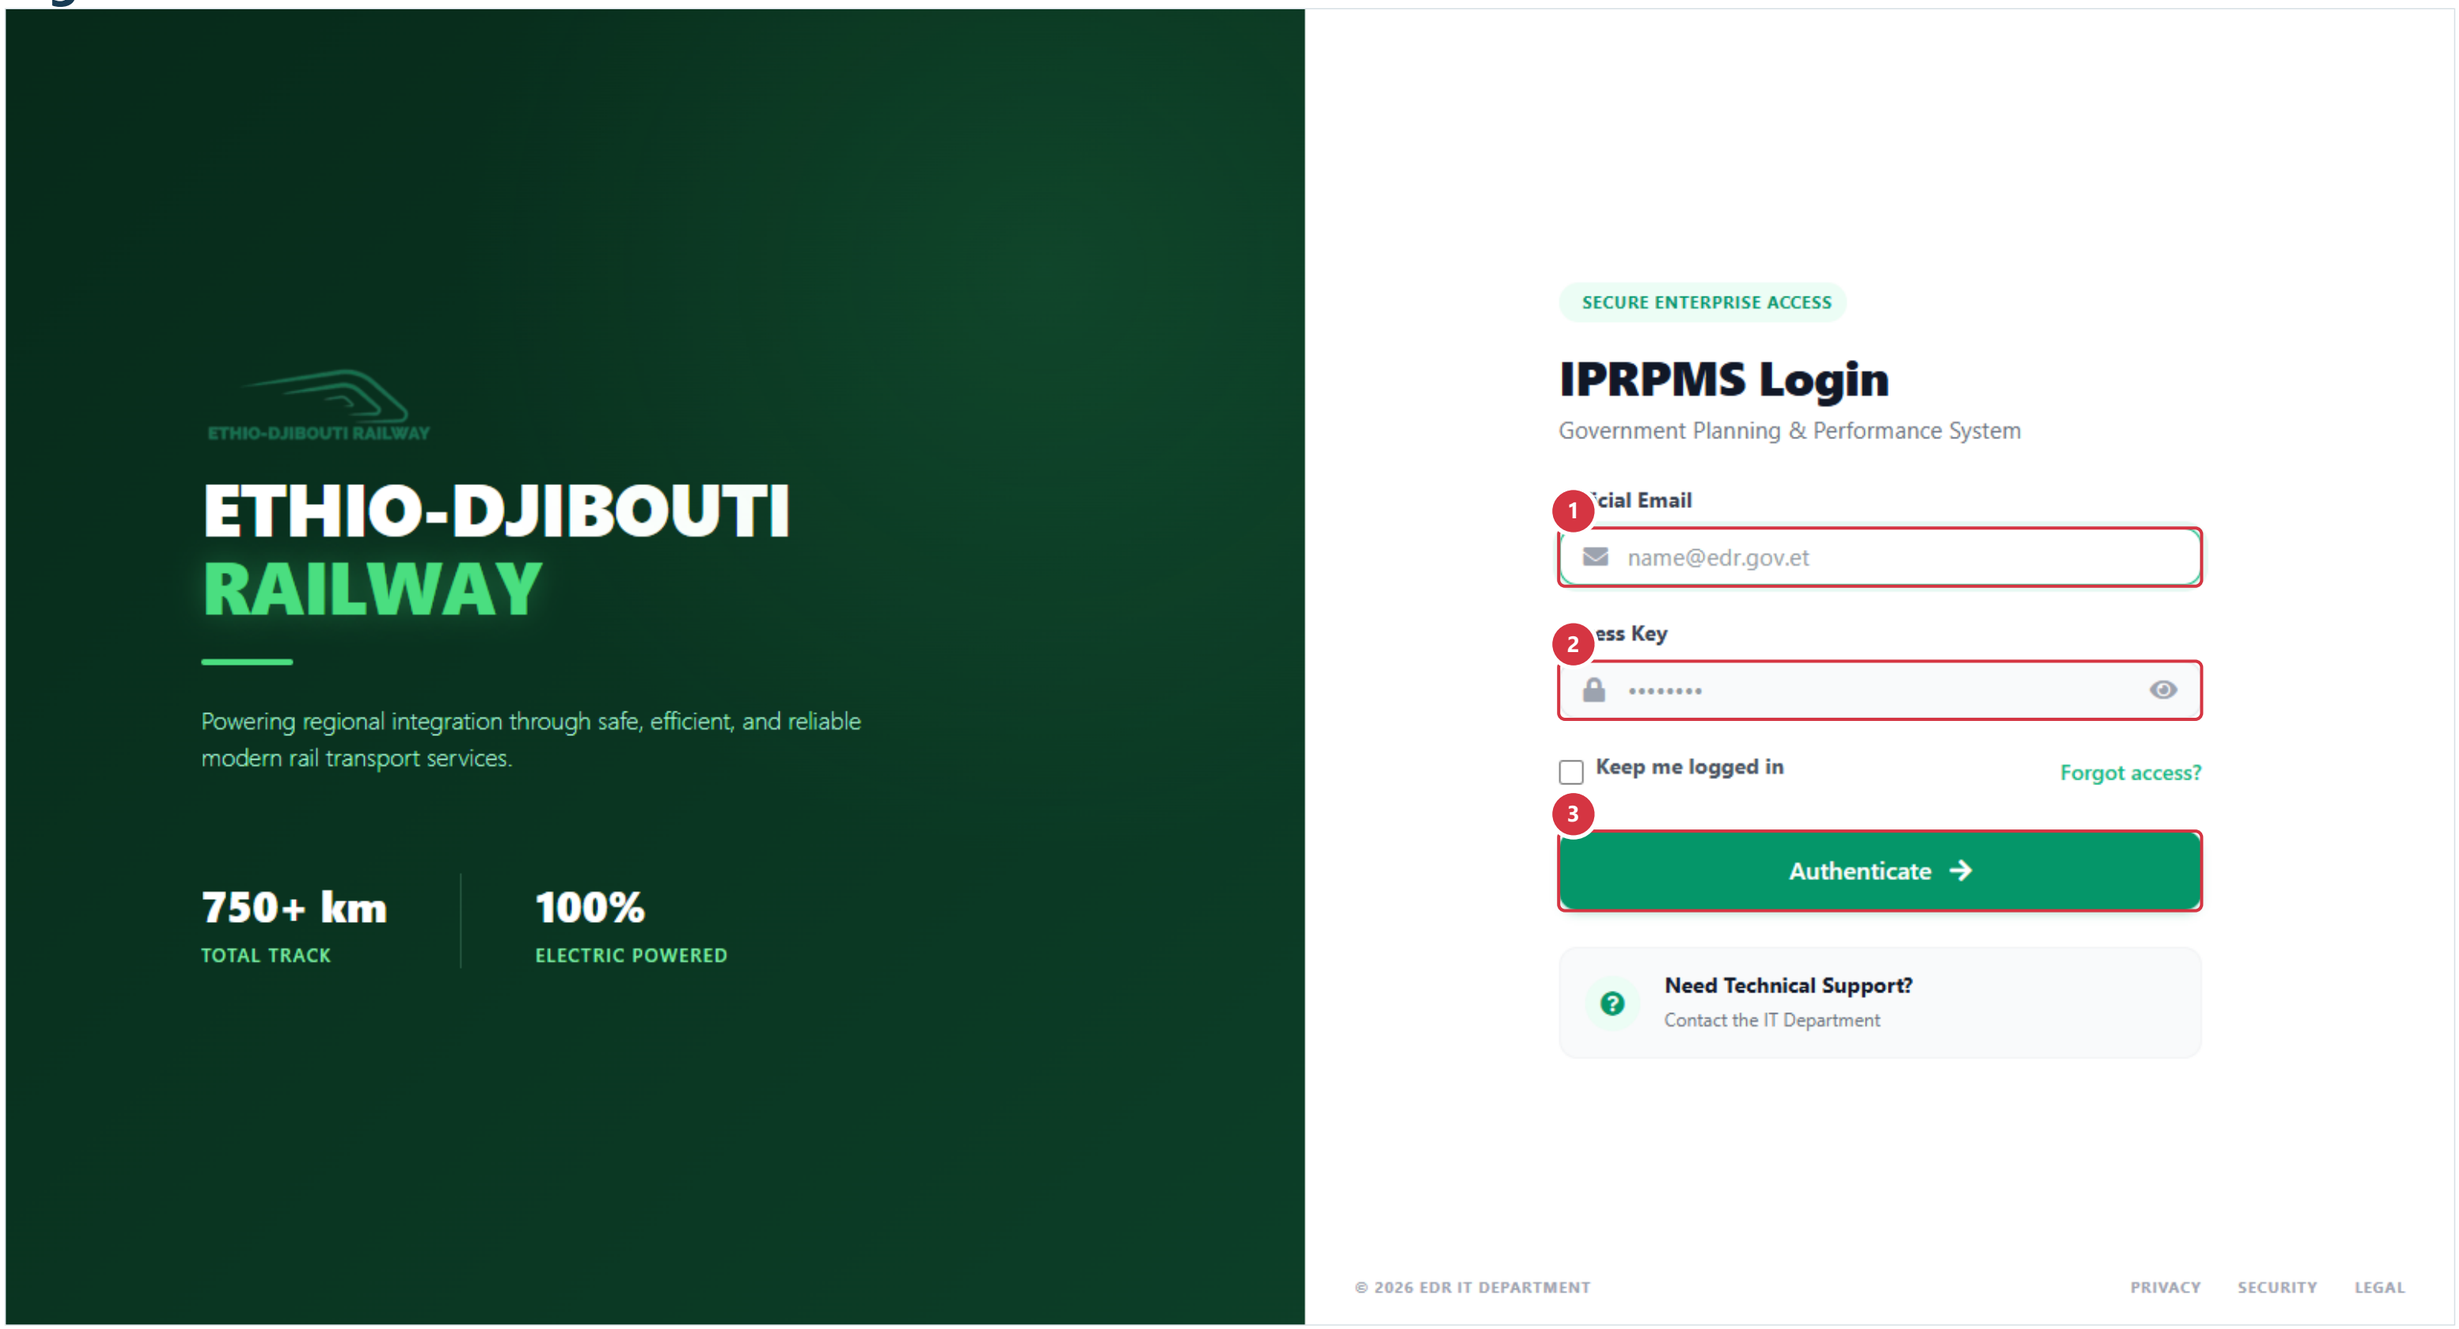

What to check

Check the name and role at the top right. Change your temporary password when prompted. Your profile is for your own name, email and password; department and role changes belong to the administrator.

How you know it worked

You can open the dashboard with the correct account. The notification bell shows work sent to you. On a shared computer, sign out when finished and do not choose Keep me logged in.

