General Head Office - Viewing Role

Your responsibilities, complete workflow, exact clicks and return paths.

Read first: the Start Here guide explains how the whole system works. Then use this manual to do your part, check the outcome and hand work to the right person.

Understand your job before the buttons

Keep this page in mind whenever you receive a new record. It explains your responsibility and where your part stops.

Your job

Read the final approved plans and performance reports available to general Head Office, understand scope and coverage, and request explanations from the responsible office.

What you receive

Final approved organizational plans, performance views and written reports permitted by the account.

Who receives your work

Questions and follow-up requests to Plan and Report or the responsible department; this role does not perform the final Plan and Report Chief decision.

Your limits and important distinctions

General Head Office and Plan and Report Chief are different roles. A viewing account should not expect Approve, Return or period-lock buttons.

Your workflow, from first action to finish

Read down the page. Each step has an outcome; do not jump ahead simply because a button is visible.

1

Confirm your viewing role

Sign in and check that the account is general Head Office, not a Plan and Report Chief account.

2

Choose the intended scope

Select the year, department and period in the final approved records available to you.

3

Read figures in context

Check the unit, target, actual, achievement direction and reporting completeness.

4

Read the written explanation

Open the approved report for the same scope and read challenges, solutions and next focus.

5

Ask a specific question

Identify the department, period and activity when requesting clarification. Do not ask users to change a figure without the proper correction workflow.

6

Use only appropriate final information

Check status and confidentiality before sharing. A missing result is a gap, not a zero.

Find the task you need

Use the page number or click a task name in the PDF. Section introductions explain the purpose before the screen-by-screen actions.

First access and everyday account safety 5

Read final approved plans and reports 11

Completion checklist and help 17

First access and everyday account safety

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

Use your own account. Your department and role decide what you can see and which decisions you can make. Never use somebody else's account to reach a missing button.

Before you click

Have your official account details ready. Open the address supplied by IT, enter your email and Access Key, then click Authenticate. A first-password screen appears only when your account requires it.

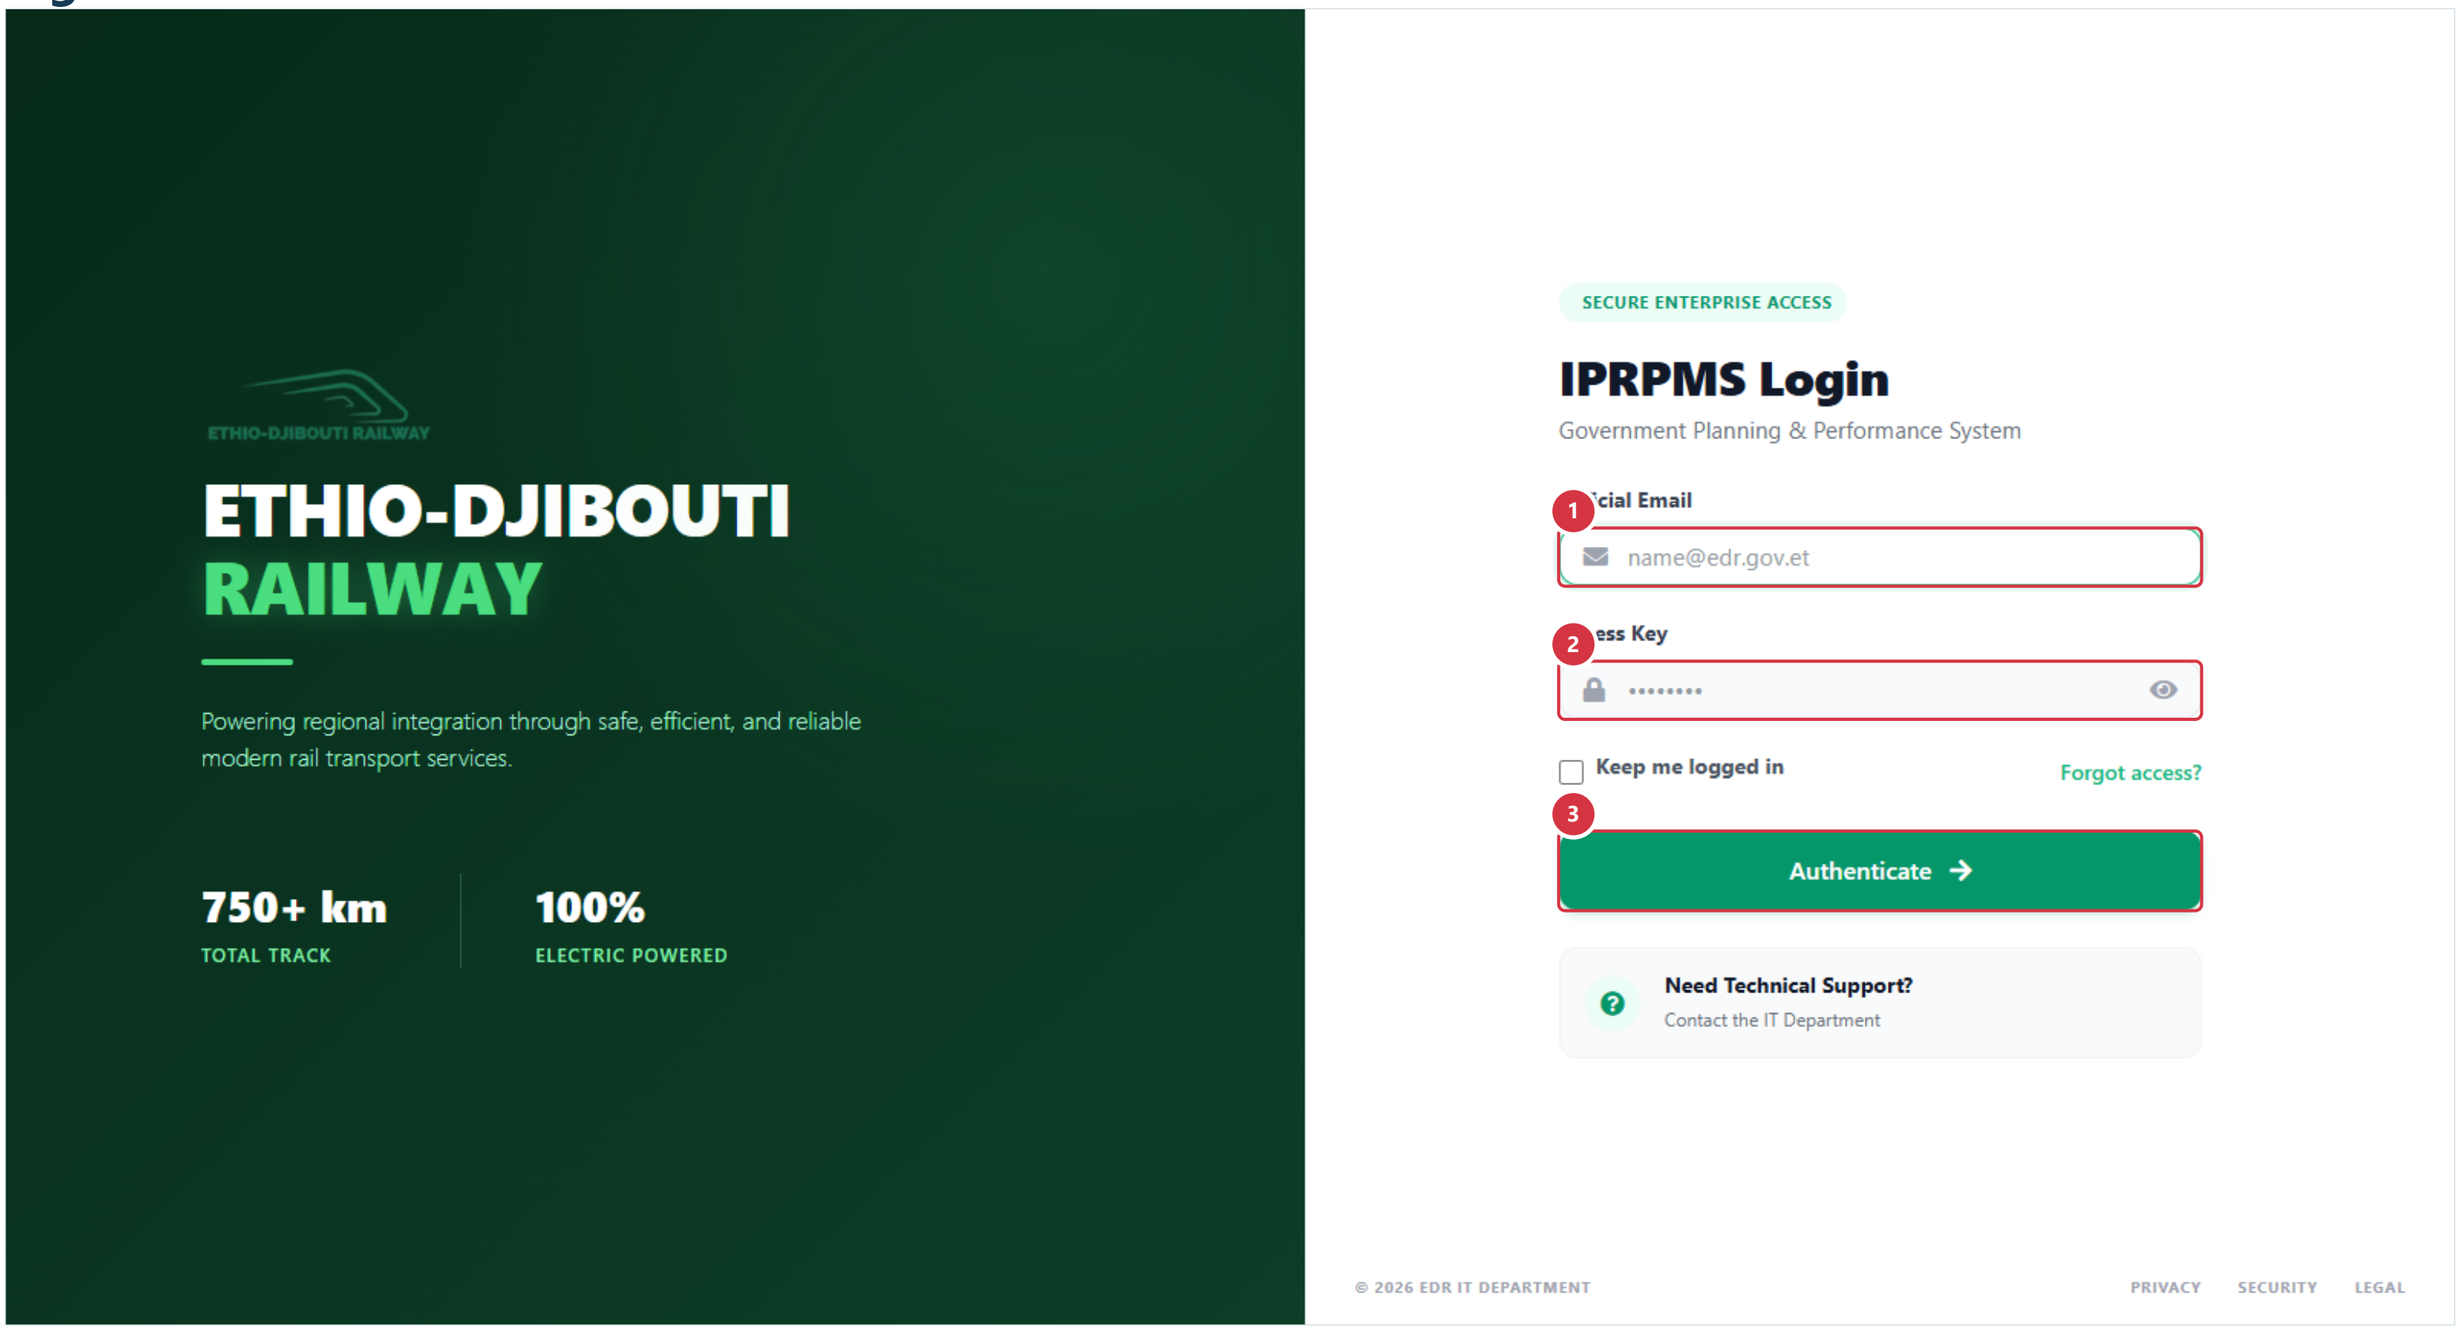

What to check

Check the name and role at the top right. Change your temporary password when prompted. Your profile is for your own name, email and password; department and role changes belong to the administrator.

How you know it worked

You can open the dashboard with the correct account. The notification bell shows work sent to you. On a shared computer, sign out when finished and do not choose Keep me logged in.

