Supervisor

Your responsibilities, complete workflow, exact clicks and return paths.

Read first: the Start Here guide explains how the whole system works. Then use this manual to do your part, check the outcome and hand work to the right person.

Understand your job before the buttons

Keep this page in mind whenever you receive a new record. It explains your responsibility and where your part stops.

Your job

Turn approved work into clear employee task assignments, monitor it and review employee evidence when the working task-report screens are available.

What you receive

The relevant plan items, employee responsibilities and delivery deadlines within your permitted scope.

Who receives your work

Clear assignments to employees; questions or exceptions to the responsible department lead; application errors to the administrator.

Your limits and important distinctions

Task review is not the same as departmental objective acceptance or organization performance approval. Do not use another role's workflow as a substitute.

Your workflow, from first action to finish

Read down the page. Each step has an outcome; do not jump ahead simply because a button is visible.

1

Confirm the plan item

Read the intended activity and expected result before assigning work.

2

Choose the right employee

Verify who must do the work and avoid duplicate assignments.

3

Describe the task

State the output, start date, deadline and evidence clearly.

4

Assign and verify

Click Assign Task and confirm the task appears in the intended scope.

5

Monitor the actual delivery

Confirm the employee can access the work. If the detail page fails, report the issue rather than assuming progress was submitted.

6

Review only through working authorized controls

Check evidence before any task approval once the detail/report feature works. This guide does not invent screens for the current erroring pages.

Find the task you need

Use the page number or click a task name in the PDF. Section introductions explain the purpose before the screen-by-screen actions.

First access and everyday account safety 5

Assign employee tasks clearly 11

Completion checklist and help 16

First access and everyday account safety

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

Use your own account. Your department and role decide what you can see and which decisions you can make. Never use somebody else's account to reach a missing button.

Before you click

Have your official account details ready. Open the address supplied by IT, enter your email and Access Key, then click Authenticate. A first-password screen appears only when your account requires it.

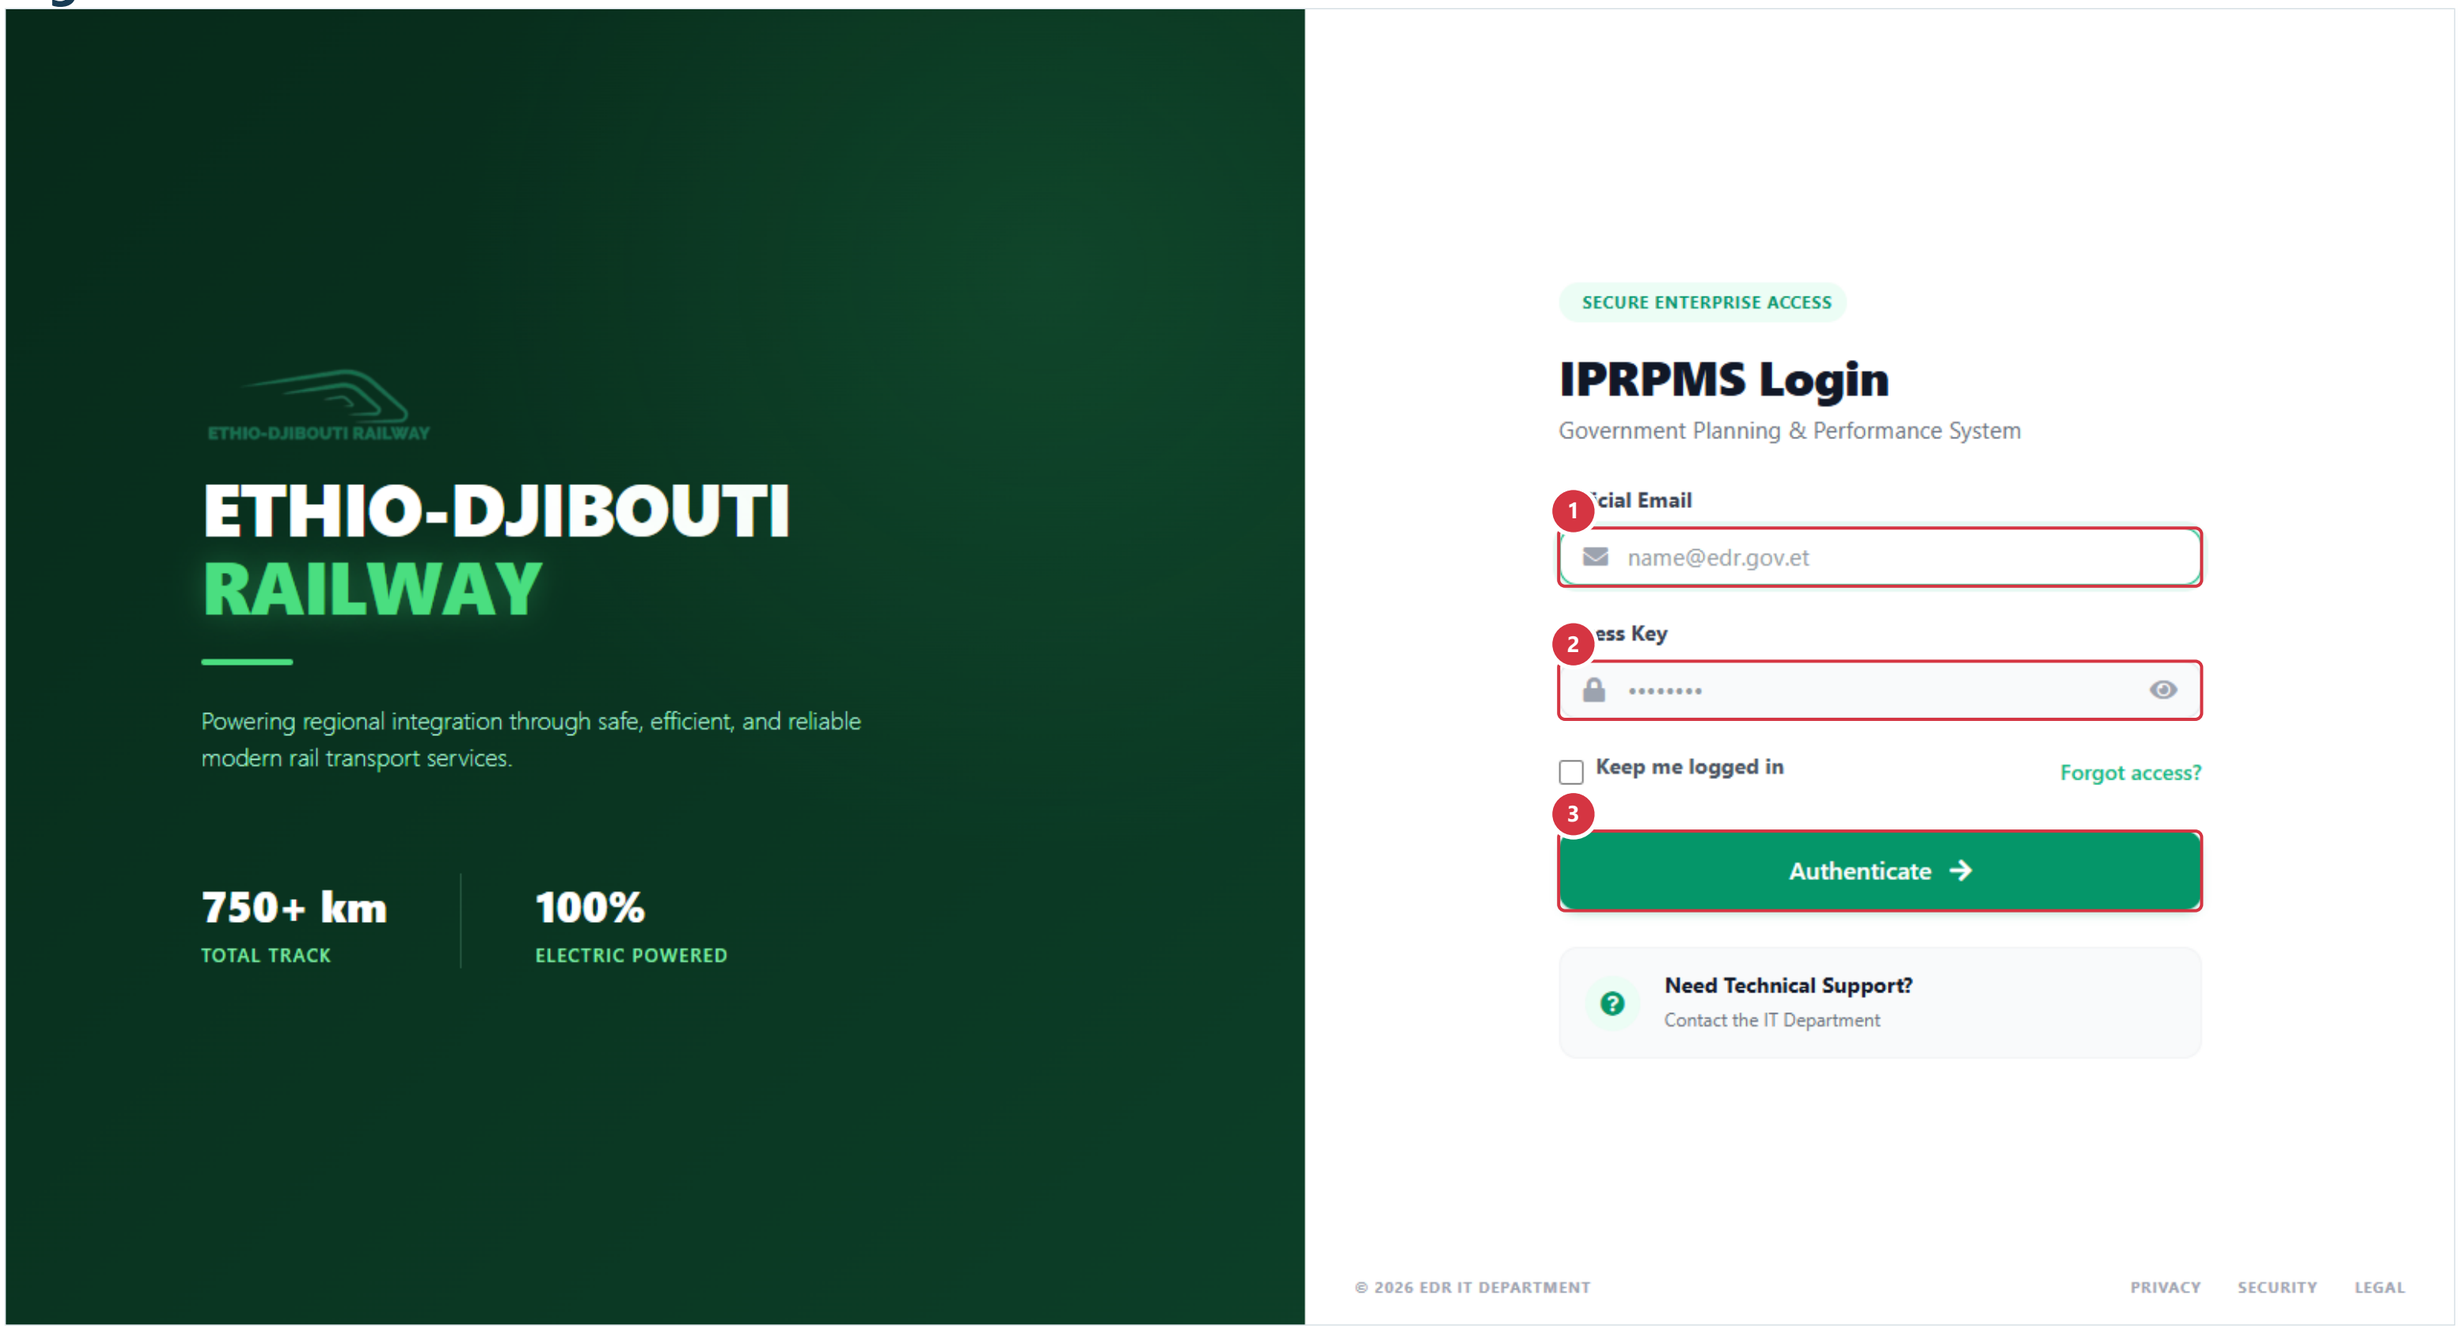

What to check

Check the name and role at the top right. Change your temporary password when prompted. Your profile is for your own name, email and password; department and role changes belong to the administrator.