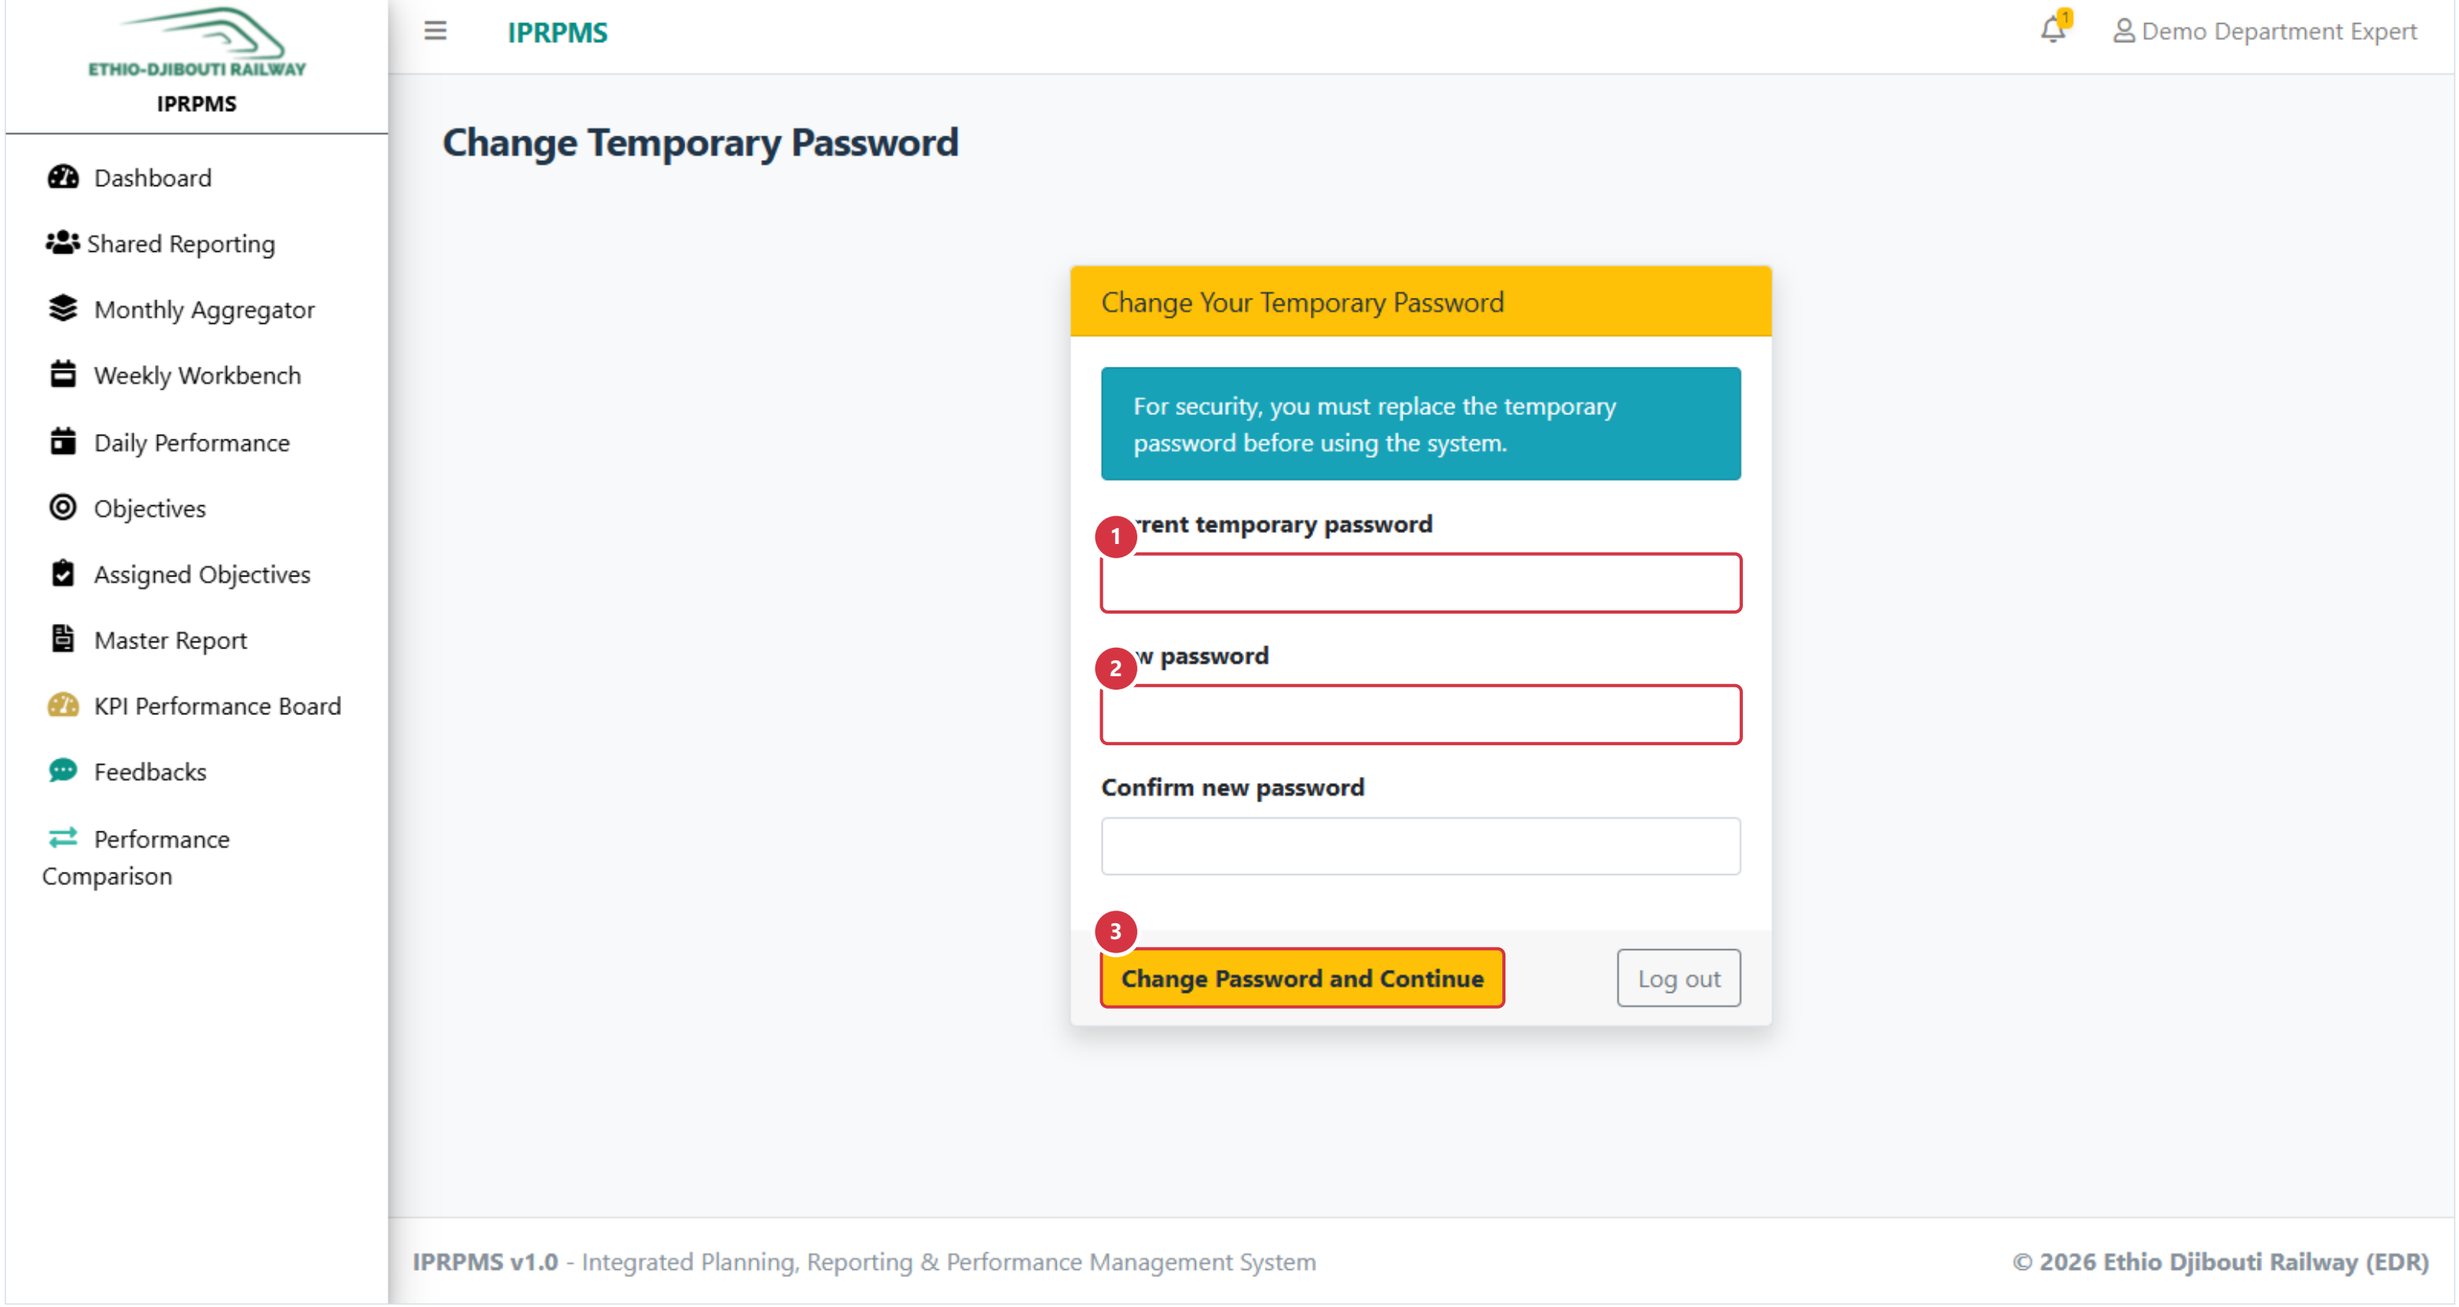

Sign in to IPRPMS

1. Enter your official email in Official Email.
2. Enter your own access key in Access Key.
3. Select Keep me logged in only on your own device, then click Authenticate.

After this step: The dashboard opens after authentication. Password fields in this handbook remain blank.

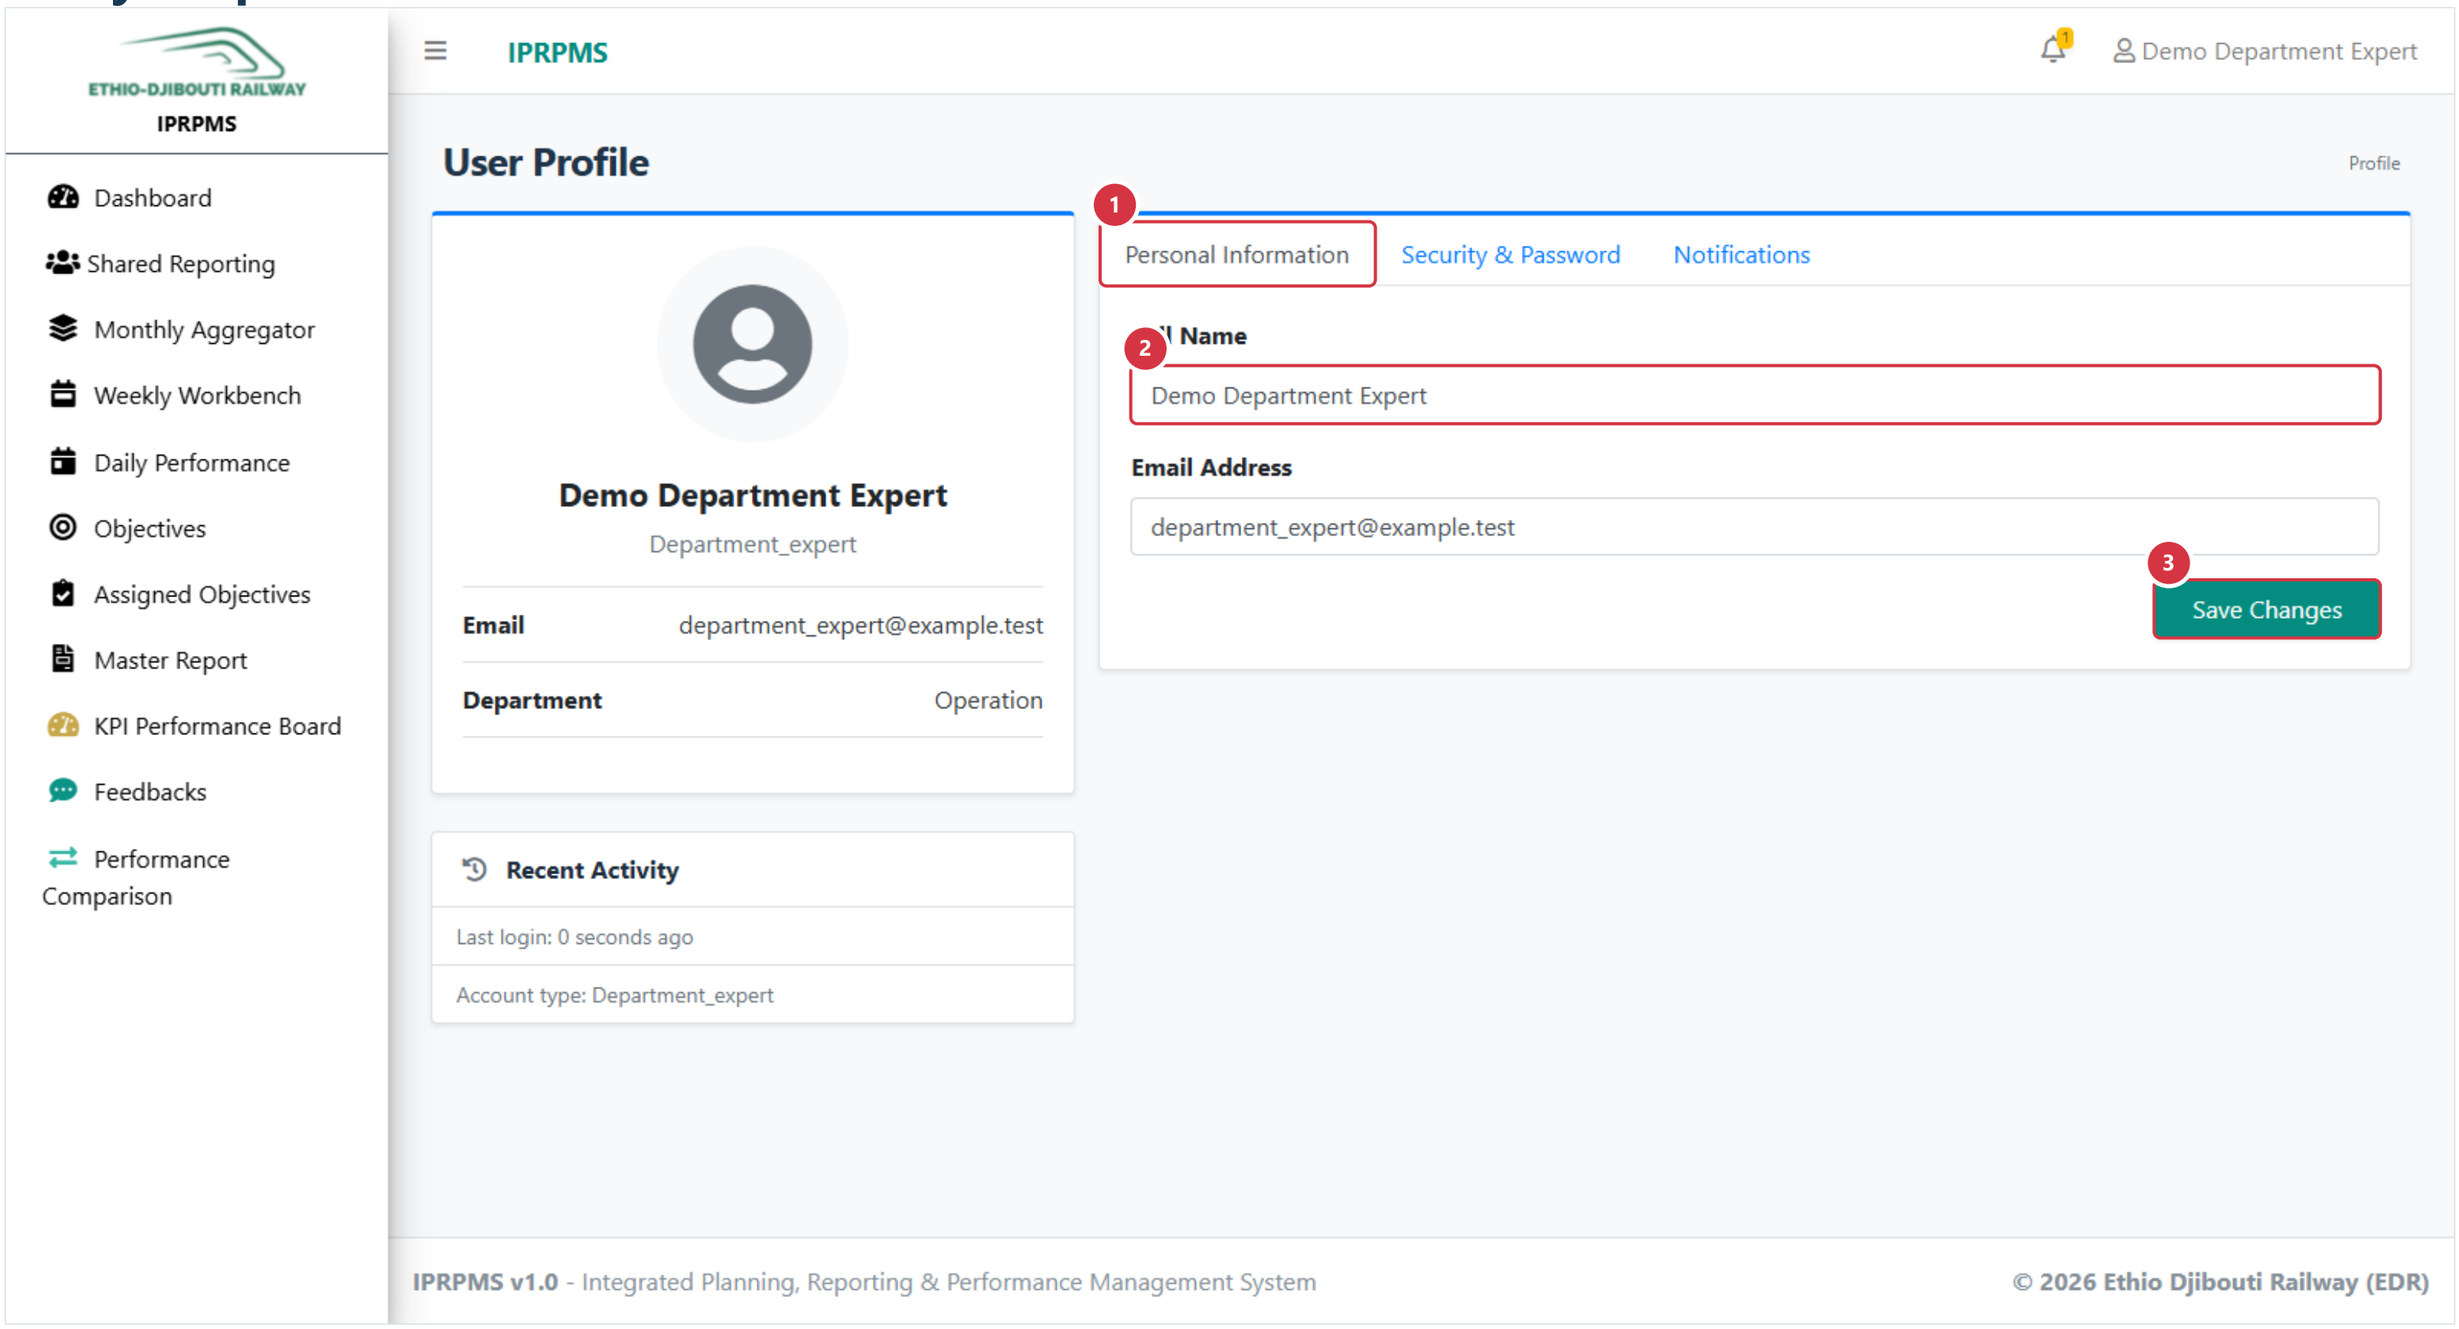

Replace a temporary password

1. Enter the current temporary password.
2. Enter a new private password and repeat it in Confirm new password.
3. Click Change Password and Continue.

After this step: This screen appears when the administrator requires a first password change.