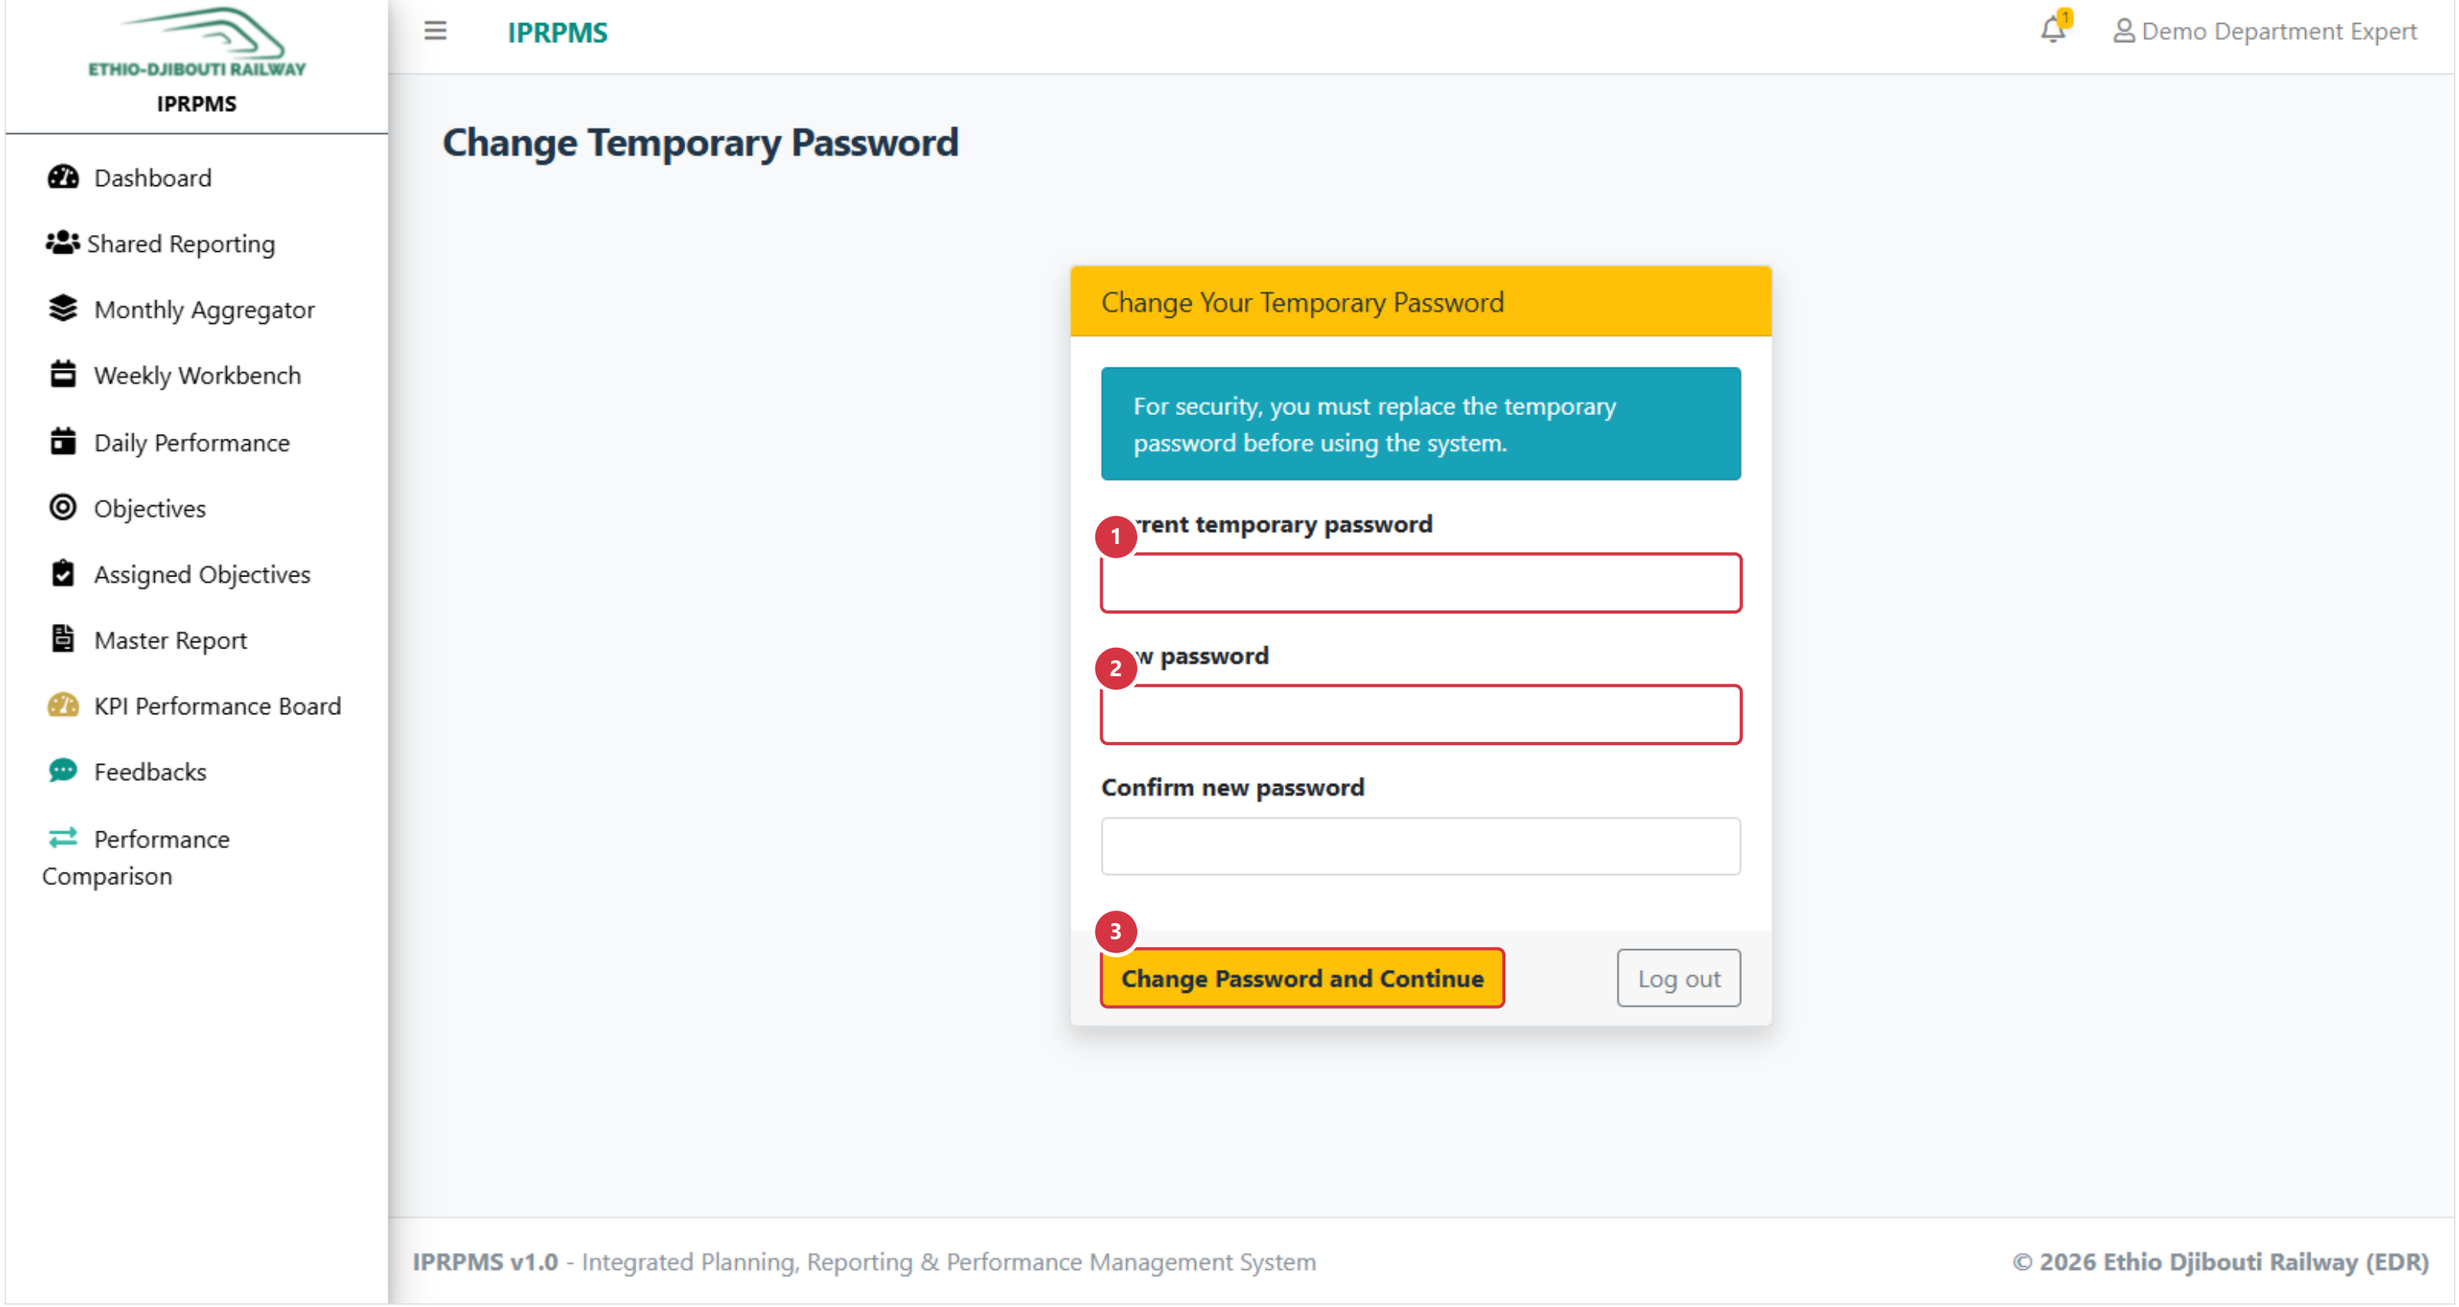

Sign in to IPRPMS

1. Enter your official email in Official Email.
2. Enter your own access key in Access Key.
3. Select Keep me logged in only on your own device, then click Authenticate.

After this step: The dashboard opens after authentication. Password fields in this handbook remain blank.