How you know it worked

You can open the dashboard with the correct account. The notification bell shows work sent to you. On a shared computer, sign out when finished and do not choose Keep me logged in.

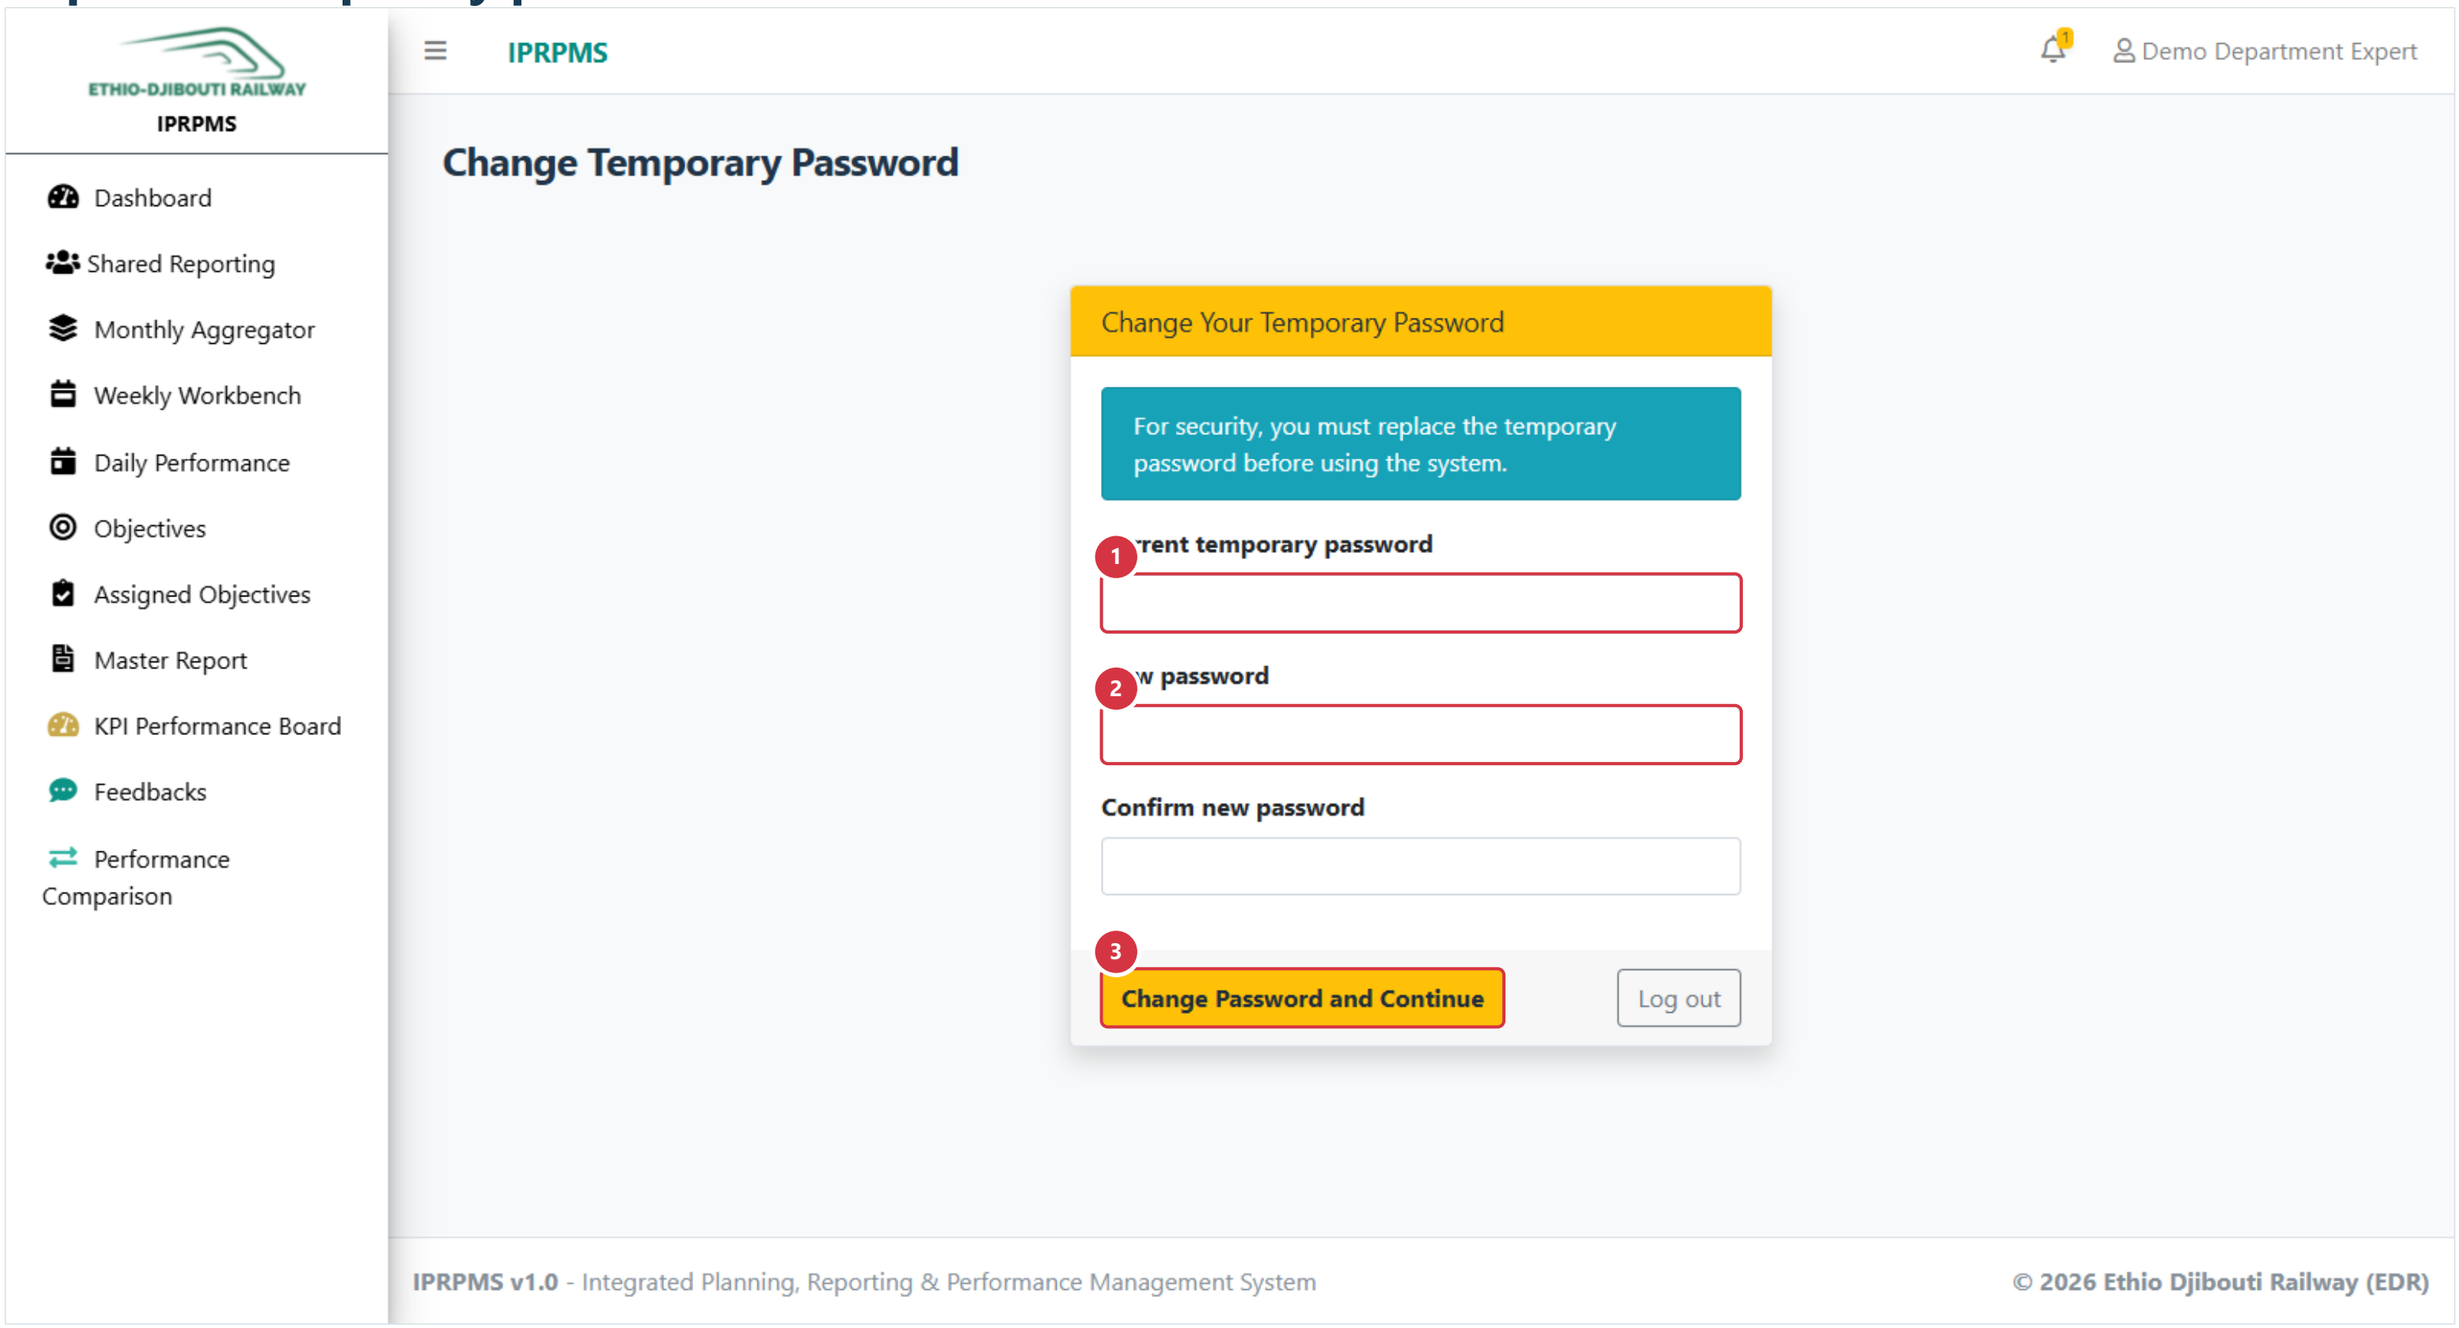

Sign in to IPRPMS

1. Enter your official email in Official Email.
2. Enter your own access key in Access Key.
3. Select Keep me logged in only on your own device, then click Authenticate.

After this step: The dashboard opens after authentication. Password fields in this handbook remain blank.