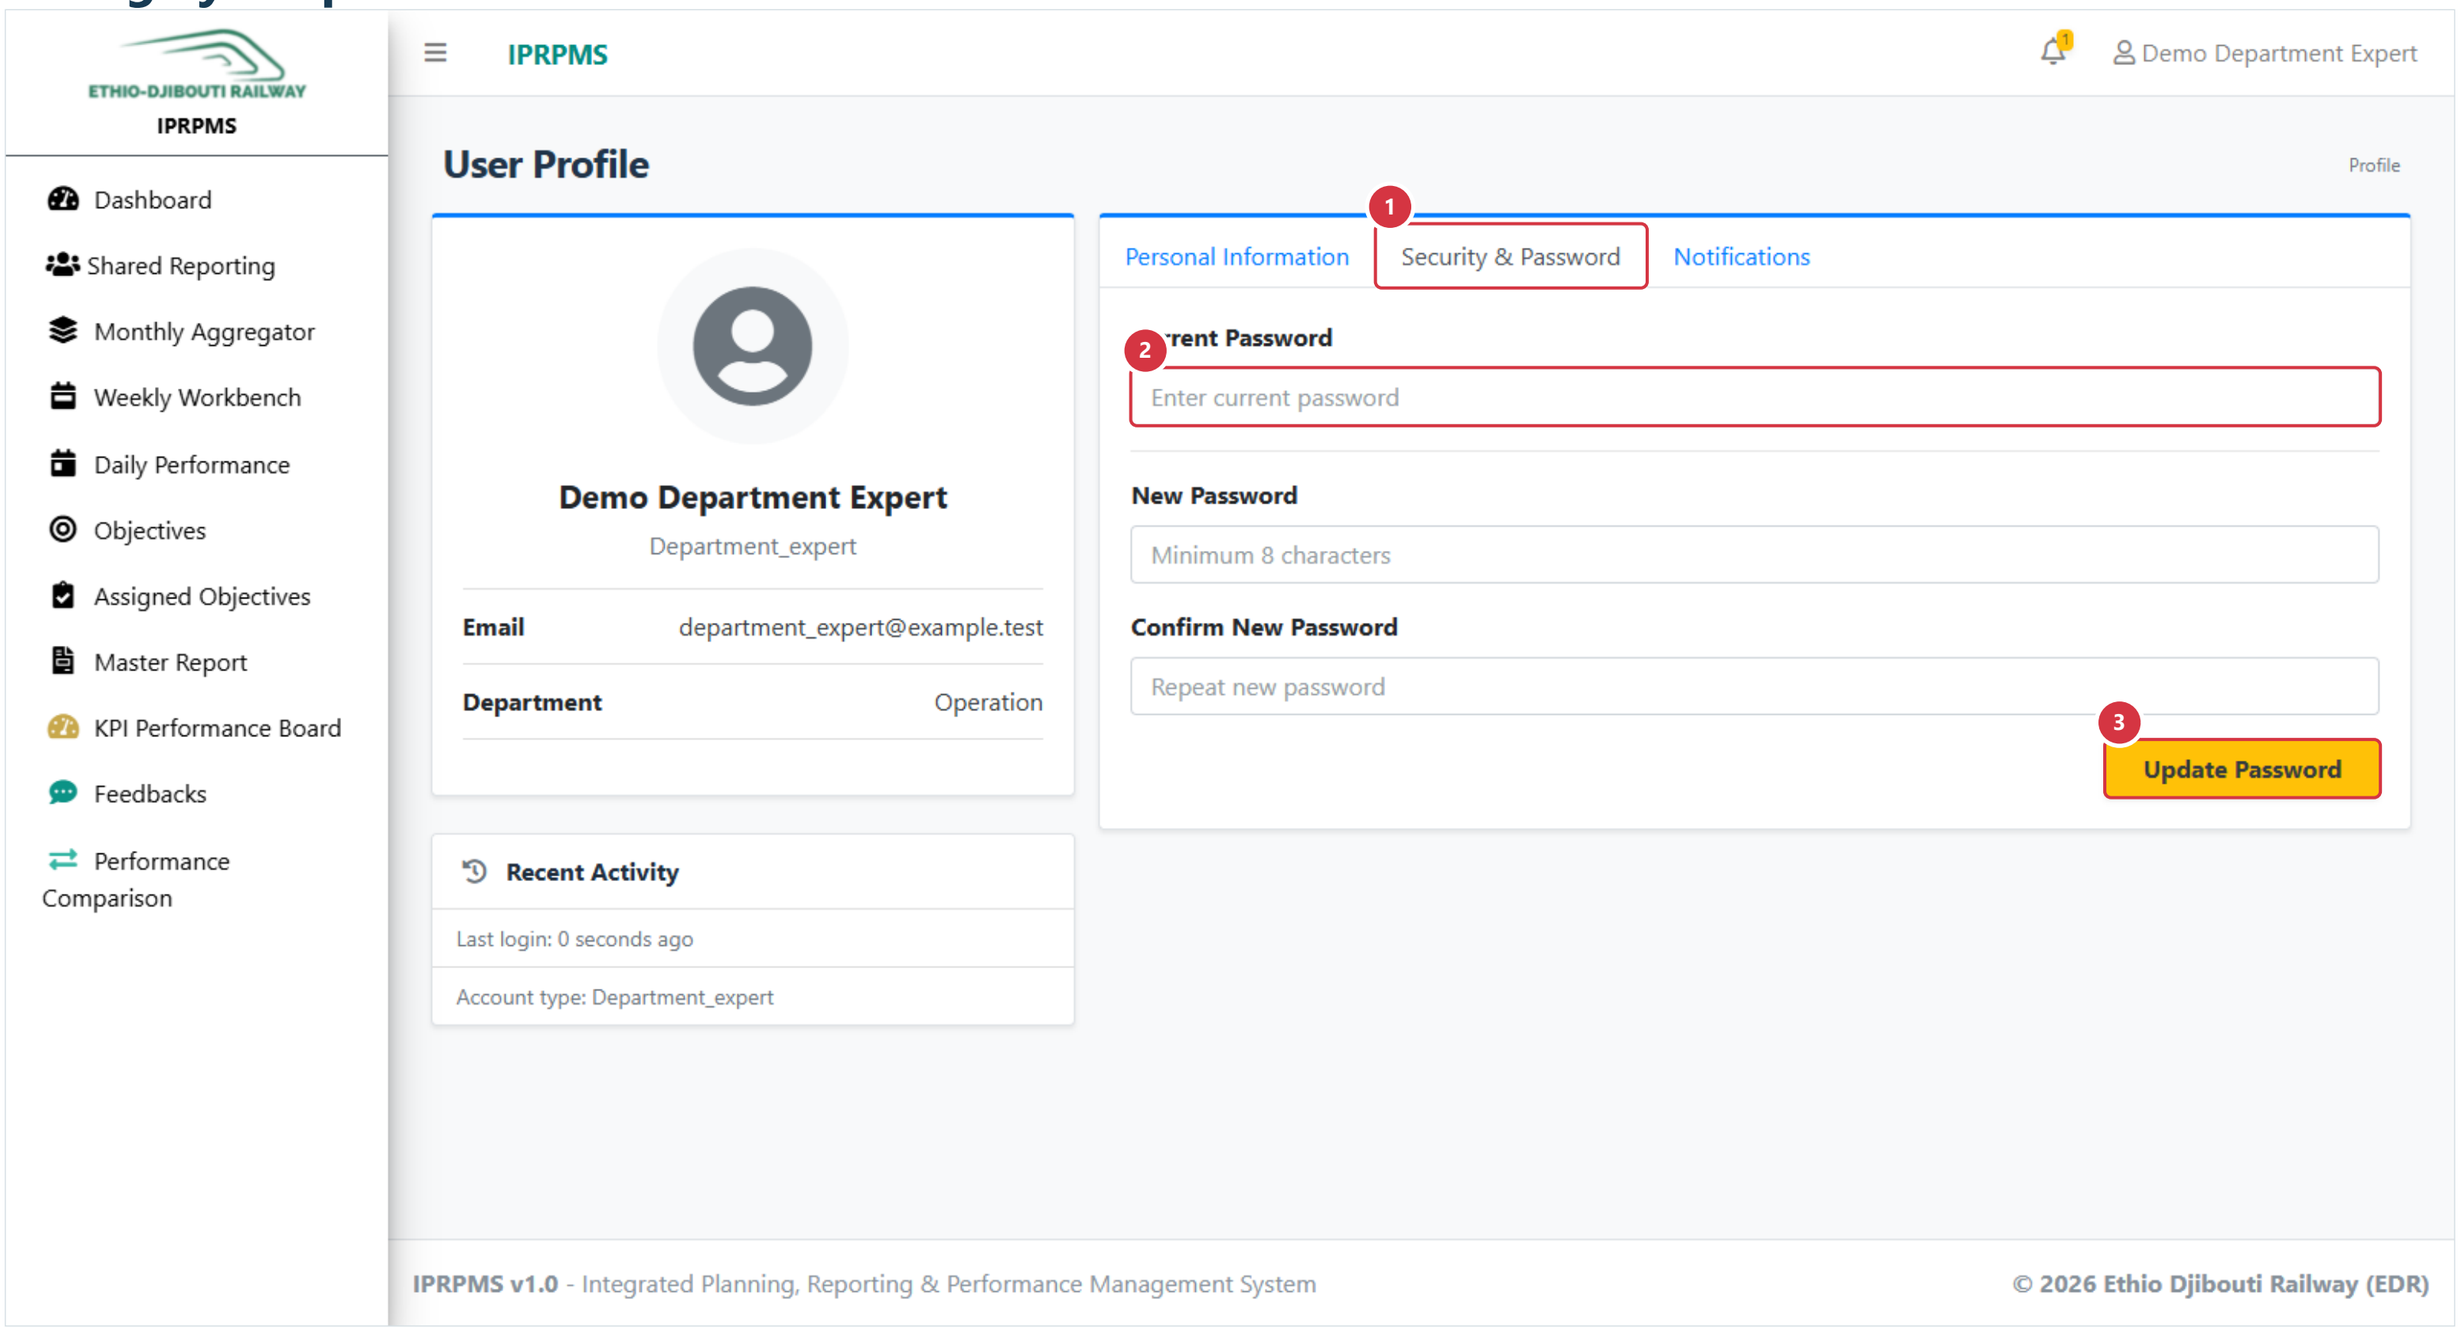

Edit your personal information

1. Click Personal Information in Profile.
2. Update Full Name or Email Address.
3. Click Save Changes and confirm the success message.

After this step: Department and role assignments are managed by the administrator, not through this form.

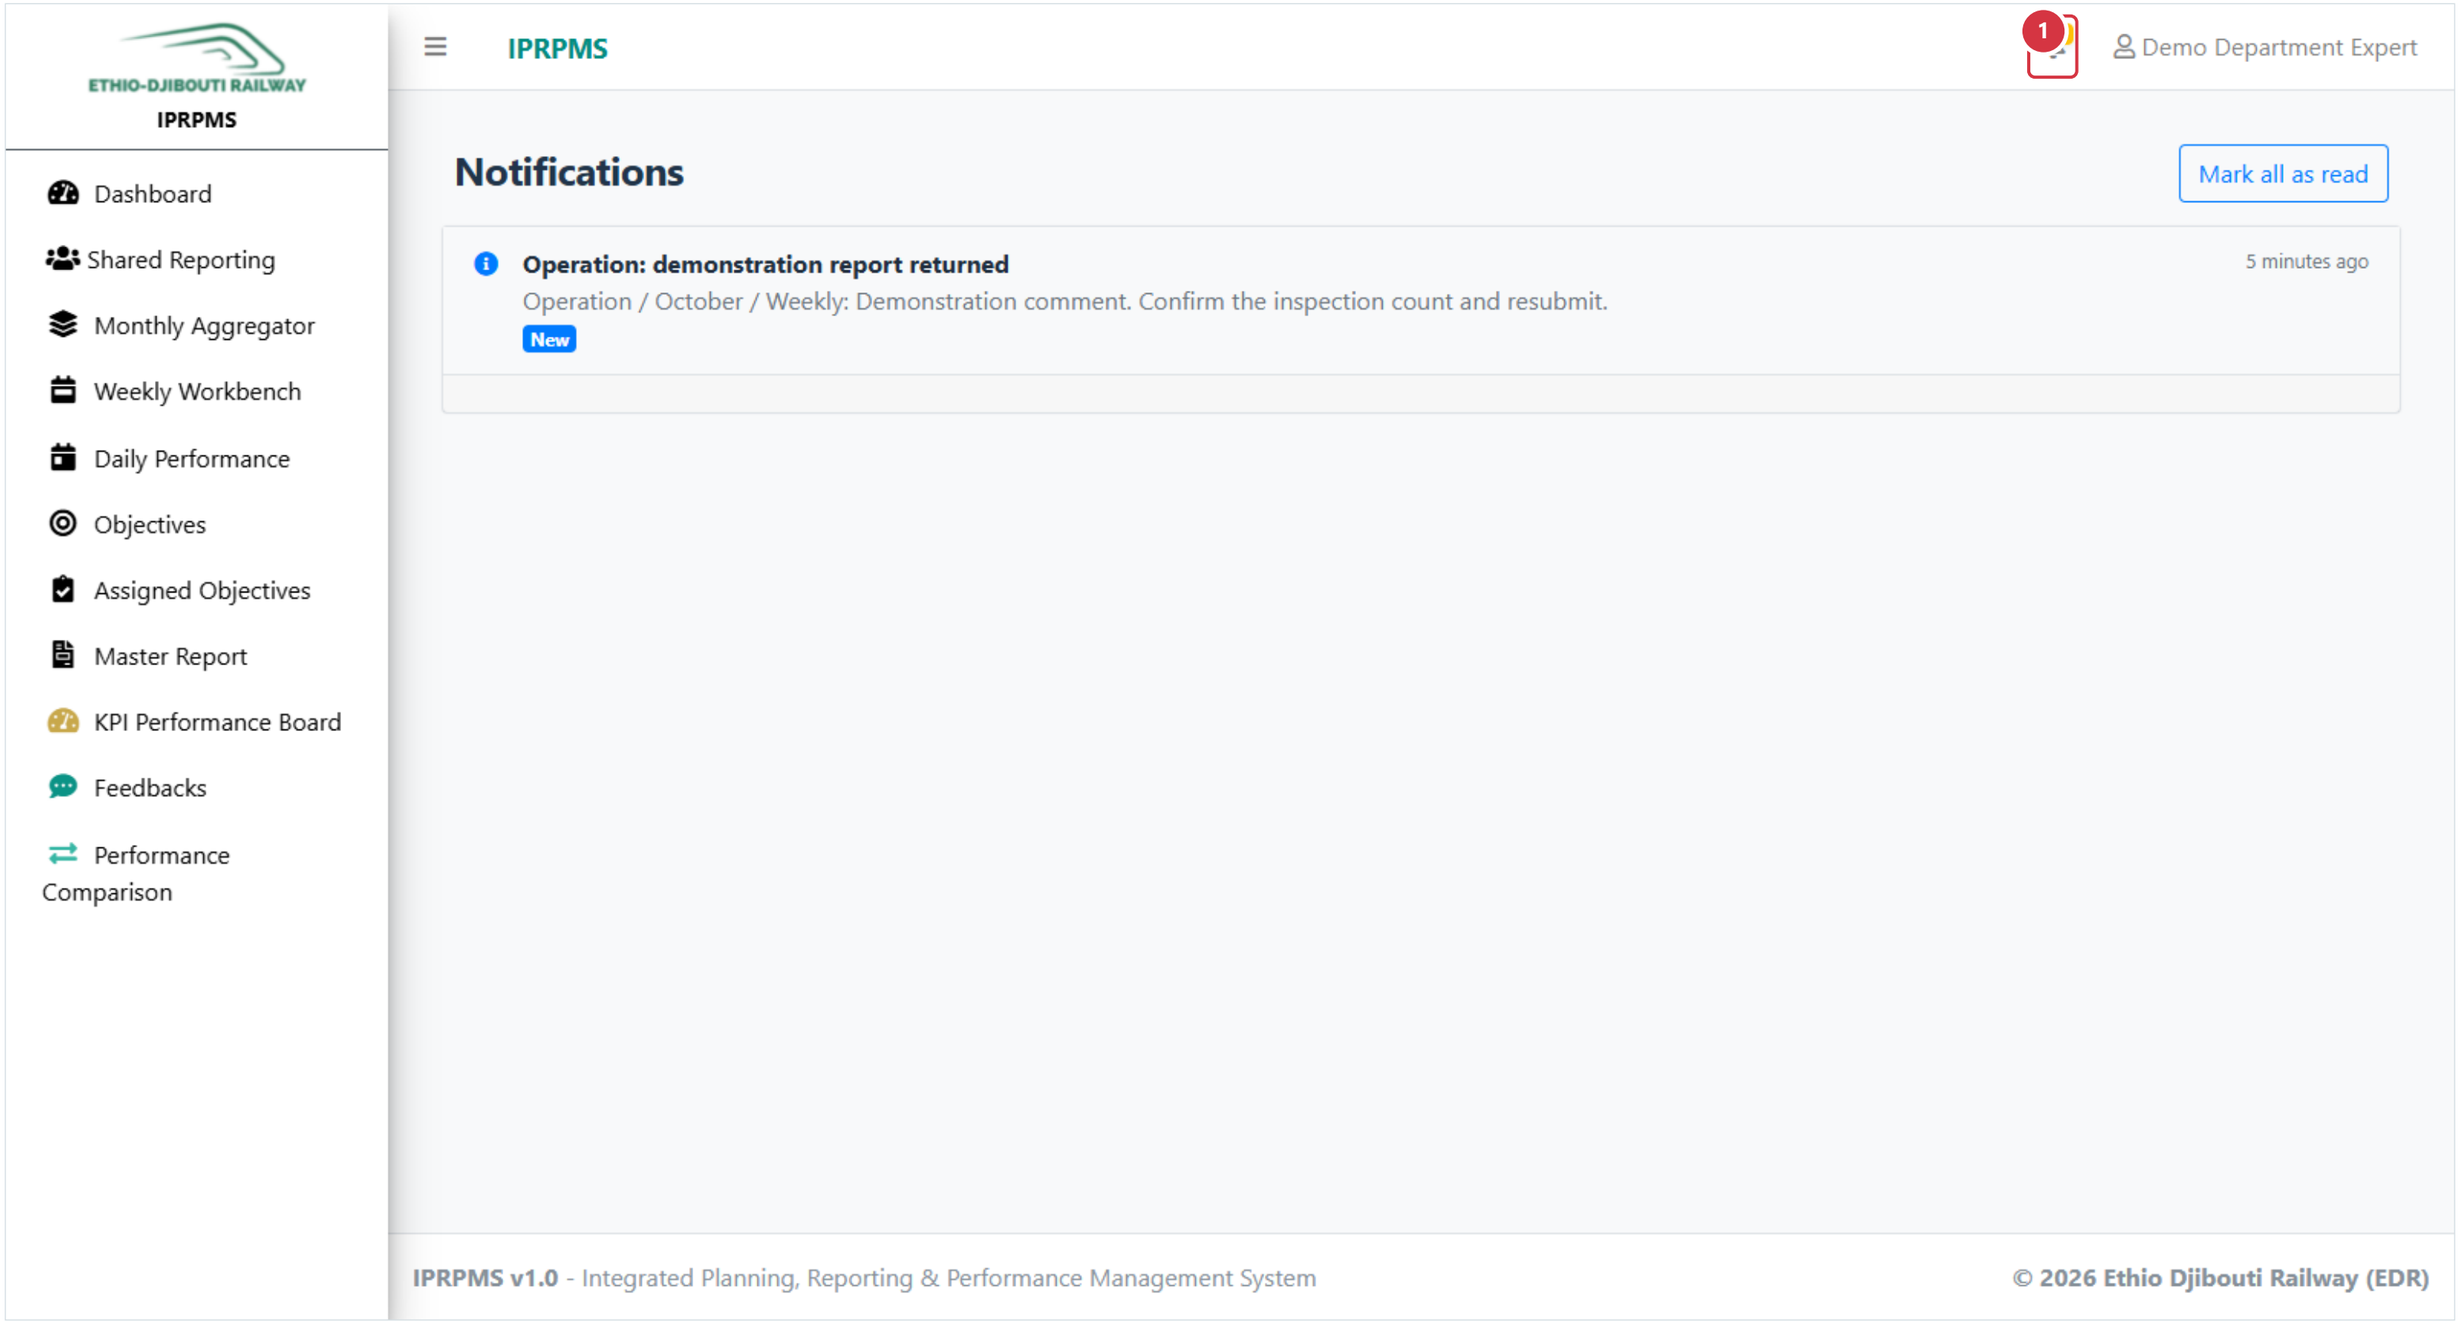

Change your password

1. Click Security & Password.
2. Enter your current password, a new password and its confirmation.
3. Click Update Password.