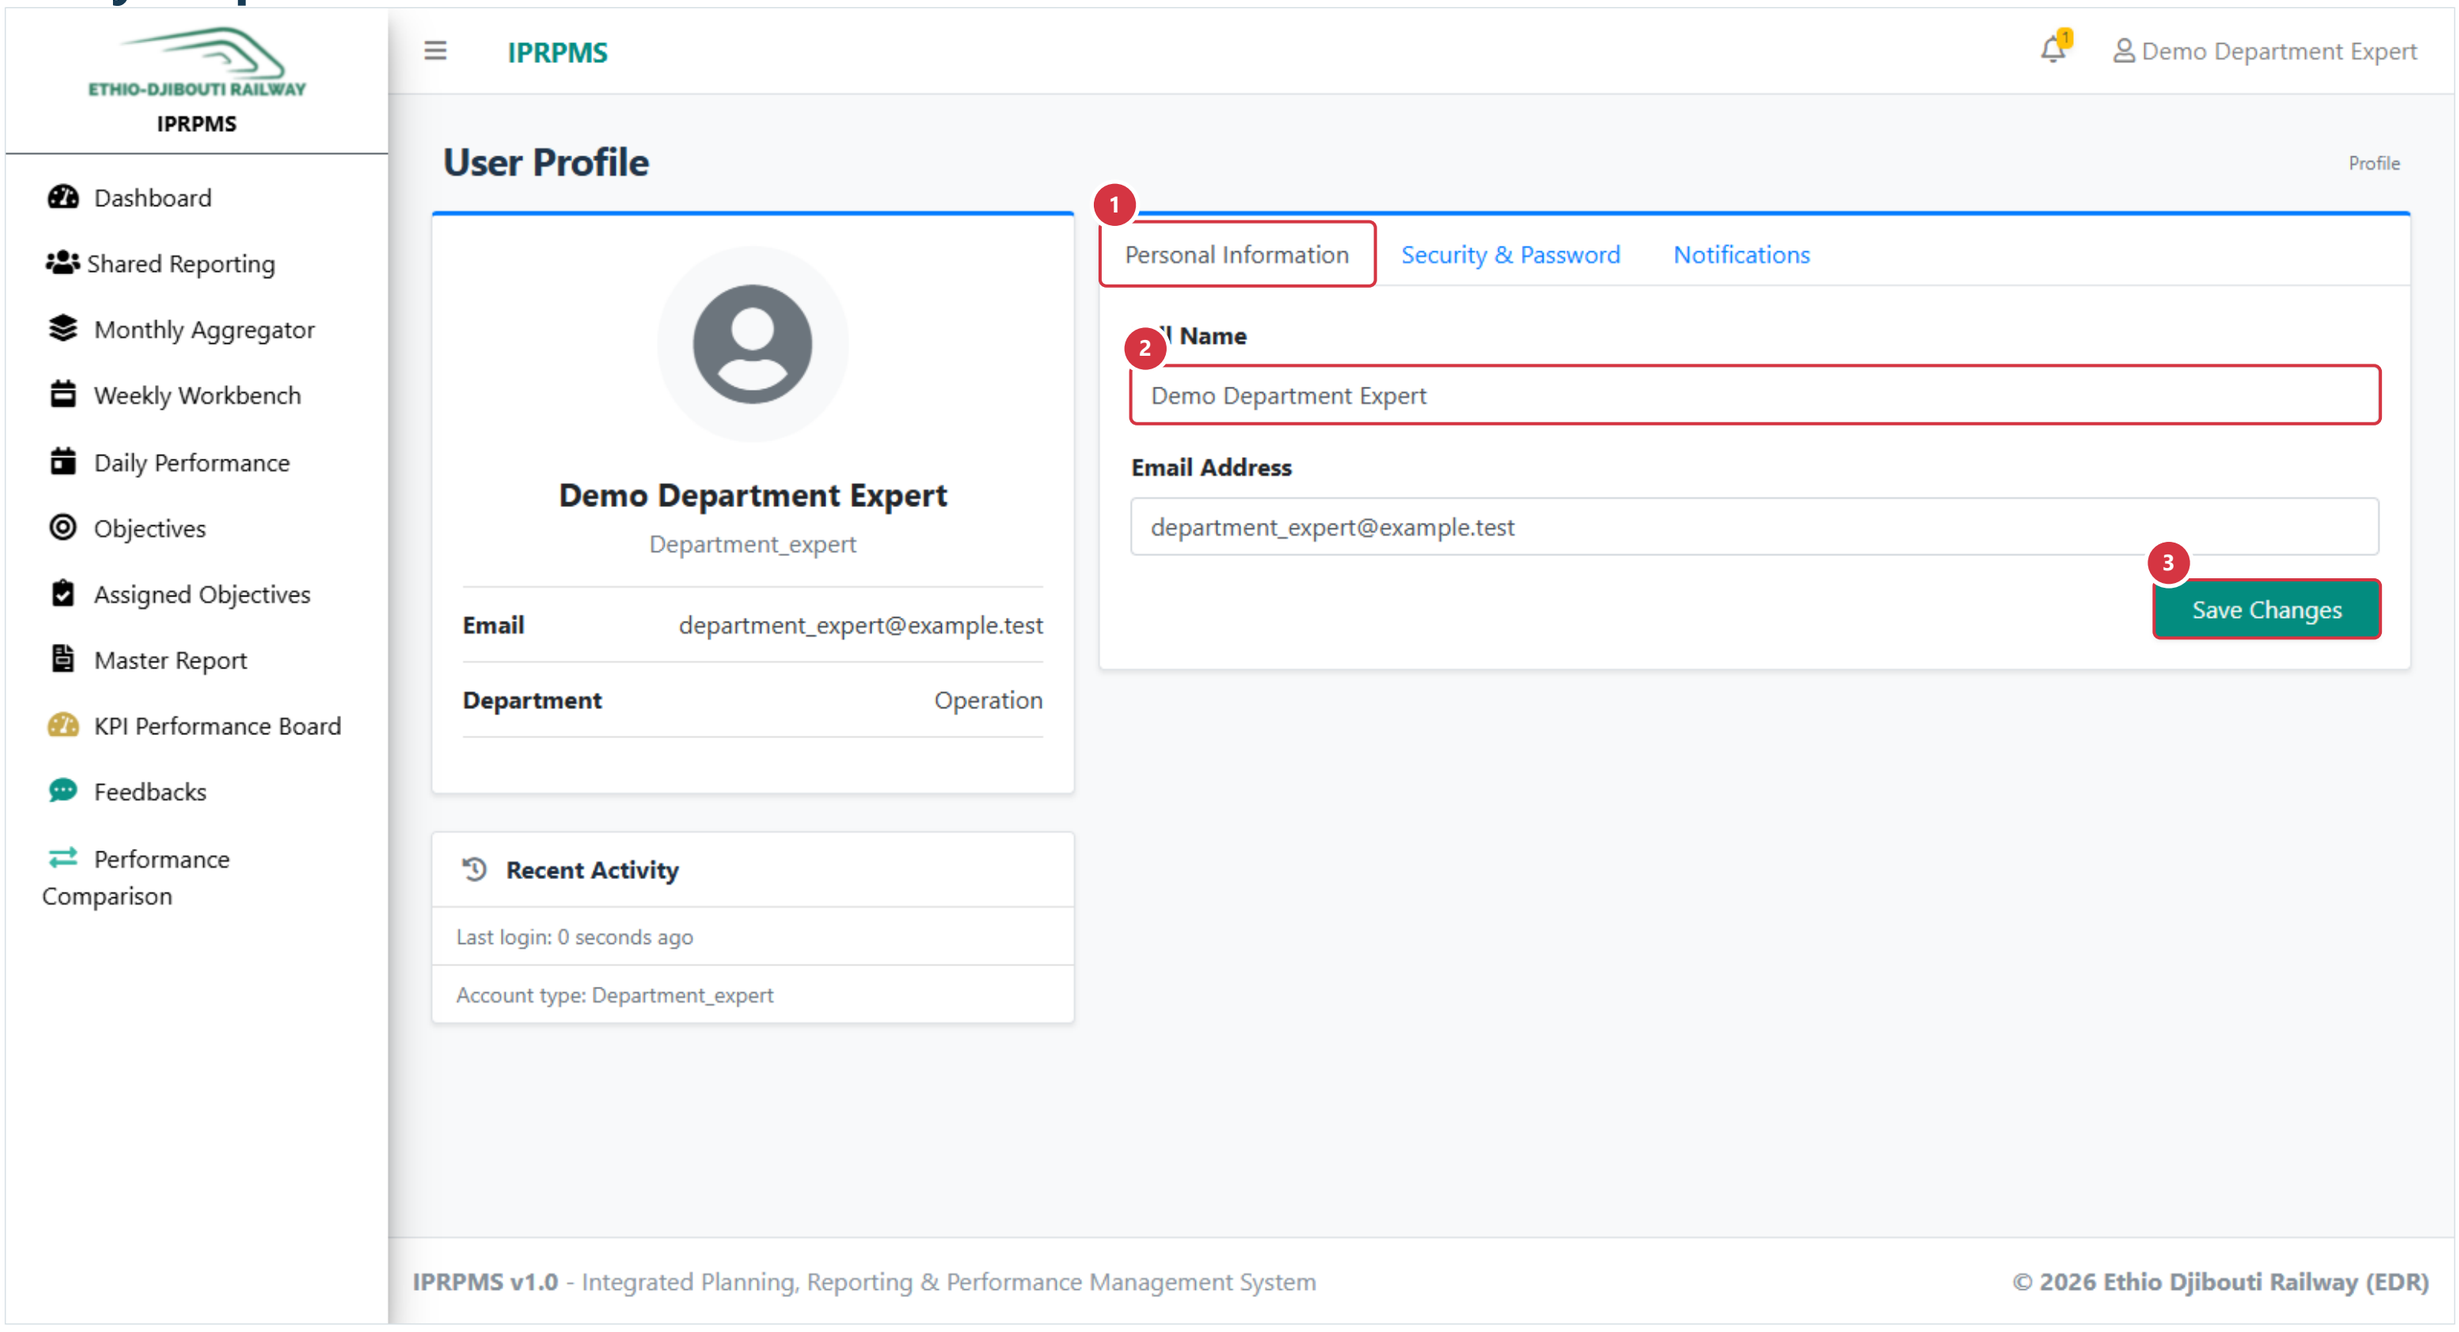

Replace a temporary password

1. Enter the current temporary password.
2. Enter a new private password and repeat it in Confirm new password.
3. Click Change Password and Continue.

After this step: This screen appears when the administrator requires a first password change.