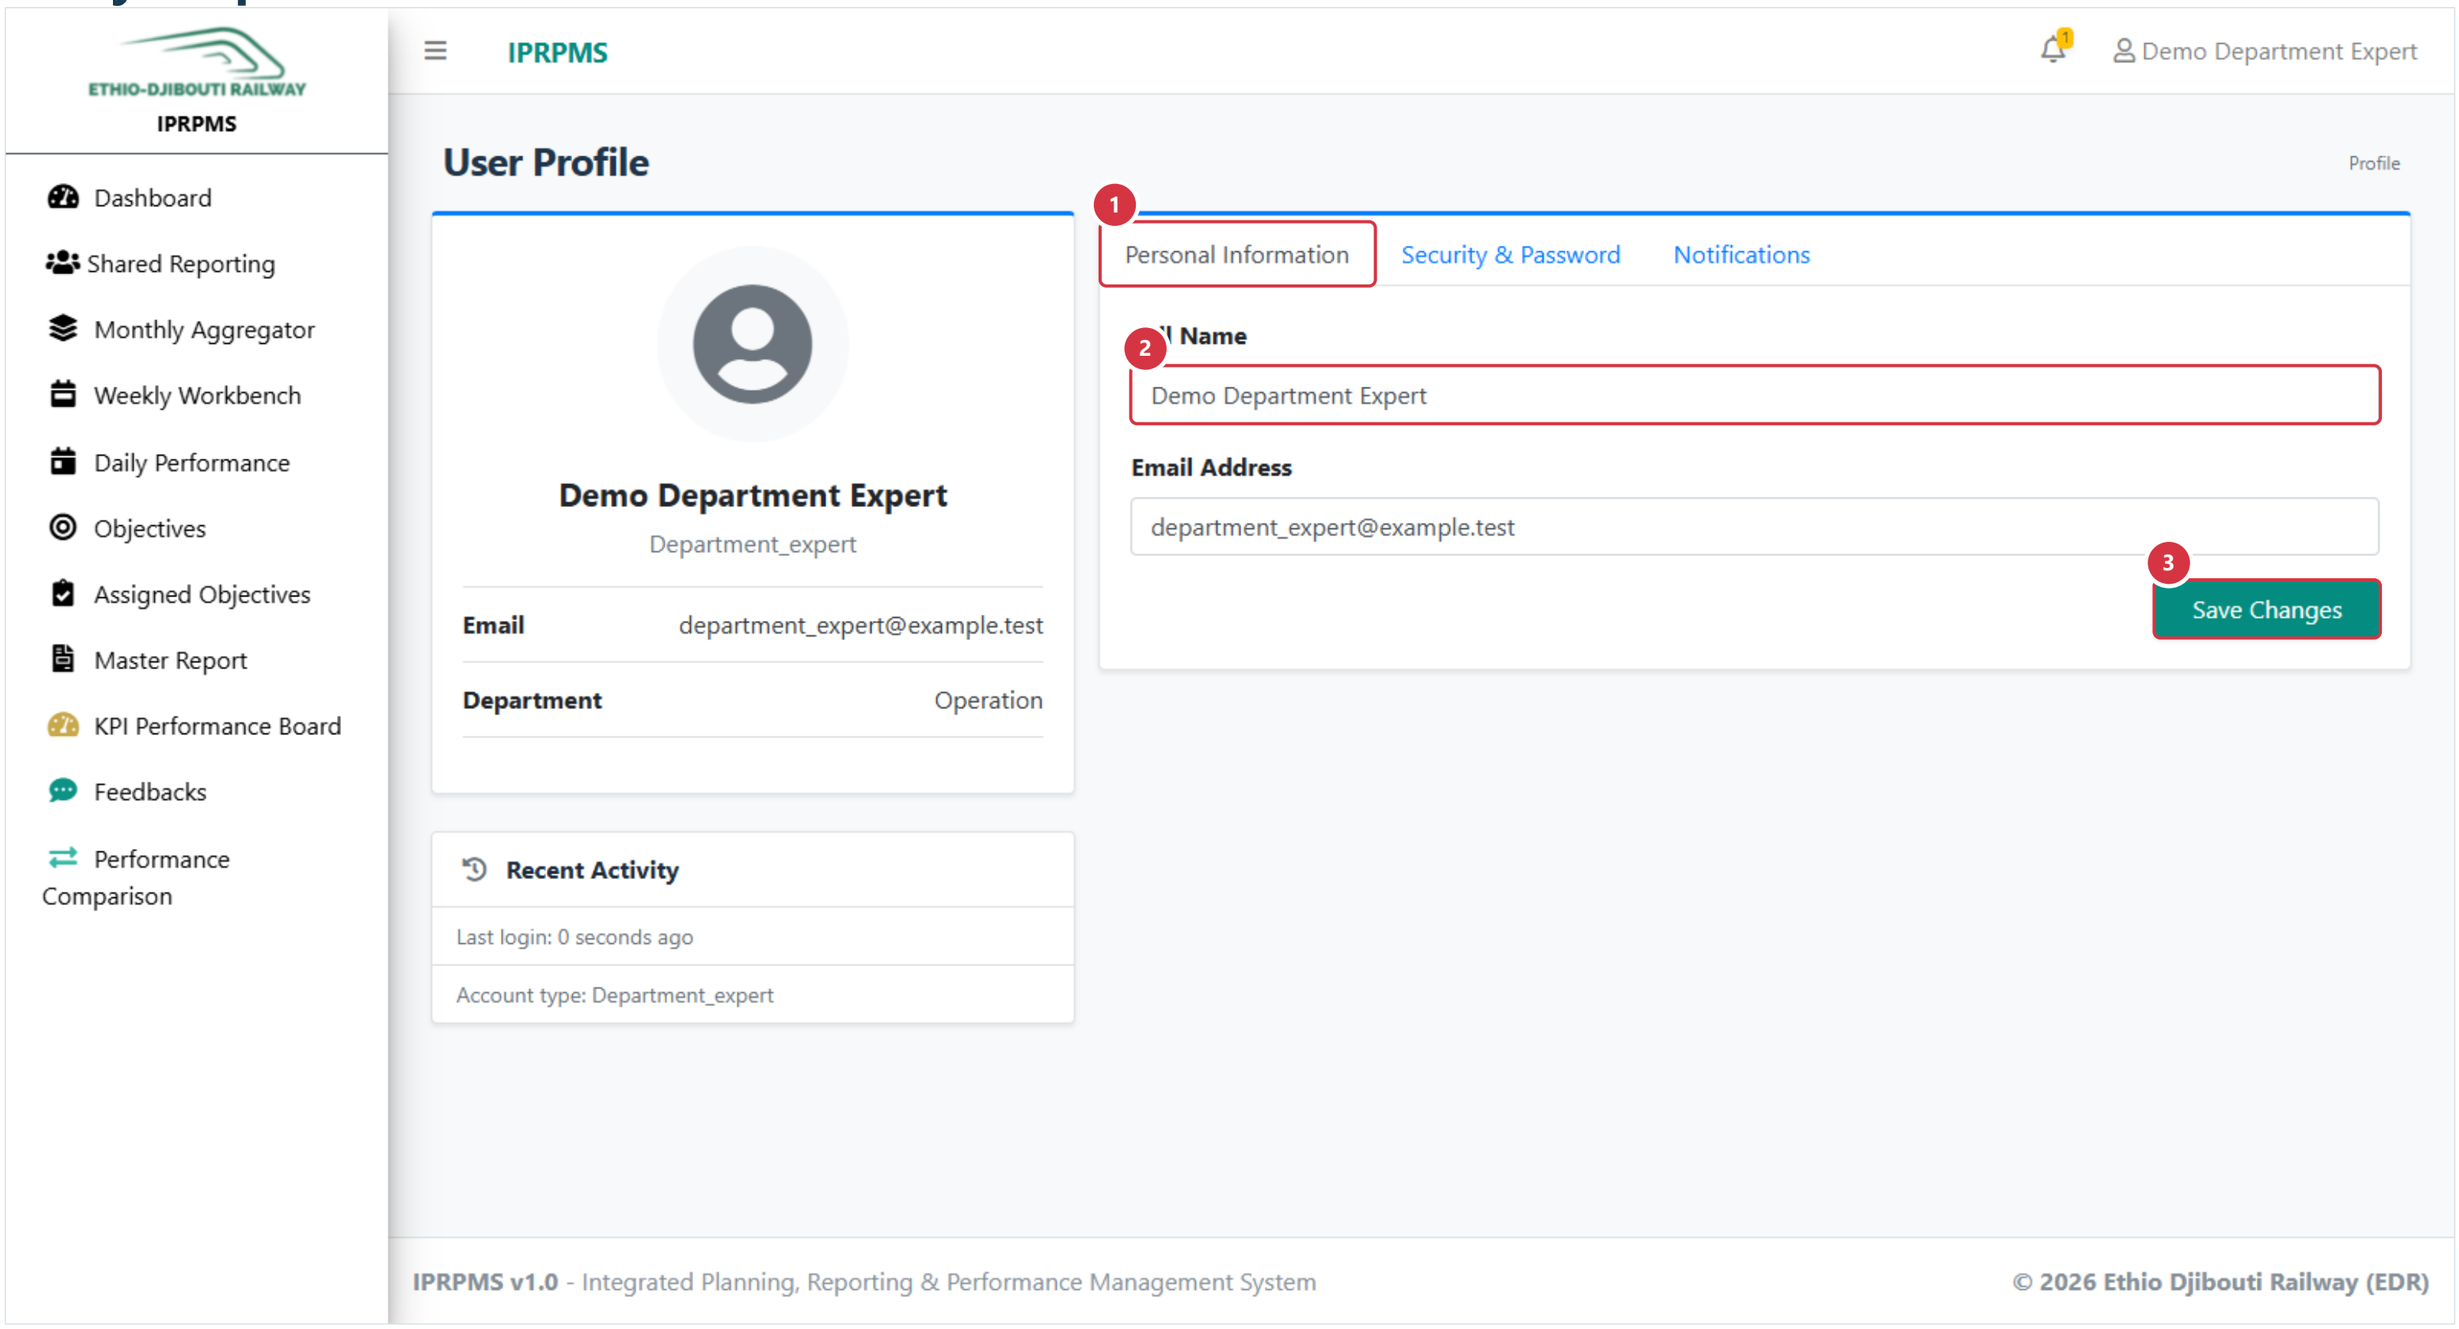

Replace a temporary password

1. Enter the current temporary password.
2. Enter a new private password and repeat it in Confirm new password.
3. Click Change Password and Continue.

After this step: This screen appears when the administrator requires a first password change.