After this step: Use a private password. The fields are deliberately empty in this training capture.

Read workflow notifications

1. Open the notification bell or Notifications page.
2. Read the department, period, action and review comment.
3. Open the linked record or mark the notice read after acting on it.

After this step: Marking a notification read does not approve, correct or submit the underlying record.

Prepare and submit a departmental plan record

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

This optional plan-record workflow is separate from the automatic publication and acceptance of organization objectives.

Before you click

Use it only where your account and organization process permit it. Select the department, year and approved objective items.

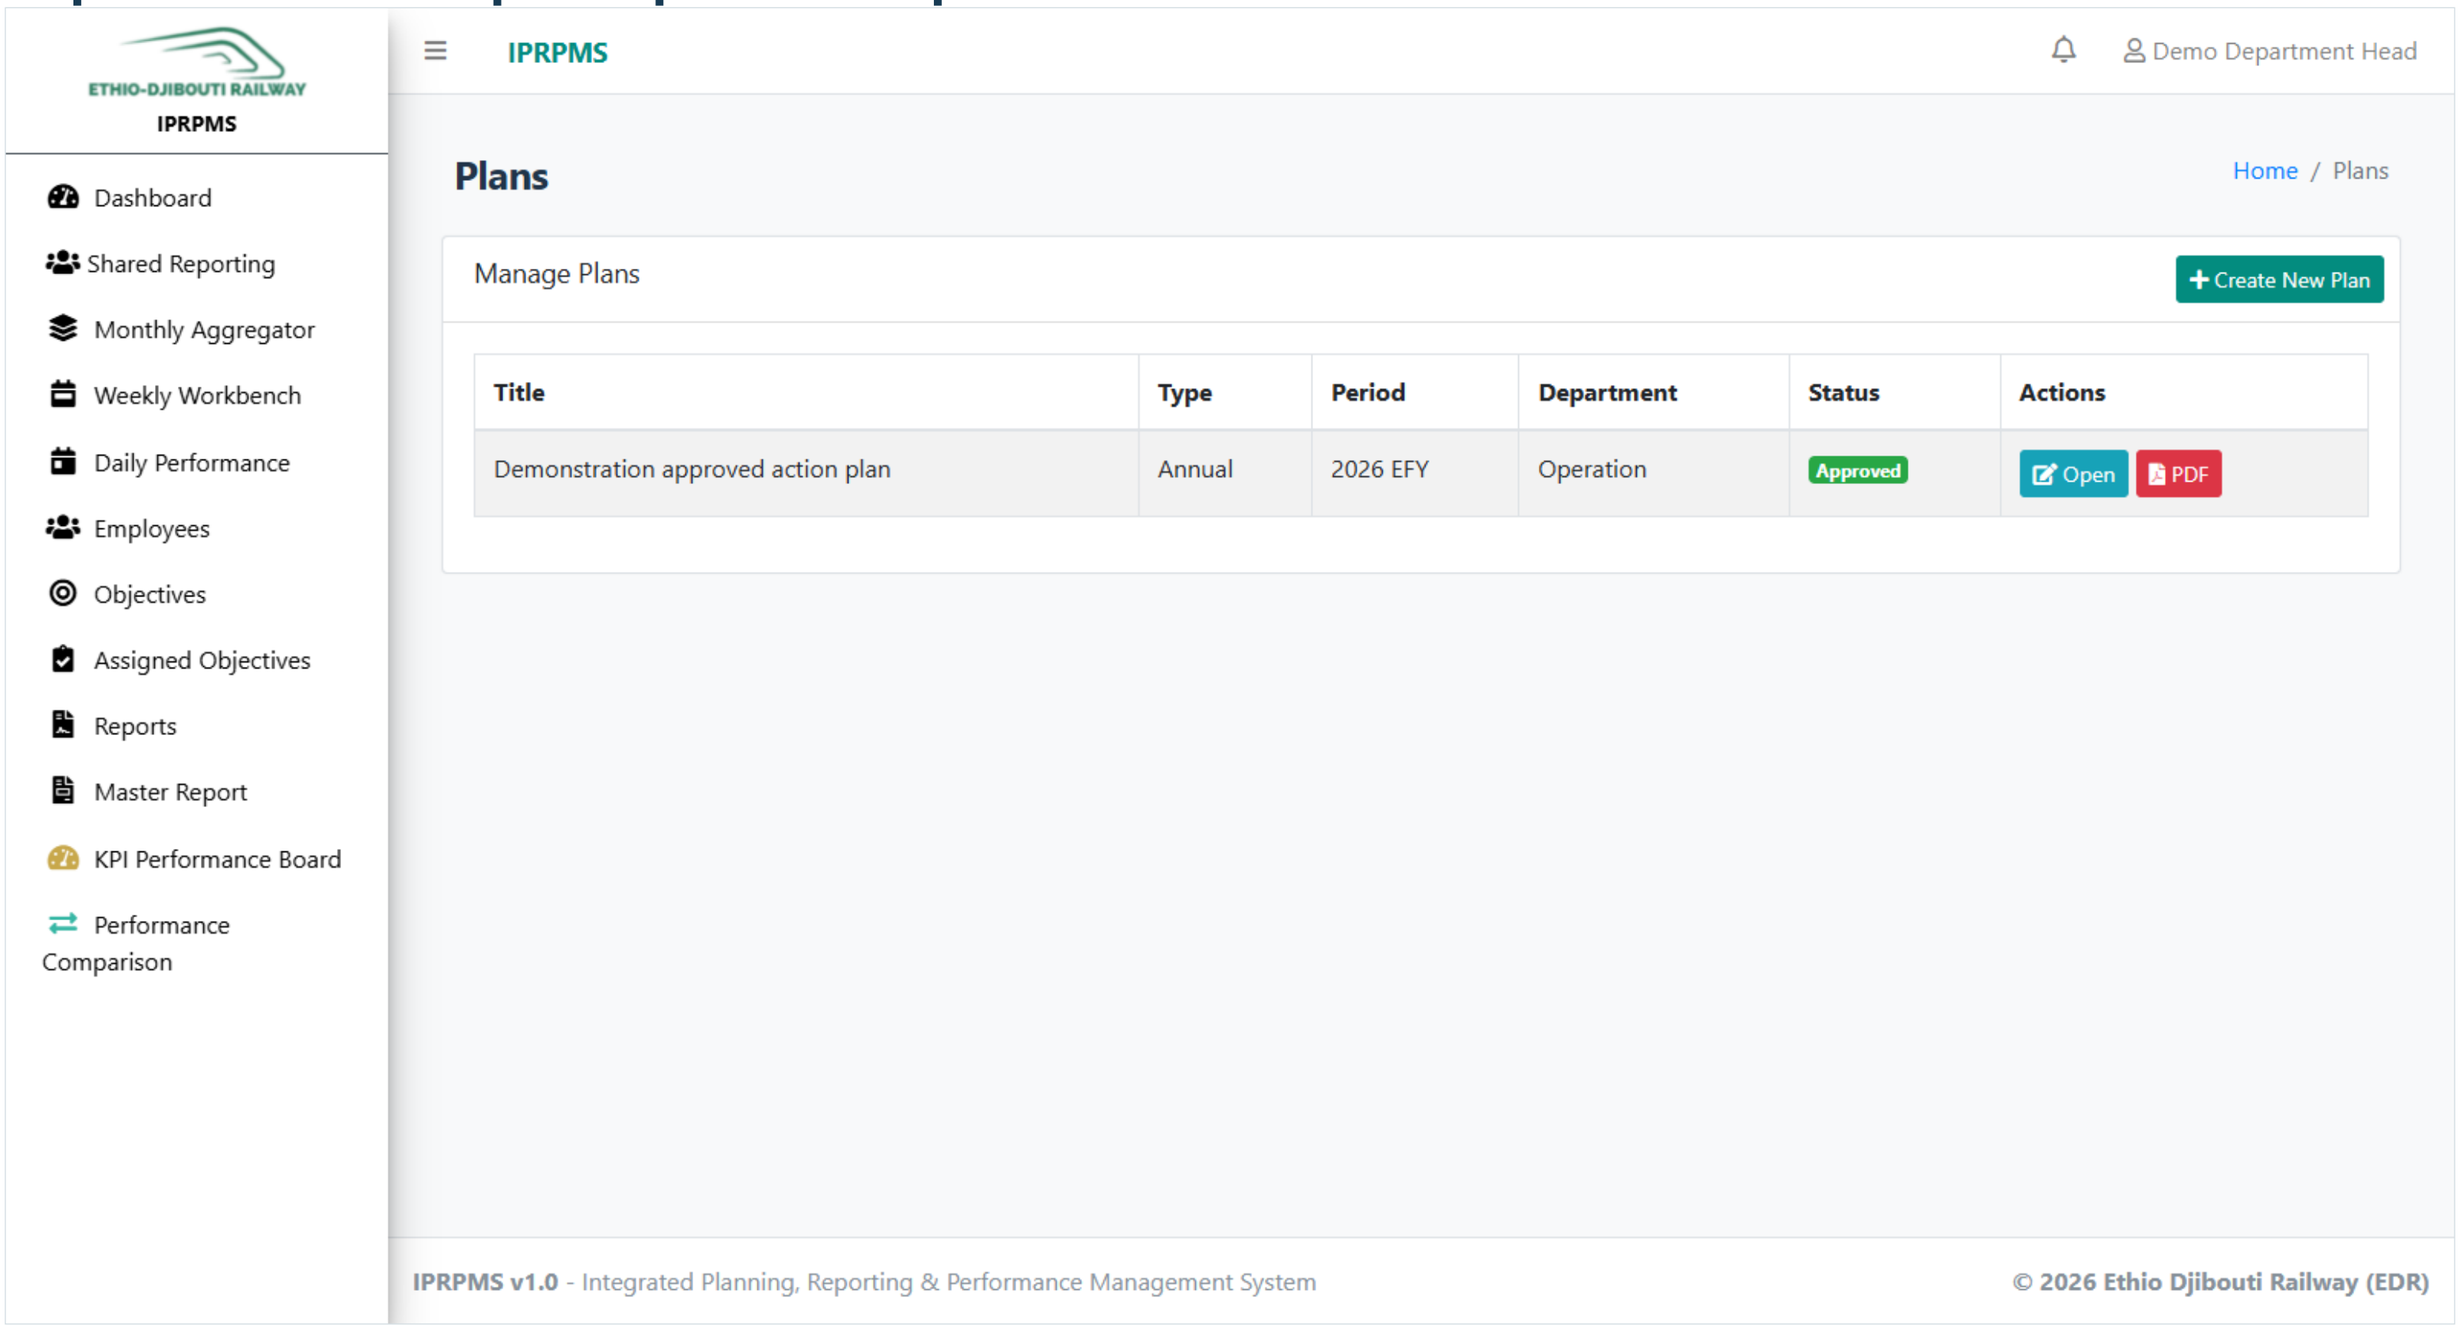

What to check

Review targets and responsibility, save the draft and check for duplication with an existing plan. The creation screens shown with a System Administrator account demonstrate the same permitted form, not additional Head permissions.

How you know it worked

Click Submit on the completed plan. The authorized approver reviews it and can return it with a comment. Correct the existing plan and resubmit when required.