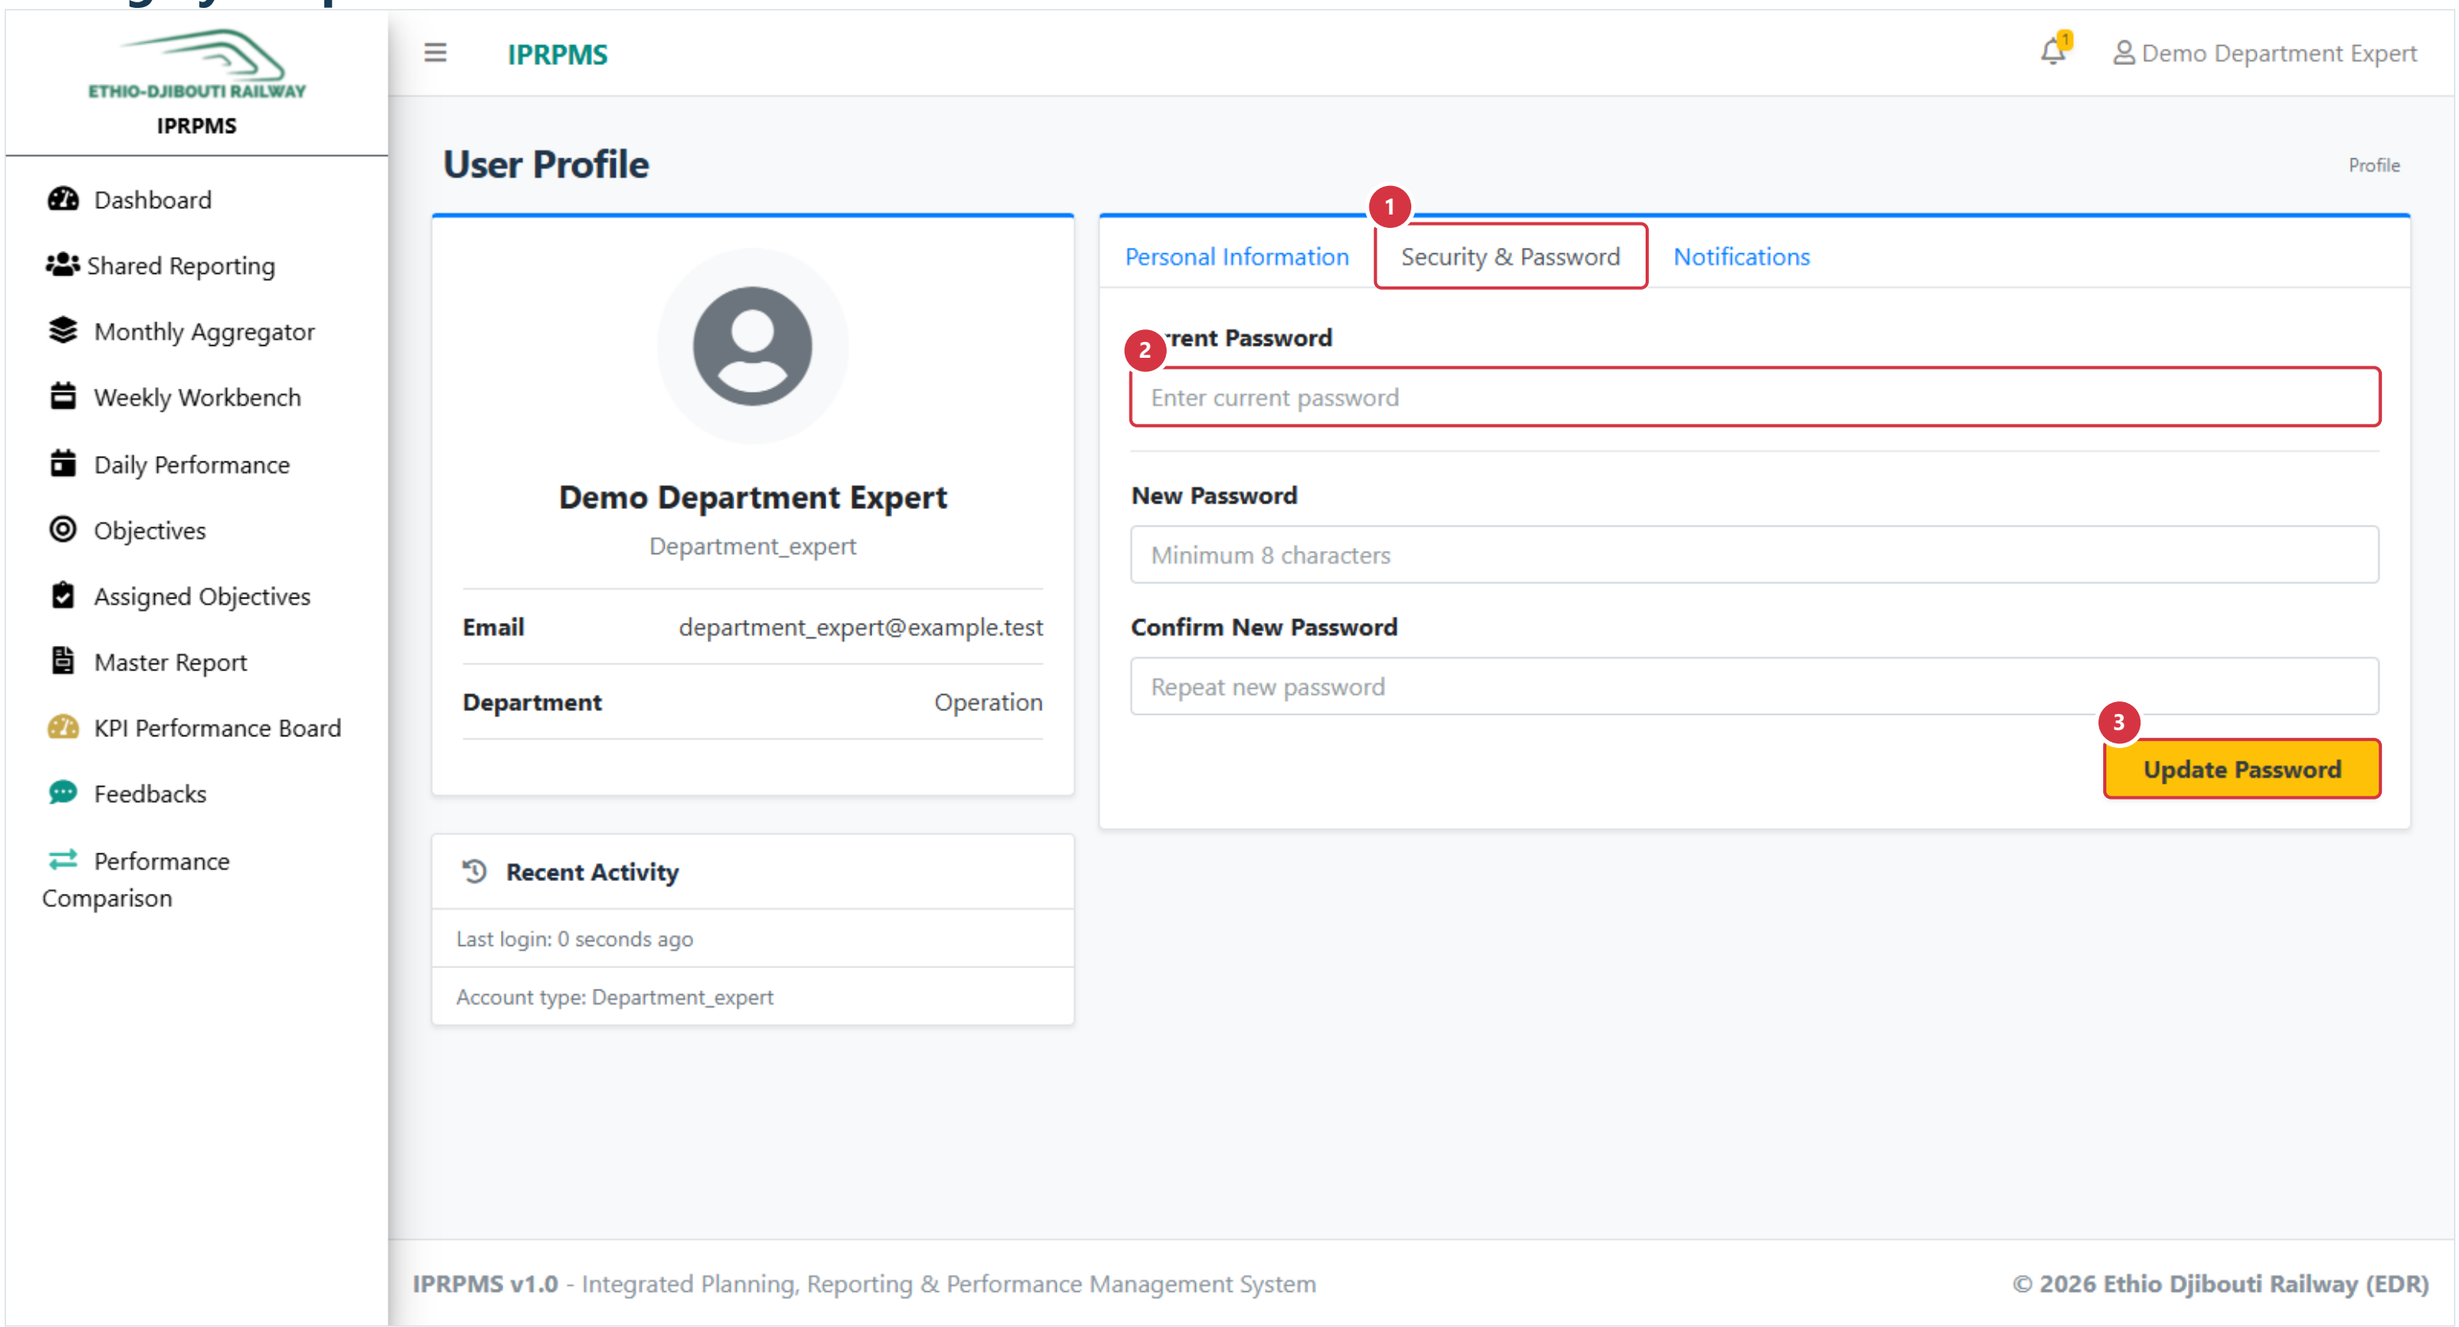

Edit your personal information

1. Click Personal Information in Profile.
2. Update Full Name or Email Address.
3. Click Save Changes and confirm the success message.

After this step: Department and role assignments are managed by the administrator, not through this form.

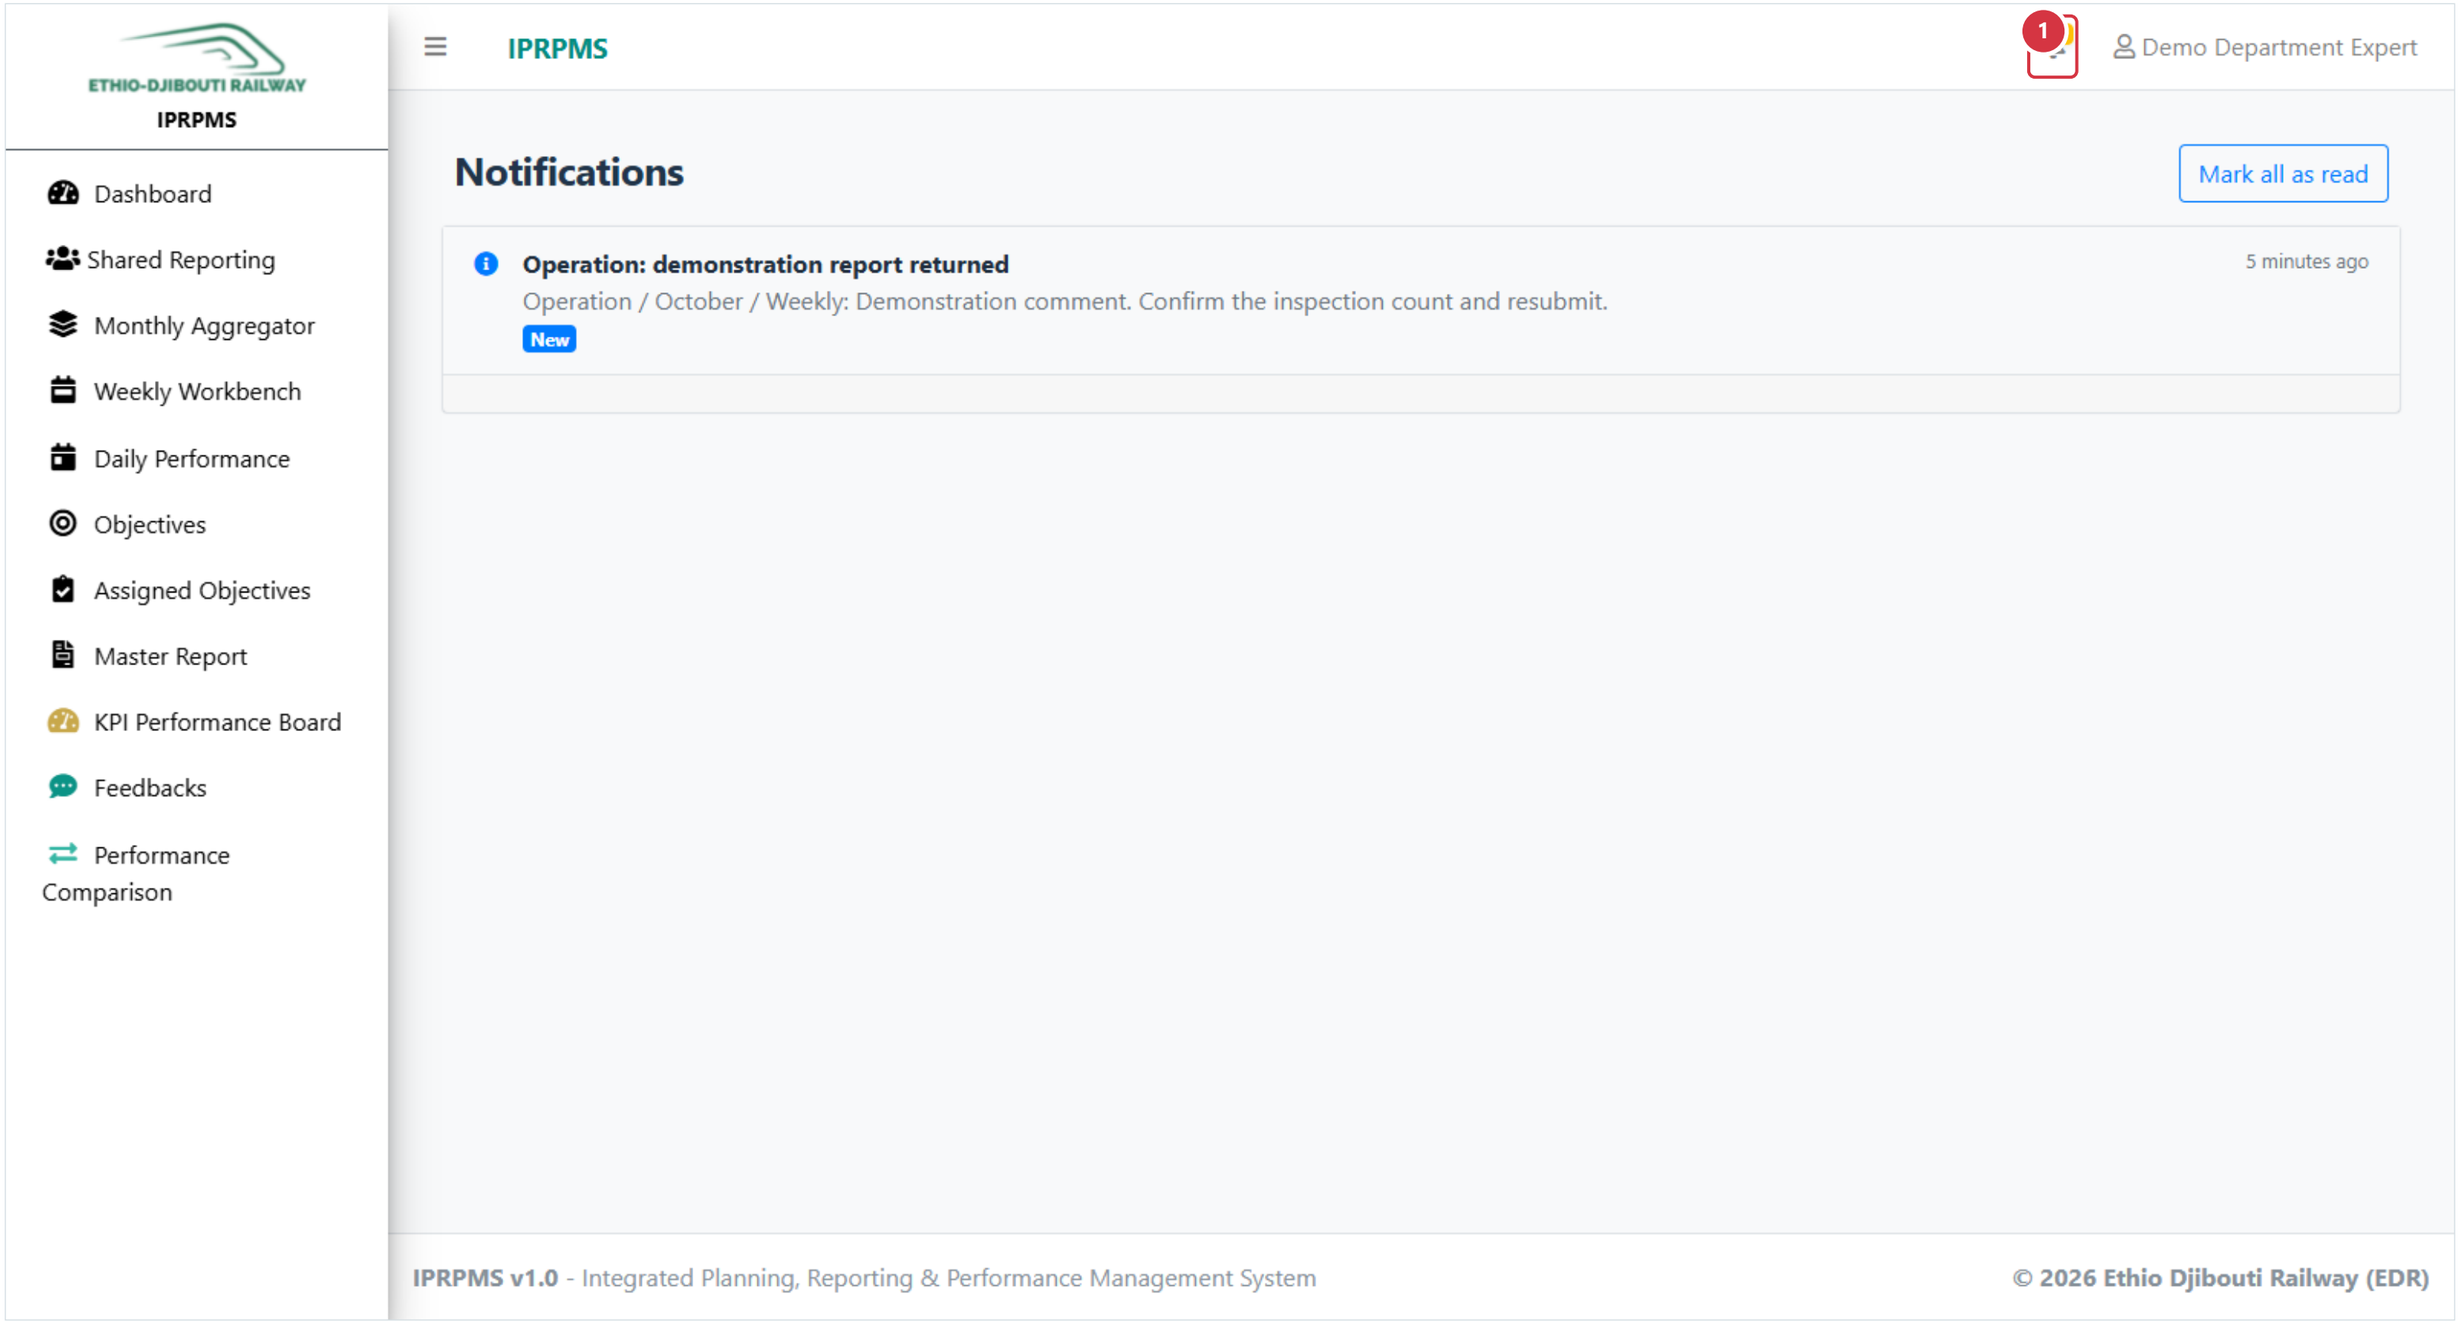

Change your password

1. Click Security & Password.
2. Enter your current password, a new password and its confirmation.
3. Click Update Password.