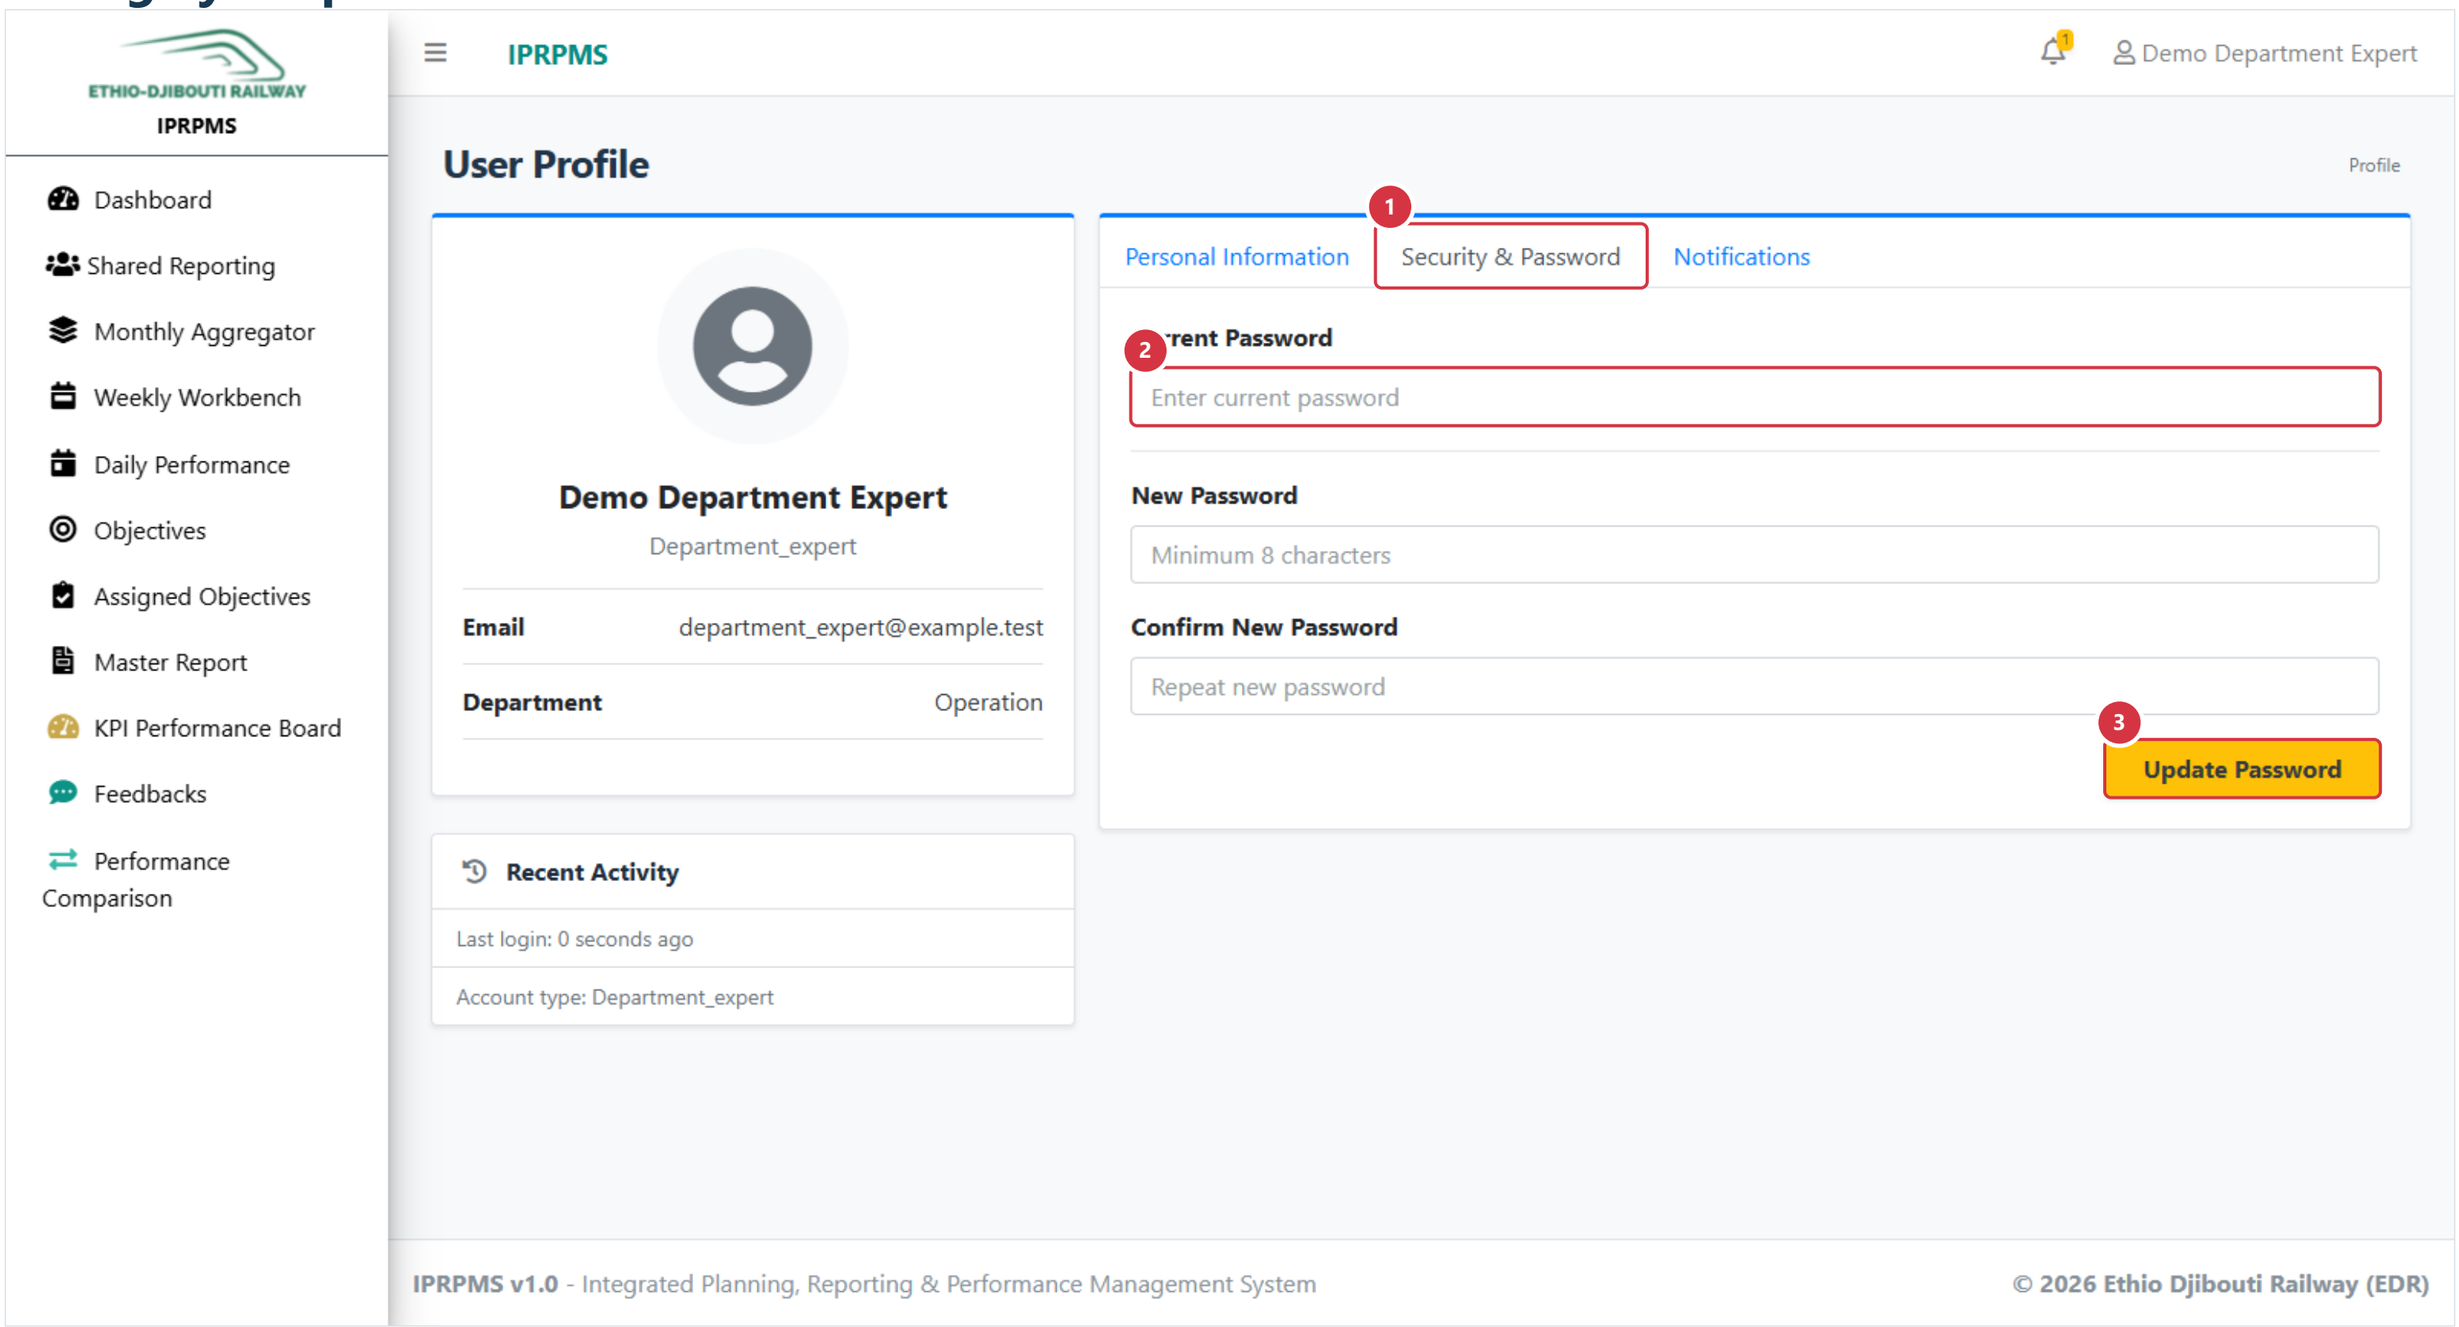

Edit your personal information

1. Click Personal Information in Profile.
2. Update Full Name or Email Address.
3. Click Save Changes and confirm the success message.

After this step: Department and role assignments are managed by the administrator, not through this form.