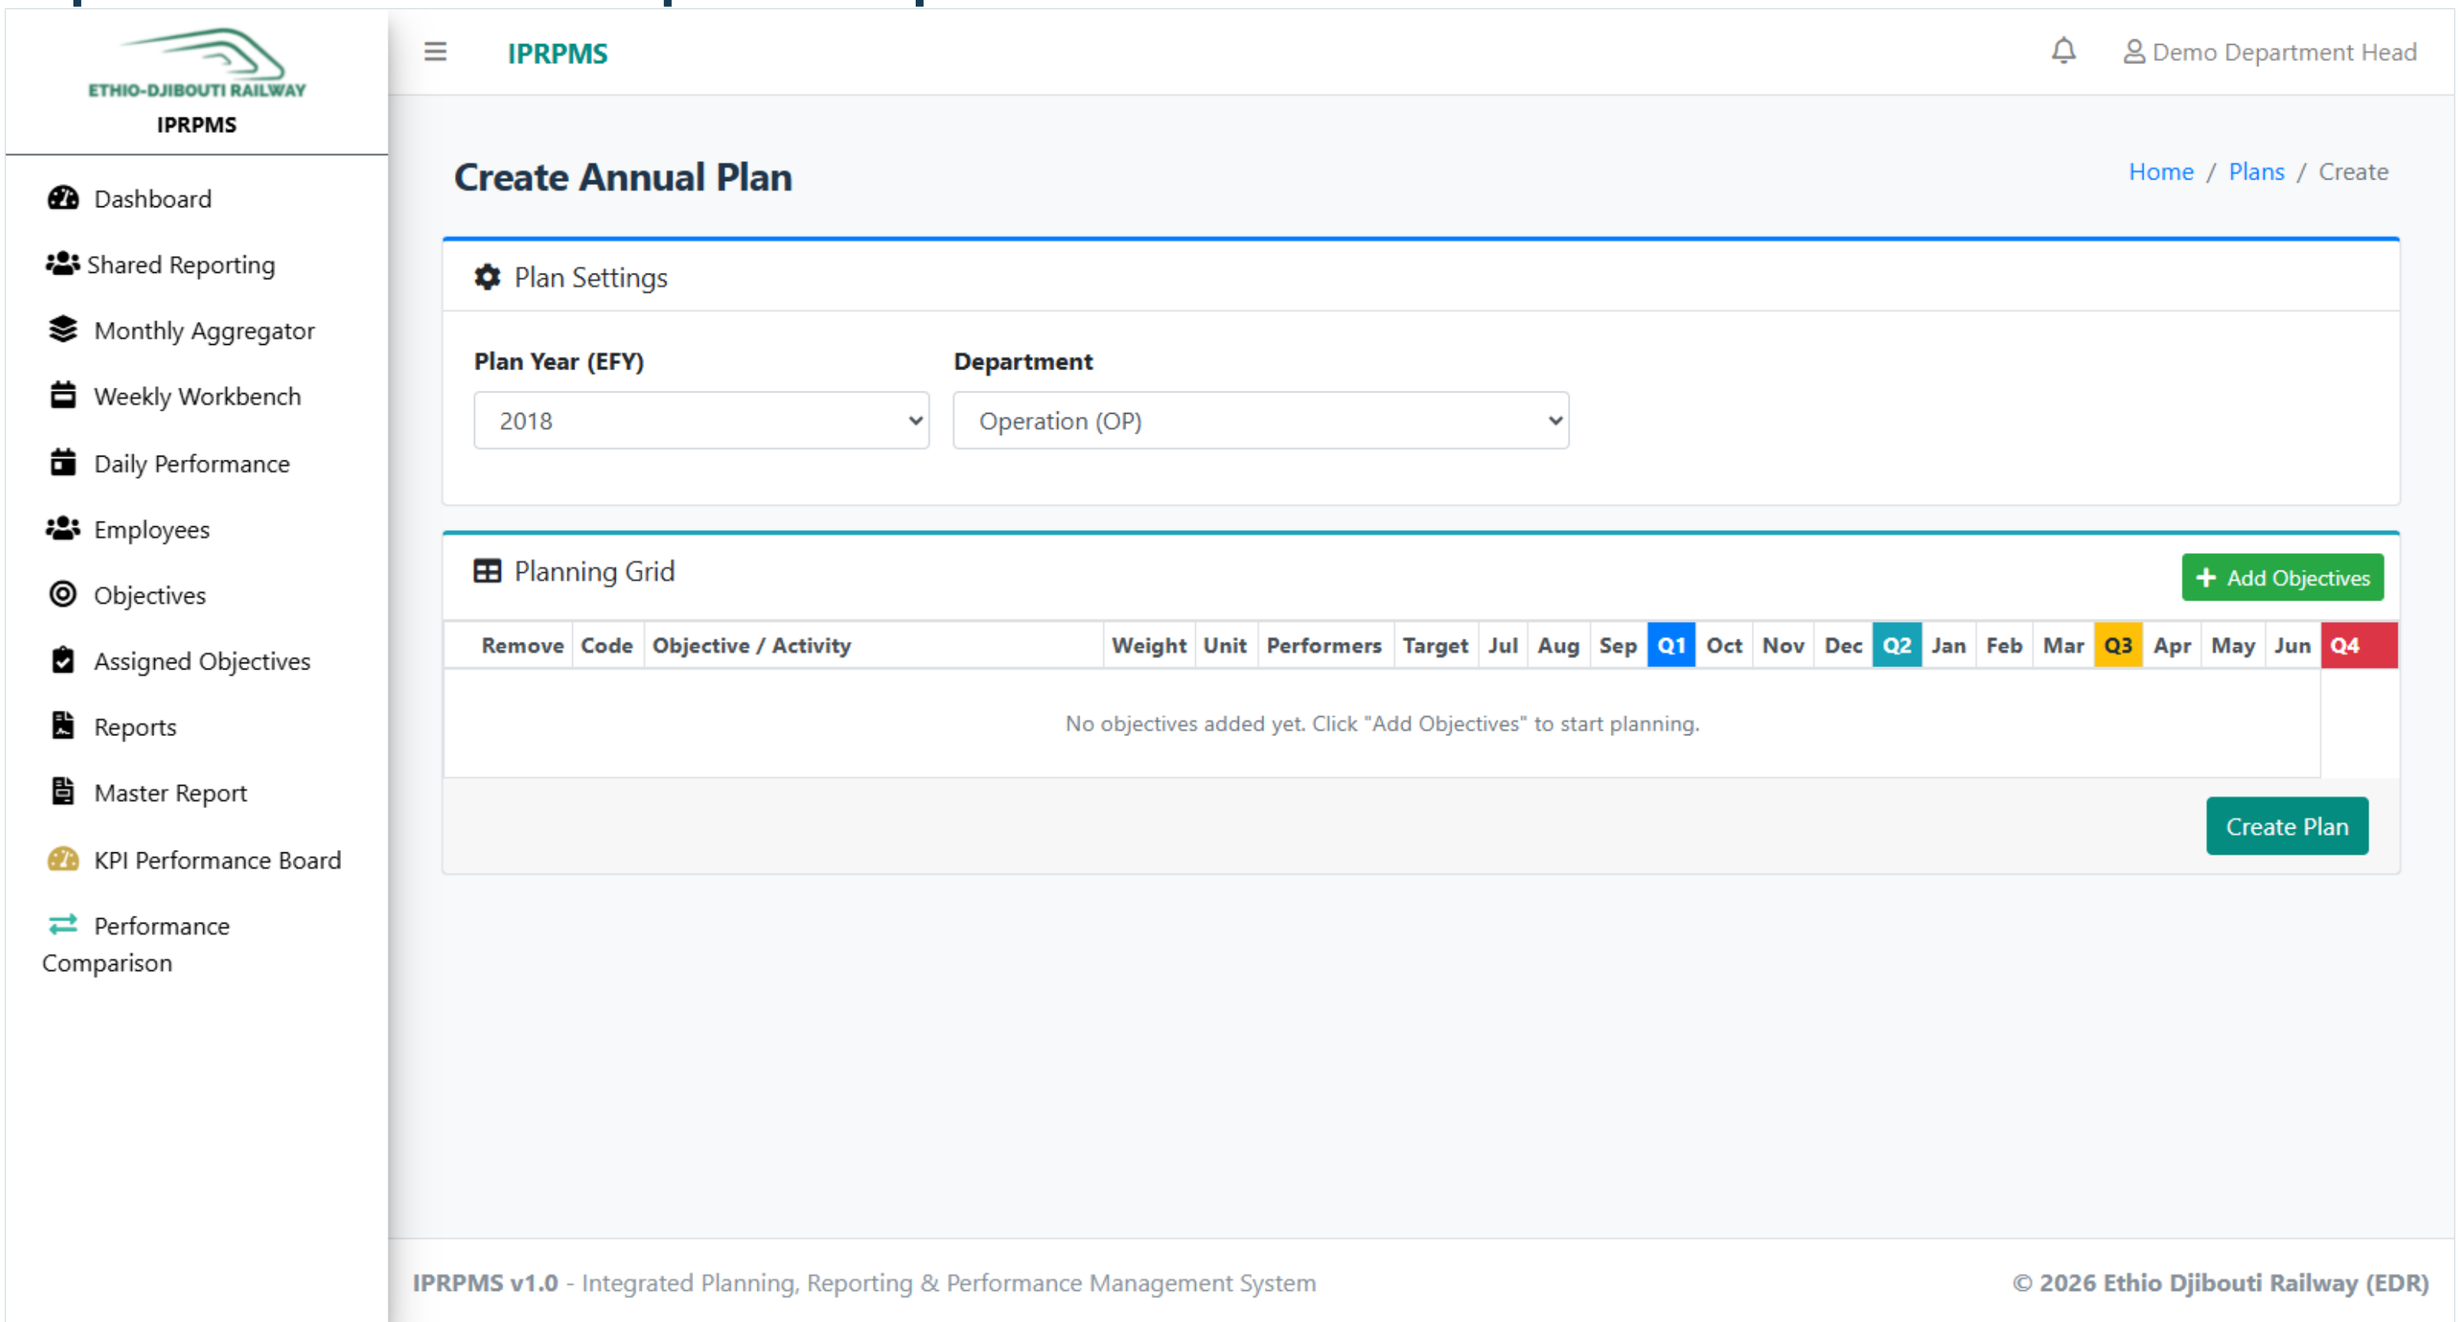

Department Head: open departmental plans

1. Open the permitted departmental plans view.
2. Check for an existing plan for the department and year.
3. Use Create only when a new authorized plan record is actually required.

After this step: Do not duplicate a plan simply because an earlier submission was returned.

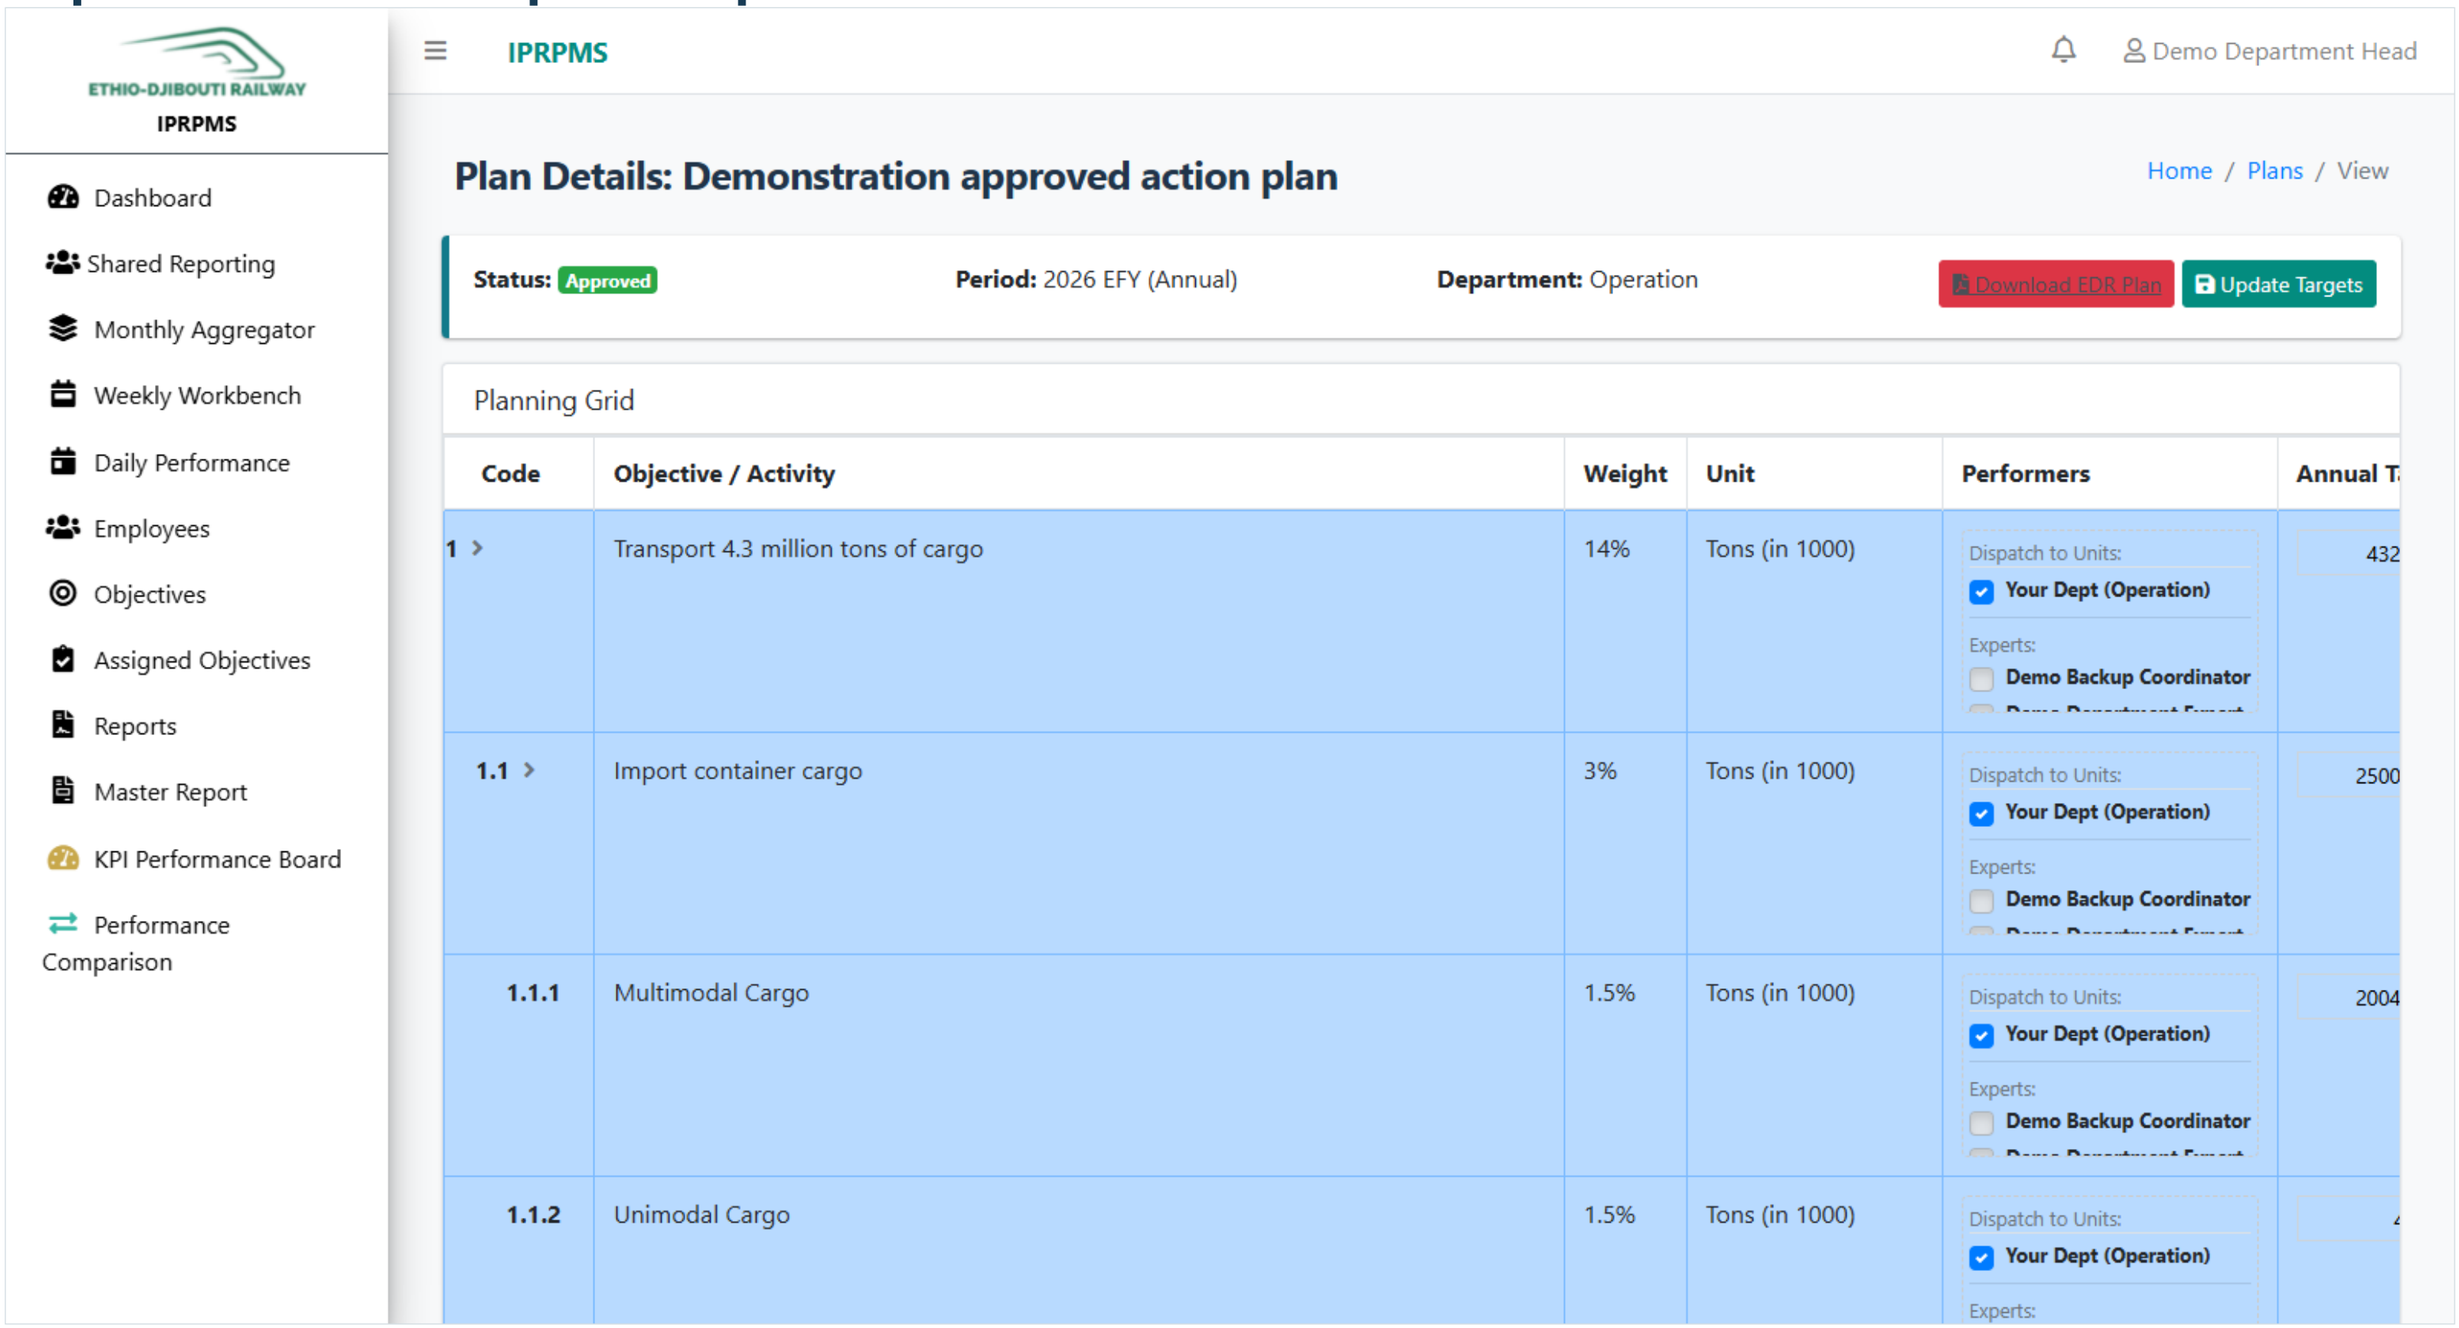

Department Head: create a permitted plan record

1. Select the correct planning year and department.
2. Choose the approved objective items belonging in this plan.
3. Review the selected items and save the draft.

After this step: Use only the plan items and controls your role is permitted to manage.