After this step: Use a private password. The fields are deliberately empty in this training capture.

Read workflow notifications

1. Open the notification bell or Notifications page.
2. Read the department, period, action and review comment.
3. Open the linked record or mark the notice read after acting on it.

After this step: Marking a notification read does not approve, correct or submit the underlying record.

Read final approved plans and reports

Understand the purpose and expected outcome, then follow the real-screen procedures on the next pages.

Why you do this

Read the information approved for general Head Office access; this is a viewing workflow, not a final approval workflow.

Before you click

Confirm the year, reporting period, department and final approved status before relying on a figure.

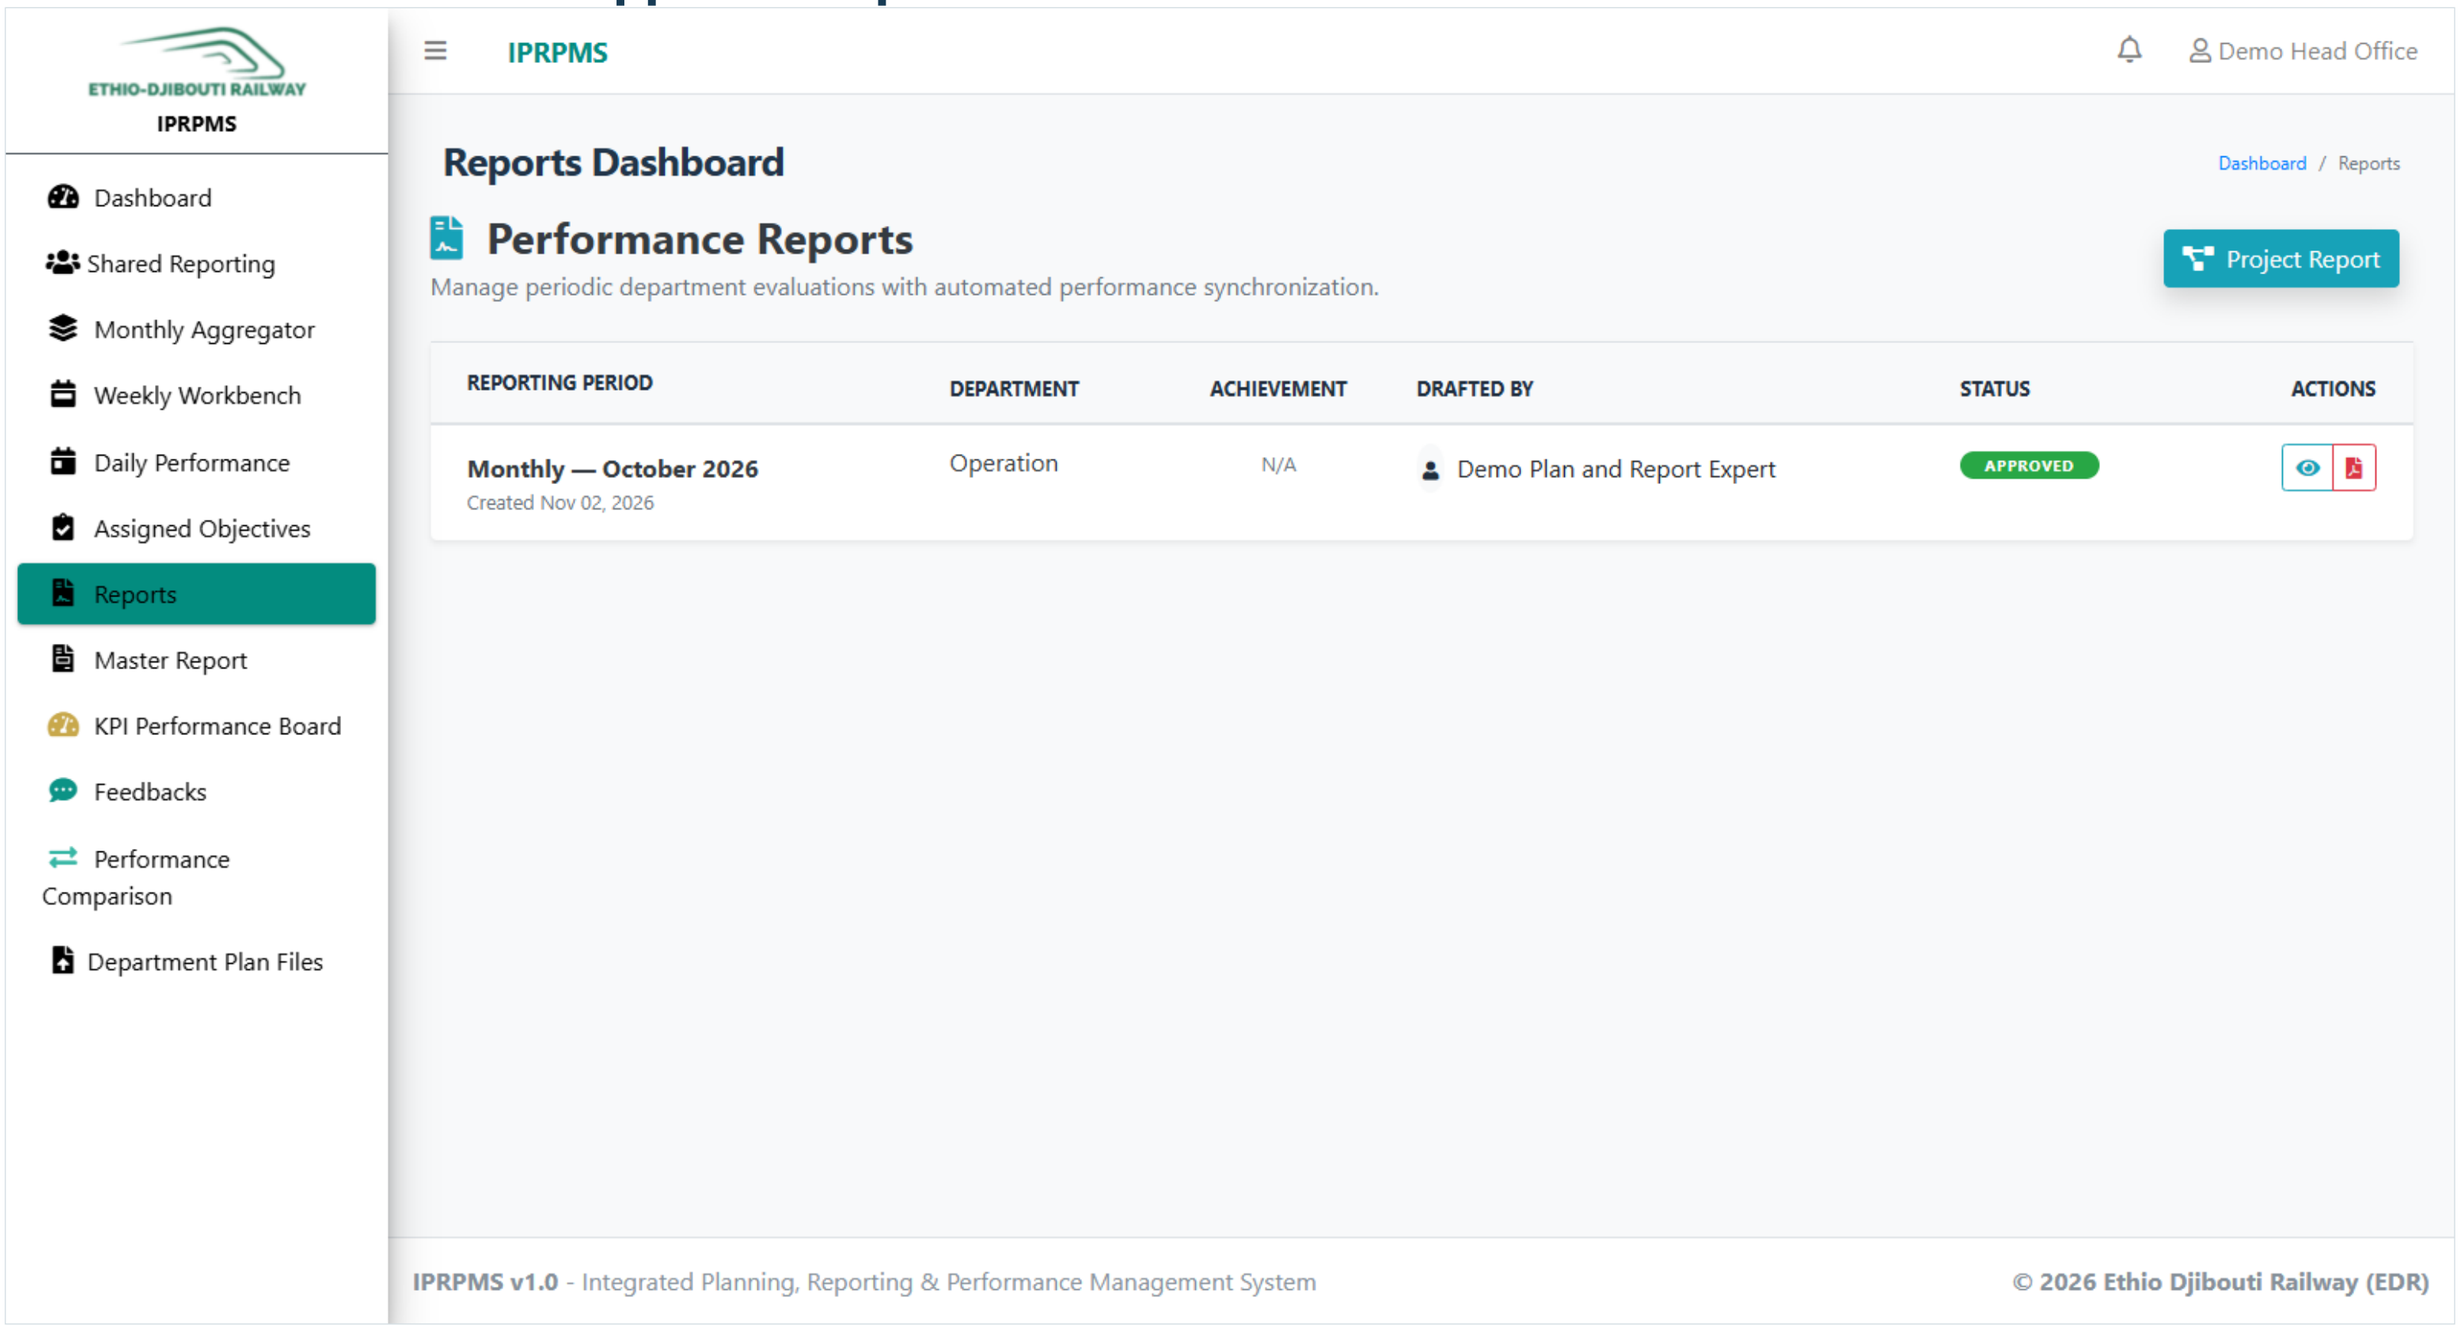

What to check

Open the intended report and read the written explanation with its actual scope. Compare compatible indicators only; a missing result is a coverage gap, not zero.

How you know it worked

Send a specific clarification request to the responsible office if needed. Your viewing role does not gain Approve, Return or period-lock powers.