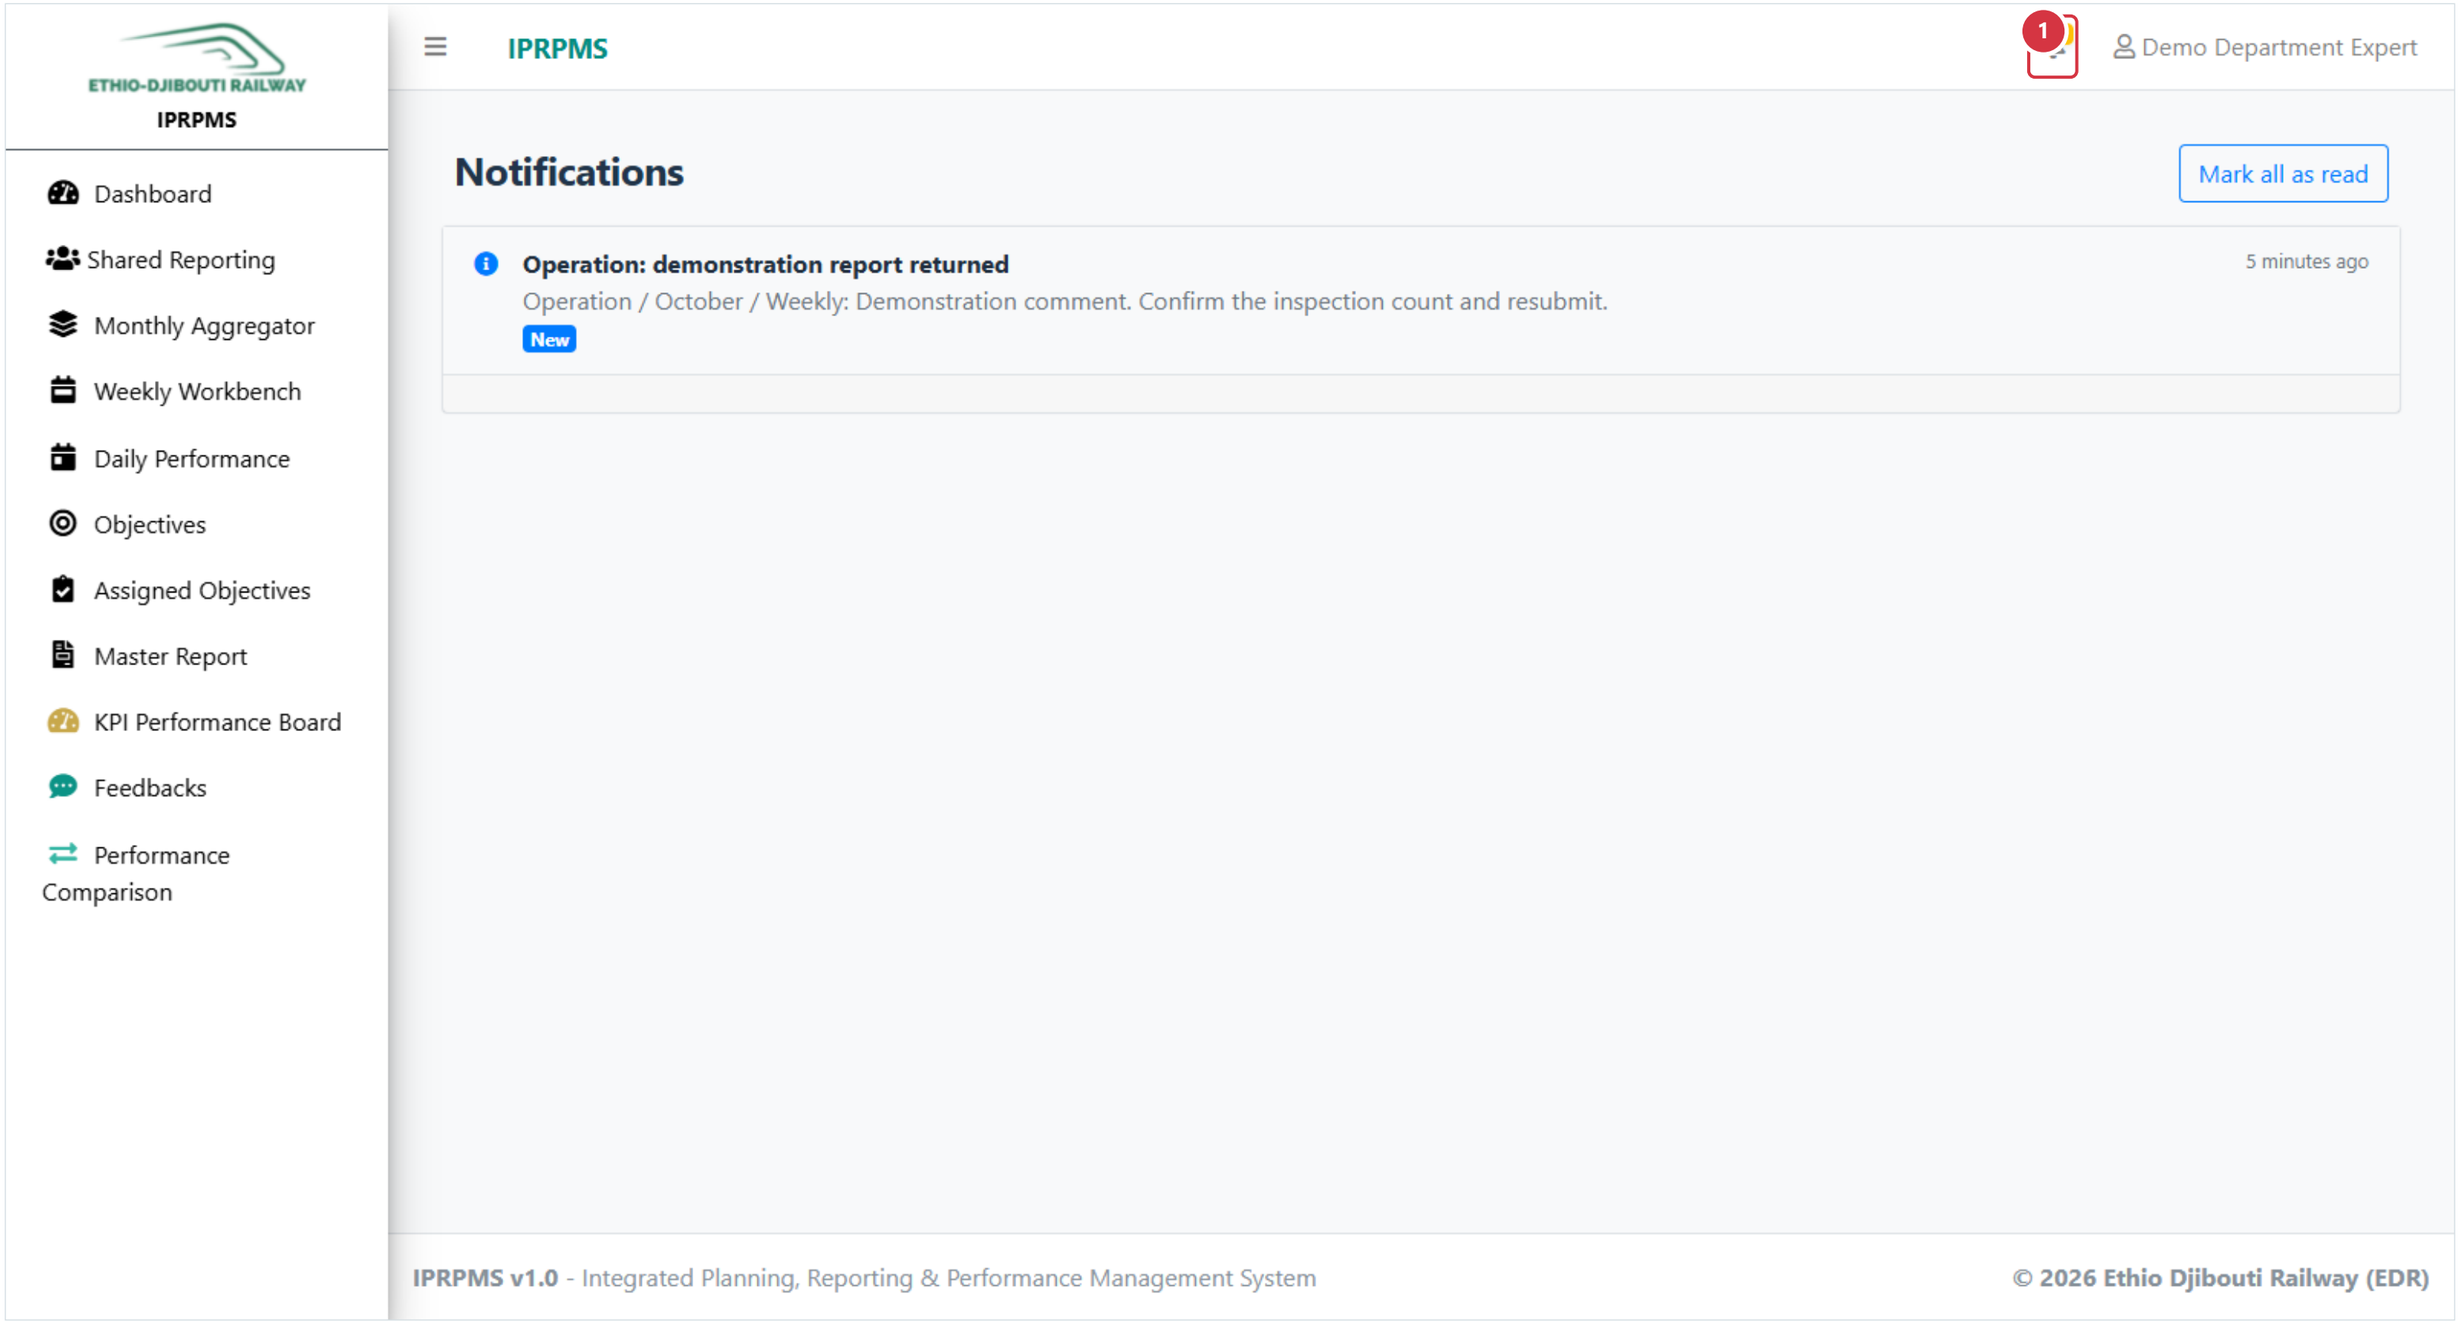

Change your password

1. Click Security & Password.
2. Enter your current password, a new password and its confirmation.
3. Click Update Password.

After this step: Use a private password. The fields are deliberately empty in this training capture.

Read workflow notifications

1. Open the notification bell or Notifications page.
2. Read the department, period, action and review comment.
3. Open the linked record or mark the notice read after acting on it.

After this step: Marking a notification read does not approve, correct or submit the underlying record.

Assign employee tasks clearly

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

A task is an employee's piece of work linked to a plan item. Task assignments are different from a Department Chief assigning an objective to a Directorate.

Before you click

Confirm the employee, related plan item, expected output, start date and deadline. Give one clear task title and describe what evidence will demonstrate completion.