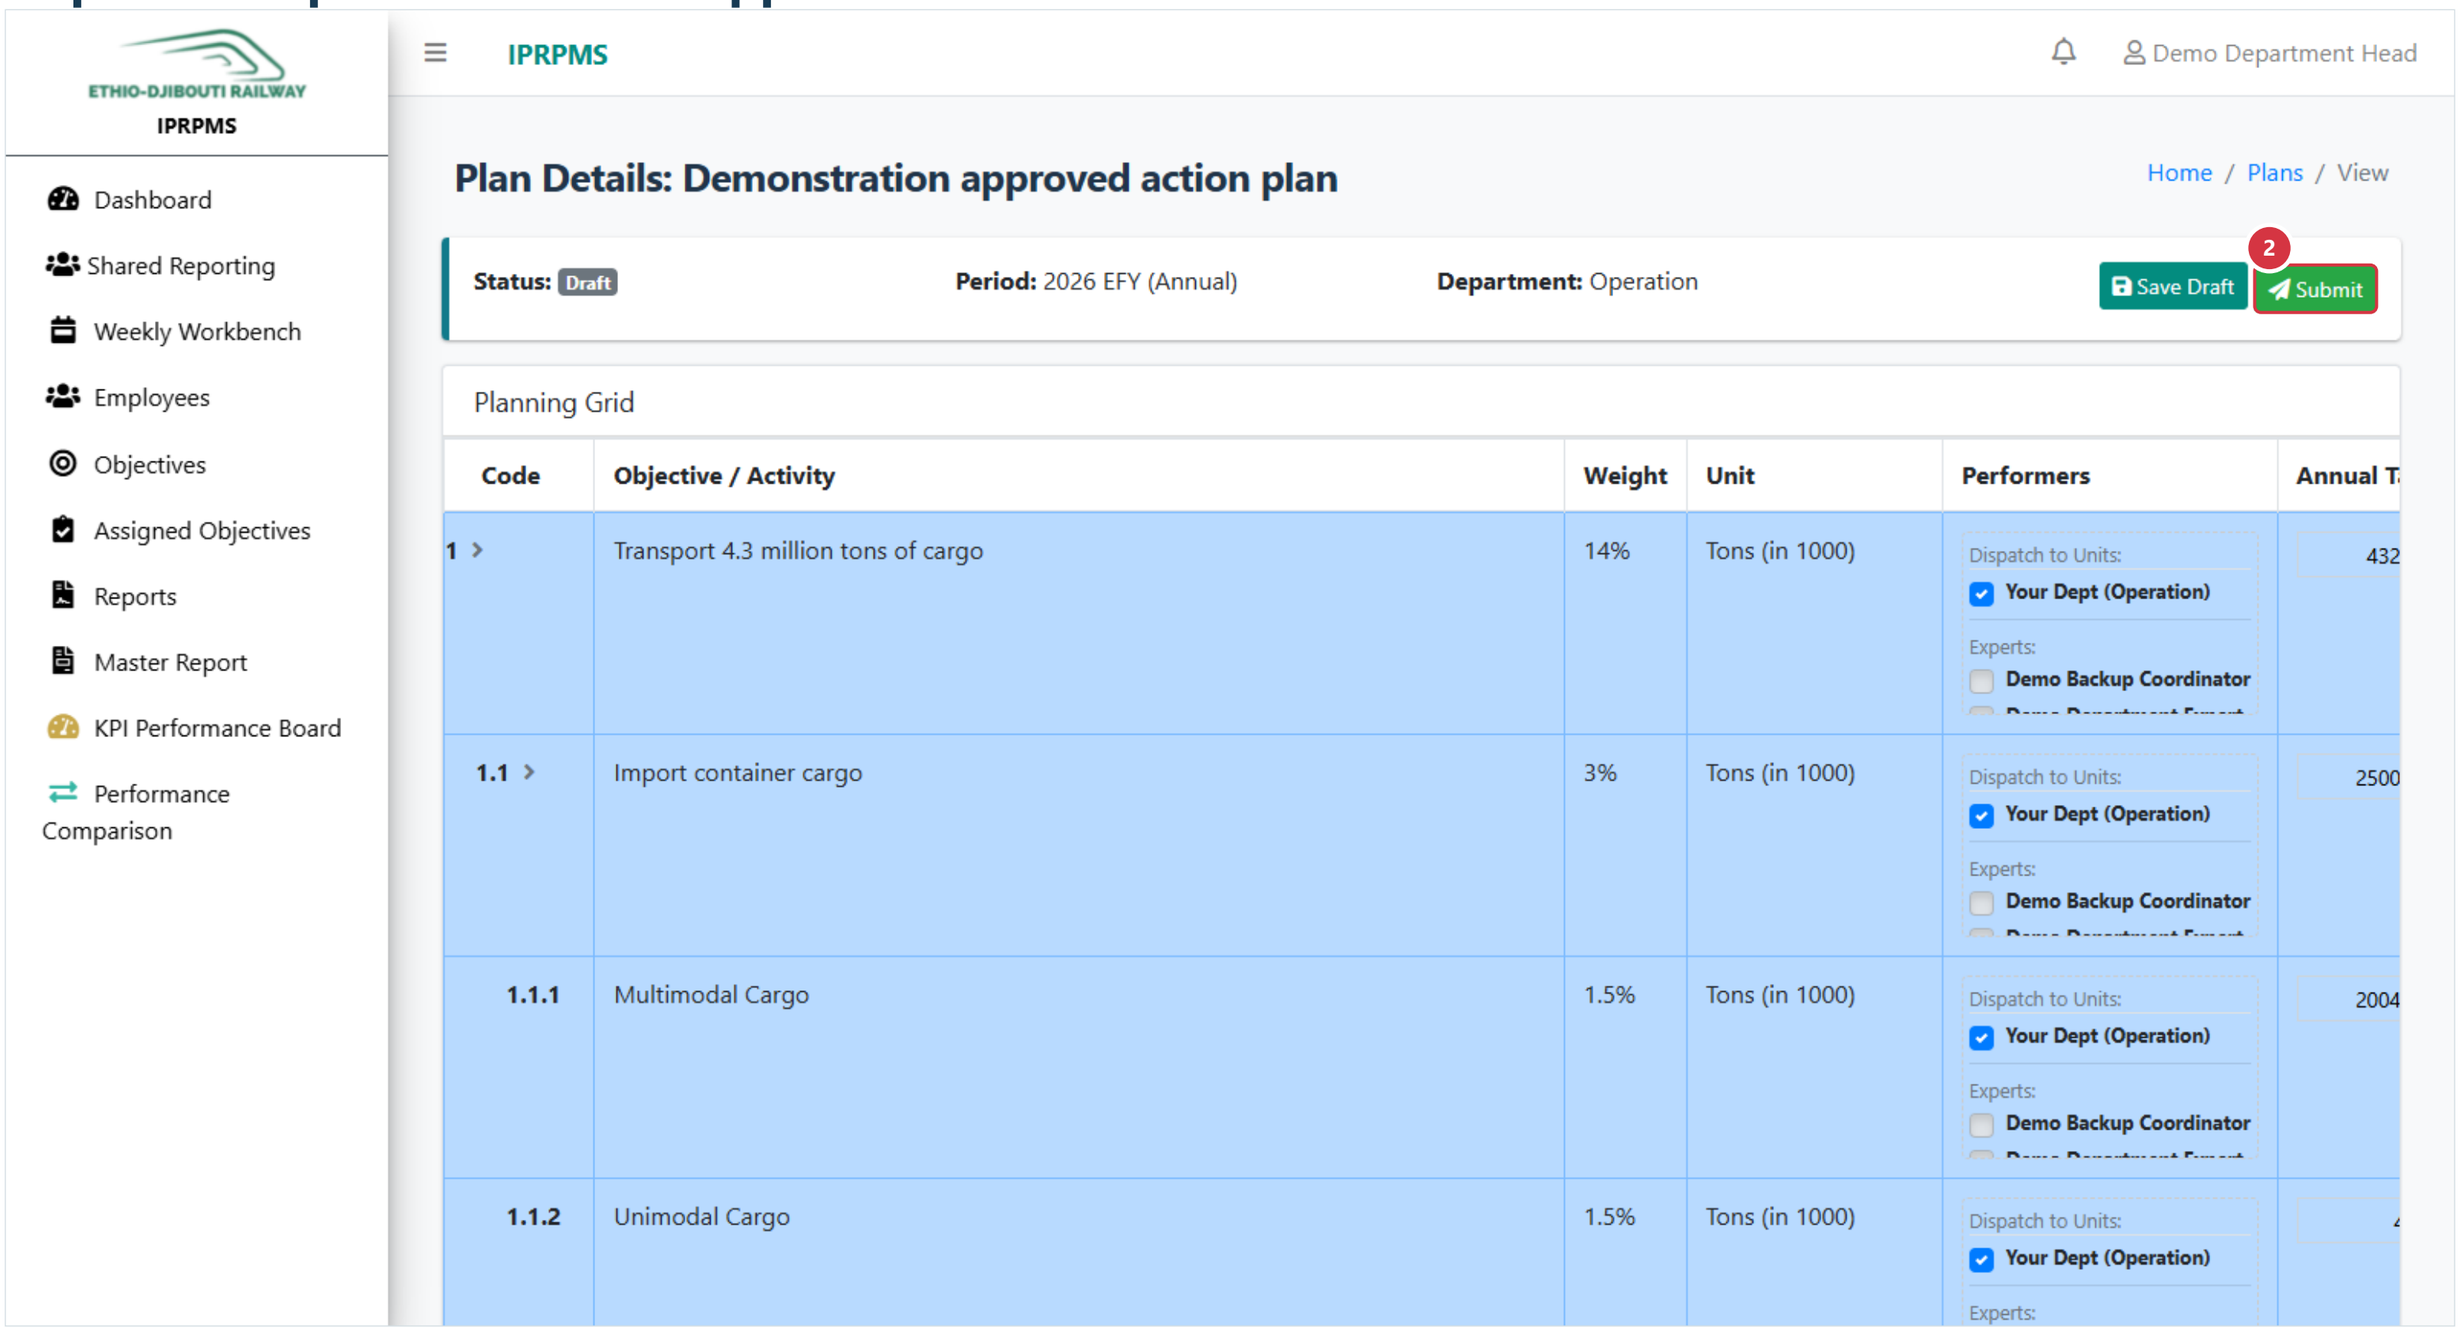

Department Head: inspect the plan before submission

1. Read the department, year and current status.
2. Inspect the objective items, targets and performer information.
3. Read any return reason before correcting the same plan.

After this step: This is the actual Department Head plan view. Submission actions appear only at an eligible status.

Department plan: submit for approval

1. Review the plan targets and performers.
2. Click Submit on the draft plan and confirm the action.

After this step: The plan controls depend on status and permission. A returned plan comment explains what the preparer must correct.

Assign employee tasks clearly

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

A task is an employee's piece of work linked to a plan item. Task assignments are different from a Department Chief assigning an objective to a Directorate.

Before you click

Confirm the employee, related plan item, expected output, start date and deadline. Give one clear task title and describe what evidence will demonstrate completion.

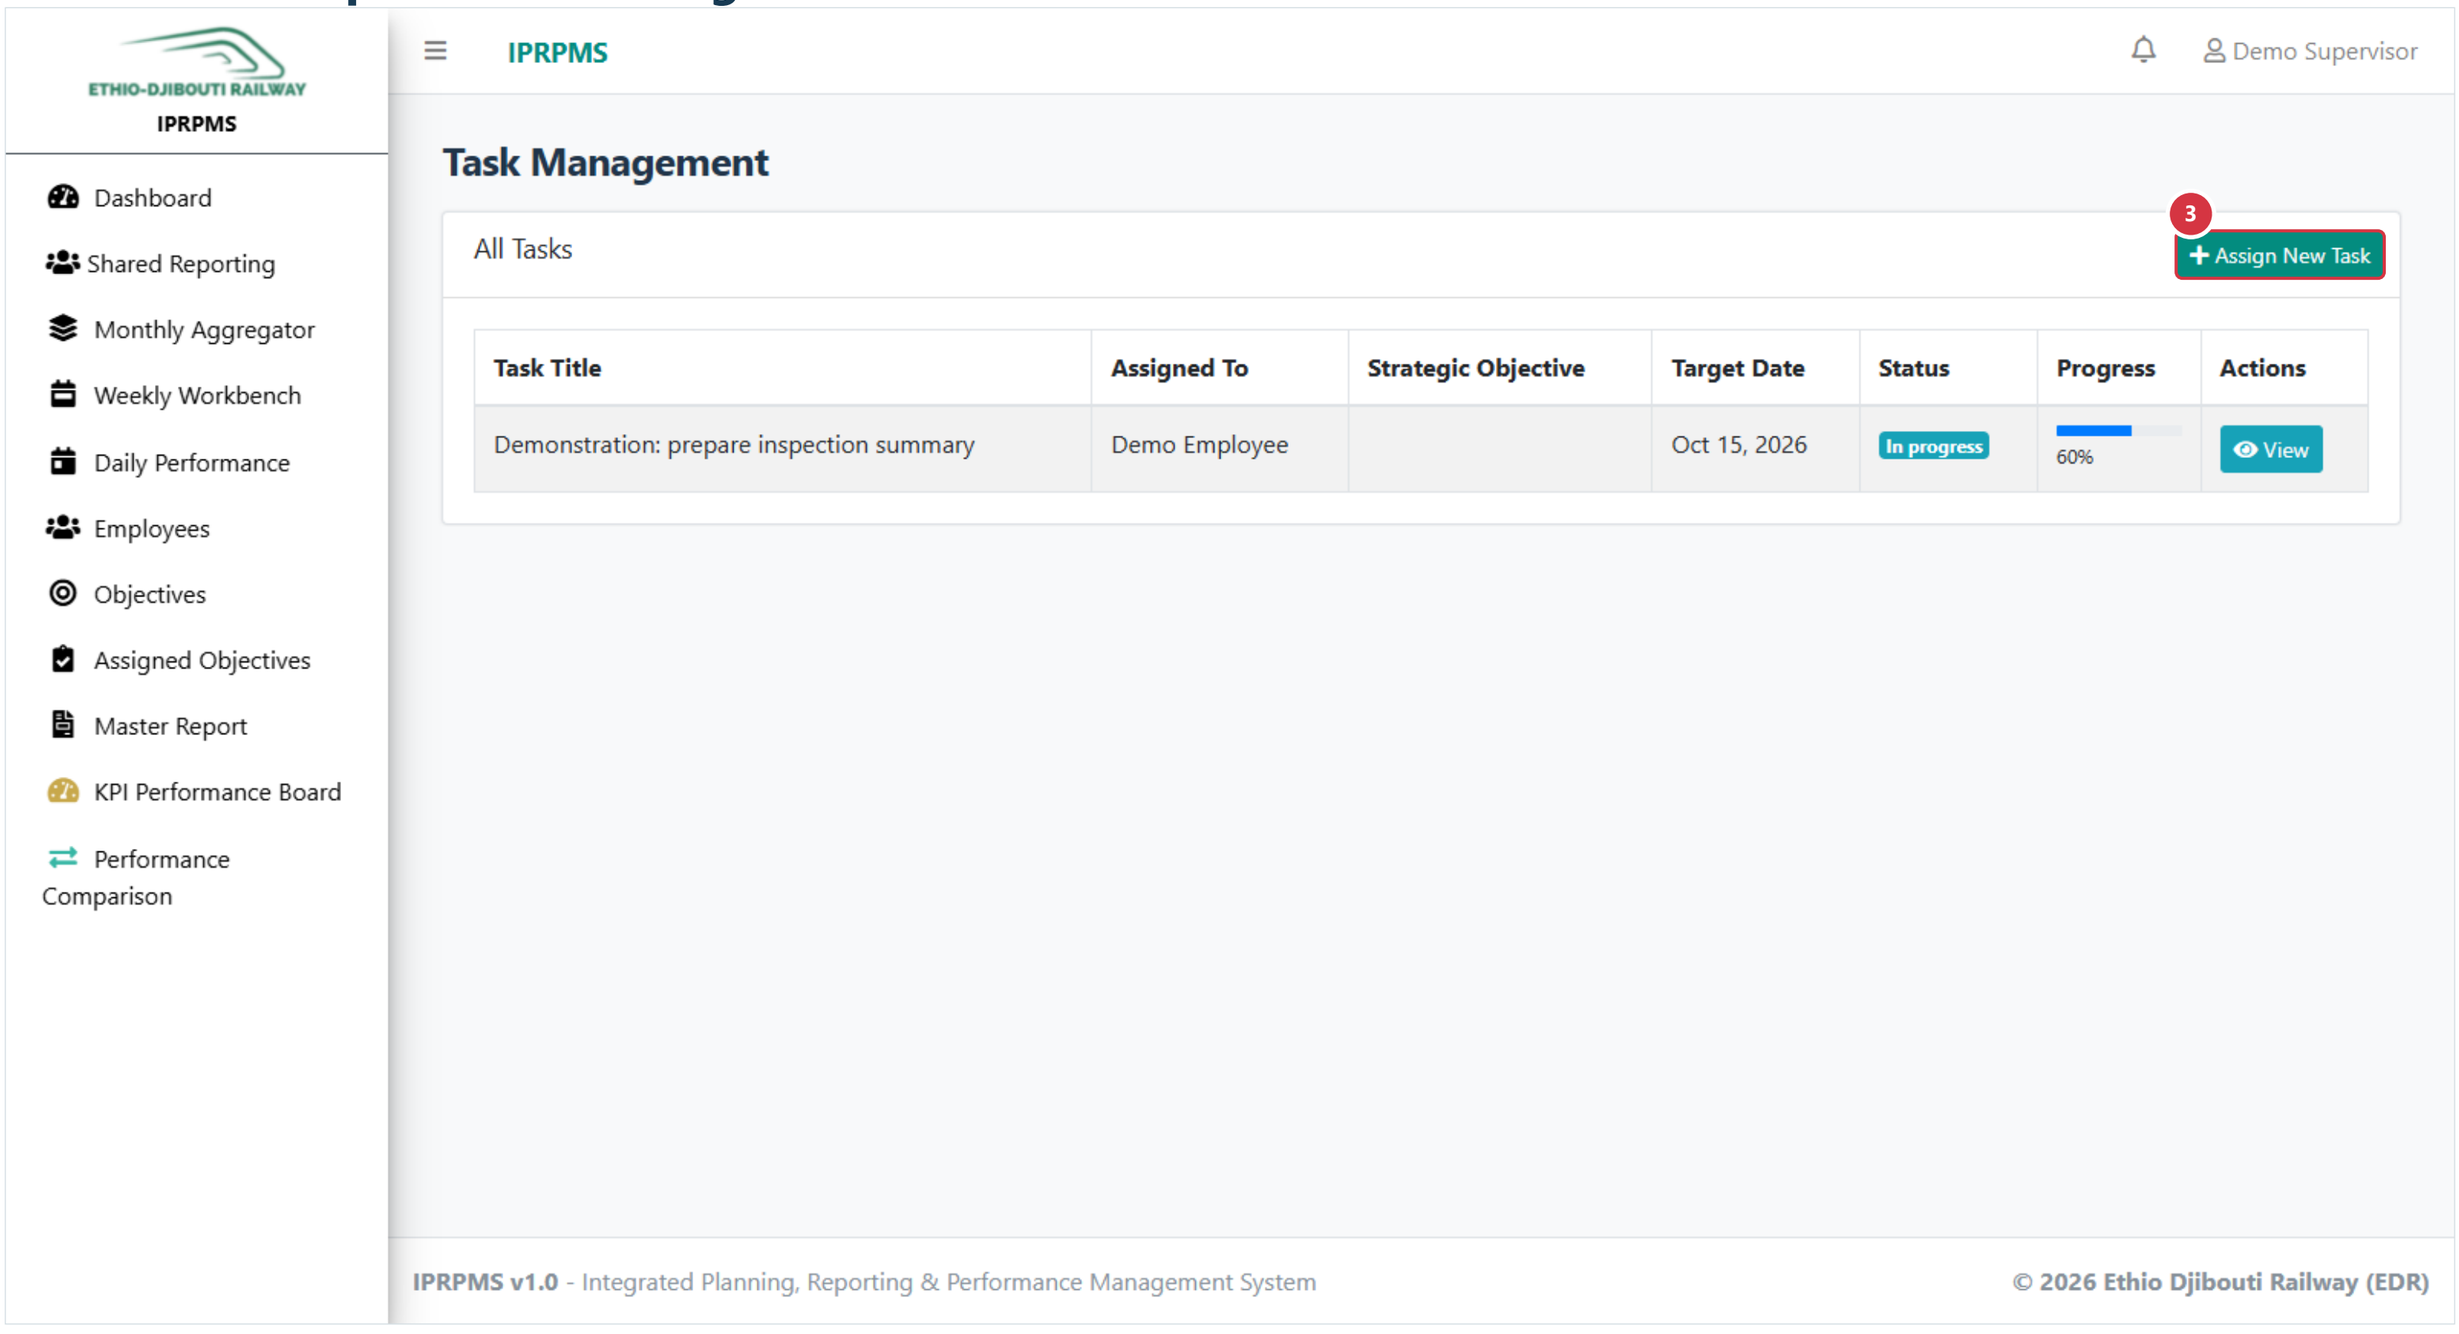

What to check

Choose the intended employee and correct plan item. Avoid duplicate tasks for the same work. Explain the due date and expected evidence outside the system if the employee cannot open the detail page.