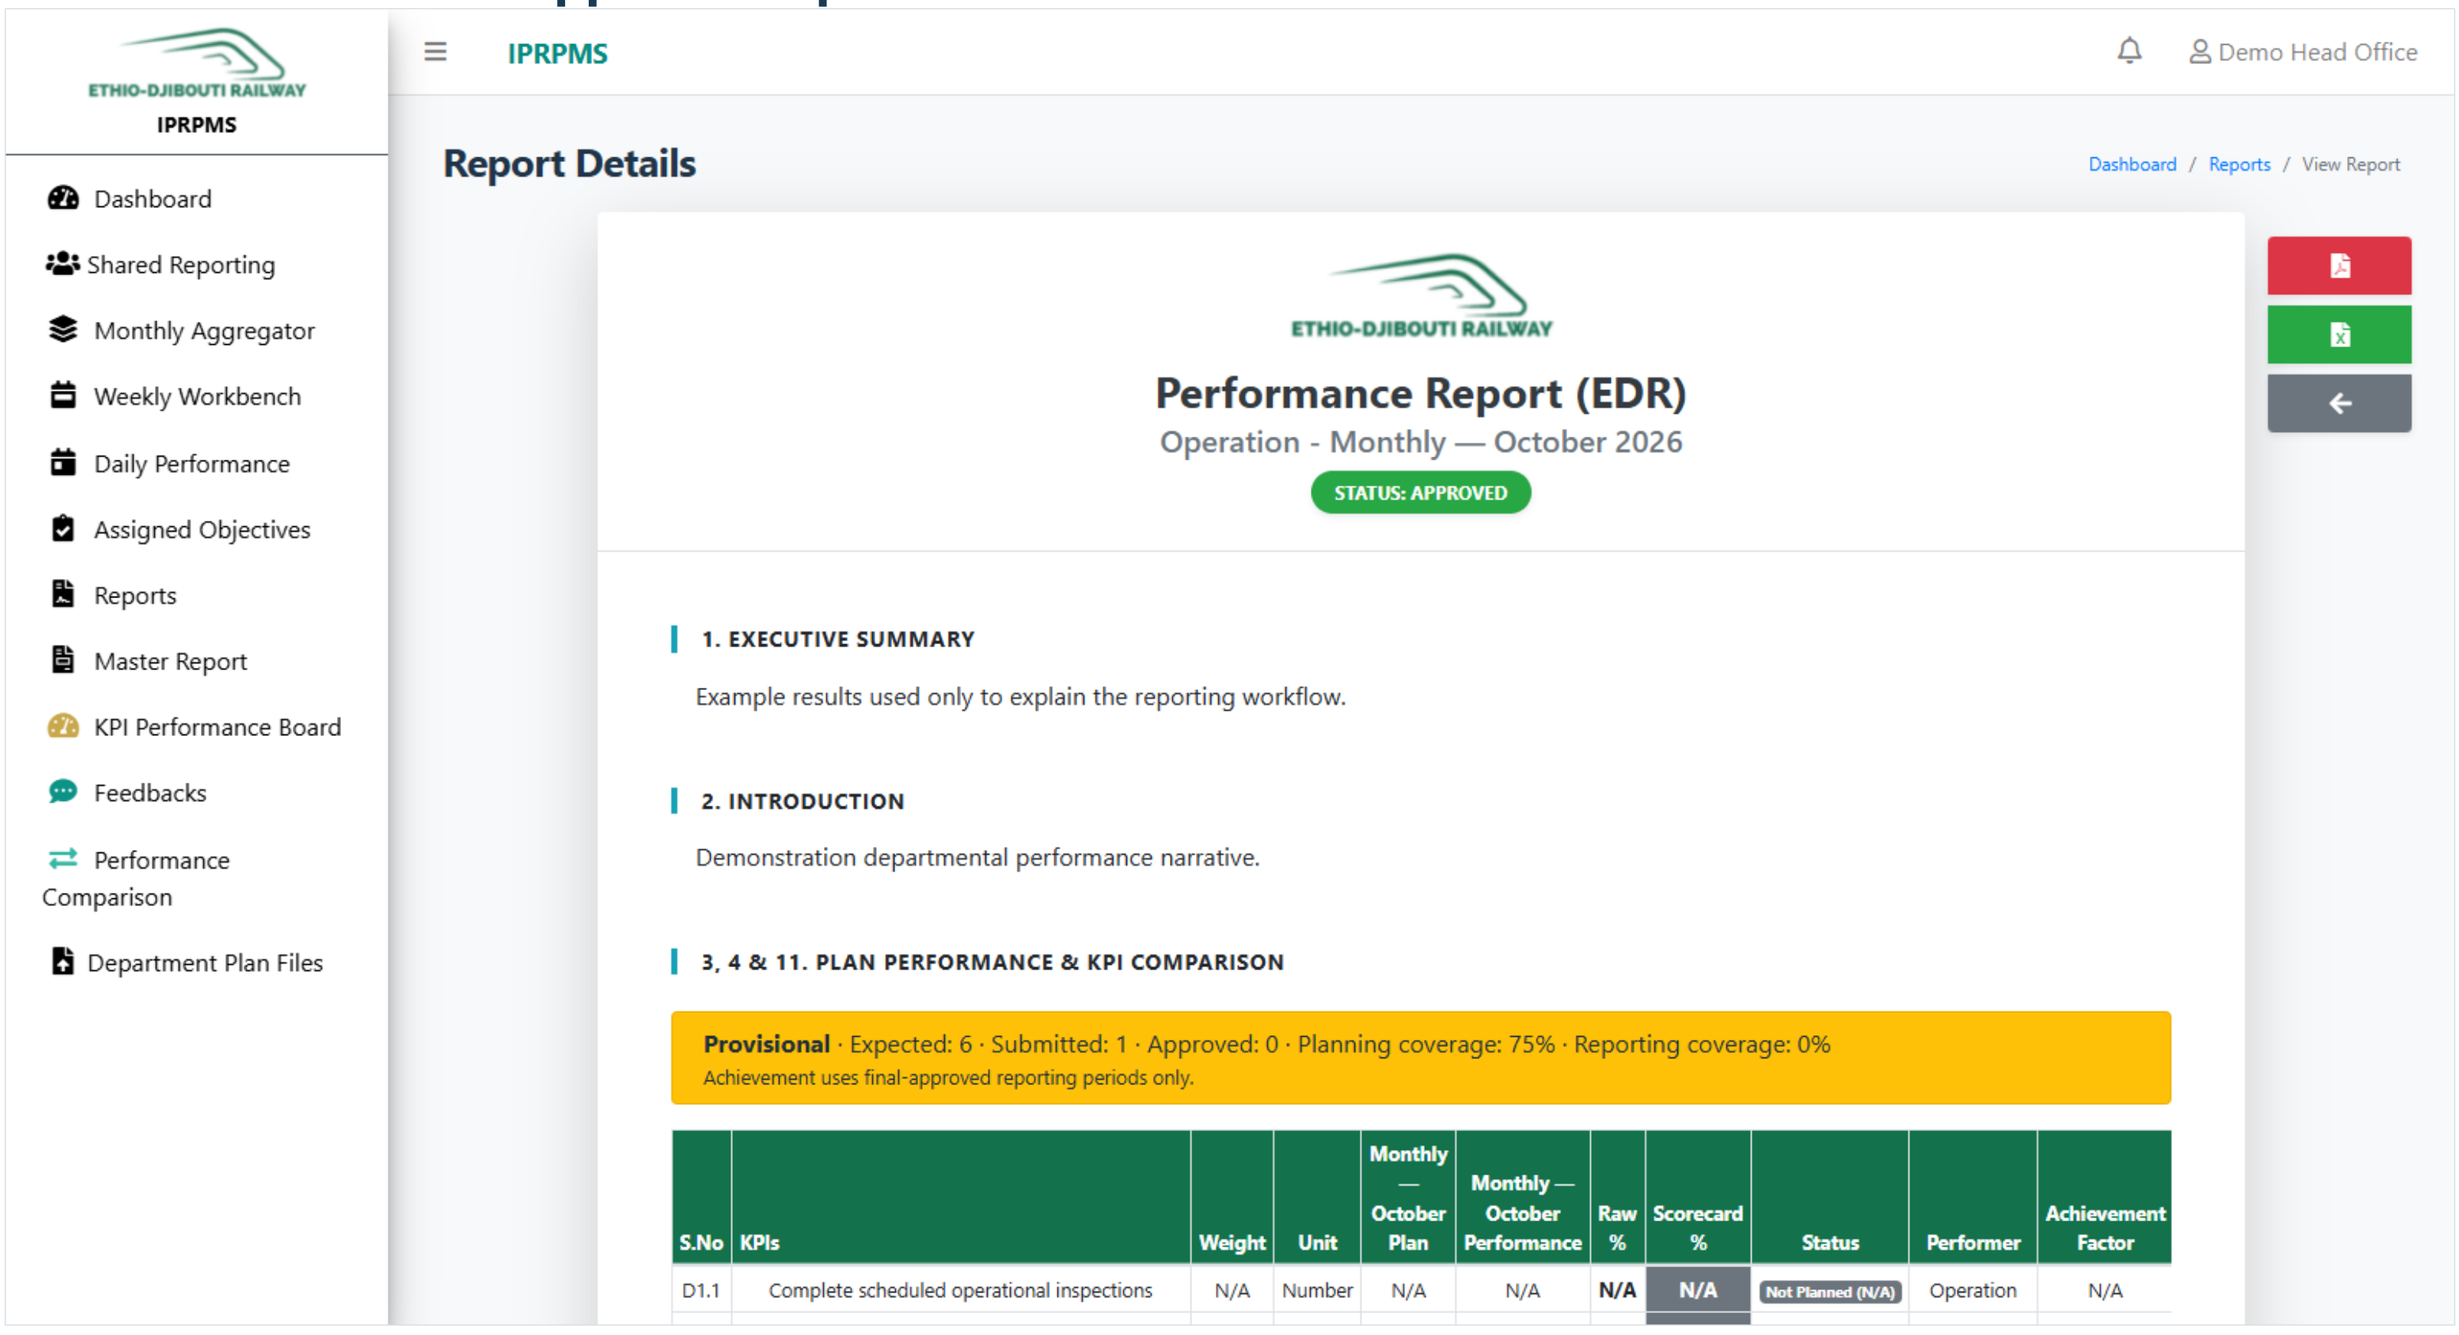

Head Office: find a final approved report

1. Open Reports from the permitted navigation.
2. Check the year, reporting scope and final approved status.
3. Open the view action for the intended report.

After this step: The viewing role reads final approved records and does not make the final approval decision.