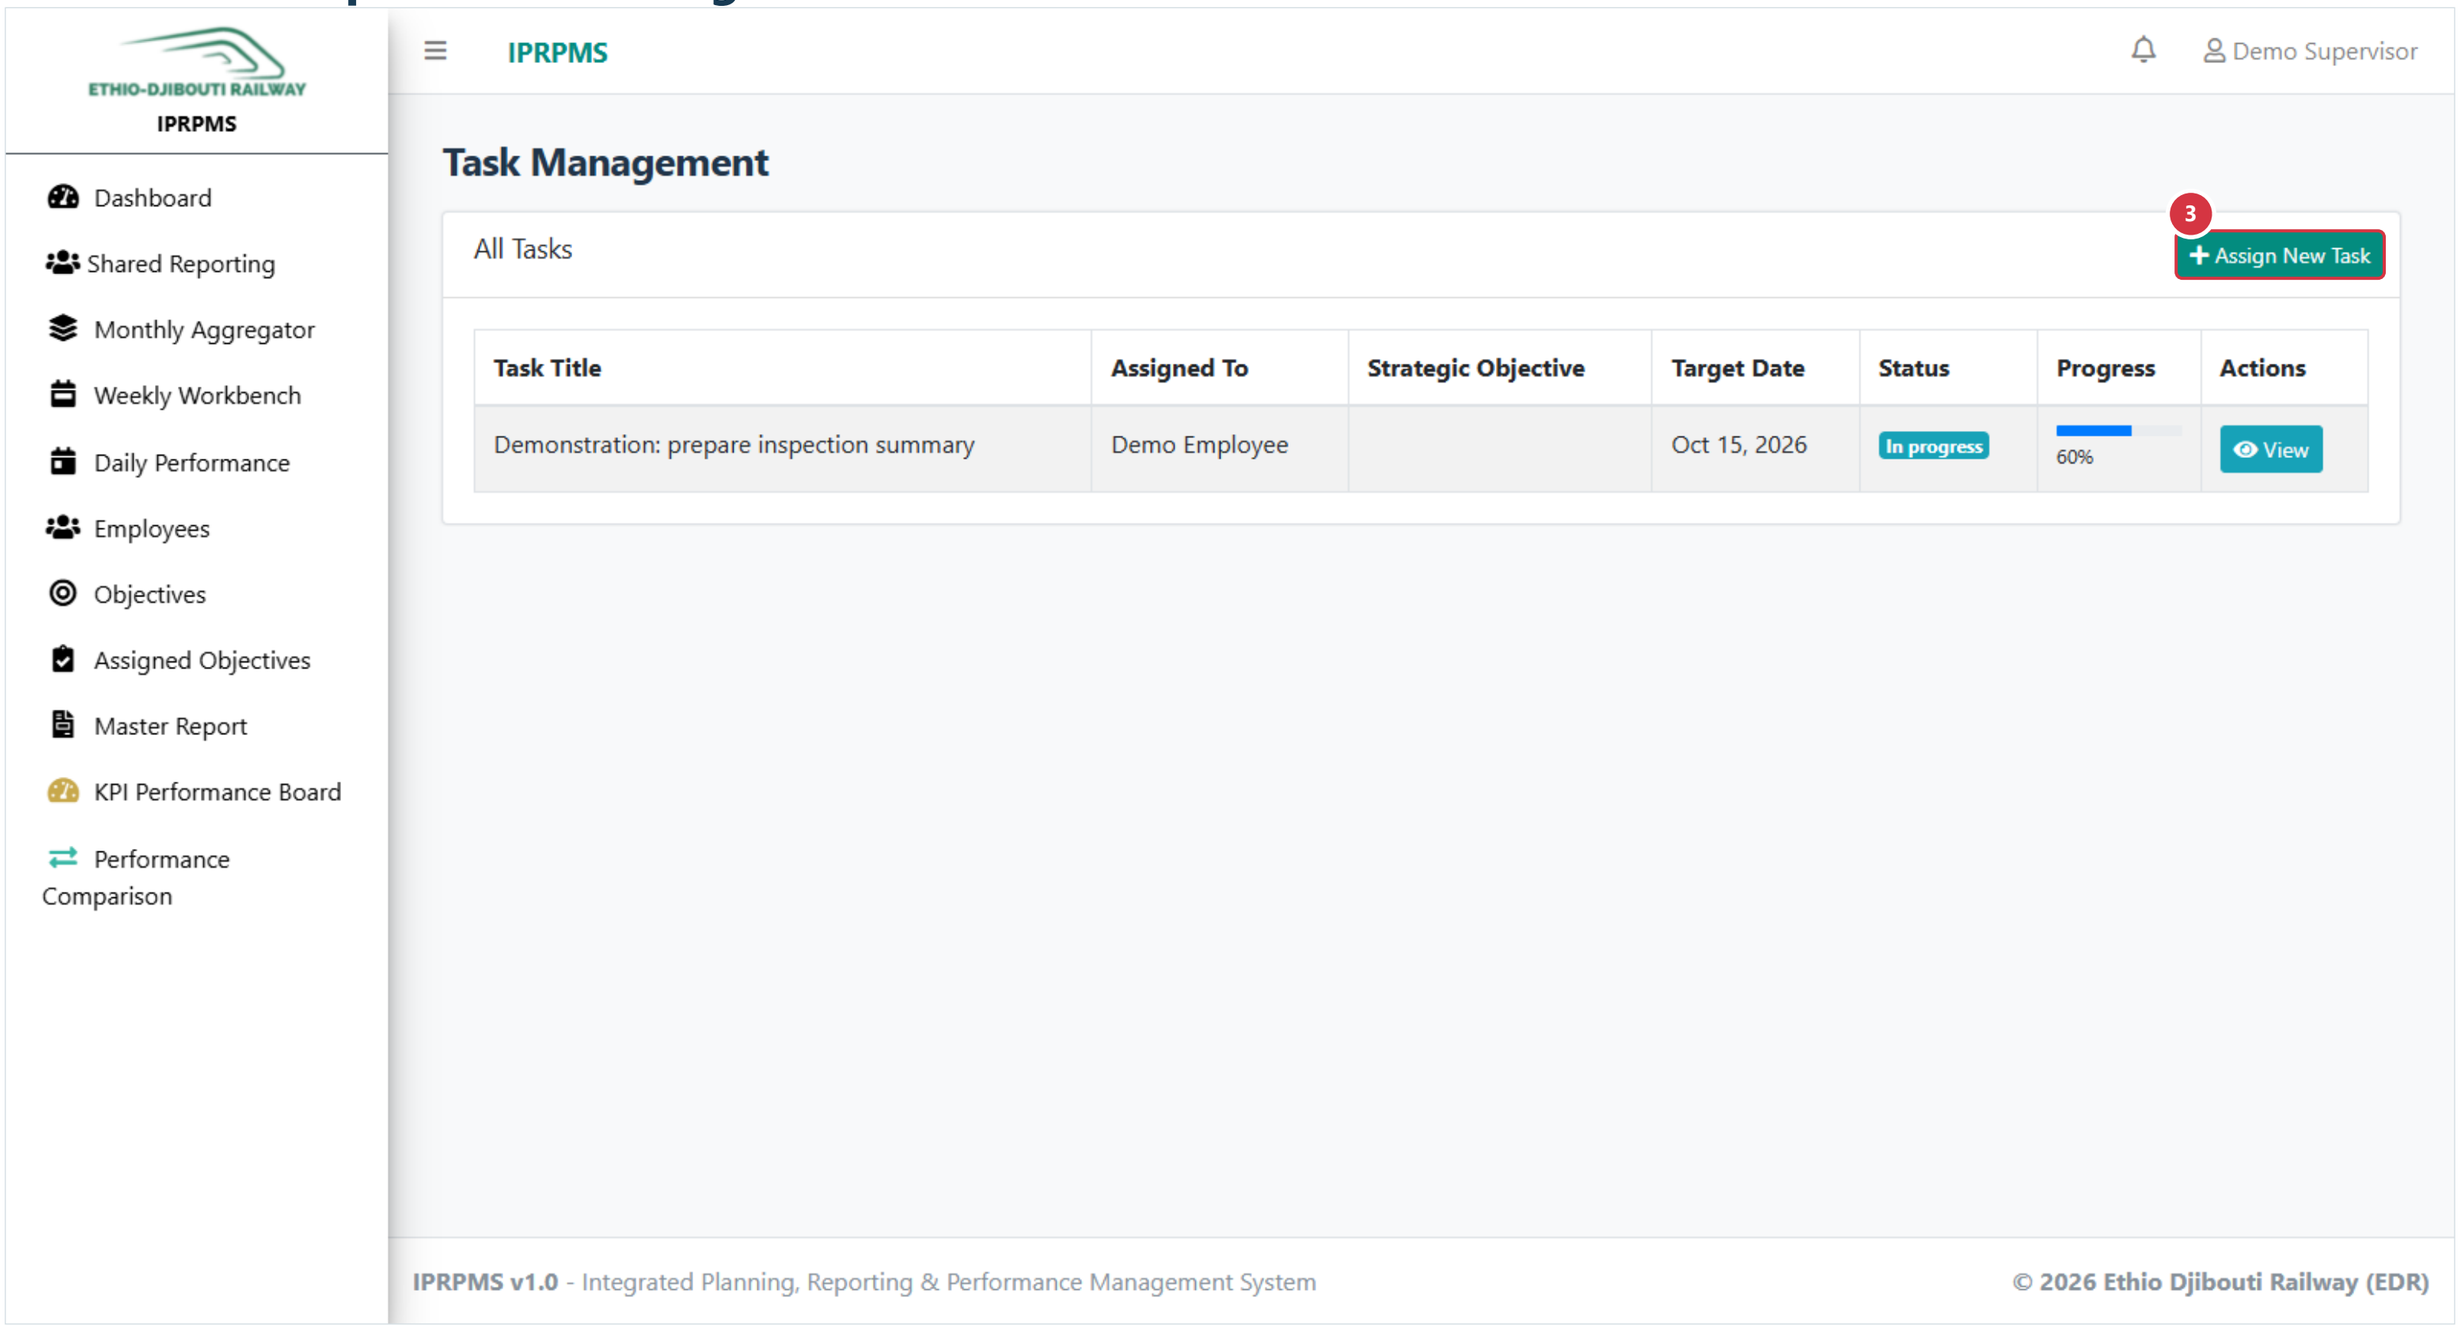

What to check

Choose the intended employee and correct plan item. Avoid duplicate tasks for the same work. Explain the due date and expected evidence outside the system if the employee cannot open the detail page.

How you know it worked

Click Assign Task and confirm the task in the list. My Tasks and task-detail pages returned errors in the inspected build. Do not treat employee report submission or approval as verified until IT resolves that issue.