How you know it worked

Click Assign Task and confirm the task in the list. My Tasks and task-detail pages returned errors in the inspected build. Do not treat employee report submission or approval as verified until IT resolves that issue.

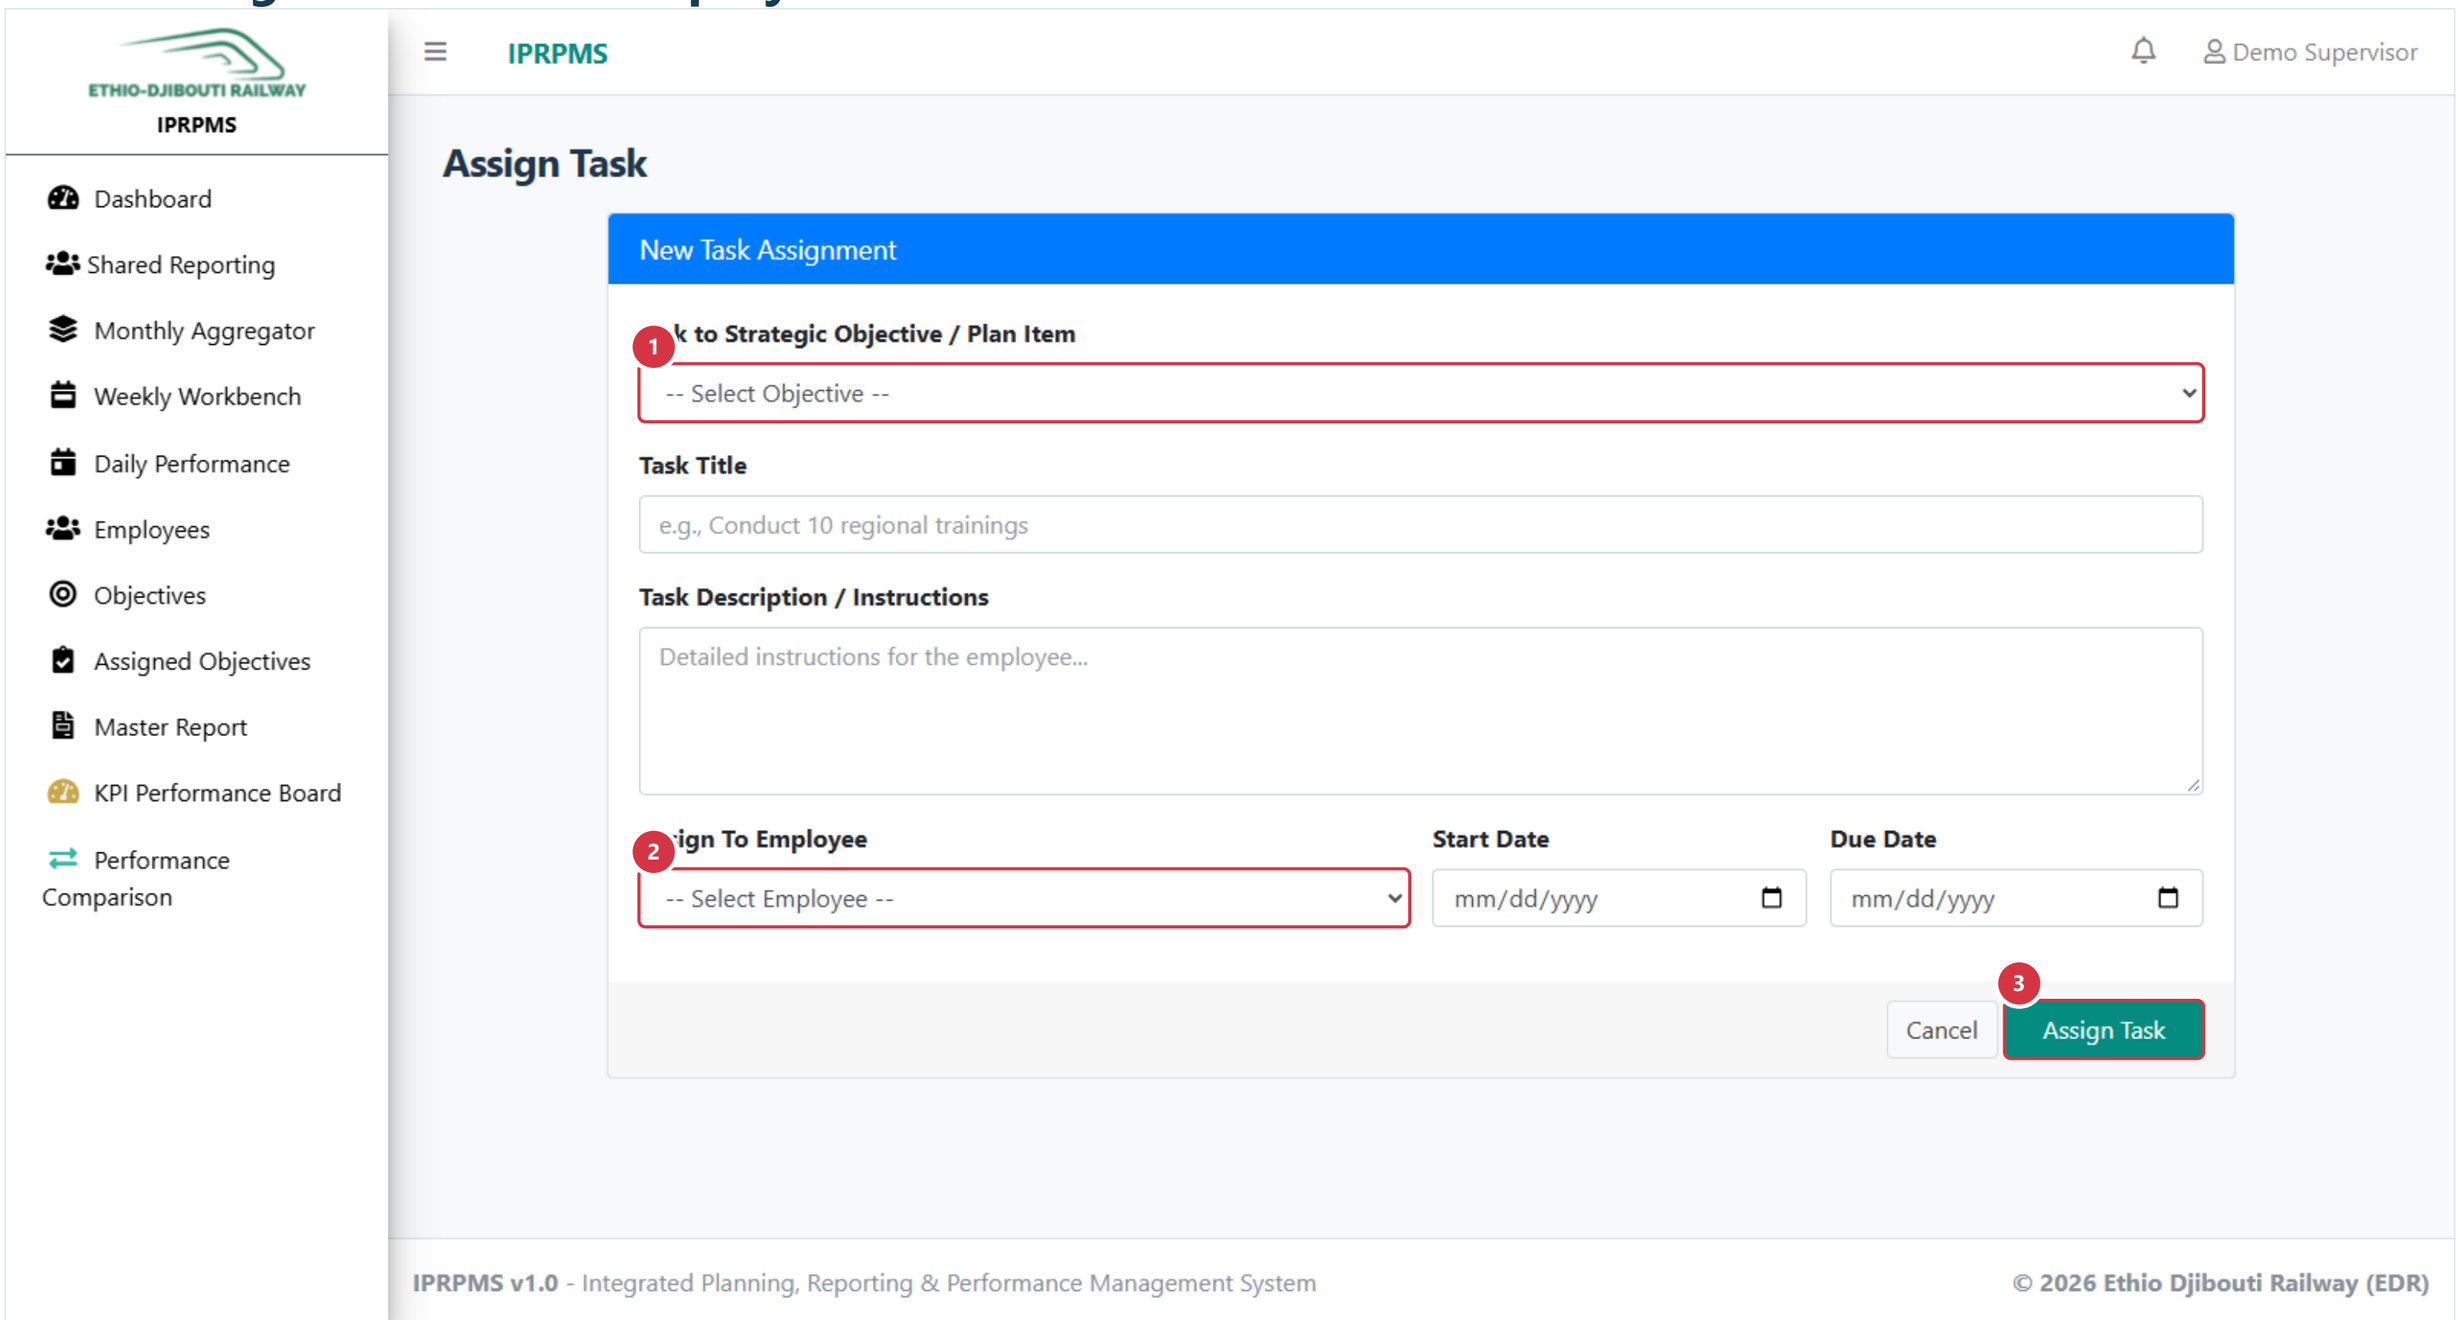

Tasks: view departmental assignments

1. Open Tasks.
2. Read the assigned employee, target date, status and progress.
3. Use Assign New Task to create an assignment.

After this step: The inspected local build has errors on My Tasks and task details. Those two reporting procedures require an application correction before training.