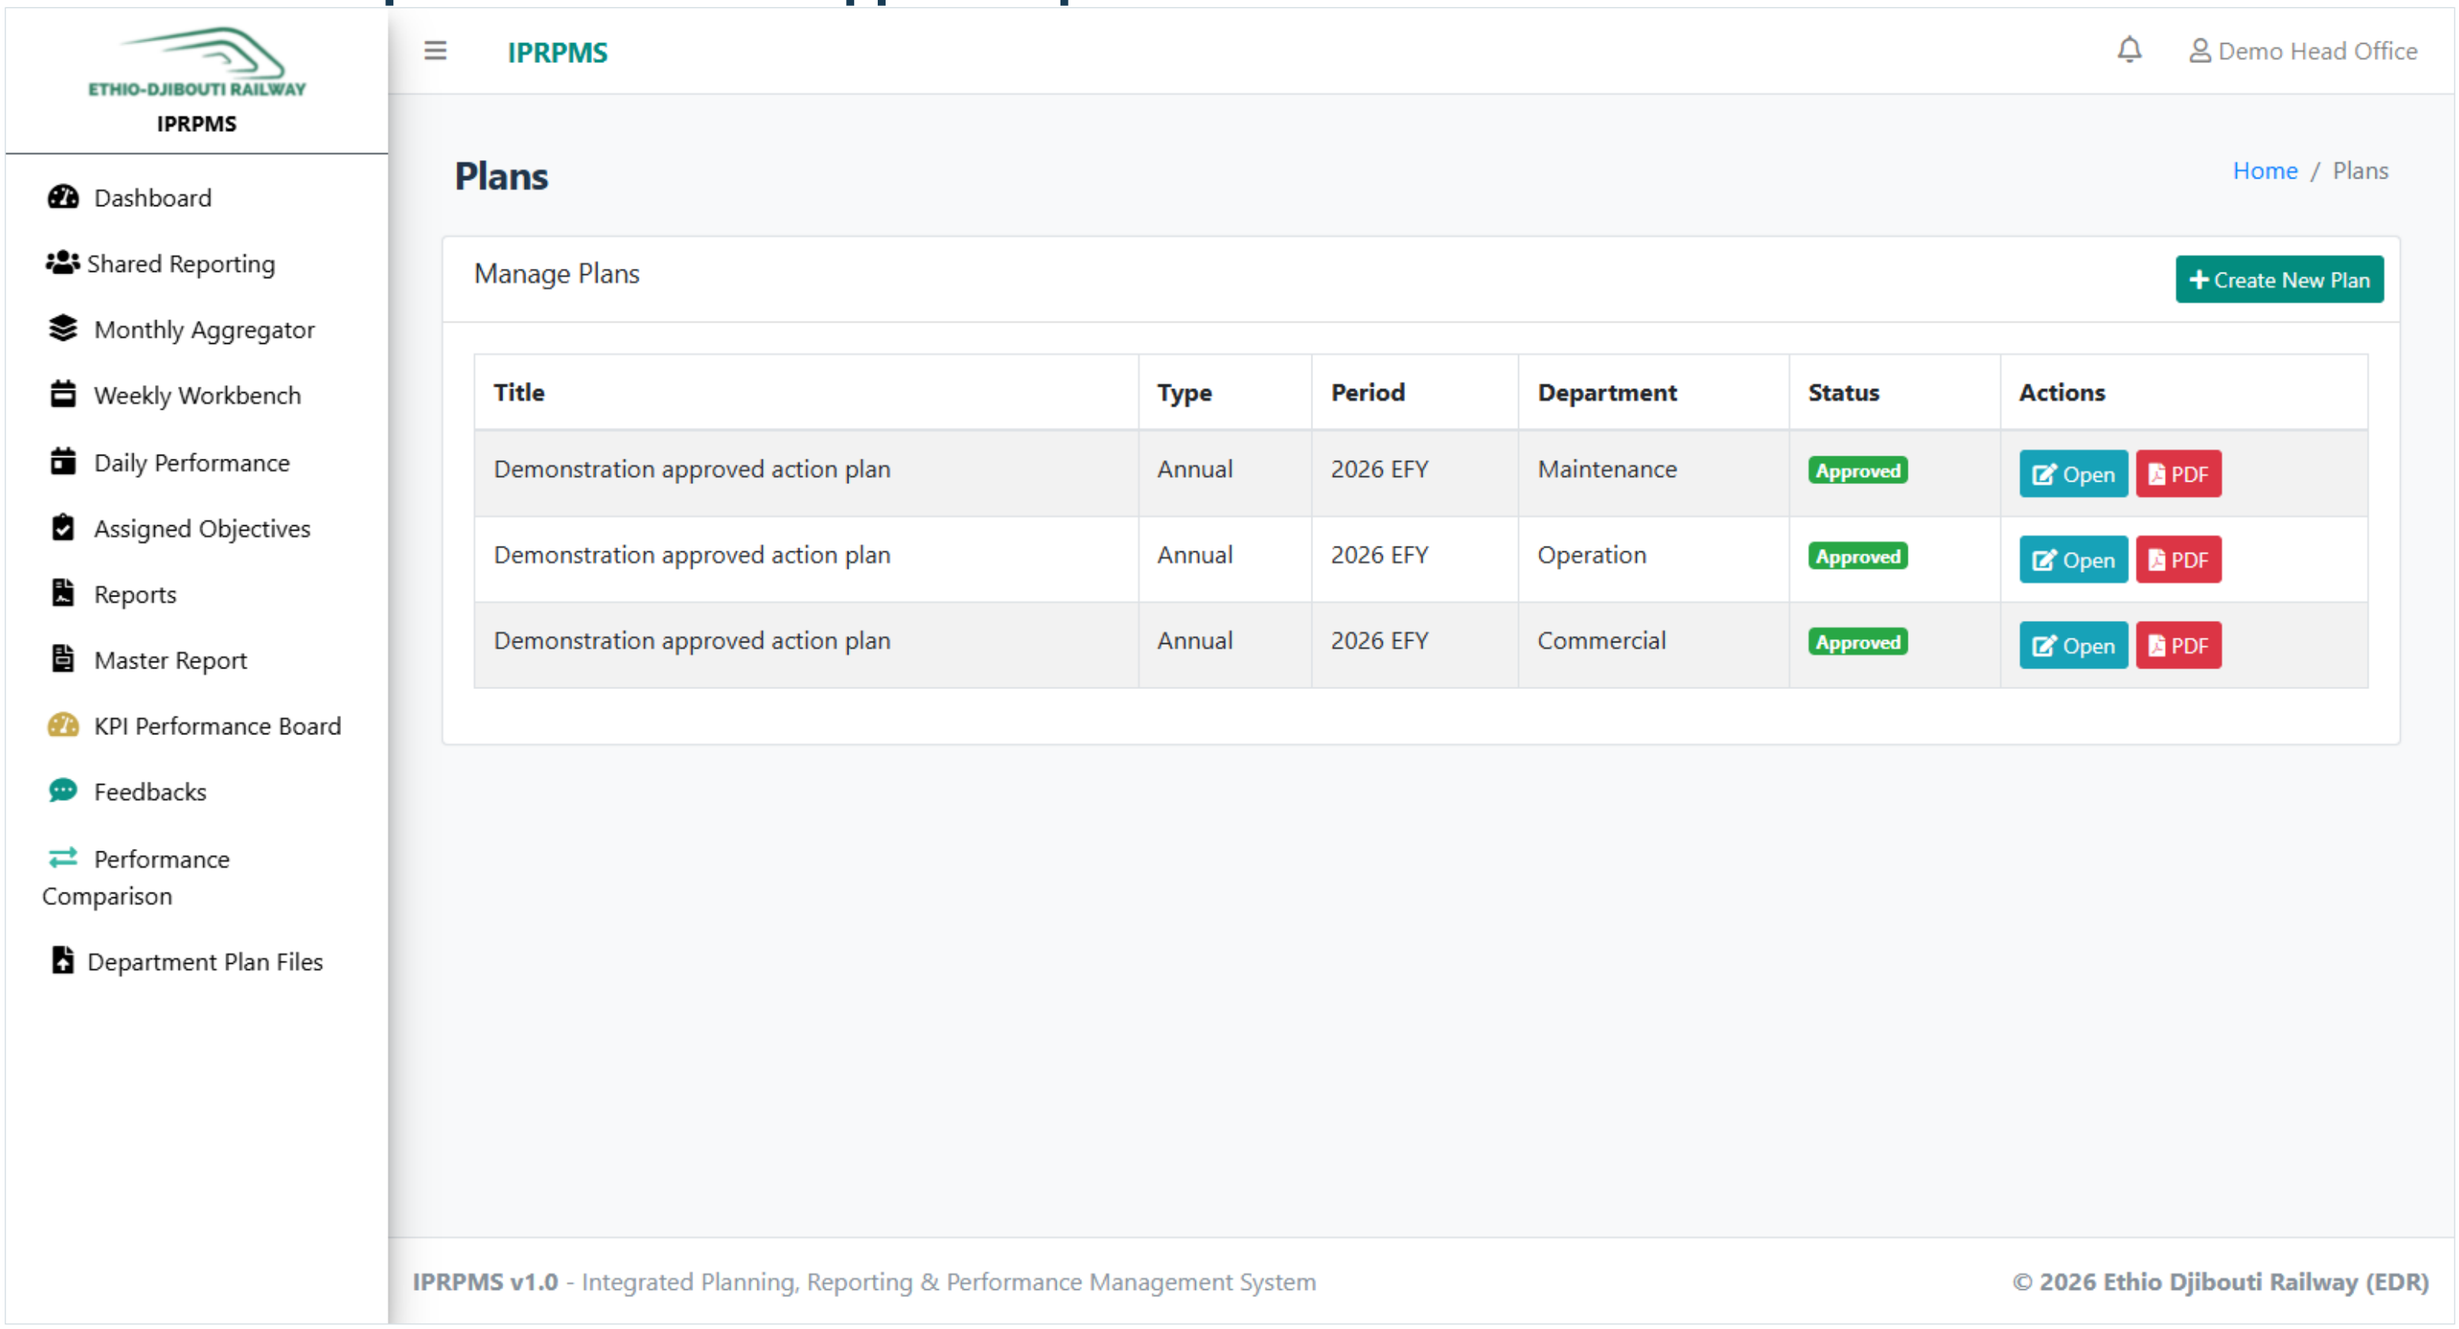

Head Office: read the approved report

1. Read the report heading, selected period and status.
2. Read its performance explanation, challenges and next actions.
3. Send a question to Plan and Report with the department, period and record reference if clarification is needed.

After this step: The document is approved, but the provisional coverage banner means its numeric results are incomplete. Read document status and performance coverage separately.

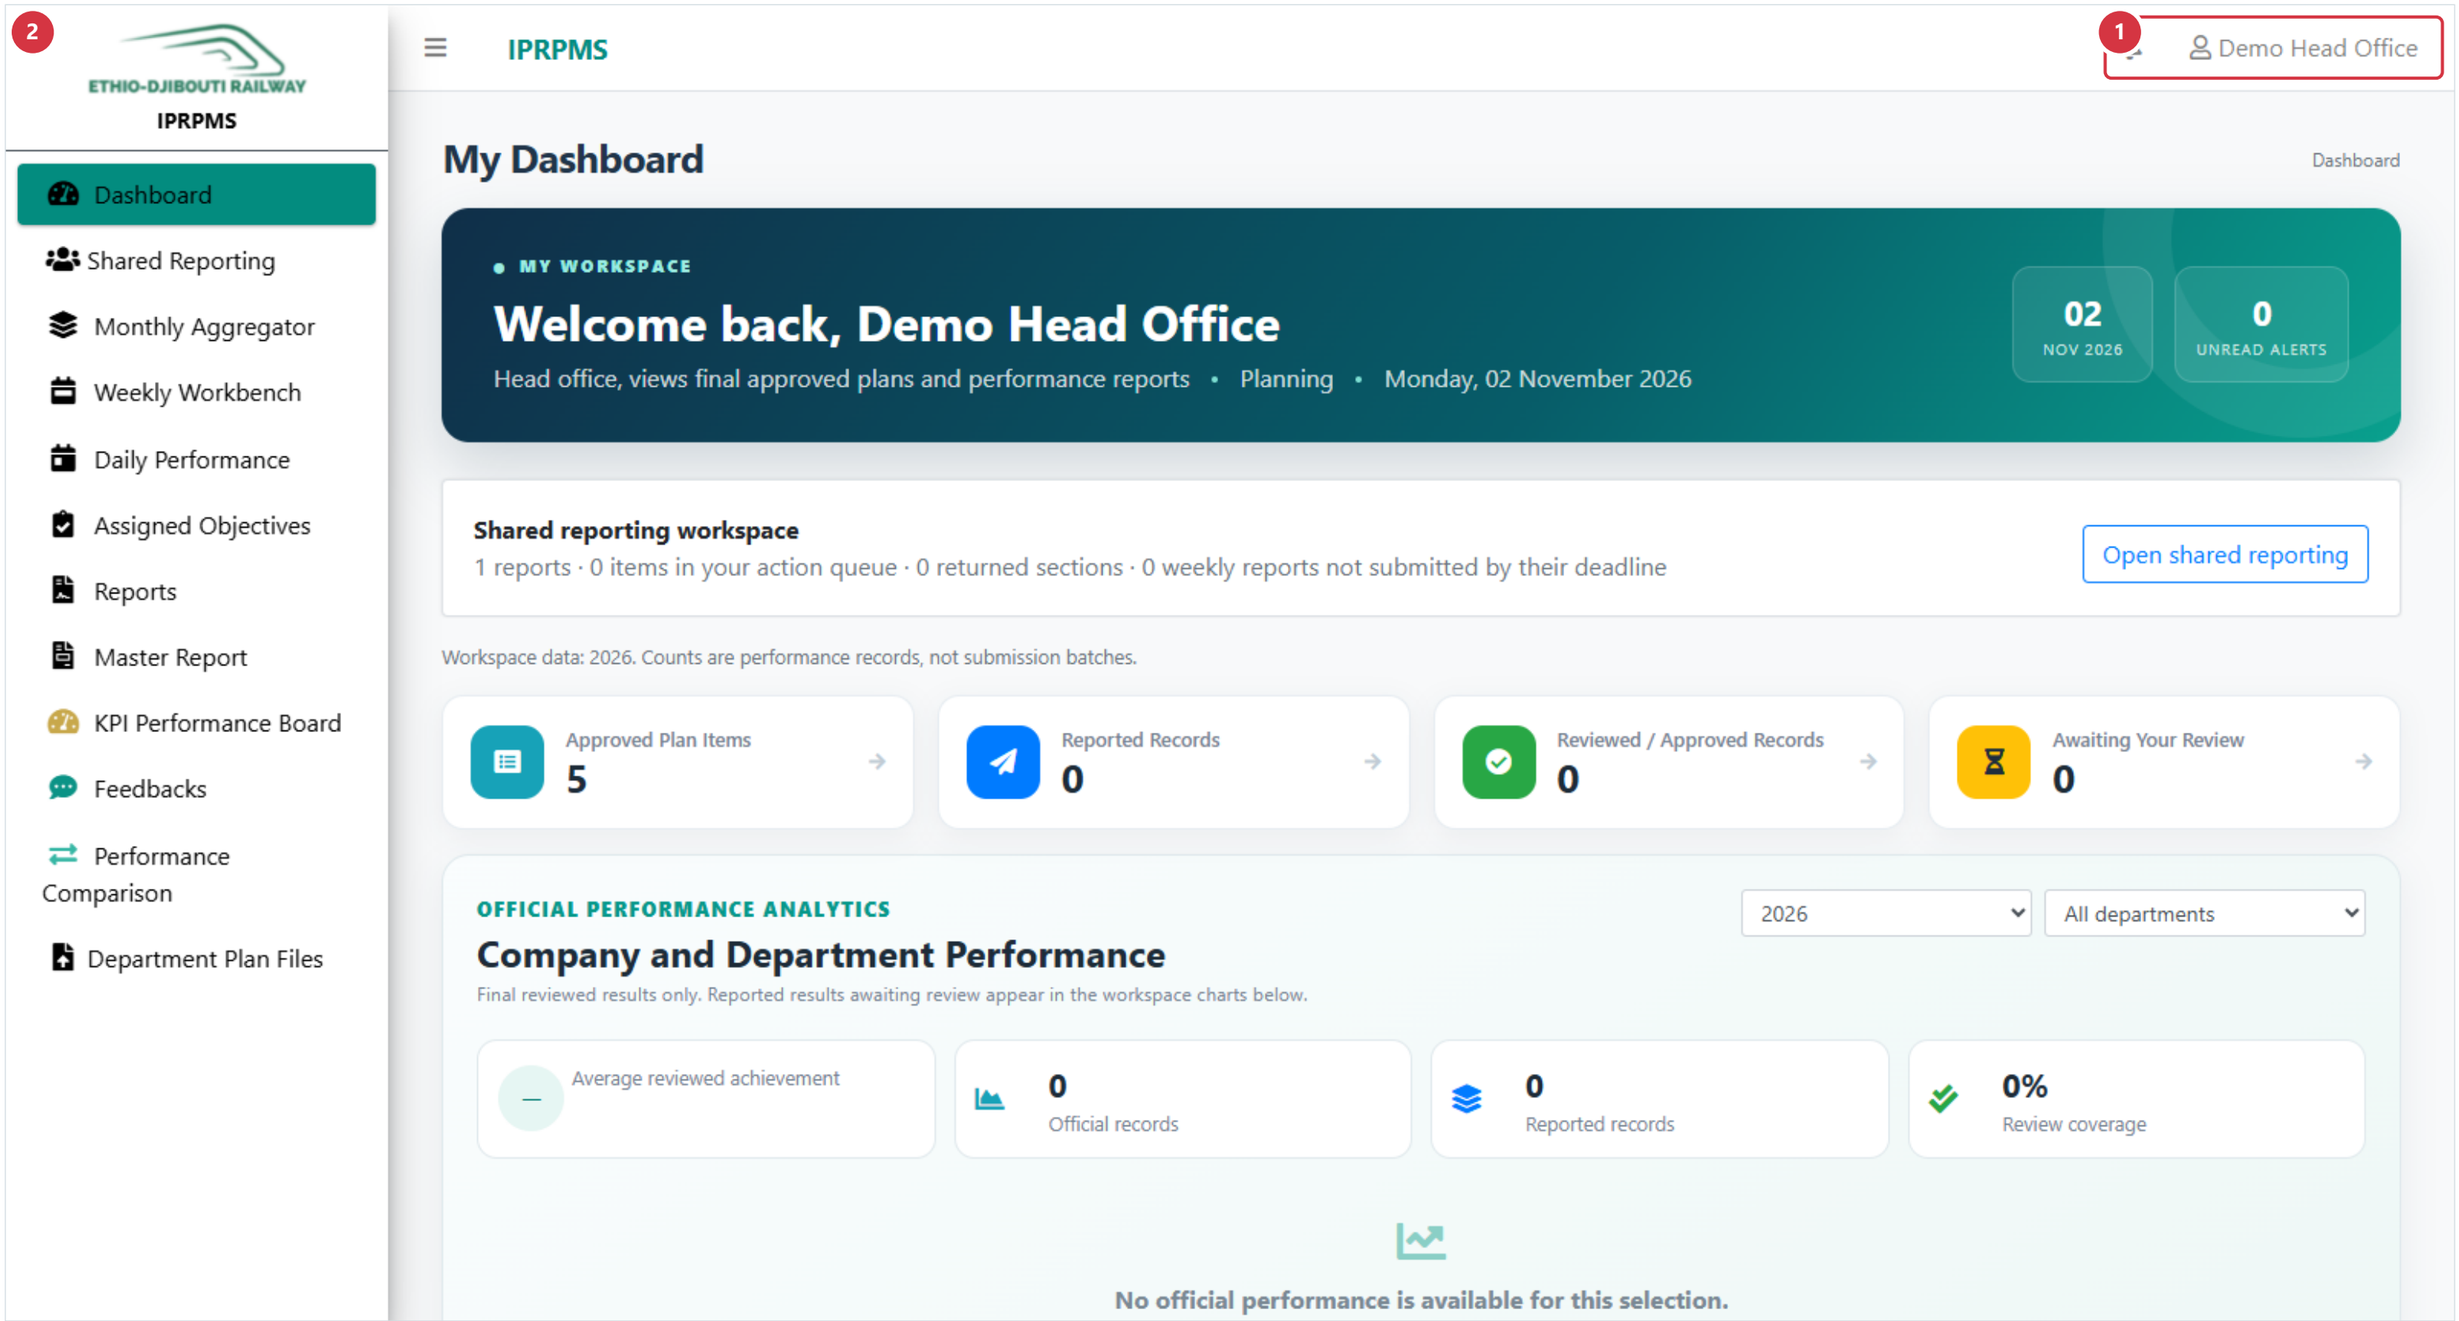

Head Office: inspect the available approved plans

1. Open the authorized plans view.
2. Check the department, year and approved status.
3. Open the intended plan for its objective items.