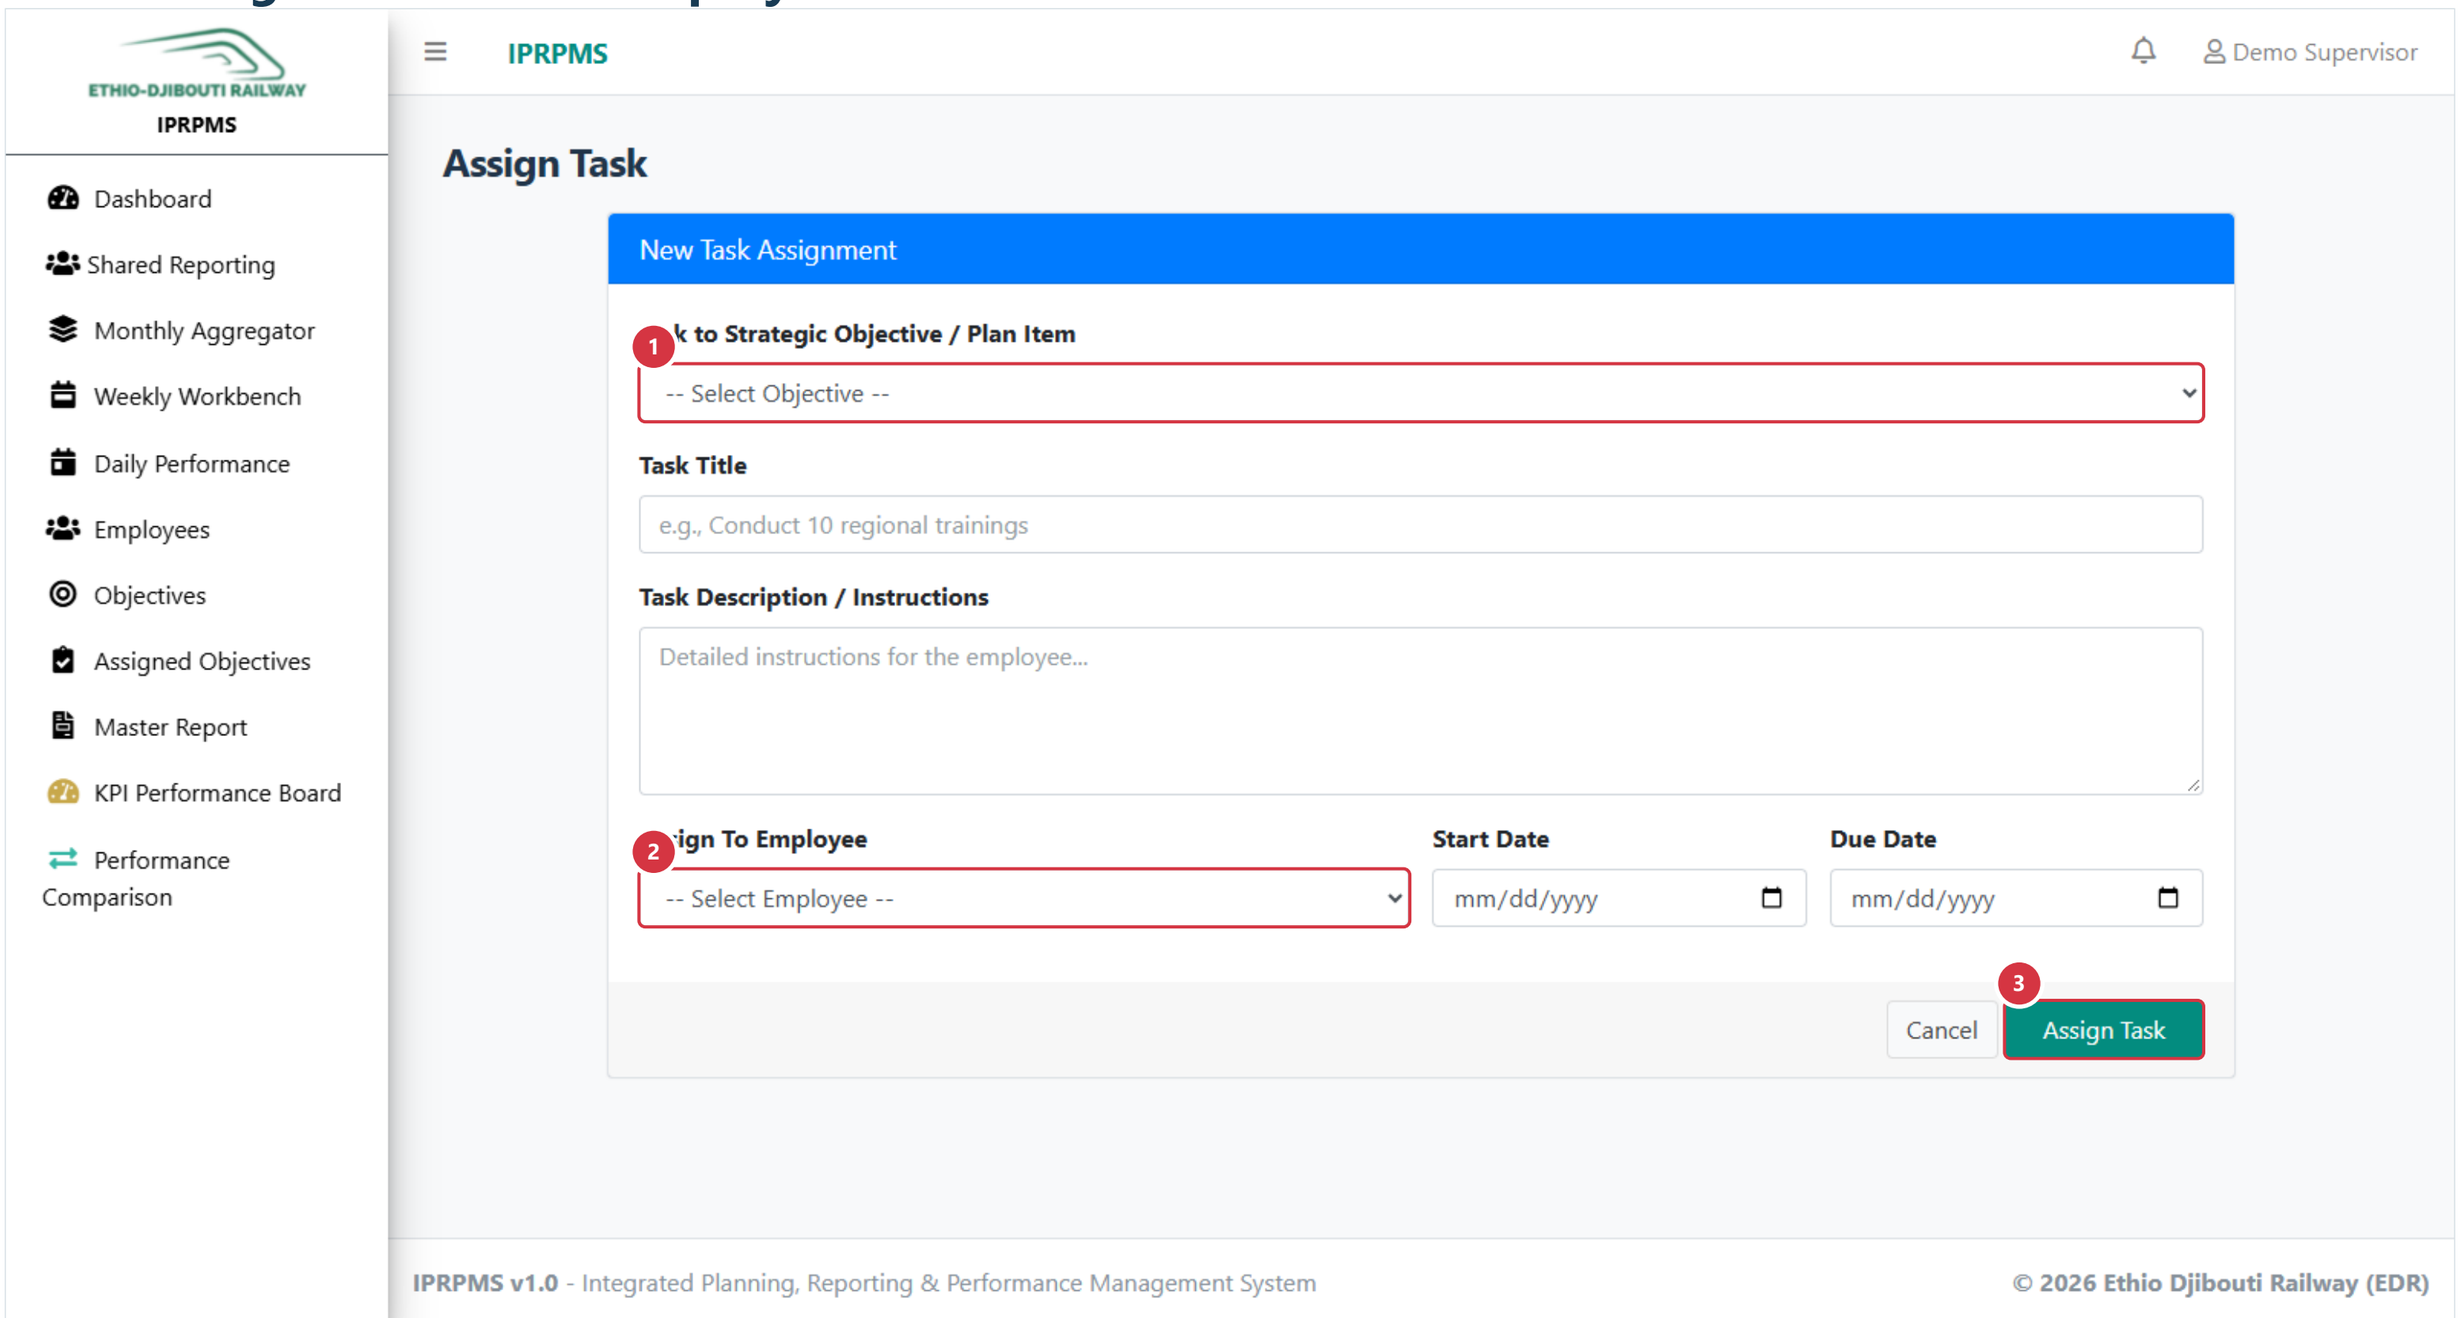

Tasks: view departmental assignments

1. Open Tasks.
2. Read the assigned employee, target date, status and progress.
3. Use Assign New Task to create an assignment.

After this step: The inspected local build has errors on My Tasks and task details. Those two reporting procedures require an application correction before training.

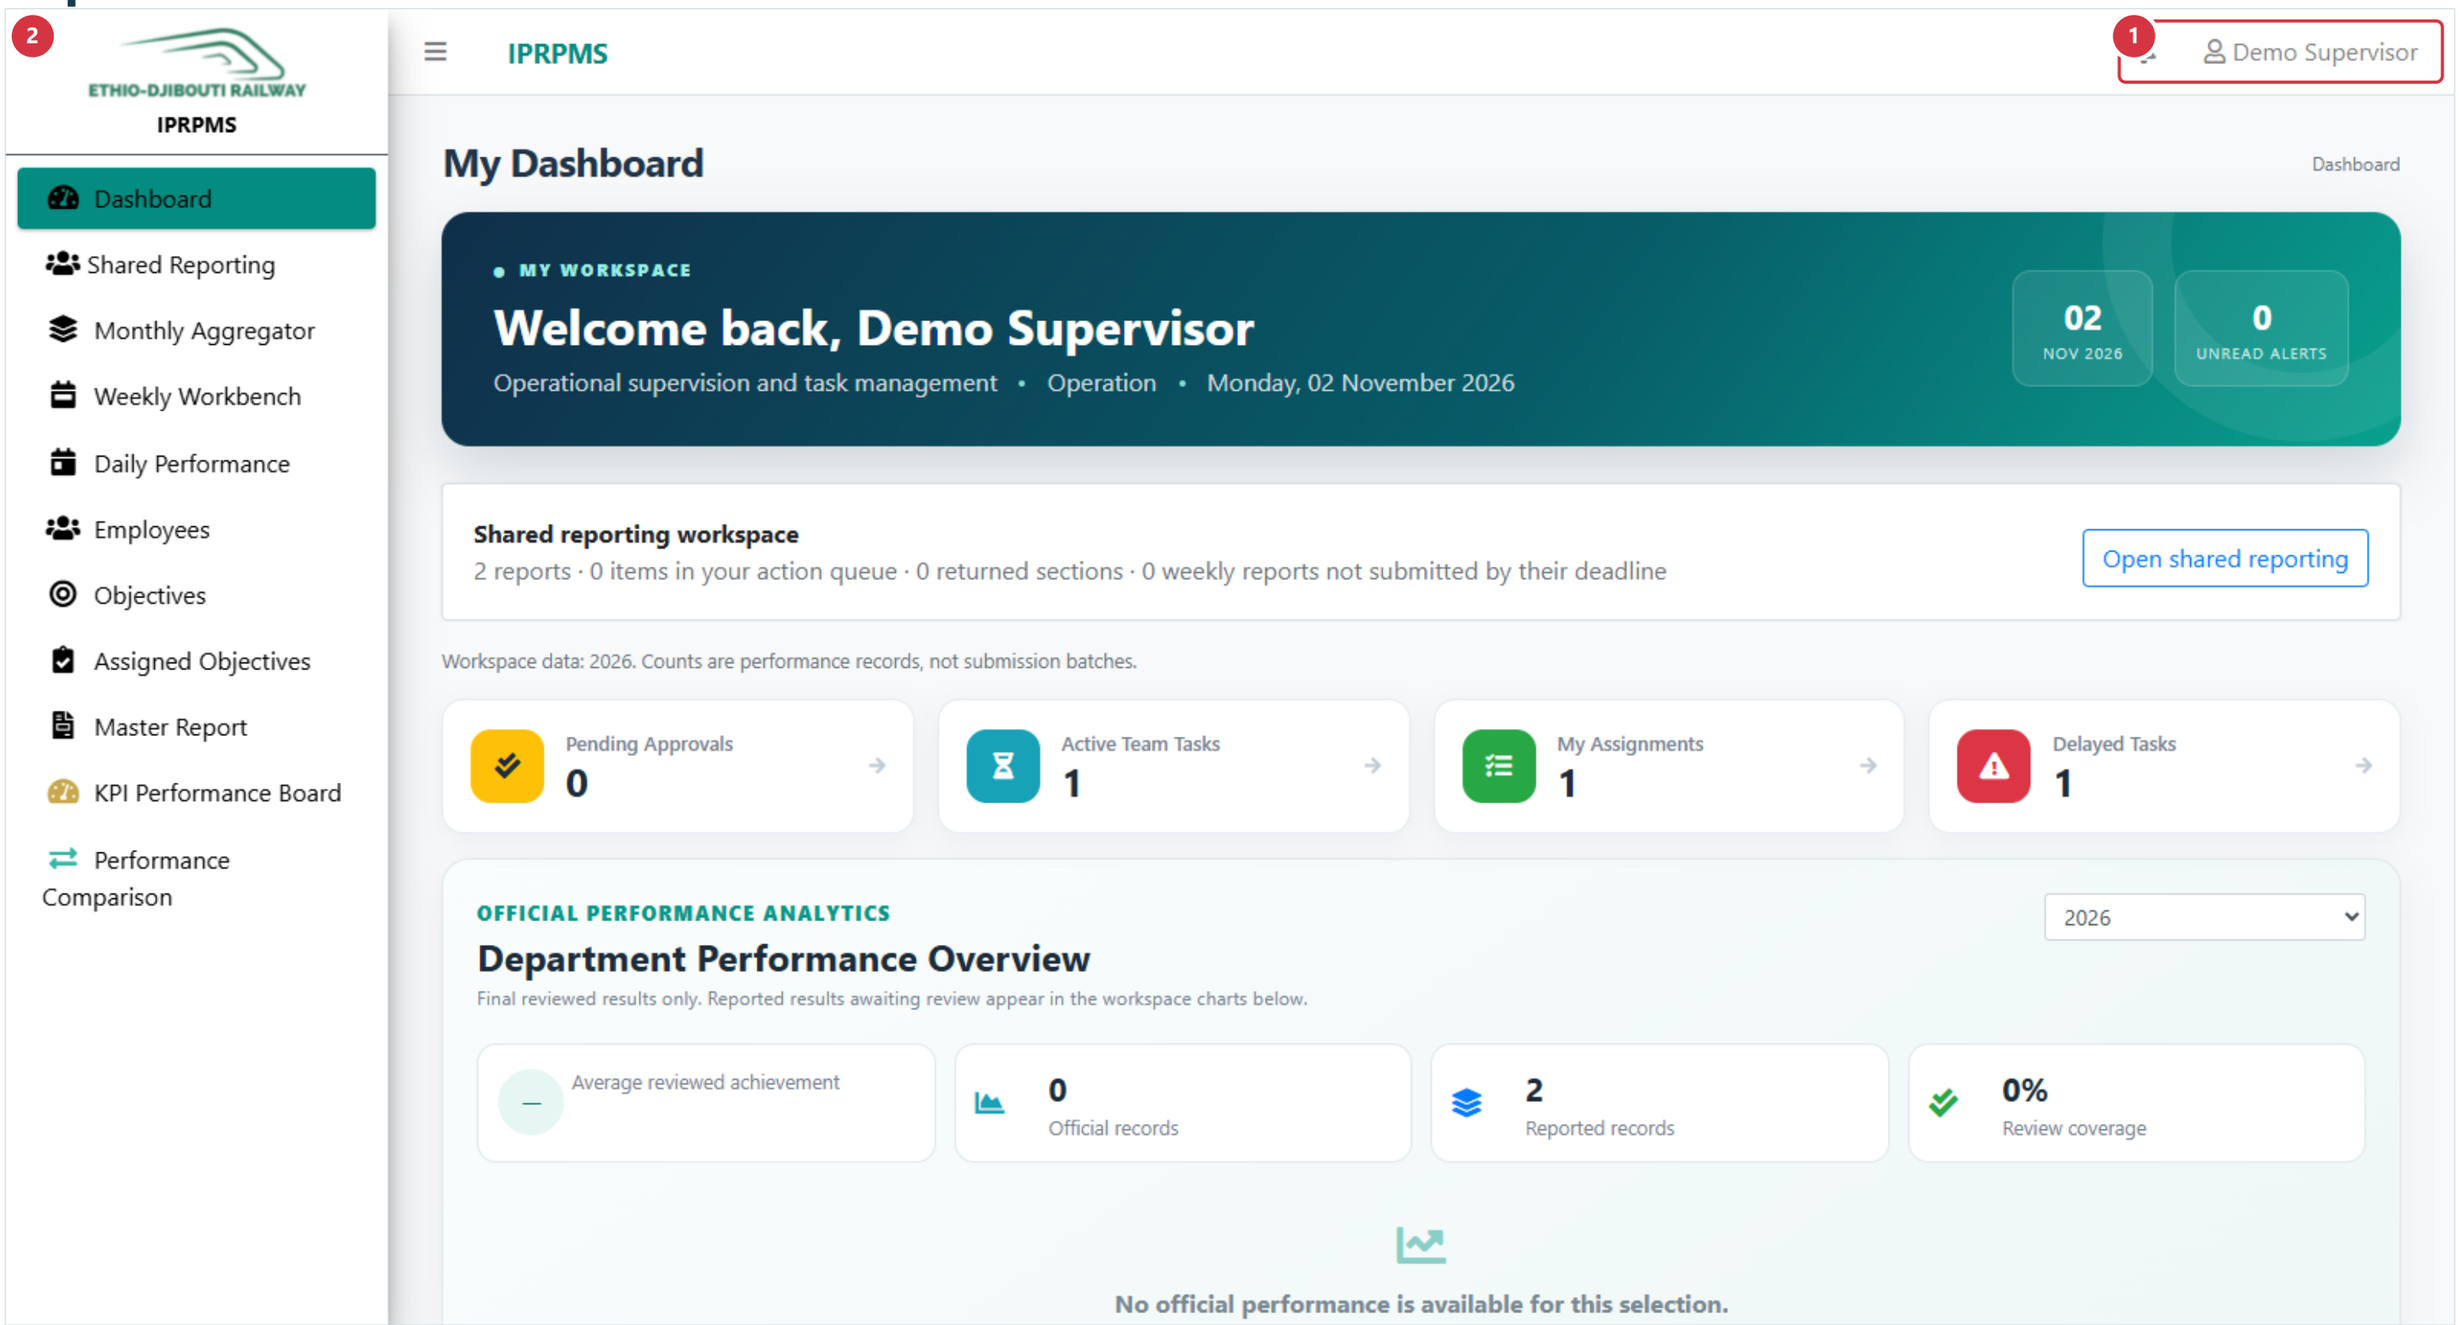

Tasks: assign a task to an employee

1. Select the related plan item.
2. Select the assigned employee and complete the task title, description and dates.
3. Click Assign Task.