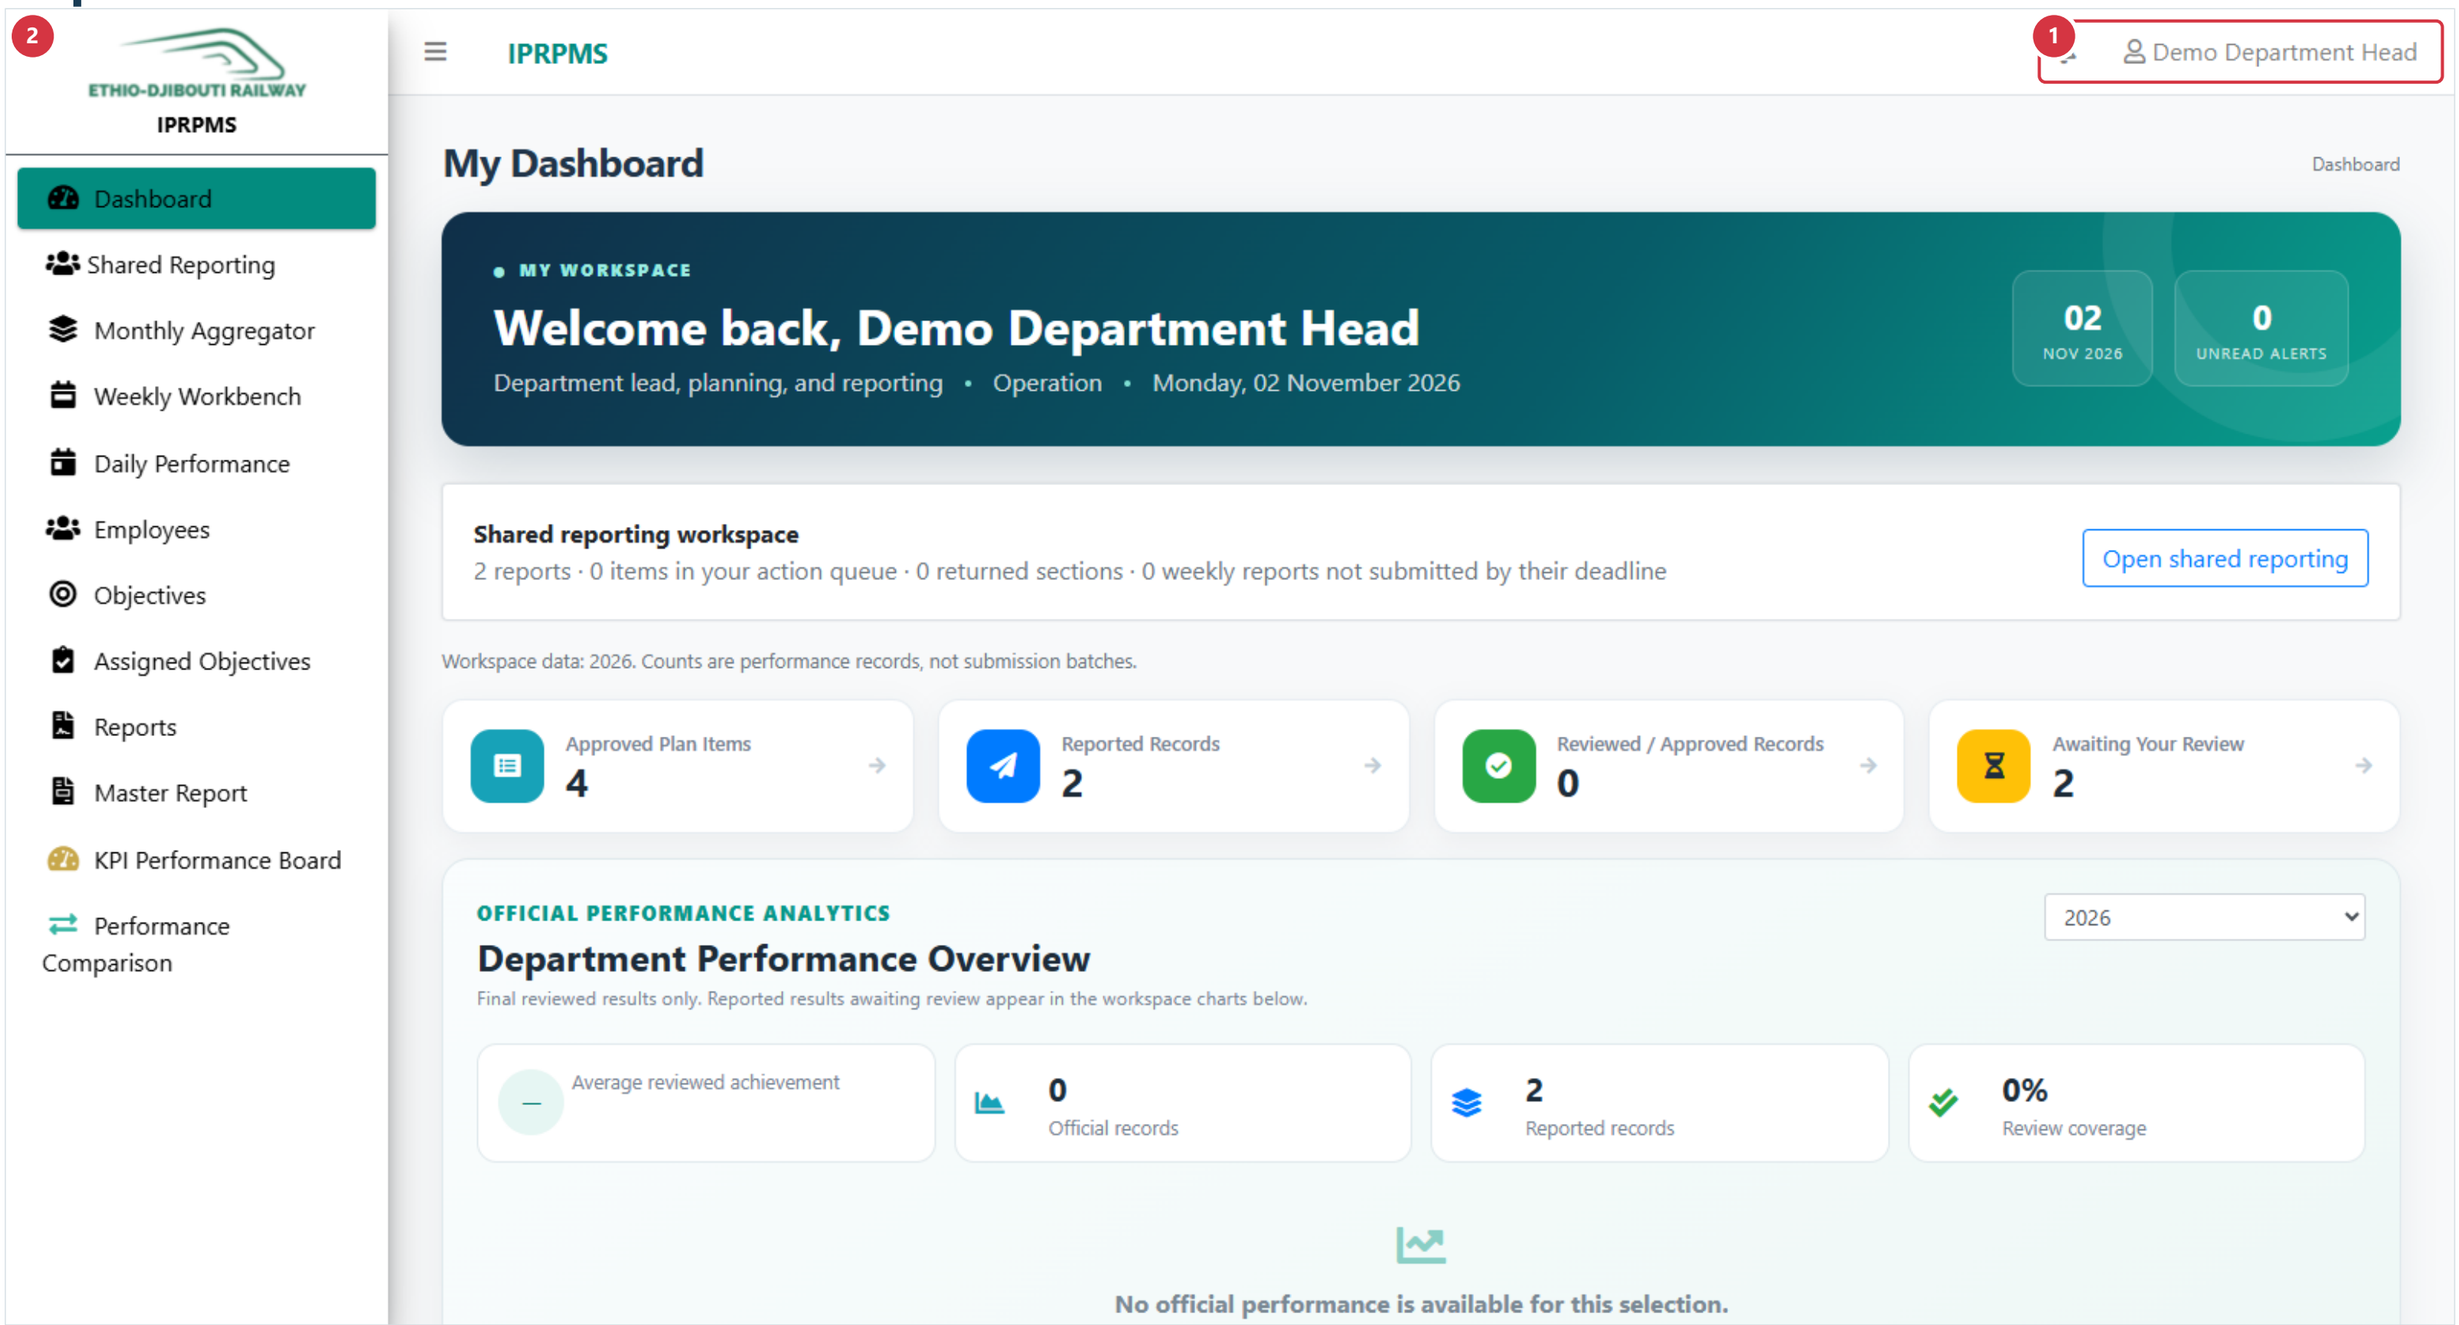

Tasks: assign a task to an employee

1. Select the related plan item.
2. Select the assigned employee and complete the task title, description and dates.
3. Click Assign Task.

After this step: The assigned employee receives the task. My Tasks and task details require an application correction in the inspected build.

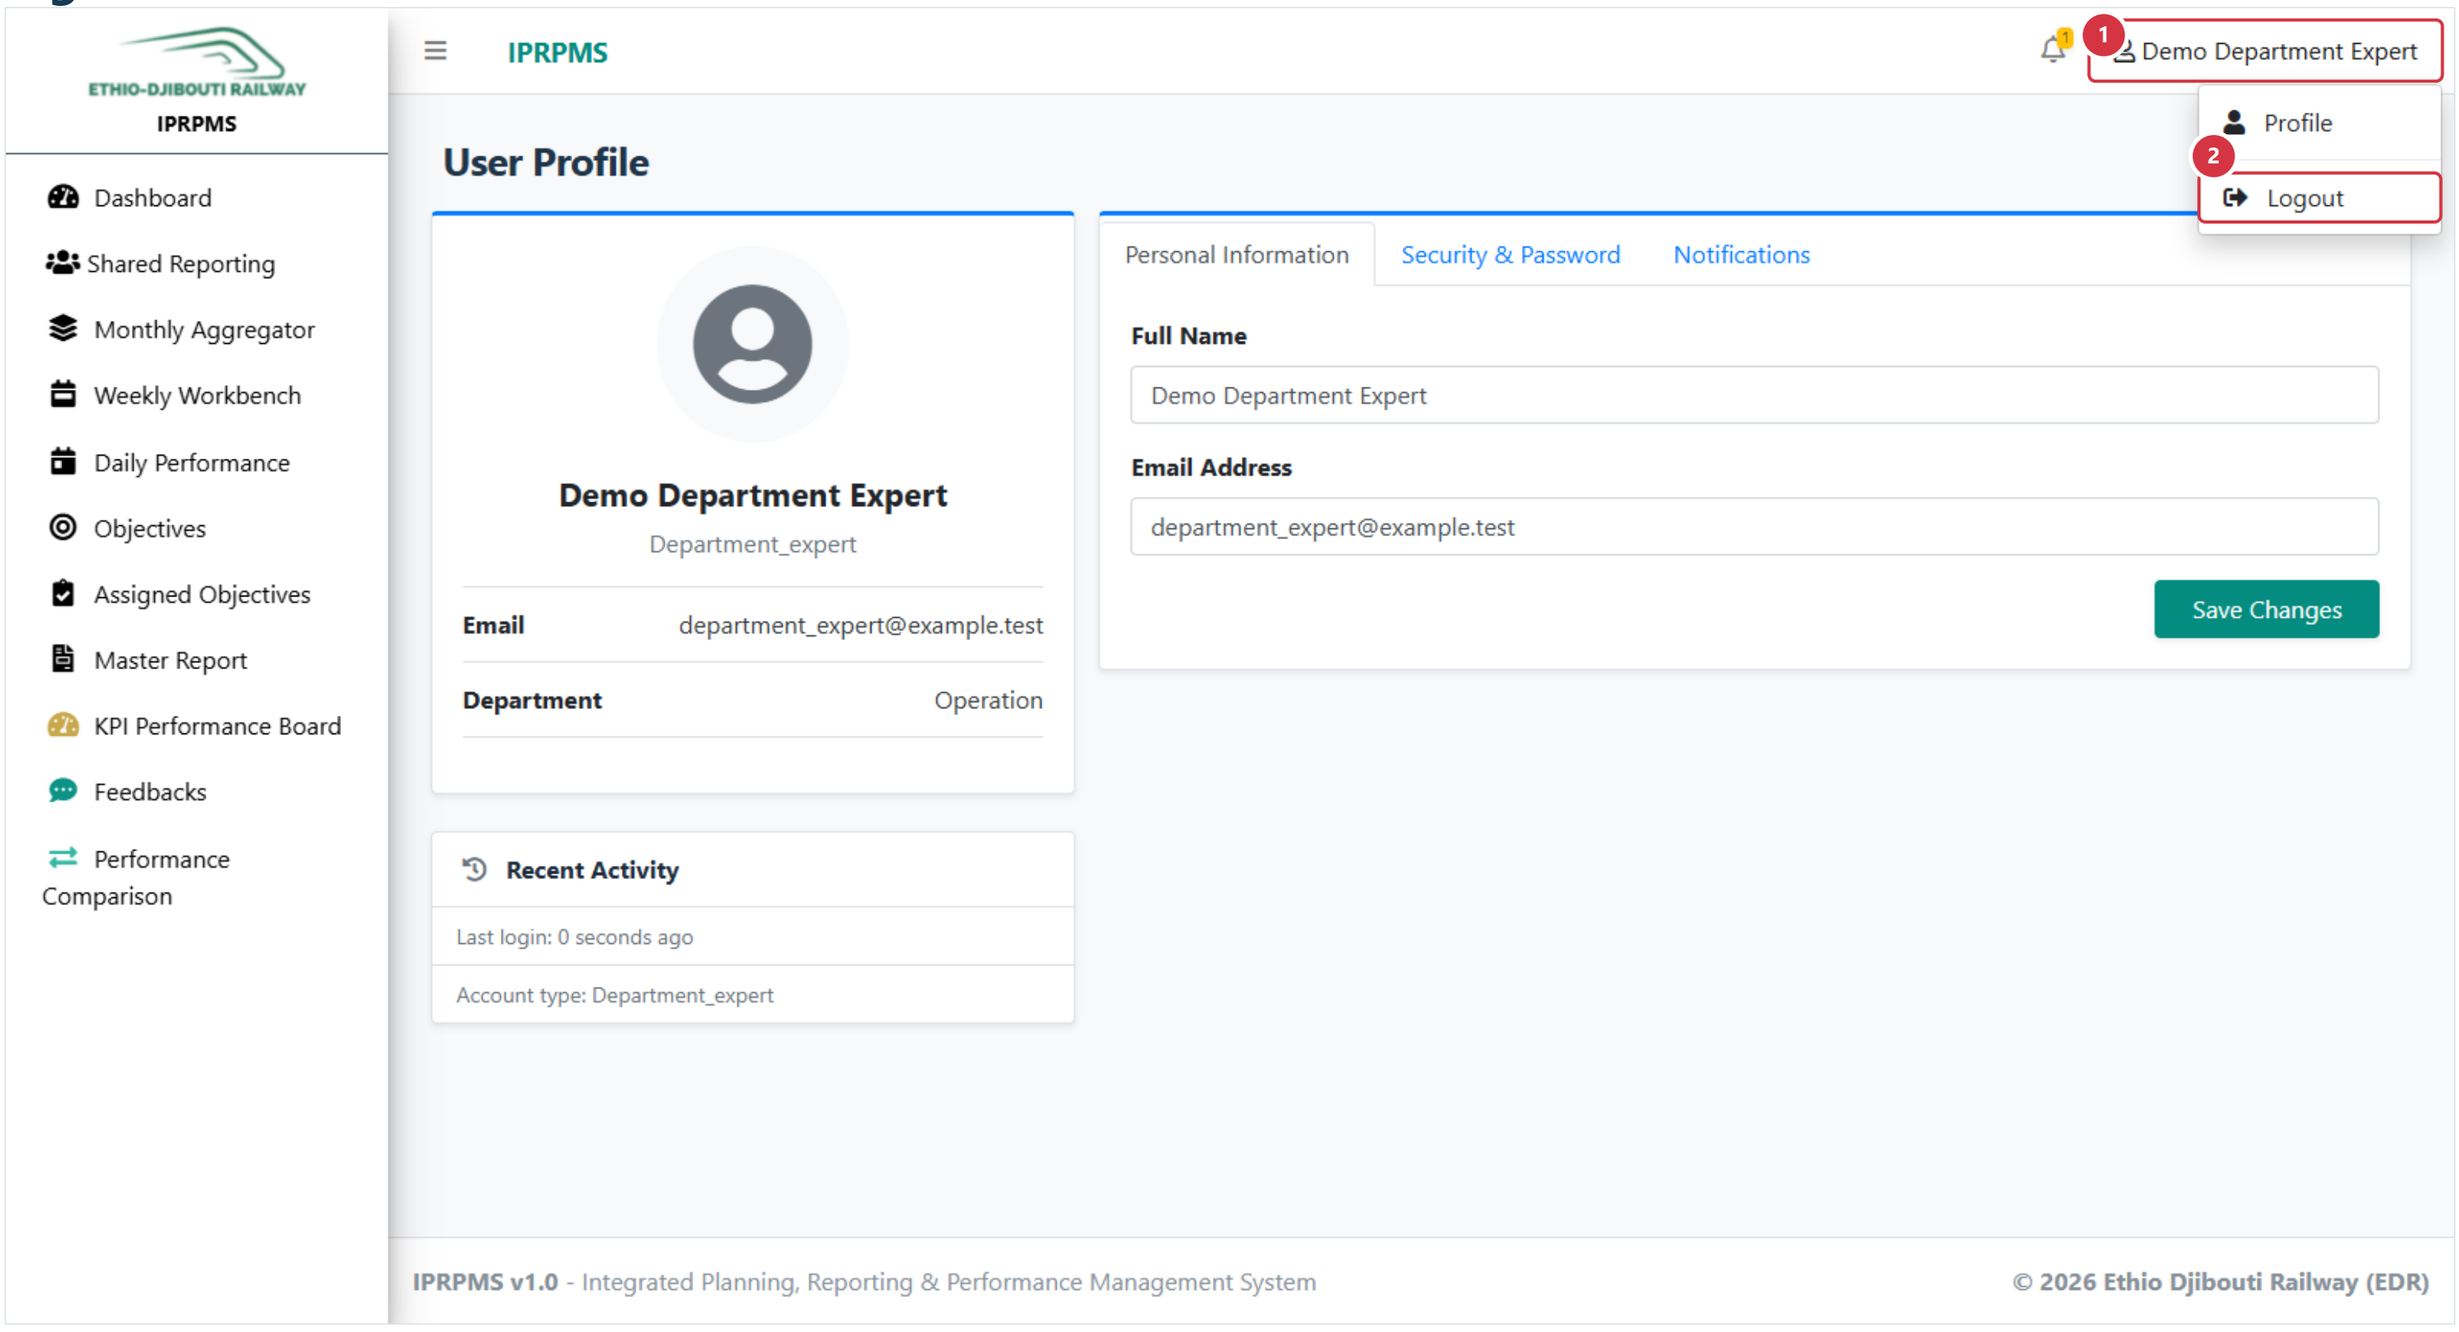

Department Head: home screen

1. Confirm your signed-in role at the top right.
2. Prepare departmental plans and assign employee tasks within your permitted scope.
3. Review available department and employee results. The local My Tasks/task-detail issue is described on the final page.

After this step: Menus vary by permission, department and reporting frequency.

Sign out on a shared device

1. Click your name at the top right to open the user menu.
2. Click Logout after you finish your work.

After this step: The application returns to the sign-in screen after logout.

Before you finish, check these four things

Finish means your part is complete and you know who has the next action. It does not always mean the whole record is finally approved.

Your completion checklist

1. I used the correct department, year and approved objective items. 2. I saved and reviewed targets before submitting the plan. 3. Tasks identify the intended employee and evidence. 4. I did not confuse Department Head access with Department Chief approval.

If a menu or button is missing

Task assignment pages worked, but My Tasks and task details returned errors in the inspected build. Employee task reporting and detail-level approval remain unverified until that issue is corrected.

Ask for help with useful details

Give IT or the responsible reviewer the module, department, year, reporting period, objective or record reference and exact message. Include a safe screenshot. Never send your password.

Keep the process and data safe

Use your own account, save before sending, read return comments and keep the same record for corrections. Demonstration screenshots are teaching examples, not official performance figures. The separate logistics Import/Export module is excluded.