After this step: Final approved planning information is available within the viewing role scope.

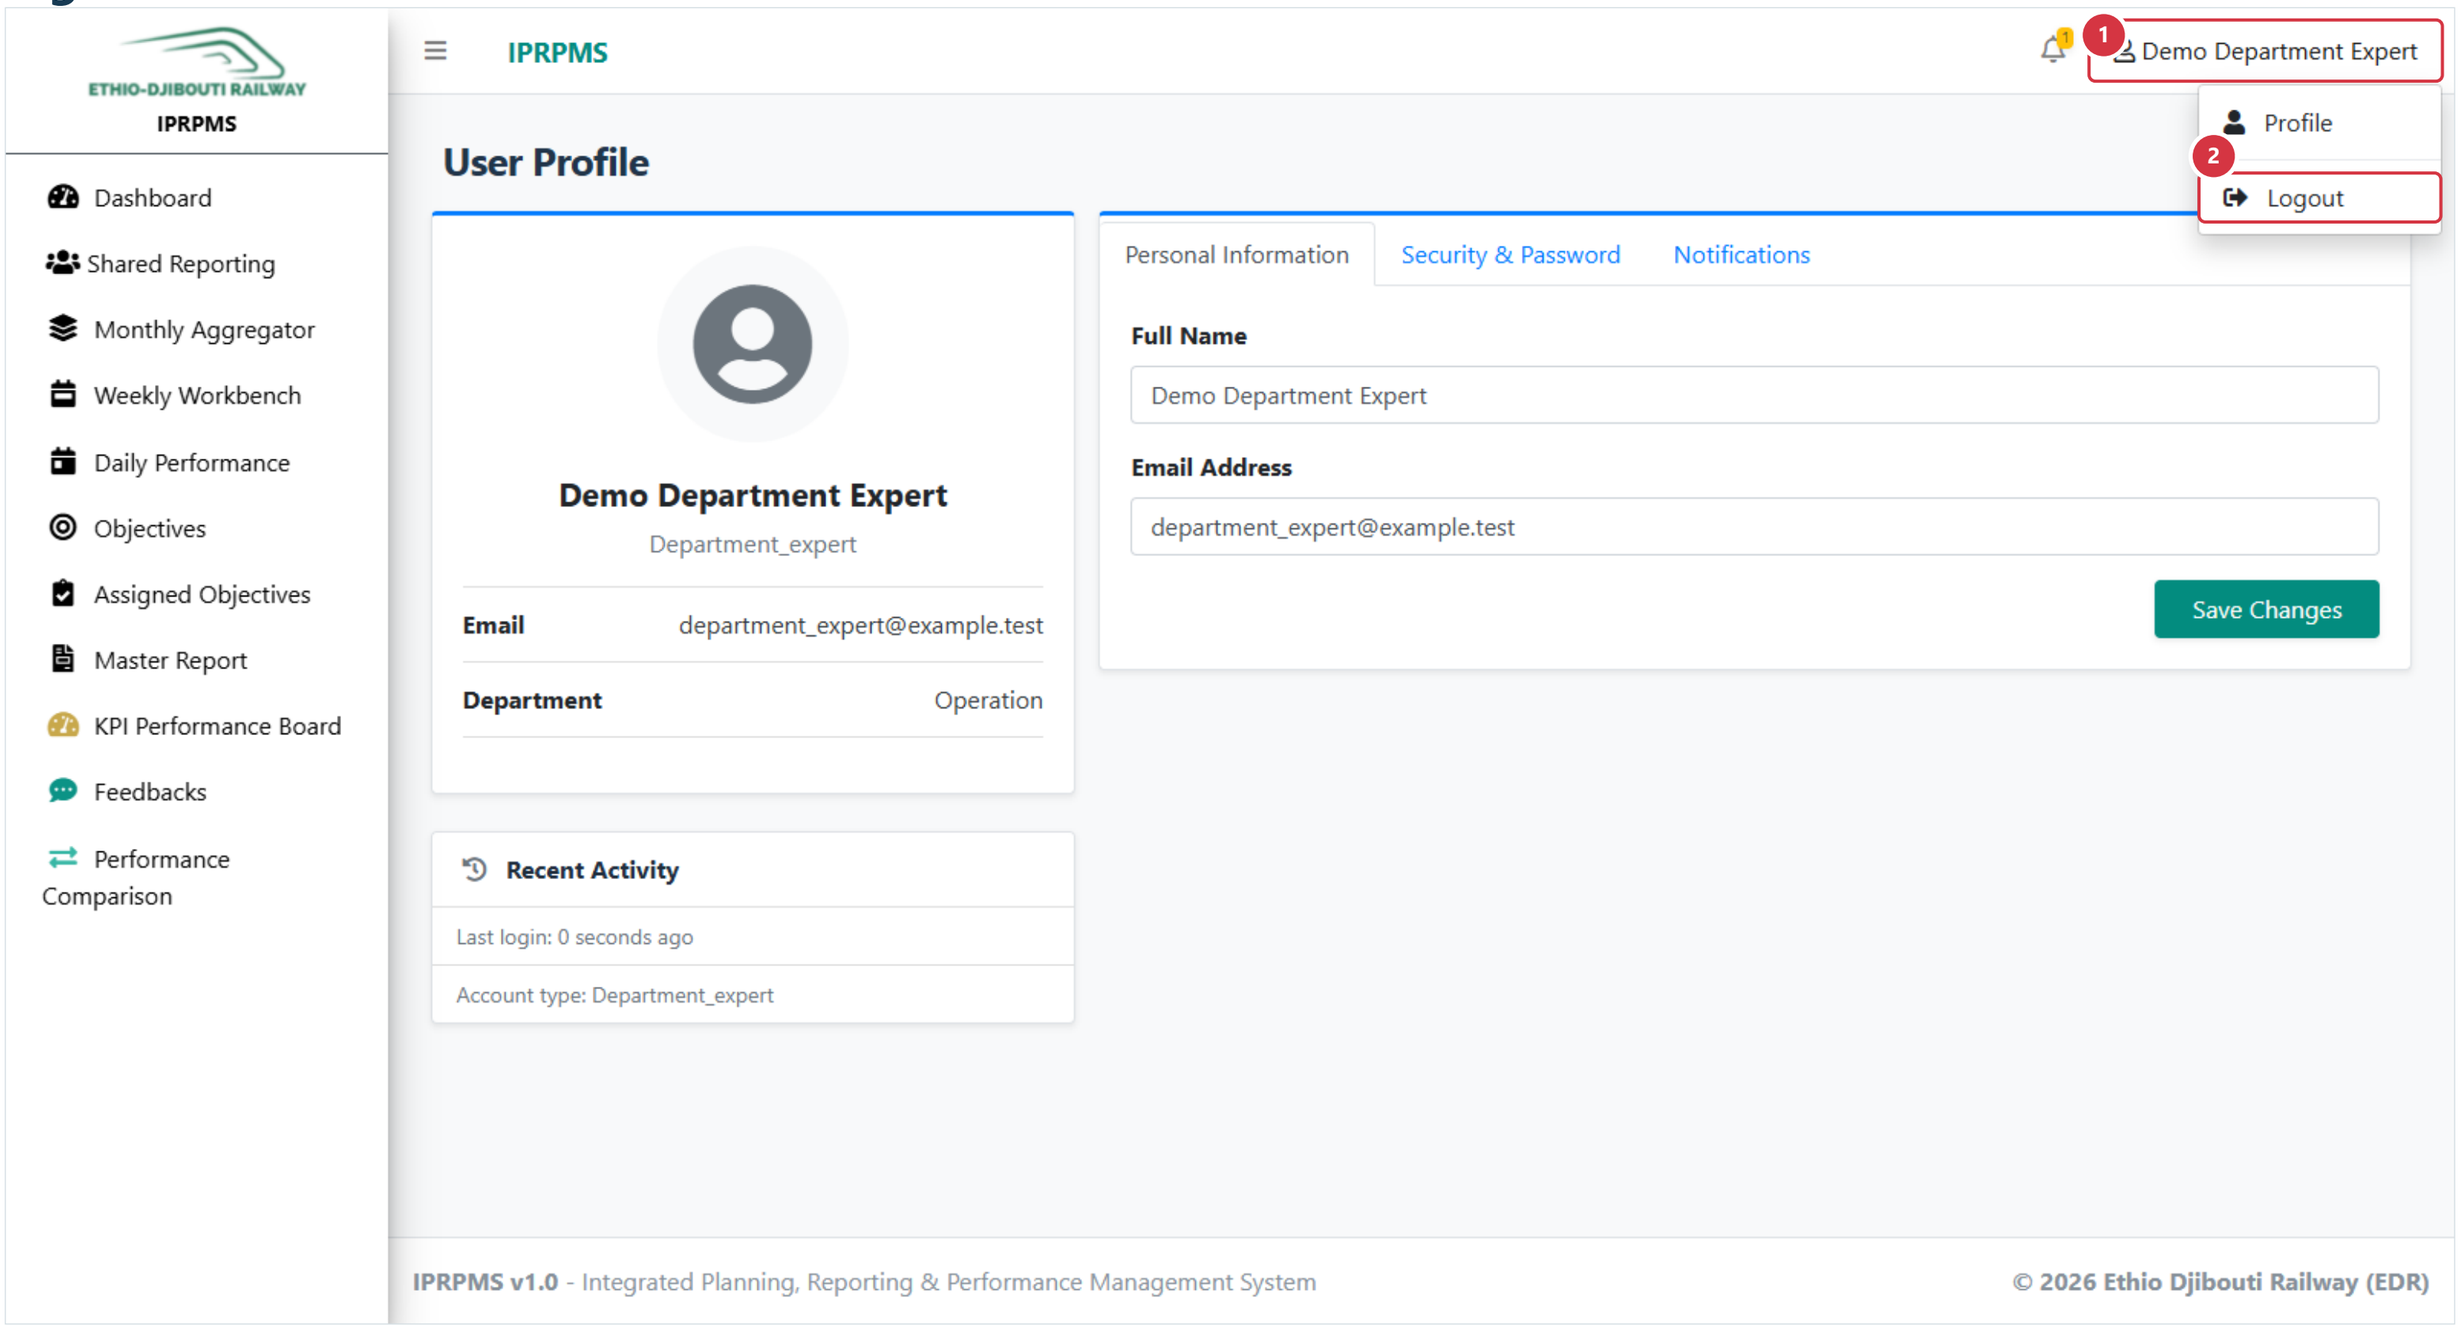

Head Office: home screen

1. Confirm your signed-in role at the top right.
2. Inspect the final approved plans, performance and reports available to general Head Office access.
3. This viewing role differs from Plan and Report Chief, which performs the final workflow decisions.

After this step: Menus vary by permission, department and reporting frequency.

Sign out on a shared device

1. Click your name at the top right to open the user menu.
2. Click Logout after you finish your work.

After this step: The application returns to the sign-in screen after logout.

Before you finish, check these four things

Finish means your part is complete and you know who has the next action. It does not always mean the whole record is finally approved.

Your completion checklist

1. I selected the correct year, department and period. 2. I relied on final approved information within my access. 3. I considered completeness before interpreting the score. 4. Any follow-up identifies the record and responsible office.

If a menu or button is missing

No approval button is expected on this viewing role. If you are the designated final approver, the administrator must verify the separate Plan and Report Chief assignment rather than lending you someone else's account.

Ask for help with useful details

Give IT or the responsible reviewer the module, department, year, reporting period, objective or record reference and exact message. Include a safe screenshot. Never send your password.

Keep the process and data safe

Use your own account, save before sending, read return comments and keep the same record for corrections. Demonstration screenshots are teaching examples, not official performance figures. The separate logistics Import/Export module is excluded.