After this step: The assigned employee receives the task. My Tasks and task details require an application correction in the inspected build.

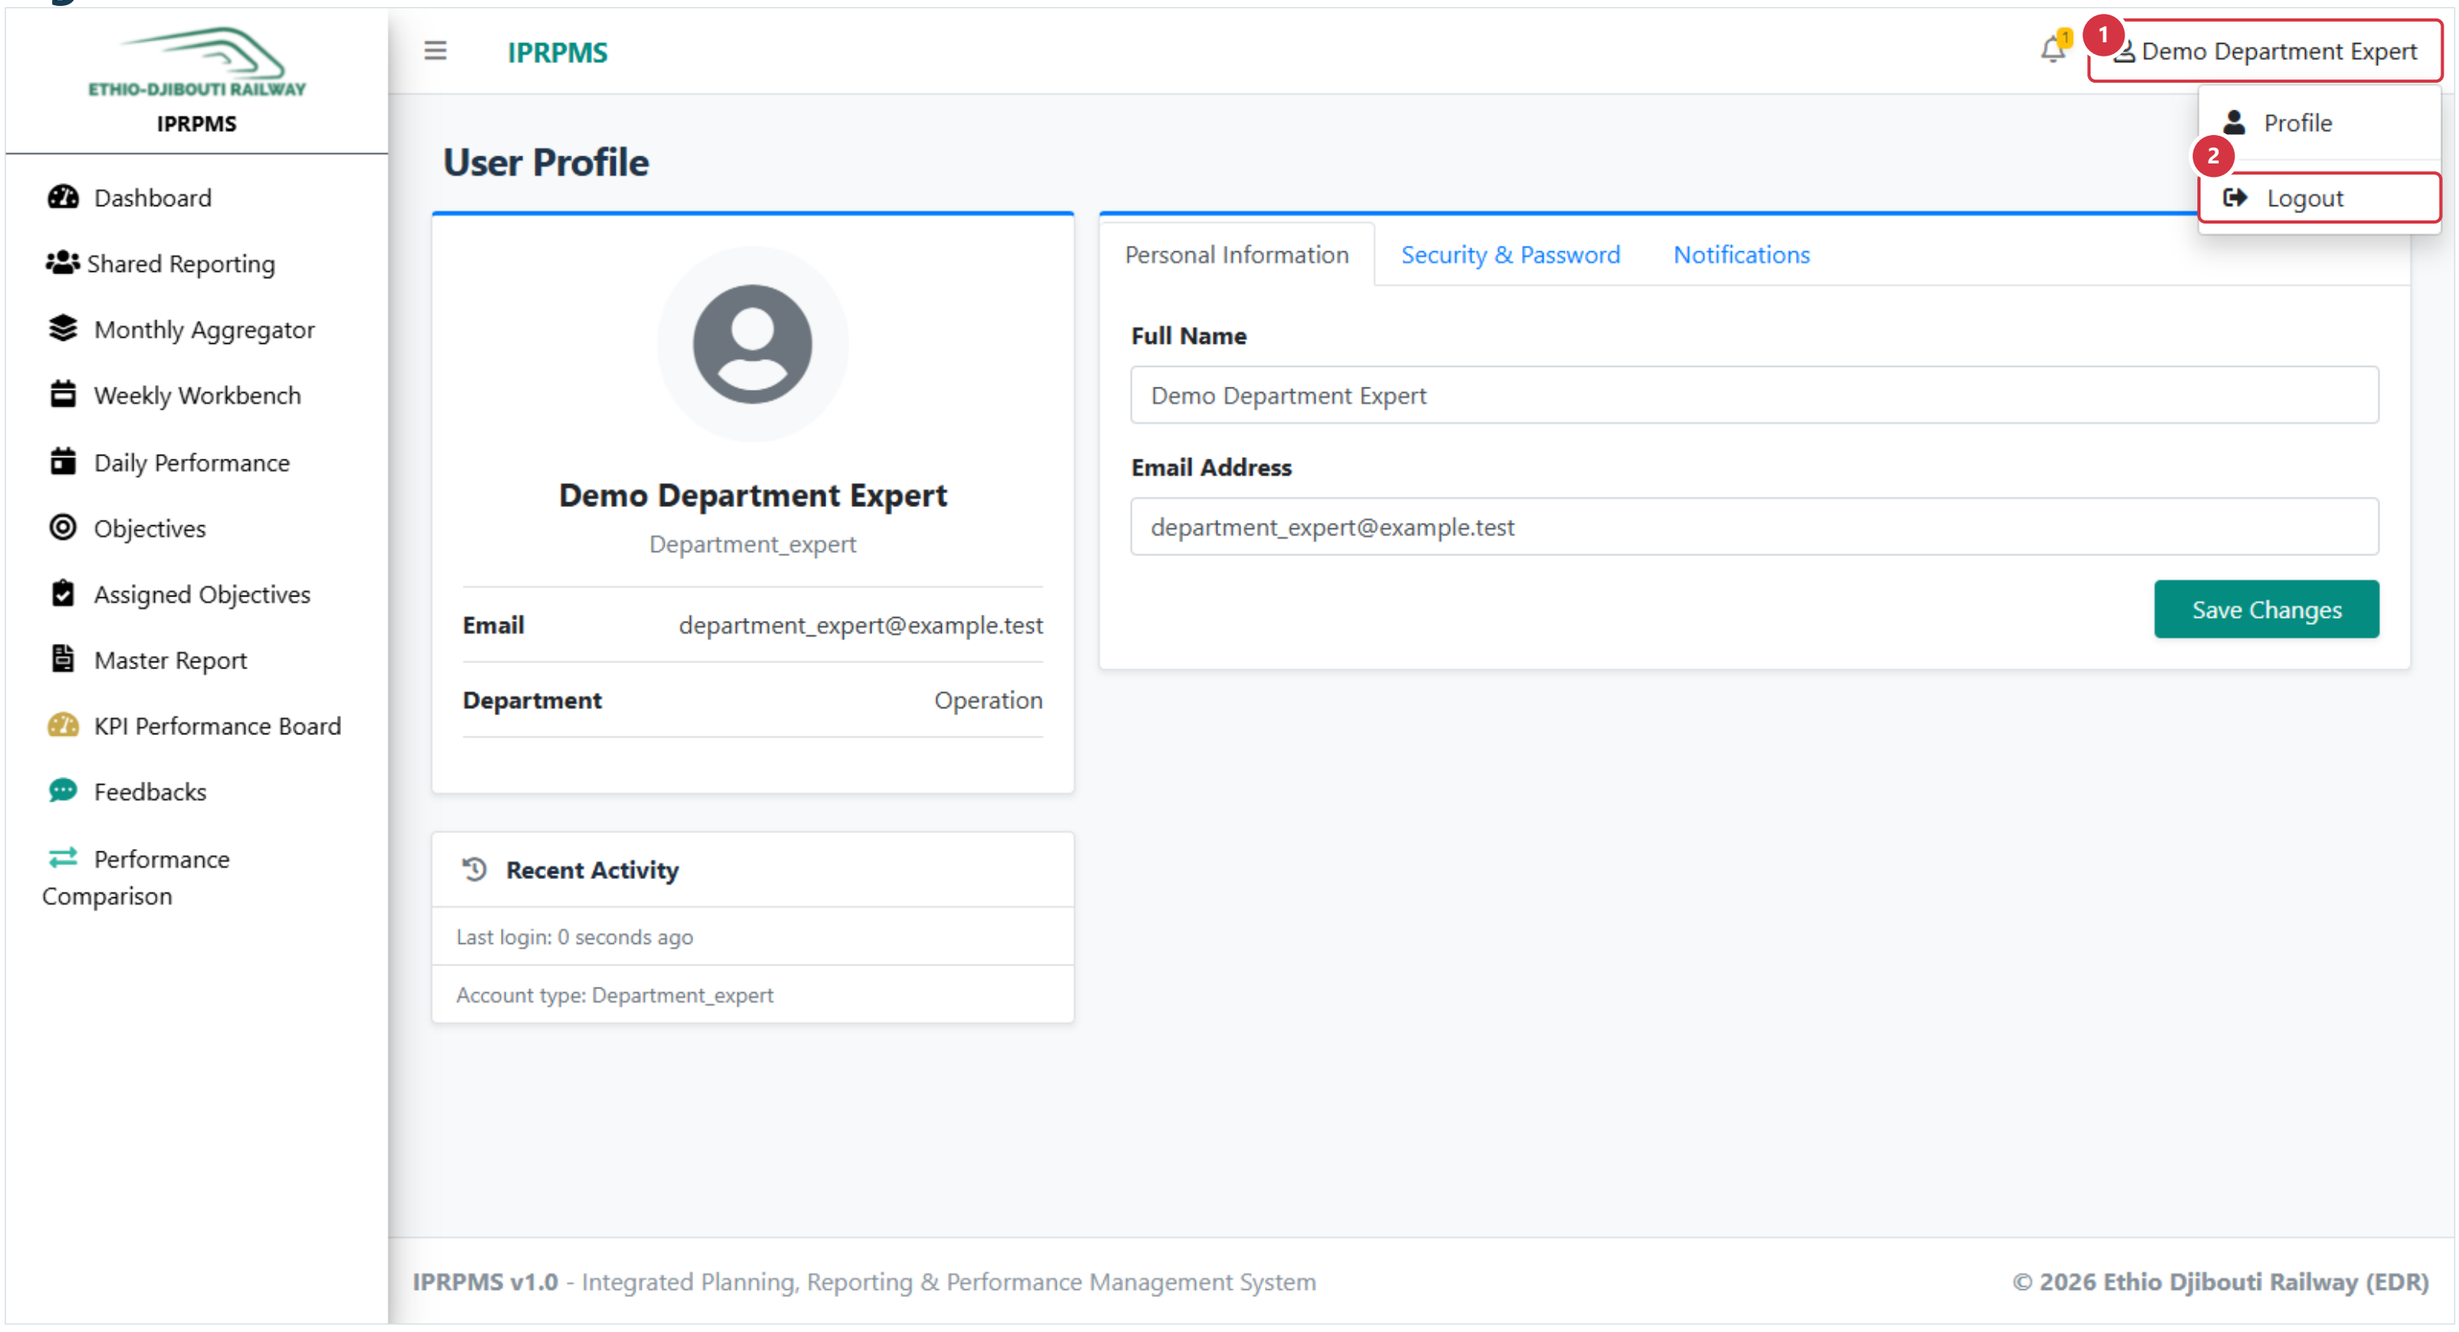

Supervisor: home screen

1. Confirm your signed-in role at the top right.
2. Assign tasks to employees with the correct plan item, dates and description.
3. Use task reviews once the local task-detail issue is resolved. The working assignment screen is documented in Chapter 08.

After this step: Menus vary by permission, department and reporting frequency.

Sign out on a shared device

1. Click your name at the top right to open the user menu.
2. Click Logout after you finish your work.

After this step: The application returns to the sign-in screen after logout.

Before you finish, check these four things

Finish means your part is complete and you know who has the next action. It does not always mean the whole record is finally approved.

Your completion checklist

1. The task is linked to the right plan item and employee. 2. The expected output and deadline are understandable. 3. The assignment was saved and confirmed. 4. I know task-detail reporting is currently an availability issue.

If a menu or button is missing

If an employee cannot open My Tasks or task details in this build, send the exact error and task reference to IT. Do not create duplicate tasks or grant broader access as a workaround.

Ask for help with useful details

Give IT or the responsible reviewer the module, department, year, reporting period, objective or record reference and exact message. Include a safe screenshot. Never send your password.

Keep the process and data safe

Use your own account, save before sending, read return comments and keep the same record for corrections. Demonstration screenshots are teaching examples, not official performance figures. The separate logistics Import/Export module is excluded.
